Attention: Mr. Mark Watson

Re: Phase One Environmental Site Assessment Update

151 and 159 Wescar Lane, Carp, Ontario, K0A 1L0

Enclosed is our Phase One Environmental Site Assessment Update for the above above-noted properties. The report presented herein is based on the email request to update the previously completed Phase I ESA. This report was prepared by Ester Wilson, B.Sc., GIT, with senior review completed by Mike Kosiw, B.Sc., EP, CESA_{II}, A.Ag and QP_{ESA} completed by Shaun Pelkey.

If you have any questions concerning this report or require further details, please do not hesitate to contact us.

Regards,

Mike Kosiw, B.Sc., EP, CESA_{II} Senior Environmental Scientist p.p

Shaun Pelkey, M.Sc.E., P.Eng. QP_{ESA} Principal, Environmental Engineer

MK/SP/DP/DE

EXECUTIVE SUMMARY

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by Sunbelt Rentals to carry out a Phase One Environmental Site Assessment (ESA) Update for the properties located at 151 and 159 Wescar Lane in Carp, Ontario (hereafter referred to as the "Site"). GEMTEC completed a previous Phase I ESA for the Site in April 2022 to Canadian Standards Association (CSA) standards for due diligence property financing purposes. It is understood that the Phase I ESA requires an update to meet the requirements of Ontario Regulation (O.Reg.) 153/04 made under the Environmental Protection Act, to support the current requirement for a Site Plan Control Application with the City of Ottawa.

The primary objective of this Phase One ESA was to identify any former or current potentially contaminating activities at the Site and within the vicinity to develop a preliminary determination of the likelihood of contamination in soil or groundwater, and to determine the need for a Phase Two ESA. The general objectives were met through the evaluation of the information gathered from the review of records and a site reconnaissance.

Based on the review of records, and Site reconnaissance, no APECs were identified at the Site at the time of this Phase One ESA. Seven PCAs were identified within the study area, but none resulted in APECs on the Site. No further environmental work is recommended at this time.

Report to: Sunbelt Rentals Inc. Project: 101676.001 (October 25, 2024)

1.0 INTRODUCTION

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by Sunbelt Rentals Inc. to carry out a Phase One Environmental Site Assessment (ESA) Update for the properties located at 151 and 159 Wescar Lane in Carp, Ontario (hereafter referred to as the "Site"). GEMTEC completed a previous Phase I ESA for the Site in April 2022 to Canadian Standards Association (CSA) standards for due diligence property financing purposes. It is understood that the Phase I ESA requires an update to meet requirements for accordance to Ontario Regulation (O.Reg.) 153/04 made under the Environmental Protection Act, to support the current need for a Site Plan Control Application. The location of the Site and the extent of the Phase One ESA study area, including the 250 m radius buffer zone, are provided on Figure A.1, Appendix A. The Phase One ESA was conducted by GEMTEC staff members whose qualifications are provided in Appendix B.

The Site has municipal addresses of 151 and 159 Wescar Lane, Ottawa (Carp), Ontario. It is bound to the northeast by Wescar Lane, to the northwest by Cavanmore Road, to the southeast by undeveloped lands and commercial properties, and to the southwest by undeveloped land followed by agricultural fields.

1.1 Phase One ESA Property Information

The legal description for 151 and 159 Wescar Lane in Ottawa (Carp), Ontario are, respectively:

- PCL 31-6, SEC 4M-356; PT BLK 31, PL 4M-356, PTS 16 & 17, 4R10176; S/T LT306284
 WEST CARLETON/HUNTLEY. PIN: 04536-0077; and
- PCL 31-1, SEC 4M-356; PT BLK 31, PL 4M-356, EXCEPT 4R7471 & 4R10176; S/T LT306284 WEST CARLETON/HUNTLEY. PIN: 04536-0078

The two properties comprising the Site are both presently owned by Auscan Development Inc. as of 2019. The contact person for the Site at the time of this reporting is Mr. Mark Watson.

1.1.1 Phase One Study Area Determination

The Site has an area of approximately 4.6 hectares (11.5 acres) and is located at 151 and 159 Wescar Lane in Ottawa (Carp), Ontario. The Site has been historically undeveloped since sometime prior to 1976. A parking lot is present on the Site at 159 Wescar Lane in 2017.

Historical land use in the study area, within 250 meters (m) from the exterior property boundaries, was predominantly agricultural, with rural residential development followed by rural general industrial development beginning sometime between 1976 and 1999. Based on this information, a study area of 250 m surrounding the Site is deemed sufficient for the purpose of this Phase One ESA.

