Executive Summary

EXP Services Inc. (EXP) was retained by Windmill Dream Ontario Holdings LP to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 315 and 330 Miwàte Private and 505 Chaudière Private, (formerly part of 4 Booth Street) on West Chaudière Island in Ottawa, Ontario (hereinafter referred to as the “Phase One property”). At the time of the investigation, the Phase One property was vacant.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in this report.

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. Although the Phase One property was not being used for any purpose defined by Ontario Regulation 153/04 at the time of the investigation, EXP understands that the most recent use of the property was for pulp and paper operations, which is a type of industrial property use, and that the proposed future property use will be commercial and/or residential. Consequently, in accordance with Regulation 153/04, as amended, a Record of Site Condition (RSC) must be filed.

The Phase One property is located in a former industrial area. The future municipal addresses will be 305 and 330 Miwàte Private and 505 Chaudière Private (formerly 4 Booth Street) on West Chaudière Island. The Phase One property was vacant at the time of the site reconnaissance. The Phase One property is irregular in shape and has an area of approximately 0.79 hectares.

The patent pertaining to the Phase One property was registered by Public Works on September 2, 1862. The patent was granted to William G. Perly, Gordon W. Pattee, and Wyman Pattee in 1874. However, other historical documents indicate that William Perley and Gordon Pattee purchased several lots on Chaudière Island and began developing a pulp and paper mill on the island in 1853. The Phase One property was utilized predominantly for industrial purposes related to the lumber industry since this time. The facility ceased operations in 2006. The buildings that previously occupied the Phase One property were demolished in early 2019.

Bedrock in the general area of the Phase One property consists of limestone, dolostone, shale, arkose, and sandstone from the Shadow Lake Formation of the Middle Ordovician period. The bedrock occurs as bare tabular outcrops and includes areas thinly veneered by unconsolidated rock. The overburden at the Phase One property, which primarily consists of sand and gravel fill materials, were used to provide a flat surface. Bedrock is approximately 49 metres above sea level at the Phase One property.

The Ottawa River, which flows in an easterly direction, is located 80 m north of the property. Buchanan Channel, which may be drained, is adjacent to the south of the Phase One property. The groundwater flow direction is anticipated to be easterly, in the same direction as the flow of the Ottawa River.

There are no areas of natural and scientific interest (ANSI) within the Phase One study area.

The following on-site potentially contaminating activities (PCA) were identified:

- PCA #9 – Coal Gasification (former coal storage area indicates use of coal as a source of coal gas, which was likely used as a source of heating and/or lighting at the Phase One property);
- PCA #28 – Gasoline and associated products storage in fixed tanks (former on-site AST);
- PCA #30 – Importation of fill material of unknown quality (fill material overlying bedrock throughout the Phase One property);

- PCA # 45 – Pulp, paper and paperboard manufacturing and processing (historic use of the Phase One property for industrial purposes related to lumber storage and pulp and paper);
- PCA #46 – Rail yards, tracks and spurs (former rail spurs shown in 1948 and 1956 FIP);
- PCA #Other – PCB storage (E.B. Eddy was listed in the PCB Inventory as a major PCB storage site, indicating that the site contained liquid PCB waste in quantities greater than or equal to 1,000 kilograms); and,
- PCA #Other – Debris and rubble from fire of 1900 (a fire caused the destruction of every building in the Phase One study area in 1900. Some of the debris related to the fire was used as backfilling material on the Phase One property).

By definition, all of the above PCA have resulted in areas of potential environmental concern (APEC) on the Phase One property.

The following off-site PCA were identified:

- PCA #1 – Acid and alkali manufacturing, processing and bulk storage (three former acid storage tanks within sulphite mill and storage area on the eastern part of East Chaudière Island);
- PCA #6 – Battery manufacturing, recycling and bulk storage (battery storage area identified in the 1912 fire insurance plan on East Chaudière Island);
- PCA #18 – Electricity generation, transformation and power stations (former powerhouse to the northeast, Hydro Ottawa (and its predecessors) historically occupied the south part of East Chaudière Island for electricity generation, and power generation companies listed on Middle Street);
- PCA #28 – Gasoline and associated products storage in fixed tanks (three former AST on East Chaudière Island, six former AST on West Chaudière Island (east adjacent), two former UST on Albert Island, former diesel pumping station and bunker C UST to the north);
- PCA #34 – Metal fabrication (One or more foundries, manufacturing facilities where metal would be used as a raw material and/or blacksmith shops were listed on Victoria Island);
- PCA #39 – Paints manufacturing, processing and bulk storage (the former paint shop located in the east end of the south building on Albert Island);
- PCA #44 – Port activities, including operation and maintenance of wharves and docks (former wharf adjacent to the Ottawa River on East Chaudière Island);
- PCA #45 – Pulp, paper and paperboard manufacturing and processing (the presence a ground wood pulp mill, beater mill, and sulphite pulp mill on East Chaudière and of a pulp and paper/lumber facility on West Chaudière (paper mill, beater building, and pulp mill));
- PCA #46 – Rail yards, tracks and spurs (former rail spurs were present on the east adjacent property and on East Chaudière Island);
- PCA #55 – Transformer manufacturing, processing and use (five PCB-containing transformers were present on East Chaudière Island); and
- PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners (the waste burner on the property to the adjacent northeast (in the 1912 FIP).

As Albert Island is separated from the Phase One property by the Ottawa River, none of the off-site PCA identified on Albert Island (PCA # 39 (paint shop) and PCA #28 (two former UST)) resulted in APEC on the Phase One property.

PCA identified on East Chaudière Island (PCA #1 (former acid storage tanks), PCA #6 (battery storage area), PCA #18 (former Hydro Ottawa facility), PCA #28 (three former AST), PCA #44 (former wharf), PCA #46 (spurs), and PCA #55 (five PCB-containing transformers)) were also determined not to result in APEC on the Phase One property due to the separation distance and downgradient location from the Phase One property.

The off-site PCA that were determined to result in APEC on the Phase One property include PCA #18 (former powerhouse to the northeast), PCA #28 (six former AST on West Chaudière Island (east adjacent) and former diesel pumping station and bunker C UST to the north), PCA #34 (foundries on Victoria Island), and PCA #58 (waste burner on the property to the adjacent northeast).

The following areas of APEC were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1. The Phase One property was part of a pulp and paper mill	Entire Phase One property	#45 – Pulp, Paper and Paperboard Manufacturing and Processing	On-site and Off-Site	Volatile Organic Compounds (VOC), Petroleum Hydrocarbons (PHC), Polycyclic Aromatic Hydrocarbons (PAH), Metals, Polychlorinated Biphenyls (PCB)	Soil and groundwater
#2. Fill material is overlying bedrock throughout the Phase One property	Entire Phase One property	#30 – Importation of Fill Material of Unknown Quality	On-site	Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), PHC, PAH, Metals	Soil
#3. Former owner, E.B. Eddy Company, was listed on the PCB inventory	Entire Phase One property	#Other – PCB Storage	On-Site	PCB	Soil and groundwater
#4. A fire that occurred in 1900 destroyed all on-site buildings that existed at the time. Debris and rubble were buried on-site.	Entire Phase One property	#Other – Debris and Rubble from Fire of 1900	On-Site	BTEX, PHC, PAH, Metals	Soil and groundwater
#5. Foundries were present on Victoria Island, east of the Phase One property	Entire Phase One property	#34 – Metal Fabrication	Off-Site	Metals	Soil
#6. Former rail spurs	Central part of the Phase One property, 10 metres on each side of former rail spurs	#46 – Rail yards, tracks and spurs	On-site	VOC, PHC, PAH, Metals, PCB	Soil and groundwater

Windmill Dream Ontario Holdings LP
Phase I Environmental Site Assessment
315 and 330 Mîwàtè Private and 505 Chaudière Private, West Chaudière Island, Ottawa, Ontario
OTT-00250193-P0
April 8, 2022

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#7. Former coal storage area	Northeast corner of the Phase One property	#9 – Coal gasification	On-Site	PAH	Soil and groundwater
#8. Former AST associated with pulp and paper operations	Southeast corner of the Phase One property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site	VOC, PHC	Soil and groundwater
#9. Former bunker C UST and diesel pumping station on the adjacent property to the north	North part of Phase One property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHC, BTEX, PAH, Metals, PCB	Groundwater
#10. Coal fired power generation, adjacent property to the northeast	Northeast part of the Phase One property	#18 – Electricity generation, transformation and power stations	Off-Site	VOC, PHC, PAH	Groundwater
#11. Former waste burner located south of a building to the northeast	North part of the Phase One property	#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site	PHC, PAH, Metals, PCB	Groundwater
#12. Six former AST on the east adjacent property associated with pulp and paper operations	East part of Phase One property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHC, VOC	Groundwater

Utilities, including underground hydro, natural gas, water, and sewers, are present on Chaudière Private, part of which is included in the Phase One property. Since the water table is within the bedrock, the presence of utilities is not expected to affect possible migration of contaminants once buildings are constructed on the Phase One property.

Surrounding properties are supplied by municipal water provided by the City of Ottawa. The source of municipal water is the Ottawa River.

The Qualified Person who oversaw this work recommends that a Phase Two ESA be conducted to address the PCA that may have adversely affected the Phase One property. A Phase Two ESA is deemed to be warranted because the Phase One property has, historically, been used for pulp and paper operations, which is a type of industrial use. It is understood that the proposed future development of the Phase One property will be commercial and/or residential.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

*Windmill Dream Ontario Holdings LP
Phase I Environmental Site Assessment
315 and 330 Miwàte Private and 505 Chaudière Private, West Chaudière Island, Ottawa, Ontario
OTT-00250193-P0
April 8, 2022*

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

1.0 Introduction

EXP Services Inc. (EXP) was retained by Windmill Dream Ontario Holdings LP to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 315 and 330 Miwàte Private and 505 Chaudière Private, (formerly part of 4 Booth Street) on West Chaudière Island in Ottawa, Ontario (hereinafter referred to as the “Phase One property”). At the time of the investigation, the Phase One property was vacant.

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard defined by Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Section 9 of this report.

Please note that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property, however, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

1.1 Objective

The purpose of this Phase One ESA is to determine if past or present site activities have resulted in actual or potential contamination at the Phase One property. Although the Phase One property was not being used for any purpose defined by Ontario Regulation 153/04 at the time of the investigation, EXP understands that the most recent use of the property was for pulp and paper operations, which is a type of industrial property use, and that the proposed future property use will be commercial and/or residential. Consequently, in accordance with Regulation 153/04, as amended, a Record of Site Condition (RSC) must be filed.

EXP personnel who conducted assessment work for this project were Leah Wells, P.Eng. and Patricia Stelmack, M.Sc., P.Eng. An outline of their qualifications is provided in Appendix A.

1.2 Phase One Property Information

The Phase One property is located in a former industrial area. The future municipal addresses will be 305 and 330 Miwàte Private and 505 Chaudière Private (formerly 4 Booth Street) on West Chaudière Island. The Phase One property was vacant at the time of the site reconnaissance. The Phase One property is irregular in shape and has an area of approximately 0.79 hectares. A Site Location Plan is provided as Figure 1 and a Site Plan is provided as Figure 2 in Appendix B.

The Phase One property, which is part of the property with a former municipal address of 4 Booth Street, Ottawa, Ontario, has parts of eight property identification numbers (PIN): 04097-0277, 04097-0288, 04097-0292, 04097-0300, 04097-0302, 04097-0304, 04097-0306, and 04097-0309 (previously 04097-0276 and 04097-0291). The assessment roll numbers are 06-14-062-901-44900 and 06-14-062-901-45100.

The legal description of the property is Part Chaudière St., Part Lots 19-24, Part Union Square, Lots 1-6 North head St., Lots 1-17 and Part 18, south Head St., part lots 19-24 south Chaudière St., Part Head St., Plan 10; and Part Chaudière Island, Plan 10.

The approximate Universal Transverse Mercator (UTM) coordinates for the Phase One property centroid are NAD83, Zone 18, 443746 m E, 5029830 m N. The UTM coordinates were based on an estimate derived using Google Earth™. The accuracy of the centroid is estimated to range from 5 to 10 m.

*Windmill Dream Ontario Holdings LP
Phase I Environmental Site Assessment
315 and 330 Miwàte Private and 505 Chaudière Private, West Chaudière Island, Ottawa, Ontario
OTT-00250193-P0
April 8, 2022*

The Phase One property and the surrounding properties were historically used for industrial purposes (pulp and paper mill activity). At the time of the investigation, a new high-rise residential building had been constructed south of the Phase One property, and a residential/commercial building was under construction east of the Phase One property.

The registered owner of the Phase One property is Windmill Dream Zibi Ontario Inc., who holds title to the Phase One property as nominee/bare trustee for the beneficial owner, Windmill Dream ON Holdings LP. Authorization to proceed with this investigation on behalf of Windmill Dream Zibi Ontario Inc. was provided by Ms. Taryn Glancy, Brownfields Coordinator and Mr. Justin Robitaille, Vice President. Contact information is 6 Booth Street, Ottawa, Ontario, K1R 6K8.

