Phase I-Environmental Site Assessment

1966 Roger Stevens Drive
Ottawa, Ontario

Prepared For

Broccolini

June 17, 2019

Report: PE4638-1

TABLE OF CONTENTS

List of Figures

List of Appendices

EXECUTIVE SUMMARY

Assessment

Paterson Group was retained by Broccolini to conduct a Phase I-Environmental Site Assessment (ESA) for the property located at 1966 Roger Stevens Drive, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the Phase I Property was initially developed prior to 1961 with a farmstead, which was later abandoned circa 2003. Historical land use of the neighbouring properties was for residential and agricultural purposes. No potentially contaminating activities were identified with the historical use of the subject site or surrounding lands.

Following the historical research, a site visit was conducted. The subject property is currently vacant with abandoned farm structures. An interior assessment was not conducted due to unsafe conditions of the buildings. No potential environmental concerns were noted with the current use of the Phase I Property. Neighbouring properties in the Phase I Study Area consist of vacant lands, residential dwellings and farmsteads and agricultural fields. No potential environmental concerns were noted with the current land use in the Phase I Study Area. Therefore, no areas of potential environmental concern with respect to the Phase I Property were identified.

Based on the results of the assessment, it is **our opinion that a Phase II-Environmental Site Assessment is not required for the subject property.**

Recommendations

It is recommended that building debris on the subject site be properly disposed at a licenced landfill during future site redevelopment.

1.0 INTRODUCTION

At the request of Broccolini, Paterson Group (Paterson) conducted a Phase I-Environmental Site Assessment (Phase I-ESA) for the property located at 1966 Roger Stevens Drive, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the site and study area and to identify any environmental concerns with the potential to have impacted the subject properties.

Paterson was engaged to conduct this Phase I-ESA by Mr. James Beach of Broccolini. The head office is located at 16766 Transcanadienne, Kirkland, Quebec. Mr. Beach can be reached by telephone at (514) 737-0076.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all of our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared in general accordance with the requirements of Ontario Regulation (O.Reg.) 153/04, as amended, under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

2.0 PHASE I PROPERTY INFORMATION

Address:	1966 Roger Stevens Drive, Ottawa, Ontario
Legal Description:	Plan 4M1191 Block 13 and 14, in the City of Ottawa
Location:	The site is located on the southwest quadrant of where Roger Stevens Drive transects Highway 416, in the City of Ottawa, Ontario. Refer to Figure 1 - Key Plan in the Figures section following the text.
PIN:	03913-0317, 03913-0318, 03913-0319, 03913-0320, 03913-0321, 03913-0322, 03913-0326, 03913-0327, and 03913-0328
Latitude and Longitude:	45° 8’ 27.6" N, 75° 41' 13.24" W

Site Description:

Configuration:	Irregular
Area:	25 hectares (approximately)
Zoning:	RC – Rural Zone
Current Use:	The subject site is currently an abandoned farmstead and vacant land.
Services:	The subject site is situated in an area where private wells and septic systems are relied upon.

3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject properties, and if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of O.Reg. 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01;
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

4.0 RECORDS REVIEW

4.1 General

Phase I-ESA Study Area Determination

A radius of approximately 250 m was determined to be appropriate as a Phase I Study Area for this assignment. Properties outside the 250 m radius are not considered to have impacted the subject land, based on their significant distance from the site.

First Developed Use Determination

Based on a 1961 domestic well record and an aerial photograph for the subject site, the Phase I Property is considered to have been first developed for residential and agricultural purposes pre-1961.

Fire Insurance Plans

Fire Insurance Plans (FIPs) are not available for the subject area.

City of Ottawa Street Directories

There are no city directories for the subject site and study area.

Chain of Title

Paterson verified the current land title for the subject property with Read Abstracts Limited.

According to the chain of title received on May 29, 2019, the subject property was owned by a series of private individuals from 1855 to 2003, until November 7, 2003, when the deed was transferred to the current owner, MCU Holding Inc. No concerns were identified during a review of the chain of title for the Phase I Property.

