## Legal Notification

This report was prepared by EXP Services Inc. for the account of **McCormick Park Developments Inc.**

Any use which a third party makes of this report, or any reliance on or decisions to be made based on it, are the responsibility of such third parties. EXP Services Inc. accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this project.

## Executive Summary

EXP Services Inc. (EXP) was retained by McCormick Park Developments Incorporated to complete a Phase One Environmental Site Assessment (ESA) of the property located at 177 Armstrong Street and 268 Carruthers Avenue in Ottawa, Ontario (hereinafter referred to as the "Phase One property"). At the time of the investigation, the 177 Armstrong Street portion of the Phase One property (177 Armstrong) contained a residence and one commercial building, both vacant. There was one unoccupied residence and single car garage present on the 268 Carruthers Avenue part of the Phase One property.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. Although the Phase One property was not being used for any purpose defined by Ontario Regulation 153/04 at the time of the investigation, EXP understands that the most recent use of the property was as residential/commercial and that the proposed future property use is residential.

The Phase One property is an inverted "L" shaped property composed of three lots and located near the northwest corner of Armstrong and Carruthers. All three site buildings were untenanted at the time of the investigation. The Phase One property has a total area of 0.12 hectares.

Topographically, the Phase One property is relatively flat. The surrounding area has a slope down towards the north. Regional groundwater flow direction is inferred to be in the northerly direction towards the Ottawa River, found approximately 1km to the north of the Phase One property.

Based on the results of the Phase One ESA completed at 177 Armstrong Street and 268 Carruthers Avenue in Ottawa, EXP has identified the following areas of potential environmental concern:

**Table EX-1: Areas of Potential Environmental Concern**

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Contaminants of Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
1. AST Fuel storage tanks in basement 177 Armstrong Street	Southwest part	#28: Gasoline and Associated Products in Fixed Tanks	PHCs and BTEX	Soil and groundwater

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Contaminants of Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
2. AST Fuel storage tanks in basement 179 Armstrong Street	Southeast part	#28: Gasoline and Associated Products in Fixed Tanks	PHCs and BTEX	Soil and groundwater
3. AST Fuel storage tanks in basement 268 Carruthers Avenue	Northeast part	#28: Gasoline and Associated Products in Fixed Tanks	PHCs and BTEX	Soil and groundwater
4. Fill material in gravel parking lot	Entire property	#30: Importation of Fill Material of Unknown Quality	PHCs, PAH, metals, and BTEX	Soil
5. Former and active automotive repair garages at 1 Grant Street and 180 Armstrong Street	South part	#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, metals, and VOC	Groundwater

Based on the findings of the Phase One ESA, a Phase Two ESA is required to assess the soil and groundwater conditions at the Phase One property.

*This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.*

# 1. Introduction

EXP Services Inc. (EXP) was retained by McCormick Park Developments Incorporated to complete a Phase One Environmental Site Assessment (ESA) of the property located at 177 Armstrong Street and 268 Carruthers Avenue in Ottawa, Ontario (hereinafter referred to as the "Phase One property"). At the time of the investigation, the 177 Armstrong Street portion of the Phase One property (177 Armstrong) contained a residence and one commercial building, both vacant. There was one unoccupied residence and single car garage present on the 268 Carruthers Avenue part of the Phase One property. The Phase One property is owned by the following:

Owner Contact: McCormick Park Developments Incorporated  
Mr. Jean Desjardins  
P.O. Box 74155  
Beechwood Avenue  
Ottawa, Ontario  
K1M 2H9

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

## 1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. Although the Phase One property was not being used for any purpose defined by Ontario Regulation 153/04 at the time of the investigation, EXP understands that the most recent use of the property was for residential purposes and that the proposed future property use is also residential. Consequently, since the proposed future use of the property is not more sensitive than its previous use, a Record of Site Condition (RSC) is not required.

## 1.2 Phase One Property Information

The Phase One property is located within a residential neighbourhood on the north side of Armstrong Street and west side of Carruthers Avenue. The property at 177 Armstrong Street has a vacant residence and a vacant store. The residence at 268 Carruthers Avenue was unoccupied. The Phase One property has an area of 0.12 hectares. A Site Location Plan is provided as Figure 1 and a Site Plan is provided as Figure 2 in Appendix B.

The Phase One properties have the following municipal information:

- 177 Armstrong Street – area of 0.086 hectares, property identification number (PIN) 040940154, and legal description of PLAN 83 PT LOTS 4 5 & 6 PLAN;109 N PT LOT 1 ARMSTRONG N; and,
- 268 Carruthers Street – area of 0.028 hectares, property identification number (PIN) 040940153, and legal description of PLAN 83 N PT LOT 6;CARRUTHERS W.

Topographically, the Phase One property is relatively flat. The surrounding area has a slope down towards the north. Regional groundwater flow direction is inferred to be in the northerly direction towards the Ottawa River, found approximately 1km to the north of the Phase One property.

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid is NAD83, Zone 18T, 443042.55 m E, 5027976.66 m N. The UTM coordinates were based on an estimate derived using Google Earth™. The accuracy of the centroid is estimated to range from 5 to 50 m.

## 2. Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Obtaining a search of land title and assessment rolls for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250 metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

EXP personnel who conducted assessment work for this project included Leah Wells, E.I.T., Carl Hentschel, P.Eng., PMP, and Mark McCalla, P.Geo. An outline of their qualifications is provided in Appendix A.

## 3. Records Review

### 3.1 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250 metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property.

According to the City of Ottawa GeoOttawa on-line mapping tool, the Phase One property is zoned for residential use: *R4H* (2249). The *R4* designation means that the property is zoned for residential use. Surrounding properties are also zoned for residential use. Single family homes are present north, west, and east of the Phase One property. A park followed by residential area are located south of the Phase One property across Armstrong Street.

The Phase One study area is shown on Figure 3 in Appendix B.

### 3.2 First Developed Use Determination

Based on a review of historical aerial photographs, historical maps, and other records, it appears that the Phase One property was first developed for use as residences between 1912 and 1928.

### 3.3 Fire Insurance Plans

A review of 1912 fire insurance plans for properties within the Phase One study area was completed using the Archives Canada online resource: (<http://data2.archives.ca/e/e428/e010689183-v8.jpg>).

- The 1912 plans show the 177 Armstrong Street part of the Phase One property as vacant and undeveloped, while a residence is present on the 268 Carruthers Avenue portion of the Phase One property.

### 3.4 Chain of Title

A chain of title was requested from Read Abstracts Inc. for the Phase One property. This has not yet been received.

### 3.5 Previous Reports

The following previous report was provided to EXP for review.

- *Phase One ESA for 177 Armstrong Street, Ottawa, Ontario*. Houle Chevrier Engineering, 2014.