2.0 SCOPE OF THE INVESTIGATION

2.1 General Objectives

The Phase One ESA was conducted in general accordance with O.Reg. 153/04, and current industry standards. The general objectives of the Phase One ESA were:

- To develop a preliminary determination of the likelihood of contamination in soil or groundwater at the Site; and,
- To determine the need for a Phase Two ESA.

The general objectives were met through the evaluation of the information gathered from the review of records and available documents, an interview and a site reconnaissance. Specific objectives for these components and the tasks completed to achieve these objectives are described below.

2.2 Records Review

In order to identify actual or potential sources of contamination within the study area, a review of information from the following sources was conducted:

- Bedrock and Overburden Geology Maps Overburden and bedrock geology maps provided by Natural Resources Canada were reviewed in order to identify the underlying soil deposits and bedrock types.
- Title Abstract A chain of title abstract for the Site was obtained through Environmental Risk Information Services Ltd. (ERIS), the land title search from the historical report was also reviewed and summarized as part of this report. A copy of the Title search is provided in Appendix C.
- ERIS Databases The ERIS report searches 73 public and private information databases to identify potential environmental concerns. An ERIS report was obtained for the Site and a 250-metre-buffer surrounding the Site. A copy of the ERIS Report is provided in Appendix D.
- A records search was requested from the Technical Standards and Safety Authority (TSSA) in February 2022 for the Site and the adjacent. The TSSA search results are provided in Appendix E.
- GeoOttawa and Google Earth Aerial Photographs Aerial photographs of the Site from the years 1976, 1999, 2002, 2011, and 2017 were obtained from GeoOttawa and 2021 from Google Earth. The aerial photographs were reviewed for the Site and study area. The photographs were reviewed to identify areas of potential environmental concern resulting from historical land uses on the Site and surrounding areas. Google Earth and GeoOttawa aerials are not included as part of this report due to copyright limitations.
- Fire Insurance Maps and Reports No fire insurance plans were available for the Site.
- City Directories A City Directory Report was requested from LGI for the Site and surrounding properties within the study area for 1992-2011. Only some of the requested

addresses were in LGI's internal city directory library; therefore, not all properties within 250 metres of the Site's property boundaries could be included as part of the City Directory results due to restrictions related to the COVID pandemic and obtaining records. A copy of the City Directory Reports is provided in Appendix F.

- "Mapping of Federally owned Contaminated Sites" website prepared by Treasury Board of Canada Secretariat was reviewed.
- "Ontario Inventory of PCB Storage Sites" dated January 1992 and prepared by Ontario Ministry of the Environment (Waste Management Branch) was reviewed.
- "Small Landfill Sites List" and "Large landfill sites map" websites prepared by the Ontario Ministry of the Environment, Conservation, and Parks were reviewed.

2.3 Interview

No interview was completed for this Phase One ESA as the Site is currently vacant and undeveloped.

2.4 Site Reconnaissance

The Site was visually assessed to document current conditions and to evaluate the potential for environmental impacts to on-site soil and groundwater. The Site was also inspected to identify if any possible preferential pathways such as underground utilities exist on the Site that may affect the fate, transport and distribution of contaminants. Adjacent and neighbouring properties within the study area were assessed from publicly accessible boundaries to evaluate the potential for environmental impacts to the Site.

Photographs taken to support observations are provided in Appendix G.

3.0 RECORDS REVIEW

3.1 General

3.1.1 First Developed Use Determination

Based on the review of selected historical aerial photographs, the Site was undeveloped from at least 1976 to at least 2017. However, the neighbouring properties at 181 and 173 Wescar Lane exhibit the development of a large parking lot in the 2021 aerial photo.

3.1.2 Fire Insurance Plans

No fire insurance plans were available for the Site.

3.1.3 Historical Reports

As part of the request for proposal, Sunbelt Rentals Inc. and the property owner were asked to provide any additional reports previously completed for the Site; however, no reports were provided for GEMTEC's review.

3.1.4 Environmental Source Records and Databases

3.1.4.1 Chain of Title

A chain of title abstract was obtained through ERIS, and is included in Appendix C. The legal description for 151 and 159 Wescar Lane in Ottawa (Carp), Ontario are respectively:

- PCL 31-6, SEC 4M-356; PT BLK 31, PL 4M-356, PTS 16 & 17, 4R10176; S/T LT306284 WEST CARLETON/HUNTLEY. PIN: 04536-0077; and
- PCL 31-1, SEC 4M-356; PT BLK 31, PL 4M-356, EXCEPT 4R7471 & 4R10176; S/T LT306284 WEST CARLETON/HUNTLEY. PIN: 04536-0078

The highlights of the chain of title search are described below:

- The Site (both properties) was held by the Corporation of the Township of West Carleton from at least 1982 until 2019;
- 151 Wescar Lane: Auscan Development Inc. purchased the Site from Allerex Laboratory Ltd. in July 2019; and
- 159 Wescar Lane: 1055733 Ontario Limited purchased this property from Pro-Tec Ltd in November 1999. Allerex Laboratory Ltd. sold the property to Auscan Development Inc. in July 2019, after which Allerex Laboratory Ltd. subsequently repurchased the property and is the current owner.

