## 1.0 EXECUTIVE SUMMARY

WSP Canada Ltd. (formerly Golder Associates Ltd. at the time of the investigation), hereafter referred to as WSP, was retained by Canada Lands Company CLC Limited (CLC) to conduct a Phase One Environmental Site Assessment (Phase One ESA) of the property located on the northwest portion of the former Canadian Forces Base (CFB) Rockcliffe, in Ottawa, Ontario (the “Phase One Property”). The location of the Phase One Property is provided in Figure 1.

At the time of the site reconnaissance, conducted on June 10, 2022, the Phase One Property consisted of a 4.89-hectare parcel of vacant land that consisted of a few old, paved roadways associated with the former CFB Rockcliffe military base. It is understood that the Phase One Property is to be redeveloped as a residential subdivision. The Phase One Property is owned by Canada Lands Company Ltd.

The Phase One ESA was completed in accordance with O.Reg. 153/04 and included a review of available current and historical information, a site visit, an interview, evaluation of readily available information, and reporting, subject to the limitations outlined in Section 9.0 of this report. The Phase One Property is not considered an enhanced investigation property as defined by O.Reg. 153/04.

## 2.0 INTRODUCTION

### 2.1 Phase One Property Information

WSP was retained by Canada Lands Company CLC Limited (CLC) to conduct a Phase One Environmental Site Assessment (Phase One ESA) of the following property:

<b>Municipal Address</b>	Part of 1076 Hemlock Private, Ottawa, Ontario (formerly part of 335 St. Laurent Boulevard)
<b>Property Identification Number</b>	Part of PIN 04273-1205 (LT)
<b>Legal Description</b>	Part of Lots 23 and 24, Concession 1 (Ottawa Front), Geographic Township of Gloucester, City of Ottawa

The Site Plan and location of the Phase One Property is provided in Figure 1. A plan of survey for the Phase One Property is provided in Appendix A.

The contact information for the Phase One Property owner is:

Owner / Client	Address	Contact Information
Canada Lands Company CLC Limited	100 Queen Street, Suite 1050 Ottawa, ON K1P 1J9	Katherine Constantine Office: (613) 564-3017 Email: kconstantine@clc.ca

## 3.0 SCOPE OF INVESTIGATION

A Phase One ESA is a preliminary qualitative assessment of the environmental condition of a property, based on a review of current activities and historical information for the Phase One Property and a review of relevant and readily available environmental information for the surrounding properties located within a 250 metre (“m”) radius of the boundary of the Phase One Property (collectively referred to as the “Phase One Study Area”). The boundary of the Phase One Study Area is presented in Figure 1.

According to Ontario Regulation (O.Reg.) 153/04 *Records of Site Condition*, the objectives of a Phase One ESA are to:

- 1) Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property.
- 2) Determine the need for a Phase Two Environment Site Assessment (ESA).
- 3) Provide a basis for carrying out a Phase Two ESA.
- 4) Provide adequate preliminary information about environmental conditions in the land or water on, in or under the Site for the conduct of a risk assessment following completion of a Phase Two ESA.
- 5) Identify and report on evidence of actual and/or potential contamination on the Phase One Property from current and historical activities at the Phase One Property or the surrounding area.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **4.1.1 Phase One Study Area Determination**

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Phase One Property. Based on WSP's review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the site visit, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA.

#### **4.1.2 First Developed Use Determination**

The date of first developed use of the Phase One Property was determined based on review of the previous environmental reports, aerial photographs, and information provided by the Site Representative. The Phase One Property was part of a former military base (CFB Rockcliffe) which was developed on a larger parcel of land than the Site and included the lands to the north, west and south of the Site. Prior to which it was undeveloped land. The military base was initially developed in 1937 with the first buildings present on the Phase One Property by 1945. As such the first development use on the Phase One Property was determined to be 1937.

#### **4.1.3 Fire Insurance Plans**

WSP conducted a search of available Fire Insurance Plans (FIPs) for the Phase One Property and the surrounding properties within the Phase One Study Area. FIPs were not available for the Phase One Property or the Phase One Study Area.

#### 4.1.4 Chain of Title

Chain of title information for the Phase One Property was obtained from ERIS as part of the 2015 Phase One ESA. Previous owners of the Phase One Property have included:

Date Acquired	Registered Owners
May 17, 1802	Richard Wragg
September 27, 1806	John Platt
March 13, 1828	Eleanor Abrams
August 21, 1841	John (Jean) Barreille
September 11, 1841	John Carson
September 10, 1845	Henry Williams
November 24, 1852	George Codd and Henry Codd
July 25, 1860	Paul Glasford
October 21, 1865	James Kelly
December 23, 1873	Richard Gavin
July 12, 1875	Estate of Henry Codd (Now devised to his Daughter)
February 15, 1877	James A. Snow
January 22, 1885	Henry Atwill
May 12, 1886	Thomas Cundell
October 22, 1890	Charles Snow
November 03, 1897	Peter Foisy
August 29, 1898	Her Majesty The Queen
September 12, 1898	Ferdinand Dupuis
August 18, 1899	Her Majesty The Queen
December 05, 1900	Pierre Foisy
December 07, 1900	Bruno Robillard
April 15, 1901	Laurentian Stone Company
January 26, 1906	His Majesty The King in Right of Canada
January 20, 1926	Bruno Robillard
May 26, 1937	His Majesty The King in Right of Canada
August 04, 1950	His Majesty The King (Canada) as represented by The Department of National Defence
March 16, 2011	Her Majesty The Queen in Right of Canada
March 28, 2011	Canada Lands Company CLC Limited

### 4.1.5 City Directories

WSP reviewed the historical city directories that were obtained as part of the 2015 Phase One ESA. The records were available for the years 1954 to 2010. No development occurred on the Site since 2015 and the previous Phase One ESA information remains reliable.

#### *Phase One Property*

- There were no listings for the Phase One Property in the city directories.

#### *Surrounding Area*

- No noteworthy records for the surrounding properties in the Phase One Study Area were available.

Based on the review of the city directories, no potential contaminating activities were identified within the Phase One Study Area.

### 4.1.6 Environmental Reports

The following environmental reports related to the Site were provided to WSP and consulted to develop an understanding of the environmental conditions at the Site and surrounding properties.

- “DST 2004 Steam Line Decommissioning and Remediation Plan”. CFB Rockcliffe Underground Steam Line Decommissioning and Site Remediation Plan. Prepared by DST Consulting Engineers, dated December 2004.
- “DST 2015 Phase One ESA”. Phase One Environmental Site Assessment, Former CFB Rockcliffe, Ottawa, Ontario. Prepared by DST Consulting Engineers for Canada Lands Company CLC Limited, dated May 2015.
- “DST 2015 Phase Two ESA”. Phase Two Environmental Site Assessment Update, Former CFB Rockcliffe, Ottawa, Ontario. Prepared by DST Consulting Engineers for Canada Lands Company CLC Limited, dated May 2015.
- “DST 2016 Environmental Status Summary Letter.” Environmental Status Summary Letter, May 2105, Soil and Groundwater Remediation, Former CFB Rockcliffe, Ottawa, Ontario. Prepared by DST Consulting Engineers for the City of Ottawa, dated May 11, 2016.
- “DST 2017 Soil and Groundwater Remediation Volume 1”. Soil and Groundwater Remediation Volume 1, Former CFB Rockcliffe, Ottawa, Ontario. Prepared by DST Consulting Engineers for Canada Lands Company CLC Limited, dated September 2017.
- “Dillon 2019 Environmental Impact Statement”. Wateridge Village Phase 2A and 2B, Environmental Impact Statement. Prepared by Dillon Consulting for Canada Lands Company, dated February 2019

#### **4.1.6.1 DST 2004 Steam Line Decommissioning and Remediation Plan (figure)**

This figure outlines the location of the steam distribution line throughout the base that was used to distribute steam heating from the central heating plant. It appears that no portion of this former steam line was located on the RSC Property. The steam line was located north (north of former buildings 69, 70 and 71), east and west of the northern portion of the Phase One Property.

The 2009 Phase II ESA makes a reference to testing completed from the fill along the steam line during its removal. In total there were nine samples of the twenty-five collected that were documented to exceed the

provincial standards at that time and an additional three exceeding federal criteria. The parameters noted as exceedances are metals, PAHs, and PHCs. No details on the location of the exceedances were provided and as such the fill through which the steam line passes is considered to be a PCA. This off-Site PCA is not considered to have resulted in an APEC to the Phase One Property. In addition, this off-Site PCA is not considered separately given that unknown quality of fill materials present across the Phase One Property is considered a PCA that results in an APEC (discussed further in section 7.2 and 7.3).

#### **4.1.6.2 DST 2015 Phase One ESA**

This investigation was completed for the entire CFB Rockcliffe area including the Phase One Property. In total the Phase One ESA identified twenty-three (23) APECs on the former base lands and two areas of concern associated with the off-site land uses for the Montfort Hospital and the National Research Council. The Montfort Hospital is outside the current Phase One Study Area. The report indicates the property was first developed as a military base in 1937 and was previously owned by individual owners as either vacant land or part of larger farmsteads. A series of buildings were present at the CFB Rockcliffe throughout the operation of the base until being decommissioned and demolished prior to the completion of the Phase One ESA.

The following identified APECs are relevant to the Phase One Property:

- Petroleum hydrocarbon related soil and groundwater impacts, associated with two former fuel storage tanks (one below and one above ground tank), at the former swimming pool at building 137. This building was located adjacent north of the central portion of the Site and demolished in 1997.
- Petroleum hydrocarbon impacts in fill at the former transmission tower at Building 126 (located on the northeast portion of the Site).
- Identified metals impacts in fill on the northwest portion of the Phase One Property (test pit TP31 located north of building 71).
- The report identified several off-Site PCAs within the Study Area including poor quality fill to the south and west, and fuel storage tank at former Building 134. All off these off-site PCAs were subsequently remediated and validated except for Building 134 to the west, and are therefore not considered to result in APECs to the Phase One Property. Building 134 is 60 metres cross gradient to the Phase One Property and the contamination was documented to be limited in extent and therefore is not considered to represent an APEC to the Phase One Property.

