## Executive Summary

EXP Services Inc. (EXP) was retained by Katasa Groupe. to complete a Phase One Environmental Site Assessment (ESA) for the property located at 116 Beech Street, Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by a three-storey apartment building.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

EXP understands that the Phase One ESA is being conducted in support of site plan approval for the City of Ottawa. The Phase One property will be redeveloped for residential use. As the most recent use of the Phase One property was also residential, a Record of Site Condition (RSC) is not required for the Phase One property.

The Phase One property is located on the south side of Beech Street, between Loretta Avenue and Champagne Street in Ottawa. The Phase One property is rectangular in shape and has an approximate area of 0.50 hectares (1.24 acres). The Phase One property is legally described as Lots 33-37, 60-64, Plan131037, Part Lane, Plan 131037, as closed by order CR227792, as in N682088; Ottawa/Nepean. The property identification number (PIN) is 041020089.

The Phase One property is currently occupied by a three-storey apartment building with a basement level. There are 58 residential units in the building. A parking lot is present on the east side of the building. The remainder of the Phase One property is landscaped.

Based on a review of historical aerial photographs, fire insurance plans and other records review, it appears the subject site was first developed for residential use circa 1950, at which time the existing building was constructed and used as a monastery and church.

Records identified underground storage tanks (UST) installed in the 1930s at the municipal address 116 Beech Street, located 30 m west of the Phase One property. It is noted that the civic addresses in the Phase One study area have changed since the study area was first developed. The Phase One property was undeveloped prior to the construction of the existing building which was constructed circa 1950. Therefore, none of the records identified for 116 Beech Street prior to this time pertain to the Phase One property. The property currently listed as 146 and 146 Beech Street, was historically listed as 116 Beech Street.

Multiple potentially contaminating activities (PCA) were identified in the Phase One study area including repair garages, commercial printers, gas stations, and fuel storage tanks. Due to the separation distance and/or the down/cross-gradient location of the PCAs relative to the Phase One property, none of the PCAs identified in the Phase One study area were determined to contribute to areas of potential environmental concern (APEC) on the Phase One property.

The Phase One study area slopes down to the southeast towards Dow's Lake. It is possible that fill material was brought to the Phase Two property to level the site when the building was constructed (**PCA #19:** (PCA #30 – Importation of fill material of unknown quality)). This PCA results in an APEC on the Phase One property.

In summary, the following APECs were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
<b>APEC #1</b>	Entire Phase One property	PCA #30 – Importation of fill material of unknown quality	On-site	BTEX, PHC, PAH, and metals	Soil

*Katasa Groupe  
Phase One Environmental Site Assessment  
116 Beech Street, Ottawa, Ontario  
OTT-23005943-B0  
June 16, 2023*

Therefore, the Qualified Person who oversaw this work, Mark McCalla, P.Geo., recommends that a Phase Two ESA be conducted to address the APEC that may have adversely affected the Phase One property.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

*This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.*

## 1.0 Introduction

EXP Services Inc. (EXP) was retained by Katasa Groupe to complete a Phase One Environmental Site Assessment (ESA) for the property located at 116 Beech Street, Ottawa, Ontario hereinafter referred to as the 'Phase One property'. At the time of the investigation, the Phase One property was occupied by a three-storey apartment building.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

### 1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property.

EXP understands that the Phase One ESA is being conducted in support of site plan approval for the City of Ottawa. The Phase One property will be redeveloped for residential use. As the most recent use of the Phase One property was also residential, a Record of Site Condition (RSC) is not required for the Phase One property.

EXP personnel who conducted assessment work for this project included Mark McCalla, P.Geo., and Leah Wells, P.Eng. An outline of their qualifications is provided in Appendix A.

### 1.2 Phase One Property Information

The Phase One property is located on the south side of Beech Street, between Loretta Avenue and Champagne Street in Ottawa, Ontario. The Phase One property is rectangular in shape and has an approximate area of 0.50 hectares (1.24 acres).

The Phase One property is currently occupied by a three-storey apartment building with a basement level. There are 58 residential units in the building. A parking lot is present on the east side of the building. The remainder of the Phase One property is landscaped.

The Phase One property is legally described as Lots 33-37, 60-64, Plan131037, Part Lane, Plan 131037, as closed by order CR227792, as in N682088; Ottawa/Nepean. The property identification number (PIN) is 041020089.

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid are Zone 18, 444219 m E and 5027560 m N. The UTM coordinates are based on measurements from Google Earth Pro, published by the Google Limited Liability Company (LLC). The accuracy of the centroid is estimated to be less than 10 m.

The Phase One property is owned by 13272681 Canada Inc. Authorization to proceed with this investigation was provided by Ms. Chaxu Baria. Contact information for Ms. Baria is 69, rue Jean-Proulx, Unit 301, Gatineau, Quebec, J8Z 1W2.

A Site Location Plan is provided as Figure 1 in Appendix B.

## 2.0 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Obtaining a search of land title and assessment rolls for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250-metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

## 3.0 Records Review

### 3.1 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250-metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property. At the time of the site reconnaissance, land usage within 250 metres of the Phase One property was primarily residential.

The Phase One property and most of the properties to in the Phase One study area were zoned residential. The property to the east across Champagne Avenue was zoned L1 – Community Leisure Facility zoning. Properties to the south across Hickory Steet were zoned MC – Mixed Use Centre zones.

The Phase One study area is shown on Figure 2 in Appendix B.

### 3.2 First Developed Use Determination

Based on a review of historical aerial photographs, fire insurance plans and other records review, it appears the subject site was first developed for residential use circa 1950, at which time the existing building was constructed and used as a monastery and church.

### 3.3 Fire Insurance Plans

The Catalogue of Canadian Fire Insurance Plans 1875 – 1975 (Catalogue) was searched for fire insurance plans (FIPs) in the Phase One study area. Fire insurance plans from 1912, 1922, 1948, and 1965 were available for review.

The 1912 FIP shows that the Phase One property is vacant and undeveloped. The properties to the south of the site are also vacant. Properties in the Phase One study area are mainly residential. A CP rail line is present to the north and east of the Phase One property. A lumber yard is present on the east side of Preston Street.

The 1922 FIP shows that the Phase One property is similarly developed to the 1912 aerial photograph. The properties in the Phase One study area are mostly residential.

The 1948 FIP shows an existing building on the property, which is labelled as a monastery and church. Several industrial/commercial businesses are located to the south of the Phase One property including a fuel dept, stationary manufacturer, repair garages, contractor yard and dairy. A commercial printer and gas station are present to the northeast of the Phase One property. The remainder of the properties in the phase One study area are mainly residential.

The 1965 FIPs shows that the Phase One property and study area appear similar to the 1948 FIP. A warehouse storage building is present to the west of the Phase One property at 148 Beech Street.

The following properties of interest were noted:

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
100 Champagne Avenue	80 m south	Hutchins & Patrick Ltd.	1948 1965	No, an RSC was filed for this property in 2011. Impacted groundwater was not identified on the property. In addition, the property is located down gradient of the Phase One property (PCA #1: PCA #31 – Ink Manufacturing, Processing and Bulk Storage).

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
95 Beech Street	130 m northeast	Mortimer Ltd. Printing and Lithographs	1948 1965	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #2</b> : PCA #31 – Ink Manufacturing, Processing and Bulk Storage).
402 Preston Street	220 m northeast	Gas station with two USTs	1948 1965	No, due to the cross-gradient location and the distance from the Phase One property ( <b>PCA #3</b> : PCA #28 – Gasoline and associated products storage in fixed tanks).
140 Hickory Street	180 m southeast	FW Argue Fuel Depot – eight 12,000-gallon USTs	1948 1965	No, an RSC was filed for this property in 2009. In addition, the property is located down gradient of the Phase One property ( <b>PCA #4</b> : PCA #28 – Gasoline and associated products storage in fixed tanks).
350 Loretta Avenue	220 m southwest	Bell Canada garage with two USTs	1948 1965	No, due to the distance and cross0gradeint location from the Phase One property ( <b>PCA #5</b> : PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products in fixed tanks).