This report addressed only 177 Armstrong, and not the north part of the Phase One property. The report references an environmental screening report *177 Armstrong Street, Groundwater Sampling*, completed by Houle Chevrier in 2013. Two monitoring wells were installed on the property, and one groundwater sample was collected from each of the wells. The samples were analyzed for PHCs, PAHs, VOCs, metals and general inorganics. No exceedances were identified when compared with MECP Table 7, Generic Site Condition Standards for Shallow Coarse Textured Soils in a Non-Potable Groundwater Conditions.

A geotechnical report, *Geotechnical Investigation, Proposed Residential Development, 177 Armstrong Street, Ottawa, Ontario*, completed by Houle Chevrier in 2014 was also referenced. The report identified a total of 330 mm of imported fill material on site.

The report also identified several potential contaminating activities in the study area. The Phase One ESA identified the following areas of potential environmental concern (APEC):

- Fuel storage tanks in basements of residences (4);
- Staining of gravel ground surface at 177 Armstrong Street;
- Presence of fill of unknown quality; and,
- Impacts from off-site spills and vehicle maintenance.

A Phase Two ESA was recommended to assess these APECs.

- *Technical Memorandum, 177 Armstrong Street*, Houle Chevrier Engineering March 22, 2013.

Two monitoring wells were installed to a depth of 6.1 m. Both were 6 and 8 m north of the two on-site buildings. Groundwater samples were collected and submitted for laboratory analysis of petroleum hydrocarbons (PHC), volatile organic compounds (VOC), polycyclic aromatic hydrocarbons (PAH), metals, and inorganic parameters. There were no exceedances of the Ontario Ministry of Environment, Conservation and Parks (MECP) site condition standards. Borehole logs and a site plan showing the monitoring well locations were not included in the memorandum.

- *Technical Memorandum, 177 Armstrong Street – Groundwater Sampling*, Houle Chevrier Engineering February 12, 2013.

This memorandum is similar to the previous one, but it mentions the depth to bedrock and soil testing had not been carried out. Borehole logs and a site plan showing the monitoring well locations were not included in the memorandum.

### 3.6 Environmental Source Information

Information pertaining to the Phase One property was obtained by reviewing documents that are available to the public through municipal and provincial sources. EXP did not identify the need to contact any federal agencies.

A written response from some of the regulatory agencies typically requires several months to receive. If, upon receipt of the response from the regulatory agencies, significant environmental issues are identified, EXP will forward the response to the client as an addendum to this report.

Written responses from regulatory agencies and copies of documents obtained via searches are provided in Appendix C.

#### 3.6.1 Ontario Ministry of the Environment, Conservation and Parks Records

On April 4, 2019, records pertaining to the site were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act* (FOI). To date, no response has been received.

#### 3.6.2 Environmental Registry

On June 27, 2019, the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. Search parameters included: "Armstrong", "Carruthers", "Hinchey", "Oxford", "Stirling", "McCormick", "Wellington" and "Grant". No relevant postings were listed for properties within the Phase One study area.

### 3.6.3 Environmental Access

On June 27, 2019, the MECP Environmental Access website was searched for postings within the Phase One study area. No relevant postings were listed for properties within the Phase One study area.

### 3.6.4 Hazardous Waste Information Network

On June 27, 2019, the MECP Hazardous Waste Information Network (HWIN) website was searched for registered waste generators within the Phase One study area. Search parameters included all of the commercial establishments listed in the ERIS report (discussed in Section 3.2.1). No relevant postings were listed for properties within the Phase One study area.

### 3.6.5 Records of Site Condition

On June 27, 2019, the MECP Brownfields Registry website was searched for postings of Records of Site Condition within the Phase One study area. One RSC site was found within the study area.

- 1140 Wellington Street, Tamarack Corporation

### 3.6.6 City of Ottawa Documentation

A review of the Site Development Application Database was conducted on June 27, 2019 for the Phase One study area. These entries contain an on-line record of plans and reports submitted to the City for approval prior to building permits being issued. These reports are available as part of the public record. No records pertaining to the environmental status of the Phase One property were identified.

A request for documentation was made to the City of Ottawa Historic Land Use Inventory (HLUI). The following is a summary of the information provided:

- 177 Armstrong Street (on-site) – Burn-O-Matic Heating and Engineering Co. 1970 to 1997;
- 180 Armstrong Street (20 m south) – Eddy's Body Shop. 1970 to 1990. Redeveloped to Baldwin's upholstery, Potentially Contaminating Activity (PCA ) **PCA 5**;
- 129/131 Armstrong Street (180 m northeast) – Gordon Sims Garage, 1970 to 1997, **PCA 8**;
- 172 Carruthers Avenue (250 m north) - Hydro One Networks Inc., 1960 to 2003;
- 271 Carruthers Avenue (20 m east) – Joseph St, Jacques Auto Garage, 1900 to 1950. **PCA 7**;
- 109 Pinhey Street (150 m east) – Johnston Press. 1900 to 1950;
- 275 Parkdale Avenue (215 m west) – Comet Cleaners, 1970;
- 300 Parkdale Avenue (215 m west) – MOM Printing, 1960 to 2003, **PCA 24**;
- 380 Parkdale Avenue (250 m southwest) – Bill Brownlee Service Station, 1900 to 1950, **PCA 25**;
- 380 Parkdale Avenue (250 m southwest) – Comet Cleaners, 1960 to 1980, **PCA 25**;
- 390 Parkdale Avenue (250 m southwest) – Parkdale Sunoco, 1960 to 2005, **PCA 26**;
- 1065 Wellington Street (215 m east) – West End Garage and Taxi. 1900 to 1950, **PCA 10**;
- 1067 Wellington Street (215 m east) – Classic Cleaners and Launderers Ltd. 1960 to 1980, **PCA 10**;

- 1097 Wellington Street (110 m east) – Ottawa Cleaners. 1900 to 1940, **PCA 14**;
- 1104 Wellington Street (110 m southeast) – Byblos Dry Cleaners., 1950 to 2000;
- 1119 Wellington Street (90 m southeast) – Betty Brite Cleaners. 1994, **PCA 16**;
- 1125 Wellington Street (90 m southeast) – Blackwell Lyle Ltd. 1900 to 1980, **PCA 19**;
- 1149 Wellington Street (40 m south) – Unnamed Service Station. 1956 to 1963. Redeveloped to bank, **PCA 22**;
- 1175 Wellington Street (190 m southwest) – Shell Service Station. 1960 to 1980. Redeveloped to condominiums in mid 1990s, **PCA 23**;
- 1 Grant Street (40 m south) – Grant Street Garage. 1948 to 2001. Still operating, **PCA 5**;
- 45 Spencer Street (200 m west) – Graphic Display Canada. 1994 to 2000; and,
- 3 Hamilton Avenue (200 m west) – Honeywell Limited. 2000 to 2003.