No potentially contaminating activities (PCAs) were identified from the review of the title search.

3.1.4.2 ERIS Database Report

GEMTEC contracted ERIS to conduct a search of 73 public and private information databases for the Site and the study area. The search results included records of waste generators, permits to take water, historic fuel storage tanks, The complete ERIS report, including a list of databases searched, is provided in Appendix D. All listings were reviewed, and the highlights are provided in Table 3.1.

Table 3.1: ERIS Report Summary

| Table | Table 3.1: ERIS Report Summary | | | | | | | |
|---------------------------------|------------------------------------|--|---|------------|---|--|--|--|
| Address/ Location | Distance from Site | PCA ID | Company/ Name | Database | Description | | | |
| 162 Wescar Lane | 51 m northeast | N/A | NU-TEK SIGNS INC | GEN | Registered hazardous waste generator of aromatic solvents from 1996 to 2001. | | | |
| 1- 144 Wescar Lane | 58 m north- northeast | N/A | 6920055 Canada Inc. | GEN | Registered hazardous waste generator of pathological wastes in 2007 to 2015, 2018, and 2019. | | | |
| 168 Wescar Lane | Approximately 90 m northeast | 43. Plastics (including Fibreglass) Manufacturing and Processing | Kerr Design Ltd. & Competition Composites Inc. | SCT GEN | Two records list as manufacturer of all other plastic product manufacturing and engineering services, established in 2002. GEN - Ontario Regulation 347 Waste Generators Summary

FSTH – Fuel Storage Tank – Historic

SCT - Scott's Manufacturing Directory

PES - Pesticide Register

EASR - Environmental Activity and Sector Registry

3.2 Regulatory Information

3.2.1 Technical Standards and Safety Authority

The TSSA was contacted on April 17, 2023, to request available records for the Site (151 and 159 Wescar Lane, Carp, Ontario and adjacent properties including 117, 126, 131, 138, 141 and 200 Wescar Lane and 123 Cardevco Rd, Carp, ON.

The response from the TSSA indicated that no records were identified in their database of any fuel storage tanks at the subject addresses for any of the above-noted properties.

A copy of the search requests and the responses from the TSSA are provided in Appendix D.

3.2.2 Mapping of Federally Contaminated Sites

A Government of Canada, Treasury Board of Canada Secretariat, interactive map of contaminated sites was reviewed in April 2023. The database provides an inventory of over 4000 federally owned contaminated sites across the country. The database did not identify any federally owned contaminated sites within the study area.

3.2.3 Ontario Inventory of PCB Storage Sites

The Waste Management Branch of the Ontario Ministry of the Environment, Conservation and Parks (MECP) published an Ontario Inventory of PCB Storage Sites in October 1991. The publication includes information of PCB storage sites collected under O.Reg. 11/82 through MECP district and regional offices. The database did not identify any PCB storage sites within the study area.

3.2.4 Landfills

The Ontario Ministry of Environment, Conservation and Parks published maps entitled "Small Landfill Sites List" and "Large landfill sites map" published March 2014 – Updated October 2021. The publication includes information to identify old landfill sites for potential environmental considerations within the boundary of the province of Ontario. No landfills were identified within the study area.

3.2.4.1 City Directories

A review of the city directories from 1992 to 2011 was completed for the Site and several adjacent properties. All listings were reviewed, and no relevant environmental concerns were identified. In general, the city directories indicated that the surrounding area has been historically occupied by commercial, light industrial and residential land uses since at least 2002. No historical operations of potential environmental concern were identified. A copy of the city directory records is provided in Appendix F.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs were obtained at regular intervals from the GeoOttawa and GoogleEarth databases as publicly available and were selected considering suitable scale for analysis and coverage area. The earliest photograph obtained was from 1976. Observations made with respect to the selected aerial photographs are summarized in Table 3.2. The aerial photographs reviewed include the following years: 1976, 1999, 2002, 2011, 2017 GeoOttawa and 2021.

