## **EXECUTIVE SUMMARY**

### **Assessment**

Paterson Group was retained by Avenue 31 Capital Inc. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 4055 and 4120 Russell Road, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the sites and study area and to identify any environmental concerns with the potential to have impacted the subject properties.

Based on a review of historically available information, the subject properties were first developed with farmhouses and barns sometime around 1918 and sometime prior to 1948, for 4055 and 4120 Russell Road, respectively. Since that time, the subject properties have been used for residential, commercial, and agricultural purposes. In the mid-1900s, additional structures were constructed on 4055 Russell Road, which included residential dwellings, an auto service garage, and an additional farmhouse. By the 1990s, the farmhouse situated on 4120 Russell Road, as well as the majority of the buildings situated on 4055 Russell Road had been demolished. The neighbouring properties were historically developed for residential, commercial, and light industrial purposes. The potential for the importation of fill material on-site as a result of the demolition of the two (2) former farmhouses on 4055 and 4120 Russell Road, the historical presence of a former on-site auto service garage on 4055 Russell Road, and the historical aboveground fuel tank spill at 4055 Russell Road are all considered to represent APECs with respect to the subject sites.

Following the historical review, a site inspection was conducted. 4055 Russell Road is currently occupied by a residential dwelling and an abandoned farmhouse and barns, whereas 4120 Russell Road is currently vacant. Both sites are predominantly covered with dense vegetation. The fill material identified on the north portion of 4120 Russell Road is considered to represent an APEC on the subject property. Several PCAs were identified within the Phase I Study area, however, based on their separation distance and/or down-gradient or cross-gradient orientation, these PCAs are not considered to represent APECs on the subject property.

### **Recommendations**

Based on the results of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment will be required for the subject sites.**

Multiple asbestos containing building materials were determined to be present within the abandoned farmhouse situated on 4055 Russell Road. These materials include the drywall joint compound, cement wall board, vinyl sheet flooring, mastic adhesive, duct heat guard, window glazing, and roofing sealant. These materials were observed to be in poor condition at the time of the site inspection. An asbestos management and abatement program should be conducted prior to the demolition or renovation of the subject building.

Large growth patches of white coloured mould were observed within the basement of the abandoned farmhouse at 4055 Russell Road. Extensive water damage was observed within certain portions of the building which may have fostered an environment which promoted mould growth. It is recommended that an appropriate filter/mask be worn when entering the building.

## **1.0 INTRODUCTION**

At the request of Avenue 31 Capital Inc., Paterson Group (Paterson) conducted a Phase I - Environmental Site Assessment (Phase I ESA) for 4055 and 4120 Russell Road, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the site and study area and to identify any environmental concerns with the potential to have impacted the subject property.

Paterson was engaged to conduct this Phase I ESA by Mr. Michel Pilon of Avenue 31 Capital Inc. Mr. Pilon can be reached by telephone at 613-903-7331.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared in general accordance with the requirements of Ontario Regulation 153/04, as amended, under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

## 2.0 PHASE I PROPERTY INFORMATION

Addresses:	4055 Russell Road, Ottawa, Ontario. 4120 Russell Road, Ottawa, Ontario.
Legal Descriptions:	(4055 Russell Road) Part of Lots 3, 4, 5, Concession 6, Rideau Front; Part of Registered Plan 5R-5635; Formerly the Township of Gloucester, in the City of Ottawa.  (4120 Russell Road) Part of Lot 5, Concession 6, Rideau Front; Part of Registered Plan 4R-24959; Formerly the Township of Gloucester, in the City of Ottawa.
Property Identification Numbers (PINs):	(4055 Russell Road) 04351-0393 (4120 Russell Road) 04161-0168, 04161-0166, 04161-0166, 04161-0158
Location:	The subject properties are located on the north (4055 Russell Road) and south (4120 Russell Road) side of Russell Road, approximately 50 m west of Hunt Club Road, in the City of Ottawa, Ontario.
Latitude and Longitude:	(4055 Russell Road) 45° 23' 09" N, 75° 35' 30" W (4120 Russell Road) 45° 22' 50" N, 75° 35' 27" W
<b>Site Description:</b>	
Configuration:	(4055 Russell Road) Irregular (4120 Russell Road) Irregular
Site Area:	(4055 Russell Road) 28.2 ha (approximate) (4120 Russell Road) 12.2 ha (approximate)
Zoning:	(4055 Russell Road) IH – Heavy Industrial Zone  (4120 Russell Road) IH – Heavy Industrial Zone (4120 Russell Road) AG – Agricultural Zone

**Current Use:** (4055 Russell Road) The property is currently occupied by a residential dwelling and an abandoned farmhouse and associated barns.

(4120 Russell Road) The property is currently vacant.

**Services:** Both properties are located in a municipally serviced area. It should be noted that the occupied residential dwelling situated on 4055 Russell Road (addressed 3995 Russell Road) is supplied with municipal water services and contains a private septic system.

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- ☐ Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- ☐ Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- ☐ Conduct interviews with persons knowledgeable of current and historic operations on the subject property and, if warranted, neighbouring properties;
- ☐ Present the results of our findings in a comprehensive report in general accordance with the requirements of Ontario Regulation 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01;
- ☐ Provide a preliminary environmental site evaluation based on our findings;
- ☐ Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I ESA Study Area Determination**

A radius of approximately 250 m was determined to be appropriate as a Phase I ESA study area for this assignment. Properties outside the 250 m radius are not considered to have impacted the subject property, based on their significant distance from the site.

#### **First Developed Use Determination**

Based on a review of historical information, 4055 Russell Road was first developed with a farmhouse sometime around 1918 and 4120 Russell Road was first developed with a farmhouse sometime prior to 1948.

#### **Plan of Survey**

A sketch illustrating the subject lands, prepared by Annis, O'Sullivan, Vollebekk Ltd., dated May 14, 2019 and amended September 17, 2019, was reviewed as part of this assessment. The subject sites are shown in their current configuration. A copy of the sketch is provided in Appendix 1.

#### **Fire Insurance Plans**

Fire insurance plans are not available for the general area of the subject sites.

#### **City of Ottawa Street Directories**

City of Ottawa street directories at the National Archives were reviewed in approximate 10-year intervals from 1970 to 2011 as part of this assessment. The property addressed 4055 Russell Road was listed as a residential property in the year 1999. No directory information was available for the subject site prior to this date. The property addressed 4120 Russell Road was not listed in the directories. The directories indicate that the neighbouring lands have been used for various commercial and industrial purposes between 1990 and 2011, the last year reviewed.