### 3.6.7 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

### 3.6.8 PCB Storage Sites

Documents entitled *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada, 2003 Annual Report* prepared by Environment Canada and *Ontario Inventory of PCB Storage Sites* prepared by the MECP were reviewed.

- 1156 Wellington Street, Salvation Army Grace General Hospital

### 3.6.9 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed. No former landfills or waste disposal sites were identified within the Phase One study area.

### 3.6.10 Street Directories

A search of municipal street directories for properties within the Phase One study area was conducted by EcoLog Environmental Risk Information Services (or EcoLog ERIS). EcoLog ERIS is an environmental database and information service provider. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A copy of the city directory information is provided in Appendix C.

Directories published in 1905, 1910, 1914, 1920, 1926, 1931, 1935, 1941, 1946, 1951, 1956, 1961, 1966, 1971, 1976, 1981/82, 1987, 1992, 1996/97, 2001/02, 2006/07, and 2011 were reviewed. A summary of the more significant findings is provided below:

- The Phase One property was not listed in any of the directories published prior to 1920. The north part of the Phase One property (266 and 268 Carruthers Avenue) was not listed before 1914. 179

Armstrong was not listed in any directories prior to 1920; 177 Armstrong was not listed in any directories prior to 1951.

- There were no street listings in the Phase One study area in the 1905 directory, however most adjacent streets were listed in the 1910 directory and all entries were for residential use.

**Table 1: City Directory Search**

Address	Direction from Site	Year	Occupant	Potential Contaminating Activity (Yes/No)
177 Armstrong Street	Phase One property	1951-1956	Residential	No
		1961	Metallicrete Floor Co Ltd.	No

Spencer Street	190 m west	1914-2011	Residential	No
Stirling Avenue	75 m east	1914-2011	Residential	No

Based on a review of the city directories, 19 PCAs were identified in the Phase One study area.

### 3.7 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the subject site and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. A summary of the more significant findings is provided below. A copy of the EcoLog ERIS report is provided in Appendix D.

There were no records found for the Phase One property.

The EcoLog search identified ninety (90) listings in the Phase One study area. No listings were identified for the Phase One property. A summary of the pertinent listings are shown in Table 2 below.

**Table 2: Summary of ERIS Report**

Location	Proximity to the Site	Description	Database	Potential Contaminating Activity (Yes/No)
276 Carruthers Avenue	20 m east	Natural gas leak due to insufficient excavation practices	Ontario Spills	No
243 Carruthers Avenue	55 m northeast	Stove oil above ground tank leak	Ontario Spills	No
124 Stirling Avenue	60 m southeast	Fuel oil spill at private residence	Ontario Spills	No
1 Grant Street	40 m south	Gasoline spill to catchbasin, no environmental impact anticipated	Ontario Spills	No
329 Hinchey Street	Directly north	Paint spill to catchbasin	Ontario Spills	No
Rosemount & Wellington	100 m southeast	Natural gas spill due to insufficient excavation practices	Ontario Spills	No
1140 Wellington Street	150 m south	Natural gas spill due to insufficient excavation practices	Ontario Spills	No
11 Rosemount Avenue	155 m south	Photo processing waste; 1992-2004	Ontario Regulation 347 Waste Generators Summary	No
1 McCormick Street	20 m south	Waste included: paint, pigment, coating residues; 2001-2004	Ontario Regulation 347 Waste Generators Summary	<b>Yes (PCA #other)</b>
1156 Wellington Street	180 m southwest	Wastes included: aliphatic solvents, pathological wastes, alkaline and acid wastes, light fuels, pharmaceuticals, inorganic laboratory acids, heavy metals, paint, pigment, coating residues, waste oils and lubricants and PCB's; 1992-2001	Ontario Regulation 347 Waste Generators Summary	No

Location	Proximity to the Site	Description	Database	Potential Contaminating Activity (Yes/No)
1104 Wellington Street	130 m southeast	Waste included: halogenated solvents; 1996-2001	Ontario Regulation 347 Waste Generators Summary	No
1119 Wellington Street	70 m southeast	Waste included: halogenated solvents; 1986-1998	Ontario Regulation 347 Waste Generators Summary	No
5 Grant Street	45 m southwest	Holistech Pest Control Inc. operator license	Pesticide Register	No

Additional spills and waste generators were reported however they were found to have large intervening distances from the site or downgradient of site and due to groundwater flow direction, they do not represent APECs.

### 3.8 Physical Setting Sources

#### 3.8.1 Aerial Photographs

Aerial photographs dated 1928 through 2017 were available for review on the City of Ottawa website. Aerial photographs dated prior to 1928 were not available for review. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs. Copies of the aerial photographs are presented in Appendix E.

**Table 3: Development and Land Use History Summary**

Aerial Photograph (year)	Details
1928	A building consistent with residential use and a smaller commercial building is also present on the south part of the Phase One property. Two residences are present on the north part of the Phase One property. Residences also appear to be present on most adjacent and nearby properties. All nearby roadways are in present day configurations.
1958	No significant changes on the Phase One property or adjacent and surrounding properties.
1965	No significant changes on the Phase One property or adjacent and surrounding properties.
1976	No significant changes on the Phase One property or adjacent and surrounding properties.
1991	No significant changes on the Phase One property or adjacent and surrounding properties.
1999	No significant changes on the Phase One property or adjacent and surrounding properties.
2002	No significant changes on the Phase One property or adjacent and surrounding properties. Multiple cars are present on the Phase One property.
2005	No significant changes on the Phase One property or adjacent and surrounding properties.

Aerial Photograph (year)	Details
2007	No significant changes on the Phase One property or adjacent and surrounding properties.
2008	No significant changes on the Phase One property or adjacent and surrounding properties.
2011	No significant changes on the Phase One property or adjacent and surrounding properties.
2014	No significant changes on the Phase One property or adjacent and surrounding properties.
2015	No significant changes on the Phase One property or adjacent and surrounding properties.
2017	No significant changes on the Phase One property or adjacent and surrounding properties.

### 3.8.2 Geology, Hydrogeology and Topography

The following information sources were reviewed to determine the nature of the subsurface materials at the site:

1. *Surficial Geology - Ottawa – Map 1506A*, Geological Survey of Canada. Scale 1:50,000. Issued 1982.
2. *Bedrock Geology - Ottawa*, Geological of Canada Survey. Scale 1:50,000. Issued 1980.
3. Department of Natural Resources, Topographic Mapping. Electronic Resource ([atlas.gc.ca/toporama/en/](http://atlas.gc.ca/toporama/en/)).

