Executive Summary

Chick-fil-A Canada ULC (Chick-fil-A) retained BlueFrog Environmental Consulting Inc. (BlueFrog) to complete a Phase I Environmental Site Assessment (ESA) at part of 4270 Innes Road, Orleans, Ontario (the Site), currently occupied by a parking lot associated with the adjacent retail commercial property.

The objective of the Phase I ESA was to identify potential site contamination arising from current and/or historical potentially contaminating activities (PCAs) at the Site and/or at neighbouring properties. The Phase I ESA was conducted for due diligence purposes pertaining to property lease and construction of a retail commercial building.

The assessment comprised a review of historical information and environmental database entries pertaining to the Site and neighbouring properties, interviews with Site representative(s) and regulatory personnel where available, a Site visit, and preparation of this report. The ESA was completed in general accordance with Canadian Standards Association (CSA) Group Standard Z768-01 (R2022) - *Phase I Environmental Site Assessment*.

4270 Innes Road is a 6.44-hectare retail commercial property, developed circa 2005 from agricultural land, and occupied by Real Canadian Superstore on the southern portion and Mobil retail fuel outlet on the northwest corner.

The Site is approximately 4400 m², located on the northeast portion of the property and is currently utilized as an asphalt parking surface for the adjacent retail commercial store.

The surrounding area was developed from agricultural land for residential and commercial uses circa 1970.

Environmental Concerns

There were no current or historical on-site PCAs identified likely contribute to Site contamination.

The following current and historical off-site PCAs were identified that may contribute to Site contamination:

1. 4270 Innes Road (adjacent west): a retail fuel outlet has been present since 2005 with petroleum underground storage tanks (USTs) located 20 m west of the Site.

Additional PCAs identified at neighbouring and adjacent properties, including those discussed below, were considered to have a low potential to contribute to contamination at the Site. Our opinion is based on the distance from the Site, activities primarily conducted indoors, absent contaminant pathways, the assumed principal direction of local shallow groundwater flow, and mobility and/or persistence of the associated potential contaminants of concern.

2. 4275 (formerly 4279) Innes Road (50 m north): automotive service, G&G Lalonde Boat Top and Marine Lawn and G&G Lalonde Small Engines.
3. 2040 Lanthier Drive (200 m southeast): automotive service garage.

Conclusions and Recommendations

Based on the review and evaluation of the Phase I ESA information, in our opinion, there is potential for contamination at the Site due to current off-site activities.

A Phase II ESA is recommended to assess contaminants of concern in soil and/or groundwater at the areas of potential Site contamination related to each environmental concern listed above.

This Executive Summary is not intended to be a stand-alone document, but a summary of findings as described in the accompanying Report. It is intended to be used in conjunction with the scope of services and limitations described therein.

1.0 Introduction and Objectives

Chick-fil-A Canada ULC (Chick-fil-A) retained BlueFrog Environmental Consulting Inc. (BlueFrog) to complete a Phase I Environmental Site Assessment (ESA) at part of 4270 Innes Road, Orleans, Ontario (the Site), currently occupied by a parking lot associated with the adjacent retail commercial property.

The objective of the Phase I ESA was to identify potential site contamination arising from current and/or historical potentially contaminating activities (PCAs) at the Site and/or at neighbouring properties. The Phase I ESA was conducted for due diligence purposes pertaining to property lease and construction of a retail commercial building.

This report has been prepared based on fieldwork and/or review of information conducted by BlueFrog, for the sole benefit and use by Chick-fil-A. In performing the work, BlueFrog relied in good faith on information provided by others and assumed that the information provided is both complete and accurate. The work was performed to current industry practice for similar environmental work, within the same regulatory jurisdiction. The findings presented herein should be considered in the context of the scope of work; further, the findings are considered valid only at the time the report was produced. The information presented herein shall not be construed as legal advice.

The conclusions, recommendations, and/or opinions presented in this report are based upon engineering and/or geoscience judgement and experience within the context of the client objectives and the applicable guidelines, regulations, and legislation existing at the time the report was produced.

