\*All areas are preliminary and do not allow for all shafts, vertical penetrations, final life safety/exit stairs and corridors, and Structural, Mechanical and Electrical spaces not yet designed. It is recommended that for any preliminary pro forma calculations, appropriate deduction allowances should be made for retail rentable areas, residential unit counts and areas, and office areas. All parking and loading floor areas and space counts are preliminary and subject to change due to as yet unconfirmed SMEP and parking ratio requirements. Ratio requirements are still under discussion between Trinity, the City of Ottawa and the design team.
