

# **Phase One Environmental Site Assessment**

265 Centrum Boulevard, Orléans, ON K1E 3X7

**Bayview Orleans Inc.**  
Final Report

March 2023  
02300762.000

# 1 Executive Summary

Englobe Corp. (Englobe) was retained by Bayview Orleans Inc. (herein referred to as the “Client”), the current property owners, to prepare a Phase One Environmental Site Assessment (ESA) report for the property located at 265 Centrum Boulevard in Orleans, Ontario (herein referred to as the “Site or Phase One Property”).

The purpose of this Phase One ESA report is to evaluate actual and potential environmental concerns on Site and to assess the potential for the Site to be impacted by the current and/or historical uses of the Site and surrounding properties. This Phase One ESA was completed in general accordance with the requirements of *Ontario Regulation 153/04 Records of Site Condition - Part XV.1 of the Act under the Ontario Environmental Protection Act, R.S.O. 1990, chapter E.19* (O. Reg. 153/04), as amended, in support of a City of Ottawa Site Plan Control Application (SPCA). It is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition for the Site in accordance with O. Reg. 153/04 (as amended).

The scope of this Phase One ESA did not include sampling and analysis of potentially contaminated media. Information regarding the Phase One Study Area (the Site and the area within 250 m of the Site boundaries) was compiled through a records review, Site reconnaissance visit and an interview with a person knowledgeable about the Site. Federal, provincial, municipal, and private agencies/databases were searched during the records review for indicators of potential environmental concerns with regards to the Site and Phase One Study Area.

The Site is located at 265 Centrum Boulevard, Orleans, ON K1E 3X7. It is located in the City of Ottawa’s Kanata South Ward, on the north side of Centrum Boulevard. The Phase One Property encompasses five parcels of land with a total property area of approximately 8995 m<sup>2</sup> (GeoOttawa, 2023). It is located within an area zoned as MC14[1520] S152 - Orleans Town Centre.

The following one Area of Potential Environmental Concern (APEC) was identified on the Phase One Property:

## APECs identified at the Phase One Property.

PCA				APEC			
PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
3	Undefined No. 1 - Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	APEC 1 <sup>1</sup>	Walking pathways and driving/parking areas	EC, SAR, Na, Cl <sup>-</sup>	Soil and Groundwater

<sup>1</sup> Road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas and walking paths of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, thus, it is the QP’s opinion that this PCA and associated APEC are exempted (i.e., standards are deemed to have been met) as per Part IX, s. 49.1 Paragraph 1 of O.Reg. 153/04, and such, no soil and/or groundwater samples need to be collected and submitted for laboratory analyses for related parameters (i.e. no further investigation for this APEC is required).

**Note:**

EC = Electrical Conductivity

Cl<sup>-</sup> = Chloride

Na = Sodium

SAR = Sodium Adsorption Ratio

However, as road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas and walking paths of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, it is the QP's opinion that this PCA and associated APEC are exempted (i.e., standards are deemed to have been met) as per Part IX, s. 49.1 Paragraph 1 of O.Reg. 153/04, and such, no soil and/or groundwater samples need to be collected and submitted for laboratory analyses for related parameters (i.e. no further investigation for this APEC is required).

Therefore, based on the information obtained as part of this Phase One ESA, no APECs requiring additional investigation at this time were identified at the Site and thus, no further investigation in the form of a Phase Two ESA is recommended at this time.

It should be noted that the quality of on-Site soils (including any inert and/or fill materials) that may become excess shall be addressed/evaluated at the time of construction for Site redevelopment in accordance with O. Reg. 406/19 in order to properly characterize and assess handling/disposal/reuse options.

## Property and Confidentiality

“This report can only be used for the purposes stated therein. Any use of the report must take into consideration the object and scope of the mandate by virtue of which the report was prepared, as well as the limitations and conditions specified therein and the state of scientific knowledge at the time the report was prepared. Englobe Corp. provides no warranty and makes no representations other than those expressly contained in the report.

This document is the work product of Englobe Corp. Any reproduction, distribution or adaptation, partial or total, is strictly forbidden without the prior written authorization of Englobe Corp. and its Client. For greater certainty, use of any and all extracts from the report is strictly forbidden without the written authorization of Englobe Corp. and its Client, given that the report must be read and considered in its entirety.

No information contained in this report can be used by any third party without the prior written authorization of Englobe Corp. and its Client. Englobe Corp. disclaims any responsibility or liability for any unauthorized reproduction, distribution, adaptation or use of the report.

If tests have been carried out, the results of these tests are valid only for the sample described in this report.

Englobe Corp.’s subcontractors who have carried out on-site or laboratory work are duly assessed according to the purchase procedure of our quality system. For further information, please contact your project manager.”

# 2 Introduction

Englobe Corp. (Englobe) was retained by Bayview Orleans Inc. (herein referred to as the “Client”), the current property owners, to prepare a Phase One Environmental Site Assessment (ESA) report for the property located at 265 Centrum Boulevard in Orléans, Ontario (herein referred to as the “Site or Phase One Property”). The Site location is shown in Figure 1 in Appendix A.

The purpose of this Phase One ESA report is to evaluate actual and potential environmental concerns on Site and to assess the potential for the Site to be impacted by the current and/or historical uses of the Site and surrounding properties. This Phase One ESA was completed in general accordance with the requirements of *Ontario Regulation 153/04 Records of Site Condition - Part XV.1 of the Act under the Ontario Environmental Protection Act, R.S.O. 1990, chapter E.19* (O. Reg. 153/04), as amended, in support of a City of Ottawa Site Plan Control Application (SPCA). It is not intended to be utilized as supporting documentation for the filing of a Record of Site Condition for the Site in accordance with O. Reg. 153/04 (as amended).

The proposed redevelopment of the Site is currently understood to include three mixed use (commercial and residential) high rise buildings. As the current property use can be defined as institutional (i.e., child care centre) and community (i.e., athletic gym and vaccination centre), the intended reported property use (i.e., residential and commercial) is not anticipated to be changed to a more sensitive land use per the Soil, Ground Water and Sediment Standards for Use Under Part XV.1 of the *Environmental Protection Act*, Ministry of the Environment (2011), as such, the filing of an RSC for the proposed redevelopment is not anticipated at this time.

The scope of this Phase One ESA did not include sampling and analysis of potentially contaminated media. Information regarding the Phase One Study Area (the Site and the area within 250 m of the Site boundaries) was compiled through a records review, Site reconnaissance visit and an interview with a person knowledgeable about the Site. Federal, provincial, municipal, and private agencies/databases were searched during the records review for indicators of potential environmental concerns with regards to the Site and Phase One Study Area.

This report was prepared for the exclusive use of the Client. Any use of this report by any third party, or any reliance on or decisions to be made based on it, are the responsibility of such parties. Englobe accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report. Full Report Limitations are provided in Section 11 of this report.

## 2.1 Site Information

The Site is located at 265 Centrum Boulevard, Orleans, ON K1E 3X7. It is located in the City of Ottawa’s Kanata South Ward, on the north side of Centrum Boulevard. The Phase One Property encompasses five parcels of land with a total property area of approximately 8995 m<sup>2</sup> (GeoOttawa, 2023). It is located within an area zoned as MC14[1520] S152 - Orleans Town Centre.

A summary of the Site details are presented below.

**Table 2.1. Site detail summary.**

Item	Detail
Municipal Address	265 Centrum Boulevard, Orleans, ON K1E 3X7
Approximate Total Site Area	8995 m <sup>2</sup>

Item	Detail
Property Identification No.	Legal Description
14508-0263 (LT)	PART OF BLOCK 6 PLAN 50M-165, BEING PART 37 ON PLAN 4R-21938, OTTAWA
14508-0312 (LT)	PART OF BLOCK 6 PLAN 50M-165, BEING PART 42 ON PLAN 4R-21938 SAVE AND EXCEPT PART 13 ON PLAN 4R-24551; CITY OF OTTAWA
14508-0313 (LT)	PART OF BLOCK 6 AND PART OF COMMECVIAL DRIVE (AS CLOSED BY BY-LAW 90-92, INSTRUMENT LT89196) PLAN 50M165, PART 1 PLAN 4R24551; CITY OF OTTAWA
14508-0315 (LT)	PART OF BLOCK 6 PLAN 50M165, PARTS 2 AND 3 PLAN 4R24551; CITY OF OTTAWA
14508-0317 (LT)	PART OF COMMERCIAL DRIVE PLAN50M165 (AS CLOSED BY BY-LAW90-92, INSTRUMENT NO. LT789196), PART 5 PLAN 4R24551; CITY OF OTTAWA

## 2.2 Contact Information

Contact information for the Client is as follows:

Imran Gulamani, Vice-President

- Email: [imrangulamani@bayviewgroup.com](mailto:imrangulamani@bayviewgroup.com)
- Business Address: 108 Chestnut Street, Toronto, ON M5G 1R3

# 3 Scope of Investigation

The scope of work for the Phase One ESA is summarized in the following subsections. Englobe has performed this Phase One ESA in general accordance with the requirements outlined in O. Reg. 153/04, as amended.

## 3.1 Records Review

A records review was completed that involved collecting data from federal, provincial, and municipal databases, aerial photographs, geological maps, land title information, etc., in order to determine the presence or absence of actual and/or potential contaminants at the Site and the surrounding properties within the Phase One Study Area.

## 3.2 Site Reconnaissance

The Site reconnaissance was conducted on February 17, 2023 to inspect the Site and surrounding properties. The Client arranged for access to the Site, as required. Surrounding properties were assessed from publicly accessible locations.

## 3.3 Interviews

Englobe personnel conducted an interview with the Client. The interview was designed to confirm, and/or augment information gathered during the records review and/or Site Reconnaissance visit regarding past or present land uses or events that may affect the environmental condition of the Site. Information from this interview has been incorporated into various sections of this report and summarized in Section 5 below.

## 3.4 Data Evaluation and Reporting

The data collected during the records review and the Site visit was compiled and collated by Englobe. The information is presented in a logical manner that clearly defines actual and potential environmental issues that may affect the Site. The identified Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs) have been summarized in Tables 7.2 and 7.3, respectively.

# 4 Records Review

## 4.1 General

Information related to the Site was received and/or requested from numerous sources as detailed in this section. The agencies contacted, information requested, and responses received are summarized in the following sub-sections.

### 4.1.1 Phase One Study Area Determination

The Phase One Study Area encompasses the Site, as well as properties wholly and partly located within 250 m of the Site, as shown on Figure 2 in Appendix A.

### 4.1.2 First Developed Use Determination

Based on the O. Reg. 153/04 (as amended) definition of “first developed use” and available information, the Site was first developed sometime in or before the year 1945. The first available aerial photographs (1945) appears show the Site as a mix of forested and agricultural lands.