1.1 Site Description

The Site and regional topographic features are shown on **Figure 1**. Land uses at Site and neighbouring properties are shown on **Figure 2**, Site features are shown on **Figure 3**. Available Site and/or survey plans were requested from the client and are provided in **Appendix A**. Key aspects of the Site were documented by photographs that are provided in **Appendix B**. The Site is described as follows.

Description	4270 Innes Road is a 6.44-hectare retail commercial property, developed circa 2005 from agricultural land, occupied by Real Canadian Superstore on the southern portion and Mobil retail fuel outlet on the northwest corner. The Site is approximately 4400 m ² , located on the northeast portion of the property and is currently utilized as an asphalt parking surface for the adjacent retail commercial stores.
Municipal address	4270 Innes Road, Orleans, Ontario
Property identification number (PIN)	14563-0049 (LT)
Legal Description	PART OF LOT 1, CONCESSION 11, CUMBERLAND, DESIGNATED AS PARTS 4, 5, 6 AND 7 ON PLAN 4R-19914. CITY OF OTTAWA. SUBJECT TO AN EASEMENT IN FAVOUR OF CITY OF OTTAWA OVER PARTS 4 AND 7 ON PLAN 4R-19914 AS IN OC427624. SUBJECT TO AN EASEMENT IN FAVOUR OF THE OWNERS OF PARTS 1, 2 AND 3 ON PLAN 4R-19914 OVERPARTS 2 AND 4 ON 4R-20474 AS IN OC496250. SUBJECT TO AN EASEMENT IN FAVOUR OF THE OWNERS OF PARTS 1, 2 AND 3 ON PLAN 4R-19914 OVER PART 7 ON 4R-20474 AS IN OC496251. TOGETHER WITH AN EASEMENT OVER PARTS 1 AND 3 ON PLAN 4R-20474 AS IN OC496256. S/T AN EASEMENT IN GROSS OVER PARTS 6, 7, 8, 9, 10, 11 & 12 PLAN 4R20726 AS IN OC561855.
Roll Number	06145003013650100000
Zoning	AM[210] – Arterial Mainstreet Zone

2.0 Scope of Work

This Phase I ESA was completed in general accordance with the Canadian Standards Association (CSA) Group Standard Z768-01 (R2022) Phase I Environmental Site Assessment and consisted of the principal activities listed below:

- Review of readily available historical information pertaining to the Site and neighbouring properties, further detailed in Section 3.0;
- Interviews with available persons having knowledge of the Site, as detailed in Section 4.0;
- Site visit to make specific observations at the Site and, from publicly accessible areas, and of the neighbouring properties, as detailed in Section 5.0;
- Review and evaluation of the information, as detailed in Section 6.0; and,
- Preparation of this report documenting the activities, findings, and conclusions of the Phase I ESA.

3.0 Records Review

Records obtained for review included:

- Physical setting sources including aerial photographs, topographic, hydrogeological, and geological information for the Site and neighbouring properties;
- Property use records including: historical fire insurance plans, historical city directory records, and Record of Site Conditions (RSC) filed with the Ontario Ministry of the Environment Conservation and Parks (MECP); and,
- Regulatory information including: a standard EcoLog Environmental Risk Information Service (ERIS) database report, and records provided by Technical Standards & Safety Authority (TSSA).

The search radius applied to the database review of neighbouring properties was 250 m from the centre of the Site.

3.1 Physical Setting

3.1.1 Aerial Photographs

Aerial photographs and/or satellite imagery, reproduced in **Appendix C**, were reviewed to note general features with respect to land uses, structures and improvements, drainage, disturbed soil, and possible evidence of environmental concerns. The scale and attendant resolution of the photographs typically did not permit a detailed study of the Site and neighbouring properties. A summary of the review pertinent to the Phase I ESA information is described as follows.