Table 3.2: Summary of Aerial Photograph Review

| Date | Photograph Number | Observations |
|------------------|----------------------|---|
| 1976 | GeoOttawa | The Site appears undeveloped with agricultural and undeveloped forested area along the north, east, south and west boundary of the Site. |
| 1999 and 2002 | GeoOttawa | The Site remains undeveloped, and more trees are present on 159 Wescar Lane. The land on the opposing side of Wescar Lane to the northeast of the Site becomes commercially developed and the land southwest of the Site becomes residentially developed in the 1999 aerial photo. |

| Date | Photograph Number | Observations |
|------|----------------------|--|
| 2011 | GeoOttawa | Residential development is present southeast of the Site.No significant changes from the 2002 aerial photograph. |
| 2017 | GeoOttawa | A parking lot appears on the northeast portion 159 Wescar Lane with access from Wescar Lane. |
| 2021 | GoogleEarth | Neighboring properties 173 and 181 Wescar Lane become developed with a parking lot in the 2021 photograph. 151 Wescar Lane remains undeveloped and 159 Wescar Lane still has the parking lot from the 2017 aerial photo. |

Based on the aerial photograph review, no PCAs were identified on the Site.

3.3.2 Topography, Hydrology and Geology

The Site is at an elevation of approximately 120 metres above sea level. The surrounding topography is generally flat, sloping slightly downwards towards the northeast.

Surficial and bedrock geology maps of the area indicate that the overburden in the vicinity of the Site generally consists of coarse-textured glaciomarine deposits described as sand, gravel, minor silt and clay marine fine-grained deposits. The thickness of the overburden is approximately 5 m. The bedrock is mapped as limestone, dolostone, shale, arkose, sandstone of the Ottawa Group and Simcoe Group and the Shadow Lake Formation.

Groundwater flow often reflects topographic features and typically flows toward nearby lakes, rivers and wetland areas. The topography of the Site is generally flat but slopes gradually towards the northeast. It is expected that local groundwater flow direction is to the northeast.

3.3.3 Fill Materials

No fill material was identified on the Site.

3.3.4 Water Bodies and Areas of Natural Significance

An unevaluated wetland was identified on the Site (the majority of 151 Wescar Lane and the southeast side of the southern corner of 159 Wescar Lane) according to the Heritage Information Centre (NHIC). However, no areas of natural and scientific interest (ANSIs) were identified on the Site or within the study area. The NHIC has indicated butternut to have been present within 1 kilometre of the Site (MNR, 2014).

3.3.5 Well Records

Well records available through the Ministry of the Environment Conservation and Parks (MECP) for a 350-metre radius from the centre of the Site to try and capture the study area were reviewed as part of the Phase One ESA. A total of 14 wells were identified within the study area

250 metre radius in the ERIS report. The depth to water in the well records ranged from 2.4 meters below ground surface (mbgs) to 21.0 mbgs with an average of 9.0 mbgs.

The recorded stratigraphy in the well records indicated the overburden in the area generally consists of sand, sandy-clay and gravel. Limestone bedrock was encountered at depths ranging from 6.7 mbgs to 50.6 mbgs with an average of 36.0 mbgs.

4.0 INTERVIEWS

No interview was conducted for this Phase One ESA as the Site is currently vacant and undeveloped.

5.0 SITE RECONNAISSANCE

5.1 General Requirements

A Site reconnaissance was carried out on April 11, 2023, from approximately 10:15 am to 11:00 am. The weather at the time of the Site reconnaissance was sunny with melting snow cover and approximately 10 degrees Celsius.

The Site reconnaissance was completed by Ms. Ester Wilson, B.Sc., GIT, of GEMTEC. The Site reconnaissance was carried out to determine if environmental concerns with the Site and/or surrounding property uses could be visually identified.

5.1.1 Site Photographs

Photographs of the Site were taken during the site reconnaissance to document the general condition of the Site and any areas of potential environmental concern. The relevant photographs are presented in Appendix G. A discussion of the photographs is provided in Table 5.1 below.

Table 5.1: Summary of Site Photographs

| Photo Number | Photograph Orientation | Description | | | | |
|-----------------|--|---|--|--|--|--|
| 1 | southeast | Northeastern extent of the Site (151 Wescar Lane) and Wescar Lane | | | | |
| 2 | northwest Northeastern extent of the Site Wescar Lane and neighbouring properties to the northwest (173 and 181 Wescar Lane) | | | | | |
| 3 | southwest | Overview of western portion of 151 Wescar Lane | | | | |
| 4 | southeast | Overview of southern portion of 151 Wescar Lane | | | | |
| 5 | northwest | Overview of 159 Wescar Lane | | | | |
| 6 | N/A | Season spring melt standing water on 159 Wescar Lane | | | | |
| 7 | southeast | West portion of Site look southeast at 159 and 151 Wescar Lane with a berm on the West boundary of the Site | | | | |
| 8 | northeast | Northwest extent of 159 Wescar Lane looking northeast down Cavanmore Road | | | | |

5.1.2 On-Site Observations

The following observations were made during the site reconnaissance:

- The Site was vacant and undeveloped; no buildings were present;
- The ground cover across the Site was entirely clear-cut ground with soil cover and no vegetation;
- A berm was present on the southwest extent of the Site; and
- A pond of standing water (likely from seasonal snow melt) was present on 159 Wescar Lane.