Geotechnical Investigation

Paterson conducted a subsurface investigation on June 13, 2019. Based on the findings of the investigation, the subsurface profile generally consists of topsoil overlying glacial till (silty sand with traces of gravel and clay). Practical refuse occurred at approximately 3.8 m to 6.5 m below the existing grade. No concerns were identified during the subsurface investigation.

Proposed Site Plan

A proposed site plan dated June 3, 2019 was provided by Broccolini. The site plan shows the subject site in its current configuration with a proposed light industrial warehouse. A copy of the proposed plan is appended to this report in Appendix 1.

4.2 Environmental Source Information

Environment Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on May 24, 2019. The subject site and adjacent properties were not listed in the NPRI database. No records of pollutant release were listed in the database for properties located within the Phase I Study Area.

PCB Inventory

A search of national PCB waste storage sites was conducted. No PCB waste storage sites are located within the Phase I study area.

Ministry of the Environment, Conservation and Parks (MECP) Submissions

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the properties. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Instruments

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Incident Reports

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the site or adjacent

properties. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Waste Management Records

A request was submitted to the MECP FOI office for information with respect to waste management records. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Coal Gasification Plant Inventory

The Ontario Ministry of Environment document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I Study Area.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment for the site, neighbouring properties and the general area of the site. No Records of Site Condition (RSCs) were filed for the subject site or properties within the Phase I Study Area.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no former waste disposal sites located within 1 km of the Phase I Study Area.

Areas of Natural Significance

A search for areas of natural significance and features within the Phase I study area was conducted on the website of the Ontario Ministry of Natural Resources (MNR) on May 24, 2019. The search did not reveal areas of natural significance within the Phase I study area.

Technical Standards and Safety Authority (TSSA)

The TSSA, Fuels Safety Branch in Toronto was contacted electronically on May 24, 2019, to inquire about current and former underground storage tanks, spills and incidents for the site and neighbouring properties. No records are listed in the TSSA registry for the subject site or the adjacent properties. A copy of the TSSA correspondence is included in Appendix 2.

City of Ottawa Landfill Document

The document entitled "Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa", was reviewed. There are no closed landfill sites within the vicinity of the Phase I study area.

City of Ottawa Historical Land Use Inventory (HLUI)

A search of the City of Ottawa's Historical Land Use Inventory (HLUI) database was conducted as part of this assessment. At the time of issuance of this report, the HLUI search results had not been received. A copy of the HLUI request form is provided in Appendix 2.

4.3 Physical Setting Sources

Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals. Based on the review, the following

1976 The subject site is occupied by a farmstead and agricultural fields. The surrounding lands also appear to be occupied by farmsteads and agricultural land. Roger Stevens Drive and Third Line Road South can be seen in this photograph.

1991 The subject site and neighbouring lands to the south appear unchanged from the previous photograph. New residential and/or farmsteads occupy the neighbouring lands to the west. A new building/barn can be seen to the north across Roger Stevens Drive. Highway 416 is present at this time.

2002 No significant changes are apparent on the subject site or neighbouring lands. A new residential development can be seen further west. Highway 416 has been expanded/upgraded at this time to its current configuration.

2011 The subject site and neighbouring lands appear unchanged from the previous photograph. The expansion of the residential development to the west is apparent at this time.

2017 No significant changes are apparent to the subject site or surrounding lands.

Laser copies of selected aerial photographs reviewed are included in Appendix 1.

Topographic Maps

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. The topographic maps indicate that the regional topography in the general area of the site slopes down in a south-easterly direction towards Cranberry Creek and the Rideau River. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Physiographic Maps

The Ontario Geological Survey publication 'The Physiography of Southern Ontario, Third Edition' was reviewed as a part of this assessment. According to the publication, the site is situated within the Ottawa Clay Plain physiographic region.

Geological Maps

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock in the area consists of dolomite, of the Oxford Formation. The surficial geology in the area of the site consists of offshore marine sediments of clay and silt, and till, with a drift thickness ranging from 10 to 15 m.