Year	Site	Neighbouring Properties
1976	Undeveloped and/or agricultural.	Primarily undeveloped and/or agricultural. Innes Road is present adjacent north, residences and/or agricultural-related buildings are present north of Innes Road.
1991	Similar to 1976.	Residential development is present north of Innes Road. Industrial development is present east.

Year	Site	Neighbouring Properties
2005	4270 Innes Road is under development, the property is graded, a large commercial building is present on the southern portion of the property.	Commercial development is present east.
2011	The Site is an asphalt parking area; 4270 Innes Road is paved, a retail fuel outlet is present on the northwest corner of the property the remainder of the property was paved.	Additional commercial development west and east.
2021	Similar to 2011.	Similar to 2011; a hydro transformer station is located southeast of the Site.

3.1.2 Topography, Hydrogeology, and Geology

Information obtained from regional topographic, geological, and soil maps can assist in approximating groundwater flow directions that can influence the migration of possible contaminants in the vicinity of the Site. Maps that were available to be reproduced electronically are included in **Appendix D**. The records reviewed revealed the following topographic, geologic and hydrogeological information:

Elevation	Approximately 90 meters above sea level.
Nearest surface water body	Bilberry Creek, 280 m northeast of Site.
Presence of wetlands	Based on topographic mapping, there were no wetlands present on the Site or neighbouring properties.
Interpreted groundwater flow direction	Based on topographic features, assumed to be northwest, towards Bilberry Creek and Ottawa River. Based on previous environmental reports, the depth to groundwater at the Site ranged from 1.2 to 3.2 mbgs.
Surficial soils	Glaciomarine and marine deposits: silt and clay, basin and quiet water deposits (Ontario Geological Survey, Quaternary Geology). Based on previous environmental reports, the site-specific soil stratigraphy was generally surficial asphalt and crushed stone overlying silty clay with trace sand to the maximum depth of assessment of 6.5 mbgs.
Bedrock	Shale, limestone, dolostone, siltstone; Georgian Bay Formation; Blue Mountain Formation; Billings Formation; Collingwood Member; Eastview Member (Ontario Geological Survey, Bedrock Geology of Ontario). Site-specific bedrock stratigraphy information is unknown.
Fill Material	None identified.
Areas of natural significance	None identified.
Well head protection areas	Located in Rideau Valley Source Protection Area. No groundwater protection noted.
Environmental Concerns	None identified.

3.2 Property Use Records

3.2.1 Fire Insurance Records

The Catalogue of Canadian Fire Insurance Plans 1875-1975 (Dubreuil, L. and Woods, C., 2002) was referenced for availability of fire insurance plans; there were no plans listed for Orleans. Based on the first developed land use (circa 2005), it is not anticipated fire insurance plans would be available for the Site of neighbouring properties.

3.2.2 City Directory Information

City directory information was requested from ERIS for the Site and certain neighbouring properties. A copy of the records is provided in **Appendix E**. Additional information was obtained from previous environmental reports. Pertinent information to the Phase I ESA is as follows:

- The period between 1992 to 2021 was assessed by reviewing directory entries approximately every 5 years in that period.
- Listings for 4270 Innes Road included: not listed in 2001 and prior; multi-tenant retail commercial 2006 to 2021 including Real Canadian Superstore/Loblaws, The Dry Cleaner (depot), Wine Rack, pharmacy, fitness centre, Mobile Ship, HR Block; and Mobil (2021).
- Historical uses of neighbouring properties searched represented commercial and/or industrial uses including:
 - 4290 Innes Road (adjacent east): Swiss Chalet/Harvey's (2017 to 2021).
 - 4275 (formerly 4279) Innes Road (50 m north): G&G Lalonde Boat Top and Marine Lawn and Garden & G Lalonde Small Engines (1992 to 2006); multi-tenant commercial including professional and medical office listings (2017 to 2021).
 - 4289 Innes Road (50 m north): multi-tenant commercial including professional and medical office listings (2021).
 - 2070 Lanthier Drive/2132 Tenth Line Road (390 m southeast), Hydro One electric station.
 - 2040 Lanthier Drive (200 m southeast) Car-On Auto Sales and Lamoureux Auto Centre Inc.

