## 1.0 EXECUTIVE SUMMARY

Terrapex was retained by WO MW Realty Limited (WO or the Client) to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 3145 Conroy Road in Ottawa, Ontario (the Phase One Property, hereinafter also referred to as the Site). It is understood that the study documented herein is being undertaken for due diligence purposes and might be used in support of a possible sale of the property. The Site location is provided in Figure 1.

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the Phase One study area in order to satisfy the following Phase One ESA general objectives listed in Ontario Regulation (O. Reg.) 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property;
- to determine the need for a Phase Two ESA; and,
- to provide a basis for carrying out any Phase Two ESA required.

The Site is roughly rectangular in shape with a total area of approximately 4.86 ha (48614.38 m<sup>2</sup>). The Site is located in a mixed-use commercial/residential area of Ottawa with commercial properties located to the north, east, and west, with a residential area to the south. A general site layout is provided in Figure 2.

Following the completion of the preliminary records review, Terrapex determined the following:

- The current registered owner of the Site is WO MW Realty Limited, which has owned the property since November 2024.
- It was determined that the first developed land use at the Site was in 1981 when the use of the property first resulted in the development of an amusement park with miniature golf, a driving range and a go-kart track base on information from the fire insurance products.
- Since first development, the Site has been used as an amusement park with miniature golf, a driving range and a go-kart track approximately until 2011, and later the site has been inactive and stayed vacant.
- The Site is not an enhanced investigation property.
- The Phase One Study Area consisted of the Site and properties located wholly or partly within 250 m from the nearest point on the boundary of the Site.

Based on the review, evaluation, and interpretation of the information obtained from the records review, interviews, and site reconnaissance, two potentially contaminating activities (PCAs), as

listed in Table 2 of Schedule D of O. Reg. 153/04, or as determined by the QP, were identified within the Site. A further twenty-one PCAs were identified within the Phase One Study Area. the two on-Site a PCAs resulted in an area of potential environmental concern (APEC) at the Site.

If the Client wishes to confirm the soil and/or groundwater quality in the APECs, subsurface investigations would be recommended. Based on the identification of APECs from this Phase One ESA, if future development requiring a change in land use is considered, a Phase Two ESA would be required to support filing a Record of RSC.

## 2.0 INTRODUCTION

Terrapex was retained by the WO MW Realty Limited (WO or the Client) to conduct a Phase One Environmental Site Assessment (ESA) of the property located at 3145 Conroy Road in Ottawa, Ontario (the Phase One Property, hereinafter also referred to as the Site). It is understood that the assessment was undertaken to fulfill the requirements of the Ontario Regulation (O. Reg.) 153/04 and City of Ottawa (the City) for permitting requirements for the redevelopment of the Site.

This report was prepared to update a previous Phase I ESA completed for the Site by Pinchin Ltd. (Pinchin) in 2024. Where indicated, Terrapex has relied on information / records from the previous report and has updated information where needed to meet the requirements of O. Reg. 153/04.

### 2.1 OBJECTIVE

The objective of the investigation was to identify actual and potential sources of contamination associated with the Site arising from current and/or historical activities on the Site and on properties within the Phase One Study Area (refer to Section 4.1.1. below), to satisfy the following Phase One ESA general objectives listed in O. Reg. 153/04:

- to develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One Property;
- to determine the need for a Phase Two ESA;
- to provide a basis for carrying out any Phase Two ESA required; and,
- to provide adequate preliminary information about environmental conditions in the land or water on, in or under the Phase One Property for the conduct of a Risk Assessment following completion of a Phase Two ESA.

### 2.2 PHASE ONE PROPERTY INFORMATION

Information regarding the location and identification of the Phase One Property and the party authorizing this study is provided in the table below. Refer to Figure 1 for the location of the Site, and to Figure 2 for the general layout and features of the Site at the time of the site reconnaissance.

#### SUMMARY OF PHASE ONE PROPERTY INFORMATION

<b>Address:</b>	3145 Conroy Road, Ottawa, ON
<b>Property Identification Number:</b>	04165-0769
<b>Legal Description:</b>	PT LT 2, CON 5RF, PTS 1, 2, 3, Plan 5R-5712, except PT1, 4R11804

<b>UTM Coordinates (centre of site, WGS 84):</b>	18T East: 373538.21 m North: 5026713.53 m
<b>Name and Address of Owner:</b>	WO MW Realty Limited 180 Renfrew Drive, Suite 230, Markham, Ontario – L3R 9Z2
<b>Name and Address of Authorizing Party:</b>	Christine Yee WO MW Realty Limited 180 Renfrew Drive, Suite 230, Markham, Ontario – L3R 9Z2
<b>Current Condition and Use(s):</b>	Vacant with no structure on Site.
<b>Structures:</b>	None
<b>Site Area:</b>	4.86 ha (48,614.38 m <sup>2</sup> )
<b>Occupants (current):</b>	None
<b>Other facilities of note:</b>	None

## 2.3 PLAN OF SURVEY

The survey of the Site from a previous report made by Pinchin for the Client, titled Topographic Details of 3145 Conroy Road, dated 05 January 2024 was reviewed by Terrapex. The PIN for the Site is 04165-0769 (LT). The survey shows the layout of the Site with the former go-kart track on the western portion of the property, a gravel road along the southern property boundary, gravel area, concrete pads related to the former parking lot, building and mini-putt on the central portion of the Site, and vacant area on the eastern portion of the property.