A review of the city street directories identified several off-site potentially contaminating activities (PCAs) within the Phase I study area. A summary of the PCAs identified within the Phase I study area is provided in the table below.

**Table 1: City Street Directories – Potentially Contaminating Activities in the Phase I Study Area**

Address	Listed Activity (years listed)	Distance / Orientation From Subject Sites	APEC (Y/N)
4120 Belgreen Dr.	Manitoulin Transport, Motor Express Ottawa (1990-2011) Myers Transport Ltd., Transport Help (2000-2011) Canada Transport (1990)	175 m S of 4055 Russell Rd. 0 m N of 4120 Russell Rd.	N
4119 Belgreen Dr.	Deals 4 Wheels, Prestige Tire & Auto (2000-2011)	125 m S of 4055 Russell Rd. 200 m N of 4120 Russell Rd.	N
4117 Belgreen Dr.	Gloucester Auto Repairing (1990)	125 m S of 4055 Russell Rd. 200 m N of 4120 Russell Rd.	N
4110 Belgreen Dr.	Micron Precision (2011) Delta Printing (1990)	240 m S of 4055 Russell Rd. 110 m N of 4120 Russell Rd.	N
4095 Belgreen Dr.	ABD Ironworld Inc., Metalworld Inc. (2011) Ahirang Powder Coating (2011) A16 Auto Parts (2000) Capital Cutting & Coring (1990) Maheral Trucking Ltd. (1990)	290 m S of 4055 Russell Rd. 210 m N of 4120 Russell Rd.	N
4080 Belgreen Dr.	White's Paint & Copy (1990-2000)	400 m S of 4055 Russell Rd. 50 m N of 4120 Russell Rd.	N

Several industrial activities, contractor yards, and automotive service garages were identified on the south side of Belgreen Drive, immediately north of 4120 Russell Road. Based on their relatively recent age of construction, their separation distance, and/or their down-gradient or cross-gradient location relative to the subject property, these PCAs are not considered to result in areas of potential environmental concern (APECs) with respect to either subject property.

Based on their separation distances, the remaining PCAs identified within Phase I study area are not considered to pose a concern to the subject properties. PCAs identified within the Phase I study area are presented on Drawing PE4690-2 – Surrounding Land Use Plan in the Figures section of this report.

## 4.2 Environmental Source Information

### Environment and Climate Change Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on August 28, 2019. The subject sites were not listed in the NPRI database. No records of pollutant release were listed in the database for properties located within the Phase I study area.

## **PCB Inventory**

A search of national PCB waste storage sites was conducted as part of this assessment. One (1) PCB waste storage site (a Hydro One power substation) was identified immediately to the north of 4055 Russell Road. While considered to be a potentially contaminating activity, due to the presence of transformers on-site, it was determined that no transformers are physically situated in close proximity to the subject site. Based on this information, as well as the nature of transformer fluid, this substation is not considered to represent an APEC with respect to the subject lands.

## **Ontario Ministry of Environment (MECP) Waste Disposal Site Inventory**

The Ontario Ministry of Environment and Climate Change document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario.

One (1) former waste disposal site (Site No. A 460705 – closed 1981) was identified approximately 200 m west of 4120 Russell Road. Based on the date of closure, as well as the separation distance, the former waste disposal site is not considered to pose an environmental concern to the subject sites.

## **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry was conducted electronically on August 28, 2019 for the subject site and neighbouring properties within the Phase I study area. No records of site condition (RSCs) were filed for the subject sites or any properties within the Phase I study area.

## **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment, Conservation and Parks document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No coal gasification plants were identified in the Phase I study area.

## **MECP Submissions**

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the subject sites. The response from the MECP indicated that no relevant records were identified pertaining to the subject site.

### **MECP Instruments**

A request was submitted to the MECP Freedom of Information office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the subject sites. The response from the MECP indicated that no relevant records were identified pertaining to the subject site.

### **MECP Incident Reports**

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the subject sites or adjacent properties. The response from the MECP indicated that no relevant records were identified pertaining to the subject site.

### **MECP Waste Management Records**

A request was submitted to the MECP Freedom of Information office for information with respect to waste management records for the subject sites. The response from the MECP indicated that no relevant records were identified pertaining to the subject site.

### **Technical Standards and Safety Authority (TSSA)**

The TSSA Fuels Safety Branch in Toronto was contacted electronically on August 28, 2019 to inquire about current and former underground storage tanks, spills, and incidents for the subject site and neighbouring properties. The response from the TSSA indicated that the subject site is not listed in the TSSA registry.

The property addressed 4120 Belgreen Drive, located immediately north of 4120 Russell Road, contains records for two (2) active fuel tanks and one (1) active private gasoline fuel outlet. Based on the separation distance between the fuel outlet and the subject property, as well as its cross-gradient orientation, this site is not considered to pose an environmental concern to the subject property.

A copy of the correspondence with the TSSA is included in Appendix 2.

### **Areas of Natural and Scientific Interest (ANSI)**

A search for areas of natural and scientific interests within the Phase I study area was conducted via the Ontario Ministry of Natural Resources and Forestry (MNRF) website on August 28, 2019. The search did not reveal any areas of natural and scientific interest within the Phase I study area.

### **City of Ottawa Landfill Document**

The document entitled “Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa”, was reviewed. No former landfill sites were identified within the Phase I study area.

### **City of Ottawa Historical Land Use Inventory**

A requisition form was sent to the City of Ottawa to request information from the City’s Historical Land Use Inventory (HLUI 2005) database for the subject property. A response had not been received at the time this report was issued. The response from the City indicated that no relevant records were identified pertaining to the subject site.

### **ERIS Database Report**

A database report, prepared by ERIS (Environmental Risk Information Services) Ltd., dated July 16, 2020, was acquired and reviewed as part of this assessment. The complete ERIS report has been appended to this letter.

#### ☐ *On-Site Records:*

The ERIS report identified twenty-four (24) environmental records pertaining to the subject site. Upon further review, it was determined that the majority of these records instead pertain to multiple off-site properties situated to the west of the subject lands.

One of the records identified by the ERIS report references an oil spill which occurred in 2001 at the residence addressed 3995 Russell Road. According to the record, 100 L of oil was spilled onto the basement floor of the residence due to a valve leak. The record states that no floor drains were present in the basement of the residence. During the site inspection, the concrete floor of the basement of 3995 Russell Road was noted to be in good condition, with no cracks visible. Based on the floor’s conditions, absence of floor drains, as well as the low quantity of fuel spilled, this historical oil spill is not considered to have had the potential to impact the subject site.