2.0 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Phase One property through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Reviewing municipal and provincial records to determine whether activities that have occurred within the Phase One study area pose a potential environmental concern to the Phase One property;
- Obtaining an EcoLog Environmental Risk Information Services Ltd. (ERIS) report for the Phase One property and surrounding properties within a 250-metre radius of the Phase One property;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Phase One property;
- Requesting a search of land title for the Phase One property;
- Conducting at least one reconnaissance of the Phase One property and surrounding properties within a 250-metre radius of the Phase One property in order to identify the presence of actual and/or potential environmental contaminants or concerns of significance;
- Conducting interviews with designated representative(s) as a resource for current and historical information;
- Reviewing the current use of the Phase One property and any land use practices that may have impacted its environmental condition;
- Reviewing the current use of the surrounding properties and any land use practices that may have impacted the environmental condition of the Phase One property; and,
- Preparing a report to document the findings.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses, or monitoring. EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others.

3.0 Records Review

3.1 General

Documents were requested from government agencies, private companies, and from the client. Other information was obtained from online sources. The information is discussed in the following sections.

3.2 Phase One ESA Study Area Determination

The Phase One study area comprises the Phase One property and surrounding properties wholly or partly within 250 metres of the property boundaries. The 250-metre radius was used to gain an understanding of the current and past uses of surrounding properties to determine whether such uses may have contributed to subsurface environmental impacts at the Phase One property.

According to the City of Ottawa GeoOttawa on-line mapping tool, the Phase One property is zoned for mixed use – downtown zone (MD5). The surrounding properties on Chaudière and Albert Islands are also zoned for mixed use. The eastern and western extents of Chaudière Island are zoned for a major leisure facility.

The Phase One study area is shown on Figure 3 in Appendix B.

3.3 First Developed Use Determination

The patent pertaining to the Phase One property was registered by Public Works on September 2, 1862. The patent was granted to William G. Perly, Gordon W. Pattee, and Wyman Pattee in 1874. However, other historical documents indicate that William Perley and Gordon Pattee purchased several lots on Chaudière Island and began developing a pulp and paper mill on the island in 1853. The Phase One property was utilized predominantly for industrial purposes related to the lumber industry since this time. The facility ceased operations in 2006. The buildings that previously occupied the Phase One property were demolished in early 2019.

3.4 Fire Insurance Plans

The *Catalogue of Canadian Fire Insurance Plans 1875 – 1975* (Catalogue) was reviewed. Fire Insurance Plans (FIP) dated 1878, 1901, 1912, 1948, and 1956 were reviewed. The following table presents a summary of the findings.

Table 3.1 – Summary of Fire Insurance Plan Observations

Fire Insurance Plan (year)	Details
1878	The Phase One property is occupied by Perley and Pattee. The Phase One property is used for storage of lumber piles. Rail spurs are present crossing the Phase One property, used to transport materials across Chaudière Island. A pump house is also present on the Phase One property. Several mill buildings (saw, timber, pulp) are present on the adjacent property to the north. The properties to the west also appear to be used for lumber storage. The buildings on East Chaudière Island, east across Booth Street, are described as sawmills, grist mills, oatmeal mill and storage, mechanical, etc.

Fire Insurance Plan (year)	Details
1901	The Phase One property is still in use for storage of piled lumber. The rail spurs are no longer present. The buildings present on the adjacent property to the south are no longer present, destroyed in the fire in 1900. Two small outbuildings (office and hose house) are present on the adjacent property to the southeast. The sawmill buildings are still present on the adjacent property to the north. Fewer buildings are present on the east side of Chaudière Island and to the east on Victoria Island compared to the 1878 plan, but sawmills, a splitter mill, a pulp mill a timber mill, and several power houses are present. Albert Island has been developed with administrative offices and stables on the north edge and a storage building on the south edge. A paint shop is located in the south building. Buchanan Channel, south of the property, is under construction.
1912	The Phase One property is still used primarily for lumber storage. Part of a paper mill building is present on the south part of the Phase One property. Ten boilers and a boiler stack are present in the part of the sawmill building to the east of the Phase One property. An overhead conveyor, spanning the width of the island, crosses the Phase One property. A powerhouse and waste burner have been constructed northeast of the Phase One property. Mill buildings have also been constructed on East Chaudière Island, including a sulphite pulp mill and cardboard mill. There is a chipper room, and digester house with three acid tanks on the southwest portion and an acid storage room, finishing room and burner room with three purifiers on the southeast portion East Chaudière Island. A bunker C UST and diesel pumping station are present to the north A shipping platform is present to the northeast on East Chaudière Island. On Victoria Island across the channel to the east there is a storage battery plant and electric powerhouse with two boilers.
1948	Rail spur lines are present across the Phase One property. A train shed has been added to the existing part of the mill building on the Phase One property. An addition has been constructed on the mill buildings east adjacent, a portion of which is present on the Phase One property (coal bin). The majority of the buildings on Chaudière Island are as they were in 1912. The sawmill buildings north of the site have been demolished. A gasoline above ground storage tank (AST) is present on the east side of Albert Island.
1956	The buildings on the Phase One property and surrounding properties appear to be similar to the 1948 FIP.

Based on the review of the fire insurance plans, the following on-site potentially contaminating activities (PCA) were identified:

- PCA #9 – Coal Gasification (former coal storage area indicates use of coal as a source of coal gas, which was likely used as a source of heating and/or lighting at the Phase One property);
- PCA #28 – Gasoline and associated products storage in fixed tanks (former on-site AST);
- PCA # 45 – Pulp, paper and paperboard manufacturing and processing (within Phase One study area);
- PCA #46 – Rail yards, tracks and spurs (former rail spurs prior to 1901 and shown in 1948 and 1956 FIP); and
- PCA #Other – Debris and rubble from fire of 1900 (a fire caused the destruction of every building in the Phase One study area in 1900. Some of the debris related to the fire was used as backfilling material on the Phase One property).

The following off-site PCA were identified:

- PCA #1 – Acid and alkali manufacturing, processing and bulk storage (three former acid storage tanks within sulphite mill and storage area on the eastern part of East Chaudière Island);
- PCA #6 – Battery manufacturing, recycling and bulk storage (battery storage area identified in the 1912 fire insurance plan on East Chaudière Island);

- PCA #18 – Electricity generation, transformation and power stations (former powerhouse to the northeast, and Hydro Ottawa (and its predecessors) historically occupied the south part of East Chaudière Island for electricity generation);
- PCA #28 – Gasoline and associated products storage in fixed tanks (three former AST on East Chaudière Island, six former AST on West Chaudière Island (east adjacent), two former UST on Albert Island, former bunker C UST and diesel pumping station to the north);
- PCA #39 – Paints, manufacturing, processing and bulk Storage (the former paint shop located in the east end of the south building on Albert Island);
- PCA #44 – Port activities, including operation and maintenance of wharves and docks (former wharf adjacent to the Ottawa River on East Chaudière Island);
- PCA #45 – Pulp, paper and paperboard manufacturing and processing (the presence a ground wood pulp mill, beater mill, and sulphite pulp mill on East Chaudière and of a pulp and paper/lumber facility on West Chaudière (paper mill, beater building, and pulp mill));
- PCA #46 – Rail yards, tracks and spurs (former rail spurs were present on the east adjacent property and on East Chaudière Island);
- PCA #55 – Transformer manufacturing, processing and use (five PCB-containing transformers present on East Chaudière Island); and
- PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners (the waste burner on the property to the adjacent northeast (in the 1912 FIP).

3.5 Chain of Title

A chain of title was requested from Read Abstracts Limited for the Phase One property dating back to Crown patents. The following title information for the Phase One property was found:

- The Phase One property was registered by Public Works on September 2, 1862;
- Patent granted to William G. Perly, Gordon W. Pattee, and Wyman Pattee in 1874;
- Title transferred to John R. Booth in 1898;
- Union Square closed in 1905 and title to that part of the property was transferred to John R. Booth by the City of Ottawa;
- Title transferred to John R. Booth Ltd. in 1911;
- Title transferred to the E.B. Eddy Company in 1946;
- Head Street closed in 1960 and title to that part of the property was transferred to the E.B. Eddy Company by the City of Ottawa;
- Title transferred to Domtar Inc. in 2009;
- Domtar Inc. leased the property to Windmill Dream Zibi Ontario Inc. in 2015;
- Title of the Phase One property was transferred from Domtar Inc. to Windmill Dream Zibi Ontario Inc., the current registered owner, in 2017.

3.6 Environmental Reports

The following reports pertaining to the Phase One property and Phase One study area were reviewed:

- *Phase One Environmental Site Assessment, Domtar Lands Redevelopment, Chaudière and Albert Islands, 3, 4 and 6 Booth Street*, dated July 2015 prepared by DST Consulting Engineers for Windmill Development Group Ltd.

Although operations ceased at the Phase One property in 2006, several PCA were identified including pulp and paper operations, former fuel/oil underground storage tanks (UST) and fill of unknown quality. PCA identified on adjacent properties included electricity generation, former AST and UST, fill of unknown quality, pulp, paper and paperboard manufacturing and processing, and waste disposal (thermal treatment). An intrusive soil and groundwater quality investigation was recommended to address the PCA.

- *Phase Two Environmental Site Assessment Update, Domtar Lands Redevelopment, Chaudière and Albert Islands, 3, 4 and 6 Booth Street*, dated June 2016 prepared by DST Consulting Engineers for Windmill Development Group Ltd.

This report served as an update to the Phase Two ESA completed by DST in July 2015. No boreholes were installed on the Phase One property. Based on the comparison of historical analytical data to the applicable updated 2011 Regulation 153/04 site condition standards (SCS), exceedances of PAH, metals, and PHC were identified in soil on the Phase One property and on the properties to the east and west of the Phase One property.

- *Soil Sampling Program, Perley Street Excavation, Chaudière Island, 4 Booth Street, Ottawa, Ontario*, dated June 2019 prepared by EXP Services Inc. for Windmill Dream Ontario Holdings.

The soil sampling program was conducted to characterize the utility trench excavation on Perley Street (now Chaudière Private), which forms the northeast part of the Phase One property. From March 5 to 25, 2019, EXP observed excavation activities and took soil samples for characterization of the utility trench. All soil consisted of fill material. Bedrock was present at a depth of approximately 0.2 to 1.5 metres below grade. The total depth of the utility excavation was 2.4 m bgs. Samples were collected from the north wall of the excavation, along the northern boundary of the Phase One property. The utilities trench was backfilled with gravel.

- *Phase One Environmental Site Assessment, 125 Zaida Eddy Private, Ottawa, Ontario*, dated November 2019 prepared by EXP Services Inc. for Windmill Dream Ontario Holdings.

This report was prepared for part of the Zibi property on East Chaudière Island. Multiple PCA related to the historic use of the property for pulp and paper operation resulted in nine APEC identified on the property. A Phase Two ESA was recommended to assess the APEC on the property.

- *Phase Two Environmental Site Assessment, 125 Zaida Eddy Private, Ottawa, Ontario*, dated December 2020 prepared by EXP Services Inc. for Windmill Dream Ontario Holdings.

The Phase Two ESA was conducted to assess the soil and groundwater quality at the property. A pre-remedial drilling program was conducted, which included advancing eight boreholes across the property, seven of which were completed as monitoring wells. Numerous exceedances of the Table 9 SCS and Table 7 SCS were detected throughout the property for PHC, PAH, and metals in soil. The remediation program included excavating soil from the entire property, stockpiling impacted soil for off-site disposal, and evaluating the quality of material brought to the site for backfill purposes. A post-remedial drilling investigation was conducted after remediation, which consisted of advancing four boreholes across the property, all of which were completed as monitoring wells. Post-remediation, all soil and groundwater samples met the Table 9 SCS and Table 7 SCS.

Both the Phase One and Two ESA for 125 Zaida Eddy Private were used to file an RSC for the property, which was acknowledged by the MECP in May 2021. Where deemed to be warranted, these reports were used to prepare this report.

3.7 Environmental Source Information

Regulatory agencies at the provincial and municipal levels were contacted to obtain information regarding environmental permits, past or pending environmental control orders or complaints, outstanding environmental regulatory non-compliance issues, and infractions.

A written response from some of the regulatory agencies typically requires several weeks to months. Copies of the requests are included in Appendix C. If, upon receipt of the response from these regulatory agencies, significant environmental issues are identified, EXP will forward the response to the client as an addendum to this report.

3.7.1 Ontario Ministry of the Environment, Conservation and Parks Records

On January 26, 2021, records pertaining to the site were requested from the Ministry of the Environment, Conservation and Parks (MECP) through the *Freedom of Information and Protection of Privacy Act* (FOI). To date, no response has been received.