3.2.3 Property Use Registries

A search for RSCs filed with the MECP for the Site and neighbouring properties was conducted on the MECP website. Information pertinent to the Phase I ESA information is as follows:

- No records were found.

3.3 Title Search

A Parcel Register and PIN map was obtained through ERIS and is included in **Appendix E**. Pertinent details are summarized as follows:

- The legal property description is: PART OF LOT 1, CONCESSION 11, CUMBERLAND, DESIGNATED AS PARTS 4, 5, 6 AND 7 ON PLAN 4R-19914. CITY OF OTTAWA. SUBJECT TO AN EASEMENT IN FAVOUR OF CITY OF OTTAWA OVER PARTS 4 AND 7 ON PLAN 4R-19914 AS IN OC427624. SUBJECT TO AN EASEMENT IN FAVOUR OF THE OWNERS OF PARTS 1, 2 AND 3 ON PLAN 4R-19914 OVERPARTS 2 AND 4 ON 4R-20474 AS IN OC496250. SUBJECT TO AN EASEMENT IN FAVOUR OF THE OWNERS OF PARTS 1, 2 AND 3 ON PLAN 4R-19914 OVER PART 7 ON 4R-20474 AS IN OC496251. TOGETHER WITH AN EASEMENT OVER PARTS 1 AND 3 ON PLAN 4R-20474 AS IN OC496256. S/T AN EASEMENT IN GROSS OVER PARTS 6, 7, 8, 9, 10, 11 & 12 PLAN 4R20726 AS IN OC561855.
- The property identification number is: 14563-0049 (LT).
- The Site has been owned by CP REIT ONTARIO PROPERTIES LIMITED since 2013, previously by Loblaws since 2002.
- There were easements registered to the title, including City of Ottawa, RIOTRIN PROPERTIES (ORLEANS) INC., and Hydro One Networks Inc.
- Leases were registered to the title, including Loblaws Inc. and BCP IV Service Station Limited, BCP IV Service Station LP.

3.4 Previous Reports

Previous environmental reports were requested from the client and Site occupant. Information pertinent to the Phase I ESA information is as follows.

Phase I Environmental Site Assessment, Part of 4270 Innes Road, Ottawa, Ontario; prepared by Paterson Group Inc. for Choice Properties Limited Partnership, dated October 25, 2017.

- The assessment was completed for due diligence purposes related to development of the property.
- 4270 Innes Road was developed from agricultural land in 2005 with a commercial building occupied by a retail grocery store having a dry-cleaner depot, and a retail fuel outlet. No historical PCAs were identified on the property.
- The surrounding area was developed from agricultural land for residential and commercial uses circa 1970.
- A subsurface investigation was completed in 2017 for geotechnical and environmental purposes. Five boreholes were advanced to a maximum depth of 6.5 mbgs and three groundwater monitoring wells were installed.
- Stratigraphy encountered was generally surficial asphalt and crushed stone overlying silty clay with trace sand. The depth to groundwater ranged from 1.2 to 3.2 mbgs.
- Soil and groundwater samples were submitted for laboratory analysis of benzene, toluene, ethylbenzene, and xylenes (BTEX) and petroleum hydrocarbons (PHC); analytical were non-detect and met the applicable regulatory Table 2 (potable) standards.

3.5 Company Records

Company records were requested from the Site occupant; the following company records were available for review:

- Site Plans (Appendix A).
- Provincial permit records were reviewed in the regulatory searches discussed in Section 3.6.
- Previous environmental and geotechnical reports (Section 3.4)
- No other records (i.e. spill reports, tank inventory, waste management documents) were available or pertinent based on the use of the property (shipping/receiving).

3.6 Regulatory Information

3.6.1 TSSA

The TSSA was contacted to provide records from the Fuels Safety Program. Correspondence is included in **Appendix E** and summarized as follows:

- There were no fuel storage tank records for the property.