#### ☐ *Off-Site Records:*

The majority of these off-site records are listed for properties which are situated at a significant distance away from the subject site, or are situated in a down-gradient or cross-gradient orientation with respect to the subject site, and thus are not considered to pose an environmental concern to the subject site.

---

## **Personal Interviews**

Ms. Marlene Borsboom, the current property manager for 4055 Russell Road, was available on-site to respond to questions at the time of the site inspection. According to Ms. Borsboom, the farmhouse was abandoned in 2009 and no tenants have utilized the property since that time. Ms. Borsboom stated that the abandoned farmhouse was heated via an oil-fired furnace, but that the oil tank was emptied following the house's abandonment. Ms. Borsboom also stated that both the occupied residence and the farmhouse each contain a private underground septic tank and that the occupied residence is currently supplied with municipal drinking water. Ms. Borsboom was unaware of any environmental issues pertaining to the subject site.

## **Previous Engineering Reports**

### *4055 Russell Road*

- ❑ "Phase I Environmental Assessment, 4055/3995 Russell Road, Gloucester, Ontario", prepared by Oliver, Mangione, McCalla & Associates and dated February 12, 1999.

A 1999 Phase I ESA report identified eight (8) APECs on the subject property and, as a result, a Phase II ESA was recommended.

- ❑ "Phase II Environmental Site Assessment, 4055 and 3995 Russell Road, Ottawa, Ontario", prepared by Trow Associates Inc. and dated October 2005.

The Phase II ESA, conducted in 2005, involved the advancement of eleven (11) test pits and five (5) boreholes, within the areas of environmental concern, to a maximum depth of 7.3 meters below ground surface. Eleven (11) soil samples were submitted for analysis of petroleum hydrocarbons (PHCs), pesticides, nitrate, metals, as well as benzene, toluene, ethylbenzene, and xylenes (BTEX) analysis. Five (5) groundwater samples, recovered from monitoring wells installed in each borehole, were submitted for analysis of PHCs, BTEX, metals, and volatile organic compounds (VOCs).

According to the analytical test results, the concentration of BTEX, pesticides, and metal parameters in the soil samples analysed were in compliance with the selected MOE and CCME soil quality criteria at that time. One (1) soil sample, collected at ground surface in the vicinity of staining observed around an exterior aboveground diesel fuel tank (AST), located adjacent to a large storage shed in the vicinity of the on-site farmhouse, had concentration of PHC F<sub>3</sub> which exceeded the applicable federal and provincial soil quality criteria.

Based on visual and olfactory observations made at the time of the sampling program, the lateral extent of PHC impact to soil in this area was suspected to be limited to a 1.0 m radius from the AST and extend to a depth of approximately 0.5 m below ground surface. The concentration of PHCs in all other soil samples were compliant with the selected CCME and MOE soil quality criteria. In addition, all groundwater parameter concentrations analysed were in compliance with the selected MOE criteria. The concentration of PHCs in the soil and groundwater samples analysed also comply with the current MECP Table 9 standards. The presence of the former AST spill is considered to be an APEC on the subject property.

- ❑ “Designated Substance Survey, 3995 Russell Road, Ottawa, Ontario”, prepared by Oliver, Mangione, McCalla & Associates and dated February 12, 1999.

In 2013, a designated substance survey was completed for the occupied residential dwelling (addressed 3995 Russell Road). The survey identified asbestos containing drywall joint compound and paper insulation on the basement ductwork as well as lead containing paints within the building. According to the current tenant, as well as representatives from the NCC, all asbestos containing materials have since been removed from the building.

- ❑ “Pre-Demolition Designated Substance Surveys for Ten Buildings Located at 4055 Russell Road, Ottawa, Ontario”, prepared by Golder Associates and dated September 16, 2019.

In 2019, a designated substance survey, completed for the abandoned farmhouse, identified asbestos containing drywall joint compound, cement wall board, vinyl sheet flooring, mastic adhesive, duct heat guard, window caulking, and roofing sealant. Lead based paints were also identified within the building.

#### 4120 Russell Road

- ❑ “Limited Phase II Environmental Site Assessment, NCC Property Asset Numbers 243780 and 185, 4120 & 4224 Russell Road, Ottawa, Ontario”, prepared by Aqua Terre Solutions Inc. and dated December 16, 2002.

A limited Phase II ESA was conducted for 4120 Russell Road in 2002 in order to assess potential impacts resulting from a closed landfill located west of the subject site, as well as for potential impacts resulting from the former on-site farmhouse. Five (5) boreholes were advanced on the property to a maximum depth of 9.85 meters below ground surface. A total of eight (8) soil samples were submitted for analysis of BTEX, TPH, PHCs, VOCs, and metals parameters.

According to the analytical test results, three (3) soil samples contained a concentration of chromium and which exceeded the CCME criteria. One (1) of these samples also contained a concentration of zinc which exceeded the CCME criteria. Based on the depths of the recovered soil samples, the excess concentrations of chromium and zinc are considered to be naturally occurring, and do not pose a contaminant issue to the subject property. All remaining BTEX, TPH, PHCs, and VOC parameters in the soil samples analysed were in compliance with the MOE and CCME criteria. The results are also in compliance with the current MECP Table 3 standards.

A total of five (5) groundwater samples, recovered from monitoring wells installed in each borehole, were submitted for analysis of BTEX, TPH, VOCs, metals, pH levels, and general chemistry parameters.

According to the analytical results, one (1) groundwater sample contained a concentration of sodium which exceeded the MOE Table A potable groundwater criteria and the CCME criteria. Two (2) groundwater samples contained a concentration of benzene which exceeded the MOE Table A and CCME criteria. Three (3) groundwater samples contained a concentration of ethylbenzene which exceeded the MOE Table A and CCME criteria. One (1) groundwater sample contained a pH level which exceeded the CCME criteria. All remaining parameters analysed were in compliance with the MOE and CCME criteria. As a result of the limited 2002 Phase II ESA, a screening level risk assessment was recommended.

It should be noted that at the time, the aforementioned analytical test results for the recovered soil samples were compared to the more stringent MOE Table A agricultural land use, generic soil remediation criteria in a potable groundwater situation. Furthermore, the analytical test results for the recovered groundwater samples were compared to the more stringent MOE Table A potable groundwater criteria. Since the subject land is to be used for future commercial purposes in a non-potable groundwater situation, these test results have been compared to the now contemporary MECP Table 3 commercial standards. The analytical test results for all soil and groundwater samples recovered as part of the limited 2002 Phase II ESA are in compliance with the current MECP Table 3 commercial standards. It is also anticipated that the concentrations of benzene and ethylbenzene detected in the groundwater will have decreased over time via natural attenuation. As a result, the exceedances identified in the limited 2002 Phase II ESA are not considered to pose a concern to the subject property.