3.7.2 Historical Land Use Inventory

A request was made to the City of Ottawa for information through its Historical Land Use Inventory (HLUI) database. The response to the request revealed several activities related to the Phase One property and Phase One study area.

The following on-site PCA were identified:

- PCA #45 – Pulp, paper and paperboard manufacturing and processing (use of the Phase One property by J.R. Booth Ltd., E.B. Eddy Co. Ltd., and Domtar Inc. in the pulp and paper industry); and
- PCA #Other – PCB storage (E.B. Eddy Forest Products Limited (6 Booth Street) was listed as a major PCB storage site, indicating that the site contained liquid PCB waste in quantities greater than or equal to 1,000 kilograms).

The following off-site PCA were identified:

- PCA #18 – Electricity generation, transformation and power stations (the former presence of an electric powerhouse on the south part of East Chaudière Island).

A copy of the HLUI report is included in Appendix C.

3.7.3 Environmental Registry

On March 22, 2021, the MECP Environmental Registry website was searched for postings in the vicinity of the Phase One property. The following postings were listed for properties within the Phase One study area:

- Windmill Dream ON Holdings LP was given approval for sanitary sewers and stormwater management works in 2020 (EBR Registry #013-6017);
- Windmill Dream ON Holdings LP was issued a permit to take water in 2017 (4553-A9UGEN);
- Chaudière Hydro Inc. was issued a permit to take water in 2016 (0286-9RUJWQ); and
- Domtar Inc. was given approval for discharge into the natural environment other than water (i.e. air) in 1998 (EBR Registry #IA8E0264), 2003 (EBR Registry #IA03E0429), and 2005 (EBR Registry #IA04E0832).

The permits to take water (PTTW) allowed water taking from the Ottawa River, adjacent to the Phase One property. As such, activities associated with the water taking are not anticipated to pose an environmental concern to the Phase One property. The Domtar Certificates of Approval relate to the use of the Phase One property and surrounding properties on Chaudière Island for pulp and paper industry activities (PCA #45 – Pulp, paper and paperboard manufacturing and processing).

3.7.4 Environmental Access

On March 22, 2021, the MECP Environmental Access website was searched for postings within the Phase One study area. The following postings were listed for properties within the Phase One study area:

- A Certificate of Approval (Air) was issued in 2003 to Chaudière Water Power Inc. (6 Booth St.) for one fuel oil fired boiler and one standby diesel generator set to provide power and steam for the dam during emergency situations.
- Ottawa Greenbelt Construction was issued a permit to take water in 2019 (R-009-7111288695).
- An Environmental Compliance Approval (Municipal and Private Sewer) was issued in 2020 to Windmill Dream Holdings LP for the construction of sanitary sewers, storm sewers and an oil/grit separator. The ECA was amended to expand the catchment area.

None of the records reviewed pose an environmental concern to the Phase One property.

3.7.5 Hazardous Waste Information Network

On March 22, 2021, the MECP Hazardous Waste Information Network (HWIN) website was searched for registered waste generators within the Phase One study area. Windmill Dream Ontario LP, located at 6 Booth Street, was listed as a generator of leachate toxic paint/pigment/coating residues and waste oils and lubricants. However, since this type of waste generation is indicative of demolition activities and there are no longer any buildings or active industrial operations on the Phase One property, it is unlikely that these wastes are currently being generated on the Phase One property.

Hydro Ottawa, located at 4 Booth Street and 156 Middle Street, was listed as a generator of acid and alkaline waste, paint/pigment/coating residues, inorganic laboratory chemicals, aliphatic solvents, petroleum distillates, waste oils and lubricants, emulsified oils and waste compressed gases.

The National Capital Commission (NCC) have locations at Amelia Island, 150 Middle Street, and Chaudière Island listed as waste generators of inorganics and petroleum distillates.

The NCC locations and the Hydro Ottawa generator on Middle Street are over 100 m from the Phase One property. The Hydro Ottawa offices on Booth Street are adjacent to the Phase One property, however potential waste generation/storage is located at a significantly lower elevation than the Phase One property. Therefore, the activities described above at these facilities do not pose an environmental concern to the Phase One property.

3.7.6 Records of Site Condition

On March 21, 2021, the MECP Brownfields Registry website was searched for postings of Records of Site Condition (RSC) within the Phase One study area. A posting for a Record of Site Condition (#226108) for part of 4 Booth Street, immediately east of the Phase One property, was found.

In May 2021, the MECP acknowledged an RSC (#226673) for 125 Zaida Eddy Private, on the east side of Chaudière Island, which was submitted by EXP.

3.7.7 Coal Gasification Plants

Documents entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario* prepared by the MECP and *Inventory of Coal Gasification Plant Waste Sites in Ontario* prepared by Intera Technologies Ltd. were reviewed. There were no coal gasification plants identified within the Phase One study area.

While there is no evidence that a coal gasification plant was present on the Phase One property, a coal storage area was depicted on a 1948 and 1956 FIP. The coal storage indicates use of coal as a source of coal gas, which was likely used as a source of heating and/or lighting at the Phase One property.

3.7.8 Former Industrial Sites

The Phase One property is listed as part of a pulp and paper mill from 1890 to 1940 (82 Bridge Street), and 1945 to 1984 (Booth Street). Properties in the Phase One study area are listed as having sulphides and acid tanks. These previous industrial operations represent an environmental concern to the Phase One property.

3.7.9 PCB Storage Sites

Documents entitled *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada, 2003 Annual Report* prepared by Environment Canada and *Ontario Inventory of PCB Storage Sites* prepared by the MECP were reviewed. E.B. Eddy Forest Products Limited (6 Booth Street) was listed as a major PCB storage site, indicating that the site contained liquid PCB waste in quantities greater than or equal to 1,000 kilograms. As the exact storage locations of PCBs are unknown, this listing as a major PCB storage site represents an environmental concern to the Phase One property (PCA #Other – PCB storage).

3.7.10 Waste Disposal Sites

Documents entitled *Old Landfill Management Strategy, Phase 1, Identification of Sites, City of Ottawa, Ontario* prepared by Golder Associates Ltd. and *Waste Disposal Site Inventory* prepared by the MECP were reviewed. No former landfills or waste disposal sites were identified within the Phase One study area.

3.7.11 City Directories

EXP retained Ecolog ERIS to review city directories and provide a summary of the search results to identify the occupancy history of the site and neighbouring properties for potential environmental concerns. Directories reviewed were dated 1874/75 to 2011 in approximately 5-year increments.

A sawmill (also referred to as Eddy Co. and later as Domtar Inc.) was listed as the occupant of 6 Booth Street in all directories published from 1941 to 2011. It is possible that the municipal address of 6 Booth Street referred to Chaudière Island and Albert Island in its entirety since other sources of information confirm that activities related to the pulp and paper industry occurred on both Chaudière Island and Albert Island.

Based on a review of listings for Booth Street and Bridge Street (1-75), Eddy Street (1-5), Middle Street (all), Vimy Place (all), Chaudière Street (all), and Head Street (all) the following findings pertaining to properties surrounding the Phase One property were made:

- There were no listings within the Phase One study area in the 1874/75 directory;
- J.R. Booth Sawmill and/or Perley & Pattee Sawmill and/or lumber wagon yard and/or lumber piles were listed as occupants of Chaudière Street in directories published in 1879, 1885/86, 1890/91, and 1895/96;
- Listings on Head Street included sawmills, blacksmiths, a machine shop, Perley & Pattee, a furniture factory, lumber piles, electric companies, and/or other company names in the 1879, 1885/86, 1890/91, and 1895/96 directories;
- In the 1900 directory, J.R. Booth Ltd. sawmills and lumber platforms were listed as occupants of Chaudière Street, while listings on Head Street were “fire swept”;
- In the 1905, 1910, 1915, 1920, 1924, 1929, 1934, and 1941 directories, J.R. Booth Ltd. sawmills was listed as an occupant of Chaudière Street and J.R. Booth Ltd., sawdust burner, sawmill, lumber platforms, pulp mill, and/or electric power house were listed as occupants of Head Street;
- Chaudière Street was not listed in the 1946, 1950, 1956, or 1961 directories, but J.R. Booth Ltd. or E.B. Eddy Co. Ltd. was listed as an occupant of Head Street those years;
- Neither Chaudière Street nor Head Street were listed in directories published in 1965 or later;

- Vimy Place was not listed in any of the directories that were reviewed;
- One or more foundries, manufacturing facilities where metal would be used as a raw material and/or blacksmith shops were listed as occupants of Middle Street (on Victoria Island) or Booth Street in directories published in 1874/75, 1879, 1890/91, 1895/96, 1900, 1915, 1920, 1924, 1929, 1934, 1941, 1946, 1950, 1956, and 1961;
- One or more lumber companies or mills were listed as occupants of Middle Street (on Victoria Island) in directories published in 1874/75, 1890/91, 1895/96, 1905, 1910, 1915, 1920, 1924, 1929, 1934, 1941, 1946, 1950, 1956, and 1961;
- Upper Ottawa Improvement Company, which managed all log-driving operations on the Ottawa River from 1868 to 1992, was listed as an occupant of Middle Street in directories published in 1874/75, 1890/91, 1895/96, 1900, 1905, 1910, 1915, 1920, 1924, 1929, 1934, 1941, 1946, 1950, 1956, 1961, 1965, and 1971;
- One or more power generation companies were listed as occupants of Middle Street in directories published in 1900, 1905, 1910, 1915, 1920, 1924, 1929, 1934, 1941, 1946, 1950, 1956, 1961, and 1971;
- Bridge Street (which was renamed Booth Street in 1915) had listings for a toll-gate keeper and Chaudière Hotel in the 1879 and 1885/86 directories;
- Bridge Street had listings for W.H. Baldwin & Co., a suspension bridge, and sawmills in Ottawa and Eddy Mill listings in Hull in the 1890/91 directory;
- Bridge Street had listings for Booth Stables, a lumber yard, and planning mill, and G.N.W. Tel Co. in Ottawa and Eddy Mill listings in Hull in the 1895/96 directory;
- There were no listings on Bridge Street in either Ottawa or Hull/Gatineau in the 1900 directory;
- There were no listings on Bridge Street in Ottawa in the 1905 or 1910 directories, but there were Eddy Mill listings in Hull/Gatineau that year;
- E.B. Eddy mill and/or Domtar and/or electric power companies were listings on Eddy Street in Hull in the 1946, 1950, 1956, 1961, 1965, 1971, 1976, 1992, 1996/97, 2001/02, and 2006/07 directories; and
- One or more gas stations, service garages, and/or auto wreckers were listed as occupants of Booth Street in directories published in 1929, 1934, 1941, 1946, 1950, 1956, 1961, 1965.

The above facilities on Booth and on Middle Street were located south, southeast, and east of the Phase One property and the facilities in Hull/Gatineau are north of the Phase One property. Since a water channel separates these facilities from the Phase One property, it is unlikely that contaminants that may have been generated at these facilities have migrated through the ground to adversely affect the Phase One property. However, it is possible that deposition of contaminants emitted through stacks at foundries and mills and metal manufacturing facilities has occurred. Therefore, metal manufacturing and pulp, paper and paperboard manufacturing and processing, as well as electric power generation that occurred on the Phase One property and within the Phase One study area have been identified as potentially contaminating activities (PCA) that may have adversely affected the Phase One property.

In addition to on-site PCA #45 (Pulp, paper and paperboard manufacturing and processing), the following off-site PCA were identified:

- PCA #18 – Electricity generation, transformation and power stations (power generation companies listed on Middle Street);
- PCA #34 – Metal fabrication (One or more foundries, manufacturing facilities where metal would be used as a raw material and/or blacksmith shops were listed on Victoria Island); and

- PCA #45 – Pulp, paper and paperboard manufacturing and processing (pulp and paper operations on East and West Chaudière Island).

3.7.12 Pulp and Paper Industry

Since the Phase One study area was developed for use in the pulp and paper industry, a search of historical information was conducted on the internet. Biographical information for two of the former owners of the Phase One property, William Goodhue Perley and John Rudolphus Booth, was found.

Based on this information, it appears that William Perley became involved in the lumber industry in the 1830s. He set up his own business in New Hampshire and supplied lumber to the cities of Boston and New York. However, by 1850, the timber in New York state was depleted. Perley and his partner, Gordon B. Pattee, moved their operation to Ottawa in 1852. They started developing their mill site by purchasing lots on Chaudière Island beginning in 1853.

John Booth had some involvement in the construction of a paper mill in Sherbrooke and a sawmill near Hull. He managed the operation of the sawmill for a year, then ran a shingle mill for a few months before it was destroyed by fire. Around 1854, he leased a sawmill on Chaudière Island and then purchased the mill in 1864. Booth was convicted and fined for illegally dumping mill refuse directly into the Ottawa River after legislation banning that practice came into effect in 1873. After fire destroyed his plant in 1900, he rebuilt it and included means to avoid such dumping.