Based on review of the above information, the Phase One property is in the physiographic region known as the Bobcaygeon Formation. The bedrock in the general area is composed of limestone with minor shale in the upper part. Bedrock is shallow, between 0 and 1 mbgs, and therefore, there is likely very little soil on the Phase One property.

The local topography is sloped gently north towards the Ottawa River.

### 3.8.3 Fill Materials

The Phase One property is level with adjacent properties and street level. No significant amounts of fill material on the site is anticipated.

### 3.8.4 Water Bodies and Areas of Natural Significance

No water bodies are present in the Phase One study area. The Ottawa River is located approximately 1 km north of the Phase One property. The regional groundwater flow is inferred to be northerly, towards the river.

There are no Areas of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website. ([www.gisapplication.lrc.gov.on.ca/mamnh/Index.html](http://www.gisapplication.lrc.gov.on.ca/mamnh/Index.html)).

### **3.8.5 Well Records**

The Ontario well records website ([www.ontario.ca/environment-and-energy/map-well-records](http://www.ontario.ca/environment-and-energy/map-well-records) water wells) was accessed. Two monitoring wells are present on the Phase One property. There are multiple monitoring wells present in the Phase One study area, but no potable water wells are present.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library ([maps.ogsrlibrary.com/wells/](http://maps.ogsrlibrary.com/wells/)).

### **3.9 Site Operating Records**

No site operating records were available for review.

### **3.10 Summary of Records Review**

Based on a review of the available records, 26 PCAs were identified and are detailed above.

## 4. Interviews

Interviews were attempted by EXP with any individuals identified to be the most knowledgeable about both the current and historical site uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and to identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the site.

During the completion of this Phase One ESA, an interview was conducted with Mr. Jean Desjardins, client and property owner, on July 16, 2019. Mr. Carl Hentschel conducted the interview. Mr. Desjardins indicated:

- The client has owned the 117 Armstrong Street property for less than 5 years, and the purchased the 268 Carruthers Avenue property in the last year;
- The previous owner of 177 Armstrong Street operates a nearby automotive repair garage;
- A Phase One Environmental Site Assessment was previously conducted in 2014 on the 177 Armstrong Street property;
- A Designated Substance Survey, and subsequent asbestos containing material (ACM) abatement work program was conducted on both buildings at 177 Armstrong Street in 2018;
- A geotechnical investigation is in the process of being conducted on the Phase One property; and,
- The gravel covered parking area is being used by a nearby automotive garage as temporary vehicle parking.

## **5. Site Reconnaissance**

### **5.1 General Requirements**

On July 16, 2019 at 10:00, Mr. Carl Hentschel, P.Eng., PMP of EXP conducted the site visit for the Phase One property. The weather was sunny with an approximate temperature of 25 degrees Celsius. There was no precipitation during the site visit, which lasted approximately 60 minutes. The site visit was conducted in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the Phase One property. A second site visit was completed by Mr. Hentschel on August 28, 2019.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

Photographs were taken at the Phase One property on July 16, 2019 and pertinent photographs are included in Appendix G.

### **5.2 Specific Observations at Phase One Property**

#### **5.2.1 Buildings and Structures**

There are four buildings present on the Phase One property. On the main/south-western part of the Phase One property (177 Armstrong Street), there is residential two-storey building with a basement on the west side and a commercial single storey building with a basement on the east side. The residential building has a stone foundation and brick cladding on the south, east, and west exterior walls and siding on the north wall. The commercial building walls are concrete. Both buildings are currently vacant and were constructed between 1912 and 1928 based on available city directories, aerial photos, and fire insurance plans.

The north-eastern part of the Phase One property (268 Carruthers Avenue) contains one two-storey residential building with a basement and a wood-framed single bay garage. Based on available fire insurance plans, the building was constructed after 1912.

#### **5.2.2 Heating and Cooling Systems**

The residence at 177 Armstrong Street was serviced by an oil-fired furnace. The commercial building at 177 Armstrong Street was serviced by an oil-fired furnace, and no cooling system was observed.

The residential building at 268 Armstrong Avenue was heated by a natural gas fired furnace and cooled by a ground-mounted exterior condenser unit.

No heating and cooling system were observed in the garage building at 268 Armstrong Avenue.

#### **5.2.3 Site Utilities and Services**

The property is serviced by municipal water and sanitary sewer, as well as overhead Hydro Ottawa and telecommunications. The source of municipal water is the Ottawa River.

The utilities and services identified in the general area are summarized in the table below:

**Table 4: Summary of Utilities in General Area**

Utility	Source
Potable Water	Municipal
Natural Gas	Enbridge
Sanitary System	Municipal
Storm Water	Municipal storm system along roadways
Electricity	Hydro Ottawa

**5.2.4 Site Use**

At the time of the investigation, the site usage was residential and commercial, though all buildings were vacant.

**5.2.5 Drains, Pits and Sumps**

No sump pits were observed in the basement of the site buildings.

**5.2.6 Storage Tanks****5.2.6.1 Underground Storage Tanks**

EXP did not observe any underground storage tanks (UST) during the site reconnaissance. No visual evidence such as fill / vent pipes, levelometers or oil fill lines associated with USTs were observed at the Phase One property.

**5.2.6.2 Aboveground Storage Tanks**

During the site reconnaissance EXP observed an aboveground storage tanks (AST) in the basement of the commercial building at 177 Armstrong Street. No tag was attached, but it was theorised to be a metal tank with 1360 L capacity. The furnace AST at the vacant residential building at 177 Armstrong Street was located near the north part of the building, was manufactured in 2012, and had a capacity of 1,360 L. No staining or odours were observed at either AST location.

No visual evidence such as cradles or support slabs were observed in the basement of the building at 268 Carruthers Avenue, though there was evidence of a previous coal chute.

**5.2.7 Chemical Storage and Handling and Floor Condition**

No chemicals were observed at the Phase One property other than household cleaning products.

**5.2.8 Areas of Stained Soil, Pavement or Stressed Vegetation**

No areas of stressed vegetation were observed. Some instances of minor surficial staining were observed on the gravel parking area of 177 Armstrong Street. This is not considered an APEC.

**5.2.9 Fill, Debris and Methane**

The Phase One property is level to the surrounding properties. According to the 2014 Geotechnical report produced by Houle Chevrier indicated that fill is present on the south part of the Phase One property (PCA

# 30 - Importation of Fill Material of Unknown Quality). There are no sources of methane at the surface of the Phase One property.