3.6.2 Databases

An ERIS EcoLog Database Report was obtained that summarizes entries pertaining to the Site and neighbouring properties in the context of regulatory and other information from provincial, federal, and private databases. The EcoLog Database Report, including a description of the databases searched and records found, is provided in **Appendix E**. Pertinent details are summarized below:

4270 Innes Road:

- GC Project, Inc. received an approval for air emissions related to natural gas-fired generator in 2017.
- The following spills were reported: 60 L of hydraulic oil to parking lot and catch basin in 2007 and 10 L of hydraulic oil to ground in 2017 by Loblaw's; 60 L of hydraulic oil to asphalt at construction Site by Regional Crane Rentals in 2011, 20 L of oil additives to ground by Watsons Building Supplies in 2013; and 20 L of gasoline to ground in 2016 by Re-Fuel Loblaw's.
- BCP IV SERVICE STATION LP O/A BG FUELS was a self-serve gasoline station with one gasoline and one diesel underground storage tank (UST) installed in 2005.

Neighbouring Properties:

- 4300 Innes Road (10 m east) Loblaw Properties Limited received approvals for sewage works drinking systems in 2005.
- 4240 Innes Road (100 m west) Casa Luna Furniture was a furniture manufacturer and/or distributor.
- 309 Du Grand Bois (200 m northeast) 160 L of transformer oil spilled to the ground in 2006.
- Additional records identified other activities identified at neighbouring properties did not represent PCAs including: hazardous waste generation associated medical clinics, contractors, limited vendors of pesticides, retail commercial grocer; spills of natural gas and freon to air.

Activities identified at neighbouring properties were not considered to have contributed to potential contamination at the Site. Our opinion is based on the distance from the Site, absent contaminant

pathways, the assumed principal direction of local shallow groundwater flow, and mobility and/or persistence of the associated potential contaminants of concern.

4.0 Interviews

An interview was conducted with Stefania Sottile Director of Environmental and Occupational Health & Safety of Choice Properties REIT. Pertinent information obtained from the interview is as follows:

- The Site is a parking lot that is used for the grocery store and gas bar located on the property.
- The property has a building and gas bar which were constructed in 2005 and include a two-storey grocery store and gas bar kiosk, which are heated by natural gas and are serviced by municipal water and wastewater.
- Petroleum underground storage tanks (USTs) are located at the gas bar.

5.0 Site Visit

A visual survey of the Site was completed by BlueFrog. Neighbouring properties were observed from publicly accessible sidewalks and roadways. Preliminary information obtained from the records review was considered prior to conducting the Site visit. Photographs showing various areas of the Site and neighbouring properties including written descriptions for each are provided in **Appendix B**. Site visit details are as follows.

Date	May 10, 2023
Site description and use	4270 Innes Road is a 6.44-hectare retail commercial property occupied by Real Canadian Superstore on the southern portion and Mobil retail fuel outlet on the northwest corner. The Site is approximately 4400 m ² , located on the northeast portion and is utilized as an asphalt parking surface for the adjacent retail commercial stores.
Evidence of past use	None observed.
Limitations	No limitations were observed or experienced during the Site visit.

5.1 Surface Features

Observations of the surface features at the Site are summarized as follows.

Ground cover	The Site is approximately 4400 m ² , located on the northeast portion and is principally impermeable (asphalt) surface with landscaped areas along the norther boundary.
Wells	Based on previous environmental reports, two groundwater monitoring wells were installed near the western boundary. One monitoring (BH4) was observed near the west boundary of the Site; BH5 was not located and presumed to be destroyed.
Railways	None observed or reported by the Site Representative.
Stains	None observed or reported by the Site Representative.
Stressed vegetation	None observed or reported by the Site Representative.
Fill material and debris	None observed or reported by the Site Representative.