Multiple potentially contaminating activities (PCAs) were identified in the Phase One study area including bulk fuel storage, commercial printing operations, and USTs. None of the PCAs identified in the Phase One study area were determined to contribute to areas of potential environmental concern on the Phase One property.

### 3.4 Chain of Title

A chain of title was requested from Read Abstracts Limited for the Phase One property. A chain of title search provides a list of property owners and the dates when they owned them. To date chain of title information has not been received.

### 3.5 City Directories

Records pertaining to the site were requested from the EcoLog Environmental Risk Information Services (or EcoLog ERIS) for the municipal street directories in the Phase One study area. EcoLog ERIS is an environmental database and information service provider. City directories were reviewed to identify the occupancy history of the Phase One property and closest neighbouring properties for potential environmental concerns. City directories are included in Appendix C.

Properties of interest are summarized below:

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
116 Beech Street	Phase One property	Apartments St. Gerard Church	1976 to 2021 1950 to 1966	No, based on site operations.
116 Beech Street (Now 148-142 Beech Street)	25 m west	Residential Transport company	1920 to 1929 1929 to 1945	No, based on site operations.

Location	Proximity to the Site	Description	Years	Environmental Concern to Site and Rationale
265 Breeszehill Avenue	70 m west	Repair garage	1966 to 2021	No, due to the distance and cross-gradient location from the Phase One property as well as the heavy nature of service garage contaminants. Heavier hydrocarbons preferentially sorb to soil and are unlikely to migrate off-site ( <b>PCA #6</b> : PCA #10 – Commercial autobody shops).
100 Champagne Avenue	80 m south	Hutchings & Patrick	1945 to 2017	No, an RSC was filed for this property in 2011. Impacted groundwater was not identified on the property. In addition, the property is located down gradient of the Phase One property ( <b>PCA #1</b> : PCA #31 – Ink manufacturing, processing and bulk storage).
125 Hickory Street (115 Champagne Avenue)	80 m southeast	Repair garage	1971 to 2000	No, due to the distance and cross-gradient location from the Phase One property as well as the heavy nature of service garage contaminants. Heavier hydrocarbons preferentially sorb to soil and are unlikely to migrate significantly ( <b>PCA #7</b> : PCA #10 – Commercial autobody shops).
95 Beech Street	130 m northeast	Mortimer Ltd. Lithographic	1950 to 1976	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #2</b> : PCA #31 – Ink manufacturing, processing and bulk storage).
75 Aberdeen Street	170 m northeast	Repair garage	1996 to 2021	No, due to the distance and cross-gradient location from the Phase One property as well as the heavy nature of service garage contaminants. Heavier hydrocarbons preferentially sorb to soil and are unlikely to migrate significantly ( <b>PCA #8</b> : PCA #10 – Commercial autobody shops).
200 Champagne Avenue (Now 875 Carling Avenue)	170 m south	Repair garage	1966 to 1990	No, due to the distance and cross-gradient location from the Phase One property as well as the heavy nature of service garage contaminants. Heavier hydrocarbons preferentially sorb to soil and are unlikely to migrate significantly ( <b>PCA #9</b> : PCA #10 – Commercial autobody shops).
95 Norman Street	180 m east	Repair garage	1976 to 2017	No, an RSC was filed for this property in 2022. No impacted groundwater was identified on the property ( <b>PCA #10</b> : PCA #10 – Commercial autobody shops).
235 Breezehill Avenue	200 m northwest	Malmburg Printers	1966 to 1982	No, due to the distance from the Phase One property ( <b>PCA #11</b> : PCA #31 – Ink manufacturing, processing and bulk storage).

Based on a review of the city directories, multiple PCAs were identified in the Phase One study area including repair garages, and commercial printers.

The city directories identified a truck transport company at the municipal address 116 Beech Street from the 1930s to the 1940s. It is noted that the civic address in the Phase One study area have changed since the study area was first developed. The Phase One property was undeveloped prior to the construction of the existing building which was constructed circa 1950. Therefore, none of the records identified for 116 Beech Street prior to this time pertain to the Phase One property. The property currently listed as 146 and 146 Beech Street, was historically listed as 116 Beech Street.

None of the PCAs identified in the Phase One study area were determined to contribute to areas of potential environmental concern on the Phase One property.

### 3.6 Environmental Reports

The following previous environmental reports were provided to EXP for review:

1. Paterson Group, *Phase I Environmental Site Assessment, 120 Beech Street, Ottawa, Ontario*, January 2021.

The Phase I ESA was conducted for due diligence purposes. The property owner at the time of the investigation indicated that the site was first developed in the 1930s with a church and adjoining monastery. The site was re-developed with residential apartments in the 1960s-1970s. No PCAs resulting in APECs were identified. No additional site investigation was recommended.

### 3.7 Environmental Source Information

Information pertaining to the Phase One property was obtained by reviewing documents that are available to the public through municipal and provincial sources. EXP did not identify the need to contact any federal agencies.

Written responses from regulatory agencies and copies of documents obtained via searches are provided in Appendix D.

#### 3.7.1 Ontario Ministry of the Environment, Conservation and Parks Records

Records pertaining to the Phase One property were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act (FOI)*. To date, no response has been received.

#### 3.7.2 Historical Land Use Inventory

Records pertaining to the Phase One property and study area were requested from the City of Ottawa Hazardous Land Use Inventory (HLUI) database.

The following properties of interest were noted:

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
116 Beech Street (Now 146-148 Beech Street)	25 m west	Two USTs were installed in 1929 for Commercial Transfer – Cities Service Oil. Corkery Brothers (truck transport industries) was located on the property in the 1930s.	No, this record is for 146-148 Beech Street. Due to the cross-gradient location from the Phase One property, it is not considered a concern to the site (PCA #12: PCA #28 – Gasoline and associated products storage in fixed tanks).

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
<b>265 Breezehill Avenue</b>	70 m west	Repair garage from the 1950s to the 2000s.	No, due to the distance and cross-gradient location from the Phase One property as well as the heavy nature of service garage contaminants. Heavier hydrocarbons preferentially sorb to soil and are unlikely to migrate off-site ( <b>PCA #6:</b> PCA #10 – Commercial autobody shops).
<b>125 Hickory Street (115 Champagne Avenue)</b>	80 m southeast	Two gasoline and one fuel oil USTs installed for Capital Consumers Dairy in the 1940s and 1950s.	No, due to the distance and cross-gradient location from the Phase One property as well as the heavy nature of service garage contaminants. Heavier hydrocarbons preferentially sorb to soil and are unlikely to migrate off-site ( <b>PCA #7:</b> PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>100 Champagne Avenue</b>	80 m south	Two fuel oil tanks installed in the 1940s and 1950s for Hutchings & Patrick.	No, an RSC was filed for this property in 2011. Impacted groundwater was not identified on the property. In addition, the property is located down gradient of the Phase One property ( <b>PCA #1:</b> PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>175 Beech Street</b>	130 m northwest	One fuel oil UST installed at a school in the 1960s.	No, due to the distance from the Phase One property ( <b>PCA #13:</b> PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>95 Beech Street</b>	130 m northeast	Mortimer Ltd., printers from the 1940s to the 1990s.	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #2:</b> PCA #31 – Ink manufacturing, processing and bulk storage).
<b>855 Carling Avenue</b>	180 m southeast	Nine gasoline/fuel oil USTs installed in the 1920s.	No, an RSC was filed for this property in 2009. In addition, the property is located down gradient of the Phase One property ( <b>PCA #4:</b> PCA #28 – Gasoline and associated products storage in fixed tanks).
<b>75 Aberdeen Street</b>	170m northeast	Two gasoline USTs installed for BP Oil in the 1970s. Former gas station and repair garage.	No, due to the distance and cross gradient location from the Phase One property ( <b>PCA #8:</b> PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products storage in fixed tanks).