#### **4.1.6.3 DST 2015 Phase Two ESA**

The above report provides an updated summary of the Phase II ESA completed in 2004 and 2007 and presented in the report entitled “Phase II Environmental Site Assessment, Lands Associated with the Remediation of Various Building Sites at Canadian Forces Base Rockcliffe. Prepared by DST Consulting Engineers for Canada Lands Company and Public Works and Government Services, dated April 2009”. As the report does not introduce any significant new data and is a repackaging of the previous report including a comparison to the current MECP standards, only the 2015 report is discussed.

The report presents the findings of a Phase II ESA completed in 2009 for the entire CFB Rockcliffe property, much of which is carried over from a 2004 investigation, which included 26 boreholes/monitoring and 73 test pits. The 2015 update included the addition of four groundwater samples from existing monitoring wells and the

installation and sampling of one new monitoring well. As such, only relevant information to the Phase One Property has been summarized below.

The 2015 Phase Two ESA documents the findings of nineteen (19) test pits in the vicinity to buildings 11 (adjacent east of the Site), 71 (located on the northern portion of the Site), 69 (located northeast of the Site), 137 (adjacent north of the central portion of the Site), and 126 (located on the eastern portion of the Site), and included four borehole/monitoring wells. Of these investigation locations soil at eleven (11) of the locations reported exceedances. Zinc at TP31 in the shallow soil near building 71, PHCs and PAHs in shallow soils at TP126-1, TP61 and TP62 near building 126 and PHCs and PAHs in seven locations around building 137 (located adjacent north of the central portion of the RSC Property) extending up to 3.2 metres in depth. The impacts at building 137 are reported to be associated with a former gasoline UST and AST at the former indoor pool at this location. The impacts at the other areas are not associated with any specific PCA and are attributed to poor quality fill resulting from building demolition and filling and were limited to the upper 1.3 metres of soil.

Groundwater from monitoring well BHMW-15 at building 137 (located off-Site) contained PHCs above the current standards, with the remaining monitoring wells meeting criteria. As such due to its proximity, this exceedance is an off-Site PCA that is considered and APEC for the Site.

#### **4.1.6.4 DST 2016 Environmental Status Summary Letter**

This document is a summary letter for the City of Ottawa on the status of the remediation works at the larger CFB Rockcliffe site and includes a summary of a post remediation groundwater sampling program. The letter states that a total of 62,000 m<sup>3</sup> of impacted soil and 2,300 m<sup>3</sup> of impacted groundwater was removed from different areas of the military base, as of February 5, 2015. The letter indicates that there were two rounds of groundwater sampling completed across the base from all of the wells between March and August of 2015. Although the letter does not list the wells that were sampled it is assumed that the wells shown on the figure are the wells that were included in the program. An additional two rounds of groundwater sampling following additional groundwater remediation was completed at three off-Site locations (Buildings 29, 80 and 137). The information specific to the Phase One Property is as follows.

The impacts identified at building 137, building 126/11 and TP31 were shown as having been remediated with the groundwater at building 137 shown as having ongoing remediation. Monitoring wells are present in each remediation area. Building 137 was shown to have elevated PHC (380 ug/L) in monitoring well 137-2 which resulted in additional groundwater remediation via pump and treat. Resampling completed 30 days after the additional remediation at this location was below the standards. Due its proximity, the exceedance associated with former Building 137 is an off-Site PCA that is considered to result in an APEC for the Site. The other remediations at building 126 and TP31, although remediated, were part of the overall APEC associated with fill across the Study Area.

#### **4.1.6.5 DST 2017 Soil and Groundwater Remediation Volume 1**

This report documented the remediation completed for five APECs identified in the former RSC area 1, which includes current development Phases 3, 4 and 5. These include the remediation of former building 47 (former heating oil AST) southwest of the Phase One Property, former building 126 (hydrocarbon staining in the fill at a former transmitter building located on-Site), 137 (former AST and UST associated with the former swimming pool, north of the central part of the Phase One Property) and a test pit TP31 (metals impacts in fill at the northern property limit). Each area was remediated except for the groundwater at former building 137. Although having been remediated, the fill at building 126 and TP31, are considered as having been part of the fill PCA which is

present across the Phase One Study Area.. As such, following a review of this report, fill across the Phase One Property and the potential impact to groundwater due to former AST and UST associated with the former swimming pool in former Building 137 (discussed in section 7.2 and 7.3) are the two APECs identified in this report.

#### **4.1.6.6 *Dillon 2019 Environmental Impact Statement***

This report was prepared for the planning approvals process of the Site and included surveys for endangered and threatened species at the Site (SAR), including targeted surveys for select species. The findings of the assessment indicated there were SAR on the CFB Rockcliffe property, mainly in the north of the Site including the woodlands adjacent to the north property boundary. These included Category 2 retainable Butternut trees along the north boundary of the CFB Rockcliffe property and in the northwest part of the base property. There was also documented SAR bats present in the woodlots on and north of the base property. Some of these woodlots border the Phase One Property to the east and north. Summary of Review of Environmental Reports

Based on a review of the previous reports the following PCAs were identified on the Phase One Property.

- Importation of Fill of Unknown Quality: The site is documented as having fill present on the Phase One Property, mostly focused around the area where former buildings were present (southern portion and northwest corner of the Site,). Three fill remediations were known to have occurred on the Phase One Property, two at former building 126 in the west part of the Phase One Property, one at TP31, north of former building 71 in the north of the Phase One Property.
- Storage of Gasoline and Associated Products in Fixed Tanks: Three off-Site locations containing fuel storage tanks were documented in the Phase One Study Area, however only one location was considered as being close enough to the Phase One Property to be carried as an APEC. This location is the fuel storage associated with the former swimming pool building 137, north of the central portion of the Site. Although soil and groundwater was remediated at this location, some residual groundwater remained present in the bedrock which has the potential to migrate and impact the Site and was carried as an APEC to the Phase One Property.

## **4.2 Environmental Source Information**

### **4.2.1 ERIS Report**

ERIS was contracted, as part of the DST 2015 Phase One ESA, to conduct a search of environmental sources, including federal, provincial and private sector databases, for information on the entire military base which includes the Site and the Phase I Study Area. Given that the Phase One Property has remained vacant and unused since 2015, no new ERIS report was obtained and the ERIS report from DST 2015 Phase One ESA is considered reliable. The search included a total of 62 databases; however, only relevant noteworthy records associated with the Site are discussed below. The ERIS report is provided in Appendix C.

#### ***On-Site***

Noteworthy records for the Phase One Property include the following:

- Borehole (BORE) – There are seven borehole listings within the Phase One Study Area. The boreholes generally encountered fill consisting of sand, gravel and silt, followed by clay and silt (weathered crust) underlain by bedrock. The fill extended up to maximum depth of 3.1 mbgs and bedrock was encountered in one of the six boreholes at depth of 2.5 mbgs.

- Federal Contaminated Sites (FCS) – This record for the central heating plant is listed on the west portion of the Site; however, actual location of the central heating plant is not within the Phase I Study Area. This record identified the central heating plant as having documented soil contamination with a remediation being underway.

### **Surrounding Properties within 250 metres of the Site**

Noteworthy records for the Phase One Study Area (excluding the Phase One Property) included the following:

- Borehole (BORE) – There are 11 borehole listings within the Phase One Study Area. The boreholes generally encountered sand and clay fill, silty sand and silty clay (weathered crust) underlain by limestone bedrock. The fill extended up to depths ranging between 0.64 and 1.1 mbgs and construction debris was noted in the fill at a few boreholes. The bedrock was encountered at depths ranging from 0.9 to 1.8 mbgs.
- Ontario Regulation 347 Waste Generators Summary (GEN) – There is a record for DND and PWGSC located at 164 Via Venus located approximately 200 m south of the Site which is listed as waste generators of numerous wastes (listed in the ERIS report in Appendix C). Based on the review of previous reports this former building was listed as an aerospace office building and thus not considered to be a PCA. There are several dozen listings attributed to the NRC complex however none are located within the Phase One Study Area.

Based on the review of the ERIS Report, no PCAs were identified on the Site.

### **4.2.2 Ministry of the Environment, Conservation and Parks**

For the purposes of a Phase One ESA completed for adjacent land (Phase 3-5) in 2020, the Ottawa district office of the Ontario Ministry of Environment, Conservation and Parks (MECP) was asked to respond in writing to the following questions for 1076 Hemlock Private (which includes the Site and surrounding properties):

- Active orders under the Environmental Protection Act (EPA), the *Ontario Water Resources Act* (OWRA), and the *Pesticides Act* (PA).
- Approvals under Sections 9 and 39 of the EPA as well as Sections 52 and 53 of the OWRA

A formal response from the MECP was received by WSP on July 16, 2020. The review of the MECP response indicated that no Active Orders, Certificate of Approvals, or Environmental Compliance Approvals have been issued for the Site. It is inferred that with no materials change to the Site and surrounding properties, the MECP response can be considered valid. As such, an updated MECP response was not requested for the Site.

### **4.2.3 City of Ottawa**

WSP completed a review of the City of Ottawa HLUI (HLUI) for the Site and surrounding area. The HLUI had a record for the entire former CFB Rockcliffe base which includes the Site. The only noteworthy record shown to be on the site is for a petroleum products wholesaler with three associated vertical fuel ASTs. However, this facility listing is attributed to 1500 Montreal Road (occupied by the NRC campus) and not located within the Phase One Study Area. The NRC tanks identified in the HLUI are likely on part of that property that is beyond the Study Area. Therefore, review of the HLUI did not identify any PCAs or APECs.

#### 4.2.4 Ministry of Natural Resources and Forestry (MNRF)

Based on available resources and information provided by the MNRF Ministry of Natural Resources and Forestry (MNRF), there are no Natural Heritage Features (e.g., Provincially Significant Wetlands, Areas of Natural and Scientific Interest, etc.) located on the Site; however, there is a potential for Species at Risk (SAR) to be present on the Site as was documented in the 2014 EIS for the Site which identified SAR bat habitat on and north of the Phase One Property.