### 4.1.3 Fire Insurance Plans

Englobe requested a search of Fire Insurance Plans (FIPs) through Opta Information Intelligence (Opta). Opta maintains records, including plans and maps for Canadian cities which indicate past and existing structures on properties, including but not limited, to above-ground storage tanks (ASTs), underground storage tanks (USTs), and other building structure information. No FIPs were available for the Phase One Property.

A copy of the FIP search is provided in Appendix B.

### 4.1.4 Chain of Title

Englobe requested a title search for all five parcels that encompass the Phase One Property through ON Land. Based on a review of the received Chain of Titles, previous owners include the Corporation of the Township of Cumberland, The Regional Municipality of Ottawa-Carleton, the City of Ottawa, Orleans Town Centre Partnership (OTCP), Ottawa Young Men’s and Women’s Christian Association, 2177427 Ontario Ltd., and Bayview Orleans Inc. Bayview Orleans Inc. acquired all parcels associated with the Phase One Property on January 20, 2022.

A copy of the Chain of Titles are provided in Appendix C.

### 4.1.5 Environmental Reports/Documents

Pertinent details from provided environmental reports/documents as they relate to the objective of this Phase One ESA are summarized below.

#### **4.1.5.1 General Plan of Services, 265 Centrum Boulevard, Orleans ON (Novatech Engineering Consultants Ltd. 2009)**

A general plan of services prepared by Lalande + Doyle Architects Inc., Novatech Engineering Consultants Ltd., Halsall Engineers Consultants, James B. Lennox & Associates Inc. Landscape Architects, and mpl Lundy in May 2009 for the YMCA in support of the YMCA building expansion was provided by the Client to Englobe for review.

- Historic garbage enclosure reportedly present along eastern side of the Phase One Property;
- Proposed sanitary and storm sewers reportedly enter the easternmost YMCA building addition along the north facing wall;
- Three catch basins and 900 mm superpipe storm sewer reportedly present through parking lot area north of the YMCA building running east to west. Superpipe reportedly connects to a 375 mm storm sewer running north to south in the northeastern-most section of the Property;
- Stairwell floor drain along easternmost YMCA addition along east facing wall to connect to building plumbing system;
- New YMCA expansion to have roof drains;
- Hydro, natural gas, sanitary, storm, and watermain underground utilities are reported present along the southern property boundary servicing the main YMCA building from Centrum Boulevard;
- Existing fire department Siamese connection and water meter present along the southern facing wall of the main YMCA building; and,
- Proposed gas meter location is along new YMCA expansion southern facing wall.

#### **4.1.5.2 Phase I ESA, 265 Centrum Boulevard, Orleans ON (Pinchin Ltd. 2021)**

A due-diligence Phase I ESA report prepared by Pinchin Ltd. (Pinchin) in July 2021 for the YMCA in support of a potential divesture of the property was provided by the Client to Englobe for review.

- The property encompasses the Phase One Property in addition to several other parcels of land the East of the Phase One Property;
- Site building original component was built around 1996 with an addition being built in 2011;
- Given the year of construction of the original portion of the building (approximately 1996), there is the potential for asbestos-containing materials to be present in this portion of the building;
- Hydraulic oil (for the elevator) is stored in a steel reservoir in the elevator maintenance room;
- Pool chemicals are stored in plastic totes located in the basement valve room;
- No aboveground or belowground tanks were reported;
- A Hydro Ottawa maintained pad-mounted oil-cooler transformer located on the southern portion of the Site. No staining was reported;
- No further investigation (i.e., Phase II ESA) was recommended.

#### **4.1.5.3 Subsurface Investigation Report, 265 Centrum Boulevard, Ottawa, ON, K2S 1V4 (Yuri Mendez Engineering, 2022)**

A subsurface investigation report prepared by Yuri Mendez Engineering in May 2022 for Bayview Orleans Inc. in support of a proposed slab on grade three high rise building development was provided by the Client to Englobe for review. Pertinent details as they relate to this Phase One ESA are summarized below:

- Yuri Mendez Engineering strategically advanced six boreholes (BH1 through BH6) across the Site;

- Limestone bedrock outcrops were reportedly visible on Site, with most concentrated along the southern property line. Depths to inferred bedrock in this are varied from 1.9 to 7.7 m metres below ground surface (m bgs). Limestone bedrock was reportedly encountered during drilling operations along the northern property line between 12 to 30 m bgs;
- Overburden materials reportedly largely consist of stiff clay; and,
- A significant amount (i.e., 1.5 to 3.5 m in depth) of near-surface fill materials (i.e., brown silty clay mixed with sand and gravel near the top and trace grass stems, brown silty clay mixed with sand and gravel, brown silty clay with organic material near the top, granular subbase fill, and mixed clay with granular and organic material) was reported on Site; and,
- The reported measured water level on May 4, 2022 in the stand pipe installed in BH1 was 3.1 mbgs; however, based on field observations of the soil during drilling activities suggest the permanent water level is approximately 4.4 to 6 mbgs.

## 4.2 Environmental Source Information

Environmental information for the Site was obtained from the sources described in the sub-sections below. Distances provided relative to the Site are approximations. Locations of records with respect to local topography relative to the Site are also inferred.

### 4.2.1 ERIS Database Report

ERIS was retained by Englobe to complete a search of federal, provincial and private databases for environmental information regarding the Site and properties within the Phase One Study Area.

In total, there was one record found for the Site and 99 records found for surrounding properties in the Phase One Study Area. The following table is a summary of the pertinent results of the database search as they relate to potential impacts to the environmental condition of the soil and groundwater at the Site.

**Table 4.2.1. Summary of ERIS database search results.**

Name/Location	Approximate Distance from the Site	Details
265 Centrum Boulevard	On Site	One CA <sup>1</sup> database record indicates the property was approved for a municipal sewage CA in 1996 (YMCA).
260 Centrum Boulevard (Suite 201)	45 m south	Three GEN <sup>2</sup> database records indicate the address was listed as a waste generator of pathological wastes from 2010-2012 (Extendicare Inc. and Paramed Home Health).
255 Centrum Boulevard	60 m southwest	Six GEN database records indicate the address was listed as a waste generator of waste oils and lubricants in 2013 (Brookfield Johnson Controls), 2015 (Kone Inc.), 2018, and 2020-2022 (Brookfield Global Integrated Solutions). Kone Inc. is described as an elevator and escalator installation contractor.
320 Centrum Boulevard	65 m northeast	One GEN database record indicates the address was listed as a waste generator of oil skimmings and sludges in 2022 (Ottawa Carleton Standard Condo Corp #661).
3095 St. Joseph Boulevard	90 m southeast	16 GEN database records indicate the address was listed as a waste generator of pathological wastes and pharmaceuticals from 2007-2016, 2018, and 2020-2022 (Équipe des sante

Name/Location	Approximate Distance from the Site	Details
		familiale Communautaire Est, Aljamal pharmacist professional corporation).
250 Centrum Boulevard (including Unit 107B)	100 m southwest	9 GEN database records indicate the address was listed as a waste generator of petroleum distillates as well as oil skimmings and sludges from 1992-2012 (Tommy and Lefebvre Inc. and Cycle Path).
245 Centrum Boulevard	110 m southwest	<p>One SCT<sup>2</sup> database record indicates the address was listed as a manufacturing facility related to periodical publishers, other membership organizations, as well as civic and social organizations in 1987 (Arts Ottawa East). No details related to items manufactured or whether any printing activities historically took place at this address were provided.</p> <p>Note: Arteast Ottawa (inferred to be the Arts Ottawa East listed above) is a not-for-profit visual arts organization that is currently listed at this address.</p> <p>9 GEN database records indicate the address was listed as a waste generator of petroleum distillates as well as waste crankcase oils and lubricants from 2014-2016 and 2018-2022 (Ottawa School of Art).</p>
Hydro One Site in vicinity of 325 Centrum Boulevard	115 m northeast	One SPL <sup>4</sup> database record indicates a spill of unknown quantity and quality occurred at a decommissioned Hydro One Site in 2002 (inferred to be the electrical substation as noted below in the aerial photographs). Soil contamination is listed as possible.
Intersection of Prestone Street & St. Joseph Street	130 m southwest	One SPL database record indicates a 30 L spill of glycol to two catch basins in the northbound lanes occurred in 2008. Environmental impact is listed as possible.
Lot 35 Conc. 1 South of the Ottawa River; Queenswood Village	151 m northeast	One AMIS <sup>5</sup> database record indicates the address is listed as an abandoned limestone quarry with unknown dimensions.
330/340 Centrum Boulevard	155 m northeast	Two GEN database records indicate the address was listed as a waste generator of oil skimmings and sludges as well as waste crankcase oils and lubricants in 2016 and 2020 (Place Beausejour & Elevation Elevator Inc.).
210 Centrum Boulevard	250 m southwest	27 GEN database records indicate the address was listed as a waste generator of pathological wastes in 1989, 1992-2016, 2018, and 2020-2022 (Cybermedix Health Services, CML Healthcare Inc., Dr. J. Moss Medicine Prof. Corp., LifeLabs LP, 2325231 Ontario Inc., and Orleans Town Centre Dental).

<sup>2</sup> CA = Certificate of Approval

<sup>3</sup> GEN = Ontario Regulation 347/07 Waste Generators Summary

<sup>4</sup> SCT = Scott's Manufacturing Directory

<sup>5</sup> SPL = Ontario Spills Database

<sup>6</sup> AMIS = Abandoned Mine Information System

There were 28 unplotable records identified. Unplotable records are listings without location (coordinates) that were considered in the ERIS report due to, for example, the geographic location name. Details of these unplotable records include records such as but not limited to CA records, GEN records, Retail Fuel Storage Tanks (RST) records, SPL records, and Water Well Information Systems (WWIS) records.

Based on a review of the available information, the below-listed records were identified as potentially taken place at the Site and/or the Phase One Study Area.

- One GEN database record indicating 330/340 Centrum Boulevard was listed as a waste generator of oil skimmings and sludges in 2022 (Russell Condominium Corp #16). It was interpreted that this record was listed for the named location due to the same location and similar details, which was listed in Detail Report portion of the ERIS database report.

The remainder of the unplotable records were determined to not fall within the Phase One Study Area, had insufficient information to determine the location, or were not considered pertinent.

The SCT database record listed above in Table 4.2.1 indicates that 245 Centrum Boulevard was listed as a manufacturing facility related to periodical publishers, other membership organizations, as well as civic and social organizations in 1987 (Arts Ottawa East). Based on the Arteast Ottawa (inferred to be the Arts Ottawa East listed above) website (available at: <https://arteastottawa.com/>), it is a not-for-profit visual arts organization that is as of the issuance date of this report remains located at 245 Centrum Boulevard. As no specific details related to items actually manufactured at this address were provided in the Detail Report section of the ERIS database report, and given the present-day information readily available about Arteast Ottawa, it is not anticipated that any significant manufacturing warranting the classification as a PCA took place at 245 Centrum Boulevard.

