30. Fair
31. Fair
32. Poor

Impact of Development:

All trees listed are in the possible line of construction, there are additional trees on the property that will not be impacted so therefore are not listed. In order to maintain the trees, tree protection fencing will have to be implemented when work is being done in the critical root zones as per the attached CRZ chart. We would suggest removing tree 3 and 7 as they are dead or partially dead.

**Protection Measures:**

Erect a fence at the remaining critical root zone (CRZ) of trees, do not place any material or equipment within the CRZ of the tree, do not attach any signs, notices or posters to any tree, do not raise or lower the existing grade within the CRZ without approval, Tunnel or bore when digging within the CRZ of a tree, ensure that exhaust fumes from all equipment are NOT directed towards any tree's canopy.

**Post Construction Measures:**

Aerate and fertilize the retained trees if impacted by construction.

**ARBORIST INFORMATION**