- ❑ “Screening Level Risk Assessment, 4120 & 4224 Russell Road, NCC Property Asset Numbers 243780 and 185, Ottawa, Ontario”, prepared by Trow Consulting Engineers Ltd. and dated March 2003.

A screening level risk assessment was completed for the subject property in 2003. As part of the assessment, a limited Phase II ESA was conducted to confirm the findings from the previous 2002 Phase II ESA. One (1) groundwater sample was obtained and submitted for BTEX analysis. According to the analytical results, all BTEX parameters complied with the MOE and CCME criteria.

## **4.3 Physical Setting Sources**

### **Aerial Photographs**

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals, commencing with the earliest available photograph. Based on the review, the following observations have been made:

- |      |  |
|------|--|
| 1946 | ( <i>Poor Scale</i> ) The property addressed 4055 Russell Road appears to be developed with two (2) separate farmhouses, each with associated barns and storage sheds. The property addressed 4120 Russell Road appears to be developed with a farmhouse with associated barns and storage sheds. Both properties, as well as the neighbouring lands appear to be used for agricultural purposes at this time. |
| 1958 | Three (3) new structures have been constructed on 4055 Russell Road at this time. According to previous engineering reports, one of these new structures, situated on the southeast portion of the property, is an auto service garage. The other two structures are reported to be residential dwellings.   |
| 1976 | (City of Ottawa Website) No significant changes are apparent with respect to the subject site or neighbouring properties.  |
| 1994 | The farmhouse situated on the north portion of 4055 Russell Road has been demolished at this time. The neighbouring properties to the north of 4120 Russell Road (west of 4055 Russell Road), have been developed with multiple light industrial buildings along Belgreen Drive. Additional residential dwellings and contractor storage yards can be seen to the west of 4055 Russell Road.                   |

- 2011      (City of Ottawa Website) The auto service garage and residential dwelling situated on the south portion of 4055 Russell Road as well as the farmhouse situated on 4120 Russell Road appear to have been demolished at this time. Additional light industrial buildings have been constructed to the north of 4120 Russell Road. A stormwater management pond can be seen to the south of 4120 Russell Road.
- 2017      (City of Ottawa Website) The subject site and neighbouring properties are depicted as they appear today.

Copies of selected aerial photographs reviewed are included in Appendix 1.

### **Topographic Maps**

Topographic mapping information was obtained from the Natural Resources Canada – The Atlas of Canada website. The maps indicate that the elevation of the subject site is approximately 70 m above sea level. The regional topography in the general area of the site slopes down to the northeast in the direction of Mer Bleue Bog. A copy of the referenced map is presented in the Figures section in this report.

### **Physiographic Maps**

A Physiographic Map was reviewed from the Natural Resources Canada - The Atlas of Canada website. Based on this physiographic map, the site is located in the St. Lawrence Lowlands. According to the mapping description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.” The subject site is located in the Central St. Lawrence Lowland, “where the land is rarely more than 150 m above sea level, except for the Monteregian Hills, which consist of intrusive igneous rocks”.

### **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on available mapping information, the bedrock in the area of the subject site consists of shale of the Carlsbad Formation, with an overburden consisting of offshore marine sediments (erosional terraces) and ranging from 3 to 10 m in thickness.

## **Water Well Records**

A search of the MECP's website for all drilled well records within 250 m of the subject site was conducted on September 20, 2019. The search identified twenty-four (24) well records within the Phase I study area. The records pertain to wells used for domestic household, agricultural, and groundwater observation purposes, drilled in the area between 1949 and 2014.

Based on the well records, the stratigraphy in the general area of the subject site consists of sand and gravel, underlain by silty clay and interbedded limestone and shale bedrock. The water table was encountered at an average depth of 4.5 to 5.0 m. Selected well records are appended in Appendix 2.

## **Water Bodies**

A small watercourse is present in the south portion of 4055 Russell Road and transects the property in an east-west direction. This watercourse generally flows towards the northeast and feeds into Ramsay Creek, located approximately 650 m east of 4055 Russell Road.

A stormwater management pond is present approximately 50 m to the south of 4120 Russell Road. This pond drains into McEwan Creek, located approximately 150 m south of 4120 Russell Road, and generally flows towards the northeast where it eventually feeds into Ramsay Creek, approximately 650 m east of 4055 Russell Road.

# **5.0 SITE RECONNAISSANCE**

## **5.1 General Requirements**

The site inspection was conducted on September 3, 2019, between 9:30 AM and 10:30 AM. Weather conditions were sunny, with a temperature of approximately 20°C. Mr. Nick Sullivan, from the Environmental Department of Paterson Group, conducted the site inspection.

In addition to the subject site, the uses of neighbouring properties within the Phase I study area were also assessed at the time of the site inspection.

## **5.2 Specific Observations at the Phase I Property**

### **Site Features**

The property addressed 4055 Russell Road is currently occupied by a residential dwelling as well as an abandoned farmhouse and associated barns. The majority of the subject property is covered with dense grass, light brush, and mature trees. The site topography is relatively flat, while the regional topography slopes gently down to the east. The site is at grade with respect to Russell Road and Highway 417.

The property addressed 4120 Russell Road is currently vacant and covered with dense grass, light brush, and immature trees. The site topography slopes down to the south and gently down to the east, while the regional topography slopes down to the east. The site is at grade with Russell Road as well as the adjacent properties to the north, and below grade with respect to Hunt Club Road.

Water drainage on the subject sites consists primarily of infiltration throughout the properties. No ponded water or stressed vegetation was observed on either subject property at the time of the site inspection. A depiction of both subject sites is presented on Drawing PE4690-1 – Site Plan, in the Figures section of this report.

### **Buildings and Structures**

The property addressed 4055 Russell Road is currently occupied by a residential dwelling as well as an abandoned farmhouse with associated barns, silos, and storage sheds.

The residential dwelling, which has a municipal address of 3995 Russell Road, is a two (2) storey residence with one (1) basement level, reportedly constructed in the 1960s. The building is constructed with a wood frame and a poured concrete foundation and is finished on the exterior with aluminum siding and a sloped shingled roof.