A copy of the plan of survey is included in Appendix I.

## 2.4 ENHANCED INVESTIGATION PROPERTY

An enhanced investigation property is defined in O. Reg. 153/04 as a property that is being used or has been used, in whole or in part, for an industrial use or for commercial use as a garage, a bulk liquid dispensing facility (including a gasoline outlet), or for the operation of dry-cleaning equipment.

Based on the findings of the Phase One ESA (as documented herein), the Site is not an enhanced investigation property.

## 3.0 SCOPE OF INVESTIGATION

### 3.1 GENERAL

The Phase One ESA was conducted in accordance with the current requirements of O. Reg. 153/04 and as outlined in the Terrapex proposal to the Client dated May 2, 2025. The five main components of the Phase One ESA scope of work are described below.

**Records Review:** A review was conducted of available historic and current environmental information pertaining to the Site and the Phase One Study Area in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04.

**Interviews:** An interview was conducted with a representative of the current owner of the Site. Representatives of the previous owners were not available.

**Site Reconnaissance:** A reconnaissance of the Site and accessible properties within the Phase One Study Area was conducted for evidence of potential environmental concerns.

**Evaluation:** The information obtained from the records review, interviews, and Site reconnaissance was reviewed, evaluated and interpreted by the Qualified Person (QP) for this project (see Section 3.2 below) in consideration of the Phase One ESA general objectives and any uncertainty associated with the data sources.

**Reporting:** In accordance with the requirements of Schedule D of O. Reg. 153/04, this report documents the findings, conclusions, and recommendations of the Phase One ESA and includes:

- a table of the current and past uses of the Phase One Property;
- a table of identified potentially contaminating activities (PCAs) and a table of associated areas of potential environmental concern (APECs);
- a Phase One conceptual Site model (CSM); and,
- conclusions and recommendations made based on the evaluation and interpretation of information obtained for the Phase One ESA.

### 3.2 QUALIFIED PERSON

The Phase One ESA was supervised by Greg Sabourin, of Terrapex, located at 20 Gurdwara Road, Ottawa, ON.

Greg Sabourin holds a license under the *Professional Engineers Act* and therefore meets the qualifications to be considered a Qualified Person for the purposes of conducting or supervising environmental site assessments in Ontario per Section 5 (2) (a) of O. Reg. 153/04.

### 3.3 LIMITATIONS

It should be noted that although Terrapex has attempted to verify information wherever possible, except where explicitly noted, we have relied upon the accuracy of information collected during the records review and interview components. This includes Phase I ESA work done by Pinchin in 2024, from which some of the historical records were collected.

The general limitations of the study are provided in Section 8.3. Specific limitations of this Phase One ESA are as follows:

- the former golf range on the eastern portion of the Site was inaccessible due to heavy vegetation at this area;
- no personnel with knowledge of the Site prior to 2024 was available to be interviewed.

In the opinion of the QP, none of the above limitations are considered to have compromised the objectives of the Phase One ESA.

## 4.0 RECORDS REVIEW

### 4.1 GENERAL

Terrapex obtained and reviewed records relating to the Site and surrounding properties within the Phase One Study Area, in accordance with Schedule D (Phase One Environmental Site Assessments) of O. Reg. 153/04. The records and sources of information reviewed are summarized below, and a list of all documents and data cited in this report is provided in Section 9.0.

#### 4.1.1 Phase One Study Area Determination

To determine the Phase One Study Area, Terrapex conducted a preliminary records review to identify any conditions that might warrant an expansion of the Phase One Study Area beyond the minimum required by O. Reg. 153/04. This review included searches / reviews of the following information:

- Aerial photographs;
- Provincial waste disposal site inventory documents; and,
- Reports documenting previously completed environmental investigations of the Site.

The preliminary review did not identify any potential concerns warranting an expansion of the Phase One Study Area. Accordingly, the Phase One Study Area was established to encompass all of the properties located in whole or in part, within 250 m of the boundaries of the Site.

The boundary of the Phase One Study Area is depicted in Figure 3. Note that all distances are calculated from the nearest property boundary of the Site to the nearest boundary of the feature/property in question and are approximate.

#### 4.1.2 First Developed Use Determination

Information obtained during the records review was used to determine the date of the first developed use of the Site, as defined in O. Reg. 153/04, is summarized in the table below.

##### FIRST DEVELOPED USE

Year	Site Feature	Potentially Contaminating Activity <sup>1</sup>	Reference/Source
1981	Construction of a golf driving range and a go-kart circuit and a single-storey building based on information contained in an insurance inspection report.	<ul style="list-style-type: none"> <li>• PCA 28, Schedule D, Reg 153/04 Gasoline and Associated Products Storage in Fixed Tanks</li> <li>• PCA 52, Schedule D, Reg 153/04 (Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems).</li> </ul>	• Aerial & Google Maps

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04.