Therefore, based on a review of the information gathered above, no PCAs were identified.

A copy of the ERIS report is provided in Appendix D.

## 4.2.2 City Directory Information

The city directory search provides the names of businesses/tenants that were operating at certain municipal addresses at one point in time. They do not provide details as to the activities at the properties.

Englobe retained ERIS to conduct a city directory search for the Site and various properties within the Phase One Study Area. City directory results were provided for years 1991, 1996, 2000, 1005/1006, 2012, 2017, and 2021.

The results are summarized in the tables below.

**Table 4.2.2a City directory search summary for the subject Site.**

Address	Year Listed	Listing
265 Centrum Boulevard	2021	YMCA
	2017	YMCA-YWCA National Capital Region, Ottawa YMCA-YWCA Job, YMCA-YWCA
	2012	Ottawa YMCA-YWCA Job, YMPCA-YWCA
	2005/2006	YMCA-YWCA National Capital Region, Ottawa YMCA-YWCA Job Bank
	2000	YMCA-YWCA of Ottawa-Carleton Services, Ottawa YMCA-YWCA Job Bank
	1996	Address Not Listed
	1991	Street Not Listed

**Table 4.2.2b City directory search summary for surrounding properties.**

Address	Year Listed	Listing
240 Centrum Boulevard	2021	Tan Sharleen F Dr, Tan Sharleen F DDs, Centre de Ressources, Kessel Run games Inc. Centre de al Petite Enface, Orleans Cumberland Resource, Orleans Cumberland Community, Subway
	2017	Farm Boy, Pet Valu, Bagel Run, Dr Sharleen F Tan, Subway Sandwiches & Salads, Subway

Address	Year Listed	Listing
	2012	Bagel Run, Tan Sharleen F DDS, Pet Valu Discount Foods, Subway Sandwiches & Salads, Farm Boy

A copy of the city directory results is included in Appendix E.

### **4.2.3 MECP Inventory of Coal Gasification Waste Plants in Ontario**

A review of the MECP's Inventory of Coal Gasification Plant Waste Sites in Ontario (April 1987) revealed that the Site has not been used for the gasification of coal. No coal gasification plants were identified within the Phase One Study Area.

### **4.2.4 MECP Inventory of Industrial Sites Producing Tars and Related Tars in Ontario**

A review of the MECP's Inventory of Industrial Sites Producing Coal Tars and Related Tars in Ontario (November 1988) revealed that the production and use of coal or other tars has not taken place at the Site or the surrounding properties within the Phase One Study Area.

### **4.2.5 MECP Inventory of PCB Sites in Ontario**

The 1991 and 1995 Inventories of polychlorinated biphenyl (PCB) Storage Sites in Ontario indicate that the Site has not been used for PCB storage. Additionally, no PCB storage sites were identified within the Phase One Study Area.

### **4.2.6 MECP Waste Disposal Site Inventory**

Englobe reviewed the 1991 Waste Disposal Site Inventory. Results indicate that the Site was not previously used as a waste disposal site, and that there are no previous waste disposal sites in the Phase One Study Area.

### **4.2.7 Intera Former Industrial Sites**

Englobe reviewed the Intera map of Former Industrial Sites (1998) in the Ottawa Area. The Site and Phase One Study Area is not captured in the available mapping.

### **4.2.8 City Of Ottawa Old Landfill Management Strategy Report**

Englobe reviewed the Golder Associates Old Landfill Management Strategy Phase I Report. This report identifies old landfill Sites in the City of Ottawa. No old landfill sites were identified within the Phase One Study Area.

### **4.2.9 Environment and Climate Change Canada**

Englobe submitted a request to Environment and Climate Change Canada (ECCC) under the *Access to Information Act*, to provide available information related to environmental concerns (general correspondence, occurrence reports, abatement), orders, tanks (ASTs/USTs), spills, investigations/prosecutions (with owner/tenant information), and waste generator number/classes. A response was not received as of the issuance date of this report. If the search results affect the conclusions of this report, an addendum to the report will be issued. A copy of the request is provided in Appendix F.

### **4.2.10 Ministry of the Environment, Conservation, and Parks**

The Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information (FOI) office was contacted for information on the Site, such as past or existing environmental permits, existing

environmental orders, fuel storage tanks, or any other environmentally related information. A response was not received as of the issuance date of this report. If the search results affect the conclusions of this report, an addendum to the report will be issued. A copy of the request is provided in Appendix F.

#### 4.2.11 City of Ottawa Historic Land Use Inventory

Englobe submitted a request to the City of Ottawa for Historical Land Use Inventory (HLUI) information for the Site and properties within the Phase One Study Area. A response was not received as of the issuance date of this report. If the search results affect the conclusions of this report, an addendum to the report will be issued. A copy of the request is provided in Appendix F.

#### 4.2.12 Technical Safety and Standards Association

The Technical Safety and Standards Association (TSSA) Fuel Handling Division is responsible for records regarding licensing of fuel handling facilities in Ontario. The TSSA was contacted for any information with respect to environmental concerns, which could include past or existing environmental spills, information on fuel tanks, or any other related environmental information at the Site and adjacent properties located at the Site. A response was received indicating that no petroleum fuel tanks were identified at the Site or nearby searched properties. A copy of the response is provided in Appendix F.

### 4.3 Physical Setting Sources

Aerial photographs as well as soil, bedrock geology, and topography maps were reviewed for information pertaining to the physical setting of the Site. A description of the results for each record reviewed is provided below.

#### 4.3.1 Aerial Photographs

Aerial photographs can provide an indication of historical land uses with respect to the Site and surrounding properties. Three aerial photographs were obtained and reviewed from ERIS for the years 1945, 1955, 1960, 1976 and 1984. 1945 was the earliest available aerial photograph. Another six aerial photographs were obtained and reviewed from the GeoOttawa website for the years 1991, 1999, 2002, 2008, 2011, and 2021. Aerial photographs were selected to be approximately 5-10 years apart, where available, and based on their resolution.

The following table summarizes the observed features of the Site and surrounding properties within the Phase One Study Area for each aerial photograph.

**Table 4.3.1 Summary of aerial photographs.**

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
1945	Site appears to be a mix of forested and agricultural lands.	<p>North: Agricultural lands followed by a roadway (now Highway 174) and grouping of structures that appear to be used for residential or agricultural purposes.</p> <p>South: Forested and agricultural lands followed by St. Joseph Boulevard.</p> <p>East: Forested and agricultural lands followed by a roadway (now St. Joseph Boulevard) and structures that appear to be used for residential or agricultural purposes.</p> <p>West: Forested and agricultural lands as well as structures that appear to be used for residential or agricultural purposes.</p>

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
1955	Similar to 1945 photograph.	North: Similar to 1945 photograph. South: Similar to 1945 photograph. East: Similar to 1945 photograph. West: Similar to 1945 photograph.
1960	Similar to 1955 photograph.	North: Similar to 1955 photograph. South: Similar to 1955 photograph. East: Similar to 1955 photograph. West: Similar to 1955 photograph.
1976	Similar to 1960 photograph.	North: Development of a paved area off the roadway to the east of the Site with two large undiscernible items visible. South: Similar to 1960 photograph. East: Similar to 1960 photograph. West: Similar to 1960 photograph.
1984	Similar to 1976 photograph.	North: Large development of residential structures now visible. South: Prestone Drive now visible south of St. Joseph Boulevard. East: Similar to 1976 photograph. West: Similar to 1976 photograph.
1991	Similar to 1984 photograph.	North: Paved area with two previously unidentifiable items visible now clearly identifiable as electronic substation. Additional development of what appear to be residential structures to the northeast. South: Development along Centrum and St. Joseph Boulevard with structures that appear to be for commercial use. East: Development along Centrum and St. Joseph Boulevard with structures that appear to be for residential use. West: Development along Centrum and St. Joseph Boulevard with structures that appear to be for commercial use.
1999	Developed with a parking lot, driveway lane, and building that appears to be for commercial use.	North: Similar to 1991 photograph. South: Similar to 1991 photograph. East: Similar to 1991 photograph. West: Similar to 1991 photograph.
2002	Similar to 1999 photograph.	North: Electronic substation appears decommissioned with the access roads/pathways beginning to appear overgrown with vegetation/not maintained as well as previously observed. South: Similar to 1999 photograph. East: Additional development east with a building that appears to be for residential use. West: Similar to 1999 photograph.
2008	Similar to 2002 photograph.	North: Electronic substation appears fully removed and the area to be under construction. South: Similar to 2002 photograph. East: Similar to 2002 photograph. West: Development of what appears to be a commercial building at 245 Centrum Boulevard.
2011	A new addition to the building on Site is visible on the eastern side of the property.	North: Area previously observed to be under construction now appears complete. A new surface water feature, presumably a stormwater pond is visible north of the Site. South: Similar to 2008 photograph. East: Similar to 2008 photograph. West: Similar to 2008 photograph.
2021	Similar to 2011 photograph.	North: Similar to 2011 photograph. South: Similar to 2011 photograph.

Aerial Photograph Year	Site Observations	Surrounding Properties Observations
		East: Similar to 2011 photograph. West: Similar to 2011 photograph.

A copy of the reviewed aerial photographs are provided in Appendix G.

### 4.3.2 Topography, Hydrology, and Geology

Englobe reviewed available maps to determine Site and surrounding features, such as local geology, topography, hydrogeology and locations of nearby watercourses. The maps reviewed and a description of the noted Site and surrounding property features are described in the table below.

**Table 4.3.2 Summary of maps reviewed.**

Map Title	Source	Site and Surrounding Property Features
Natural Heritage Areas	Ministry of Natural Resources and Forestry, 2020	<p>The Site is located at an approximate elevation of 65 m above sea level (masl). Local topography slopes northward, towards the Ottawa River.</p> <p>The nearest major surface waterbody to the Site is the Ottawa River, which is approximately 1.2 km north of the Site. A small watercourse is mapped on the Phase One Property running westward based on topographic mapping; however, there is no evidence in recent aerial photographs to support this. It is assumed the mapped watercourse on the topographic mapping is remnant of a historic watercourse that was present on Site prior to the 1990s.</p> <p>There are no mapped Areas of Natural and Scientific Interest (ANSIs) or wetlands within the Phase One Study Area.</p>
OGS Earth Bedrock Geology	Ministry of Northern Development and Mines, 2014a	The bedrock geology in the Phase One Study Area consists of Middle Devonian limestone, dolostone, shale, arkose, and sandstone of the Chazy Group; Rockcliffe Formation.
OGS Surficial Geology	Ministry of Northern Development and Mines, 2000	The Surficial Geology of the Site is composed of Pleistocene massive to well laminated fine-textured glaciomarine deposits: silt and clay, minor sand and gravel as well as Paleozoic bedrock.

### 4.3.3 Fill Materials

There is no confirmed evidence of fill materials at the Site resulting from the review of physical setting sources.