#### **5.2.10 Air Emissions**

Regulatory control of air emissions in Ontario is the responsibility of the MOECC. According to the Environmental Protection Act (EPA), a Certificate of Approval (CofA) (Air) is required for the ongoing operation of any equipment that may discharge a contaminant into the natural environment if the equipment was installed, modified or altered after June 29th, 1988. Retroactive approval should be sought for equipment installed and unchanged between 1972 and June 29th, 1988 when the requirement for a CofA was added to the EPA. Unless explicitly exempted, most industrial processes or modifications to industrial processes and equipment require a CofA. The EPA provides a list of specific equipment and conditions, which are exempt from CofA (Air) requirements (i.e. fuel burning equipment for comfort heating in a building using natural gas or number 2 fuel oil at a rate of less than 1.5 million British Thermal Units per hour [BTU/hour]).

No air emissions concerns were identified at the time of the site visit.

#### **5.2.11 Odours**

No strong odours were detected during the site visit.

#### **5.2.12 Noise**

No excessive noise was detected during the site visit.

#### **5.2.13 Special Attention Items, Hazardous Building Materials and Designated Substances**

##### **5.2.13.1 Asbestos**

Asbestos-containing materials (ACMs) are fibrous hydrated silicates and can be found in building materials as either "unbound" or "bound" asbestos. Friable asbestos refers to materials where the asbestos fibres can be separated from the material with which it is associated. Non-Friable asbestos refers to asbestos, which is associated with a binding agent (such as tar or cement). Friable asbestos is commonly found in boiler and pipe insulation. Non-Friable asbestos is typically found in roofing tars, floor and ceiling tiles, and asbestos-containing cement.

ACMs in the workplace are defined as a Designated Substance under the Ontario Occupational Health and Safety Act (OHSA). Under OHSA, persons in the workplace are required to be notified of the presence of ACMs once they are suspected to be present, and if there is a potential for workers to be exposed. The use of ACMs was discontinued in Canada in the late 1970s/early 1980s, although non-friable asbestos can still be found in recently constructed buildings.

Based on the estimated age of the residential building at 268 Carruthers Avenue, it is EXP's belief that there is the potential for ACMs present within the building. EXP did not conduct any sampling for asbestos during the site reconnaissance. It is recommended that an updated Designated Substance Survey (DSS) be conducted for the Site as per O.Reg. 278/05 to identify the presence/absence of asbestos-containing materials.

All ACMs in the two buildings at 177 Armstrong Street were reported to have been removed in 2018.

##### **5.2.13.2 Lead**

Lead has frequently been used in oil-based paints, roofing materials, cornices, tank linings, electrical conduits and soft solders for tinplate and plumbing. The use of lead-based paints (LBPs) was phased out

circa 1976. Paint that was produced or used between 1976 and 1980 may contain small amounts of lead. Paint that was produced or used prior to 1950 may contain high levels of lead. The main concern regarding lead paint is its potential to become lead dust or chips either through deterioration and/or mechanical means (i.e., sanding, abrasion, etc.). Exposure to lead dust or chips occurs by ingestion or inhalation.

Based on the previously completed DSS report, some paints in the buildings at 177 Armstrong Street are lead containing.

Based on the age of the residential building at 268 Carruthers Avenue (built prior to 1912), it is EXP's opinion that there is a potential for LBPs to be contained within the building.

#### **5.2.13.3 Mercury**

Mercury could be found in some batteries, light bulbs, old paints, thermostats, old mirrors, etc. Based on an investigation by Consumer and Corporate Affairs Canada, and an assessment of potential health risks by Health and Welfare Canada, in 1991 the decision was made to eliminate the use of mercury compounds in indoor latex paints. The Canadian Paint and Coatings Association (CPCA) supported the withdrawal and all Canadian manufacturers and formulators of the preservative voluntarily agreed to remove "interior uses" from their product labels.

Based on the previously completed DSS report, some lighting tubes in the buildings at 177 Armstrong Street are mercury containing. Mercury containing light tubes were also observed at 268 Carruthers Avenue during the site visit.

Based on the age of the buildings, there is a potential for mercury containing paints to be present at the Phase One property.

#### **5.2.13.4 Polychlorinated Biphenyls (PCBs)**

The manufacture of PCBs in North America was prohibited under the Toxic Substances Control Act (1977). Their use as a constituent of new products manufactured in or imported into Canada was prohibited by regulations in 1977 and 1980. As such, sites developed or significantly renovated after 1980 are unlikely to have PCBs-containing equipment on the Phase One property. Potential equipment, which could contain PCBs include fluorescent mercury and sodium vapour light ballasts, oil filled capacitors and transformers. Any electrical equipment containing PCBs must be disposed in accordance with Ontario Regulation 362 when it is removed from service. Ongoing operation of equipment containing PCBs is permissible.

A review of the Phase One property was conducted to evaluate the potential presence of PCBs-containing equipment in use or stored at the Site. Sources of PCBs were not observed during the site visit but based on the age of the building, there is a potential for PCB bearing oils to be present within the fluorescent light ballasts.

#### **5.2.13.5 Urea Formaldehyde Foam Insulation**

Formaldehyde is a pungent, colourless gas commonly used in water solution as a preservative and disinfectant. It is also a basis for major plastics, including durable adhesives. It occurs naturally in the human body and in the outdoor environment. Formaldehyde is used to bond plywood, particleboard, carpets and fabrics, and it contributes to "that new house smell."

Formaldehyde is also a by-product of combustion; it is found in tobacco smoke, vehicle exhaust and the fumes from furnaces, fireplaces and wood stoves. While small amounts of formaldehyde are harmless, it is an irritating and toxic gas in significant concentrations. Symptoms of overexposure to formaldehyde include irritation to eyes, nose and throat; persistent cough and respiratory distress; skin irritation; nausea; headache; and dizziness.

Urea-formaldehyde foam insulation (UFFI) was developed in Europe in the 1950s as an improved means of insulating difficult-to-reach cavities in the walls. It is typically made at a construction site from a mixture of urea-formaldehyde resin, a foaming agent and compressed air. When the mixture is injected into the wall, urea and formaldehyde unite and "cure" into an insulating foam plastic.

During the 1970s, when concerns about energy efficiency led to efforts to improve building insulation in Canada, UFFI became an important insulation product for existing buildings. Most installations occurred between 1977 and the further use of UFFI was banned in Canada in 1980.

No evidence of UFFI was observed during the site visit.

#### **5.2.13.6 Radon**

Radon is a colourless, odourless, radioactive gas that occurs naturally in the environment. It comes from the natural breakdown of uranium in soils and rocks. Exposure to high levels of radon increases the risk of developing lung cancer. This relationship has prompted concern that radon levels in some Canadian buildings may pose a health risk. Radon gas can move through small spaces in the soil and rock and seep into a building through cracks in concrete, sumps, joints and basement drains. Concrete-block walls are particularly porous to radon and radon trapped in water from wells can be released into the air when the water is used.