Although Perley and Pattee did not own part of the Phase One property until 1874, it is likely that the site was used to support the lumber industry in the 1850s.

Copies of the autobiographical excerpts are provided in Appendix C.

3.8 EcoLog ERIS Database Search

A search of provincial and federal databases for records pertaining to the subject site and properties within the Phase One study area was conducted by EcoLog ERIS. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. There were many listings for 6 Booth Street, however, as discussed in Section 3.7, it is likely that the listings for 6 Booth Street apply to all of Albert Island and Chaudière Island. A summary of the more significant findings (other than spills) is provided in Table 3.2. A summary of the historical spills is provided in Table 3.3. A copy of the EcoLog ERIS report is provided in Appendix D.

Table 3.2 – Summary of EcoLog ERIS Database Entries

Location	Description	Database	Potential Environmental Concern (Yes/No) and Rationale
6 Booth Street	E.B. Eddy Forest Products Ltd. or Domtar Inc. registered waste generator of heavy metals, waste oils and lubricants, laboratory chemicals, light fuels, aliphatic solvents, halogenated solvents, pathological wastes, polymeric resins, paint/pigment/coating residues, oil skimmings and sludges, waste compressed gases, detergents/soaps, latex wastes, and petroleum distillates from 1886 to 2012 (ON0009802).	GEN	Yes, as these chemicals are associated with pulp and paper operations on the Phase One property.
6 Booth Street	E.B. Eddy Forest Products Ltd. is listed as having on-site private fuel storage tanks.	EXP, FST, PRT, DTNK	Yes, although UST was removed circa 1990, it is unclear how long tanks were in operation. Fuel can migrate through subsurface.
6 Booth Street	Domtar is listed under the pulp and paper directory in 2004, 2005, 2009 and a description of the equipment used is provided.	PAP	Yes, records associated with pulp and paper operations on the Phase One property.

Windmill Dream Ontario Holdings LP
Phase I Environmental Site Assessment
315 and 330 Mîwàte Private and 505 Chaudière Private, West Chaudière Island, Ottawa, Ontario
OTT-00250193-P0
April 8, 2022

Location	Description	Database	Potential Environmental Concern (Yes/No) and Rationale
6 Booth Street	E.B. Eddy Forest Products Ltd. is listed as a forestry/pulp/paper industrial operation in 1990 and 1993 and as a PCB storage facility in 1995 - 2000. "No more PCB's on this site" was entered in the database in 1998.	NPCB OPCB	Yes, due to potential on-site storage of PCBs.
6 Booth Street	Windmill Dream Ontario LP is listed as a registered waste generator of paint/pigment/coating residues, compressed gases and waste oils and lubricants from 2015 to 2020 (ON8375676).	GEN	No, this is indicative of demolition activities and there are no longer any active industrial operations on the Phase One property, it is unlikely that these wastes are currently being generated on the Phase One property.
6 Booth Street	DST Consulting Engineers Inc. was listed as a registered waste generator of light fuels in 2006 (ON4359464).	GEN	No, this coincides with a subsurface investigation completed by DST in 2006, it is unlikely that these wastes are currently being generated on the Phase One property.
3 Booth Street	Bradley Kelly Construction registered waste generator of light fuels in 2019 (ON4589268).	GEN	No, this is indicative of construction activities. There are no longer any active industrial operations on the Phase One property.
4 Booth Street	Chaudière Water Power Inc. is listed as a registered waste generator of alkaline phosphates, oil skimmings and sludges, waste oils and lubricants, inorganics, aliphatic solvents, compressed gases, paint/pigment/coating residues, and light fuels from 2013 to 2020 (ON7275937).	GEN	No, the Hydro Ottawa offices on Booth Street are adjacent to the Phase One property, however potential waste generation/storage is located downgradient of the Phase One property.
4 Booth Street	Hydro Ottawa Ltd. listed as a registered waste generator of alkaline phosphates, oil skimmings and sludges, waste oils and lubricants, inorganics, aliphatic solvents, compressed gases, paint/pigment/coating residues, and light fuels from 2020 (ON2617699).	GEN	No, the Hydro Ottawa offices on Booth Street are adjacent to the Phase One property, however potential waste generation/storage is located downgradient of the Phase One property.
4 Booth Street	Northec Construction is listed as a registered waste generator of compressed gases, aliphatic solvents, oil skimmings and sludges, waste oils and lubricants from 2015 to 2017 (ON7352120).	GEN	No, this is indicative of construction activities it is unlikely that these wastes are currently being generated on the Phase One property.
8 Booth Street	Demolition Plus is listed as a registered waste generator of heavy fuels in 2017 (ON7990058).	GEN	No, this is indicative of demolition it is unlikely that these wastes are currently being generated on the Phase One property.
195 Middle Street	NCC is listed as a registered waste generator of waste oils and sludges in 2020 (ON9068299).	GEN	No, this is related to construction activities on Site.

Databases:

DTNK – Delisted Fuel Tanks

EXP – List of Expired Fuels Safety Facilities

GEN – Ontario Regulation 347 Waste Generators Summary

NPCB – National PCB Inventory

OPCB – Inventory of PCB Storage Sites

PAP – Canadian Pulp and Paper

PRT – Private and Retail Fuel Storage Tanks

SRDS – Wastewater Discharger Registration Database

In addition to the databases outlined above the following entries from the EcoLog ERIS report were reviewed and summarized below:

- The Environmental Compliance Approval database identified ten entries in the Phase One study area. None of the records reviewed pose an environmental concern to the Phase One property;
- The certificates of approval database identified six records in the Phase One study area. E.B. Eddy Forest Products Ltd. had a certificate of approval (CA) for 2 natural gas dryers for paper coating in 1992 (industrial air). The contaminants listed were ammonia and nitrogen oxides and a CA for industrial wastewater for the pumping station at the clarifier (no date provided). Domtar has two CA records for atmospheric discharge, and one for industrial sewage works. Chaudière Water Power had a CA for atmospheric discharge.
- The Environmental Registry identified four records in the Phase One study area. Windmill Dream had a CA for private and municipal sewage works, Domtar had two CAs for atmospheric discharge, and Chaudière Water Power had a CA for atmospheric discharge.
- There were 10 records found in the Water Well Information System (WWIS) database for the Phase One study area. All of the records were for monitoring wells.

The on-site storage of PCBs and historical operations as an industrial pulp and paper facility present environmental concerns at the Phase One property. None of the other records reviewed pose an environmental concern to the Phase One property.

Table 3.3 – Summary of Spills within Phase One Study Area

Date	Location	Description	Potential Environmental Concern (Yes/No) and Rationale
January 17, 1994	Ottawa Mill 6 Booth Street	450 litres of biocide (20 L to clarifier) spilled due to equipment failure. Environmental impact was not anticipated as the receiving medium was the Ottawa River.	No, due to biocide released into the Ottawa River rather than ground surface.
April 25, 1995	Ottawa Mill 6 Booth Street	4,500 litres of paper effluent spilled due to equipment failure. Environmental impact was not anticipated as the receiving medium was the Ottawa River.	No, due to effluent released into the Ottawa River rather than ground surface.
July 4, 1995	Ottawa Mill 6 Booth Street	A waste pipeline from Ontario to Quebec leaked due to overstress or overpressure by water hammer. Waste was discharged into the Ottawa River. No quantity of material was disclosed.	No, due to waste released into the Ottawa River rather than ground surface.
May 15, 1988	Ottawa Mill 6 Booth Street	1.5 tonnes of suspended solids leaked into the Ottawa River due to equipment failure.	No, due to waste released into the Ottawa River rather than ground surface.
June 10, 1988	Ottawa Mill 6 Booth Street	1,330 L of titanium dioxide leaked into the Ottawa River due to equipment failure.	No, due to chemical released into the Ottawa River rather than ground surface.
August 28, 1989	Ottawa Mill 6 Booth Street	330 kilograms of titanium dioxide leaked into the Ottawa River due to a valve/fitting leak or failure.	No, due to chemical released into the Ottawa River rather than ground surface.
September 11, 1989	Ottawa Mill 6 Booth Street	85 litres of lube oil leaked into the Ottawa River due to container overflow.	No, due to lube oil released into the Ottawa River rather than ground surface.
September 30, 1989	Ottawa Mill 6 Booth Street	135 litres of hydraulic oil leaked into the onsite clarifier due to a valve/fitting leak or failure.	No, due to spill containment into the onsite clarifier.

OTT-00250193-P0
April 8, 2022*

Date	Location	Description	Potential Environmental Concern (Yes/No) and Rationale
April 9, 1990	Ottawa Mill 6 Booth Street	10 L of orthodichlorobenzene spilled onto the ground. Environmental impact was listed as not anticipated	No, due to small amount of product spilled.
July 23, 1990	Ottawa Mill 6 Booth Street	100 L of hydraulic oil leaked into the Ottawa River due to a valve/fitting leak or failure.	No, due to hydraulic oil released into the Ottawa River rather than ground surface.
November 22, 1990	Ottawa Mill 6 Booth Street	0.5 L of paper dye leaked onto the ground from a barrel due to a valve/fitting leak or failure.	No, due to small amount of product spilled.
September 30, 1992	Ottawa Mill 6 Booth Street	Effluent with pH of 11 was discharged into the Ottawa River (no quantity provided).	No, due to effluent released into the Ottawa River rather than ground surface.
November 14, 1992	Ottawa Mill 6 Booth Street	180 kg of dry starch leaked into the onsite clarifier due to operator error.	No, due to spill containment into the onsite clarifier.
December 3, 1992	Ottawa Mill 6 Booth Street	900 litres of coating leaked into the onsite clarifier due to a pipe/hose leak.	No, due to spill containment into the onsite clarifier.
May 16, 1993	Ottawa Mill 6 Booth Street	1 L of oil spilled into the Ottawa River due to a storm/wind/flood.	No, due to oil released into the Ottawa River rather than ground surface.
May 20, 1993	Ottawa Mill 6 Booth Street	55 L of blue dye leaked into the onsite clarifier due to a valve/fitting leak or failure.	No, due to spill containment into the onsite clarifier.
January 18, 2002	Ottawa Mill 6 Booth Street	A broken pipe resulted in ongoing condensate discharge into the Ottawa River.	No, due to release into the Ottawa River rather than ground surface.
January 2, 2003	Domtar 6 Booth Street	Less than 2 gallons of hydraulic oil leaked into the Ottawa River. The cause was not specified.	No, due to oil released into the Ottawa River rather than ground surface.
May 30, 2003	Domtar 6 Booth Street	Less than 1 gallon of diesel fuel leaked into the Ottawa River from an above ground storage tank due to operator error.	No, due to fuel released into the Ottawa River rather than ground surface.
September 19, 2004	Domtar 6 Booth Street	113.75 L of calcium carbonate spilled onto the ground due to a valve/fitting leak or failure.	No, spill was associated with mill at 3 Booth Street.
October 22, 2004	Domtar 6 Booth Street	15 L of raw unchlorinated sewage spilled onto the ground due to equipment failure.	No, due to small amount of sewage spilled.
June 1, 2014	Domtar 6 Booth Street	1500 L of water and sewage spilled to the Ottawa River due to flooding.	No, due to release into the Ottawa River rather than ground surface.
December 22, 2015	Domtar 6 Booth Street	Raw unchlorinated sewage spilled to ground from broken sanitary coupling.	No, due to small amount of sewage spilled.
June 10, 2016	Chaudière Hydro 4 Booth Street	Oil/grease contaminated water from excavation discharged to Ottawa River.	No, due to oil released into the Ottawa River rather than ground surface.
August 22, 2018	Eddy Lands 4 Booth Street	20 L of diesel fuel spilled to construction pit.	No, due to small amount of fuel spilled.

Date	Location	Description	Potential Environmental Concern (Yes/No) and Rationale
December 3, 2015 December 7, 2015	Booth Street	High turbidity water from construction Site to Ottawa River, unreported quantity.	No, discharge is to the Ottawa River.
September 15, 2015	4 Booth Street	Asbestos spilled to ground due to operator error.	No, spill was reported cleaned.
October 26, 2012	Cascades Recovery Inc. 5550 Booth Street	8 L of power steering fluid spilled to ground.	No, due to small amount of fluid spilled.

3.9 Physical Setting Sources

3.9.1 Aerial Photographs

Aerial photographs dated 1938, and 1952 were obtained from EcoLog ERIS. Aerial photographs dated 1928, 1965, 1976, 1991, 1999, 2002, 2005, 2008, 2011 and 2017 were available for review on the City of Ottawa website. The following table summarizes the development and land use history of the Phase One property and adjacent properties as depicted on the reviewed aerial photographs.