### 4.3.4 Water Bodies, Areas of Natural Significance, & Groundwater Information

The nearest surface waterbody to the Site is the Ottawa River, which is approximately 1.2 km north of the Site. There are no mapped Areas of Natural and Scientific Interest (ANSIs) or wetlands within the Phase One Study Area. The surrounding properties within the Phase One Study Area appear to be serviced by municipal water. Based on available City of Ottawa mapping, the Site does not exist within any intake protection zones or wellhead protection areas.

### 4.3.5 Well Records

A search of MECP well records was completed by ERIS of the Water Well Information System (WWIS) database and yielded four well records within the Phase One Study Area. Three of these well records relate to the installation of potable water wells in the 1950s and 1960s. It is assumed that the surrounding properties in the Phase One Study Area are serviced by municipal water as of the issuance date of this report. One well record relating to the installation of a well in 2021 did not list the installation purpose. One well record in the vicinity of the Site noted the underlying stratigraphy as blue clay (0-5 metres below ground surface - mbgs) followed by limestone bedrock (5 mbgs) to the depth of the advanced borehole (19 mbgs). The static water level was noted at 4.6 mbgs.

No well records were identified for the Site.

## 4.4 On-Site Operating Records

No on-Site records were made available for Englobe's review.

# 5 Interview

An interview questionnaire prepared by Englobe was completed by Sameer Gulamani, a representative for the current Property Owner (Bayview Orleans Inc.) Sameer Gulamani is the Managing Director and General Counsel for Bayview Orleans Inc. Pertinent details and results of the interview are summarized below:

- The original section of the Site building was constructed around the year 1996, with an expansion (i.e., pool area) added in 2009;
- Current property uses include community (i.e., a climbing gym - Altitude Gym - on the 2<sup>nd</sup> floor) and institutional (i.e., a childcare centre) and vaccination clinic on the 1<sup>st</sup> floor;
- Previous reported property uses include a child care centre (i.e., institutional property use) and vaccination clinic (i.e., community property use). Prior to the COVID-19 pandemic, the Site was reportedly owned and operated by the YMCA (i.e., pool, gymnasium, etc.) (i.e., community property use);
- Pool chemicals (i.e., chlorine, calcium) are stored in plastic totes in the basement;
- Underground stormwater infrastructure runs from the Site building and surface catch basins north to Brisebois Crescent;
- The Site is serviced by a hydro transformer on the south side of the property and municipal City of Ottawa water/wastewater; and,
- Jay Mathewson, Property Manager, is listed as an individual with potential additional information on the property.

It should be noted that Jay Mathewson accompanied Englobe's Site Assessor during the Site Reconnaissance visit as outlined below in Section 6. No new details related to the environmental condition of the property were provided.

# 6 Site Reconnaissance

## 6.1 General Requirements

The findings documented in this Section are based on observations made by Englobe's Site Assessor, Colette Robitaille (Qualifications of the Assessors are included in Appendix H) during the Site Reconnaissance. The reconnaissance began at 11:00 am on February 27, 2023 and was approximately one hour in duration. Weather conditions at the time were a mix of sun and cloud, with a temperature of approximately -6°C. The daycare centre was operational, and the upper floor Altitude Gym was in preparation for opening during the Site Reconnaissance. Englobe's Site Assessor was accompanied by Property Manager Jay Mathewson. It should be noted that access was not permitted to the daycare area (western portion of the building and small fenced in exterior section) at the time of Englobe's Site Reconnaissance as it was currently in use.

Figures showing the Site are presented in Appendix A. Select photographs taken during the Site reconnaissance are included in Appendix I.

## 6.2 Specific Observations at the Phase One Property

### 6.2.1 Description of the Phase One Property

The Site is located at 265 Centrum Boulevard, Orleans, ON K1E 3X7. It is located in the City of Ottawa's Kanata South Ward, on the north side of Centrum Boulevard. The Phase One Property encompasses five parcels of land with a total property area of approximately 8995 m<sup>2</sup> (GeoOttawa, 2023). It is located within an area zoned as MC14[1520] S152 - Orleans Town Centre.

Refer to Figure 1 in Appendix A for a Site Location Map.

### 6.2.2 Description of Structures and Other Improvements

One two-storey building, and one small one-storey shed with vinyl siding was observed at the Phase One Property at the time of Englobe's Site Reconnaissance. The original building footprint consists of a brick and mortar exterior, meanwhile the exterior of the new addition mainly consisted of metal siding.

### 6.2.3 Description of Below-Ground Structures

The building's partial basement (pool valve room) was observed to be the only confirmed below-ground structure at the Phase One Property at the time of Englobe's Site Reconnaissance.

### 6.2.4 Details of Storage Tanks

No fuel storage tanks were observed at the Phase One Property at the time of Englobe's Site Reconnaissance. Two steel 250-L drums were noted along northern property boundary, presumably containing the soil cuttings from Yuri Mendez Engineering subsurface investigation in May 2022. De-icing salt storage containers were noted along the exterior of the Phase One Property, in the vicinity of walk path and driving/parking areas.

## 6.2.5 Potable and Non-Potable Water Sources

The Site is serviced by municipal water. A water valve and meter were observed along the south-facing wall of the building during Englobe's Site Reconnaissance.

## 6.2.6 Underground Utility and Service Corridors

Public and private utility locates were not completed as part of this Phase One ESA; however, based on the Site characteristics, it is assumed that the Site is currently serviced by municipal water, sewer, natural gas, and electricity. Proposed underground utility details as provided in the General Plan of Services (for building addition in 2011) is provided in Section 4.1.5.1. During the Site Reconnaissance, Englobe observed a Siamese fire department connection, water meter, and natural gas meter along the south-facing wall of the building. In the parking lot along Brisboise Crescent, several catch basins were observed.

## 6.2.7 Features of Structures and Buildings

### 6.2.7.1 Description of Entry and Exit Points

The main building was observed to have one main entrance, along the north facing wall, at the Phase One Property at the time of Englobe's Site Reconnaissance. Several other miscellaneous/staff entrances along the eastern and southern facing walls of the building were also noted.

The small shed located in the daycare centre was observed to have one entry/exit point.

### 6.2.7.2 Heating Systems

Natural gas-fired rooftop heating/ventilation/air-conditioning (HVAC) units were reportedly present at the Phase One Property at the time of Englobe's Site Reconnaissance. Rooftop access for confirmation was not possible to due safe access limitations.

### 6.2.7.3 Cooling Systems

Rooftop cooling units reportedly service the building at the Phase One Property at the time of Englobe's Site Reconnaissance. Rooftop access for confirmation was not possible to due safe access limitations.

### 6.2.7.4 Drains, Pits, and Sumps

No drains, pits, or sumps were identified by the Property Manager at the Phase One Property at the time of Englobe's Site Reconnaissance.

### 6.2.7.5 Unidentified Substances

No unidentified substances were observed at the Phase One Property at the time of Englobe's Site Reconnaissance.

### 6.2.7.6 Chemical Storage

Pool chemical storage was observed in the basement pool valve room. This generally consisted of an empty plastic chlorine tank and miscellaneous pool chemicals stored on pallets (i.e., calcium plus, sodium sulfite, sedum bicarbonate, and pH+). Generic janitorial chemical storage in the ground floor janitor's closet at the Phase One Property at the time of Englobe's Site Reconnaissance. A small hydraulic oil reservoir for the building elevator was noted within the elevator maintenance room on the

ground floor of the building. It is of the opinion of the QP that the noted chemical storage areas, do not constitute “bulk” storage, and such, have not been identified as a PCA in this report.

#### 6.2.7.7 Stains or Corrosion

In the basement pool valve room, minor white and/or rust-coloured staining was noted on the concrete floor slab in the vicinity of the chemical storage area. Minor dark-coloured staining and absorbent pads were noted in the elevator maintenance room in the vicinity of the hydraulic oil reservoir. No staining was observed near the lowest level floor in the vicinity of the elevator. No other notable stains were observed within the interior areas of the Site buildings.

#### 6.2.7.8 Designated Substances and Special Attention Items

Eleven designated substances are regulated by the Ministry of Labour (MOL) under the Occupational Health and Safety Act (OHSA) through the development of designated substance regulations that control worker exposure to designated substances. The designated substances identified in OHSA include *acrylonitrile, arsenic, asbestos, benzene, coke oven emissions, ethylene oxide, isocyanates, lead, mercury, silica, and vinyl chloride*. Guidelines have been developed for building projects such as renovations, construction, and demolition where designated substances may be disturbed. The following sub-sections also address selected Special Attention Items including lead and/or lead-based paints, mercury, asbestos-containing material, PCBs, and radiation.

It should be noted that a Designated Substance and Hazardous Materials Survey (DSHMS) was not conducted as part of this Phase One ESA.

##### 6.2.7.8.1 LEAD AND/OR LEAD-CONTAINING PAINT

Lead may be present in a variety of building materials and is commonly associated with paints, the solder material associated with pipe plumbing, ceramic tile glazing, and mechanical equipment due to its ability to resist corrosion. Exposure to lead may cause lead poisoning and is considered to be a human health risk. The historic use of lead-containing paints (LCPs) is a source of exposure through ingesting peeling or flaking paints and/or routine contact with painted surfaces containing lead. Regulations have been established that limit worker exposure to lead, and guidelines have been published with work procedures to be followed when performing work that generates airborne lead-containing dust.

Based on the construction date of the building (original construction in 1996 and addition in 2011), it is unlikely that lead-based materials have been utilized in the on-Site structures.

##### 6.2.7.8.2 MERCURY

Liquid mercury is commonly associated with mechanical equipment such as thermostats, thermometers, barometers, pressure gauges, and electrical switches. A small amount of mercury is present in fluorescent light tubes and compact fluorescent light bulbs. Removal of materials suspected to contain mercury should be conducted in accordance with “The Safe Handling of Mercury: A Guide for the Construction Industry”.

Fluorescent light tubes were observed throughout the Site building during the Site Reconnaissance. Any mercury-containing items should be appropriately disposed of if/when removed off-Site.

##### 6.2.7.8.3 ASBESTOS-CONTAINING MATERIALS

Asbestos is a naturally occurring fibrous mineral that has been widely used historically due to physical properties that, amongst other things, allow asbestos to withstand high temperatures. Asbestos-containing materials (ACMs) have been used in a number of building products including, but not limited to thermal and electrical insulation, floor and ceiling tiles, and plaster.

Asbestos is used in two forms termed friable and non-friable. Friable asbestos refers to materials that contain asbestos fibres in a formulation that is soft enough to be crushed by hand pressure alone, which

allows for the release of the fibres upon disturbance. Non-friable asbestos-containing material refers to materials that contain a binding agent (such as tar or cement), which results in a “hard” material that requires considerable force before asbestos fibres are released. Exposure to asbestos has been linked to a number of respiratory conditions including asbestosis, lung cancer, and mesothelioma.