Due to the potential health concerns associated with radon, Health Canada released a guideline in June 2007 for a maximum acceptable level of radon gas of 200 Becquerel's per cubic metre (Bq/m<sup>3</sup>). Where radon gas is present and the annual radon concentration exceeds 200 Bq/m<sup>3</sup> in the normal occupancy area, Health Canada recommends taking the necessary actions to reduce radon levels.

Based on local well records and geologic investigations, the bedrock underlying the Phase One property is limestone. Based on the rock type, radon gas is not considered a concern.

#### **5.2.13.7 Mould**

Mould is found in the natural environment and is required for the breakdown of plant debris such as leaves and wood. Mould spores are found in the air in both the indoor and outdoor environments. In order for mould to grow it requires a food source (i.e. gypsum wallboard, wallpaper, wood, etc.) combined with moist conditions. Mould can have an impact on human health depending on the species and concentration of the airborne mould spores. Health effects can include allergies and mucous membrane irritation.

Currently there are no regulations governing mould; however, there are several guidelines addressing mould assessments and abatement. At the moment, the industry standards include the Canadian Construction Association (CCA) document 82-2004 titled "mould guidelines for the Canadian construction industry" and the Environmental Abatement Council of Ontario (EACO) guidelines titled "EACO Mould Abatement Guidelines, Edition 2 (2010)."

It is important to note that the Ministry of Labour (MOL) has governed protecting workers under the Occupational Health and Safety Act, which states that employers are required to take every precaution reasonable to protect their workers. This includes protecting workers from mould within workplace buildings.

Evidence of significant water damage was observed in both the kitchen at 268 Carruthers Avenue, and in the commercial building at 177 Armstrong Street. The residential building at 177 Armstrong Street had been gutted of all interior walls in preparation for demolition and no evidence of mould was observed in the accessible sections.

#### **5.2.13.8 Other Substances**

No other special attention substances (such as acrylonitrile or isocyanates) were suspected to be present at the Phase One property at the time of this Phase One ESA.

#### **5.2.14 Processing and Manufacturing Operations**

No processing or manufacturing operations were observed or reported to have been conducted at the Phase One property.

#### **5.2.15 Hazardous Materials Use and Storage**

No hazardous materials are used or stored at the Phase One property.

#### **5.2.16 Vehicle and Equipment Maintenance Areas**

No vehicle and equipment maintenance activity were observed or reported.

#### **5.2.17 Oil/Water Separators**

No oil water separators were observed at the Phase One property.

#### **5.2.18 Sewage and Wastewater Disposal**

Sewage or wastewater generated at the Phase One property is disposed of via the municipal sewer system.

#### **5.2.19 Solid Waste Generation, Storage & Disposal**

There was no solid waste generation at the Phase One property during the site visit.

#### **5.2.20 Liquid Waste Generation, Storage & Disposal**

No liquid wastes were reportedly generated at the Phase One property.

#### **5.2.21 Unidentified Substances**

No unidentified substances were observed on the Phase One property at the time of the site visit. No dumping or any other deleterious materials were identified.

#### **5.2.22 Hydraulic Lift Equipment**

No hydraulic equipment was observed the Phase One property.

#### **5.2.23 Mechanical Equipment**

No mechanical equipment of concern was present on the Phase One property. An electric wheelchair lift was observed attached to the front porch.

#### **5.2.24 Abandoned and Existing Wells**

Two monitoring wells are currently present on the Phase One property. There are multiple monitoring wells present in the Phase One study area, but no potable water wells are present.

#### **5.2.25 Roads, Parking Facilities and Right of Ways**

Access to the Phase One property was from Armstrong Street and Carruthers Avenue.

Surrounding properties within the Phase One study area are used for residential purposes.

There was no evidence of a railway being present on the Phase One property.

### **5.3 Enhanced Investigation Property**

The Phase One property has been used for residential and commercial purposes, as defined in Regulation 153/04. Future use is also planned to be residential. Thus, an enhanced investigation is required for the Phase One property.

### **5.4 Written Description of Investigation**

Five APEC were identified on the Phase One property.

## 6. Review and Evaluation of Information

### 6.1 Current and Past Uses

A summary of the uses of the Phase One property is provided below:

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
1912 to 1928	Unknown	Single family residences, vacant lots	Residential	No development occurred on the south part of the Phase One property until after 1912. The north part of the site and surrounding properties were developed before 1912
1928 to 2019	Individuals	Single family residences, commercial building	Residential/ commercial	Phase One study area primarily residential, with some small commercial establishments.

### 6.2 Summary of Potentially Contaminating Activities

Ontario Regulation 153/04 defines a PCA as one of 59 operations set out in Table 2 of Schedule D that occurs or has occurred in a Phase One study area. The following PCA were identified for the Phase One study area:

- PCA 1 – 177 Armstrong Street – Above ground furnace oil storage tank in basement. (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Since this is located on the Phase One property, it is considered an APEC. APEC1.
- PCA 2 – 179 Armstrong Street – Above ground furnace oil storage tank in basement. (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Since this is located on the Phase One property, it is considered an APEC. APEC2.
- PCA 3 – 268 Carruthers Avenue – Above ground furnace oil storage tank in basement. (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Since this is located on the Phase One property, it is considered an APEC. APEC3.
- PCA 4 – 177 Armstrong Street – Fill material identified during drilling program in 2013. (PCA #30 – Importation of Fill Material of Unknown Quality). Since this is located on the Phase One property, it is considered an APEC. APEC4.
- PCA 5 – 180 Armstrong Street/1 McCormick Street – Former automotive repair shop, located 20 m to the south of the Phase One property. The site was also listed under Ontario Regulation 347 as a waste generator from 2001-2004 (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles, PCA #other). Wastes included: paint, pigment, and coating residue. Due to the proximity to the Phase One site, and the direction of groundwater flow, this contributes to an APEC in the south part of the Phase One property. APEC 5.
- PCA 6 – 1 Grant Street – Automotive repair shop, located 40 m south of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation

Vehicles). Due to the proximity to the Phase One site, and the direction of groundwater flow this contributes to an APEC in the south part of the Phase One property. APEC 5.

- PCA 7 – 271 Carruthers Avenue – Automotive repair shop, located 20 m east of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles). Due to the northerly direction of groundwater flow, this is not considered an APEC.
- PCA 8 – 131 Armstrong Street – Former automotive repair shop, located 170 m to the east of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 9 – 1064 Wellington Street – Former automotive repair shop and dry cleaner, located 250 m east of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks, PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 10 – 1067 Wellington Street – Former automotive repair shop and dry cleaner, located 250 m east of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks, PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 11 – 1069 Wellington Street – Former dry cleaner, located 250 m east of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 12 – 1091 Wellington Street – Former Chinese laundry, located 145 m southeast of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 13 – 1092-94, 1096 Wellington Street – Former service station located 145 m to the southeast of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 14 – 1097 Wellington Street – Former dry cleaner, located 150 m southeast of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 15 – 1112 Wellington Street – Former dry cleaner, located 120 m southeast of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 16 – 1119 Wellington Street – Former dry cleaner, located 70 m southeast of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 17 – 1120 Wellington Street – Former Chinese laundry, located 125 m southeast of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 18 – 1124 Wellington Street – Former service station located 120 m to the southeast of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks and PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation

Vehicles). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.

