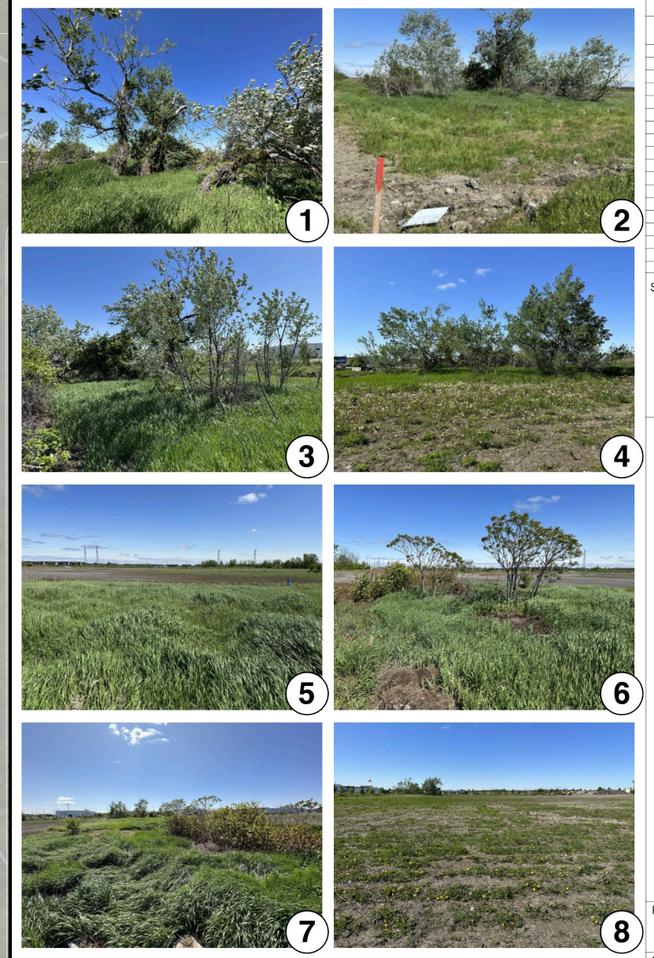
TREE CONSERVATION PLAN

TRINITY CROSSING

SITE CONTEXT



NOTES:

SITE INVESTIGATION FOR THE TREE CONSRATION REPORT WAS CARRIED OUT BY STUDIO RED LANDSCAPE ARCHITECTURE INC., ON MAY 8 & 24, 2023.
REMNANT TREE SPECIES IN THE NORTHWESTCORNER OF THE SITE ARE PREDOMINANTLY WHITE POPLAR; *Populus alba* AND HAWTHORN SPECIES; *Crataegus*. A SINGLE MANITOBA MAPLE; *Acer negundo* IS GROWING ON THE EAST SIDE OF THE POPLAR. THE PARENT POPLAR TREES ARE IN DECLINE AND IN POOR CONDITION WHILE THE SMALL EMERGING POPLAR COLONIES ARE IN GOOD HEALTH AND RANGE BETWEEN DBH 1 CM to 15 CM.
THE NORTHEAST CORNER OF THE SITE CONTAINS A CLUMP OF YOUNG STAGHORN SUMAC; *Rhus typhina* AND A SINGLE SMALL HAWTHORN; *Crataegus* OF 8 CM CALIPER. A CLUMP OF INVASIVE JAPANESE KNOTWEED; *Fallopia japonica* IS THRIVING ADJACENT TO THE SUMAC.
ALL EXISTING TREES ARE PROPOSED FOR REMOVAL TO ACCOMMODATE SITE GRADING FOR THE PROPOSED TRINITY CROSSING DEVELOPMENT.
NEW TREES AND SHRUBS WILL BE PLANTED AS PER SITE PLAN CONTROL REQUIREMENTS.