Water Well Records

A well record search was conducted on May 24, 2019 for all drilled wells within 250 m of the subject site. The search returned thirty-one (31) well records, thre3 (3) of which were identified on the Phase Property; an abandoned well record from 2011, a test well drilled in 1999 and a domestic well drilled in 1961. The test well and potable water well on site were drilled to depths of 24 to 25 m deep, respectively. Based on the drilled depths indicated on these records, it was determined that the test well drilled on site had been decommissioned in 2011. The potable well drilled is expected to still be present on-site.

The remaining twenty-eight (28) well records off-site consisted of one (1) recently abandoned well record and several test wells and potable water wells drilled between 1961 to 2011.

Based on all of the well records, all wells were drilled to clear, odourless fresh water at depths ranging from 22 to 54 m below grade.

Based on the review of these records, the stratigraphy in the area consists of an average overburden layer thickness of 14 m, consisting of till, sandy clay and clay, overlying limestone bedrock. No concerns were identified during the well records review. A copy of the well records has been included in Appendix 2.

Areas of Natural Significance and Water Bodies

No areas of natural significance or bodies of water were identified in the Phase I Study Area.

5.0 INTERVIEWS

Property Owner Representative

Mr. James Beach of Broccolini was contacted via email on May 24, 2019 as part of this assessment. According to Mr. Beach, the subject property was abandoned several years ago. It is estimated that the land transfer in 2003 to the current owner, MCU Holding Inc., is presumably when the farmstead was abandoned. Mr. Beach is unaware of any above ground storage tanks, underground storage tanks or any potential environmental concerns with respect to the subject property.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

The site visit was conducted on May 24, 2019. Weather conditions were overcast with a temperature of approximately 16°C. Ms. Mandy Witteman from the Environmental Department of Paterson conducted the site assessment. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site visit.

6.2 Specific Observations at the Phase I Property

Site Features

The subject property is vacant and covered in grass, tall brush, and mature trees. The site is occupied by five (5) farm structures and an inground pool. The site topography is slightly above the grade of Roger Stevens Drive and is undulating in all directions and flattens out along the agricultural portions of the property. The central portion of the site consisted of asphaltic paved sections where the former residential dwelling was situated as well as laneways to access the barns. Several piles of demolition debris were noted next to the barns, and on the side of the driveway.

Site drainage consists primarily of infiltration. The regional topography slopes down in a south-easterly direction towards the Rideau River.

No underground utilities were noted on-site. Above ground utilities were noted on site; however, it is expected that there is currently no service on the property. No well or private sewage system were observed on the property at the time of the site visit. No evidence of current or former railway or spur lines was observed on the subject property at the time of the site visit. No areas of staining, stressed vegetation or unidentified substances were observed on-site at this time.

Buildings and Structures

There are currently five (5) abandoned and partially deteriorating farm structures (wooden and concrete structures with slab-on-grade foundations) and an inground swimming pool on the Phase I Property. An interior inspection was not conducted due to unsafe conditions of the abandoned buildings.

An asphaltic paved area was noted in the central portion of the property where the former residential dwelling was situated. A residence was formerly present on-site; however, it has been removed. No apparent remnants of the dwelling were observed at the time of the site visit.

Neighbouring Properties

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection.

Land use adjacent to the subject site is as follows:

- North - Roger Stevens Drive, followed by agricultural fields;
- South - Vacant land, followed by a farmstead;
- East - Highway 416, followed by agricultural fields;
- West - Residential dwellings, followed by Third Line Road South.

The current use of the immediately adjacent properties is not considered to pose an environmental concern to the Phase I Property. Current land use in the Phase I Study Area is illustrated on Drawing PE4638-2 – Surrounding Land Use Plan in the Figures section of this report.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Land Use History

Based on the available historical records, the Phase I Property was occupied by a farmstead, which was initially developed pre-1961 and existed until 2003 when the property was abandoned and has since been vacant.

Based on the past and current land use, no potential environmental concerns were noted on the Phase I Property.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

No potentially contaminating activities (PCAs) were identified on the Phase I Property. Therefore, there are no areas of potential environmental concern (APECs) on the Phase I Property.