Based on the above, it was determined that the first developed land use at the Site was in 1981 when the use of the property first resulted in the development of an amusement park with miniature golf, a driving range and a go-kart track based on information from the fire insurance products.

#### 4.1.3 Fire Insurance Products

Pinchin made a request to Environmental Risk Information Services Ltd. (ERIS) for Fire Insurance Plans (FIPs), underwriters' reports or underwriters' plans for the Site and surrounding properties as part of the research conducted as part of their 2024 Phase I ESA. A copy of the fire insurance products from the previous Phase One ESA is provided in Appendix II. Given that additional fire insurance products are not likely to exist, Terrapex did not request a FIP record search as part of this study.

Terrapex reviewed the fire insurance products. A summary of the relevant information obtained from the fire insurance products is presented in the table below, including identification of operations that are considered to be PCAs under O. Reg. 153/04.

##### SUMMARY OF FIRE INSURANCE PRODUCTS

Year	Product	Findings	PCAs <sup>1</sup> /Potential Concerns
1986	Insurance Report titled Cope Report – 1986 Pineland Amusement Ltd. 3145 Conroy Rd., Ottawa	<ul style="list-style-type: none"> <li>The insurance report described that a wood frame building was present at the Site that was built in 1986 that included a ticket office, snack bar and maintenance shop.</li> <li>The Site was described as being used for go-karts, mini putt and a golf driving range with repair shop.</li> <li>The report mentioned that 72 L of gasoline was kept in the building to refuel the go-karts.</li> <li>A figure was also provided showing the approximate location of the building. No other details were provided.</li> </ul>	28 – Gasoline and Associated Products Storage in Fixed Tanks  27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
1995	Multirisk Survey	<ul style="list-style-type: none"> <li>The report mentioned that the Site was developed in 1981.</li> <li>The report indicated that a 9,092 L UST was used to store fuel for use in the go-karts.</li> <li>The name of the operator of the Site was listed as "Tim Rivers".</li> </ul>	28 – Gasoline and Associated Products Storage in Fixed Tanks
1999	Multirisk Report – 1995 Pineland Amusement Ltd. 3145 Conroy Rd., Ottawa	<ul style="list-style-type: none"> <li>The report indicated that the Site had been operating as a go-kart track since 1981.</li> <li>The building was described as being heated by an electric heater and by propane.</li> <li>The report indicated that the Site was supplied by a water well and that a UST was present at the Site but was no longer in use.</li> </ul>	28 – Gasoline and Associated Products Storage in Fixed Tanks

Year	Product	Findings	PCAs <sup>1</sup> /Potential Concerns
		<ul style="list-style-type: none"> <li>The report indicated that fuel was purchase on a daily basis and stored in Underwriters Laboratories of Canada (ULC) containders for use in the go-karts.</li> </ul>	

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04.

#### 4.1.4 Chain of Title

A title search was completed for PIN 04165-0769 by Read Abstracts on June 3, 2025. This PIN comprised the majority of the Site and is considered sufficient to determine the historical use of the Site. The relevant information from the title search is summarized in the table below.

##### SUMMARY OF CHAIN OF TITLE

Years	Name of Owner	Other Information
Unknown - 1840	Jame Brock	None
1840	William Moxley	Deed RO3143, from James Brock
1870	Robert Moxley	Deed GL373, from Elizabeth Moxley
1872	Richard Moxley	Deed GL973, from Robert Moxley
1874	John Crawford	Deed GL2150, from Richard Moxley
1877	Samuel Benoit	Deed GL3411, from estate/assignee of John Crawford
1877	M.L. Crawford	Deed GL3515, from Samuel Benoit
1985	James Gorman	Foreclosure GL7178, from John Simmons
1931	Ellen and Patrick Gorman	Will GR5623, from James Gorman
1952	Her Majesty the Queen	Deed OT7781, from the Estate of Ellen Finn (Gorman)
1954	Federal District Commission (changed name to National Capital Commission by an Act of Parliament)	Deed OT11087/GL51415, from His Majesty the King
2005	Pineland Amusement Ltd.	Deed OC458672, from National Capital Commission
2014	3145 Conroy Road Inc.	Power of Sale OC1572614, from Saldey Inc.
2024	WO MW Realty Limited	Deed OC2743268, from 3145 Conroy Road Inc.

The WO MW Realty Limited was identified as the last registered owner for PIN 04165-0769.

A copy of the Land Registry information is included in Appendix III.

#### 4.1.5 Environmental Reports

Terrapex was provided with the following previous environmental reports for review as part of the scope of the current Phase One ESA:

- Phase I Environmental Site Assessment, 3145 Conroy Road, Ottawa, ON, prepared for WO MW Realty Limited by Pinchin Ltd., dated June 21, 2024.
- Phase II Environmental Site Assessment, 3145 Conroy Road, Ottawa, ON, prepared for WO MW Realty Limited by Pinchin Ltd., dated September 6, 2024.
- Preliminary Geotechnical Investigation – Proposed Commercial Development, 3145 Conroy Road, Ottawa, ON, prepared for WO MW Realty Limited by Pinchin Ltd., dated September 25, 2024.

