Further to your request, Paterson Group (Paterson) reviewed the comments issued by the City of Ottawa in a letter dated July 18, 2018, for the proposed building addition at the aforementioned site. The present memorandum should be read in conjunction with Paterson Group Report PG4341-LET.01 - January 9, 2017. Our response is summarized below:

Geotechnical Investigation Comment B6

Comment: The report needs to include recommendations for the installation of the sewers in the ROW (it can be from sampling of previous studies if the engineer is comfortable).

Response: Refer to Section 4.0 - Design and Construction Precautions of the above noted geotechnical report. Under sub-heading Pipe Bedding and Backfill, recommendations have been provided for installing sewer and water pipes.

It should be noted that Paterson has reviewed the geotechnical investigation completed by others within the ROW for Leitrim Road. Based on our review, Paterson can confirm that the recommendations in our existing geotechnical report are also applicable for the installation of the sewers within the ROW.

Mr. Thanh Do