#### 4.2.5 Technical Standards and Safety Authority, Fuel Safety Division Records

The Technical Standards and Safety Authority (TSSA) maintains records related to registered underground storage tanks (USTs) for petroleum-related products. The TSSA was contacted, as part a Phase One ESA completed for adjacent land (Phase 3-5) in 2020, to identify outstanding instructions, incident reports, fuel oil spills or contamination records. The address and search are included the Site and surrounding properties.

The TSSA replied on July 13, 2020 and indicated that the TSSA did not have any records for the Site or surrounding properties searched within the Phase One Study Area. Given TSSA records are maintained by address and no materials change to the Site and surrounding properties have taken place since 2020, the TSSA response can be considered valid. As such, an updated TSSA search was not completed for the Site.

### 4.3 Physical Setting Sources

#### 4.3.1 Aerial Photographs

Aerial photographs for the Phase One Property and the surrounding area was reviewed by WSP. Information obtained from the review of the aerial photographs is summarized in the following table.

Aerial photographs of the Site and neighbouring properties were obtained from WSP's in-house photo records and were dated 1945. In addition, the aerial photographs for 1928, 1965, 1976, 1991, 2002, 2011 and 2017 from the City of Ottawa geo-map (<http://maps.ottawa.ca/geoOttawa/>) were reviewed on-line. WSP selected aerial photographs based on availability and date intervals to help develop an understanding of the history of the development of the Phase One Property and Phase One Study Area. The information obtained from the aerial photographs was limited by the quality and scale of the available aerial photographs. The earliest aerial photograph available was from 1928. Information obtained from the review of the aerial photographs is summarized in the following table.

Year	Phase One Property	Phase One Study Area
1928	The Phase One Property is occupied by undeveloped farmland with two roads on the eastern portion of the Site.	The Study Area is occupied by undeveloped farmland with occasional residential or farmhouse type buildings to the west and northeast. A small creek is present approximately 40 metres north of the Phase One Property.
1945	The Phase One Property contains three large buildings associated with the CFB Rockcliffe on the northern portion and several smaller buildings area along the east side of the property.	The Study Area is occupied with the airfield to the north and some structures to the east associated with CFB Rockcliffe. The areas to the south and west are undeveloped.
1965	The Phase One Property has same buildings from 1945 aerial as well as several smaller buildings on the southwest portion of the Site. Remaining undeveloped areas have been cleared and appear to be grassed areas.	The Study Area includes the airfield and hanger buildings associated with CFB Rockcliffe starting 40 metres north of the Phase One Property at the base of an escarpment. The lands to the east, south and southwest of the Phase One Property is

Year	Phase One Property	Phase One Study Area
		mixture of undeveloped land, residential housing and office buildings associated with the CFB Rockcliffe. In addition, a moderate size building is located adjacent north of the central portion of the Site and appears to have an outdoor swimming pool associated with it.
1976	As per 1965	As per 1965
1991	Two of the buildings in the northwest of the Phase One Property are demolished and a filling area is present at the northwest boundary of the Phase One Property. The smaller buildings on the eastern portion of the Site have also been demolished.	The airfield north of the Phase One Property has been replaced with a roadway and what is now the Canadian Aircraft Museum further to the northwest. The lands to the east, west and south are mostly unchanged with the office building to the southwest having been removed.
2002	All the buildings on the Phase One Property are no longer present. The filling area in the northwest is now overgrown.	As per 1991 to the north and south. All of the buildings to the east have been removed except for one small building and pool northeast of the Phase One Property. A driving range is present to the west of the Phase One Property.
2011	As per 2002.	As per 2002 except that the driving range to the west and single building to the east are gone.
2017	The Phase One Property is undergoing redevelopment fill piles and soil disturbance is noted including along the alignment of the storm sewer connecting to the pond to the north.	Area to the west and southwest are unchanged. There is a stormwater management pond to the north and residential development has started to the south with excavation and filling ongoing to the east.

#### 4.3.2 Topography, Hydrology and Geology

Topic	Conditions	Comment / Source
<b>Topography of Site and Surrounding Area</b>	The topography of the Site and surrounding areas is uneven with an overall slope to the north	Site and surrounding area observations
<b>Overburden Soils</b>	The geological mapping indicated that there is alluvial deposits (medium grained stratified sand with some silt) and offshore marine deposits (clay, silty clay and silt).	Bélanger, J. R. 2008 Urban Geology of the National Capital Area, Geological Survey of Canada, Open File 5311, 1 DVD.  2010 Hydrogeological Investigation
<b>Type of Bedrock</b>	Bobcaygeon Formation (limestone with minor shale in the upper parts) on the southern portion of the Site and a mix of Rockcliffe Formation (sandstone, shale, limestone and dolostone) and Gull River Formation (limestone, with dolostone beds towards base)	Armstrong, D.K. and Dodge, J.E.P. 2007. Paleozoic Geology of Southern Ontario; Ontario Geological Survey, Miscellaneous Release – Data 219  2010 Hydrogeological Investigation

Topic	Conditions	Comment / Source
<b>Depth to Bedrock</b>	The geological mapping indicates that the depth to bedrock is expected to be between 0 and 1 mbgs; however, the previous environmental reports indicate bedrock is expected to be approximately 2 mbgs but may extend up to 4 and 6 mbgs in some areas.	2010 Bélanger, J. R., Urban Geology of the National Capital Area, Geological Survey of Canada, Open File D3256, 2001
<b>Inferred Near Surface Groundwater Flow</b>	Local groundwater is anticipated to flow north towards the Ottawa River and following topography.	Site and surrounding area observations
<b>Site Grade Relative to the Adjoining Properties</b>	The southern portion of the Site is generally at grade with the adjacent properties east and south. There is a drop in elevation to the west and steeper slope to the north and northeast of the Site.	Site observations
<b>Depth to Groundwater</b>	Between 4.13 and 4.85 mbgs, as per DST 2015 Phase Two ESA.	Previous Environmental Reports

It should be noted that local groundwater flow may be influenced by underground utilities (i.e., service trenches) and building structures. For example, it is anticipated that the storm and sanitary sewer may be influencing the groundwater elevations in the area near the sewer, and that localized flow towards the sewer maybe occurring. If a more accurate description of geology, groundwater flow and groundwater quality is required, a subsurface investigation would be necessary.

#### 4.3.3 Fill Materials

Topic	Conditions	Comment / Source
<b>Fill Materials</b>	Fill has been documented in the previous reports and is visually noted in some areas across the site.	Site observations and previous investigations.

#### 4.3.4 Water Bodies, Areas of Natural Significance, and Groundwater Information

Topic	Conditions	Comment / Source
<b>Nearest Open Water Body</b>	The nearest permanent watercourse is the Ottawa River which is located approximately 950 m north of the Site. A stormwater pond is located 200 m to the northeast.	Ontario Base Map, Site visit
<b>Areas of Natural Significance (“ANSI”)</b>	The previous EIS reports identified areas natural and scientific interest (ANSI) on or within 30 m of the Site. This includes the wooded areas on and within 30 m of the Site that were identified as being habitat for SAR, specifically the brown myotis bat. Therefore, the Site is considered to be an environmentally sensitive area.	Previous Environmental Reports
<b>Wellhead Protection Areas</b>	The Phase One Study Area is not located within a well-head protection area or other area identified by a municipality in its official plan for the protection of ground water.	MECP Source Protection Atlas, Official Plans

Topic	Conditions	Comment / Source
<b>Municipal Drinking Water Distribution Systems</b>	No potable water wells were identified on the Phase One Property.	Site visit
<b>Water Wells</b>	There are no records of drinking water wells on the Site; however, several monitoring wells were observed on the central and southern portion of the Site during the Site visit.	Water Well Information Centre and Site visit

#### 4.3.5 Well Records

Topic	Conditions	Comment / Source
<b>Water Wells on Site (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling date, use)</b>	No water wells observed at the Site during the Site visit. The ERIS Report did not have any records of water wells on the Site.	ERIS Report and Site observations
<b>Water Wells on the Neighbouring Properties (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling rate, use)</b>	No water wells observed within the Phase I Study Area during the Site visit. The ERIS Report did not have any records of water wells in the vicinity of the Site.	ERIS Report

#### 4.4 Site Operating Records

At the time of the site visit, the Phase One Property was vacant with no buildings or structures. No Site operating records were provided to WSP for review outside the previous reports.

### 5.0 INTERVIEWS

Ms. Katherine Constantine of CLC (hereinafter referred to as the “Site Representative”), was interviewed during the course of the project to provide all relevant environmental information for the property. It is also noted that the previous reports included historical information provided from previous owners/operators of the Site (DND and PSPC). Pursuant to the requirements O.Reg. 153/04, the Site Representative was interviewed as the “current owner” with knowledge of current Site operations.

Relevant information obtained during the interview and site visit is provided in the Section 6.0.

## 6.0 SITE RECONNAISSANCE

### 6.1 General Requirements

Mr. Shihan Chowdhury of WSP visited the Phase One Property on June 10, 2022. The Site visit consisted of a walk-around the Site along with a cursory inspection of surrounding properties from the Site and publicly accessible areas. The Phase One Property was vacant land that consisted of wood lot and a few old, paved roadways associated with the former CFB Rockcliffe military base. There were no structures currently present on the Site.

Photographs of relevant features noted during the site visit are provided in Appendix D.

### 6.2 Specific Observations at Phase One Property

The specific observations made during the Site visit are presented in the following sections.