Pits and lagoons	None observed or reported by the Site Representative.
Water courses, wetlands, ditches or standing water	None observed or reported by the Site Representative.
Parking facilities	The Site is used for surface parking for vehicles.
Right of ways	None observed or reported by the Site Representative.
Indications of contamination	None observed or reported by the Site Representative.

5.2 Buildings and Structures

Observations of the buildings and structures at the Site are summarized as follows.

General description	There were no buildings located on-site.
Heating and cooling systems	None observed or reported by the Site Representative.
Stains and corrosion	None observed or reported by the Site Representative.
Drains and sumps	None observed or reported by the Site Representative.
Hydraulic equipment and elevators	None observed or reported by the Site Representative.
Emergency generators	None observed or reported by the Site Representative.
Exit and entry points	None observed or reported by the Site Representative.

5.3 Storage Tanks, Hazardous Materials, Waste

Observations pertaining to storage tanks, containers, hazardous materials and waste are as follows.

Aboveground storage tanks / fill and vent pipes	None observed or reported by the Site Representative.
Belowground storage tanks / fill and vent pipes	None observed or reported by the Site Representative.
Chemicals and hazardous materials	None observed or reported by the Site Representative.
Unidentified substances	None observed or reported by the Site Representative.
Hazardous wastes	None observed or reported by the Site Representative.
Non-hazardous wastes	None observed or reported by the Site Representative.
Drums, totes and/or pails	None observed or reported by the Site Representative.

5.4 Site Operations

Observations pertaining to specific site operations follows.

Industrial operations, processing, manufacturing	The Site was utilized for parking associated with adjacent retail commercial uses.
Vehicle and equipment maintenance areas	None observed or reported by the Site Representative.
Inground hydraulic lift equipment	None observed or reported by the Site Representative.
Oil-water separators	None observed or reported by the Site Representative.
Raw materials	None observed or reported by the Site Representative.
By-products and wastes	None observed or reported by the Site Representative.
Spills	None observed or reported by the Site Representative.
Liquid discharge points	None observed or reported by the Site Representative.

5.5 Utilities

Observations of the utilities at the area of the Site are summarized as follows.

Wastewater	Municipal sanitary system. There was no evidence of septic tank, septic field, sewage treatment, oil-water separator and none were reported by Site Representative.
Water	Municipal potable water system. No other sources observed or reported by Site Representative.
Stormwater	Drainage, by overland flow to catch basins located south of the Site, on 4270 Innes Road on-site. Drainage is generally from north to south.
Electricity	Yes; overhead.
Natural Gas	Yes.

5.6 Special Attention Items

Observations made pertaining to special attention items at the Site are as follows.

Asbestos-containing materials (ACMs)	None observed or reported by Site Representative.
Polychlorinated biphenyls (PCBs)	None observed or reported by Site Representative.
Lead-based materials	None observed or reported by Site Representative.
Urea formaldehyde foam insulation (UFFI)	None observed or reported by Site Representative.
Ozone-depleting substances (ODSs)	None observed or reported by Site Representative.
Microbial contamination (mould)	None observed or reported by Site Representative.
Noise and vibration	None observed or reported by Site Representative.
Odours	None observed or reported by Site Representative.

Radon	Assessment and concentration of indoor radon is unknown. According to Health Canada (March 2012), 6.2 % of homes tested in the Ottawa Regional Health Unit found to have radon concentrations greater than 200 Bq/m ³ .
--------------	--

5.7 Neighbouring Properties

Neighbouring properties were observed during the Site visit from publicly accessible locations. Current uses of properties adjacent to the Site are presented on **Figure 2**. Observations made pertaining to the neighbouring properties are as follows.

Primary land uses and evidence of environmental concerns	The Site is located in a primarily commercial and residential area; the following PCAs were observed: - Mobil retail fuel outlet (adjacent west).
Waterbodies	None observed.
Areas of natural significance	None observed.

6.0 Summary of Findings

4270 Innes Road is a 6.44-hectare retail commercial property, developed circa 2005 from agricultural land, and occupied by Real Canadian Superstore on the southern portion and Mobil retail fuel outlet on the northwest corner.