- PCA 19 – 1125 Wellington Street – Former dry cleaner, located 100 m southeast of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the intervening distance, this is not considered an APEC.
- PCA 20 – 1132 Wellington Street – Former service station located 110 m southeast of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Based on the intervening distance, this is not considered an APEC.
- PCA 21 – 1134 Wellington Street – Former automotive repair shop and Chinese laundry, located 110 m southeast of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks, PCA #37 – Operation of Dry-Cleaning Equipment). Based on the intervening distance, this is not considered an APEC.
- PCA 22 – 1141/1149 Wellington Street – Former automotive repair shop and service station, located 115 m south of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles, PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Based on the intervening distance, this is not considered an APEC.
- PCA 23 – 1175 Wellington Street – Former service station located 170 m southwest of the Phase One property (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Based on the intervening distance and northerly groundwater flow direction, this is not considered an APEC.
- PCA 24 – 300 Parkdale Avenue – Commercial printers located 215 m to the west of the Phase One property (PCA Other). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 25 – 380 Parkdale Avenue – Former dry cleaners located 215 m to the west of the Phase One property (PCA #37 – Operation of Dry-Cleaning Equipment). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.
- PCA 26 – 390 Parkdale Avenue – Former service station located 235 m to the southwest of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles and PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). Based on the assumed northerly direction of groundwater flow and the intervening distance, this is not considered an APEC.

No other PCAs that took place within the vicinity of the Phase One property (approximately 250 m radius) were identified.

### 6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present. As a result of the PCAs, the report identified the following APECs at the Phase One property as shown on Figure 5.

- APEC 1 – 177 Armstrong Street – Above ground furnace oil storage tank in basement. (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). This APEC is associated with PCA 1. The potential contaminants of concern include: PHCs and BTEX.
- APEC 2 – 179 Armstrong Street – Above ground furnace oil storage tank in basement. (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). This APEC is associated with PCA 2. The potential contaminants of concern include: PHCs and BTEX.

- APEC 3 – 268 Carruthers Avenue – Above ground furnace oil storage tank in basement. (PCA #28 – Gasoline and Associated Products Stored in Fixed Tanks). This APEC is associated with PCA 3. The potential contaminants of concern include: PHCs and BTEX.
- APEC 4 – 177 Armstrong Street – Fill material identified during drilling program in 2013. (PCA #30 – Importation of Fill Material of Unknown Quality). This APEC is associated with PCA 4. The potential contaminants of concern include: PHCs, PAH, metals, and BTEX.
- APEC 5 – 180 Armstrong Street/1 McCormick Street – Former automotive repair shop, located 20 m to the south of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles, PCA #other). This APEC is associated with PCA 5. The potential contaminants of concern include: PHCs, metals, and VOC.
- APEC 5 – 1 Grant Street – Automotive repair shop, located 40 m south of the Phase One property (PCA #27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles). This APEC is associated with PCA 6. The potential contaminants of concern include: PHCs, metals, and VOC.

## 6.4 Phase One ESA Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 2.

### 6.4.1 Buildings and Structures

The north part of the Phase One property (268 Carruthers Avenue) was developed before 1912 with two single-family residential buildings, which are still present on the site. The south part of the Phase One property (177 and 179 Armstrong Street) was developed with a single-family residential building and a commercial building between 1912 and 1928. No further development activity has occurred on the Phase One property since.

### 6.4.2 Water Bodies and Groundwater Flow Direction

No water bodies are present in the Phase One study area. The Ottawa River is located approximately 1 km north of the Phase One property. The regional groundwater flow is inferred to be northerly, towards the river.

### 6.4.3 Areas of Natural Significance

There are no ANSI within the Phase One study area.

### 6.4.4 Water Wells

There are no potable water wells within the Phase One study area.

### 6.4.5 Underground Utilities

The surrounding properties are serviced by underground municipal utilities (water and sewer) as well as underground Enbridge Gas, indicating that services are available to service the Phase One property if it is re-developed.

#### **6.4.6 Subsurface Stratigraphy**

The Phase One property is in the physiographic region known as the Bobcaygeon Formation. The bedrock in the general area is composed of limestone with minor shale in the upper part. Bedrock is shallow, between 0 and 1 mbgs, there is likely very little native soil on the Phase One property.

#### **6.4.7 Uncertainty Analysis**

The CSM is a simplification of reality, which aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

## 7. Conclusions

Based on the results of the Phase One ESA completed, EXP has identified the following areas of potential environmental concern:

**Table 7.1: Areas of Potential Environmental Concern**

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Contaminants of Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
1. AST Fuel storage tanks in basement 177 Armstrong Street	Southwest part	#28: Gasoline and Associated Products in Fixed Tanks	PHCs and BTEX	Soil and groundwater
2. AST Fuel storage tanks in basement 179 Armstrong Street	Southeast part	#28: Gasoline and Associated Products in Fixed Tanks	PHCs and BTEX	Soil and groundwater
3. AST Fuel storage tanks in basement 268 Carruthers Avenue	Northeast part	#28: Gasoline and Associated Products in Fixed Tanks	PHCs and BTEX	Soil and groundwater
4. Fill material in gravel parking lot	Entire property	#30: Importation of Fill Material of Unknown Quality	PHCs, PAH, metals, and BTEX	Soil
5. Former and active automotive repair garages at 1 Grant Street and 180 Armstrong Street	South part	#27 – Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	PHCs, metals, and VOC	Groundwater

Based on the findings of the Phase One ESA, a Phase Two ESA is required to assess the soil and groundwater conditions on the Phase One property.

## **9. Limitation of Liability, Scope of Report, and Third Party Reliance**

### **Basis of Report**

This report ("Report") is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

### **Reliance on Information Provided**

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp. If new information about the environmental conditions at the Site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

### **Standard of Care**

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

### **Complete Report**

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

### **Use of Report**

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

## Report Format

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

## **Appendix A: Qualifications of Assessors**

## Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

**Carl Hentschel**, P.Eng., PMP, has 17 years of experience in the environmental consulting field working primarily in Ontario, Quebec and the northern territories. He has managed and/or completed numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, soil and groundwater remediation projects, designated substance surveys, building demolition management, environmental effects evaluations (EEE), air quality assessments, bid specification preparation, and is an experienced technical report writer and reviewer.