Topic	Observations	Source
<b>Structures</b>		
<b>Number and Age of Buildings on the Site</b>	No buildings or structures were present at the Site.	Site observations
<b>General Descriptions of Each Building (including improvements)</b>	Not applicable.	Site observations
<b>Building Areas</b>	Not applicable.	Site observations
<b>Number of Floors (include all levels, whether above or below ground)</b>	Not applicable.	Site observations
<b>Number, Age, and Depth of Levels Below Ground Level</b>	Not applicable.	Site observations
<b>Number and Details of all Aboveground Storage Tanks ("ASTs")</b>	None observed or reported. It is possible that the former residential buildings located on the southern portion of the Site may have been heated with fuel oil stored in ASTs; however, no information was provided regarding these buildings to support this beyond a passing notation in a previous report that that some of the buildings may have been heated with fuel oil tanks for a brief period before converting to natural gas. Most of the former buildings on the base were reportedly heated using steam originating from a central heating plant southwest of the Phase One Property.	Site observations and Site Representative
<b>Number and Details of all Underground Storage Tanks ("USTs")</b>	No evidence (fill/vent pipes extending through walls or slabs/ground surface, no staining or any obvious odours) was observed during the Site visit to indicate the current or former presence of fuel or chemical USTs on the Site. None of the previous reports documented any USTs historically having been present on the Phase One Property.	Site observations and Site Representative

Topic	Observations	Source
<b><u>Underground Utilities</u> Potable and Non-Potable Water Sources</b>	The Site is not currently connected to the municipal water supply; however, the former buildings on the Site were connected to the municipal sewer and water system. It is likely that abandoned storm sewer and watermain are present on the Site, primarily along the older roadways. There is a large diameter active sewer line (circa 2015) that runs north-south through the Phase One Property which connects the new development to a stormwater pond north of the Site.	Site observations and Site Representative
<b>Utility Lines Present (i.e. Electrical, Natural Gas, other)</b>	None observed. However former abandoned utilities are expected throughout the Site area where former buildings were present.	Site observations
<b>Sanitary/Process Wastewater Receptor</b>	No sanitary or process wastewater is generated on-Site.	Site observations
<b>Sanitary Sewer Connection</b>	The Site is connected to the municipal sanitary sewer via large diameter sewer that runs north-south along the central portion of the Site. Historically, the Site was serviced by local sanitary sewers.	Site observations
<b>Septic Systems</b>	None identified.	Site observations
<b>Storm Water Flow</b>	Storm water run-off is through natural soil infiltration and the stormwater sewer line that runs through the Site.	Site observations
<b>Storm Sewer Connection</b>	The Site is connected to a new storm sewer system running north-south along the central portion of the Site. Historically the Site was serviced by local storm sewers.	Site observations
<b><u>Interior of Structures</u> Entry and Exit Points for Site Buildings</b>	No buildings or structures were present at the Site.	Site observations
<b>Existing and Former Heating System(s) (include fuel type / source)</b>	As no buildings or structures were present at the Site there were no existing heating systems observed or reported. Historically many of the main site buildings were serviced by a steam line originating at a central heating plant southwest of the Phase One Property. A passing comment in a previous report suggesting that some of the buildings may have for a time been serviced by heating oil ASTs. No evidence of former storage tanks were noted at the time of the site visit and no confirmed storage tank locations were identified on the Phase One Property or historical reports.	Site observations, previous reports.
<b>Existing and Former Cooling System(s) (include fuel type / source)</b>	As no buildings or structures were present at the Site there were no existing cooling systems observed or reported.	Site observations, previous reports

Topic	Observations	Source
<b>Drains, Pits, and Sumps (include current use, if any, and former use)</b>	As no buildings or structures were present at the Site there were no drains, pits, or sumps observed or reported.	Site observations
<b>Unidentified Substances</b>	None identified.	Site observations
<b>Floor Stains or Corrosion Located near a Potential Discharge Location</b>	None identified.	Site observations
<b>Miscellaneous Exterior Location of any Current and Former Wells</b>	Two monitoring wells were observed on the central and southern portion of the Site.	Site observations
<b>Ground Cover (i.e. grass, gravel, soil, or pavement, etc.)</b>	The majority of the Phase One Property was covered with trees or small vegetation, cleared areas from former roadways and parking remained a mix of granular, asphalt or bare ground surfaces.	Site observations
<b>Current or Former Railway Lines or Spurs</b>	None observed or reported.	Site observations.
<b>Presence of Stained Soil, Vegetation, or Pavement</b>	None observed.	Site observations
<b>Presence of Stressed Vegetation</b>	None observed.	Site observations
<b>Areas Where Fill and/or Debris Materials Appear to Have Been Placed</b>	The eastern site boundary appears to be raised with fill and the south half of the west part of the site appeared to have been graded with some fill since the decommissioning of the base.	Site observations
<b>Potentially Contaminating Activity</b>	The presence of fill across the Site is considered as a PCA.	Site observations
<b>Unidentified Substances</b>	None identified.	Site observations

### 6.2.1 Enhanced Investigation Property

The Site has been used for administrative office, barracks and transmission towers as well as residential houses associated with the CFB Rockcliffe military base. The Site has not been used as an automotive garage, a bulk liquid dispensing facility or a dry-cleaning facility. As such, the Site is not considered to be an enhanced investigation property as defined by O. Reg. 153/04.

### 6.3 Surrounding Land Use

During the Site visit, a visual reconnaissance of the outdoor operations in the Phase One Study Area was carried out from the Site and publicly accessible areas.

The surrounding properties include vacant lands on all sides except south which is being redeveloped with residential homes.

**North:** A stormwater pond is located north of the Site with remaining area consisting of woodlot associated with CFB Rockcliffe.

**East:** Vacant land with dense tree coverage in some areas. No buildings or structure present; however, old roadways likely associated with CFB Rockcliffe were observed.

**West:** Vacant treed land with a few old roadways associated with the former CFB Rockcliffe.

**South:** The lands to the south and southeast are under development with new residential housing.

## 6.4 Written Description of Investigation

At the time of the Site reconnaissance, conducted on June 10, 2022, the Phase One Property consisted of a 4.89-hectare parcel of vacant land that consisted of forested land and a few old, paved roadways. No buildings or structures were noted on the Phase One Property. Dense tree coverage was present on the eastern portion of the Site. Overall terrain of the Site was uneven, and it is inferred that fill materials were brought to Site for various redevelopment activities over the years. As such, use of fill of unknown quality at the Site is considered a PCA which results in an APEC.

The surrounding properties within the Phase One Study Area were vacant aside from some development activities were ongoing south and southeast of the Site.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Current and Past Uses of the Site

The following summarizes the current and past uses of the Phase One Property:

Year(s)	Name of Owner(s)	Description of Property Use	Property Land Use According to Reg.153/04	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
May 17, 1802	Richard Wragg	Undeveloped vacant land	Agricultural or other use	Based on the review of historical information, the first known development on the Site was not until sometime between 1945 and 1965. The 1928 aerial photograph shows that the Site was undeveloped forested land.
September 27, 1806	John Platt			
March 13, 1828	Eleanor Abrams			
August 21, 1841	John (Jean) Barreille			
September 11, 1841	John Carson			
September 10, 1845	Henry Williams			
November 24, 1852	George Codd and Henry Codd			
July 25, 1860	Paul Glasford			
October 21, 1865	James Kelly			
December 23, 1873	Richard Gavin			
July 12, 1875	Estate of Henry Codd (Now devised to his Daughter)			
February 15, 1877	James A. Snow			
January 22, 1885	Henry Atwill			
May 12, 1886	Thomas Cundell			
October 22, 1890	Charles Snow			
November 03, 1897	Peter Foisy			
August 29, 1898	Her Majesty The Queen			
September 12, 1898	Ferdinand Dupuis			

Year(s)	Name of Owner(s)	Description of Property Use	Property Land Use According to Reg.153/04	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
August 18, 1899	Her Majesty The Queen			
December 05, 1900	Pierre Foisy			
December 07, 1900	Bruno Robillard			
April 15, 1901	Laurentian Stone Company			
January 26, 1906	His Majesty The King in Right of Canada			
January 20, 1926	Bruno Robillard			
May 26, 1937	His Majesty The King in Right of Canada	CFB Rockcliffe is in operation with two base buildings present	The Site activities include office buildings (commercial use) and barracks (residential use)	Based on the review of historical information, the first known development on the Site was the three buildings on the north part of the Phase One Property associated with the CFB Rockcliffe military base that were constructed between 1928 and 1945.
1945	His Majesty The King in Right of Canada	As Per 1937 with the addition of some single-family residential homes on the south part of the Site.	Residential and Commercial	Based on the review of historical information, the residential houses associated with the CFB Rockcliffe military base that were constructed between 1945 and 1965. Based on the aerial photographs, the houses were removed between 2008 and 2011.
August 04, 1950	His Majesty The King (Canada) as represented by The Department of National Defence			
2007	His Majesty The King (Canada) as represented by The Department of National Defence			
March 16, 2011	Her Majesty The Queen in Right of Canada	Undeveloped vacant land	Residential and Commercial (based on the last developed use)	Based on the aerial photographs, the buildings were removed between 2008 and 2011 and the Site has been occupied by vacant treed land with some old roadways since then.
March 28, 2011 to Present	Canada Lands Company CLC Limited			

## 7.2 Potentially Contaminating Activity

Any PCA on the Phase One Property or in the Phase One Study Area may require the identification of an area of potential environmental concern (APEC) and trigger the need for a Phase Two ESA to support the filing of a Record of Site Condition. The following PCAs were identified on the Phase One Property or in the Phase One Study Area:

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Phase One Property	<i>#30 Importation of Fill Material of Unknown Quality</i> – Fill material was documented to exist in the previous reports in the area of the former office buildings associated with the former CFB Rockcliffe on the southern half and northwest corner of the Site. Fill was also visible on the southern portion of the Site in air photos and during the Site visit.	Previous Reports, air photos and Site observations.	Fill was documented to exist on the Phase One Property. Three remedial excavations to address impacts in the fill around former buildings were undertaken in the past. With the previously documented remediations and evidence of fill across the Phase One Property, the presence of fill across the Phase One Study Area is considered an APEC.
Phase One Study Area (excluding the Phase One Property)	<i>#28 Gasoline and Associated Products Storage in Fixed Tanks</i> – Former fuel storage tanks (one AST and one UST) associated with former swimming pool in Building 137 and associated soil and groundwater impacts	Previous Reports	The presence of former fuel storage tanks (one AST and one UST) associated with former swimming pool in former Building 137 as well as associated groundwater impacts located adjacent north of the central portion of the Site is an off-Site PCA considered to have resulted in an APEC to the Phase One Property.
	<i>#28 Gasoline and Associated Products Storage in Fixed Tanks</i> – Two former heating oil ASTs at former Building 47 (located approximately 200 m southwest of the Site) with documented spillage. Remediation completed in 2014	Previous Reports	Based on the distance and inferred hydraulic cross-gradient location of this off-Site PCA compared to the Site as well as remediation completed in 2014, it is not considered to have resulted in an APEC for the Phase One Property.
	<i>#28 Gasoline and Associated Products Storage in Fixed Tanks</i> - Former fuel storage ASTs at former Building 164, located approximately 150 m south of the Site with a documented release that was subsequently remediated in 2014.	Previous Reports	Based on the distance and inferred hydraulic cross-gradient location of this off-Site PCA compared to the Site as well as remediation completed in 2014, it is not considered to have resulted in an APEC for the Phase One Property.
	<i>#28 Gasoline and Associated Products Storage in Fixed Tanks</i> - Former fuel storage tanks at former Building 134, located approximately 60 m west of the Site.	Previous Reports	Based on the cross-gradient location of this PCA from the Phase One Property and that the contamination was documented to be limited in extent, the former fuel storage tanks at former Building 134 are not considered to have resulted in an APEC.