A summary of the aforementioned previous environmental report is provided below:

##### PINCHIN, JUNE 2024, PHASE I ESA

<b>Comments/Limitations/Other</b>	A Phase I ESA was conducted at 3145 Conroy Road, Ottawa, ON to assess potential issues of environmental concern in relation to the potential acquisition and financing of the Site. The Phase I ESA study area included lands within 100 m of the Road. The Site was included within the Phase I study area for this report.
<b>Identified PCAs</b>	<p>Potential environmental concerns were identified at the following locations:</p> <ul style="list-style-type: none"> <li>• The Site (presence of a 9,092 L gasoline UST); and,</li> <li>• The Site (presence of a 72 L gasoline AST).</li> </ul> <p>Pinchin recommended that a Phase II ESA be conducted concurrently with a ground-penetrating radar (GPR) survey to try to locate the former UST.</p>

##### PINCHIN, SEPTEMBER 2024, PHASE II ESA

<b>Work Program</b>	<ul style="list-style-type: none"> <li>• 2 boreholes to a depth of 6.09 m below ground surface (bgs) at the locations of the former AST and UST</li> <li>• 2 monitoring wells (MW101 &amp; MW102) installed at these borehole locations.</li> </ul>
<b>Site Condition Standards Applied</b>	MECP Table 3 SCS: Full Depth Generic Site Condition Standards for Use in a Non-Potable Ground Water Condition for Fine-textured soils and Industrial/commercial/community property use.
<b>Stratigraphy and Groundwater</b>	<ul style="list-style-type: none"> <li>• The soil stratigraphy below the grass generally consisted of brownish-grey sand and gravel, some silt to a depth of 1.52 m bgs overlying grey clayey silt with trace sand that extended to the maximum borehole completion depth of 6.09 m bgs. Wet soil conditions were generally observed between 3.20 and 6.09 m bgs.</li> <li>• Bedrock was not encountered</li> <li>• Groundwater levels depths ranged from 1.34 m to 4.24 m bgs (July-September 2024)</li> <li>• Groundwater flow was inferred to be the south. However, it was noted that a groundwater flow direction was not provided and only two monitoring wells were monitored.</li> </ul>
<b>Analytical Program</b>	Soil: BTEX/ PHC F1-F4, VOCs and PAHs

	<ul style="list-style-type: none"> <li>Groundwater: BTEX/ PHC F1-F4, VOCs and PAHs</li> <li>pH and grain size</li> </ul>
<b>Results</b>	<p>GPR Survey:</p> <ul style="list-style-type: none"> <li>The location of the former UST could not be confirmed. No anomalies were identified that might indicate the location of the former UST. However, it was also noted that the survey was not conducted to the north of the former building due to uneven ground surface.</li> </ul> <p>Soil:</p> <ul style="list-style-type: none"> <li>Concentration of all parameters in the soil samples were less than the Table 3 SCS</li> </ul> <p>Groundwater:</p> <ul style="list-style-type: none"> <li>Concentration of all parameters in the groundwater samples were less than the Table 3 SCS</li> </ul>
<b>Comments/Limitations/Other</b>	None

#### PINCHIN, SEPTEMBER 2024, PRELIMINARY GEOTECHNICAL INVESTIGATION

<b>Work Program</b>	<ul style="list-style-type: none"> <li>5 boreholes to a depth of 6.7m to 12.8 m bgs</li> <li>1 monitoring well (BH2) installed at one of the borehole locations.</li> </ul>
<b>Site Condition Standards Applied</b>	MECP Table 3 SCS: Full Depth Generic Site Condition Standards for Use in a Non-Potable Ground Water Condition for Fine-textured soils and Industrial/commercial/community property use.
<b>Stratigraphy and Groundwater</b>	<ul style="list-style-type: none"> <li>the soil stratigraphy at the Site comprised fat clay, a sand deposit, till and probable bedrock to the maximum borehole termination depths of approximately 12.8 m bgs.</li> <li>bedrock was encountered at depths between approximately 11.1 to 12.8 mbgs.</li> <li>groundwater levels depths were 3.90 m and 3.80 m bgs during the July and August 2024 monitoring events.</li> </ul>
<b>Analytical Program</b>	<ul style="list-style-type: none"> <li>none</li> </ul>
<b>Results</b>	<ul style="list-style-type: none"> <li>none</li> </ul>
<b>Comments/Limitations/Other</b>	Moderate groundwater inflow through the fat clay material is expected where the excavations extend less than 0.60 m below the groundwater table. It is believed that this groundwater inflow can be controlled using a gravity dewatering system with perimeter interceptor ditches and high-capacity pumps.

It should be noted that one of the well records provided a site plan from DST Consulting Engineers dated November 2004. It appears that the well record and site plan were related to an environmental assessment conducted at the time for the National Capital Commission (NCC). A copy of the report was not available for review. However, from the site plan it appears that the assessment included the installation of four monitoring wells. The location of the UST was shown to the north of the building adjacent to the go-kart track.

#### 4.1.6 Property Use Records

A municipal directory search was conducted for the Site and neighbouring properties within 250 m for years between 1960 and 2023. Municipal directory information was obtained by ERIS.

