

Ottawa Trainyards Retaining Wall, Ottawa, ON

With the contract requiring a large-scale retaining wall, M CON Products joined up with Ashton Landscaping to propose the use of Stone Strong.

This proposal was accepted and Paterson Group was quick to come up with the engineering and design to build this wall.

M CON Products was able to supply the order in a very timely manner and Ashton Landscaping was able to utilize that efficiency to get the wall built in no time.

With diverse site characteristics, this wall featured various elevation changes, corners blended into curved walls, a featured sloping bike path.

A simple but decorative pedestrian railing was added for safety measures.