Table 3.4 – Summary of Aerial Photograph Observations

Aerial Photograph (year)	Details
1928	The north part of the Phase One property is primarily used as a storage area for piles of lumber. A building associated with mill operations is present on the south part of the Phase One property. An overhead conveyer runs east-west across the Phase One property. There are buildings constructed on adjacent properties to the north, east, and south on Albert Island, and to the east across Booth Street, as part of the larger lumber facility. Two smokestacks are present on the adjacent property to the east. The Chaudière Bridge and Booth Street are visible. Industrial activity is visible on Victoria Island, Albert Island, and adjacent lands on both sides of the Ottawa River. A rail yard is visible south of the Phase One property on the Ottawa side of the river.
1938, 1952	The industrial buildings associated with the Phase One property and surrounding properties appear to be relatively unchanged. The two smokestacks on the west side of Chaudière Island are visible in the 1938 photograph, but they are no longer present in the 1952 photograph.
1965	The industrial buildings associated with the Phase One property and surrounding properties appear to be relatively unchanged. A rail spur is visible on the Phase One property.
1976	The industrial buildings associated with the Phase One property and surrounding properties appear to be relatively unchanged. The rail spur no longer appears to be present on the Phase One property.
1991, 1999, 2002	The industrial buildings associated with the Phase One property and surrounding properties appear to be relatively unchanged.
2005, 2008, 2011	The industrial buildings associated with the Phase One property and surrounding properties appear to be relatively unchanged. As of 2008, operations appear to have ceased on the property.

Aerial Photograph (year)	Details
2015, 2017	The industrial buildings associated with the Phase One property and surrounding properties appear to be relatively unchanged. Construction of a new hydro canal has occurred on West Chaudière Island, altering the northwest shoreline.
2019	The building on the Phase One property and the adjacent property to the east have been demolished. Construction is underway on a residential high-rise on the property to the east. The Phase One property is being used as a construction laydown area and storage yard.

A review of the aerial photographs revealed indicators of potential environmental concern with respect to the Phase One property based on the following:

- PCA #45 – Pulp, paper and paperboard manufacturing and processing (historic use of the Phase One property for industrial purposes related to lumber storage and pulp and paper).

3.9.2 Topography, Hydrology, Geology

Bedrock and surficial geology were reviewed via the Google Earth applications published by the Ontario Ministry of Energy, Northern Development and Mines. The bedrock geology application is available via www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/bedrock-geology and was last modified on March 19, 2018. The surficial geology application is available via www.mndm.gov.on.ca/en/mines-and-minerals/applications/ogsearth/surficial-geology and was last modified on May 23, 2017.

Based on these applications, bedrock in the general area of the Phase One property consists of limestone, dolostone, shale, arkose, and sandstone from the Shadow Lake Formation of the Middle Ordovician period. The bedrock occurs as bare tabular outcrops and includes areas thinly veneered by unconsolidated rock. The overburden at the Phase One property, which primarily consists of sand and gravel fill materials, were used to provide a flat surface. Bedrock is approximately 49 metres above sea level at the Phase One property.

The groundwater flow direction is anticipated to be easterly, in the same direction as the flow of the Ottawa River.

3.9.3 Fill Materials

Fill materials, generally consisting of sand and gravel, overly the bedrock at the Phase One property to depths ranging from 1 to 4 metres below grade, based on intrusive work conducted by others. The presence of fill material is a PCA (PCA #30 – Importation of fill material of unknown quality).

3.9.4 Water Bodies and Areas of Natural Significance

The Ottawa River, which flows in an easterly direction, is located 80 m north of the property.

There are no Areas of Natural Significance (ANSI) within the Phase One study area, according to the Ministry of Natural Resources and Forestry Natural Heritage website (www.gisapplication.lrc.gov.on.ca/mamnh/Index.html).

3.9.5 Well Records

The Ontario well records website (www.ontario.ca/environment-and-energy/map-well-records water wells) was accessed. No water wells were identified on the Phase One property. There was a record for one monitoring well on the Phase One property.

One well, which was drilled in November 1953 and deepened in January 1954, was installed at an acetylene plant on Victoria Island. Since there is no longer an industrial facility on Victoria Island, it is unlikely that this well is still in use. Copies of the

*Windmill Dream Ontario Holdings LP
Phase I Environmental Site Assessment
315 and 330 Mîwàte Private and 505 Chaudière Private, West Chaudière Island, Ottawa, Ontario
OTT-00250193-P0
April 8, 2022*

well record are provided in Appendix C. No other records for water wells were found for properties within the Phase One study area, however several records for monitoring wells were identified. Overburden materials consisted of sand from 0.1 m to 0.5 m below ground surface. The bedrock was described as grey limestone.

There are no oil, gas, or salt wells within the Phase One study area, according to the Oil, Gas & Salt Resources Library (maps.ogsrlibrary.com/wells/).

3.10 Site Operating Records

Pulp and paper operations ceased at the Phase One property prior to its purchase by the current property owner in 2017. No site operating records were available for review. However, a survey plan was provided. The survey plan is included in Appendix E.

4.0 Interviews

Interviews were conducted by EXP with individuals identified to be the most knowledgeable about both the current and historical site uses. The purpose of interviews is to obtain information to assist in identifying areas of potential environmental concern and to identify details of potentially contaminating activities or potential contaminant pathways, in, on or below the site.

During the completion of this Phase One ESA, an interview was conducted with Ms. Taryn Glancy, Brownfields Coordinator for Windmill-Dream Ontario by Ms. Leah Wells. Ms. Glancy was selected as an interviewee since it was determined that she likely possesses to the most knowledge of the historical operations of the Phase One property because of her role as Brownfields Coordinator. Personnel who worked at the former pulp and paper facility were not available for an interview.

Ms. Glancy indicated that she has been involved with the ZIBI project since November 2017. She provided the following information:

- All previous relevant reports have been provided to EXP;
- No order and/or fines have been charged to the Site by municipal, regional and/or provincial agencies to her knowledge;
- Ms. Glancy is unaware of any significant spills of chemicals since Windmill-Dream purchased the property;
- The proposed building type to be constructed on the Phase One property will be residential;
- Ms. Glancy has no knowledge of any potable water wells on the Phase One property.

Mr. Simon Noel, Infrastructure Coordinator for Windmill-Dream Ontario, accompanied EXP personnel during the site visit on February 25, 2021.

Based on the interview, no PCA or APEC (other than those discussed in Section 3) were identified.

5.0 Site Reconnaissance

5.1 General Requirements

On February 25, 2021 at 8:00 am, Ms. Leah Wells, P.Eng. of EXP conducted the site visit for the Phase One property. The weather was sunny with an approximate temperature of – 5 degrees Celsius. There was no precipitation during the site visit, which lasted approximately 30 minutes. The site visit was conducted in accordance with EXP's internal health and safety protocols and with the Ministry of Labour health and safety regulations. The purpose of the site visit was to assess the current conditions of the Phase One property.

Observations of the Phase One property and surrounding properties within the Phase One study area were conducted. Adjoining properties were observed from within the grounds of the Phase One property and from public roads and sidewalks.

The Phase One property was vacant at the time of the site visit. Two sea cans, used for storage of construction materials, were present at the northwest corner of the Phase One property. The west part of the Phase One property consists of an asphalt parking lot.

Photographs were taken at the Phase One property during the site visit on February 25, 2021 and pertinent photographs are included in Appendix F.

5.2 Specific Observations at the Phase One Property

5.2.1 Buildings and Structures

The Phase One property is accessed via Chaudière Private to the west. No buildings are present on the Phase One property.

There was no evidence of any above ground storage tanks or underground storage tanks at the Phase One property. No water wells were observed on the Phase One property.

5.2.2 Site Utilities and Services

Surrounding properties are supplied by municipal water provided by the City of Ottawa. The source of municipal water is the Ottawa River.

A storm sewer installed as part of the redevelopment of West Chaudière Island is located at the north end of the Phase One property. Since the water table is within the bedrock, the presence of utilities is not expected to affect possible migration of contaminants once buildings are constructed on the Phase One property.

Groundwater levels at the Phase One property are expected to rise and fall in accordance with water levels within the Ottawa River.

The ground cover at the Phase One property consists of granular fill and an asphalt parking lot.

There was no evidence of a railway being present on the Phase One property since 1976.

5.2.3 Other Observations

The Phase One property was snow covered at the time of the Site visit.

Surrounding properties within the Phase One study area, which include Chaudière Island, were part of the former pulp and paper industry. Many of the buildings associated with the plant have been demolished, although part of the former board mill is present on East Chaudière Island. A new condominium building has been constructed east of the Phase One property and a multi-storey commercial building is under construction to the northeast across Booth Street.

5.3 Enhanced Investigation Property

The Phase One property has been used for industrial purposes. Specifically, the Phase One property has been used in connection with the pulp and paper industry. Therefore, in accordance with Regulation 153/04, a Phase Two ESA is required.

At the time of the investigation, no building was present on the Phase One property and no processing or manufacturing activities were occurring. No hazardous materials, raw materials, oil/water separators, vehicle and equipment maintenance areas, or hydraulic lift equipment were present.

5.4 Written Description of Investigation

At the time of the current investigation, there was no building on the Phase One property. However, the Phase One property was located within a former lumber/pulp and paper facility. Pulp and paper operations likely started at the Phase One property after the largest section was patented by Public Works in 1862. Based on an 1878 fire insurance plan, the Phase One property was utilized for this purpose by that time, however Perley and Pattee started purchasing lots on Chaudière Island in 1853. The facility ceased operations in March 2006.

The Phase One property is bounded by the following:

- North – Energy Ottawa;
- East – Block 206 and 207 followed by Booth Street;
- South – Buchanan Channel, followed by Albert Island;
- West – Zibi Block 201 and 202 (vacant land), followed by NCC park.

Potentially contaminating activities and areas of potential environmental concern identified at the Phase One property based on the records review, interview and site reconnaissance are described in Section 6.0.

6.0 Review and Evaluation of Information

6.1 Current and Past Uses

The Phase One property was developed as an industrial lumber facility. The first non-government occupant of the property began purchasing lots in the Phase One study area in 1853. A pulp and paper mill was constructed prior to and after the fire of 1900, and the facility ceased operations in 2006. The building that previously occupied the south part of the Phase One property was demolished prior to this investigation. A summary of the current and past uses is provided below:

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans (FIP), etc.
1862	Public Works	Pulp and Paper Mill	Industrial	Documents outlining the history of Ottawa indicate that although Perley, Pattee, and Pattee were not registered owners of the Phase One property until 1874, they started purchasing lots on Chaudière Island and constructed a pulp and paper mill as early as 1853.
1874	William G. Perley, Gordon W. Pattee, Wyman Pattee	Pulp and Paper Mill	Industrial	1878 FIP shows that the Phase One property is occupied by Perley & Pattee. Several lumber piles and a pump building are present. Sawmills are present to the north.
1898	John R. Booth	Pulp and Paper Mill	Industrial	1901 FIP shows the Phase One property is still in use for storage of piled lumber. The rail spurs are no longer present, destroyed in the fire in 1900. Two small outbuildings (office and hose house) are present on the adjacent property to the southeast. The sawmill buildings are still present on the adjacent property to the north. Additional deed indicates Union Square closed in 1905 and this property was transferred to J.R. Booth by the City of Ottawa.
1911	John R. Booth Ltd.	Pulp and Paper Mill	Industrial	1912 FIP shows that the Phase One property is still used primarily for lumber storage, but part of a paper mill building is present on the south part of the Phase One property. Ten boilers and a boiler stack are present in the part of the sawmill building to the east of the Phase One property. An overhead conveyor, spanning the width of the island, crosses the Phase One property.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans (FIP), etc.
1946	E.B. Eddy Company	Pulp and Paper Mill	Industrial	A 1928 aerial photo shows that the north part of the Phase One property is primarily used as a storage area for piles of lumber and a building associated with mill operations is present on the south part of the Phase One property. Aerial photographs taken in 1938 and 1952 do not show significant changes to the Phase One property. Additional deed indicates Head Street (which traversed Phase One property) closed in 1960 and this property was transferred to E.B. Eddy Company by the City of Ottawa.
2009	Domtar Inc.	Pulp and Paper Mill	Industrial	Aerial photographs taken in 1965, 1976, 1991, 1999, 2002, and 2005 do not show significant changes to the layout of the Phase One property. Aerial photographs taken in 2008 and 2011 indicate that the buildings are present, but operations appear to have ceased.
2017	Windmill Dream Zibi Ontario Inc. (PIN 04097-0306)	Vacant	Industrial	Domtar Inc. leased the Phase One property to Windmill Dream Zibi Ontario Inc. in 2015. A 2019 aerial photograph shows all buildings associated with the former pulp and paper operations were demolished.
2020	Windmill Dream Zibi Ontario Inc. (Entire Property)	Vacant	Industrial	New deed includes name change for some of the PIN.