The abandoned farmhouse, situated on 4055 Russell Road, is a three (3) storey residence with one (1) basement level, reportedly constructed in 1918. The building is constructed with a wood frame and a rubble stone foundation and is finished on the exterior with brick, wood siding, and a sloped shingled roof. The associated storage sheds and barns consist of one (1) storey, slab-on-grade style structures, constructed with a wood frame and finished on the exterior with wood or aluminum siding and a sloped metal roof. Three (3) grain silos are also present on the subject site, which are constructed with concrete blocks and a domed metal roof.

No buildings or structures are currently present on the property addressed 4120 Russell Road.

### **Underground Utilities**

Both the farmhouse and residence situated on the property addressed 4055 Russell Road each contain a septic tank on the east side of each building. The residence (3995 Russell Road) is currently serviced with underground potable water services, supplied by the municipality. A municipal storm water sewer line was identified on-site which transects the property in a north-south direction. The property addressed 4120 Russell Road does not contain any underground utilities that we are aware of.

### **Waste Materials**

Non-hazardous domestic waste and recyclables is generated by the occupied residence on 4055 Russell Road. The waste is stored within plastic bins in an outdoor shed and is collected by the municipality on a regular basis. A small pile of non-hazardous waste, consisting predominantly of wood, metal, and ceramic, was identified adjacent to the abandoned farmhouse at 4055 Russell Road. No waste is currently being generated on 4120 Russell Road. No environmental concerns were identified with respect to the waste stored on-site.

### **Exterior Fuels and Chemical Storage**

No exterior above ground fuel storage tanks (ASTs) or signs of exterior underground fuel storage tanks (USTs) were observed on the exterior of the subject property at the time of the site inspection. No hazardous chemicals, spills, stains, or abnormal odours were observed on the exterior of the properties at the time of the site inspection. It should be noted that the former exterior AST on 4055 Russell Road, responsible for a historical diesel fuel spill, was not present on the subject property at the time of the site inspection. The location of the former AST and fuel spill is considered to be an APEC with respect to the subject property.

### **Potential Environmental Concerns**

#### ☐ **Unidentified Substances**

There were no unidentified substances on the subject property at the time of site inspection.

☐ **Polychlorinated Biphenyls (PCBs)**

Several pole mounted transformers were observed along the east side of Russell Road, adjacent to 4055 Russell Road. The transformers were noted to be in good condition at the time of the site inspection, as no leaks or signs of staining were observed. As a result, the transformers do not pose an environmental concern to the subject site.

A Hydro One power substation was identified immediately to the north of 4055 Russell Road. While considered to be a potentially contaminating activity, due to the presence of transformers on-site, it was determined that no transformers are physically situated in close proximity to the subject site. Based on this information, as well as the nature of transformer fluid, this substation is not considered to represent an APEC with respect to the subject lands.

☐ **Railway Lines**

An active railway line was identified approximately 140 m north of 4055 Russell Road. The railway line is considered to be a potentially contaminating activity, however, based on its separation distance and downgradient location, the railway line is not considered to pose an area of potential environmental concern to the subject property.

☐ **Wastewater Drainage**

Domestic wastewater, consisting of wash water and sewage, from the occupied residential dwelling on the property addressed 3995 Russell Road, is currently discharged into an underground holding tank on the east side of the residence. Roof drainage is currently discharged into the subject properties via infiltration. No ponded water was observed on either subject property at the time of the site inspection. No concerns with respect to wastewater drainage was identified during the site inspection.

## **Interior Assessment**

A general description of the interior of the abandoned farmhouse situated on 4055 Russell Road is as follows:

- ☐ The floors consisted of hardwood, vinyl floor tiles, and stone.
- ☐ The walls consisted of brick, drywall, plaster, and rubble stone (basement).
- ☐ The ceilings consisted of drywall, and plaster.
- ☐ Lighting throughout the building consisted of incandescent fixtures.

A general description of the interior of the occupied residence situated on 4055 Russell Road (addressed 3995 Russell Road) is as follows:

- ☐ The floors consisted of concrete, ceramic tiles, hardwood, and vinyl tiles.
- ☐ The walls consisted of drywall and concrete block.
- ☐ The ceilings consisted of drywall.
- ☐ Lighting throughout the building consisted of incandescent and fluorescent light fixtures.

## **Potentially Hazardous Building Products**

### ☐ **Asbestos-Containing Materials (ACMs)**

In 2013, a designated substance survey was completed for the occupied residential dwellings (addressed 3995 Russell Road). The survey identified asbestos containing drywall joint compound and paper insulation on the basement ductwork as well as lead containing paints within the building. According to the current tenant, as well as representatives from the NCC, all asbestos containing materials have since been removed from the building.

In 2019, a designated substance survey, completed for the abandoned farmhouse, identified asbestos containing drywall joint compound, cement wall board, vinyl sheet flooring, mastic adhesive, duct heat guard, window glazing, and roofing sealant. These materials were observed to be in poor condition at the time of the site inspection.

---

☐ **Lead-Based Paint**

The 2013 designated substance survey did not identify any lead-based paints within the occupied residential dwelling (3995 Russell Road). Painted surfaces were generally observed to be in good condition at the time of the site inspection.

The 2019 designated substance survey identified lead-based paints within the abandoned farmhouse on 4055 Russell Road. Painted surfaces were observed to be in poor condition at the time of the site inspection.

☐ **Polychlorinated Biphenyls (PCBs) and Transformer Oil**

No concerns with respect to PCBs were identified at the time of the site inspection.

☐ **Urea Formaldehyde Foam Insulation (UFFI)**

UFFI was not observed at the time of the site inspection, however, wall cavities were not inspected for insulation type.

**Other Potential Environmental Concerns**

☐ **Interior Fuels and Chemical Storage**

The residence at 3995 Russell Road contained one (1) interior aboveground oil tank in the basement, which connected to an oil-fired furnace. The tank, manufactured in 2002, is a single walled steel tank with a capacity for 935 L. The tank was noted to be situated within a plastic containment unit. Both the tank and the containment unit were noted to be in good condition as no signs of leaks or staining were observed at the time of the site inspection.

The abandoned farmhouse contained one (1) aboveground interior oil tank (935 L capacity) in the basement, which connected to an oil-fired furnace. The tank was noted to be in good condition at the time of the site inspection as no signs of leaks or staining were observed on the tank or the underlying floor. According to the property manager, the tank was emptied of fuel in 2009 and has not been in used since that time.

There was no evidence which indicated that any spills or leaks have ever occurred with respect to either of these two ASTs. As a result, these ASTs are not considered to represent an area of potential environmental concern to the subject property.

---

☐ **Sump Pits**

One (1) sump pit was observed within the basement of the occupied residence at 3995 Russell Road. The water inside the pit appeared clear at the time of the site inspection and no unusual visual or olfactory observations were noted. No environmental concerns were identified with regard to the sump pit in the subject building.

