Re: Proposed DAN MURPHY FORD Automobile Dealership – 555 Dealership Dr., Ottawa

We wish to confirm that: exterior lighting will be of two types, one type will be wall mounted and another type will be post mounted. Both types:

- Have been designed using only fixtures that meet the criteria for Full Cut-off (Sharp cut-off) Classification, as recognized by the Illuminating Engineering Society of North America (IESNA or IES), and;
- Have been design so that the light spillage onto adjacent properties will be kept below 0.5 foot-candle.

Following fixtures from Gardco or equivalent will be used:

- Wall sconce to be LED with full cutoff performance:
GARDCO #107L-XXX-3-55LA-CW-VOLT-NP-SPRX.
- Light standard to be LED luminaire pol mounted with backlight control module:
PHILIPS GARDCO#ASA-128G1-700-3L

We hope that the above explanation answers your question. Please do not hesitate to call undersigned in case of any queries.

Yours truly,

Massoud Yazdani, P.Eng.
M & E Engineering