6.2 Potentially Contaminating Activity

Ontario Regulation 153/04 defines a PCA as one of 59 operations set out in Table 2 of Schedule D that occurs or has occurred in a Phase One study area.

The following on-site potentially contaminating activities (PCA) were identified:

- PCA #9 – Coal Gasification (former coal storage area indicates use of coal as a source of coal gas, which was likely used as a source of heating and/or lighting at the Phase One property);
- PCA #28 – Gasoline and associated products storage in fixed tanks (former on-site AST);
- PCA #30 – Importation of fill material of unknown quality (fill material overlying bedrock throughout the Phase One property);
- PCA # 45 – Pulp, paper and paperboard manufacturing and processing (historic use of the Phase One property for industrial purposes related to lumber storage and pulp and paper);
- PCA #46 – Rail yards, tracks and spurs (former rail spurs shown in 1948 and 1956 FIP);
- PCA #Other – PCB storage (E.B. Eddy was listed in the PCB Inventory as a major PCB storage site, indicating that the site contained liquid PCB waste in quantities greater than or equal to 1,000 kilograms) and

- PCA #Other – Debris and rubble from fire of 1900 (a fire caused the destruction of every building in the Phase One study area in 1900. Some of the debris related to the fire was used as backfilling material on the Phase One property).

By definition, all of the above PCA have resulted in APEC on the Phase One property.

The following off-site PCA were identified:

- PCA #1 – Acid and alkali manufacturing, processing and bulk storage (three former acid storage tanks within sulphite mill and storage area on the eastern part of East Chaudière Island);
- PCA #6 – Battery manufacturing, recycling and bulk storage (battery storage area identified in the 1912 fire insurance plan on East Chaudière Island);
- PCA #18 – Electricity generation, transformation and power stations (former powerhouse to the northeast, Hydro Ottawa (and its predecessors) historically occupied the south part of East Chaudière Island for electricity generation, and power generation companies listed on Middle Street);
- PCA #28 – Gasoline and associated products storage in fixed tanks (three former AST on East Chaudière Island, six former AST on West Chaudière Island (east adjacent), two former UST on Albert Island, former diesel pumping station and bunker C UST to the north);
- PCA #34 – Metal fabrication (One or more foundries, manufacturing facilities where metal would be used as a raw material and/or blacksmith shops were listed on Victoria Island);
- PCA #39 – Paints manufacturing, processing and bulk storage (the former paint shop located in the east end of the south building on Albert Island);
- PCA #44 – Port activities, including operation and maintenance of wharves and docks (former wharf adjacent to the Ottawa River on East Chaudière Island);
- PCA #45 – Pulp, paper and paperboard manufacturing and processing (the presence a ground wood pulp mill, beater mill, and sulphite pulp mill on East Chaudière and of a pulp and paper/lumber facility on West Chaudière (paper mill, beater building, and pulp mill));
- PCA #46 – Rail yards, tracks and spurs (former rail spurs were present on the east adjacent property and on East Chaudière Island);
- PCA #55 – Transformer manufacturing, processing and use (five PCB-containing transformers present on East Chaudière Island); and
- PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners (the waste burner on the property to the adjacent northeast (in the 1912 FIP).

As Albert Island is separated from the Phase One property by the Ottawa River, none of the off-site PCA identified on Albert Island (PCA # 39 (paint shop) and PCA #28 (two former UST)) resulted in APEC on the Phase One property.

PCA identified on East Chaudière Island (PCA #1 (former acid storage tanks), PCA #6 (battery storage area), PCA #18 (former Hydro Ottawa facility), PCA #28 (three former AST), PCA #44 (former wharf), PCA #46 (spurs), and PCA #55 (five PCB-containing transformers)) were also determined not to result in APEC on the Phase One property due to the separation distance and downgradient location from the Phase One property.

The off-site PCA that were determined to result in APEC on the Phase One property include PCA #18 (former powerhouse to the northeast), PCA #28 (six former AST on West Chaudière Island (east adjacent) and former diesel pumping station and bunker C UST to the north), PCA #34 (foundries on Victoria Island), and PCA #58 (waste burner on the property to the adjacent northeast).

6.3 Areas of Potential Environmental Concern

Ontario Regulation 153/04 defines an APEC as an area on a property where one or more contaminants are potentially present. Based on this Phase One ESA, the following APEC were identified:

- APEC #1 – Entire Phase One property (PCA # 45 – Pulp, paper and paperboard manufacturing and processing)
- APEC #2 – Entire Phase One property (PCA #30 – Importation of fill material of unknown quality)
- APEC #3 – Entire Phase One property (PCA #Other – PCB storage)
- APEC #4 – Entire Phase One property (PCA #Other – Debris and rubble from fire of 1900)
- APEC #5 – Entire Phase One property (PCA #34 – Metal fabrication)
- APEC #6 – Central part of the Phase One property, 10 metres on each side of former rail spurs (PCA #46 – Rail yards, tracks and spurs)
- APEC #7 – Northeast corner of the Phase One property (PCA #9 – Coal Gasification)
- APEC #8 – Southeast corner of the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks)
- APEC #9 – North part of Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks)
- APEC #10 – Northeast part of Phase One property (PCA #18 – Electricity generation, transformation and power stations)
- APEC #11 – Northeast part of the Phase One property (PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners)
- APEC #12 – East part of the Phase One property (PCA #28 – Gasoline and associated products storage in fixed tanks)

6.4 Phase One ESA Conceptual Site Model

To develop a conceptual model for the Phase One property, the following physical characteristics and pathways were considered. A conceptual site model (CSM) showing the topography of the site, inferred groundwater flow, general site features, APEC, and PCA is shown in Figure 3 in Appendix B.

6.4.1 Buildings and Structures

The Phase One property was developed as an industrial pulp and paper mill and lumber facility in the 1850s. The facility ceased operations in 2006. The buildings that previously occupied the Phase One property were demolished in early 2019. The Phase One property was vacant at the time of the current investigation.

6.4.2 Water Bodies and Groundwater Flow Direction

The Phase One property is located on the central part of West Chaudière Island in the Ottawa River. It is anticipated that the groundwater beneath the Phase One property flows with the direction of the flow of the Ottawa River to the east.

6.4.3 Areas of Natural Significance

There are no ANSI within the Phase One study area.

6.4.4 Water Wells

There are no potable water wells within the Phase One study area.

6.4.5 Potentially Contaminating Activity

Ontario Regulation 153/04 defines a PCA as one of 59 operations set out in Table 2 of Schedule D that occurs or has occurred in a Phase One study area.

The following on-site potentially contaminating activities (PCA) were identified:

- PCA #9 – Coal Gasification (former coal storage area indicates use of coal as a source of coal gas, which was likely used as a source of heating and/or lighting at the Phase One property);
- PCA #28 – Gasoline and associated products storage in fixed tanks (former on-site AST);
- PCA #30 – Importation of fill material of unknown quality (fill material overlying bedrock throughout the Phase One property);
- PCA # 45 – Pulp, paper and paperboard manufacturing and processing (historic use of the Phase One property for industrial purposes related to lumber storage and pulp and paper);
- PCA #46 – Rail yards, tracks and spurs (former rail spurs shown in 1948 and 1956 FIP);
- PCA #Other – PCB storage (E.B. Eddy was listed in the PCB Inventory as a major PCB storage site, indicating that the site contained liquid PCB waste in quantities greater than or equal to 1,000 kilograms) and
- PCA #Other – Debris and rubble from fire of 1900 (a fire caused the destruction of every building in the Phase One study area in 1900. Some of the debris related to the fire was used as backfilling material on the Phase One property).

By definition, all of the above PCA have resulted in APEC on the Phase One property.

The following off-site PCA were identified:

- PCA #1 – Acid and alkali manufacturing, processing and bulk storage (three former acid storage tanks within sulphite mill and storage area on the eastern part of East Chaudière Island);
- PCA #6 – Battery manufacturing, recycling and bulk storage (battery storage area identified in the 1912 fire insurance plan on East Chaudière Island);
- PCA #18 – Electricity generation, transformation and power stations (former powerhouse to the northeast, Hydro Ottawa (and its predecessors) historically occupied the south part of East Chaudière Island for electricity generation, and power generation companies listed on Middle Street);
- PCA #28 – Gasoline and associated products storage in fixed tanks (three former AST on East Chaudière Island, six former AST on West Chaudière Island (east adjacent), two former UST on Albert Island, former diesel pumping station and bunker C UST to the north);
- PCA #34 – Metal fabrication (One or more foundries, manufacturing facilities where metal would be used as a raw material and/or blacksmith shops were listed on Victoria Island);
- PCA #39 – Paints manufacturing, processing and bulk storage (the former paint shop located in the east end of the south building on Albert Island);
- PCA #44 – Port activities, including operation and maintenance of wharves and docks (former wharf adjacent to the Ottawa River on East Chaudière Island);
- PCA #45 – Pulp, paper and paperboard manufacturing and processing (the presence a ground wood pulp mill, beater mill, and sulphite pulp mill on East Chaudière and of a pulp and paper/lumber facility on West Chaudière (paper mill, beater building, and pulp mill));

- PCA #46 – Rail yards, tracks and spurs (former rail spurs were present on the east adjacent property and on East Chaudière Island);
- PCA #55 – Transformer manufacturing, processing and use (five PCB-containing transformers present on East Chaudière Island); and
- PCA #58 – Waste disposal and waste management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners (the waste burner on the property to the adjacent northeast (in the 1912 FIP).

As Albert Island is separated from the Phase One property by the Ottawa River, none of the off-site PCA identified on Albert Island (PCA # 39 (paint shop) and PCA #28 (two former UST)) resulted in APEC on the Phase One property.

PCA identified on East Chaudière Island (PCA #1 (former acid storage tanks), PCA #6 (battery storage area), PCA #18 (former Hydro Ottawa facility), PCA #28 (three former AST), PCA #44 (former wharf), PCA #46 (spurs), and PCA #55 (five PCB-containing transformers)) were also determined not to result in APEC on the Phase One property due to the separation distance and downgradient location from the Phase One property.

The off-site PCA that were determined to result in APEC on the Phase One property include PCA #18 (former powerhouse to the northeast), PCA #28 (six former AST on West Chaudière Island (east adjacent) and former diesel pumping station and bunker C UST to the north), PCA #34 (foundries on Victoria Island), and PCA #58 (waste burner on the property to the adjacent northeast).

6.4.6 Areas of Potential Environmental Concern

The following areas of potential environmental concern (APEC) were identified:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#1. The Phase One property was part of a pulp and paper mill	Entire Phase One property	#45 – Pulp, Paper and Paperboard Manufacturing and Processing	On-site and Off-Site	Volatile Organic Compounds (VOC), Petroleum Hydrocarbons (PHC), Polycyclic Aromatic Hydrocarbons (PAH), Metals, Polychlorinated Biphenyls (PCB)	Soil and groundwater
#2. Fill material is overlying bedrock throughout the Phase One property	Entire Phase One property	#30 – Importation of Fill Material of Unknown Quality	On-site	Benzene, Toluene, Ethylbenzene, Xylenes (BTEX), PHC, PAH, Metals	Soil
#3. Former owner, E.B. Eddy Company, was listed on the PCB inventory	Entire Phase One property	#Other – PCB Storage	On-Site	PCB	Soil and groundwater

April 8, 2022

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#4. A fire that occurred in 1900 destroyed all on-site buildings that existed at the time. Debris and rubble were buried on-site.	Entire Phase One property	#Other – Debris and Rubble from Fire of 1900	On-Site	BTEX, PHC, PAH, Metals	Soil and groundwater
#5. Foundries were present on Victoria Island, east of the Phase One property	Entire Phase One property	#34 – Metal Fabrication	Off-Site	Metals	Soil
#6. Former rail spurs	Central part of the Phase One property, 10 metres on each side of former rail spurs	#46 – Rail yards, tracks and spurs	On-site	VOC, PHC, PAH, Metals, PCB	Soil and groundwater
#7. Former coal storage area	Northeast corner of the Phase One property	#9 – Coal gasification	On-Site	PAH	Soil and groundwater
#8. Former AST associated with pulp and paper operations	Southeast corner of the Phase One property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	On-Site	VOC, PHC	Soil and groundwater
#9. Former bunker C UST and diesel pumping station on the adjacent property to the north	North part of Phase One property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHC, BTEX, PAH, Metals, PCB	Groundwater
#10. Coal fired power generation, adjacent property to the northeast	Northeast part of the Phase One property	#18 – Electricity generation, transformation and power stations	Off-Site	VOC, PHC, PAH	Groundwater
#11. Former waste burner located south of a building to the northeast	North part of the Phase One property	#58 – Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners	Off-Site	PHC, PAH, Metals, PCB	Groundwater

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil and/or Sediment)
#12. Six former AST on the east adjacent property associated with pulp and paper operations	East part of Phase One property	#28 – Gasoline and Associated Products Storage in Fixed Tanks	Off-Site	PHC, VOC	Groundwater

6.4.7 Underground Utilities

Utilities, including underground hydro, natural gas, water, and sewers, are present on Chaudière Private, part of which is included in the Phase One property. Since the water table is within the bedrock, the presence of utilities is not expected to affect possible migration of contaminants once buildings are constructed on the Phase One property.