Based on a review of the information obtained, a summary of search results that are considered to be PCAs, or otherwise of potential environmental concern to the Site, is provided in the table below:

#### SUMMARY OF CITY DIRECTORY INFORMATION

Address	Proximity <sup>1</sup>	Year(s)	Listing(s)	Potential PCAs <sup>2</sup> /Concerns
3145 Conroy Road	The Site	1993 to 2006	Thunderbird Golf & Go-Karts	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
2140 Thurston Drive (assumed current 2120 Thurston Road)	95 m north of the Site	1993-94	LOEB Printing	31 - Ink Manufacturing, Processing and Bulk Storage
2184a Thurston Drive	200 m north of the Site	1993-94	Thurston Auto Repair	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles
2120 Thurston Drive	95 m north of the Site	1993 to 2023	Coin-Op Laundry/Coinmatic Canada Inc.	N/A
3201 Conroy Road	215 m south of the Site	2021 to 2023	Petro-Canada	28 - Gasoline and Associated Products Storage in Fixed Tanks
2183 Thurston Drive	205 m north of the Site	2006 to 2023	OCM Manufacturing Inc.	19 - Electronic and Computer Equipment Manufacturing

<sup>1</sup> Direction and approximate distance to nearest Site boundary

<sup>2</sup> As set out in Table 2 in Schedule D of O. Reg. 153/04.

A copy of the municipal directory search results is provided in Appendix IV.

## 4.2 ENVIRONMENTAL SOURCE INFORMATION

### 4.2.1 ERIS Environmental Databases

Terrapex ordered an RSC database report from ERIS for any records associated with the Site and properties within the Phase One Study Area. ERIS searched government and privately owned databases for environmental source information, including the information and documents listed in paragraph 7 of subsection 3 (2) in Schedule D of O. Reg. 153/04.

The report from ERIS is reproduced in Appendix V and presents information for the records found, a Site diagram which plots the locations of the properties for which records were found (provided sufficient address information was available), as well as an appendix which contains a list, and descriptions of the databases ERIS searched.

The ERIS report indicated 502 listings within the Phase One Study Area. Relevant listings considered to be PCAs under O. Reg. 153/04 are summarized in the table below.

**SUMMARY OF RELEVANT ERIS FINDINGS**

Address	Proximity <sup>1</sup>	Database	Year(s) <sup>2</sup>	Details	PCA <sup>3</sup> s/Potential Concerns
3145 Conroy Road	The Site	Ontario Well Records Ontario Regulation 347 Waste Generators Summary (GEN)	1997	The Site is listed as a waste generator (ON8848934) is 2004. The type of waste was not identified.	Other - Generator
3201 Conroy Road (Petro-Canada Retail Fuel Outlet)	157 m south-southwest	Fuel Storage Tank (FST) Fuel Storage Tank – Historic (FSTH)	2009	Records indicate the presence of four double walled fibreglass 50,000 L USTs at the property which were installed in 2002.	28 – Gasoline and Associated Products Storage in Fixed Tanks
2799 Swansea Cres. (City of Ottawa Automotive Garage)	Adjacent to the east	Environmental Compliance Approval (ECA) Fuel Storage Tanks – Historic (FSTH) Ontario Regulation 347 Waste Generators Summary (GEN) Ontario Spills (SPL)	1994 to 2024	<p>A record was provided for the approval for two spray paint booths in the automotive and carpentry sections of the building with approval provided in 2000.</p> <p>A record was provided for the municipal and private sewage works to build a stormwater management facility in 2007. Also, the records indicate the presence of two double walled 25,000 L USTs at the property installed in 1993.</p> <p>An approval for one standby diesel generator was issued in 2009.</p> <p>The property was listed as a waste generator for a variety of wastes consisting of light fuels, waste oils and lubricants, aromatic solvents and oil skimming's and sludges from 1994 to 2021</p>	<p>27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles</p> <p>39. Paint Manufacturing, Processing and Bulk Storage</p> <p>Other - Spills</p> <p>Other – Waste generation</p>

Address	Proximity <sup>1</sup>	Database	Year(s) <sup>2</sup>	Details	PCA's/Potential Concerns
2799 Swansea Cres. (cont'd) (City of Ottawa Automotive Garage)				<b>Spill Records:</b> Diesel fuel spills of 25 L, 50 L, and 100 L were reported in 2012, 2014, and 2024, respectively. In addition, oil spills of 25 L and 100 L occurred in 2002, along with a 20 L motor oil spill in 2010 and a 6 gallon hydraulic oil spill in 2004.	
Thurston Road & Conroy Road	167 m west-northwest	Ontario Spills (SPL)	1995	A spill of 113 L diesel fuel to waterfilled ditch	Other – Spill
3100 Conroy Road (City of Ottawa Conroy Works Yard)	145 m northwest	Ontario Regulation 347 Waste Generators Summary (GEN) Ontario Spills (SPL)	2011 to 2016	Property listed as a waste generator from oil skimming and sludges from 2012 to 2018. The following spills and releases occurred at the property: <ul style="list-style-type: none"> <li>• A spill of approximately 30 L of hydraulic oil in 2016.</li> <li>• A release of diesel fuel in 2011 that resulted in 10 m<sup>3</sup> of contaminated soil.</li> <li>• A discharge of approximately 1,000 L of calcium chloride to a catch basin in 2013.</li> </ul>	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles Other - Spills
2000 Thurston Drive	30 m to the north	Ontario Regulation 347 Waste Generators Summary (GEN)	1991 to 2021	The property is listed as a waste generator for Paint, Pigment, Coating from 1991 to 2021.	Other – Waste Generation