☐ **Ozone Depleting Substances (ODSs)**

Potential sources of ODSs observed on site include a refrigerator, fire extinguisher, and air conditioner unit within the occupied residential dwelling (3995 Russell Road). These appliances were noted to be in good condition at the time of the site inspection and should be regularly serviced by a licensed contractor on a regular basis.

☐ **Mould Growth**

Large growth patches of white coloured mould were observed within the basement of the abandoned farmhouse at 4055 Russell Road. Extensive water damage was observed within certain portions of the building which may have fostered an environment which promoted mould growth. It is recommended that an appropriate filter/mask be worn when entering the building.

**Neighbouring Properties**

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection. Land use adjacent to the subject sites was as follows:

4055 Russell Road:

- North:* Hydro Ottawa power substation, followed by a railway line and Highway 417;
- South:* Russell Road and Hunt Club Road, followed by various industrial buildings and contractor storage yards;
- East:* Highway 417, followed by vacant grassland;
- West:* Russell Road, followed by various industrial buildings and contractor storage yards as well as a small cemetery.

Based on their relatively recent age of construction, their separation distance, as well as their cross-gradient location relative to the subject property, the industrial properties are not considered to pose an environmental concern with respect to 4055 Russell Road.

4120 Russell Road:

*North:*      Various industrial buildings and contractor storage yards, followed by Belgreen Drive;

*South:*      A stormwater management pond, followed by Hunt Club Road;

*East:*      Russell Road, followed by 4055 Russell Road, and Highway 417;

*West:*      Various industrial buildings and contractor storage yards.

Based on their relatively recent age of construction, their separation distance, as well as their down-gradient or cross-gradient location relative to the subject property, the neighbouring industrial properties to the north are not considered to pose an environmental concern with respect to 4120 Russell Road.

Property use within the Phase I study area is shown on Drawing PE4690-2 - Surrounding Land Use Plan.

## 6.0 REVIEW AND EVALUATION OF INFORMATION

### 6.1 Land Use History

The following tables indicate the current and past uses of the subject site dating back to the first developed use of the property.

<b>Table 2: Land Use History</b>			
<b>4055 Russell Road</b>			
<b>Time Period</b>	<b>Land Use</b>	<b>Potentially Contaminating Activities</b>	<b>Areas of Potential Environmental Concern</b>
Prior to 1918	Unknown	Unknown	Unknown
1918 - 2011	Residential / Agricultural	Fill of Unknown Quality	The potential importation of fill material on-site, as a result of the demolition of the former farmhouse.  The historical diesel fuel spill, resulting from a former exterior AST.
1958 - early 1990s	Residential / Commercial	Automotive Service Garage	The presence of a former on-site auto service garage
2011 - Present	Vacant	None	None
<b>Table 3: Land Use History</b>			
<b>4120 Russell Road</b>			
<b>Time Period</b>	<b>Land Use</b>	<b>Potentially Contaminating Activities</b>	<b>Areas of Potential Environmental Concern</b>
Prior to 1946	Unknown	Unknown	Unknown
1946 - mid-1990s	Residential / Agricultural	Fill of Unknown Quality	The potential importation of fill material on-site, as a result of the demolition of the former farmhouse.
Mid-1990s - present	Vacant	None	The presence of fill material on-site, adjacent to the north property boundary.

#### Potentially Contaminating Activities (PCAs)

Multiple existing and historical PCAs were identified on the subject sites. The potential for the importation of fill material on-site as a result of the demolition of the former farmhouses on 4055 and 4120 Russell Road, the historical presence of a former on-site auto service garage on 4055 Russell Road, the historical aboveground diesel fuel tank spill at 4055 Russell Road, and the current presence of on-site fill material on 4120 Russell Road are all considered to be potentially contaminating activities.

Multiple existing PCAs were identified within the Phase I study area. Based on the nature of the activity, their separation distance, as well as their down-gradient or cross-gradient orientation with respect to the subject site, none of the off-site PCAs are considered to pose an environmental concern with respect to the subject sites.

### **Areas of Potential Environmental Concern (APECs)**

As previously discussed, the potential for the importation of fill material on-site as a result of the demolition of the former farmhouses on 4055 and 4120 Russell Road, the historical presence of a former on-site auto service garage on 4055 Russell Road, the historical aboveground fuel tank spill at 4055 Russell Road, and the current presence of on-site fill material on 4120 Russell Road are all considered to represent APECs with respect to the subject sites.

### **Contaminants of Potential Concern (CPCs)**

Based on the nature of the APECs identified on the subject site, the CPCs with respect to the subject property are considered to be benzene, toluene, ethylbenzene, and xylenes (BTEX), petroleum hydrocarbons (PHCs F1 - F4), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), and metals.

## **6.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

Based on available mapping information from NRCAN, the bedrock in the area of the subject site consists of shale of the Carlsbad Formation, with an overburden consisting of offshore marine sediments (erosional terraces) and ranging from 3 to 10 m in thickness.

Based on the results of previous subsurface investigations on the subject site, the groundwater is expected to be encountered at depths ranging from approximately 0.5 to 3.5 m below the existing grade. Groundwater levels are expected to fluctuate throughout the year with seasonal variations.

### **Existing Buildings and Structures**

The property addressed 4055 Russell Road is currently occupied by a residential dwelling as well as an abandoned farmhouse with associated barns, silos, and storage sheds.

No buildings or structures are currently present on the property addressed 4120 Russell Road.

---

## **Water Bodies and Areas of Natural Significance**

There are no areas of natural and scientific interest on the subject site or within the Phase I study area. A small watercourse is present in the south portion of 4055 Russell Road and transects the property in an east-west direction. This watercourse generally flows towards the northeast and feeds into Ramsay Creek, located approximately 650 m east of 4055 Russell Road.

## **Drinking Water Wells**

The subject sites are located within a municipally supplied area. Based on the available MECP Water Well Records, no drinking water wells are expected to be present within the Phase I study area. No wells were observed on the subject properties at the time of the site inspection.

## **Areas of Natural Significance**

### **Neighbouring Land Use**

Neighbouring land use within the Phase I study area consists of residential, commercial, and light industrial properties. Land use is shown on Drawing PE4690-2 – Surrounding Land Use Plan.

