**Re: File No.: PC2023-0153 – Tree Conservation Report
Hydrovac Slurry Recycling Facility at 1850 Bantree Street**

To Whom it may concern;

I am writing on behalf of Harbour Environmental Group regarding the Tree Conservation Report for Site Plan Control Application (File No.: PC2023-0153).

The development site is limited to strictly a portion of 1850 Bantree Street, and does not include any of 1184 Innes Road. Tree cover will be maintained through the use of the ~8.0 m buffer provided by 1184 Innes Rd between the trees identified on the western boundary of 1890 Bantree Street and Harbour's leased boundaries of 1850 Bantree Street.

We hope that this is sufficient for the requirements of this report as a safe buffer has been placed around all trees, and that we can avoid a costly report stating the same.

If you believe that a report from an engineering firm is required for this Tree Conservation Report, we can request this from LEA consultants and have it completed reasonably quickly (within a week). Furthermore, I hope that the submission of the report does not have to stop the review of the rest of this application package.

Thank you for your consideration. Please let me know.

Sincerely,

Sean Yaehne