No PCAs were observed on the Site during the Site reconnaissance.

5.2 Specific Observations within the Study Area

5.2.1 Services

Adjacent properties and structures in the study area are serviced with natural gas and overhead hydro. Properties use water wells and septic systems for water and sanitary purposes. It should be noted that at the time of Site reconnaissance no water supply well was observed at the Site.

5.2.2 Water Bodies and Areas of Natural Significance

A local wetland was identified directly on the Site according to the NHIC. However, no areas of natural and scientific interest (ANSIs) were identified on the Site or within the study area. The NHIC has indicated butternut to have been present within 1 kilometre of the Site (MNR, 2014). No wetlands or standing water was observed at the time of the site reconnaissance.

5.2.3 Surrounding Properties

The following general observations were made for the properties surrounding the Site:

- A parking lot and the intersection of Wescar Lane and Cavanmore Road followed by what appears to be residential and agricultural lands present north of the Site;
- Industrial and commercial properties were present east of the Site; and,
- Commercial/light industrial and agricultural and vacant undeveloped land were present south of the Site,
- Residential properties were present to the west of the Site on the other side of Cavamore Road as well as vacant undeveloped forested and agricultural land.

PCAs relating to these off-site industrial/commercial uses within the study area include:

- PCA # 55: Transformer Manufacturing, Processing and Use;
- PCA # 28. Gasoline and Associated Products Storage in Fixed Tanks;

- PCA # 58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners;
- PCA # 10. Commercial Autobody Shops;
- PCA # 43. Plastics (including Fibreglass) Manufacturing and Processing; and
- PCA #40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents)
 Manufacturing, Processing, Bulk Storage and Large-Scale Applications

5.3 Unidentified Substances

No unidentified substances were observed at the time of the Site reconnaissance.

5.4 Odours

No odours were identified at the time of the Site reconnaissance.

5.5 Stained Materials and Stressed Vegetation

No stained or stressed vegetation was observed during the Site reconnaissance; however, most of the vegetation on the Site had undergone clearcutting and no foliage was on the existing trees due to the winter season at the time of the Site reconnaissance.

5.6 Watercourses, Ditches or Standing Water

Drainage ditches were identified along both sides of Wescar Lane and Cavanmore Road. A culvert was observed to be under Wescar Lane near the intersection of Wescar Lane and Cavanmore Road. Standing water in the form of a pond was observed on Site on 159 Wescar Lane.

6.0 REVIEW AND EVALUATION OF INFORMATION

6.1 Potentially Contaminating Activities

Six PCAs were identified within the Phase One ESA Study Area and are summarized in Table 6.1. The PCA locations are shown on Figure A.1, Appendix A.

Table 6.1: Summary of Potentially Contaminating Activities

| Type of PCA | Address/ Location | Description | APEC Rationale |
|---|--|---|---|
| 55. Transformer Manufacturing, Processing and Use at the Site | Along Cavanmore Road approximately 40 metres from the northwest of the Site | Pole mounted transformers were present on the opposing side of the street of the Site on the east side of Wescar Lane and north side of Cavanmore Road. | No Based on no observed evidence of staining and being off Site. |
| 58. Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners | Off-Site along multiple addresses in the Study Area | ERIS Report record of PCA present at near-by address(es) to the Site within the Stud Area | No Based on being down gradient of the anticipated groundwater flow direction and/or distance from the Site. |
| 28. Gasoline and Associated Products Storage in Fixed Tanks | Off-Site along multiple addresses in the study-area | ERIS Report record of PCA present at near-by address(es) to the Site within the Study Area | No Based on being down gradient of the anticipated groundwater flow direction and/or distance from the Site. |
| 10. Commercial Autobody Shops | Off-Site at 132 and 123 Cardevco Rd and 123 Wescar Ln | ERIS Report record of PCA present at near-by address(es) to the Site within the Study Area | No Based on being down gradient of the anticipated groundwater flow direction and/or distance from the Site. |
| 43. Plastics (including Fibreglass) Manufacturing and Processing | Off-Site at 142 Cardevco Rd and 168 Wescar Ln | ERIS Report record of PCA present at near-by address(es) to the Site within the Study Area | No Based on being down gradient of the anticipated groundwater flow direction and/or distance from the Site. |
| 40. Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large- Scale Applications | Off-Site at 145 Cardevco Rd | ERIS Report record of PCA present at near-by address(es) to the Site within the Study Area | No Based on being down gradient of the anticipated groundwater flow direction and/or distance from the Site. |

6.2 Areas of Potential Environmental Concern

The available information was reviewed in a comprehensive manner starting with available historical information, followed by the results of the site reconnaissance. These two components were evaluated using professional experience, judgment, and available documentation to determine PCAs. Available historical records were cross-referenced with other records to verify

their accuracy. The observations from the site reconnaissance and information provided through the interview validated the available historical records for the Site, and vice versa. The PCAs were reviewed in order to identify APECs for the Site.