## **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

As per Section 6.1 of the Phase I ESA report, five (5) Potentially Contaminating Activities (PCAs) identified on the subject properties are considered to represent Areas of Potential Environmental Concern (APECs):

- ☐ A former on-site auto service garage, located on the southeast portion of 4055 Russell Road.
- ☐ A diesel fuel spill originating from a former above ground fuel storage tank, located adjacent to a storage shed on 4055 Russell Road.
- ☐ The potential for the importation of fill material as a result of the demolition of a former farmhouse in the northwest portion of 4055 Russell Road.
- ☐ The potential for the importation of fill material as a result of the demolition of a former farmhouse in the west-central portion of 4120 Russell Road.
- ☐ The presence of fill material of unknown quality in the north portion of 4120 Russell Road.

The PCAs identified on the subject sites are all considered to represent APECs with respect to their respective subject properties.

The following PCAs were identified off of the subject sites, yet within the Phase I study area:

- ☐ An existing private fuel facility, located at 4120 Belgreen Drive, immediately north of 4120 Russell Road.
- ☐ An existing autobody repair shop, located at 4119 Belgreen Drive, approximately 200 m north of 4120 Russell Road.
- ☐ A former autobody repair shop, located at 4117 Belgreen Drive, approximately 35 m north of 4120 Russell Road.
- ☐ A former printers, located at 4110 Belgreen Drive, approximately 115 m north of 4120 Russell Road.
- ☐ A metal treatment and coating facility, located at 4095 Belgreen drive, approximately 200 m north of 4120 Russell Road.
- ☐ A former printers, located at 4080 Belgreen drive, approximately 50 m north of 4120 Russell Road.
- ☐ An active railway line, located approximately 140 m north of 4055 Russell Road.

The majority of these sites were noted to be located in a down-gradient or cross-gradient orientation with respect to the subject site, while other sites are located at a significant distance from the subject property. As a result, the above list of PCAs within the Phase I study area are not considered to be APECs.

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that the PCAs identified on the subject sites are considered to represent on-site APECs, whereas the PCAs identified off of the subject sites, yet within the Phase I Study area, do not represent APECs with respect to the subject property. The presence of PCAs was confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **7.0 CONCLUSIONS**

### **Assessment**

Paterson Group was retained by Avenue 31 Capital Inc. to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for the properties addressed 4055 and 4120 Russell Road, in the City of Ottawa, Ontario. The purpose of this Phase I ESA was to research the past and current use of the sites and study area and to identify any environmental concerns with the potential to have impacted the subject properties.

Based on a review of historically available information, the subject properties were first developed with farmhouses and barns sometime around 1918 and sometime prior to 1948, for 4055 and 4120 Russell Road, respectively. Since that time, the subject properties have been used for residential, commercial, and agricultural purposes. In the mid-1900s, additional structures were constructed on 4055 Russell Road, which included residential dwellings, an auto service garage, and an additional farmhouse. By the 1990s, the farmhouse situated on 4120 Russell Road, as well as the majority of the buildings situated on 4055 Russell Road had been demolished. The neighbouring properties were historically developed for residential, commercial, and light industrial purposes. The potential for the importation of fill material on-site as a result of the demolition of the two (2) former farmhouses on 4055 and 4120 Russell Road, the historical presence of a former on-site auto service garage on 4055 Russell Road, and the historical aboveground fuel tank spill at 4055 Russell Road are all considered to represent APECs with respect to the subject sites.

Following the historical review, a site inspection was conducted. 4055 Russell Road is currently occupied by a residential dwelling and an abandoned farmhouse and barns, whereas 4120 Russell Road is currently vacant. Both sites are predominantly covered with dense vegetation. The fill material identified on the north portion of 4120 Russell Road is considered to represent an APEC on the subject property. Several PCAs were identified within the Phase I Study area, however, based on their separation distance and/or down-gradient or cross-gradient orientation, these PCAs are not considered to represent APECs on the subject property.

## **8.0 RECOMMENDATIONS**

Based on the results of this assessment, it is our opinion that **a Phase II - Environmental Site Assessment will be required for the subject sites.**

Multiple asbestos containing building materials were determined to be present within the abandoned farmhouse situated on 4055 Russell Road. These materials include the drywall joint compound, cement wall board, vinyl sheet flooring, mastic adhesive, duct heat guard, window glazing, and roofing sealant. These materials were observed to be in poor condition at the time of the site inspection. An asbestos management and abatement program should be conducted prior to the demolition or renovation of the subject building.

Large growth patches of white coloured mould were observed within the basement of the abandoned farmhouse at 4055 Russell Road. Extensive water damage was observed within certain portions of the building which may have fostered an environment which promoted mould growth. It is recommended that an appropriate filter/mask be worn when entering the building.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Avenue 31 Capital Inc. and the National Capital Commission (NCC). Permission and notification from the aforementioned parties and Paterson Group will be required to release this report to any other party.

Nick Sullivan  
Paterson Group Inc.  
154 Colonnade Road  
Ottawa, ON K2E 7J5

Dear Nick Sullivan:

RE: ***Freedom of Information and Protection of Privacy Act Request***  
**Our File # A-2019-06538, Your Reference PE4690**

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 4055 Russell Road, Ottawa.

After a thorough search through the files of the Ministry's Ottawa District Office, Investigations and Enforcement Branch, Environmental Assessment and Permissions Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment. This file is now closed.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Sharon Menzies at (416) 327-1429 or Sharon.Menzies@ontario.ca.

Yours truly,

Janet Dadufalza  
Manager, Access and Privacy

**LOCATION OF WELL**

In diagram below show distances of well from road and lot line.  
Indicate north by arrow.

The diagram is a hand-drawn sketch on a grid background. At the top, a rectangular box is labeled "House # 1236". Below the house, three vertical lines represent a lot boundary. To the right of these lines, a small rectangle is drawn, with a horizontal dimension line labeled "14'" and a vertical dimension line labeled "83'". A small 'x' is marked at the top-left corner of this rectangle, indicating the location of the well. Below the lot boundary lines, two horizontal lines represent "Russell Road". In the top right corner, a dashed line extends upwards, and an arrow points towards the top right, labeled "N" for North.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

**Description:**

On January 13, 2011, R. W. Tomlinson Limited was convicted of establishing a new or existing sewage works and operating a sewage works without a Certificate of Approval. The Court heard that the company operates a quarry in Ottawa. A routine inspection by the ministry conducted on June 16, 2009 revealed settling ponds from an aggregate wash operation were on site and in operation. These ponds were not part of any existing sewage works approval. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was convicted and fined a total of \$12,000 plus a victim fine surcharge and given 30 days to pay the fine.