The Site is approximately 4400 m², located on the northeast portion of the property and is currently utilized as an asphalt parking surface for the adjacent retail commercial store.

The surrounding area was developed from agricultural land for residential and commercial uses circa 1970.

6.1 Environmental Concerns

There were no current or historical on-site PCAs identified likely contribute to Site contamination

The following current and historical off-site PCAs were identified that may contribute to Site contamination:

1. 4270 Innes Road (adjacent west): a retail fuel outlet has been present since 2005 with USTs and product lines present within 20 m of the Site.

Additional PCAs identified at neighbouring and adjacent properties, including those discussed below, were considered to have a low potential to contribute to contamination at the Site. Our opinion is based on the distance from the Site, activities primarily conducted indoors, absent contaminant pathways, the assumed principal direction of local shallow groundwater flow, and mobility and/or persistence of the associated potential contaminants of concern.

2. 4275 (formerly 4279) Innes Road (50 m north): automotive service, G&G Lalonde Boat Top and Marine Lawn and G&G Lalonde Small Engines.
3. 2040 Lanthier Drive (200 m southeast): automotive service garage.

7.0 Conclusions and Recommendations

Based on the review and evaluation of the Phase I ESA information, in our opinion, there is potential for contamination at the Site due to current off-site activities.

A Phase II ESA is recommended to assess contaminants of concern in soil and/or groundwater at the areas of potential Site contamination related to each environmental concern listed above.

8.0 Closure

We trust that this information meets your present needs. Statements of qualifications for the undersigned are available on request. Please do not hesitate to contact us if you have any questions or comments.

RE: CITY DIRECTORY RESEARCH
4270 Innes Road
Orléans, ON K4A 5E6

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

4270 of Innes Road
4290 of Innes Road
4297 of Innes Road
4275 of Innes Road
4289 of Innes Road
4300 of Innes Road

Search Notes:

Orleans, Ontario is listed until 1992.

Subject: RE: PUBLIC RECORD SEARCH - 4270 INNES ROAD, ORLEANS - 0208-001.01

Follow Up Flag: Follow up
Flag Status: Completed

Hello,

RECORD FOUND IN CURRENT DATABASE

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are records in our database of any **fuel storage tanks** at the subject address(es).

Inventory Number	Address	City	Province	Postal Code	Status	Asset Type / Inventory Item
48369015	4270 INNES RD	OTTAWA	ON	K4A 5E6	Active	FS CYLINDER EXCHANGE

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click [Release of Public Information - TSSA](#) - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue;
 - a. When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at publicinformationsservices@tssa.org.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: 4270 Innes Road, Orleans
4270 Innes Road Orléans ON K4A 5E6

Project No: 0208-001.01

Coordinates:

Latitude: 45.4579972
Longitude: -75.4957438
UTM Northing: 5,033,949.65
UTM Easting: 461,240.34
UTM Zone: 18T

Elevation: 279 FT
85.14 M

Order Information:

Order No: 23050700007
Date Requested: May 7, 2023
Requested by: Blue Frog Consulting
Report Type: Standard Express Report

Historical/Products:

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Oct 2022

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Mar 2022

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Feb 28, 2022

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2021

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Feb 28, 2023

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Feb 2023

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Feb 2023

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Mar 31, 2023

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Oct 2022

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Feb 28, 2022

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Mar 31, 2023

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Mar 31, 2023

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Mar 31, 2023

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Dec 31, 2022

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2021

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2023

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2023

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2021

National Defense & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal [NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal [NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal [NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2022

Ontario Oil and Gas Wells:

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites:

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Mar 31, 2023

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Mar 31, 2023

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Mar 31, 2023

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2020

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2023

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Feb 28, 2023

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

Government Publication Date: 1988-Mar 2021; May 2021-Oct 2021

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2020

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2020

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Mar 31, 2023

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30 2022

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