Katasa Groupe  
Phase One Environmental Site Assessment  
116 Beech Street, Ottawa, Ontario  
OTT-23005943-B0  
June 16, 2023

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
875 Carling Avenue	170 m south	Two waste oil, four diesel and two gasoline USTs installed in the 1960s for Colonial Coach Lines. One waste oil UST installed in the 1960s for International Harvester service garage. Bell Canada service garage from the 1960s to the 1990s.	No, due to the distance, and down gradient location from the Phase One property ( <b>PCA #9</b> : PCA #10 – Commercial autobody shops, PCA #28 – Gasoline and associated products storage in fixed tanks).
140 Hickory Street	180 m southeast	Bulk petroleum storage from the 1930s to the 1960s. Eight fuel oil USTs installed for F.W. Argue Fuel Oil Depot.	No, an RSC was filed for this property in 2009. In addition, the property is located down gradient of the Phase One property ( <b>PCA #4</b> : PCA #28 – Gasoline and associated products storage in fixed tanks).
95 Norman Street	180 m east	Repair garage from the 1980s to 2000s.	No, an RSC was filed for this property in 2022. No impacted groundwater was identified on the property ( <b>PCA #10</b> : PCA #10 – Commercial autobody shops).
235 Breezehill Avenue	200 m northwest	Commercial printing facility from the 1960s to the 1970s.	No, due to the distance from the Phase One property ( <b>PCA #11</b> : PCA #31 – Ink manufacturing, processing and bulk storage).
24 George Street (424 George Street)	200 m northeast	Gas station from the 1960s to the 1990s.	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #14</b> : PCA #28 – Gasoline and associated products storage in fixed tanks).
75 Young Street	210 m north	One fuel oil UST installed at a school in the 1950s.	No, due to the distance from the Phase One property ( <b>PCA #15</b> : PCA #28 – Gasoline and associated products storage in fixed tanks).
6 Champagne Avenue	210 m north	Dry cleaner in the 1990s.	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #16</b> : PCA #37 – Operation of dry-cleaning equipment (where chemicals are used)).
402 Preston Street	220 m northeast	Repair garage/gas station from the 1950s to present. Four gasoline USTs for gas station installed in the 1940s and 1950s.	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #3</b> : PCA #10 – Commercial auto body shop, PCA #28 – Gasoline and associated products storage in fixed tanks).
350 Loretta Street	220 m southwest	Bell Canada service garage from the 1940s to 2000s. UST installed for Bell Canada private fuel outlet.	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #5</b> : PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products in fixed tanks).

Location	Proximity to the Site	Description	Environmental Concern to Site and Rationale
845 Carling Avenue	230 m southeast	Car dealership and service garage from the 1900s to the 2000s.	No, due to the distance and downgradient location from the Phase One property ( <b>PCA #17</b> : PCA #10 – Commercial auto body shops).

Based on a review of the HLUI database, multiple PCAs were identified in the Phase One study area including repair garages, commercial printers, gas stations, and fuel storage.

The HLUI database identified two USTs installed in the 1930s at the municipal address 116 Beech Street. It is noted that the civic addresses in the Phase One study area have changed since the study area was first developed. The Phase One property was undeveloped prior to the construction of the existing building which was constructed circa 1950. Therefore, none of the records identified for 116 Beech Street prior to this time pertain to the Phase One property. The property currently listed as 146 and 146 Beech Street, was historically listed as 116 Beech Street.

None of the PCAs identified in the Phase One study area were determined to contribute to areas of potential environmental concern on the Phase One property.

A copy of the response is provided in Appendix C.

### 3.7.3 Environmental Registry

On May 26, 2023, the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. No records were found.

### 3.7.4 Environmental Access

On May 26, 2023, the MECP Environmental Access website was searched for postings within the Phase One study area. The following records were found:

- Four Permits to Take Water (PTTW) were issued for properties in the Phase One study area for dewatering operations associated with construction activities.
- An Environmental Compliance Approval (ECA) was issued for the Loretta Apartments (50 Bayswater Avenue) for the construction of storm and sanitary sewers in 2021.
- ECAs were issued for 105 Champagne Avenue (2017) and 93 Norman Street (2023) and Certificate of Approval (CA) was issued for 95 Beech Street (2000) for stormwater management systems.
- A CA and amended CA were issued for 80 Aberdeen Street in 2008 for industrial air emissions associated with the operation of two gas fired boilers.

None of the records are considered an environmental concern to the Phase One property.

### 3.7.5 Hazardous Waste Information Network

On May 31, 2023, the Resource Productivity and recovery Authority (RPR) Hazardous Waste Program (HWP) Registry website was searched for registered waste generators within the Phase I study area. The HWP registry replaced the MECP Hazardous Waste Information Network (HWIN) as of January 1, 2023. The following records were found:

Location (Generator)	Proximity to the Site	Wastes Generated	Years	Environmental Concern to Site and Rationale
CECCE 127 Beech Street (ON4945494)	130 m northwest	Organic and inorganic laboratory chemicals, specified inorganics, paint/pigment/coating residues	2020 to present	No, it is not anticipated that significant quantities of wastes are generated at a school.

None of the records are considered potential environmental concerns to the Phase One property.

### 3.7.6 Records of Site Condition

On May 31, 2023, the MECP Brownfields Registry website was searched for postings of Records of Site Condition within the Phase One study area. The following records were found:

- An RSC was filed for north part of 125 Hickory Street (RSC #207588) in March 2013, and the south part of 125 Hickory Street (RSC #231782) in May 2022. The property was historically occupied by a repair garage and rail spur line. A total of 9,925 m<sup>3</sup> of metals and PHC impacted soil was removed from the property. No impacted groundwater was identified at the property.
- An RSC was filed for 95 (93) Norman Street (RSC #232591) in June 2022. The property was historically occupied by a repair garage, including multiple ASTs. A total of 3,130 m<sup>3</sup> of metals impacted fill was removed from the property. No impacted groundwater was identified at the property.
- An RSC was filed for 140 Hickory Street (RSC #50525) in May 2009. A total of 4,050 m<sup>3</sup> of impacted soil was removed from the property. In 1999, approximately 134,500 L of groundwater was treated using a granular activated carbon treatment system and discharged into the municipal sewers.
- An RSC was filed for 100 Champagne Avenue (RSC #98719) in April 2011. Approximately 60 m<sup>3</sup> of PHC impacted soil was removed from the property. No impacted groundwater was identified at the property.

### 3.7.7 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

### 3.7.8 PCB Storage Sites

Documents entitled *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada, 2003 Annual Report* prepared by Environment Canada and *Ontario Inventory of PCB Storage Sites* prepared by the MECP were reviewed. No records pertaining to PCB storage sites were identified within the Phase One study area.

### 3.7.9 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed. No former landfills or waste disposal sites were identified within the Phase One study area.

### 3.7.10 Former Industrial Sites

The document entitled *Mapping and Assessment of Former Industrial Sites; City of Ottawa* prepared by Interra Inc. was reviewed. Three former industrial sites were identified within the Phase One study area:

- Interra Site 22 (**PCA #4**) – F.W. Argue Fuel Oil Depot (1920s to 1950s), and Sunoco Oil Co. Inc. (1960s and 1970s). The site was located at the southwest corner of Railway Street and Hickory Street (now 140 Hickory Street). The property was used for bulk storage of oil and gas in USTs. At the time of the Interra report (1988), the property was deemed to visibly impacted and clean up was underway. An RSC was filed for the property in 2009.
- Interra Site 24 (**PCA #1**) – Hutchings & Patrick Ltd. was located at 100 Champagne Avenue. The property was used for printing and publishing industries from the 1930s to the 1990s. An RSC was filed for the property in 2011.
- Interra Site 25 (**PCA #2**) – Mortimer Co. Ltd., was located at 95 Beech Street. The property was used for printing and publishing industries from the 1940 to 1960s.

RSCs have been filed for the properties at 140 Hickory Street and 100 Champagne Avenue. In addition, both of these properties are located down-gradient of the Phase One property. The property at 95 Beech Street was re-developed in the early 2000s. Due to the distance and cross-gradient location from the Phase One property, it is not considered a concern to the site.