Contaminants of Potential Concern

No Contaminants of Potential Concern (CPCs) were identified on the subject site.

7.2 Conceptual Site Model

Geological and Hydrogeological Setting

Based on the information from the Geological Survey of Canada, the overburden in the area consists of offshore marine sediments of clay and silt, and till, with a drift thickness ranging from 10 to 15 m. Bedrock in the area consists of dolomite, of the Oxford Formation.

Groundwater flow is interpreted to be in a southeasterly direction towards the Rideau River.

Existing Buildings and Structures

There are six (6) abandoned wood and concrete farm structures and an inground swimming pool on the Phase I Property.

Water Bodies and Areas of Natural Significance

No areas of natural significance or water bodies were identified on the Phase I Property or within the Phase I Study Area.

Drinking Water Wells

There were no wells detected on the subject site at the time of the site visit, however, based on the well records, three (3) well records were available for the site; a potable well, a test well and an abandoned well. Based on the drilled depths indicated on these records, it was determined that the test well drilled in 1999 on site, had been decommissioned in 2011. It is expected that the potable well drilled in 1961 is likely still present on-site.

Neighbouring Land Use

Neighbouring land use in the Phase I Study Area consists of residential dwellings, farmsteads and agricultural land.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of this report, there were no PCAs identified within the Phase I Study Area. Therefore, there are no areas of potential environmental concern (APECs) on the Phase I Property.

Contaminants of Potential Concern

As per Section 7.1 of this report, there are no Contaminants of Potential Concern (CPCs) on the Phase I Property.

Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I-ESA is considered to be sufficient to conclude that there are no APECs on the Phase I Property. A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

8.0 CONCLUSIONS

Assessment

Paterson Group was retained by Broccolini to conduct a Phase I-Environmental Site Assessment (ESA) for the property located at 1966 Roger Stevens Drive, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the Phase I Property was initially developed prior to 1961 with a farmstead, which was later abandoned circa 2003. Historical land use of the neighbouring properties was for residential and agricultural purposes. No potentially contaminating activities were identified with the historical use of the subject site or surrounding lands.

Following the historical research, a site visit was conducted. The subject property is currently vacant with abandoned farm structures. An interior assessment was not conducted due to unsafe conditions of the buildings. No potential environmental concerns were noted with the current use of the Phase I Property. Neighbouring properties in the Phase I Study Area consist of vacant lands, residential dwellings and farmsteads and agricultural fields. No potential environmental concerns were noted with the current land use in the Phase I Study Area. Therefore, no areas of potential environmental concern with respect to the Phase I Property were identified.

Based on the results of the assessment, it is **our opinion that a Phase II-Environmental Site Assessment is not required for the subject property.**

Recommendations

It is recommended that building debris on the subject site be properly disposed at a licenced landfill during future site redevelopment.

9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Broccolini. Permission and notification from Broccolini and Paterson will be required to release this report to any other party.

Subject: RE: Search Records Request (PE4638)

Hello Mandy,

Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationservices@tssa.org or through mail along with a fee of $56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Yalini

☐ Dewatering Well
☐ Observation and/or Monitoring Hole
☐ Alteration (Construction)
☐ Abandoned, Insufficient Supply
☐ Abandoned, Poor Water Quality
☐ Abandoned, other, specify
☐ Other, specify

Water Details

Water found at Depth (m/ft)	Kind of Water	Hole Depth From (m/ft)	Hole Depth To (m/ft)	Hole Diameter (cm/in)
38 ☐ Gas	☐ Fresh ☒ Untested ☐ Other, specify	0	31	6"
56 ☐ Gas	☐ Fresh ☒ Untested ☐ Other, specify	31	80	5 7/8"
72 ☐ Gas	☐ Fresh ☒ Untested ☐ Other, specify			

Results of Well Yield Testing

After test of well yield, water was:
☐ Clear and sand free
☐ Other, specify — Not tested

If pumping discontinued, give reason:

Pump intake set at (m/ft): 60

Pumping rate (l/min / GPM): 20

Duration of pumping: 1 hrs + 0 min

Final water level end of pumping (m/ft): 9.3"

If flowing give rate (l/min / GPM):

Recommended pump depth (m/ft): 60'

Recommended pump rate (l/min / GPM): 20

Well production (l/min / GPM): 20

Disinfected? ☒ Yes ☐ No

Draw Down Time (min)	Draw Down Water Level (m/ft)	Recovery Time (min)	Recovery Water Level (m/ft)
Static Level	4.2		9.3"
1	6.1	1	6.1
2	6.7	2	4.2
3	6.9	3	4.2
4	7.1	4	4.2
5	7.3	5	4.2
10	7.7	10	4.2
15	7.9	15	4.2
20	8.1	20	4.2
25	8.2	25	4.2
30	8.4	30	4.2
40	8.6	40	4.2
50	9.1	50	4.2
60	9.3"	60	4.2"

Map of Well Location

APPENDIX 3

QUALIFICATIONS OF ASSESSORS

Mandy Witteman, M.A.Sc

patersongroup

- Geotechnical Engineering
- Environmental Engineering
- Hydrogeology
- Geological Engineering
- Materials Testing
- Building Science
- Archaeological Services

POSITION

Environmental Engineer

EDUCATION

Carleton University, M.A.Sc., Environmental Engineering, 2013
Carleton University, B.Eng., Environmental Engineering, 2008

MEMBERSHIPS & AWARDS

Alberta Professional Engineers and Geoscience Association
NSERC Industry R&D Scholarship

EXPERIENCE

2018 – Present
Paterson Group Inc.
Consulting Engineers
Geotechnical and Environmental Division
Environmental Engineer

2014 – 2015
Thurber Engineering Limited
Oil Sand Tailings Group
Tailings Engineer

2014 – 2013
Carleton University
Department of Civil & Environmental Engineering
Research Engineer

2013 - 2009
Carleton University
Department of Civil & Environmental Engineering
Research Assistant and Teachers Assistant

2008 – 2009
SLR Consulting Limited
Contaminated Sites
Junior Environmental Engineer

Mark S. D'Arcy, P. Eng.

patersongroup

Geotechnical Engineering

Environmental Engineering

Hydrogeology

Geological Engineering

Materials Testing

Building Science

Archaeological Services

POSITION

Associate and Supervisor of the Environmental Division
Senior Environmental/Geotechnical Engineer

EDUCATION

Queen's University, B.A.Sc.Eng, 1991
Geotechnical / Geological Engineering

MEMBERSHIPS

Ottawa Geotechnical Group
Professional Engineers of Ontario

EXPERIENCE

1991 to Present
Paterson Group Inc.
Associate and Senior Environmental/Geotechnical Engineer
Environmental and Geotechnical Division
Supervisor of the Environmental Division

SELECT LIST OF PROJECTS

Mary River Exploration Mine Site - Northern Baffin Island
Agricultural Supply Facilities - Eastern Ontario
Laboratory Facility – Edmonton (Alberta)
Ottawa International Airport - Contaminant Migration Study - Ottawa
Richmond Road Reconstruction - Ottawa
Billings Hurdman Interconnect - Ottawa
Bank Street Reconstruction - Ottawa
Environmental Review – Various Laboratories across Canada - CFIA
Dwyer Hill Training Centre – Ottawa
Nortel Networks Environmental Monitoring - Carling Campus – Ottawa
Remediation Program - Block D Lands – Kingston
Investigation of former landfill sites – City of Ottawa
Record of Site Condition for Railway Lands – North Bay
Commercial Properties – Guelph and Brampton
Brownfields Remediation – Alcan Site - Kingston
Montreal Road Reconstruction - Ottawa
Appleford Street Residential Development - Ottawa
Remediation Program - Ottawa Train Yards
Remediation Program - Bayshore and Heron Gate
Gladstone Avenue Reconstruction – Ottawa
Somerset Avenue West Reconstruction - Ottawa
