Seating capacity: 4  
Weight: 77 lbs.

**KEY FEATURES**

**MATERIAL/FABRICATION**  
Rotationally molded, strong polyethylene construction. Top has an embedded brass fitting which is then bolted to the cruciform base to secure. Flamed, textured finish further strengthens the fire-retardant, water-resistant, UV-stabilized shell. Small drilled holes make it suitable for outdoor use. Anti-microbial material gives high chemical resistance (e.g. ammonia, sodium hydroxide) throughout the product. Item is fully recyclable as polyethylene can be melted down to create a whole new product.

The music panel is an irresistible attraction to young children. Its variation of materials, sounds and cooperative play options keep children coming back again and again to participate in creative play, on their own or with friends and teachers. The music pipes offer sensory variation with a tuned and tonal sound outcome. They train the hand-eye coordination which is crucial to control of movement and e.g. hand writing. The black rubber face can be plinked or pipes beaten and tunes created. This trains the understanding of cause and effect and stimulates explorative, creative play. The tonality of the music panel stimulates logical as well as creative thinking and invites cooperation and social play.