No APECs were identified on the Site at the time of this Phase One ESA.

6.2.1 Discussion of Uncertainty

There is uncertainty with the Phase One ESA associated with using well record data, and topographic and geology maps from external sources. Information based on these sources may have changed since publishing due to construction, seasonal variations, or other factors.

7.0 CONCLUSIONS AND RECOMMENDATIONS

Based on the review of records, and Site reconnaissance, no APECs were identified at the Site at the time of this Phase One ESA. Six PCAs were identified within the study area, but none resulted in APECs on the Site. No further environmental work is recommended at this time.

9.0 LIMITATIONS OF LIABILITY

This Phase One ESA Update was carried out in general accordance with Ontario Regulation 153/04. The results of this Phase One ESA should in no way be construed as a warranty that the Site is free from any and all contaminants other than those noted in this report, nor that all compliance issues have been addressed.

This report was prepared for the exclusive use of Sunbelt Rentals Inc. and is based on data and information collected during the Phase One ESA of the Site conducted by GEMTEC Consulting Engineers and Scientists Ltd. This report may not be relied upon by any other person or entity without the express written consent of GEMTEC Consulting Engineers and Scientists Limited and Sunbelt Rentals Inc. In evaluating this site, GEMTEC Consulting Engineers and Scientists Limited has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others.

The assessment of environmental conditions and possible site hazards presented has been made using the available historical and technical data collected and provided by others. The conclusions provided herein represent the best judgment of GEMTEC Consulting Engineers and Scientists Ltd. based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the Phase One ESA is sufficient to identify existing and/or potential environmental liabilities that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the Site was carried out as part of this assessment. The Phase One ESA does not include a program of intrusive observation/testing. These activities would be carried out as part of a Phase Two ESA. This environmental assessment included only a cursory overview of the neighbouring land uses from the public right of way and from the Site and does not constitute a complete assessment of the adjacent sites.

10.0 CLOSURE

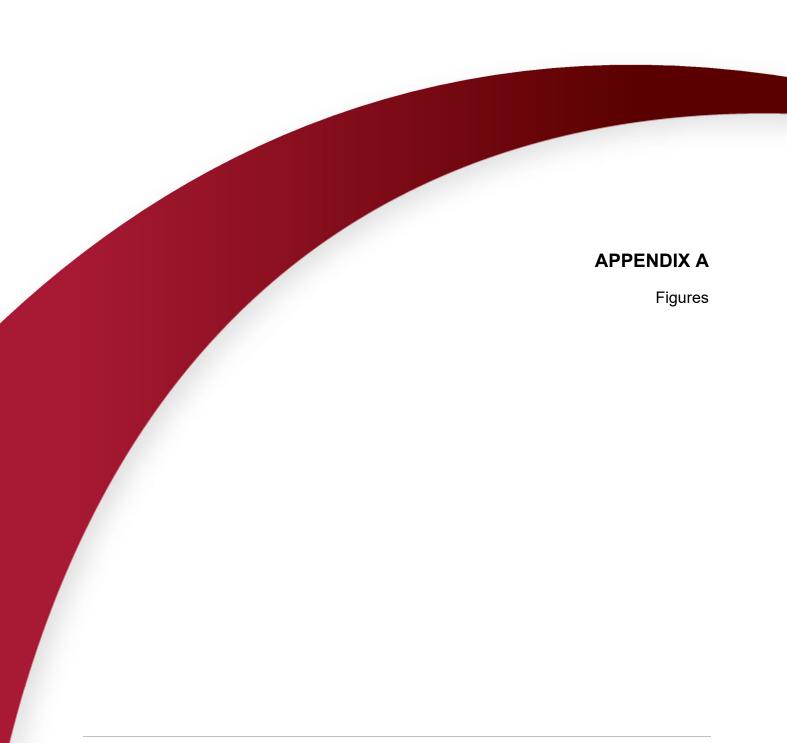

We trust this report provides sufficient information for your present purposes. If you have any questions concerning this report, please do not hesitate to contact our office.

