CONSULTATION DETAILS

Councillor's Comments

Councillor Marty Carr was aware of the application related to this report.

Public Comments

This application was subject to public circulation under the Public Notification and Consultation Policy. There were public comments received online and staff considered these comments.

Summary of public comments and responses

Adding a parking garage is not consistent with climate goals. The parking lot's construction will displace a busy existing transit stop that is the closest stop to the General Campus on OC Transpo route 55. The site plan should be revised to demonstrate how the existing bus stop will be relocated, and potentially integrate a bus shelter and other amenities for transit users into the parking structure.

Response: As transit is encouraged, Transit Services required updates to the plans to show the bus stop infrastructure to ensure proper integration and continued service.