Address	Proximity <sup>1</sup>	Database	Year(s) <sup>2</sup>	Details	PCA's/Potential Concerns
2001 Thurston Drive (Rogers Communication Inc.)	183 m to the north	Certificates of Approval (CA) Environmental Registry (EBR) Environmental Compliance Approval (ECA)	2011	A certificate of approval was issued for air emissions generated for a standby diesel generator at the property with approval provided in 2011.	28 - Gasoline and Associated Products Storage in Fixed Tanks
2100 Thurston Drive (Variety of businesses)	30 m to the north	Ontario Regulation 347 Waste Generators Summary (GEN) Scott's Manufacturing Directory (SCT)	1990 to 2016	The property was listed as a waste generator for paint, other specified inorganics, aliphatic solvents, petroleum distillates, waste oils and lubricants from 1994 to 2021. Waste generator name is identified as "FND Graphics Inc."  The property was registered for the distribution of industrial machinery, equipment, and supplies, as well as for printing operations, and the manufacturing of switchgear boards and relays.	31 - Ink Manufacturing, Processing and Bulk Storage Other – Waste Generation
2140 Thurston Drive (Loeb Printing)	30 m north northeast	Ontario Regulation 347 Waste Generators Summary (GEN) Scott's Manufacturing Directory (SCT)	1987 to unknown	The property was listed as a waste generator of amines waste, halogenated solvents, light fuels between 2006 and 2022.  The property also had records indicating that the Department of Defence generated a variety of wastes consisting of acid heavy metals, aromatic solvents between 1999 to 2001.  Property is identified as a variety of manufacturing in Scotts manufacturing directory.	Other – Waste Generation

Address	Proximity <sup>1</sup>	Database	Year(s) <sup>2</sup>	Details	PCA's/Potential Concerns
2150 Thurston Drive	30 m north northeast	Ontario Regulation 347 Waste Generators Summary (GEN)	1987 to unknown	The property was listed as a waste generator of a variety of wastes including halogenated solvents, paints inorganic laboratory chemicals between 2006 and 2022. Companies identified in the waste generator records include DST Consulting Engineers, Englobe Corp and Fiery Canada Inc, Direct Energy Business and Base Controls Ltd.  Property was identified as switchgear and switch board manufacturing under Base Controls Ltd.	19 - Electronic and Computer Equipment Manufacturing  Other – Waste Generation
2170 Thurston Drive (Cemtech Ltd.)	30 m north	Scott's Manufacturing Directory (SCT)	1982 to 1984	The property was registered for the following manufacturing Computer and Peripheral Equipment Manufacturing under the business name "Cemtech".	19 - Electronic and Computer Equipment Manufacturing
2160 Thurston Drive (Fuji Graphic Systems Canada Inc./ McCutcheon Graphics Inc.)	30 m north	Ontario Regulation 347 Waste Generators Summary (GEN)	1992 to 2001	The property was listed as a generator of variety of wastes including photo processing waste and petroleum distillates from 1992 to 2001.	Other – Waste Generation
2161 Thurston Drive (Brofort Inc. & MPC Circuits Inc.)	175 m north	Ontario Regulation 347 Waste Generators Summary (GEN)  Scott's Manufacturing Directory (SCT)	1984 to 2001	The property was listed as a waste generator for alkaline wastes, acid heavy metals, paint, and other specified inorganic and petroleum distillates from 1992 to 2006.  Property was identified manufacturer of printed circuit boards under M.P.C Circuit Inc. that was established in 1984.	19 - Electronic and Computer Equipment Manufacturing

Address	Proximity <sup>1</sup>	Database	Year(s) <sup>2</sup>	Details	PCA <sup>3</sup> s/Potential Concerns
2183 Thurston Drive (OCM Manufacturing)	175 m north northeast	Certificates of Approval (CA) Environmental Registry (EBR) Ontario Regulation 347 Waste Generators Summary (GEN) Scott's Manufacturing Directory (SCT)	1988 to 2021	The property was registered for the Certificate of approval for industrial sewage works  The property was listed as a waste generator for a variety of wastes including aromatic solvents, aliphatic solvents, acid solutions, petroleum distillates and waste oils and lubricants between 1988 to 2021.  The property was registered for the Semiconductor and Other Electronic Component Manufacturing and Electronic Coils, Transformers, And Other Inductors.	19 - Electronic and Computer Equipment Manufacturing
2188 Thurston Drive (J.H. Ryder Machinery Limited)	46 m north	Ontario Regulation 347 Waste Generators Summary (GEN)	1988 to 2021	The property was listed as a waste generator of waste oils and lubricants and petroleum distillate and photo processing waste between 1992 and 2002.	Other – Waste Generation
2200 Thurston Drive	100 m northeast	Ontario Regulation 347 Waste Generators Summary (GEN)	1995 to 2011	The property was listed as a generator of variety of wastes including petroleum distillates and waste oils and lubricants. Properties are listed as "Moham Electric" and "Schindler Elevator"	Other – Waste Generation

<sup>1</sup> direction and approximate distance to nearest Site boundary

<sup>2</sup> For SCT listings, the year is the year the company was established.