Based on the construction date of the building (original construction in 1996 and addition in 2011), it is unlikely that asbestos-containing materials have been utilized in the on-Site structures.

#### 6.2.7.8.4 POLYCHLORINATED BIPHENYLS

Polychlorinated Biphenyl (PCB) - containing dielectric fluid (Askarel) was used extensively for insulating and cooling electrical equipment such as transformers, capacitors, and fluorescent light ballasts, from the late 1920s to the mid-1970s. In 1977, the Canadian government enacted a set of chlorobiphenyl regulations that limited the use of PCBs. As such, the only allowable use of PCBs in Canada is in electrical transformers and capacitors existing in Canada before July 1, 1980, and certain other “closed use” equipment (specifically heat transfer equipment, hydraulic equipment, and vapour diffusion pumps) that were in Canada before September 1, 1977 (Hilborn and Buccini, 1998).

PCBs are commonly found within electrical ballasts manufactured before 1981, within fluorescent light fixtures and high-intensity discharge (HID) lamps. Light fixtures with T12 lamps are more likely to contain ballasts that were manufactured before 1981. T8 lamps are associated with light fixtures that were manufactured after the phase-out of PCB-containing ballasts. The letter “T” denotes the shape of the light fixture (e.g., tubular) and the number which follows indicates the diameter in eighths of an inch.

Fluorescent light tubes were observed throughout the Site building during the Site Reconnaissance, although, the Property Manager reported that all were T8 light tubes. A dry transformer was also noted in the ground floor electrical room, although since it is a dry transformer, there are minimal concerns associated with PCBs.

### 6.2.8 Wells

No wells were observed at the Phase One Property at the time of Englobe’s Site Reconnaissance. The reported stand pipe location (BH1 previously installed by Yuri Mendez Engineering in May 2022) could not be located due to snow cover at the Site.

### 6.2.9 Sewage Works

The Site is currently serviced by the municipal sewer system.

### 6.2.10 Solid Wastes

Generic solid wastes were observed to be stored at the Phase One Property at the rear of the building at the time of Englobe’s Site Reconnaissance. No staining in the vicinity of the solid waste storage area was observed.

### 6.2.11 Liquid Industrial Wastes

No liquid industrial wastes were observed at the Phase One Property at the time of Englobe’s Site Reconnaissance.

### 6.2.12 Air Emissions

No sources of air emissions were observed at the Phase One Property at the time of Englobe’s Site Reconnaissance

### **6.2.13 Ground Surface**

The ground surface was primarily overlain by snow at the Phase One Property at the time of Englobe's Site Reconnaissance. Asphalt covered parking areas and drive lanes, as well as sidewalk walking paths were observed at the Site. Based on recent aerial photography, the remainder of the Site is anticipated to be largely covered by grass.

### **6.2.14 Railway Lines or Spurs**

No railway lines or spurs were observed at the Phase One Property at the time of Englobe's Site Reconnaissance.

### **6.2.15 Stained Soil**

No stained soil was observed at the Phase One Property at the time of Englobe's Site Reconnaissance.

### **6.2.16 Stressed Vegetation**

No stressed vegetation were observed at the Phase One Property at the time of Englobe's Site Reconnaissance.

### **6.2.17 Fill and Debris Materials**

No evidence of imported fill or debris was observed at the Phase One Property at the time of Englobe's Site Reconnaissance.

## **6.3 Phase One Study Area Observations**

Properties in the Phase One Study Area were observed from publicly accessible areas and from within the Site boundaries. Surrounding property primarily include residential and commercial properties.

It should be noted a Hydro Ottawa transformer was noted adjacent to the southern edge of the property boundary; however, it did not display any "contains PCBs" stickers, as such this transformer has not been identified as a PCA in this report.

## **6.4 Potentially Contaminating Activities**

Based on a review of the information collected as part of the Site reconnaissance, no additional PCAs were identified.

# 7 Review and Evaluation of Information

## 7.1 Current and Past Uses

Based on the O. Reg. 153/04 (as amended) definition of “first developed use” and available information, the Site was first developed sometime on or before the year 1945. The first available aerial photographs (1945) appears show the Site as a mix of forested and agricultural lands.

**Table 7.1 Table of current and past uses.**

Year	Name of owner	Description of property use	Property use	Other observations from aerial photographs, fire
Prior to 1991	Various Individuals/Corporations	Vacant undeveloped and agricultural land	Agricultural or other use	Based on aerial photographs.
1991 to 2022	Various Individuals/Corporations	YMCA (including child care centre and vaccination clinic) & Ottawa Art	Residential/Parkland/ Institutional & Industrial/Commercial/ Community	Based on aerial photographs and land title search records.
2020 to present	Bayview Orleans Inc.	Child care centre, vaccination clinic, and gym	Residential/Parkland/ Institutional & Industrial/Commercial/ Community	Based on aerial photographs, land title search records, interview, and site reconnaissance.

## 7.2 Potentially Contaminating Activities

The presence of PCAs in the Phase One Study Area does not necessarily indicate that the soil and groundwater at the Site are affected by these contaminants. This depends on individual use of best management practices at the locations of the PCAs and the location of any contamination relative to the Site (i.e., on Site, up-gradient or down-gradient from local topography).

The following table summarizes the identified PCAs within the Phase One Study Area and at the Phase One Property.

**Table 7.2. Summary of PCAs.**

PCA No.	Potentially Contaminating Activity (PCA)			Location of PCA			Source of Information	Potentially Impacted Media (Groundwater, Soil and/or Sediment)	Considered an APEC (Yes/No)
	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities	On/Off Site	Proximity to Site (m)	Relative Direction to the Site			
1	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	On Site	Historic agricultural use and assumed pesticide application	On Site	N/A	N/A	Aerial Photographs	Soil	No
2	30. Importation of Fill Material of Unknown Quality	On Site	Reported fill materials on Site	On Site	N/A	N/A	Previous Reports	Soil	No
3	Undefined No. 1 - Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	N/A	N/A	Aerial Photographs, Site Recon.	Soil and Groundwater	Yes
4	28. Gasoline and Associated Products Storage in Fixed Tanks	On Site	Small hydraulic oil reservoir for elevator	On Site	N/A	N/A	Previous Reports, Site Recon.	Soil and Groundwater	No
5	40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications	530 Brisbois Crescent	Historic agricultural use and assumed pesticide application	Off Site	5	North	Aerial Photographs	Groundwater	No
6	Undefined No.2 - Electronic substation	315 Centrum Boulevard	Historic electronic substation	Off Site	30	North	Aerial Photographs	Groundwater	No
7	Undefined No. 3 - Spill	315 Centrum Boulevard	Spill of unknown quality and quantity at decommissioned Hydro One Site in 2002.	Off Site	30	North	ERIS Database Report	Groundwater	No

PCA No.	Potentially Contaminating Activity (PCA)			Location of PCA			Source of Information	Potentially Impacted Media (Groundwater, Soil and/or Sediment)	Considered an APEC (Yes/No)
	O. Reg. 153/04 PCA Item No.	Property Address	Historical and/or Current Activities	On/Off Site	Proximity to Site (m)	Relative Direction to the Site			
8	Undefined No. 4 - Spill	Intersection of Prestone Street & St. Joseph Street	30 L spill of glycol to catch basins in 2008	Off Site	125	Southeast	ERIS Database Report	Groundwater	No

PCA 1: Based on the nature of the PCA on Site, the amount of time that has passed since the PCA was last noted (1976 aerial photograph), and the fact that the Site had been developed post-1976 (in 1996), it is not anticipated that this PCA poses an environmental concern at the Site.

PCA 2: Based on the nature of the PCA on Site, this PCA may pose an environmental concern at the Site.

PCA 3: Based on the unconfirmed nature of the PCA on Site and the fact that the quality of on-Site soils (including any inert and/or fill materials) which may become excess shall be addressed/evaluated at the time of construction for Site redevelopment in accordance with O. Reg. 406/19, this PCA is not anticipated to pose an environmental concern at the Site that requires investigation at this time.

PCA 4: Based on the small, localized nature of the PCA, and the age of the hydraulic system (1996 or more recent), this PCA is not anticipated to pose an environmental concern to the Site.

PCA 5, 6, 7, and 8: Based on the nature of the off-Site PCAs, their proximity to the Site, and the local topography, these PCAs are not anticipated to pose an environmental concern to the Site.

Please note, any spills < 25 L are considered small spills and are not considered as PCAs in this report.

## 7.3 Areas of Potential Environmental Concern

Based on the findings of this Phase One ESA, there is one APEC currently identified at the Site. The following table summarizes the APEC identified on Site (Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04). This should be noted that the APEC was identified based on the available information at the time of preparation of this Phase One ESA report only.

**Table 7.3. Summary of APECs.**

PCA				APEC			
PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
3	Undefined No. 1 - Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	APEC 1 <sup>7</sup>	Walking pathways and driving/parking areas	EC, SAR, Na, Cl <sup>-</sup>	Soil and Groundwater

<sup>7</sup> Road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas and walking paths of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, thus, it is the QP's opinion that this PCA and associated APEC are exempted (i.e., standards are deemed to have been met) as per Part IX, s. 49.1 Paragraph 1 of O.Reg. 153/04, and such, no soil and/or groundwater samples need to be collected and submitted for laboratory analyses for related parameters (i.e. no further investigation for this APEC is required).

**Note:**

EC = Electrical Conductivity

Cl<sup>-</sup> = Chloride

Na = Sodium

SAR = Sodium Adsorption Ratio

## 7.4 Phase One Conceptual Site Model

The illustrative requirements, according to O. Reg. 153/04, of the Phase One Conceptual Site Model (CSM) are shown on Figures 1 through 4 provided in Appendix A. These figures identify the locations of the water bodies, roads, the uses of properties adjacent to the Site, the location of PCAs within the Phase One Study Area and any applicable APECs at the Site. The PCAs and evaluation of any APECs are discussed in Sections 7.2 and 7.3 above.