None of the former industrial sites in the Phase One study area were considered to result in APECs on the Phase One property.

### 3.8 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the Phase One property and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A summary of the more significant findings is provided below. A copy of the EcoLog ERIS report is provided in Appendix D.

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
<b>260 Loretta Avenue</b>	20 m west	December 14, 1993, approximately 1 L of furnace oil was spilled due to overfilling.	Ontario Spills (SPL)	No, due to the small quantity of contaminant spilled.
<b>250 Loretta Street</b>	220 m southwest	January 24, 1995, Bell Canada reported an unknown quantity of waste oil spilled to ground from waste oil tank.	SPL	No, due to the distance and cross-gradient location from the Phase One property.
<b>105 Champagne Avenue</b>	30 m southeast	April 30, 2018, douse water from fire suppression release to ground/catch basin during condo fire.	SPL	No, Champagne Avenue is present between the Phase One property and this property. Douse water runoff would have been intercepted by the sewer system along Champagne Avenue.
<b>152 Beech Street</b>	50 m east	November 20, 1992, less than 25 L of furnace oil spilled during delivery to residence.	SPL	No, due to the quantity of contaminant spilled and the distance from the Phase One property.
<b>101 Champagne Avenue</b>	60 m southeast	Human Society of Ottawa-Carleton registered waste generator of pathological wastes and	Ontario Regulation 347 Waster	No, it is not anticipated that significant quantities of wastes are generated at veterinary

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
		pharmaceuticals from 1986 to 2009 (ON047000). Bayview Animal Hospital, registered waste generator of photo processing wastes and pathological wastes from 1988 to 2004 (ON1010500).	Generators Summary (GEN)	office. Wastes of this nature are not considered a concern if property disposed off.
<b>265 Breezehill Avenue</b>	70 m west	Jesus Avalos, registered waste generator of waste oils/sludges in 2021 (ON2662616).	GEN	No, due to the short waste generation period. It is not expected that significant quantities of waste are generated as residential property.
<b>100 Champagne Avenue</b>	80 m south	Hutchings & Patrick Inc., registered waste generator of paint/pigment/coating residues, and aliphatic solvents from 1989 to 1998 (ON1142800).	GEN	No, an RSC was filed for this property in 2011. Impacted groundwater was not identified on the property. In addition, the property is located down gradient of the Phase One property ( <b>PCA #1</b> : PCA #31 – Ink manufacturing, processing and bulk storage).
<b>125 Hickory Street (111-115 Champagne Avenue)</b>	80 m southeast	Quinterra Investments Corp, registered waste generator of unlisted wastes from 2003 to 2004 (ON1424642).	GEN	No, the former site buildings were demolished around this time, it is assumed that waste generation activities are associated with building demolition.
<b>95 Beech Street</b>	130 m northeast	April 16, 1995, approximately 450 L of diesel fuel spilled to roadway from tank truck. April 9, 2014, and unknown quantity of motor oil spilled to catch basins. Lux Photographic Services Inc., registered waste generator of photo processing wastes from 1994 to 2000 (ON1870600). Wood Fashion Refinishers, registered waste generator of paint/pigment/coating residues, and aromatic solvents from 1995 to 2001 (ON2084600).	SPL GEN	No, due to the distance and cross-gradient location from the Phase One property.
<b>175 Beech Street</b>	130 m northwest	CECCE, registered waste generator of inorganics, laboratory chemicals, and paint/pigment/coating residues from 2020 to 2022 (ON4945494).	GEN	No, it is not anticipated that significant quantities of wastes are generated at a school.
<b>202 Champagne Avenue (875 Carling Avenue)</b>	170 m south	Bell Canada, registered waste generator of waste oils and lubricants, acid waste, aliphatic solvents, and petroleum distillates from 1986 to 1994 (ON0473814).	GEN	No, due to the distance and down-gradient location from the Phase One property.

Location	Proximity to the Site	Description	Database	Environmental Concern to Site (Yes/No) & Rationale
95 Norman Street	180 m east	CA for air emissions associated with waste oil furnace at Frank's Auto Centre.	Certificates of Approval (CA)	No, an RSC was filed for this property in 2022. No impacted groundwater was identified on the property ( <b>PCA #10</b> : PCA #10 – Commercial autobody shops).
843 Carling Avenue	180 m southwest	S & R Mechanical, registered waste generator of light fuels in 2021 (ON5306559). RW Tomlinson Ltd., registered waste generator of inorganics in 2022 (ON9137026).	GEN	No, due to the distance and downgradient location from the Phase One property.
86 Norman Street	180 m east	January 8, 2007, approximately 50 gallons of heating oil spilled to ground from leaking container.	GEN	No, due to the distance and cross-gradient location from the Phase One property.
292 Breezehill Avenue	180 m southwest	October 22, 1999, approximately 70 L of furnace oil spilled from ruptured oil tank.	SPL	No, due to the distance from the Phase One property and the quantity of contaminant spilled.
140 Hickory Street	180 m southeast	Sunoco Inc., registered waste generator of light fuels from 1986 to 1998 (ON0004913). Suncor Energy, registered waste generator of light fuels, and oil skimmings and sludges from 2014 to 2022 (ON2767683).	GEN	No, an RSC was filed for this property in 2009. In addition, the property is located down gradient of the Phase One property ( <b>PCA #4</b> : PCA #28 – Gasoline and associated products storage in fixed tanks).
6 Champagne Avenue	210 m north	Browns Cleaners & Tailors, registered waste generator of halogenated solvents from 1986 to 2003 (ON0443200).	GEN	No, due to the distance and cross-gradient location from the Phase One property ( <b>PCA #16</b> : PCA #37 – Operation of dry-cleaning equipment (where chemicals are used)).

In addition to the databases outlined above the following entries from the EcoLog ERIS report were reviewed and summarized below:

- The Certificates of Approval database and the Environmental Compliance Approval database identified 20 records for the Phase One study area. Fifteen of the records were for municipal water and sewage works. The remaining records were for air emissions. None of the records reviewed were considered an environmental concern to the Phase One property.
- The identified Pipeline Incidents database and the Ontario Spills database identified six records for natural gas pipeline strikes in the Phase One study area. As natural gas is released to the air, these records are not considered an environmental concern to the site.
- There were 19 records found in the Water Well Information System (WWIS) database for the Phase One study area. All of the records were for monitoring wells.

Based on the review of the ERIS report, no PCAs resulting in APECs were identified.

## 3.9 Physical Setting Sources

### 3.9.1 Aerial Photographs

Aerial photographs dated 1928, 1958, 1965, 1976, 1991, 1999, 2014, 2019 and 2021 were available for review on the City of Ottawa website. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs. Copies of the aerial photographs are provided in Appendix E.

Aerial Photograph (year)	Details
<b>1928</b>	The Phase One property is vacant. Surrounding properties to the east and south are also primarily undeveloped. Properties to the north and west are mainly residential. With the exception of the section of Champagne Avenue east adjacent to the Phase One property, the remainder of the streets in the Phase One property are present similar to present day. A rail line is present approximately 110 m east of the Phase One property.
<b>1958</b>	The existing site building is present on the Phase One property. Properties to the south of the Phase One property have been developed with industrial buildings (Hutching & Patrick printers, Bell Canada garage, International Harvester showroom/garage, Campbell Steel). The tanks at the bulk fuel depot are visible to the southeast of the site. The remainder of the Phase One property is primarily residential.
<b>1965</b>	The Phase One property and study area appear similar to the 1958 aerial photograph.
<b>1976</b>	The Phase One property appears similar to the 1965 aerial photograph, a parking lot is now present on the east side of the site building. An apartment building has been constructed south adjacent to the site. The property to the east of the site has been converted to a park.
<b>1991</b>	The Phase One property and study area appear similar to the 1976 aerial photograph. The tanks at the bulk fuel depot have been removed.
<b>1999</b>	The Phase One property and study area appear similar to the 1991 aerial photograph. Several of the industrial buildings to the south of the Phase One property have been demolished and replaced with residential buildings.
<b>2014</b>	The Phase One property appears similar to the 1999 aerial photograph. The property at 100 Champagne Avenue has been re-developed and the property at 101-105 Champagne Avenue is under construction. The Bell garage at 350 Loretta Street has been demolished and replaced with townhouses.
<b>2019</b>	The Phase One property appears similar to the 2014 aerial photograph. The garage, and several residential buildings on the north side of Norman Street have been demolished. Construction has been completed on three high-rise towers at 101-111 Champagne Avenue.
<b>2021</b>	The Phase One property and study area appear similar to the 2019 aerial photograph.