### 7.3 Areas of Potential Environmental Concern

Based on the information obtained as part of this Phase One ESA, the following were considered as being APECs on the Phase One Property.

Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern on the Phase One Property	Potentially Contaminating Activity	Location of PCA (on-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted
<b>APEC 1</b> - Potential for subsurface impacts due to the presence of fill across the Phase One Property.	Site-wide	#30. Importation of Fill Material of Unknown Quality	On-Site	PHC F1 to F4, BTEX, PAHs, and metals	Soil (Fill)
<b>APEC 2</b> - Potential for groundwater impacts migrating on to the Site from the off-Site former fuel storage tanks associated with the swimming pool operation in former Building 137.	Central portion of the Site, adjacent to the former building 137 remediation.	#28 <i>Gasoline and Associated Products Storage in Fixed Tanks</i>	Off-Site	PHC F1 to F4, BTEX, and PAHs	Groundwater (within the bedrock)

### 7.4 Conceptual Site Model

The following key features (as required by O.Reg. 153/04) are presented in Figures 1 and 2:

- Existing buildings and structures
- Water bodies and areas of natural significance located in the Phase One Study Area
- Drinking water wells on the Phase One Property
- Roads (including names) within the Phase One Study Area
- Uses of properties adjacent to the Phase One Property
- Location of identified PCAs in the Phase One Study Area (including any storage tanks)

The following describes the Phase One ESA CSM based on the information obtained and reviewed as part of this Phase One ESA:

- At the time of the Site visit, conducted on June 10, 2022, the Phase One Property consisted of a 4.89 hectare parcel of currently undeveloped land that consisted of wood lot and a few old, paved roadways associated with the former CFB Rockcliffe military base. There were no structures currently present on the Site.

- The previous EIS reports identified an area of bat habitat on and within 30 m of the Site, specifically the endangered brown myotis. Additional ANSI, including more bat habitat and butternut trees are present on the ridgeline (NRC Woods) bordering the north of the Phase One Property. Therefore, the Site is considered to be an environmentally sensitive area.
- Potable water in the vicinity of the Phase One Property is provided by the City of Ottawa. No potable water wells were identified on the Phase One Property.
- At the time of the Phase One ESA, the surrounding properties to the north, east and west were undeveloped and the properties to the south and southwest were under development for parkland and residential housing.
- Historically, the Phase One Property has been occupied by a series of buildings and structures associated with the former CFB Rockliffe. Buildings 8, 9, 10, 11, 70, 71, 124 and 126 were located on the Phase One Property. The buildings were occupied by:
  - Building 8: Office – Chaplain's office
  - Building 9: Office – Special investigation department
  - Building 10: Office – Eastern section investigation department
  - Building 11: Ground telecom transmission site
  - Building 70: Residential: Airwomens' barracks
  - Building 71: Residential: NCO barracks
  - Building 124: Office: ground training offices
  - Building 126: transmission tower
- Previous subsurface investigation on-Site using test pits was completed in the vicinity of buildings 11, 69, 71 and 126. Exceedances of petroleum hydrocarbons (PHCs) polycyclic aromatic hydrocarbons (PAHs), and metals were identified in soil samples; however, these exceedances were attributed to poor fill quality likely resulting from various construction debris.
- There is a potential for abandoned storm sewers and watermains to be present on the Phase One Property attributed to past development of the Site, primarily along the older former roadways. There is a newer stormwater sewer (circa 2015) that runs north-south through the Phase One Property which connects the new development to a stormwater pond north of the Site.
- Historically, the surrounding lands were also developed with buildings for commercial use including lounge (building 15), hospital (building 134), medical storage (building 176), other storage (buildings 178 and 179), and an indoor swimming pool (building 137).
- Former building 137, located adjacent north of the central portion of the Site and demolished in 1997, operated as a swimming pool and included two fuel storage tanks – one above ground storage tank (AST) and an underground storage tank (UST). Previous investigations completed by other consultants identified TPH gas/diesel in the soil and groundwater at the location of the former tanks. Subsequently, the soil impacts were excavated and remediated in 2014. The soil remediation of the petroleum hydrocarbon impacts was validated and backfilled with granular B. Post remediation groundwater sampling identified residual groundwater impacts within the bedrock present south of the former soil remediation. Delineation of these

residual groundwater impacts were completed in 2020 and 2022 using monitoring wells located on all sides of the identified impacts and downgradient of the former source. As such these groundwater impacts were confirmed to be limited to the area south of the former remediation and outside the Phase One Property. Therefore, the potential presence of PHC-impacts associated with this off-Site PCA is considered as having a reduced potential to be an APEC on the Phase One Property, however, additional groundwater sampling may be required to confirm these off-Site conditions and as such the groundwater issue off-Site remains as an APEC to the Phase One Property.

- Review of previous investigations completed in the vicinity of the Site (discussed under section 3.2) identified several off-Site PCAs within the study area including poor quality fill to the south and east, PHC remediations attributed to an automotive garage at Building 29 and possible fuel storage tanks at Building 22, as well as a fuel storage tank at Building 16 and Building 134. All off these off-site PCAs were subsequently remediated and validated except for Building 134 to the west, and are therefore these off-Site PCAs are not considered as resulting APECs to the Phase One Property. Building 134 is 60 metres cross gradient to the Phase One Property and the contamination was documented to be limited in extent and therefore is not considered to represent an APEC to the Phase One Property.
- The geological mapping that the overburden soils include alluvial deposits (medium grained stratified sand with some silt) and offshore marine deposits (clay, silty clay and silt). It also indicates there is no overburden soil in one area of the northern portion of the Site where bedrock is expected at surface.
- Bedrock consists of Bobcaygeon Formation (limestone with minor shale in the upper parts) on the southern portion of the Site and a mix of Rockcliffe Formation (sandstone, shale, limestone and dolostone) and Gull River Formation (limestone, with dolostone beds towards base).
- The nearest permanent watercourse is the Ottawa River which is located approximately 950 m north of the Site. A stormwater pond is located 200 m to the northeast.
- Local groundwater is anticipated to flow north towards the Ottawa River.
- Based on the available information reviewed, the only two APECs for the Site are associate with the presence of fill deposits across the entire parcel which include building demolition waste and the potential for migration of PHC impacted groundwater from off-Site building 137. There have been documented areas of soil impacts on-Site which were remediated and hence, are not considered APECs for the Site, but remain within the overall APEC associated with the fill. Other PCAs were located on surrounding lands to the Site, these off-Site PCAs were remediated and delineated to or before the Site boundary and therefore were not considered as APECs to the Phase One Property.

#### **7.4.1 Uncertainty and Absence of Information**

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

## 8.0 CONCLUSIONS

### 8.1 Need for a Phase Two ESA

Based on the information obtained and reviewed as part of this Phase One ESA, there were two APECs identified on the Phase One Property, the presence of fill across the Site and potential groundwater impacts from former fuel storage tanks (located off-Site) associated with former Building 137 (located north of the central portion of the Site). Accordingly, a Phase Two ESA is required to support the submission of an RSC.

It is noted that building debris from the former demolitions may be present in the fill across the site, specifically around former buildings. The presence of debris is not on its own considered as an issue of concern as it may not result in an exceedance of site condition standards, however, it may require management during redevelopment.

### 8.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

Given that APECs are present on the Site and that there is a change in land use to a more sensitive use for the proposed residential development of the Site, an RSC supported by a Phase Two ESA will be required.

## 10.0 LIMITATIONS AND USE OF REPORT

This report (the “Report”) was prepared for the exclusive use of Canada Lands Company CLC Limited for the express purpose of providing advice with respect to the environmental condition of the Site. In evaluating the Site, WSP Canada Inc. (“WSP”) has relied in good faith on information provided by others as noted in the Report. We have assumed that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatement or inaccuracy contained in this Report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or incomplete or inaccurate historical information from the various agencies. Any use which a third party makes of this Report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third party. If a third party requires reliance on this Report, prior written authorization from WSP is required. WSP disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of WSP’s assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within WSP’s proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. WSP did not perform a complete assessment of all possible conditions or circumstances that may exist at the site referenced in the Report. Conditions may therefore exist which were not detected given the limited nature of the assessment WSP was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the Report. WSP’s opinions are based upon information available to WSP as of the date of the Site visit. It is understood that the services provided for in the scope of work allowed WSP to form no more than an opinion of the actual conditions at the Site at the time of the site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. If a service is not expressly indicated, do not assume it has been provided.

The results of an assessment of this nature should in no way be construed as a warranty that the Site is free from any and all contamination from past or current practices.

## 11.0 CLOSURE

The Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust that the information presented in this report meets your current requirements. Should you have any questions or concerns, please do not hesitate to contact the undersigned.