**Table 7.4 Summary of Phase One Conceptual Site Model Requirements.**

O. Reg. 153/04 Schedule D (Part VI) Table 1 Requirement	Phase One ESA Findings / Details
Show any existing buildings and structures	One building was observed at the Phase One Property at the time of Englobe's Site Reconnaissance. The location of the Site is shown on Figure 1, in Appendix A.
Identify and locate water bodies located in whole or in part on the Phase One Study Area	The nearest major surface waterbody to the Site is the Ottawa River, which is approximately 1.2 km north of the Site. A small watercourse is mapped on the Phase One Property running westward based on topographic

O. Reg. 153/04 Schedule D (Part VI) Table 1 Requirement	Phase One ESA Findings / Details
	mapping; however, there is no evidence in recent aerial photographs or the Site Reconnaissance to support this. It is assumed the mapped watercourse on the topographic mapping is remnant of a historic watercourse that was present on Site prior to the 1990s.
Identify and locate any areas of natural significance located in whole or in part on the Phase One Study Area	There are no mapped Areas of Natural and Scientific Interest (ANSIs) or wetlands within the Phase One Study Area.
Locate any drinking water wells at the Phase One Property	No known water supply wells were identified or observed at the Site. Historic water supply wells were identified within the Phase One Study Area, although it is assumed that the surrounding properties in the Phase One Study Area are serviced by municipal water.
Show roads, including names, within the Phase One Study Area	The Site is bordered to the north by Brisbois Crescent, to the east by vacant land and Brisbois Crescent, to the south by Centrum Boulevard, and to the west by 255 Centrum Boulevard.
Show uses of properties adjacent to the Phase One Property	The Site is located in an area of primarily commercial property use.
Identify and locate areas where any PCA has occurred and show tanks in such areas.	Eight PCAs, as outlined in table 7.2 above, were identified in the Phase One Study Area.
Identify and locate any APECs	One APEC, as outlined in table 7.3 above, was identified on Site.
Describe and assess any areas where potentially contaminating activity on or potentially affecting the Phase One Property has occurred.	<p>Based on the identified APEC on Site, road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas and walking paths of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, thus, it is the QP's opinion that this PCA and associated APEC are exempted (i.e., standards are deemed to have been met) as per Part IX, s. 49.1 Paragraph 1 of O.Reg. 153/04, and such, no soil and/or groundwater samples need to be collected and submitted for laboratory analyses for related parameters (i.e. no further investigation for this APEC is required).</p> <p>No other identified PCAs resulted in APECs on Site.</p>
Describe and assess any contaminants of potential environmental concern	Based on the identified APEC on Site, the following contaminants of potential environmental concern have been identified: Na, Cl <sup>-</sup> , EC, and SAR; however, as previously noted, it is the QP's opinion that this PCA and associated APEC are exempted (i.e., standards are deemed to have been met) per Part IX, s. 49.1 Paragraph 1 of O.Reg. 153/04, and such, no soil and/or groundwater samples need to be collected and submitted for laboratory analyses for related parameters (i.e. no further investigation for this APEC is required).
Describe and assess the potential for underground utilities, if any present, to affect contaminant distribution and transport	Based on the Site characteristics, it is assumed that the Site is currently serviced by municipal water, sewer, natural gas, or electricity. Any underground utilities may affect the distribution and transport of contaminants.
Describe and assess available regional or site specific geological and hydrogeological information	Based on available OGS mapping, the bedrock geology in the area of the Site consists of Middle Devonian limestone, dolostone, shale, arkose, and sandstone of the Chazy Group; Rockcliffe Formation. The Surficial Geology of the Site is composed of Pleistocene massive to well laminated fine-textured glaciomarine deposits: silt and clay, minor sand and gravel as well as Paleozoic bedrock.
Describe and assess how any uncertainty or absence of information obtained in each of the components of the Phase One ESA could affect the validity of the model.	FOI requests from ECCC, the MECP, and the City of Ottawa have not yet been received as of the issuance date of this report. Any documented issues (if applicable) could require revisions to the CSM. Potential information provided by these agencies is not expected to alter the conclusions of this report.
If the exemption set out in paragraph 1, 1.1 or 2 of section 49.1 of the regulation is being relied upon, document the rationale for relying upon the exemption, which may	Englobe does intend to rely upon the exemption set out in Paragraph 1, 1.1, of Section 49.1 of O. Reg. 153/04, as amended.

O. Reg. 153/04 Schedule D (Part VI) Table 1 Requirement	Phase One ESA Findings / Details
be based on information gathered during one or more of the records review, interviews and site reconnaissance.	Englobe does not intend to rely upon the exemption set out in Paragraph 2 of Section 49.1 of O. Reg. 153/04, as amended, as Englobe is not aware of any previously identified exceedances at the Site to which this exemption would apply.
If there is an intention to rely upon the exemption set out in paragraph 3 of section 49.1 of the regulation, set out the intention to rely upon the exemption and provide a brief explanation as to why the exemption may apply, which may be based on information gathered during one or more of the records review, interviews and site reconnaissance.	Englobe does not intend to rely upon the exemption set out in Paragraph 3 of Section 49.1 of O. Reg. 153/04, as amended, as Englobe is not aware of any previously identified exceedances at the Site to which this exemption would apply.

This report was prepared based on the available information at the time of preparation of this Phase One ESA report only.

# 8 Conclusions

The following one APEC was identified on the Phase One Property:

## APECs identified at the Phase One Property.

PCA				APEC			
PCA No.	O. Reg. 153/04 PCA Item No.	PCA Location (On/Off Site)	Historical and/or Current Activities	APEC No.	Location of APEC on the Site	Contaminants of Potential Concern (COPCs)	Potentially Impacted Media (Groundwater, Soil, and/or Sediment)
3	Undefined No. 1 - Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	On Site	Application of salt for de-icing purposes for the safety of vehicular or pedestrian traffic	APEC 1	Walking pathways and driving/parking areas	EC, SAR, Na, Cl <sup>-</sup>	Soil and Groundwater

However, as road salt and/or de-icing substances have likely been applied to the surface of the driveway/parking areas and walking paths of the Site for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, it is the QP's opinion that this PCA and associated APEC are exempted (i.e., standards are deemed to have been met) as per Part IX, s. 49.1 Paragraph 1 of O.Reg. 153/04, and such, no soil and/or groundwater samples need to be collected and submitted for laboratory analyses for related parameters (i.e. no further investigation for this APEC is required).

Therefore, based on the information obtained as part of this Phase One ESA, no APECs requiring additional investigation at this time were identified at the Site and thus, no further investigation in the form of a Phase Two ESA is recommended at this time.

It should be noted that the quality of on-Site soils (including any inert and/or fill materials) that may become excess shall be addressed/evaluated at the time of construction for Site redevelopment in accordance with O. Reg. 406/19 in order to properly characterize and assess handling/disposal/reuse options.

# 11 Statement of Limitations

This report (hereinafter, the “Report”) was prepared by Englobe Corp. (herein the “Company”) and is provided for the sole exclusive use and benefit of the Bayview Orleans Inc. (the “Client”). Ownership in and copyright for the contents of the Report belong to the Company.

No other person is authorized to rely on, use, copy, duplicate, reproduce, or disseminate this Report, in whole or in part and for any reason whatsoever, without the express prior written consent of the Company. Any person using this Report, other than the person(s) to whom it is directly addressed, does so entirely at its own risk. The Company assumes no responsibility or liability in connection with decisions made or actions taken based on the Report, or the observations and/or comments contained within the Report. Others with interest in the site and/or subject matter of this Report should undertake their own investigations and studies to determine how or if they or their plans could be affected.

This Report should be considered in its entirety; selecting specific portions of the Report may result in the misinterpretation of the content.

The work performed by the Company was carried out in accordance with the terms and conditions specified in the Professional Services Agreement between the Company and the Client, in accordance with currently accepted engineering standards and practices and in a manner consistent with the level of skill, care and competence ordinarily exercised by members of the same profession currently practicing under similar conditions and like circumstances in the same jurisdiction in which the services were provided. Standards, guidelines, and practices may change over time; those which were applied to produce this Report may be obsolete or unacceptable at a later date.

The findings, recommendations, suggestions, or opinions expressed in this Report reflect the Company’s best professional judgement based on observations and/or information reasonably available at the time the work was performed, as appropriate for the scope, work schedule and budgetary constraints established by the Client. No other warranty or representation, expressed or implied, is included in this Report including, but not limited to, that the Report deals with all issues potentially applicable to the site and/or that the Report deals with any and all of the important features of the Site, except as expressly provided in the scope of work.

This report has been prepared for the specific site, development, building, design or building assessment objectives and/or purposes that were described to the Company by the Client. The applicability and reliability of the content of this Report, subject to the limitations provided herein, are only valid to the extent that there has been no material alteration or variation thereto, and the Company expressly disclaims any obligation to update the Report. However, the Company reserves the right to amend or supplement this Report based on additional information, documentation or evidence made available to it.

*The Company makes no representation concerning the legal significance of its findings, nor as to the present or future value of the property, or its fitness for a particular purpose and hereby disclaims any responsibility or liability for consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.*

Since the passage of time, natural occurrences, and direct or indirect human intervention may affect the views, conclusions, and recommendations (if any) provided in the Report, it is intended for immediate use.

This Statement of Limitations forms an integral part of the Report.

In preparing this Report, the Company has relied in good faith on information provided by others and has assumed that such information is factual, accurate, and complete. The Company accepts no responsibility

or liability for any deficiency, misstatement, or inaccuracy in this Report resulting from the information provided, concealed, or not fully disclosed by those individuals.

The conclusions presented herein are based on information gathered from a limited historical review of readily available geological, historical, and regulatory information and a field inspection program. Sampling and analysis of soil, ground water, or any other material was not carried out as part of this assessment. Consequently, the presence and/or extent of any adverse environmental impact cannot be verified. The potential for environmental liability and/or environmental impact is an opinion that has been arrived at within the scope of this assessment.

It is recommended practice that the Company be retained during subsequent phases of the project, to confirm that the conditions throughout the site do not deviate materially from those encountered throughout the sampling program.

Any description of the site and its physical setting documented in this Report is presented for informational purposes only, to provide the reader a better understanding of the site and scope of work. Any topographic benchmarks and elevations are primarily to establish relative elevation differences between sampling locations and should not be used for other purposes such as grading, excavation, planning, development, or similar purposes.

Any results from laboratory or other subcontractors reported herein have been carried out by others, and the Company cannot warrant their accuracy.

PART OF BLOCK 6 AND PART OF COMMERCIAL DRIVE (As Closed by By-Law 90-92, Inst. LT789196) REGISTERED PLAN 50M-165 CITY OF OTTAWA

Prepared by Annis, O'Sullivan, Vollebakk Ltd.

Scale 1:250

Metric DISTANCES SHOWN ON THIS PLAN ARE IN METRES AND CAN BE CONVERTED TO FEET BY DIVIDING BY 0.3048

Surveyor's Certificate

- I CERTIFY THAT: 1. This survey and plan are correct and in accordance with the Surveys Act and the regulations made under them. 2. The survey was completed on the 29th day of November, 2021.

Date: Nov 29/21 T. Hartwick Ontario Land Surveyor

Notes & Legend

Table with 2 columns: Denotes and Description. Includes symbols for Survey Monument Planted, Standard Iron Bar, Short Standard Iron Bar, Iron Bar, Witness, Measured, Annis, O'Sullivan, Vollebakk Ltd., Plan 4R-24551, Plan 4R-21938, Deciduous Tree, Coniferous Tree, Fire Hydrant, Water Valve, Water Stand Post, Maintenance Hole (Storm Sewer), Maintenance Hole (Sanitary), Maintenance Hole (Hydro), Maintenance Hole (Unidentified), Valve Chamber (Watermain), Catch Basin, Hydro Transformer on Concrete Pad, Bottom of Slope, Chain Link Fence, Handrail, Diameter, Location of Elevations, Top of Concrete Curb/Wall Elevation, Stone Retaining Wall, Timber Retaining Wall, Centreline, Property Line, Light Standard, Sign, Edge of Asphalt, Top of Grate, Refuse Container, Bollard.