**Mark McCalla**, P.Geo., is a senior Environmental Scientist with EXP who has 29 years of experience in the environmental consulting field. His technical undertakings have including work in the following fields: Phase I and II Environmental Site Assessments; Site Specific Risk Assessments; Petroleum and chlorinated hydrocarbon contaminated sites; Soil and groundwater remediation technologies; Hydrogeological, Terrain Analysis and Aggregate Assessments; Preparation of Ontario Ministry of Environment Certificate of Approvals and Records of Site Condition. Mr. McCalla is a Qualified Person for completing Phase I and II Environmental Site Assessments as per O.Reg. 153/04.

Dear Ms. Radisch,

**Re: Information Request  
177-179 Armstrong Street, Ottawa, Ontario ("Subject Property")**

**Internal Department Circulation**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- No information was returned on the Subject Property from Departmental circulation.

**Search of Historical Land Use Inventory**

**This acknowledges receipt of the signed Disclaimer regarding your request for information from the City's Historical Land Use Inventory (HLUI 2005) database for the Subject Property.**

A search of the HLUI database revealed the following information:

- There is one activity associated with the Subject Property: Activity Number 1885.

The HLUI database was also searched for activity associated with properties located within 250m of the Subject Property. The search revealed the following:

- There are 78 activities associated with properties located within 250m of the Subject Property: Activity Numbers 1885, 5843, 3211, 6454, 3337, 12289, 12572, 7114, 7697, 4770, 5797, 6761, 4547, 12455, 13212, 6805, 7460, 6176, 1952, 213, 14720, 15061, 2388, 13512, 2386, 2388, 6951, 5951, 6893, 7413, 5217, 13811, 10301, 5588, 11313, 1619, 8833, 1647, 13937, 5176, 9904, 6532,

*Shaping our future together  
Ensemble, formons notre avenir*

14526, 14722, 4384, 10517, 942, 12818, 10925, 4770, 6539, 10404, 6202, 6753, 7164, 13246, 553, 8848, 9964, 1671, 3338, 6201, 5967, 6271, 2225, 3338, 12197, 12850, 361, 8970, 11649, 2570, 6308, 7370, 10916, 10246, 3424, 533

Please note that Activity Numbers 12289, 6176, 14720, 15061, 2388, 7413, 13811, 5588, 14526, 4384, 7164, 13246, 9964, 1671, 5967, 12850, 6308, 7370, 10916, 533 have a PIN Certainty of "2". This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the Subject Property. All database entries with a PIN Certainty of "2" require independent verification as to their precise location.

A site map has been included to show the location of the Subject Property as well as the location of all the activities noted above, including the HLUI database's location of the Activity Numbers with a PIN Certainty of "2".

Additional information may be obtained by contacting:

### **Ontario's Environmental Registry**

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

### **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all**

information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact Eric Steele at 613-580-2424 ext. 21690 or [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca)

Sincerely,

Eric Steele

Re: OTT-00252997-A0     **File Review Request**  
   **177 & 179 Armstrong Street, Ottawa, Ontario**

Dear Sir or Madam:

I am sending a Freedom of Information Request to you for 177 & 179 Armstrong Street, Ottawa, Ontario. We are conducting an environmental site assessment and require any environmental concerns.

If possible, we would appreciate receiving the documentation by email ([kathy.radisch@exp.com](mailto:kathy.radisch@exp.com)) and by mail. If you have any questions, or require any further information, please do not hesitate to contact the undersigned at 613-688-1891, ext. 3296.

Yours truly,  
**exp Services Inc.**

A handwritten signature in blue ink that reads "Kathy Radisch". The signature is fluid and cursive, with the first name "Kathy" and last name "Radisch" clearly distinguishable.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary

## **Property Information:**

Provincial

**AGR**

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

**AGR**

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2018**

### **Abandoned Mine Information System:**

Provincial

**AMIS**

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

**ANDR**

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Automobile Wrecking & Supplies:**

Private

**AUWR**

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jan 31, 2019**

### **Borehole:**

Provincial

**BORE**

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2014**

### **Certificates of Approval:**

Provincial

**CA**

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal

CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date:** Jan 2004-Dec 2017

**Commercial Fuel Oil Tanks:**

Provincial

CFOT

List of commercial underground fuel oil tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Note: the Fuels Safety Division does not register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of commercial fuel tanks in the province. The TSSA updates information in its system on an ongoing basis; this listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date:** Feb 28, 2017

**Chemical Register:**

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date:** 1999-Jan 31, 2019

**Compressed Natural Gas Stations:**

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date:** Dec 2012 - Mar 2019

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date:** Apr 1987 and Nov 1988\*

**Compliance and Convictions:**

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date:** 1989-May 2019

**Certificates of Property Use:**

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date:** 1994-Apr 30, 2019

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date:** 1886 - Oct 2018

**Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date:** Oct 2011-May 31, 2019

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Apr 30, 2019**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-May 31, 2019**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Apr 30, 2019**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

[EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial

[EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2018**

**List of TSSA Expired Facilities:**

Provincial

[EXP](#)

List of facilities and tanks - for which there was once a registration - no longer registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed from the ground are included in the expired facilities inventory held by the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-May 2019**

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2018**

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks made available by the Fuels Safety Program of the Technical Standards & Safety Authority (TSSA). Ontario Regulation 213/01 of the Technical Standards and Safety Act (2000) requires that all underground tanks be registered with the TSSA. Notes: the Fuels Safety Division did not register private fuel underground/aboveground storage tanks prior to January of 1990, or furnace oil tanks prior to May 1, 2002; nor does the Division register waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel storage tanks/tank facilities in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Mar 31, 2019**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2017**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**TSSA Incidents:**

Provincial

INC

List of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC) and made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2019**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2017**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Dec 31, 2018**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2019**

**Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSRLibrary has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-May 2018**

**Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date:** 1987-Oct 2004; 2012-Dec 2013

**Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date:** 1994-Apr 30, 2019

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date:** 1999, 2002, 2004, 2005, 2009-2014

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date:** 1920-Jan 2005\*

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** 1988-Mar 2019

**TSSA Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills) made available by the Technical Standards and Safety Authority (TSSA). Under the Technical Standards & Safety Act (2000), the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors, and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of pipeline incidents in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date:** Feb 28, 2017

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994-Apr 30, 2019

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-2016

**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Mar 2019

**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Jan 31, 2019

**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial

SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Feb 2019

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date:** 1990-Dec 31, 2017

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date:** 1915-1953\*

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date:** 1970-Aug 2018

**TSSA Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of tank variances in the province. The TSSA updates information in its system on an ongoing basis; this listing is hence limited by the record date provided here.

**Government Publication Date:** Feb 28, 2017

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-May 31, 2019**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Feb 28, 2019**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