Surrounding properties are supplied by municipal water provided by the City of Ottawa. The source of municipal water is the Ottawa River.

6.4.8 Subsurface Stratigraphy

Bedrock in the general area of the Phase One property consists of limestone, dolomite, sandstone and shale, relatively flat-lying, mainly occurring as bare tabular outcrops, and includes areas thinly veneered by unconsolidated rock up to 1 m thick. The overburden of the Phase One property is mainly considered fill material, generally consisting of sand and gravel.

6.4.9 Uncertainty Analysis

The CSM is a simplification of reality, which aims to provide a description and assessment of any areas where potentially contaminating activity that occurred within the Phase One study area may have adversely affected the Phase One property. All information collected during this investigation, including records, interviews, and site reconnaissance, has contributed to the formulation of the CSM.

Information was assessed for consistency, however EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or of any of the statements made by others. All reasonable inquiries to obtain accessible information were made, as required by Schedule D, Table 1, Mandatory Requirements for Phase One Environmental Site Assessment Reports. The CSM reflects our best interpretation of the information that was available during this investigation.

7.0 Conclusions

The Qualified Person who oversaw this work, Patricia Stelmack, M.Sc., P.Eng., recommends that a Phase Two ESA be conducted to address the PCA that may have adversely affected the Phase One property.

A Phase Two ESA is deemed to be warranted because the Phase One property has, historically, been used for pulp and paper operations, which is a type of industrial use. It is understood that future development of the Phase One property will be residential. As a result, a Record of Site Condition must be filed.

The Qualified Person can confirm that the Phase One Environmental Site Assessment was conducted per the requirements of Ontario Regulation 153/04, as amended, and in accordance with generally accepted professional practices.

Respectfully submitted,
EXP Services Inc.

Leah Wells, P.Eng.

9.0 Limitation of Liability, Scope of Report, and Third Party Reliance

Basis of Report

This report (“Report”) is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or **Windmill Dream Ontario Holdings LP** (“the Client”) has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Reliance on Information Provided

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to exp. If new information about the environmental conditions at the site is found, the information should be provided to EXP so that it can be reviewed and revisions to the conclusions and/or recommendations can be made, if warranted.

Standard of Care

The Report has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

Complete Report

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

Use of Report

The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

Report Format

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client’s current or future software and hardware systems. Regardless of format, the documents described herein are EXP’s instruments of professional service and shall not be altered without the written consent of EXP.

Appendix A: Qualifications of Assessors

Qualifications of Assessors

EXP provides a full range of environmental services through a full-time Environmental Services Group. EXP's Earth and Environment Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with Ontario Ministry of the Environment, Conservation and Parks. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Patricia Stelmack, M.Sc., P.Eng., is a Senior Chemical Engineer/Senior Project Manager who has been working in the environmental field as a consultant and in industry since 1997. Since joining EXP (formerly Barenco Inc.) in 2000, Ms. Stelmack has conducted and managed over 1,000 environmental assessment and remediation projects. Ms. Stelmack earned her B.Sc. in biochemistry and B.A.Sc. in chemical engineering at the University of Ottawa and earned her M.Sc. in chemical and materials engineering at the University of Alberta. She is licensed as a professional engineer in Ontario, Manitoba, and Saskatchewan and is a Qualified Person, as defined in Ontario Regulation 153/04.

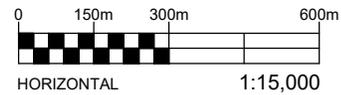

Leah Wells, P.Eng., has four years of experience in the environmental consulting field. She has worked on numerous Phase I Environmental Site Assessments (ESA); Phase II ESAs, completing soil and groundwater sampling, soil vapour sampling, assisting in report preparation and data entry and analysis.

Dear Sir or Madam:

I am sending a Freedom of Information Request to you for 6 Booth Street, Ottawa, Ontario. We are conducting an environmental site assessment and require any environmental concerns.

If possible, we would appreciate receiving the documentation by email (kathy.radisch@exp.com) and by mail. If you have any questions, or require any further information, please do not hesitate to contact the undersigned at 613-688-1891, ext. 63296.

Yours truly,

Search of Historical Land Use Inventory

This acknowledges receipt of the signed Disclaimer regarding your request for information from the City's Historical Land Use Inventory (HLUI 2005) database for the Subject Property.

A search of the HLUI database revealed the following information:

- There is 1 activity associated with 6 Booth
- There are 4 activities associated with 3 Booth.

The HLUI database was also searched for activity associated with properties located within 250m of the Subject Property. The search revealed the following:

- There are 67 activities associated with 18 properties located within 250m of 6 Booth.
- There are 67 activities associated with 18 properties located within 250m of 3 Booth.

Please note that certain activities have been identified to have a PIN Certainty of "2". This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the property. All database entries with a PIN Certainty of "2" require independent verification as to their precise location.

A **site map** and **table** have been included to show the location of the Subject Property as well as the location of all the activities noted above, including the HLUI database's location of the Activity Numbers with a PIN Certainty of "2".

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a

property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

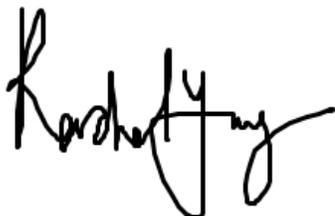

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact Rachel Young at HLUI@ottawa.ca

Sincerely,

A handwritten signature in black ink, appearing to read "Rachel Young". The signature is fluid and cursive, with a large initial "R" and "Y".

After months of due diligence, Ottawa's Windmill Development Group and Domtar have signed a definitive agreement of sale for Domtar's property on Ottawa's Albert and Chaudière Islands and downtown Gatineau, Que. The property is the site of the former E.B. Eddy paper mills.

The agreement is subject to customary closing conditions and may take until the first quarter of 2015 to complete. The proposed transaction comprises approximately 14 hectares of waterfront lands.

Domtar acquired the former E.B. Eddy mills in Ottawa and Gatineau in 1998 and due to declining market demand for paper announced the permanent closure of the Ottawa mill in 2005 and then the Gatineau mill in 2007. The site's hydro-electric assets were sold in 2012 to Energy Ottawa Inc.'s affiliate, Chaudière Hydro L.P., the same year the site's last paper machine was dismantled. Domtar has been actively looking for a suitable buyer for the property since 2008.

Stewart Marcoux, vice-president asset redeployment for Domtar, explained the history of the site. "Ezra Butler Eddy started manufacturing match sticks on part of this property back in 1851, then later acquired the competing JR Booth paper mill on the Ottawa side of the river and over the years the logging and pulp and papermaking activities at this site grew to the point that it was, by the mid-20th century, one of Canada's most significant industrial engines."

The agreement with Domtar commits Windmill to purchasing the property, with the only remaining condition being rezoning of the property for a mixed-use community-scale development. Windmill plans to present its planning application to Ottawa and Gatineau city councils in the spring. The financial terms of the agreement are not being released at this stage.

"Our vision is to create Canada's most sustainable mixed-used community right here in the nation's capital," said Jonathan Westeinde, co-founder of the Windmill Development Group. "We plan to bring new life and energy to this once bustling heart of industry, and give the people of Ottawa and Gatineau a new way to experience and appreciate one of the great rivers of the world, the Ottawa."

Executive Summary

Property Information:

Project Property: *Phase One ESA
Albert Island Ottawa ON K1R*

Project No: *OTT-00250193-N0*

Coordinates:

Latitude: *45.4189044*
Longitude: *-75.7178864*
UTM Northing: *5,029,737.71*
UTM Easting: *443,833.39*
UTM Zone: *18T*

Elevation: *164 FT
49.94 M*

Order Information:

Order No: *20302200105*
Date Requested: *October 22, 2020*
Requested by: *exp Services Inc.*
Report Type: *Standard Report*

Historical/Products:

City Directory Search *CD - Subject Site plus 250m Radius*

Mill Notes:					
History:				E.B. Eddy established in 1851. Purchased by G. Weston in 1943. J.R. Booth Paper Mills purchased in 1946. Purchased by Domtar Inc. in 1998.	
Company History:				Domtar was incorporated in 1929 as Dominion Tar & Chemical Company Limited, but the organization's roots go back a further quarter of century to 1903 as a British company and the construction of a coal tar distillation plant at Sydney, Nova Scotia. In 1961, a complex multiple-merger involving Dominion Tar, fine paper manufacturer Howard Smith Paper, newsprint maker St. Lawrence Corporation Limited and pack-aging specialist Hinde & Dauch Ltd. resulted in the formation of one of Canada's first conglomerates. Domtar's name was officially adopted in 1965. Initiatives which helped shape today's dynamic, globally- oriented Domtar included construction during the late 1980s of the world-scale business and print-ing paper mill at Windsor, Québec. In July 1998, Domtar Inc. acquired from George Weston Ltd. E. B. Eddy the specialty paper company. In July 2000, Ris Paper, the third largest independent paper merchant in the United States. In August 2001, four mills in the United States from Georgia-Pacific Corporation. In August 2006, Domtar signed a definitive agreement to combine with Weyerhaeuser's fine paper business and related assets. The transaction closed on March 7, 2007.	
				Board: Bingleman, Gignac, Levitt, MacKay, Moore, Onustock, Steacy, Stivers, Strobel, Tan, Turcotte, John D. Williams

Mill Notes:					
History:				E.B. Eddy established in 1851. Purchased by G. Weston in 1943. J.R. Booth Paper Mills purchased in 1946. Purchased by Domtar Inc. in 1998.	
Company History:				Domtar was incorporated in 1929 as Dominion Tar & Chemical Company Limited, but the organization's roots go back a further quarter of century to 1903 as a British company and the construction of a coal tar distillation plant at Sydney, Nova Scotia. In 1961, a complex multiple-merger involving Dominion Tar, fine paper manufacturer Howard Smith Paper, newsprint maker St. Lawrence Corporation Limited and pack-aging specialist Hinde & Dauch Ltd. resulted in the formation of one of Canada's first conglomerates. Domtar's name was officially adopted in 1965. Initiatives which helped shape today's dynamic, globally-oriented Domtar included construction during the late 1980s of the world-scale business and printing paper mill at Windsor, Québec. In July 1998, Domtar Inc. acquired from George Weston Ltd. E. B. Eddy the specialty paper company. In July 2000, Ris Paper, the third largest independent paper merchant in the United States. In August 2001, four mills in the United States from Georgia-Pacific Corporation. In August 2006, Domtar signed a definitive agreement to combine with Weyerhaeuser's fine paper business and related assets. The transaction closed on March 7, 2007.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jun 30, 2020

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Jun 30, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Sep 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Sep 30, 2020

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Sep 30, 2020

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Sep 30, 2020

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Sep 30, 2020

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jul 31, 2020

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Apr 2020

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2020

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2020

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Sep 30, 2020

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Sep 30, 2020

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

The coronavirus pandemic is cited by the agency responsible for tank regulations and data as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Sep 30, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2020

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jun 30, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Sep 30, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Mill Mailing Address:
Mill Notes:
History: E.B. Eddy established in 1851. Purchased by G. Weston in 1943. J.R. Booth Paper Mills purchased in 1946. Purchased by Domtar Inc. in 1998.
Company History: Domtar was incorporated in 1929 as Dominion Tar & Chemical Company Limited, but the organization's roots go back a further quarter of century to 1903 as a British company and the construction of a coal tar distillation plant at Sydney, Nova Scotia. In 1961, a complex multiple-merger involving Dominion Tar, fine paper manufacturer Howard Smith Paper, newsprint maker St. Lawrence Corporation Limited and pack-aging specialist Hinde & Dauch Ltd. resulted in the formation of one of Canada's first conglomerates. Domtar's name was officially adopted in 1965. Initiatives which helped shape today's dynamic, globally- oriented Domtar included construction during the late 1980s of the world-scale business and print-ing paper mill at Windsor, Québec. In July 1998, Domtar Inc. acquired from George Weston Ltd. E. B. Eddy the specialty paper company. In July 2000, Ris Paper, the third largest

History:					
Company History:		Domtar was incorporated in 1929 as Dominion Tar & Chemical Company Limited, but the organization's roots go back a further quarter of century to 1903 as a British company and the construction of a coal tar distillation plant at Sydney, Nova Scotia. In 1961, a complex multiple-merger involving Dominion Tar, fine paper manufacturer Howard Smith Paper, newsprint maker St. Lawrence Corporation Limited and packaging specialist Hinde & Dauch Ltd. resulted in the formation of one of Canada's first conglomerates. Domtar's name was officially adopted in 1965. Initiatives which helped shape today's dynamic, globally-oriented Domtar included construction during the late 1980s of the world-scale business and printing paper mill at Windsor, Québec. In July 1998, Domtar Inc. acquired from George Weston Ltd. E. B. Eddy the specialty paper company. In July 2000, Ris Paper, the third largest independent paper merchant in the United States. In August 2001, four mills in the United States from Georgia-Pacific Corporation. In August 2006, Domtar signed a definitive agreement to combine with Weyerhaeuser's fine paper business and related assets. The transaction closed on March 7, 2007.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jun 30, 2020