<sup>3</sup> As set out in Table 2 in Schedule D of O. Reg. 153/04.

## 4.2.2 Other Government and Regulatory Documentation

Terrapex contacted representatives of provincial and municipal government agencies to request any environmental information in their files related to the Site, and/or any available information pertaining to nearby water bodies and areas of natural significance within the Phase One Study Area. Terrapex also conducted searches of available information provided on government websites. The responses received from the government agencies, as well as the additional information obtained through website searches, are summarized in the following sections. Copies of relevant documents and maps are included in Appendix VI.

### 4.2.2.1 Freedom of Information

A request for information was submitted to the Ontario Ministry of the Environment, Conservation and Parks (MECP) Freedom of Information, Protection of Privacy Office for information in their files regarding the Site that pertain to any Environmental Concerns, Orders and Spills. In a response dated May 8, 2025 (included in Appendix IV), the MECP indicated that they did hold records pertaining to the Site. At the writing of this report the records had not been received.

The Technical Standards & Safety Authority (TSSA) was contacted regarding records of fuel storage tanks at the Site. Terrapex received a response from TSSA on May 9, 2025. No records were found for the Site.

### 4.2.2.2 Areas of Natural Significance

Terrapex conducted a search of the information provided in the following resources to identify any areas of natural significance (as defined by O. Reg. 153/04) at, or within 30 m of, the Phase One Property. The search comprised:

- Review of the Ministry of Natural Resources and Forestry (MNRF) Land Information Ontario (LIO) website to identify the following:
  - Provincial Parks and Conservation Reserves;
  - Areas of Natural and Scientific Interest (life science or earth science);
  - Provincially Significant Wetlands;
  - Niagara Escarpment Natural and Protection Areas;
  - Oak Ridges Moraine Natural Core or Natural Linkage Areas;
  - Wilderness Area.
- Review of Official Plans for upper tier and lower tier municipalities (as applicable).
- Review of extensive information sources (Section 9.0, References) to identify threatened or endangered species at risk, and their habitat, that have the potential to occur at, or within 30 m of, the Phase One Property.

The information gleaned from these sources is summarized in the table below.

#### SUMMARY OF REVIEW FINDINGS FOR AREAS OF NATURAL SIGNIFICANCE

Feature	Present	Details
Provincial Park/Conservation Reserve	No	• None
MNRF Provincially Significant ANSI	No	• None
Significant Woodland	Yes	• Wooded area found adjacent to the Site at 3169 Conroy Road
MNRF Provincially Significant Wetland	Yes	• Wetland found adjacent to the Site at 3169 Conroy Road
Environmentally Significant in Municipal Official Plan	No	• None
Designated Natural or Protection Area by Niagara Escarpment Plan	No	• None
Threatened/Endangered Species & Associated Habitat <sup>1</sup>	Yes	<ul style="list-style-type: none"> <li>• Threatened species: American Ginseng, Blanding's Turtle, Chimney Swift, Least Bittern, Bank Swallow, Bobolink, Eastern Meadowlark</li> <li>• Endangered species: Butternut, Eastern Prairie Fringed-Orchid, Bobolink, Eastern Meadowlark, Hoary Bat, Eastern Red Bat, Silver-haired Bat, Little Brown Myotis, Northern Myotis, Tri-colored Bat.</li> </ul>
Designated Natural Core or Linkage Area by Oak Ridges Moraine Conservation Plan	No	• None
Wilderness Area	No	• None

<sup>1</sup> Further study (including site inspection) is required to determine if any lands identified as potential candidate habitat of threatened and endangered species (that are not also deemed an area of natural significance by other applicable definitions), can be excluded as an area of natural significance.

#### 4.2.2.3 City of Ottawa Historic Land Use Inventory

In 1999, the former Regional Municipality of Ottawa-Carleton commissioned the preparation of a Historic Land Use Inventory (HLUI). The purpose of the HLUI was to collect information on the type and location of all land uses within the boundaries of the former Regional Municipality of Ottawa-Carleton (now the City of Ottawa) which had or have the potential to cause contamination in soil, ground water or surface water. A response from was received on June 10, 2025. The following is a summary of the pertinent potential concerns.

#### SUMMARY OF POTENTIAL CONCERNS IDENTIFIED BY HLUI

Address <sup>1</sup>	Business (s)	PCAs/Potential Concerns
Railway located to the north of the Site	Canadian National Railway	HLUI identified that a rail line was located to the north of the Site.
3201 Conroy Road (157 m southeast of the Site)	1146580 ONTARIO INC (Retail Fuel Outlet)	HLUI identified the presence of four active 50,000 L gasoline USTs located at the retail fuel outlet located at 3201 Conroy Road.
3100 Conroy Road (145 m northwest of the Site)	Snow Disposal Location  (City of Ottawa Conroy Works yard)	HLUI identified that a snow disposal location was operated at 3100 Conroy Road between 1994 and 1999 by the Regional Municipality of Ottawa Carleton.

