Re: 244 Fountain Place
Quadrant Project No. 18-067

Dear Daniel,

The site lighting for 244 Fountain Place has been designed using only fixtures having full cut-off classification, as recognized by the Illuminating Engineering Society of North America (IESNA) and there will be minimal light spillage onto adjacent properties (not exceeding 5 lux).

These guidelines are in accordance with the City of Ottawa's requirements.

Yours truly,

Anas Shaklab, P.Eng.