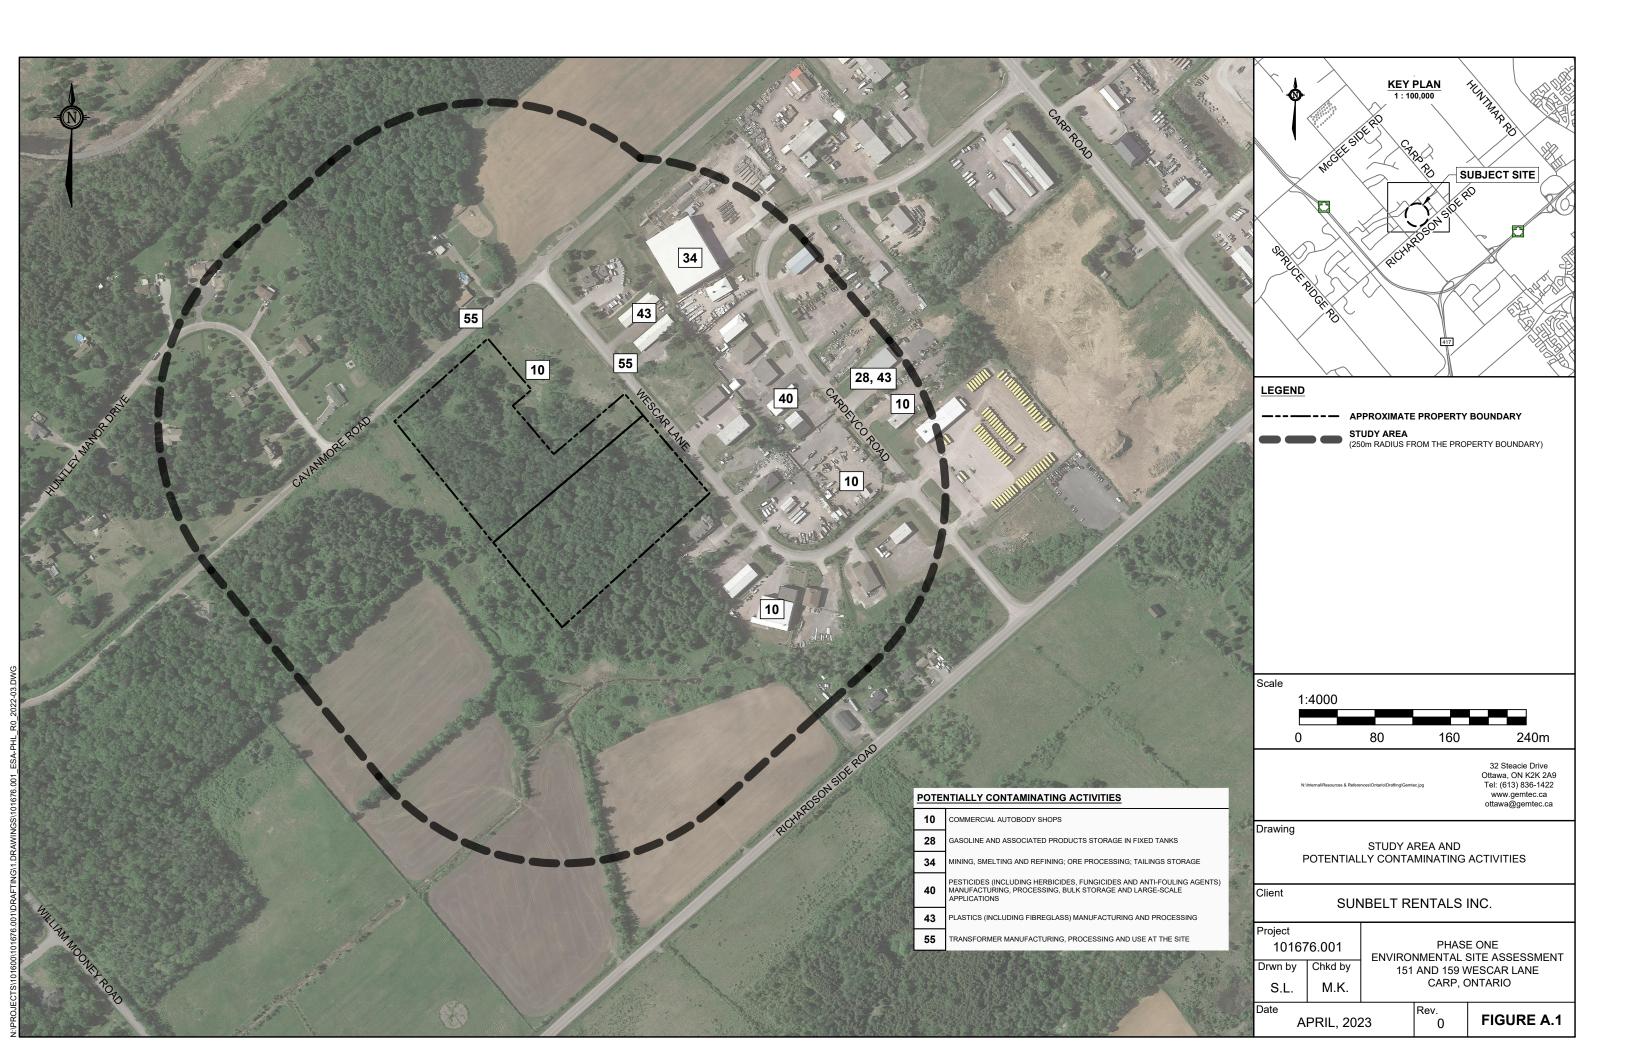

Sincerely,

Regards,

Mike Kosiw, B.Sc., EP, CESA_{II} Senior Environmental Scientist p.p Shaun Pelkey, M.Sc.E., P.Eng. QP_{ESA} Principal, Environmental Engineer DANIEL ELLIOT

QUALIFICATION OF ASSESSORS

Ester Wilson, B.Sc., G.I.T., RESA. – Junior Environmental Scientist

The primary assessor for this Phase One Environmental Site Assessment (ESA) was Ms. Ester Wilson, B.Sc. in Environmental Geoscience, registered geoscientist in training (G.I.T) and registered site assessor (RESA). Ms. Wilson has experience providing environmental services including Phase One and II Environmental Site Assessments, and Excess Soil Management Plans. Her formal education and experience working in environmental consulting have provided her with the knowledge and expertise to identify sources of environmental concern and evaluate their potential to cause adverse environmental impacts.

Mike Kosiw, B.Sc (Hons), EP, CESAII, A.Ag – Senior Environmental Scientist

The Phase One ESA was carried out under the supervision of Mr. Mike Kosiw, B.Sc (Hons), EP, CESAII, A.Ag, Mr. Kosiw has over 12 years of experience in the completion of Phase One and Phase II Environmental Site Assessments (ESAs) in accordance with the CSA Group Standards and Phase One and Two ESAs completed in accordance with O.Reg. 153/04.

Shaun Pelkey, M.Sc., P. Eng. - Senior Engineer / Principal

The QP_{ESA} for this project was Mr. Shaun Pelkey. who has 31 years of applied consulting experience with both private and government clients. Mr. Pelkey is currently the Vice President at GEMTEC and the principal environmental engineer.

Executive Summary: Summary By Data Source

BORE - Borehole

A search of the BORE database, dated 1875-Jul 2018 has found that there are 2 BORE site(s) within approximately 0.25 kilometers of the project property.

| <u>Site</u> | <u>Address</u> | Distance (m) | Map Key |
|-------------|----------------|--------------|-----------|
| | ON | 110.4 | <u>23</u> |
| | ON | 222.1 | <u>60</u> |

CA - Certificates of Approval

A search of the CA database, dated 1985-Oct 30, 2011* has found that there are 8 CA site(s) within approximately 0.25 kilometers of the project property.

| <u>Site</u> | <u>Address</u> | Distance (m) | Map Key |

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Nov 2021

Abandoned Mine Information System:

Provincial

AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private

ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

AUWR

Order No: 22022200416

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Sep 30, 2021

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2019

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

<u>Chemical Register:</u> Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Sep 30, 2021

Compressed Natural Gas Stations:

Private CNC

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial

COAL

Order No: 22022200416

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use:

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Jan 31, 2022