SITE AREA = 8995 m²

Distances shown on this plan are ground distances and can be converted to grid distances by multiplying by the combined scale factor of 0.99996.

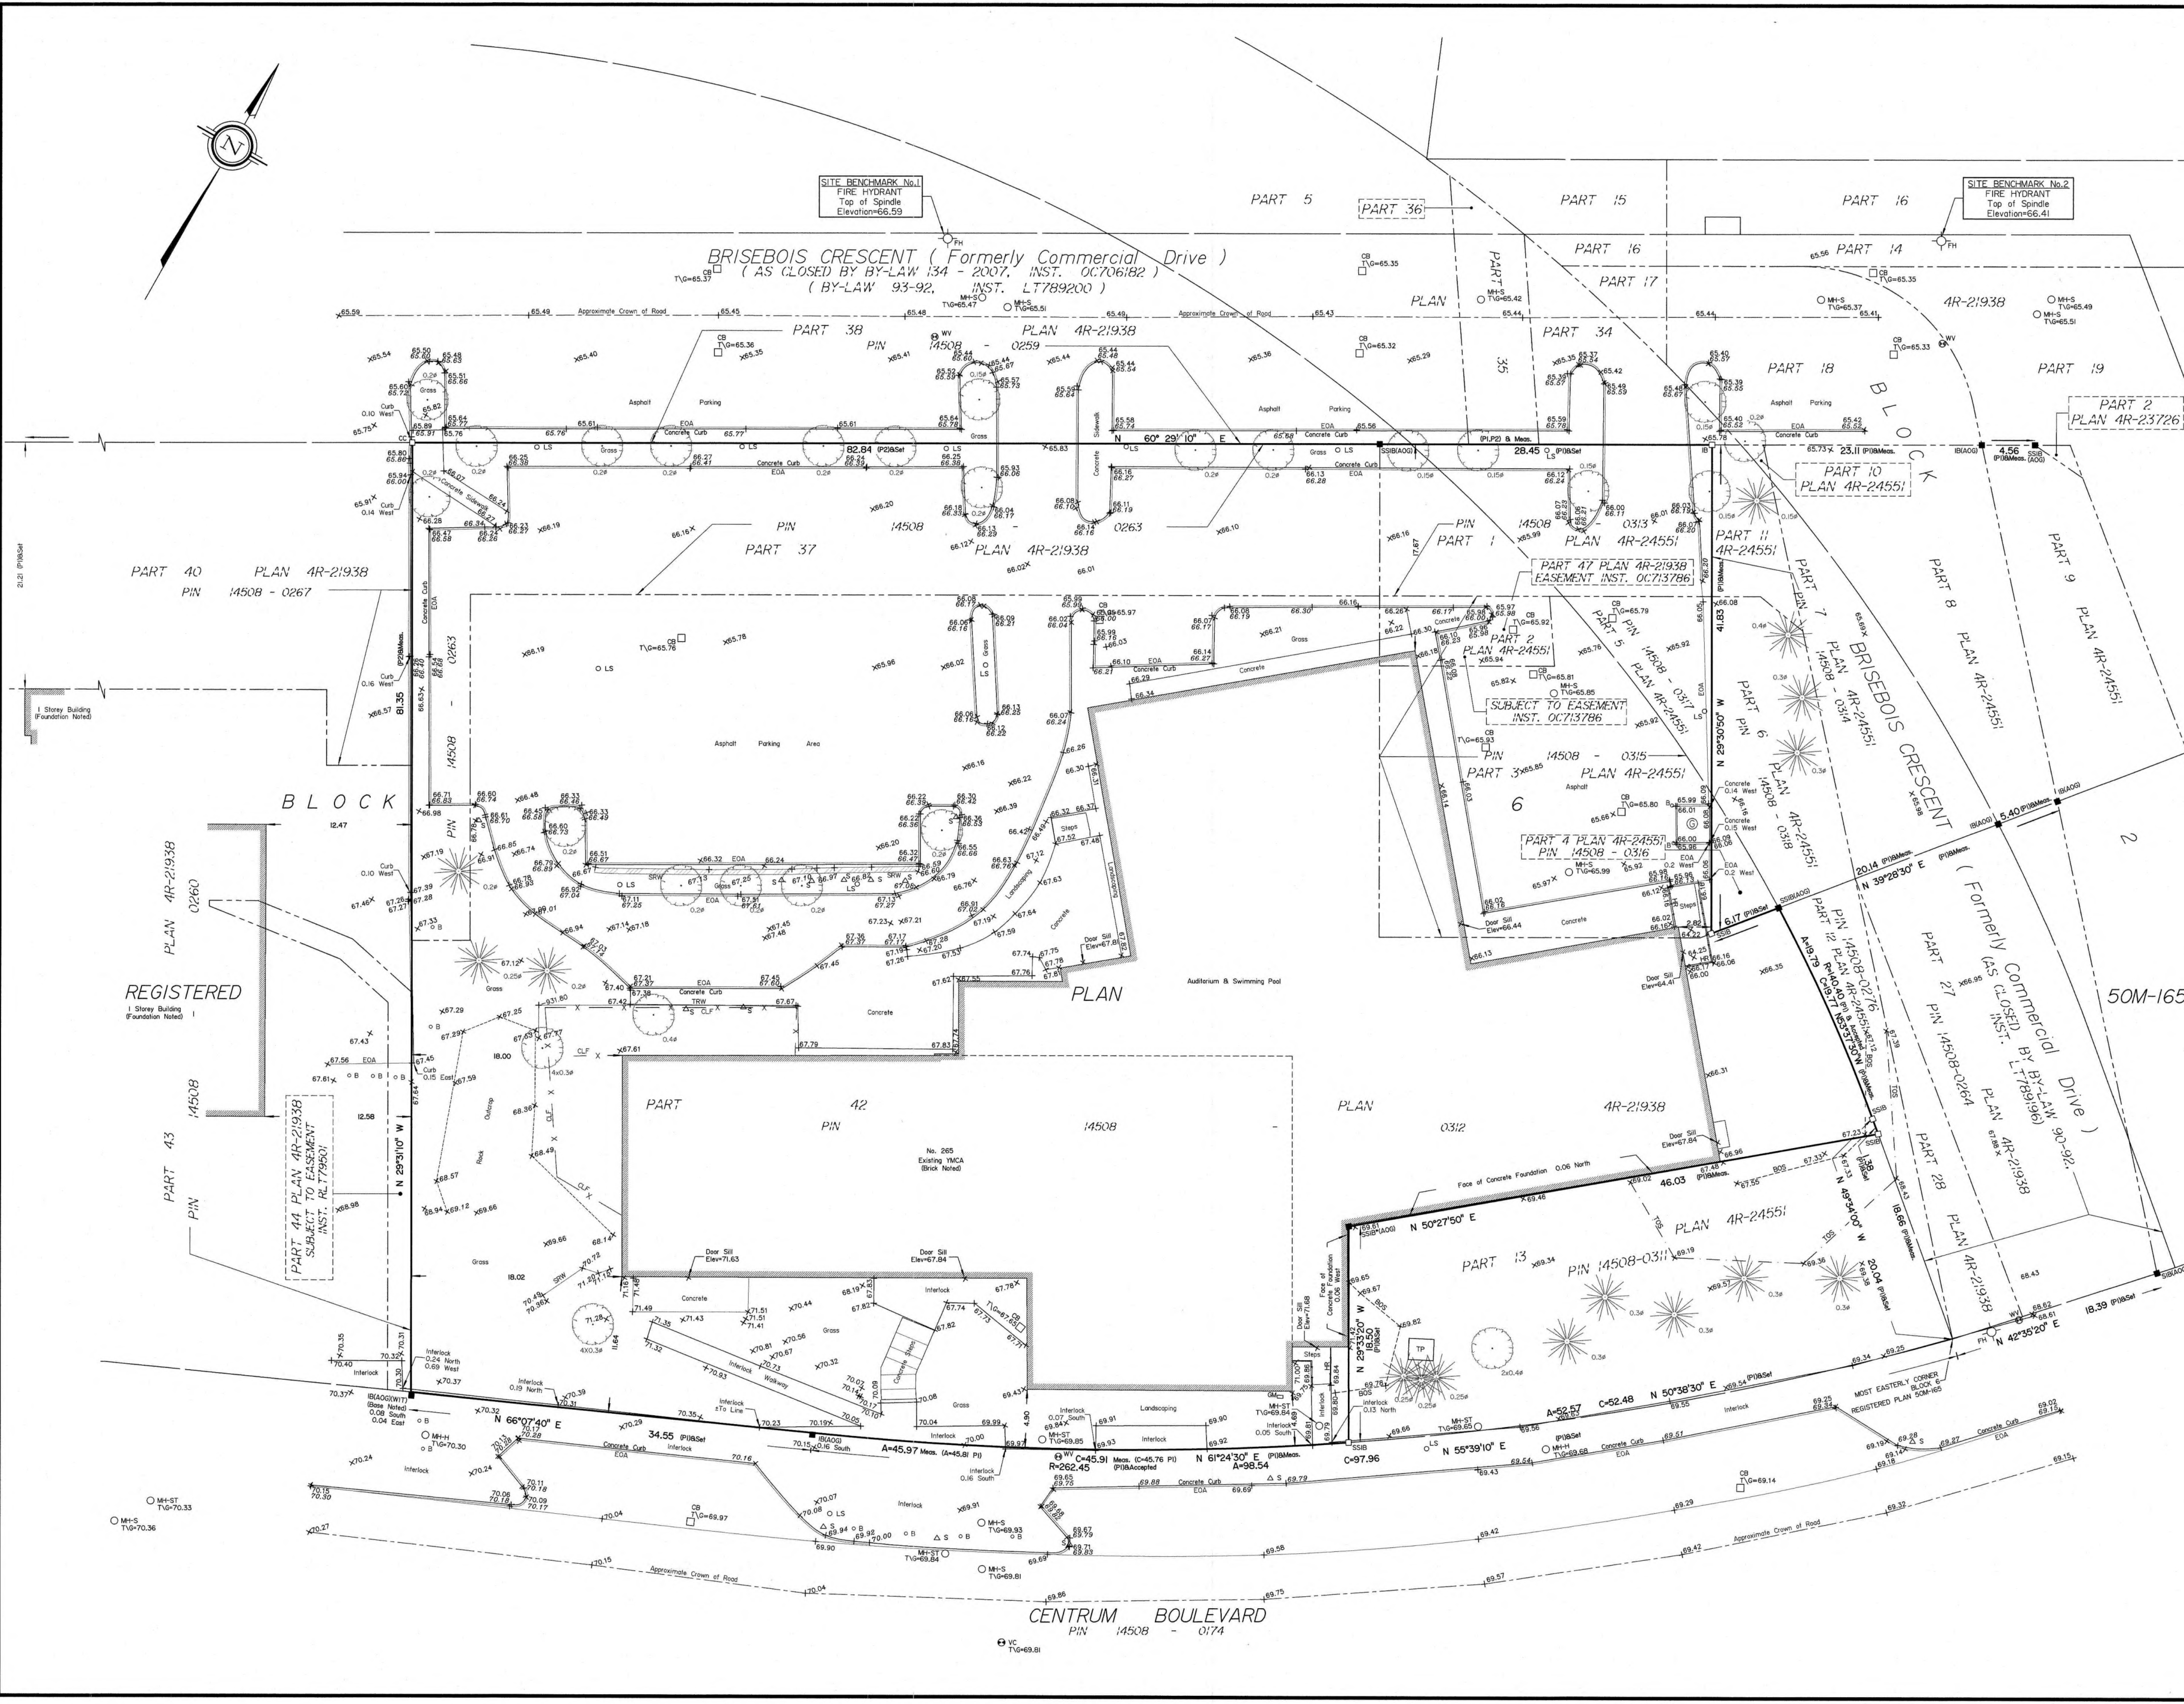

Bearings are grid, derived from Can-Net 2016 Real Time Network GPS observations and are referenced to Specified Control Points 01919680184 and 019198434761, MTM Zone 9 (76°30' West Longitude) NAD-83 (original).

ELEVATION NOTES

- 1. Elevations shown are geodetic and are referred to the CGVD28 geodetic datum and are derived from City of Ottawa Monument 001196530208 having a published elevation of 59.36 metres. 2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

UTILITY NOTES

- 1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation. 2. Only visible surface utilities were located. 3. A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating etc.

## Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

## Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

## Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

## Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

## Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary: Summary By Data Source

## **AMIS - Abandoned Mine Information System**

A search of the AMIS database, dated 1800-Mar 2022 has found that there are 1 AMIS site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
QUEENSWOOD VILLAGE Q	CUMBERLAND ON	151.0	<a href="#"><u>17</u></a>

## **BORE - Borehole**

A search of the BORE database, dated 1875-Jul 2018 has found that there are 7 BORE site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-May 31, 2022**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2020**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-May 31, 2022**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Sep 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Nov 2022**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Dec 31, 2022**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Dec 31, 2022**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Dec 31, 2022**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Dec 31, 2022**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2022**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Apr 30, 2022**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2021**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Dec 2022**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2022**

**National Analysis of Trends in Emergencies System (NATES):**

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021**

**National Defense & Canadian Forces Fuel Tanks:**

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2022**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Dec 31, 2022**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Dec 31, 2022**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Dec 31, 2022**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2019**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2022**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-May 31, 2022**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021**

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Dec 31, 2022**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jun 30 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Ottawa, Ontario K1B 5R6

Dear Ms. Robitaille,

This is to acknowledge receipt on February 23, 2023 of your request under the *Access to Information Act* for:

**"Company: Bayview Group**

**Property: 265 Centrum Boulevard, Orleans (Ottawa), ON K1E 3X7**

**(Legal Description 14508-0263; 14508-0312; 14508-0313; 4508-0315; 14508-0317; (5) parcels although same municipal address and all parcels are abutting and owned by one party so assumption that they can be listed as one "Site".**

**For a Phase 1 Environmental Site Assessment, can you please provide any environmentally related records (e.g., general correspondence, occurrence reports, abatement, orders, storage tanks, spills, investigations/prosecutions (with owner/tenant information), and any applicable waste generator number/classes) associated with the Property.**

**Authorization: {Imran Gulamani}"**

*Please note that this also serves as a receipt for the \$5.00 application fee.*

We have started processing your request and will contact you as soon as possible. Please find enclosed our principles for assisting your request.

If you have any questions regarding this request, do not hesitate to contact me by email at [Owen.Matson@ec.gc.ca](mailto:Owen.Matson@ec.gc.ca). Please quote the above file number on all future correspondence concerning this request.

# Our principles for assisting your request

In processing your request under the *Access to Information Act* or *Privacy Act*, we will:

1. Process your request without regard to your identity.
2. Offer reasonable assistance throughout the request process.
3. Provide information on the *Access to Information Act* or *Privacy Act*, including information on the processing of your request and your right to complain to the Information Commissioner of Canada or Privacy Commissioner of Canada.
4. Inform you as appropriate and without undue delay when your request needs to be clarified.
5. Make every reasonable effort to locate and retrieve the requested records/personal information under the control of Environment and Climate Change Canada.
6. Apply limited and specific exemptions to the requested records/personal information.
7. Provide accurate and complete responses.
8. Provide timely access to the requested information/personal information.
9. Provide records/personal information in the format and official language requested, as appropriate.
10. Provide an appropriate location to examine the requested information/personal information.

# Historic Land Use Inventory

## Application Form

### Notice of Public Record

All information and materials required in support of your application shall be made available to the public, as indicated by Section 1.0.1 of *The Planning Act*, R.S.O. 1990, C.P.13.