**LEGEND**

- STORM SEWER ALIGNMENT
- SANITARY SEWER ALIGNMENT
- FORMER FUEL STORAGE TANKS (PCA #28): REMOVED IN 1992 AND LOCATION IS INFERRED BASED ON THE LEVEL OF CONTAMINATION OBSERVED
- HISTORICAL RESIDENTIAL BUILDING FOOTPRINT
- HISTORICAL BUILDING FOOTPRINT
- PHASE ONE STUDY AREA
- PHASE ONE SITE
- HISTORICAL REMEDIATION (DST 2014/15)

Potentially Contaminating Activities ("PCA")		
Location	Detail	PCA#
A	Importation of Fill Material of Unknown Quality- Fill was expected to have been brought to the Site for backfilling and grading of the site at the time of initial development. Ongoing development work and demolition activities have resulted in the movement of fill around the Phase One Study Area. This includes the presence of visible stockpiles of fill in the Study Area outside the Phase One Property and was the reason behind three former fill remediations done by others. It is inferred that the fill may be present across the Phase One Study Area (not indicated on Figure 1).	30
B	Gasoline and Associated Products Storage in Fixed Tanks – Former fuel storage tanks (one AST and one UST) associated with former swimming pool in Building 137 and associated soil and groundwater impacts	28
C	Gasoline and Associated Products Storage in Fixed Tanks – Two former heating oil ASTs at former Building 47 (located approximately 200 m southwest of the Site) with documented spillage. Remediation completed in 2014	28
D	Gasoline and Associated Products Storage in Fixed Tanks – Former fuel storage ASTs at former Building 164, located approximately 150 m south of the Site with a documented release that was subsequently remediated in 2014.	28
E	Gasoline and Associated Products Storage in Fixed Tanks – Former fuel storage tanks at former Building 134, located approximately 60 m west of the Site.	28

Meas. Measured  
(P1) (AOG) Plan, September 27, 2021

Site Area = 4.890 Hectares

Distances shown on this plan are ground distances and can be converted to grid distances by multiplying by the combined scale factor of 0.999947.

Bearings are grid, derived from part of the northerly limit of Plan 4R-29378, shown to be N 66°08'50" E thereon and are referred to the Central Meridian of MTM Zone 9 ( 76°30' West Longitude ) NAD-83 (original).

Coordinates are derived from Can-Net 2016 Real Time Network GPS observations referenced to Specified Control Points 01919680105 and 01918434761, MTM Zone 9 ( 76°30' West Longitude ) NAD-83 (original).

Coordinate values are to urban accuracy in accordance with O. Reg. 216/10.

.01919680105	Northing	5024915.16	Easting	373971.65
.0191968434761	Northing	5036178.12	Easting	372436.11
.Point A	Northing	5035408.34	Easting	372044.89
.Point B	Northing	5035644.74	Easting	372513.57
.Point C	Northing	5035371.94	Easting	372538.18
.Point D	Northing	5035214.58	Easting	372250.94

Caution: Coordinates cannot, in themselves, be used to re-establish corners or boundaries shown on this plan.

Elevation Note:

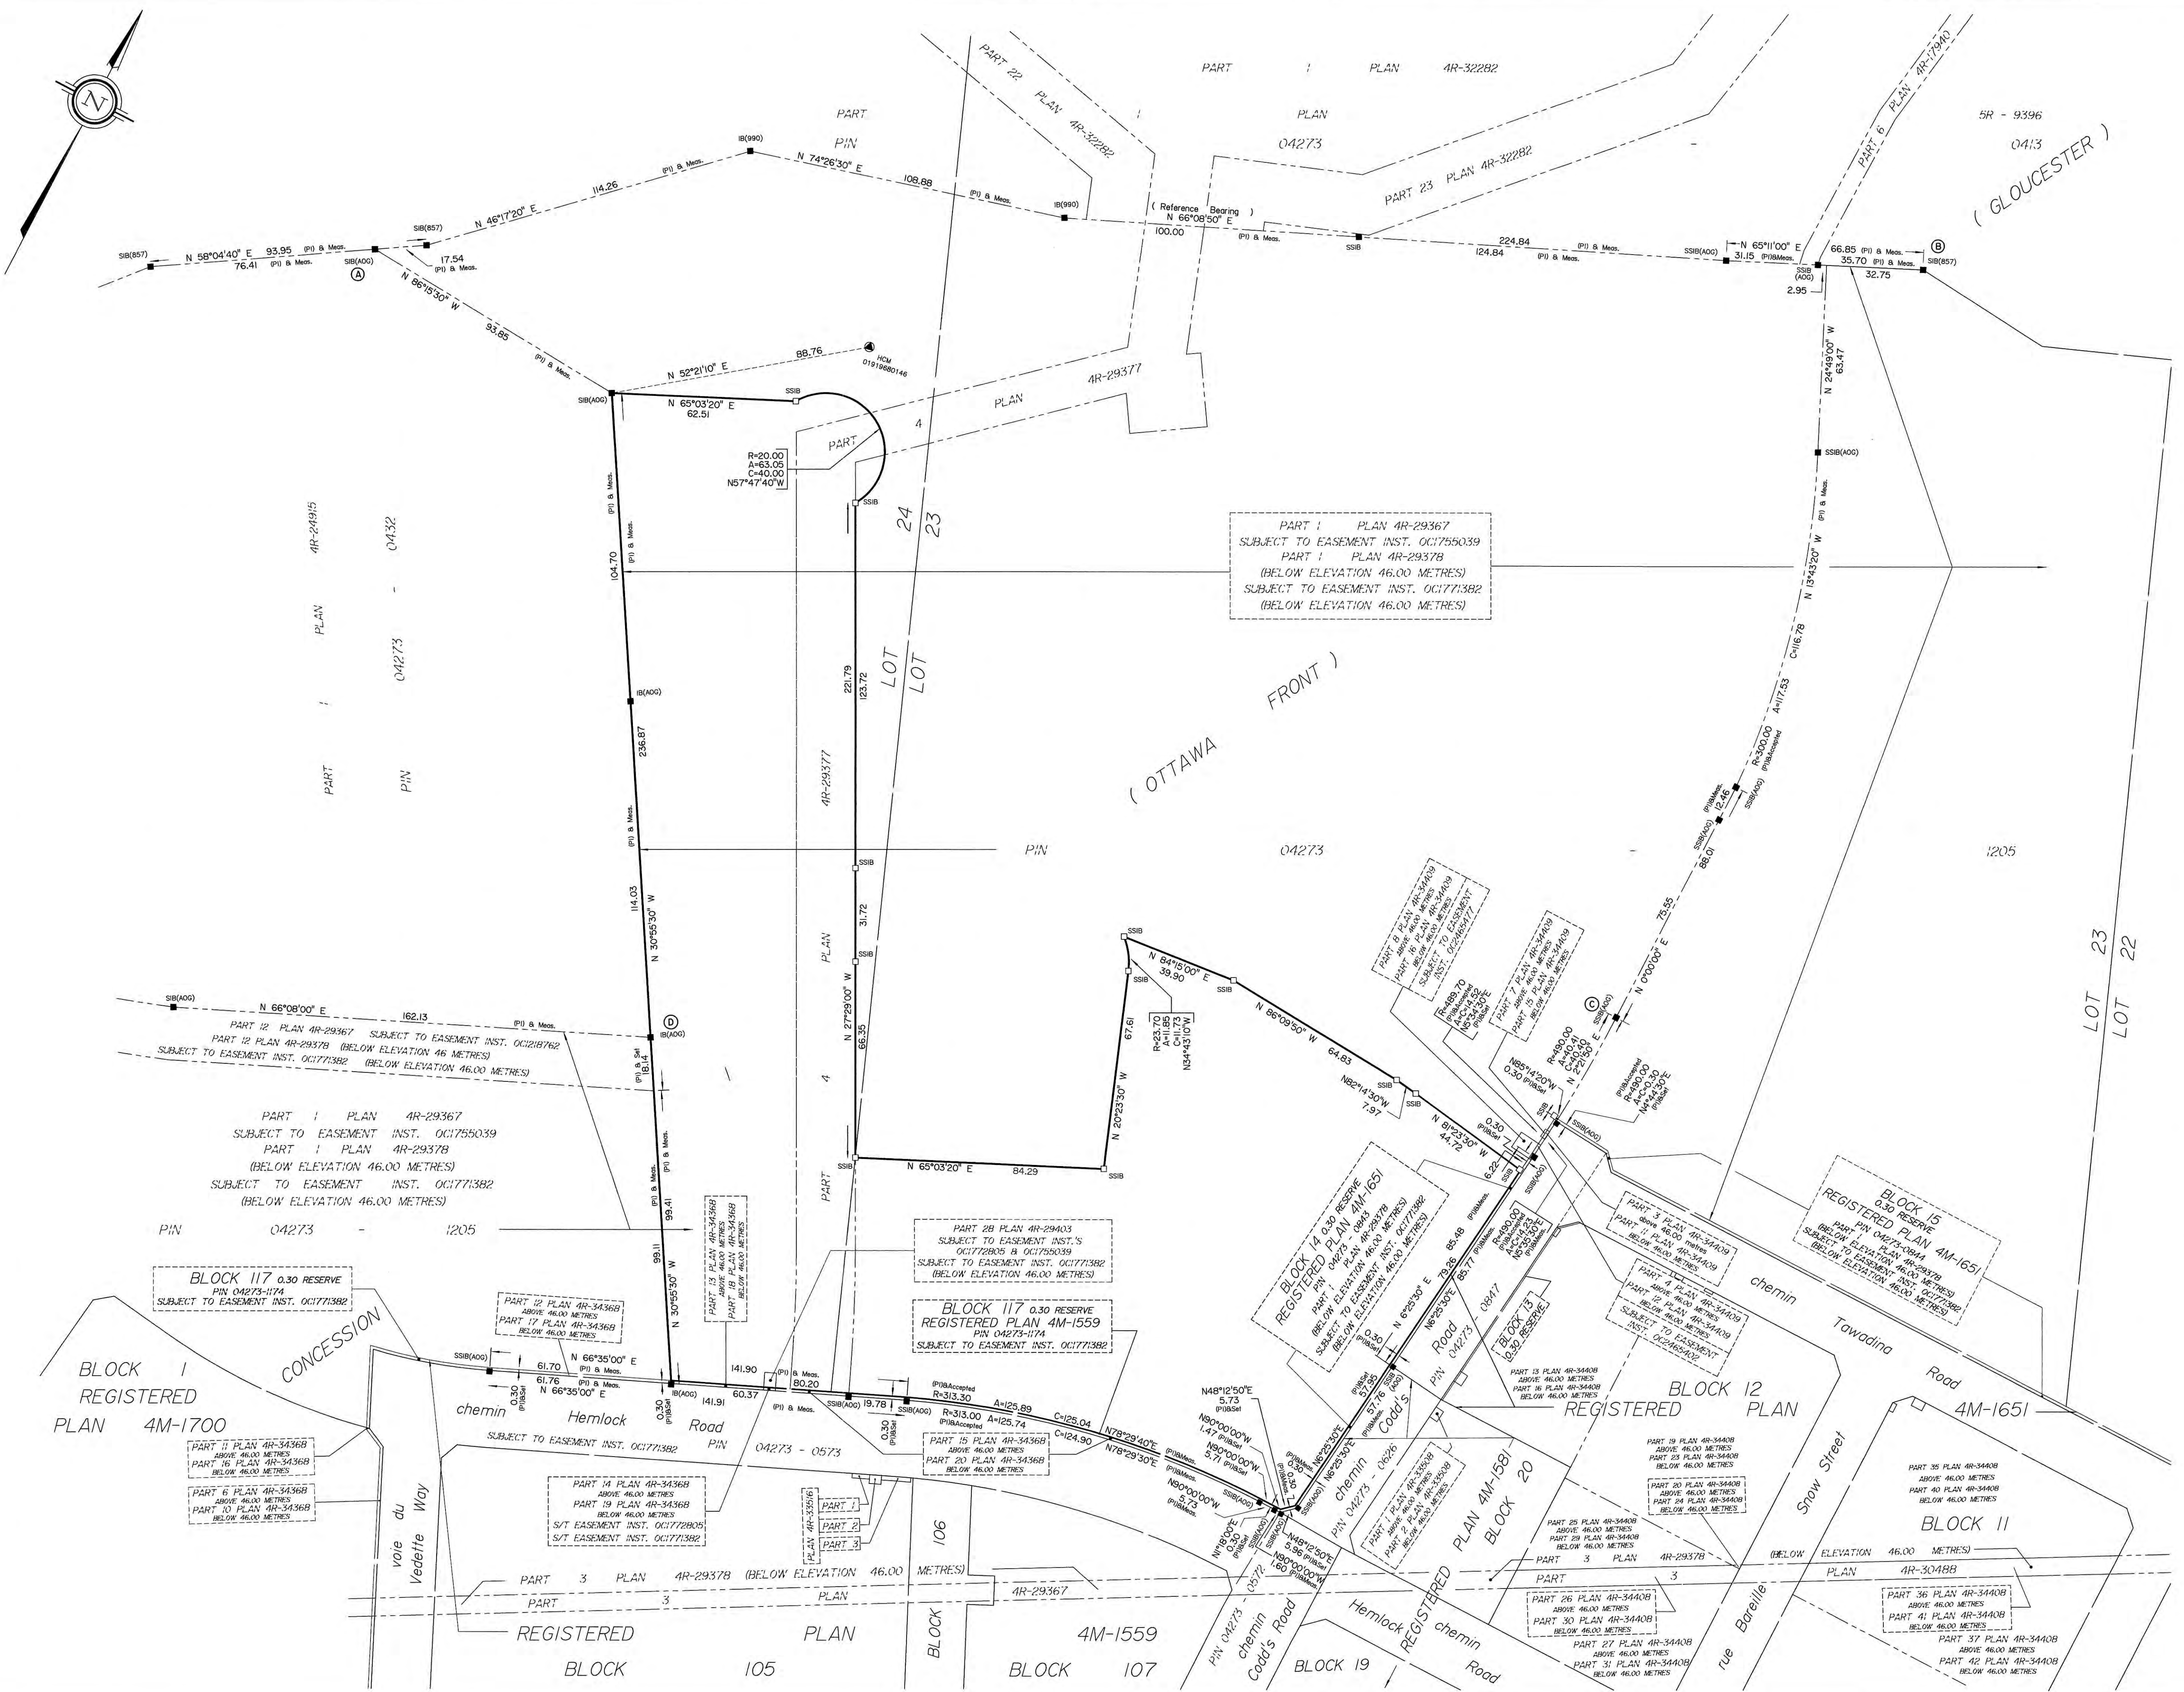

1. Elevations are geodetic, referred to City of Ottawa Vertical Bench Mark No. 396 ( 01919680138 ), having an elevation of 95.06 metres.

# Regulatory Responses

OTT File No: **36**

**INDEX REVIEW REPORT  
COMMERCIAL/INDUSTRIAL/AGRICULTURAL**

Attention: <b>Alyssa Whiteduck</b> <b>Golder Associates</b>	Your File:  Date Received: July 10, 2020
--	--

Thank you for your inquiry requesting a search of records from the Ministry of the Environment, Conservation and Parks (ministry). The ministry encourages you to use the available on-line resources to access publically-available information which may assist with your inquiry.

**PROPERTY OWNER AND LOCATION**

Location:	Municipality:	<b>Ottawa</b>	
	Address:	<b>1076 Hemlock Private</b>	
	Lot	Concession	Township

**INDEX OF NAMES FOR ORDERS**

We have searched the *Ottawa* District Index Record of Active Orders under the Environmental Protection Act (EPA), Ontario Water Resources Act (OWRA) and the Pesticides Act (PA) issued to: **1076 Hemlock Private** and the following information has been found:

☒ No Active Orders are outstanding

**Please Note:** For information related to any ministry Orders issued to the property in question, **please request this information from the property owner.** If you would like further information regarding a specific Order issued, please contact the *Ottawa District Office*.

Date of Search: July 16, 2020

**RECORD OF SITE CONDITION**

For information on **Records of Site Condition** filed on the Environmental Site Registry since October 1, 2004, please use the following links:

For records of site condition filed between October 1, 2004 and June 30, 2011

<https://www.lrcsde.lrc.gov.on.ca/besrWebPublic/generalSearch>, and for records of site condition filed since July 1, 2011 <https://www.ontario.ca/environment-and-energy/records-site-condition>

## INDEX REVIEW REPORT COMMERCIAL/INDUSTRIAL/AGRICULTURAL

### INDEX OF NAMES FOR APPROVALS ISSUED SINCE 1999

A search of the Index Record of names of all persons to whom approvals have been issued, maintained by the Director, Approvals Branch and the Regional Director, *Eastern Region*, and the District Manager, *Ottawa District*, under Section 19 EPA and Section 13 OWRA and the following information has been provided :

<u>Type</u>	<u>Number</u>	<u>Issued To</u>	<u>Issue Date</u>
Section 9 EPA (Air)			
Section 39 EPA (Waste Management)			
Section 52 OWRA (Water)			
Section 53 OWRA (Municipal/Private/ Industrial Sewage)			
Other			

The **ministry's Access Environment** is an on-line, map-based search tool designed to allow the public, quick and easy access to the ministry approvals and registration information from December 1999 onward. Access Environment currently displays Environmental Compliance Approvals (ECA), Renewable Energy Approvals (REA) and registrations on the Environmental Activity and Sector Registry (EASR). ECAs include all Certificates of Approval (CofAs) previously issued under the Environmental Protection Act (EPA) and approvals previously issued under s.53 of the Ontario Water Resources Act (OWRA). You can access this information from the ministry website or at the following link:

[www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en](http://www.accessenvironment.ene.gov.on.ca/AEWeb/ae/GoSearch.action?search=basic&lang=en)

Copies of **ECAs issued before January 1, 2000** can be obtained by submitting a [Request for a Copy of an Environmental Compliance Approval](#)

#### **Please Note:**

- 1) The information provided above is based solely on the address(es) and name(s) of the present and past owners provided by you.
- 2) The Index Record of Names to whom approvals have been issued, maintained by the Regional Director and District Manager, has been searched back to 1999.
- 3) A search of our records does **NOT** indicate whether there are:
  - other uses for which an approval may have been required, **nor**
  - other uses on the property or in the vicinity that may affect the suitability of the property, for the use proposed to be made of it.If a comprehensive knowledge of the property and the nearby lands and their environmental condition is required, you must examine them and other relevant records yourself, with the aid of a qualified person, if needed.

☒ No Approvals have been issued.

Date of Search: July 16, 2020

## INDEX REVIEW REPORT COMMERCIAL/INDUSTRIAL/AGRICULTURAL

Additional site information related to the **location of landfill sites** in the province can be found at the following link:

<http://www.ontario.ca/environment-and-energy/small-landfill-sites>

<http://www.ontario.ca/environment-and-energy/map-large-landfill-sites>

The **ministry's Hazardous Waste Information Network (HWIN)** can also be accessed to search for information on generators, carriers, and receivers of subject waste in the province at the following link: [www.hwin.ca](http://www.hwin.ca)

The **ministry's Environmental Compliance Reports** provide information about contaminant discharges to water and emissions to air that exceed limits found in legislation, environmental approvals, orders and/or policies/guidelines and can be accessed at the following link: <http://www.ontario.ca/environment-and-energy/environmental-compliance-reports>

Information on **Environmental Penalties**, which are monetary penalties that can be imposed by the ministry for some industrial spills, can be assessed at the following link: <https://www.ontario.ca/search/search-results?query=environmental%20penalties>

Additional ministry information can be accessed through the **Government of Ontario's Open Data Catalogue**: <http://www.ontario.ca/government/open-data-ontario>

The ministry also encourages you to consider best practices and standards of care used within the legal community and through your associations as a guide to obtaining information related to specific property for any legal purpose.