No potential environmental concerns were identified in the aerial photographs.

### 3.9.2 Topography, Hydrology, Geology

Bedrock and surficial geology were reviewed via the Google Earth applications published by the Ontario Ministry of Energy, Northern Development and Mines. The bedrock geology application is available via [www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/bedrock-geology](http://www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/bedrock-geology) and was last modified on March 19, 2018. The surficial geology application is available via [www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/surficial-geology](http://www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/surficial-geology) and was last modified on May 23, 2017.

Based on these applications, bedrock in the general area of the Phase One property consists of limestone and shale of the Simcoe Group. Native surficial soil consists of sand and silt glacial till. The ground surface is approximately 63 metres above sea level (masl). Bedrock is anticipated approximately 1.5 to 3 metres below ground surface.

A topographical map available from Natural Resources Canada ([atlas.gc.ca/toporama/en/](https://atlas.gc.ca/toporama/en/)) was also reviewed. The general topography of the Phase One property and study area slopes down to the southeast towards Dow's Lake.

### 3.9.3 Fill Materials

It is unlikely that significant quantities of fill material are present at the Phase One property.

### 3.9.4 Water Bodies and Areas of Natural Significance

There are no water bodies on the Phase One property. The closest body of water is Dow's Lake approximately 600 m to the southeast. The inferred groundwater flow direction is to the southeast towards Dow's Lake.

There are no Area of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website ([www.gisapplication.lrc.gov.on.ca/mamnh/Index.html](http://www.gisapplication.lrc.gov.on.ca/mamnh/Index.html)).

### 3.9.5 Well Records

The Ontario well records website ([www.ontario.ca/map-well-records](http://www.ontario.ca/map-well-records) water wells) was accessed. Nineteen well records were identified within the Phase One study area. All of the well records were for monitoring wells. Well records indicate surficial soil consists of silty clay. Limestone bedrock was present approximately 2.5 to 3.0 metres below ground surface.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library ([maps.ogsrlibrary.com/wells/](http://maps.ogsrlibrary.com/wells/)).

## 3.10 Site Operating Records

No site operating records were provided to EXP for review.

## 3.11 Summary of Records Review

Based on a review of the available records, the following PCAs were identified:

- PCA #10 – Commercial autobody shops
  - 402 Preston Street (220 m northeast) – active repair garage
  - 350 Loretta Avenue (220 m southwest) – former Bell Canada repair garage
  - 265 Breezehill Avenue (70 m west) – former repair garage
  - 125 Hickory Street (80 m southeast) – former repair garage
  - 75 Aberdeen Street (170 m northeast) – active repair garage
  - 875 Carling Avenue (170 m south) – former repair garage
  - 95 Norman Street (180 m east) – former repair garage
  - 845 Carling Avenue (230 m southeast) – car dealership and repair garage
- PCA #28 – Gasoline and associated products storage in fixed tanks

- 100 Champagne Avenue (80 m south) – Hutchins & Patrick; former on-site fuel oil tanks
- 402 Preston Street (220 m northeast) – former gas station
- 140 Hickory Street (180 m southeast) – former fuel depot
- 350 Loretta Avenue (220 m southwest) – Bell Canada, private fuel outlet
- 125 Hickory Street (80 m southeast) – former gasoline and fuel oil USTs
- 75 Aberdeen Street (170 m northeast) – former gas station
- 875 Carling Avenue (170 m south) – former on-site waste oil and fuel USTs
- 146-148 Beech Street (25 m west) – former on-site UST
- 175 Beech Street (130 m northwest) – fuel oil UST installed in the 1960s
- 424 George Street (200 m northeast) – former gas station
- 75 Young Street (210 m north) – former fuel oil UST
- PCA #31 – Ink manufacturing, processing, and bulk storage
  - 100 Champagne Avenue (80 m south) – Hutchins & Patrick, former commercial printing operation
  - 95 Beech Street (130 m northeast) – Mortimer Lithographic Ltd., former commercial printing operation
  - 235 Breezehill Avenue (200 m northwest) – former commercial printing operation
- PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)
  - 6 Champagne Avenue (210 m north) – former dry cleaner

None of the PCAs identified in the Phase One study area were determined to result in areas of potential environmental concern on the Phase One property.

## 4.0 Interviews

Interviews were conducted by EXP with the individuals identified to be the most knowledgeable about both the current and historical Phase One property uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the Phase One property.

Mr. Denis Lacroix, building manager, was interviewed during the site visit on May 31, 2023. Mr. Lacroix was unaware of any environmental issues regarding the Phase One property.

Responses to other questions were made during site reconnaissance and are discussed in section 5.0.

## 5.0 Site Reconnaissance

### 5.1 General Requirements

On May 31, 2023, Ms. Leah Wells, P.Eng., of EXP conducted the site visit in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The weather was sunny with an approximate temperature of 30 degrees Celsius. The site visit lasted approximately 60 minutes.

The site visit was conducted in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the Phase One property.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

Photographs were taken at the Phase One property on May 31, 2023, and pertinent photographs are included in Appendix G.

### 5.2 Specific Observations at the Phase One Property

#### 5.2.1 Buildings and Structures

The Phase One property was occupied by a three-storey apartment building with one basement level. The basement level of the east side of the building was occupied by apartment units. The basement level of the west side of the building was occupied by laundry, storage, and mechanical rooms.

#### 5.2.2 Site Utilities and Services

The site building is connected to municipal water and sewer, natural gas, and overhead hydro. The building is heated via natural gas fired boilers.

### 5.3 Storage Tanks

#### 5.3.1 Underground Storage Tanks

EXP did not observe any evidence of USTs, such as vent and fill pipes, during the site reconnaissance. Furthermore, the historical review did not identify any former USTs at the Phase One property.

#### 5.3.2 Above Ground Storage Tanks

No above ground storage tanks (ASTs) were observed at the Phase One property. Vent/fill pipes from a former AST were located off the southeast corner of the building (**PCA #18**: PCA #28 – Gasoline and associated products storage in tanks). No staining or odours were observed in this area of the building.

### 5.4 Chemical Storage

Chemical storage on the property was limited to retail sized containers of household cleaners and maintenance products such as paint.

All chemicals observed on the Site were stored in small quantities and in their original retail packaging or approved containers. As such, the potential environmental concern to the subsurface environmental conditions of the Site from the use of chemicals is considered to be low.

## 5.5 Areas of Stained Soil, Pavement or Stressed Vegetation

No evidence of staining was observed during the site visit.

## 5.6 Fill and Debris

The Phase One study area slopes down to the southeast towards Dow's Lake. It is possible that fill material was brought to the Phase Two property to level the site when the building was constructed (**PCA #19:** (PCA #30 – Importation of fill material of unknown quality)).

## 5.7 Air Emissions

Regulatory control of air emissions in Ontario is the responsibility of the MECP. According to the Environmental Protection Act (EPA), an ECA (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29, 1988.

No air emissions were identified at the time of the site visit.

## 5.8 Odours

No strong odours were present during the site visit.

## 5.9 Noise

No excessive noise was heard during the site visit.

## 5.10 Other Observations

There were no pits and lagoons, no railways or spurs and no unidentified substances observed on the Phase One property.