Drill Hole Database:

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021

Environmental Activity and Sector Registry:

Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Jan 31, 2021

Environmental Registry:

Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jan 31, 2022

Environmental Compliance Approval:

Provincial FCA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Jan 31, 2021

Environmental Effects Monitoring:

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2021

Environmental Issues Inventory System:

Federal

EIIS

Order No: 22022200416

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2020

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

ECS.

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Nov 2021

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

Order No: 22022200416

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are

not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Fuel Storage Tank - Historic:

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Nov 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

NC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

MINE

Order No: 22022200416

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2020

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

NEBP

Order No: 22022200416

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal NPRI

Federal

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2021

Ontario Oil and Gas Wells:

Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jan 2021

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Jan 31, 2022

Canadian Pulp and Paper:

Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Order No: 22022200416

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Jan 31, 2021

Provincial PINC Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Jan 31, 2022

Ontario Regulation 347 Waste Receivers Summary:

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2022

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Sep 30, 2021

Scott's Manufacturing Directory:

Private

SCT

Order No: 22022200416

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Sep 2020; Dec 2020-Mar 2021

Wastewater Discharger Registration Database:

sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All

Government Publication Date: 1990-Dec 31, 2019

Private Anderson's Storage Tanks: **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

Provincial

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jan 31, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

WWIS

Order No: 22022200416

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Sep 30, 2021

Definitions

<u>Database Descriptions:</u> This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

<u>Detail Report</u>: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

<u>Distance:</u> The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

<u>Direction</u>: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

<u>Elevation:</u> The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