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Environment and Climate Change Canada cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Jun 30, 2020

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Sep 2020

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Dec 2019

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Oct 31, 2020

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Jul 31, 2020

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Nov 30, 2020

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Oct 31, 2020

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Nov 30, 2020

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jul 31, 2020

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2019

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Sep 2020

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Jul 31, 2020

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2018

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Sep 30, 2020

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2020

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2020

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Oct 31, 2020

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Nov 30, 2020

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 31, 2020

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Oct 31, 2020

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2020

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jun 30, 2020

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Nov 2019

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2019

Variations for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Jul 31, 2020

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Nov 30, 2020

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2020

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

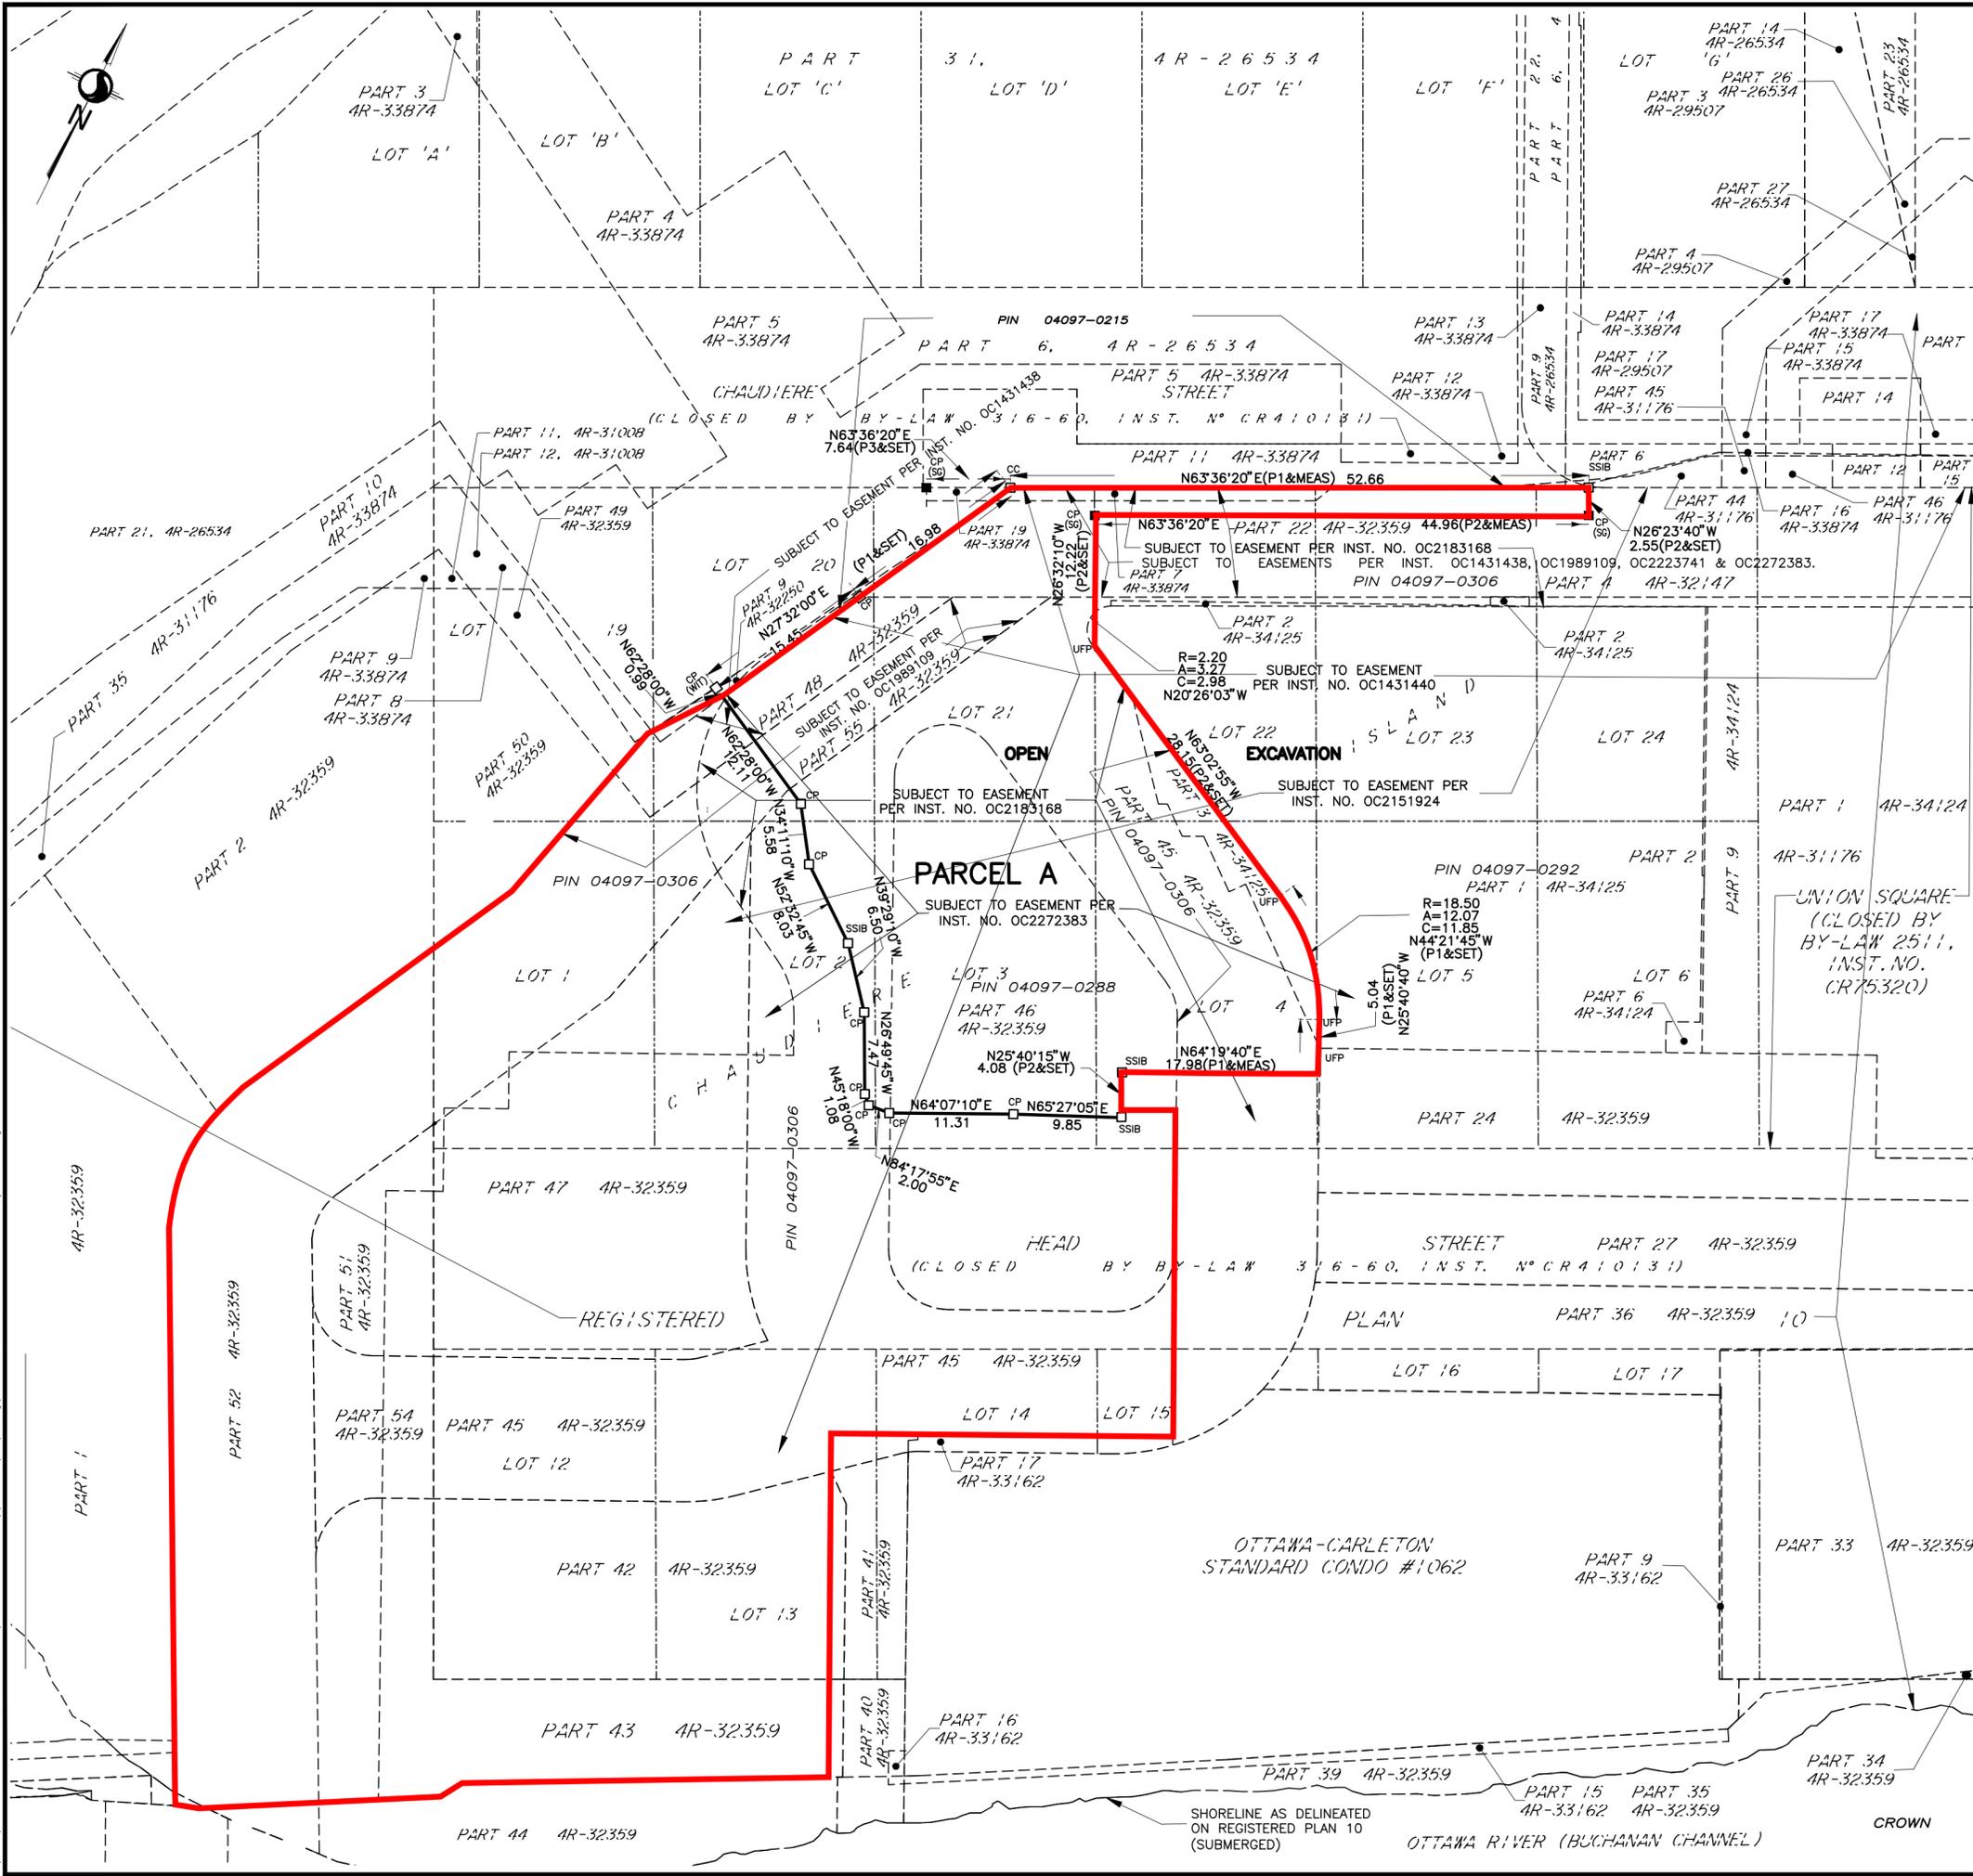

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