## 5.11 Special Attention Items, Hazardous Building Materials and Designated Substances

### 5.11.1 Asbestos

Asbestos-containing materials (ACM) are fibrous hydrated silicates and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-Friable asbestos refers to asbestos that is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-Friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACM in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHS). Under OHS, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACM was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

Based on the age of the buildings it is possible that ACMs are present.

### 5.11.2 Ozone Depleting Substances (ODSs)

Chlorofluorocarbons (CFC), often referred to as freons, ceased production in Canada in 1993 as a result of their ozone-depleting characteristics. Under the Montreal Protocol, importation of CFCs into Canada ceased in 1997 and all developed countries agreed to a total ban on their use by 2030.

Refrigerant containing equipment was limited to residential freezers and refrigerators, and window A/C units. Maintenance of refrigerant containing equipment should continue to be completed by a licensed refrigeration contractor. The equipment should only be repaired, removed, or serviced by an appropriately licensed contractor.

### 5.11.3 Lead

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinplate and plumbing. The use of lead-based paints (LBPs) was phased out *circa* 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain higher levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the age of the buildings, it is possible that LBPs are present.

### 5.11.4 Mercury

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove "interior uses" from their product labels.

Mercury-containing equipment was not observed during the Site visit. The interior painted surfaces observed during EXP's site visit were in poor to fair condition.

### 5.11.5 Polychlorinated Biphenyls (PCB)

The manufacture of PCB in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCB-containing equipment on the Phase One property. Potential equipment, which could contain PCB include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCB must be disposed of in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCB is permissible.

Fluorescent light fixtures were observed throughout the Site building. Based on the age of the building at the Site the presence of PCB containing light ballasts is possible.

### 5.11.6 Urea Formaldehyde Foam Insulation

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets, and fabrics, and it contributes to "that new house smell."

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant

concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose, and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. The further use of UFFI was banned in Canada in 1980.

No evidence of UFFI was observed during the site visit.

### 5.11.7 Radon

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints, and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerels per cubic metre (Bq/m<sup>3</sup>) where radon gas is present and the annual radon concentration exceeds 200 Bq/m<sup>3</sup> in the normal occupancy area.

A radon gas assessment was beyond the scope of this Phase One ESA, and as such, radon gas was not assessed. The Radon Potential Map of Ontario created by Radon Environmental indicates that the Phase One property is located in Zone 3 – Guarded, which has the lowest potential for radon. The zones are identified based on regional geologic conditions. It is noted that although the property is located in Zone 3, a wide spectrum of readings can occur in all zones.

### 5.11.8 Mould

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow, a food source (i.e. gypsum wallboard, wallpaper, wood, etc.) and moist conditions are required. Mould can have an impact on human health depending on the species and concentration of the airborne mould spores. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment, the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled "mould guidelines for the Canadian construction industry" and the Environmental Abatement Council of Ontario (EACO) guidelines titled "EACO Mould Abatement Guidelines, Edition 3 (2015)."

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

No evidence of mould was observed in the accessed areas at the time of the site visit.

## 5.12 Other Substances

No other special attention substances (such as acrylonitrile or isocyanates) were suspected to be present at the Phase One property at the time of site reconnaissance.

## 5.13 Processing and Manufacturing Operations

No processing or manufacturing operations were observed at the Phase One property.

## 5.14 Hazardous Materials Use and Storage

No hazardous materials are used or stored at the Phase One property.

## 5.15 Vehicle and Equipment Maintenance Areas

No equipment maintenance has occurred on the Phase One property.

## 5.16 Oil/Water Separators

No oil/water separators were present at the Phase One property.

## 5.17 Sewage and Wastewater Disposal

Sewage and wastewater generated at the Phase One property was disposed of via the municipal system.

## 5.18 Solid Waste Generation, Storage & Disposal

Solid wastes generated at the Site are collected by the City of Ottawa.

## 5.19 Liquid Waste Generation, Storage & Disposal

No liquid wastes were generated at the Phase One property.

## 5.20 Unidentified Substances

No unidentified substances were observed on the Phase One property at the time of the site visit. No dumping or any other deleterious materials were identified.

## 5.21 Hydraulic Lift Equipment

No hydraulic equipment was observed at the Phase One property.

## 5.22 Mechanical Equipment

No mechanical equipment was present on the Phase One property.

## 5.23 Abandoned and Existing Wells

There are no wells present on the Phase One property.

## 5.24 Roads, Parking Facilities and Right of Ways

Vehicular access to the Phase One property is from Beech Street.

## 5.25 Adjacent and Surrounding Properties

A visual inspection of the adjacent properties and properties within 250 m of the Phase One property was conducted from publicly accessible areas to identify the occupants and document the uses and sources of potential environmental concerns that may impact the Phase One property. Refer to Figure 3 in Appendix C for the adjacent land uses.

The following land uses border the Phase One property:

- North: Residential;
- West: Residential;
- East: City park by residential; and
- South: Residential.

No environmental concerns relating to the adjacent properties were found at the time of the site visit.

## 5.13 Enhanced Investigation Property

Ontario Regulation 153/04 defines an enhanced investigation property as a “property that is used, or has ever been used, in whole or in part for an industrial use or any of the following commercial uses: a garage; a bulk liquid dispensing facility, including a gasoline outlet; or, for the operation of dry-cleaning equipment.”

Therefore, in accordance with Regulation 153/04, the property is not considered to be an enhanced investigation property.

## 5.14 Summary and Written Description of Investigation

In addition to the PCAs previously identified, the following additional PCAs were identified following the site visit:

- PCA #28 – Gasoline and associated products storage in fixed tanks
  - Vent/fill pipes were observed at the southeast corner of the site building. No above ground storage tanks were observed in the basement. No staining or odours were observed in this area of the building.
- PCA #30 – Importation of fill material of unknown quality
  - It is possible that fill material is present on the Phase One property.

## 6.0 Review and Evaluation of Information

### 6.1 Current and Past Uses

Based on a review of historical aerial photographs, fire insurance plans and other records review, it appears the subject site was first developed for residential use circa 1950, at which time the existing building was constructed and used as a monastery and church.

### 6.2 Potentially Contaminating Activity

Ontario Regulation (O. Reg.) 153/04 defines a Potential Contaminating Activity (PCA) as one of fifty-nine (59) industrial operations set out in Table 2 of Schedule D that occurs or has occurred in the Phase One study area.

The following PCA were identified in the Phase One study area:

- **PCA #1** – 100 Champagne Avenue; Hutchins & Patrick Ltd., former commercial printing operation with on-site fuel oil USTs (PCA #28 – Gasoline and associated products in fixed tanks, PCA #31 – Ink manufacturing, processing and bulk storage);
- **PCA #2** – 95 Beech Street; Mortimer Ltd. Printing & Lithographs, former commercial printing operation (PCA #31 – Ink manufacturing, processing and bulk storage);
- **PCA #3** – 402 Preston Street; repair garage and former gas station (PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA #4** – 140 Hickory Street/855 Carling Avenue; former fuel depot (PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA #5** – 350 Loretta Avenue; former Bell Canada service garage with UST (PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products in fixed tanks);
- **PCA #6** – 265 Breezehill Avenue; former repair garage (PCA #10 – Commercial autobody shop);
- **PCA #7** – 125 Hickory Street; former repair garage, former on-site USTs (PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products in fixed tanks);
- **PCA #8** – 75 Aberdeen Street; repair garage and former gas station (PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA #9** – 875 Carling Avenue; former repair garage with waste oil and gasoline USTs (PCA #10 – Commercial autobody shop, PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA #10** – 95 Norman Street; former repair garage (PCA #10 – Commercial autobody shop);
- **PCA #11** – 235 Breezehill Avenue former commercial printing operation (PCA #31 – Ink manufacturing, processing and bulk storage);
- **PCA #12** – 146-148 Beech Steet; former on-site UST (PCA #28 – Gasoline and associated products storage in fixed tanks);
- **PCA #13** – 175 Beech Street; fuel oil UST installed in the 1960s (PCA #28 – Gasoline and associated products in fixed tanks);
- **PCA #14** – 424 George Street; former gas station (PCA #28 – Gasoline and associated products storage in fixed tanks);

- **PCA #15** – 75 Young Street; former fuel oil UST (PCA #28 – Gasoline and associated products in fixed tanks);
- **PCA #16** – 6 Champagne Avenue; former dry cleaner (PCA #37 – Operation of dry-cleaning equipment (where chemicals are used));
- **PCA #17** – 845 Carling Avenue; car dealership and service garage (PCA #10 – Commercial autobody shop); and,
- **PCA #18** – 116 Beech Street; former fuel oil AST (PCA #28 – Gasoline and associated products storage in fixed tanks).
- **PCA #19** – 116 Beech Street; fill material of unknown quality (PCA #30 – Importation of fill material of unknown quality).