### Municipal Freedom of Information and Protection Act

Personal information on this form is collected under the authority the *Planning Act*, RSO 1990, c. P. 13 and will be used to process this application. Questions about this collection may be directed by mail to Manager, Business Support Services, Planning Infrastructure and Economic Development Department, 110 Laurier Avenue West, Ottawa, K1P 1J1, or by phone at (613) 580-2424, ext. 24075

### Background Information

**\*Site Address or Location:**

265 Centrum Boulevard, Orleans, ON

\* Mandatory Field

### Applicant/Agent Information:

Name:	<input type="text" value="Colette Robitaille"/>		
Mailing Address:	<input type="text" value="2713 Lancaster Road. Unit 101, Ottawa, ON"/>		
Telephone:	<input type="text" value="6134025937"/>	Email Address:	<input type="text" value="colette.robaille@englobecorp.com"/>

### Registered Property Owner Information:

Same as above

Name:	<input type="text" value="Bayview Orleans Inc."/>		
Mailing Address:	<input type="text" value="108 Chestnut Street, Toronto, ON M5G 1R3"/>		
Telephone:	<input type="text"/>	Email Address:	<input type="text" value="imrangulamani@bayviewgroup.com"/>

### Site Details

Legal Description and PIN:

What is the land currently used for?

Lot frontage:  m    Lot depth:  m    Lot area: \_\_\_\_\_ m<sup>2</sup>

**OR** Lot area: (irregular lot)  m<sup>2</sup>

Does the site have Full Municipal Services:     Yes     No

### Required Fees

**Please don't hesitate to visit the Historic Land Use Inventory website more information. Fees must be paid in full at the time of application submission.**

**Planning Fee**

### Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Infrastructure and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

**Disclaimer**  
**For use with HLUI Database**

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Englobe Corp. \_\_\_\_\_ ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.
7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

Dear Sir/Madam,

-  
Thank you for submitting your Historic Land Use Inventory application for 265 Centrum Boulevard. It has been received by planning staff and I will be your File Lead.

The details below are required to submit payment for your application:

Application File Number	Fee
<b>D06-03-23-0039</b>	<b>\$132.00</b>

Inquiries regarding confirmation of funds receipted are to be directed to myself as the File Lead.

-  
**Payment Methods**

Payments can be made through one of the below options:

1. [Online payment](#) through Paymentus
  - Please note, the online form only requires the last six digits of the above noted File Number be entered
  - A service fee is applied at a rate of 1.99% for credit card and Debit card transactions, and a flat fee of \$0.49 for Interac Online payments

or

2. Making an appointment at a Client Service Centre to pay in person
  - [City Hall, 110 Laurier Avenue West](#)
  - [Ben Franklin Place, 101 Centrepointe Drive](#)
  - [Kanata, 580 Terry Fox Drive](#)
  - [Orleans, 255 Centrum Boulevard](#)
  - [Metcalfe, 8243 Victoria Street](#)
  - [West Carleton, 5670 Carp Road](#)
  - [North Gower, 2155 Roger Stevens Drive](#)

Please note, the above instructions do not apply to building permit applications. Further information on building permit applications can be found [here](#).

Thank you,

Dear Colette Robitaille:

**RE: MECP FOI A-2023-01131 / Your Reference 02300762.000 –  
Acknowledgement Letter**

The Ministry is in receipt of your request made pursuant to the Freedom of Information and Protection of Privacy Act and has received your payment in the amount of \$5.00 (non-refundable application fee).

**The search will be conducted on the following: 265 Centrum Boulevard,  
Orleans. If there is any discrepancy, please contact us immediately.**

Please note the file number that has been assigned to your request. This number should be referred to in all future communications with our office.

Also, the Ministry's Freedom of Information and Protection of Privacy Office (MECP Access and Privacy Office) is currently providing requesters with decisions/records via email. This allows requesters to obtain decisions containing records in a more timely and efficient way.

You may expect a reply or additional communication as your request is processed. For your information, the Ministry charges for search and preparation time.

Due to the COVID-19 outbreak, requesters may experience some delays with FOI requests at this time.

If you have any questions, please contact Nasreen Salar at 647-330-4599 or Nasreen.Salar@ontario.ca.

Yours truly,  
MECP Access and Privacy Office

**Subject:** RE: 02300762.000 - TSSA Records Request

**ATTENTION:** Assurez-vous que le contenu soit de confiance avant d'ouvrir une pièce jointe ou un hyperlien.  
**CAUTION:** Do not click on links or open attachments you do not trust.

**Please refrain from sending documents to head office. The Public Information (PI) team works remotely, mailing in applications will lengthen the overall processing time.**

#### **NO RECORD FOUND IN CURRENT DATABASE**

-  
Hello Colette,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

We confirm that there are no records in our current database of any fuel storage tanks at the subject addresses.

- 240 Centrum Boulevard, Orleans, ON K1E 3X7
- 245 Centrum Boulevard, Orleans, ON K1E 3X7
- 255 Centrum Boulevard, Orleans, ON K1E 3X7
- 265 Centrum Boulevard, Orleans, ON K1E 3X7
- 290 Centrum Boulevard, Orleans, ON K1E 3X7
- 310 Centrum Boulevard, Orleans, ON K1E 3X7

-  
This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

#### **Please follow the steps below to access the new application(s) and Service Prepayment Portal:**

1. Click [Release of Public Information - TSSA](#) - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

#### **Accessing the Service Prepayment Portal:**

1. Select new or existing customer (\*if you are an existing customer, you will need your account number & postal code to access your account);

2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
  - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at [publicinformationservices@tssa.org](mailto:publicinformationservices@tssa.org).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,  
Ella