**Penalty Imposed:**  
**Description:**

Econome Inc. has been fined \$8,000 plus a victim fine surcharge, after pleading guilty on May 28, 2009 for failing to comply with a condition in its Provisional Certificate of Approval. The Court heard the company operates a sewage hauling business in Ottawa that is approved as a Waste Management System. The approval sets out a number of operating conditions. During an inspection by the ministry, it was determined that the company had not installed a concrete containment pad as required. Furthermore, annual reports and daily logs were not being maintained. An order was issued requiring that the concrete pad be built and a qualified person be hired to certify that it had been constructed. A follow-up inspection revealed that the concrete pad had been built, but not as per the required design specifications. Annual reports and daily logs required to be completed still could not be provided. The company was charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

**Investigation 2:**

**Penalty Imposed:**

**Description:**

Eleven companies and three individuals pleaded guilty to violations under the Environmental Protection Act (EPA). In May 2005, members of the Ministry of the Environment's Investigation and Enforcement Branch partnered with the Ontario Provincial Police and the Ministry of Transportation in a joint inspection initiative to ensure contaminated soil waste haulers are in compliance with the EPA. The waste haulers were inspected to determine if they are approved to haul contaminated solid non-hazardous waste and if they were operating in accordance with the conditions of a Certificate of Approval. The court heard that, on May 24, 2005 and May 25, 2005, the defendants were observed to be hauling contaminated solid non-hazardous waste and soil to two landfill sites located in the Ottawa region. Upon inspection, it was revealed that the vehicles transporting the waste were either not authorized to do so or the vehicles were not clearly marked with the name and number of its Certificates of Approval and in other instances, the Certificates of Approval were not present in the vehicles as required. Following a two-day inspection, 11 companies and three individuals were charged for violations under the EPA. Between June 16 and July 14, 2005, the companies and individuals pleaded guilty to the following charges under the EPA: ' Munro & Scullion Contracting Inc., and 1421736 Ontario Limited pleaded guilty to one count of operating or establishing a waste management system without a Certificate of Approval or provisional Certificate of Approval contrary to Section 27(1)(a) and were fined \$1,000 each; ' Gestion des Dechets Malex Inc. /Malex Waste Systems Inc., Carl's Sanitation Services Ltd., Mackat Inc., Ray's Haulage Incorporated, 927889 Ontario Inc., all pleaded guilty to one count each for failing to mark the vehicles with the name and number of the Certificates of Approval contrary to Section 10 of Regulation 347 under the EPA. They were fined \$500 each; Kimco Steel Sales Ltd. also pleaded guilty to two counts under this section and received a total of \$1,000 in fines; ' Peter Alfred Stanley, Jean Claude Levesque and Timothy Stephen Dell pleaded guilty to one count each under Section 10 of Regulation 347. Each individual received a \$500 fine. ' 144778 Canada Inc., Services Matrec Inc., and Losey's Haulage Ltd. also pleaded guilty to one count each for violating Certificate of Approval conditions contrary to Section 186(3) of the act. The companies each received a \$500 fine. Victim Fine Surcharges are exclusive of the fines.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2019**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jan 31, 2020**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Jan 2004-Dec 2017**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017**

**Chemical Register:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Feb 2020**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Dec 2019**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-May 31, 2020**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2019**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-May 31, 2020**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-May 31, 2020**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-May 31, 2020**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Apr 30, 2020**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

[EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date:** Jan 1, 2011 - Dec 31, 2019

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** Feb 28, 2017

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date:** 1988-Jun 2007\*

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date:** Jun 2000-Apr 2020

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date:** 1964-Sep 2019

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date:** May 31, 2018

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** Feb 28, 2017

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date:** Pre-Jan 2010\*

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Apr 30, 2020****Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2017****TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\*****Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\*****Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017****Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019****Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2018**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Mar 31, 2020**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2020****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2019****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-May 31, 2020****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** 1988 - May 2020

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** Feb 28, 2017

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994-May 31, 2020

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-2016

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-May 2020

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Jan 31, 2020

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** 1988-Nov 2019

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: Feb 28, 2017**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-May 31, 2020**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Feb 28, 2019**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Effective November 1, 2017 TSSA requires that any requests for the release of public information, must complete the release for public information form. The release for public information form can be found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid=392). Please complete the form (1 address per form) and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Thank you,

Roxana

Dear Mr. Sullivan,

**Re: Information Request  
«4055 Russel Road», Ottawa, Ontario (“Subject Property”)**

### **Internal Department Circulation**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Disposals and Environmental Remediation Unit:** The City’s Environmental Remediation Unit has environmental records on file pertaining to the subject properties noted below either directly on or adjacent to the subject properties. Please visit <https://ottawa.ca/en/city-hall/accountability-and-transparency/accountability-framework/freedom-information-and-protection-privacy/access-information> to submit requests for information under the Municipal Freedom of Information and Protection of Privacy Act.
- **Solid Waste Services:** The Solid Waste Services Database identifies properties that are located within 5 km of a Waste Management Facility. The Solid Waste Services Database has identified that the subject property is located within 1.0 km of the WSI Transfer Station (2628 Glenfield Drive), 2.0 km of the Metro2811 – Metro MRF (2811 Sheffield Road), and 3.5 km of the Metro2475 – Metro MRF (2475 Sheffield Road).

### **Search of Historical Land Use Inventory**

**This acknowledges receipt of the signed Disclaimer regarding your request for information from the City’s Historical Land Use Inventory (HLUI 2005) database for the Subject Property.**

A search of the HLUI database revealed the following information:

*Shaping our future together  
Ensemble, formons notre avenir*

City of Ottawa  
Planning, Infrastructure and Economic  
Development Department

110 Laurier Avenue West, 4th Floor  
Ottawa, ON K1P 1J1  
Tel: (613) 580-2424 ext. 14743  
Fax: (613) 560-6006  
[www.ottawa.ca](http://www.ottawa.ca)

Ville d'Ottawa  
Services de la planification, de l'infrastructure et  
du développement économique

110, avenue Laurier Ouest, 4e étage  
Ottawa (Ontario) K1P 1J1  
Tél.: (613) 580-2424 ext. 14743  
Télééc: (613) 560-6006  
[www.ottawa.ca](http://www.ottawa.ca)

- There are no activities associated with the Subject Property.

The HLUI database was also searched for activity associated with properties located within 250m of the Subject Property. The search revealed the following:

- There are no activities associated with the properties located within 250m of the Subject Property.

A site map has been included to show the location of the Subject Property.

Additional information may be obtained by contacting:

### **Ontario's Environmental Registry**

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

### **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact Samantha Gatchene at 613-580-2424 ext. 14743 or [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca)

Sincerely,