Records identified USTs installed in the 1930s at the municipal address 116 Beech Street, located 30 m west of the Phase One property. It is noted that the civic address in the Phase One study area have changed since the study area was first developed. The Phase One property was undeveloped prior to the construction of the existing building which was constructed circa 1950. Therefore, none of the records identified for 116 Beech Street prior to this time pertain to the Phase One property. The property currently listed as 146 and 146 Beech Street, was historically listed as 116 Beech Street.

Multiple PCAs were identified in the Phase One study area including repair garages, commercial printers, gas stations, and fuel storage tanks. Due to the separation distance and/or the down/cross-gradient location of the PCAs relative to the Phase One property, none of the PCAs identified in the Phase One study area were determined to contribute to areas of potential environmental concern on the Phase One property.

The Phase One study area slopes down to the southeast towards Dow's Lake. It is possible that fill material was brought to the Phase Two property to level the site when the building was constructed (**PCA #19**: (PCA #30 – Importation of fill material of unknown quality)). This PCA results in an APECs on the Phase One property.

### 6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present. Based on this Phase One ESA, the following APEC was identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
<b>APEC #1</b>	Entire Phase One property	PCA #30 – Importation of fill material of unknown quality	On-site	BTEX, PHC, PAH, and metals	Soil

### 6.4 Phase One Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 2.

#### 6.4.1 Buildings and Structures

The Phase One property was occupied by a three-storey apartment building with one basement level. The basement level of the east side of the building was occupied by apartment units. The basement level of the west side of the building was occupied by laundry, storage, and mechanical rooms.

#### 6.4.2 Water Bodies and Groundwater Flow Direction

There are no water bodies on the Phase One property. The closest body of water is Dow's Lake approximately 600 m to the southeast. The inferred groundwater flow direction is to the southeast towards Dow's Lake.

#### 6.4.3 Areas of Natural Significance

There are no ANSI within the Phase One study area.

#### 6.4.4 Water Wells

Nineteen well records were identified within the Phase One study area. All of the well records were for monitoring wells. Well records indicate surficial soil consists of silty clay. Limestone bedrock was present approximately 2.5 to 3.0 metres below ground surface.

#### 6.4.5 Potentially Contaminating Activity

Based on a review of the available records, the following PCAs were identified:

- PCA #10 – Commercial autobody shops
  - 402 Preston Street (220 m northeast) – active repair garage
  - 350 Loretta Avenue (220 m southwest) – former Bell Canada repair garage
  - 265 Breezehill Avenue (70 m west) – former repair garage
  - 125 Hickory Street (80 m southeast) – former repair garage
  - 75 Aberdeen Street (170 m northeast) – active repair garage
  - 875 Carling Avenue (170 m south) – former repair garage
  - 95 Norman Street (180 m east) – former repair garage
  - 845 Carling Avenue (230 m southeast) – car dealership and repair garage
- PCA #28 – Gasoline and associated products storage in fixed tanks
  - 100 Champagne Avenue (80 m south) – Hutchins & Patrick; former on-site fuel oil tanks
  - 402 Preston Street (220 m northeast) – former gas station
  - 140 Hickory Street (180 m southeast) – former fuel depot
  - 350 Loretta Avenue (220 m southwest) – Bell Canada, private fuel outlet
  - 125 Hickory Street (80 m southeast) – former gasoline and fuel oil USTs
  - 75 Aberdeen Street (170 m northeast) – former gas station
  - 875 Carling Avenue (170 m south) – former on-site waste oil and fuel USTs
  - 146-148 Beech Street (25 m west) – former on-site UST
  - 175 Beech Street (130 m northwest) – fuel oil UST installed in the 1960s
  - 424 George Street (200 m northeast) – former gas station
  - 75 Young Street (210 m north) – former fuel oil UST

- PCA #31 – Ink manufacturing, processing, and bulk storage
  - 100 Champagne Avenue (80 m south) – Hutchins & Patrick, former commercial printing operation
  - 95 Beech Street (130 m northeast) – Mortimer Lithographic Ltd., former commercial printing operation
  - 235 Breezehill Avenue (200 m northwest) – former commercial printing operation
- PCA #37 – Operation of Dry Cleaning Equipment (where chemicals are used)
  - 6 Champagne Avenue (210 m north) – former dry cleaner

None of the PCAs were determined to result in APECs on the Phase One property.

#### 6.4.6 Areas of Potential Environmental Concern

The following APECs were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
<b>APEC #1</b>	Entire Phase One property	PCA #30 – Importation of fill material of unknown quality	On-site	BTEX, PHC, PAH, and metals	Soil

#### 6.4.7 Subsurface Stratigraphy

Bedrock in the general area of the Phase One property consists of limestone and shale of the Simcoe Group. Native surficial soil consists of sand and silt glacial till. The ground surface is approximately 63 metres above sea level (masl). Bedrock is anticipated approximately 1.5 to 3 metres below ground surface. The general topography of the Phase One property and study area slopes down to the southeast towards Dow's Lake.

#### 6.4.8 Uncertainty Analysis

The CSM aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

## 7.0 Conclusions

The Qualified Person who oversaw this work, Mark McCalla, P.Geo., recommends that a Phase Two ESA be conducted to address the APECs that were identified.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

## 9.0 Limitation of Liability, Scope of Report, and Third Party Reliance

### Basis of Report

This report ("Report") is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or Katasa Groupe ("the Client") has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

### Reliance on Information Provided

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp. If new information about the environmental conditions at the Site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

### Standard of Care

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

### Complete Report

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

### Use of Report

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

### Report Format

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

## **Appendix A: Qualifications of Assessors**

## Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment, Conservation and Parks. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

**Leah Wells, P.Eng.**, has five years of experience in the environmental consulting field. She has worked on numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, completing soil and groundwater sampling, soil vapour sampling, assisting in report preparation and data entry and analysis.