We trust this information will help meet your requirements quickly and effectively.

Please advise your colleagues that responses to requests for searches always take some time. As a result, the Ministry of the Environment, Conservation and Parks may not be able to meet deadlines imposed by other parties on real estate and other transactions.

Thank you for your inquiry.

<b>2</b>	<b>1 of 1</b>	<b>88.0</b>	<b>Ottawa ON</b>	<b><a href="#">FCS</a></b>
Site Id:		08636002		
Departmental Id:		S10381		
Property No.:		8636		
Site Name:		CFSU(O) Rockcliffe PMQ Trailer Storage Compound		
Location:				
Municipality:		Ottawa		
Census Division:		Ottawa		
Federal Electoral District:		Ottawa--Vanier		
Nearest Populated Area:				
Longitude:		-75.6346		
Latitude:		45.453		
Reporting Organization:		National Defence		
Reason for Involvement:		Federal Real Property		
Est m³ Contaminated:		1360		
Est Ha Contaminated:				
Est Tons Contaminated:				
Site Management Strategy:		Care and Maintenance		
Highest Step Completed:		Develop Remediation/Risk Management Strategy		
Action Plan:		SLRA completed 02/2003. The area in question may be paved in 06/07.		
Additional Info:		Slight exceedances of federal criteria for Chromium and zinc on site. Source unknown, possibly a result of fill. Groundwater has elevated levels of manganese, sodium and chloride, but these are considered normal for the Ottawa area.		
--- Details ---				
Medium:		Soil		
Contaminant:		Metal, metalloid, and organometallic

Incident ID: 2750096  
 Incident Number: 593518  
 SR Type: FS-Pipeline Incident  
 Status Code: Pipeline Damage Reason Est  
 Summary: 620 Hochelaga Street, Ottawa - 1/2" Pipeline Hit  
 Spills Action Centre:  
 Reported By: Armstrong, Alan - Enbridge  
 Affiliation: Industry Stakeholder (Licensee/Registration/Certificate Holder, Facility Owner, etc.)  
 Method Details: utility damage  
 Fuel Category: Heating Fuel  
 Fuel Occurrence Type: Pipeline Strike  
 Date of Occurrence: 5/10/2011 0:00  
 Occurrence Start Date: 6/6/2011 0:00  
 Health Impact: No  
 Occurrence Desc: linestrike no locates  
 Environment Impact: No  
 Property Damage: Yes  
 Service Interrupt: Yes  
 Fuel Type: Natural Gas  
 Enforce Policy: Yes  
 Operation Type: Construction Site (pipeline strike)  
 Damage Reason: No notification made to the one call center  
 Public Relation: No  
 Pipeline System:  
 Pipeline Type: Service / Riser Distribution Pipeline  
 Depth: 22  
 Pipe Material: Plastic  
 Regulator Location: Outside  
 PSIG: 40  
 Regulator Type: Service Regulator (up to 60 psi intake)  
 Notes: no locate

## Appendix: Database Descriptions

Ecolog Environmental Risk Information Services Ltd can search the following databases. The extent of Historical information varies with each database and current information is determined by what is publicly available to Ecolog ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

**Abandoned Aggregate Inventory:** Sept 2002\* Provincial [AAGR](#)  
The MAAP Program maintains a database of all abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Aggregate Inventory:** Up to Aug 2012 Provincial [AGR](#)  
The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. Please note that the database is only referenced by lot/concession and city/town location. The database provides information regarding the registered owner/operator, location, status, licence type, and maximum tonnage.

**Abandoned Mine Information System:** 1800-Feb 2013 Provincial [AMIS](#)  
The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Anderson's Waste Disposal Sites:** 1860s-Present Private [ANDR](#)  
The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Automobile Wrecking & Supplies:** 2001-Jun 2010 Private [AUWR](#)  
This database provides an inventory of all known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Borehole:** 1875-Aug 2011 Provincial [BORE](#)  
A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Certificates of Approval:**

1985-Oct 30, 2011\*

Provincial

[CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Commercial Fuel Oil Tanks:**

1948-Apr 2013

Provincial

[CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

**Chemical Register:**

1992, 1999-Jun 2010

Private

[CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Apr 1987 and Nov 1988\*

Provincial

[COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Compliance and Convictions:**

1989-Jun 2013

Provincial

[CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Certificates of Property Use:**

1994-Jul 2013

Provincial

[CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Drill Hole Database:**

1986-Jun 2013

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Environmental Activity and Sector Registry:**

Oct 31, 2011-Jul 2013

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Environmental Registry:**

1994-Jul 2013

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Environmental Compliance Approval:**

Oct 31, 2011-Jul 2013

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For CofA's prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Environmental Effects Monitoring:**

1992-2007\*

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**ERIS Historical Searches:**

1999-Mar 2013

Private

[EHS](#)

EcoLog ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Environmental Issues Inventory System:**

1992-2001\*

Federal

[EIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**List of TSSA Expired Facilities:**

Current to May 2013

Provincial

[EXP](#)

This is a list of all expired facilities that fall under the TSSA (TSSA Act & Safety Regulations), including the six regulations that exist under the Fuels Safety Division. It will include facilities such as private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. These tanks have been removed and automatically fall under the expired facilities inventory held by TSSA.

**Federal Convictions:**

1988-Jun 2007\*

Federal

[FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Contaminated Sites on Federal Land:**

June 2000-Jan 2013

Federal

[FCS](#)

The Federal Contaminated Sites Inventory includes information on all known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Fisheries & Oceans Fuel Tanks:**

1964-Sept 2003

Federal

[FOFT](#)

Fisheries & Oceans Canada maintains an inventory of all aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Fuel Storage Tank:**

2010-May 2013

Provincial

[FST](#)

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

**Fuel Storage Tank:**

Pre-Jan 2010\*

Provincial

[FSTH](#)

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

**Ontario Regulation 347 Waste Generators Summary:**

1986-Jul 2013

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**TSSA Historic Incidents:**

2006-June 2009

Provincial

[HINC](#)

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Indian & Northern Affairs Fuel Tanks:**

1950-Aug 2003\*

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of all aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**TSSA Incidents:**

June 2009-Apr 2013

Provincial

[INC](#)

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

**Landfill Inventory Management Ontario:**

2012

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Canadian Mine Locations:**

1998-2009

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Mineral Occurrences:**

1846-Apr 2013

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the planimetric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**National Analysis of Trends in Emergencies System (NATES):**

1974-1994\*

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Non-Compliance Reports:**

1992(water only), 1994-2010

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

<b><u>National Defence &amp; Canadian Forces Fuel Tanks:</u></b>	Up to May 2001*	Federal	<a href="#">NDFT</a>
The Department of National Defence and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.			
<b><u>National Defence &amp; Canadian Forces Spills:</u></b>	Mar 1999-Aug 2010	Federal	<a href="#">NDSP</a>
The Department of National Defence and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.			
<b><u>National Defence &amp; Canadian Forces Waste Disposal Sites:</u></b>	2001-Apr 2007*	Federal	<a href="#">NDWD</a>
The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.			
<b><u>National Environmental Emergencies System (NEES):</u></b>	1974-2003*	Federal	<a href="#">NEES</a>
In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for all previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.			
<b><u>National PCB Inventory:</u></b>	1988-2008*	Federal	<a href="#">NPCB</a>
Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. All federal out-of-service PCB containing equipment and all PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites.			
<b><u>National Pollutant Release Inventory:</u></b>	1993-2011	Federal	<a href="#">NPRI</a>
Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.			
<b><u>Oil and Gas Wells:</u></b>	1988-Jun 2013	Private	<a href="#">OGW</a>
The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at <a href="http://www.nickles.com">www.nickles.com</a> .			

**Ontario Oil and Gas Wells:**

1800-Jul 2013

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, well cap date, licence no., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Inventory of PCB Storage Sites:**

1987-Oct 2004

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Orders:**

1994-Jul 2013

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Canadian Pulp and Paper:**1999, 2002, 2004, 2005,  
2009

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Parks Canada Fuel Storage Tanks:**

1920-Jan 2005\*

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of all known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Pesticide Register:**

1988-Jun 2013

Provincial

[PES](#)

The Ontario Ministry of Environment maintains a database of all manufacturers and vendors of registered pesticides.

**TSSA Pipeline Incidents:**

June 2009-Mar 2012

Provincial

[PINC](#)

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

**Private and Retail Fuel Storage Tanks:**

1989-1996\*

Provincial

[PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Permit to Take Water:**

1994-Jul 2013

Provincial

[PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Ontario Regulation 347 Waste Receivers Summary:** 1986-2011 Provincial [REC](#)  
 Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Record of Site Condition:** 1997-Sept 2001, Oct 2004-Jun 2013 Provincial [RSC](#)  
 The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Retail Fuel Storage Tanks:** 1999-Jun 2010 Private [RST](#)  
 This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Scott's Manufacturing Directory:** 1992-Mar 2011 Private [SCT](#)  
 Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Ontario Spills:** 1988-Jun 2013 Provincial [SPL](#)  
 This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Wastewater Discharger Registration Database:** 1990-2011 Provincial [SRDS](#)  
 Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Anderson's Storage Tanks:** 1915-1953\* Private [TANK](#)  
 The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Transport Canada Fuel Storage Tanks:** 1970-Mar 2007 Federal [TCFT](#)  
 With the provinces of BC, MB, NB, NF, ON, PE, and QC; Transport Canada currently owns and operates 90 fuel storage tanks. Our inventory provides information on the site name, location, tank age, capacity and fuel type.

**TSSA Variances for Abandonment of Underground Storage Tanks:**

Current to Jun 2013

Provincial

[VAR](#)

The TSSA, Under the Liquid Fuels Handling Code and the Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, you may apply to seek a variance from this code requirement. This is a list of all variances granted for abandoned tanks.

**Waste Disposal Sites - MOE CA Inventory:**

1970-Jul 2013

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Up to Oct 1990\*

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Water Well Information System:**

1955-May 2013

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries". All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and were included as reference.
