---

Further to your request and authorization, Paterson Group (Paterson) prepared the current memorandum to summarize our review of the grading plan for the proposed commercial building at 2510 Walkley Road in the City of Ottawa, Ontario.

This memorandum should be read in conjunction with Paterson Report PG2903-2 dated November 14, 2014, which provides a recommended permissible grade raise restriction of 3 m within 6 m of the proposed building and up to 4 m for access lanes.

## **Grading Plan Review**

Paterson reviewed the following grading plan prepared by D. B. Gray Engineering Inc. Regarding the aforementioned development:

- Grading Plan - Drawing No. C-2 - Project 12075 - Revision 1 dated January 30, 2018.

Based on our review, the grading plan is acceptable from a geotechnical perspective, and there is no instances where the permissible grade raise was exceeded. Therefore, no lightweight fill is required for the subject site.

We trust that this information satisfies your immediate requirements.

Best Regards,

**Paterson Group Inc.**

Faisal I. Abou-Seido, P.Eng.