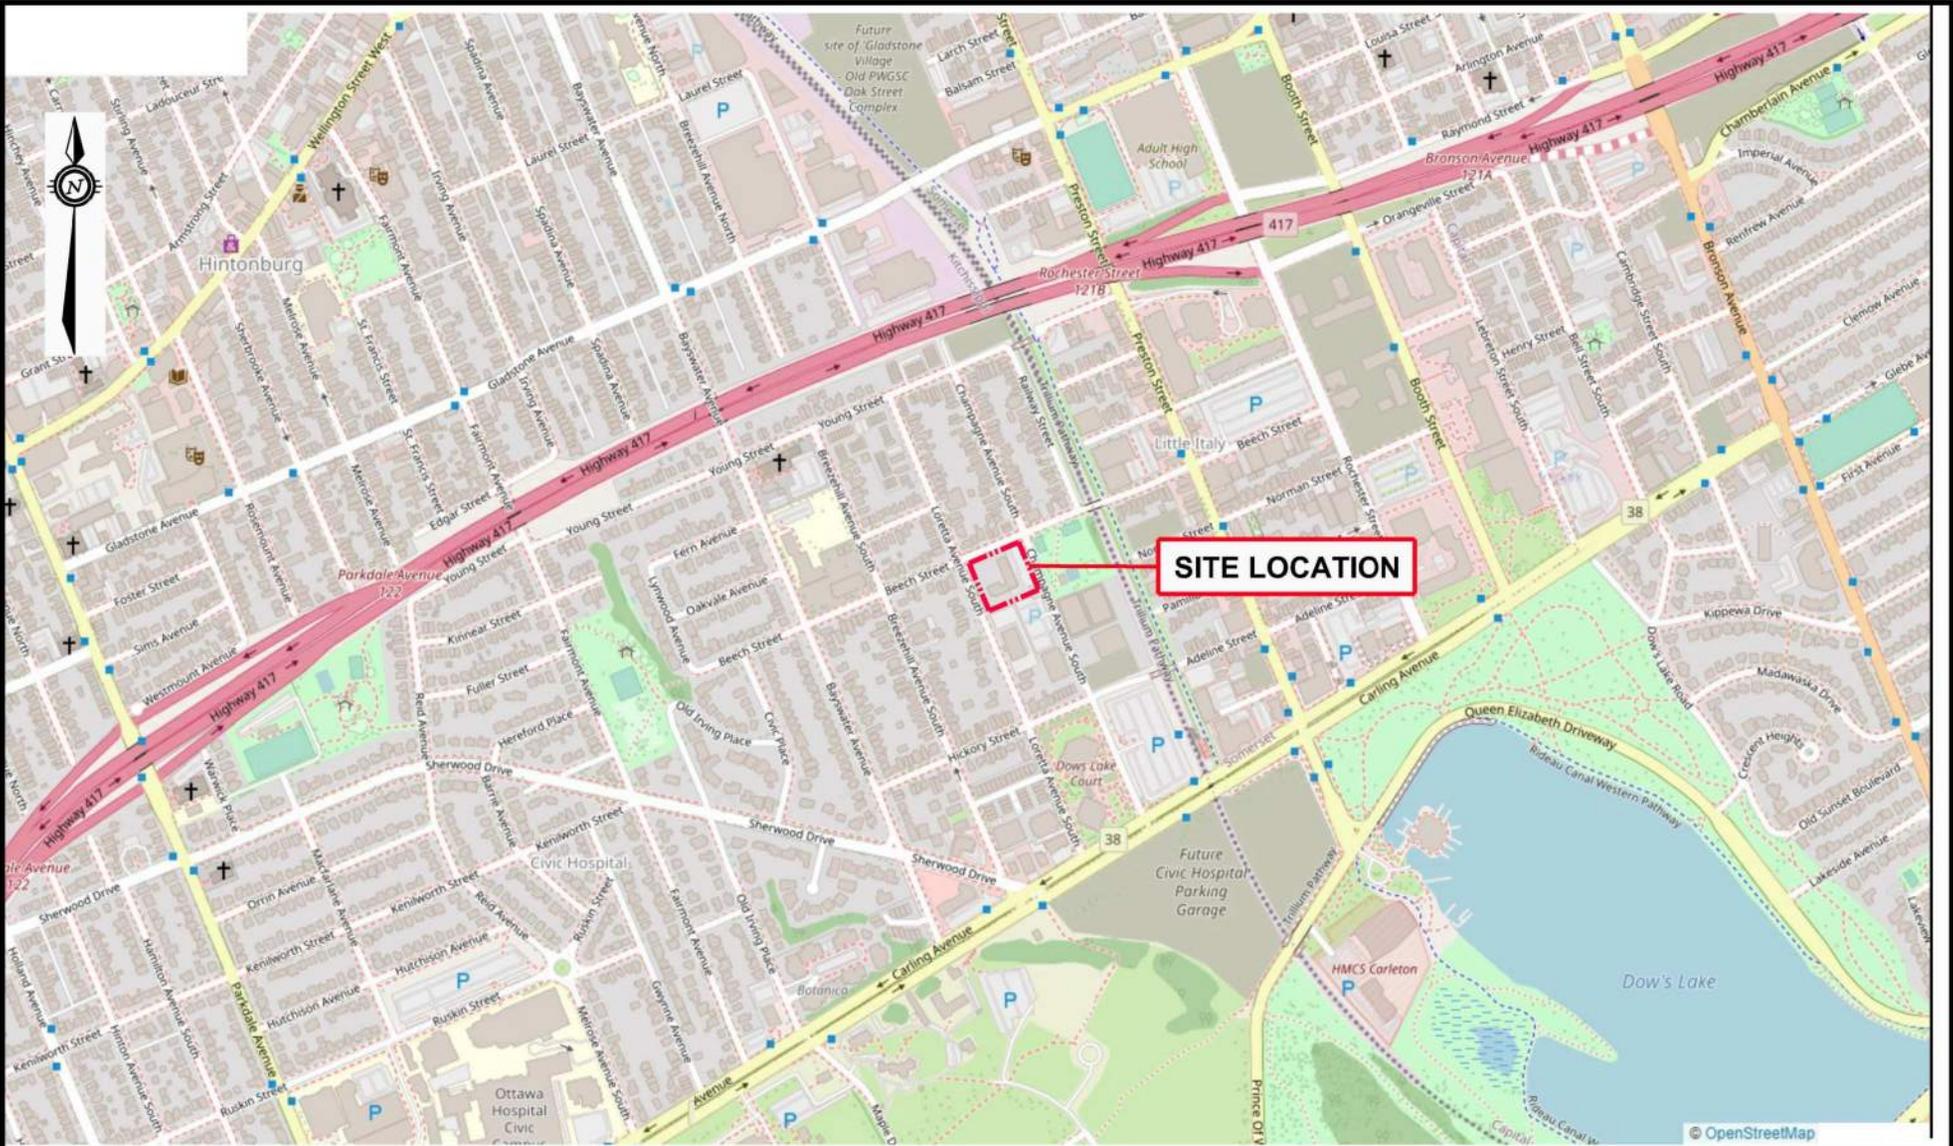

**Mark McCalla, P.Geo.**, is a senior Environmental Scientist with EXP who has over 30 years of experience in the environmental consulting field. His technical undertakings have including work in the following fields: Phase I and II Environmental Site Assessments; Site Specific Risk Assessments; Petroleum and chlorinated hydrocarbon contaminated sites; Soil and groundwater remediation technologies; Hydrogeological, Terrain Analysis and Aggregate Assessments; Preparation of Ontario Ministry of Environment Certificate of Approvals and Records of Site Condition. Mr. McCalla is a Qualified Person for completing Phase I and II Environmental Site Assessments as per O.Reg. 153/04.

Dear Leah Wells:

**RE: MECP FOI A-2023-02995, Your Reference OTT-23005943-B0 – Decision  
Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 116 Beech Street, Ottawa.

After a thorough search through the files of the ministry's Ottawa District Office, Environmental Investigations and Enforcement Branch (EIEB), and Safe Drinking Water Branch (SDW) no records were located responsive to your request. **This file is now closed.**

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Tolani Abraham at Tolani.Abraham2@ontario.ca.

Yours truly,

ORIGINAL SIGNED BY

Ryan Gunn  
Manager (A), Access and Privacy Office

Dear Ms. Wells,

**Re: Information Request  
116 Beech Street, Ottawa, Ontario (“Subject Property”)**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** No environmental records for this property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:  
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** No records.
- **Solid Waste Services:** No records.

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('ADDRESS – HLUI Summary report.xlsx'), please refer to the [Overview and User Guide](#).”

**Additional information may be obtained by contacting:**

**Ontario’s Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

## **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

## **Ottawa Public Health**

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any**

**purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

**Amya Martinov**  
Student Planner

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Feb 28, 2022**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2021**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Feb 28, 2023**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Feb 2023**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Feb 2023**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Mar 31, 2023**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Mar 31, 2023**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Dec 31, 2022**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Apr 30, 2022**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2022**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Mar 2023**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2023**

**National Analysis of Trends in Emergencies System (NATES):**

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021**

**National Defense & Canadian Forces Fuel Tanks:**

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2022****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Mar 31, 2023****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Mar 31, 2023**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2020**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2023**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Feb 28, 2023**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Oct 2021**

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Mar 31, 2023**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jun 30 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