Address <sup>1</sup>	Business (s)	PCAs/Potential Concerns
2000 Thurston Drive 30 m to the north	Kus Tum Screen Printing and Embroidery Hyper Performance Auto Care	HLUI identified a printing business and an automotive garage
2100 Thurston Drive 30 m to the north	Imperial Auto	HLUI identified the presence of an automotive garage between 2005 and 2017
2120 Thurston Drive	Loeb Printing / Defence Services Publication Depot	HLUI identified a printing business which had occupied the Site between 1994 and 2000, and 2000 to 2012.
2183 Thurston Drive (175 m north northeast)	OCM Manufacturing INC	HLUI identified as electric components and circuit boards manufacture at the property between 1988 and 2017.
2161 Thurston Drive (175 m north northeast)	MPC Circuits Inc.	HLUI identified as electric components and circuit boards manufacture at the property between 1984 and 2003.

<sup>1</sup> Distances relative to the site are approximate and are measured from nearest property boundaries.

#### 4.2.2.4 [Other Documentation](#)

Terrapex reviewed the Source Water Protection Information Atlas compiled by the MECP to determine Wellhead and Intake Protection Zones in the vicinity of the Site. There were no Wellhead or Intake Protection Zones within the Phase One Study Area.

Mapping available on the Rideau Valley Conservation Authority (RVCA) website indicated that the Site was within the Ottawa River East Watershed. Accordingly, surface water drainage from the Site (other than what is captured into the municipal storm water sewer system) may ultimately flow to this water body.

#### 4.2.3 Client File Information

The Client provided Terrapex with previous environmental reports, concept plans for the potential redevelopment of the Site and Terrapex gathered an existing plan of survey for the Site dated January 5, 2024 (reproduced in Appendix I).

#### 4.2.4 Aerial Photographs

Aerial photographs were selected (based on availability, quality, and scale) for review to identify changes to topographic features, as well as development of the site and surrounding properties within the Phase One Study Area over the years. The earliest aerial photograph obtained for review was from the year 1965. An approximate 10-year intervening time frame between successive photographs/images was considered to be sufficient to permit a reasonable evaluation of the area development and apparent land use history.

The relevant features identified in the aerial photographs are summarized in the table below. It should be noted that identification of some specific features at the Site and surrounding areas was precluded by the scale and resolution of the aerial photographs. Copies of the aerial photographs are included in Appendix VII.

#### SUMMARY OF AERIAL PHOTOGRAPH IMAGES

Year	Source	Key Features - Site	Key Features - Surroundings	Possible PCAs/APECs
1965	geoOttawa	<ul style="list-style-type: none"> <li>The Site was vacant and assumed to be used for agricultural purposes.</li> </ul>	<ul style="list-style-type: none"> <li>Conroy Road was visible to the west of the Site.</li> <li>A railway line with an approximate east-west orientation was located to the north of the Site. A bigger rail yard was visible to the west of the Site.</li> <li>The surrounding properties appear to be mainly vacant and/or agricultural.</li> <li>McEwan Creek is visible to the south of the Site</li> </ul>	None Identified
1976	geoOttawa	<ul style="list-style-type: none"> <li>Similar to 1965</li> </ul>	<ul style="list-style-type: none"> <li>Generally similar to 1965</li> <li>The adjacent property to the south appears to contain disturbed soil or fill material with an access route from Conroy Road.</li> <li>Commercial properties have been identified to the east along Stevenage Drive</li> </ul>	30 - Importation of Fill Material of Unknown Quality
1984	National Air Photo Library	<ul style="list-style-type: none"> <li>The Site has been developed into a go-kart track on the western portion of the Site, with a mini-golf course located to the north-central portion of the property, and a building between the mini-golf and the go-kart track.</li> <li>A parking lot is visible to the south of the mini-golf with an access route from Conroy Road along the southern portion of the Site.</li> <li>The eastern portion of the property remains undeveloped.</li> </ul>	<ul style="list-style-type: none"> <li>Similar to 1976</li> <li>The disturbed soil or fill material on the adjacent property to the south has expanded towards east.</li> </ul>	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles  30 - Importation of Fill Material of Unknown Quality
1994	National Air Photo Library	<ul style="list-style-type: none"> <li>Similar to 1984</li> <li>A golf driving range appears to have been added in the eastern area of the Site.</li> </ul>	<ul style="list-style-type: none"> <li>Commercial properties have been developed to the north along Thurston Drive.</li> <li>Swansea Crescent has been constructed to the east of the Site.</li> </ul>	No new concerns identified

Year	Source	Key Features - Site	Key Features - Surroundings	Possible PCAs/APECs
			<ul style="list-style-type: none"> <li>The formerly vacant property to the east has been developed with a large building (assumed current City of Ottawa yard).</li> <li>Extensive residential development is visible to the south of the Site (outside of the Phase One Study Area).</li> <li>McEwan Creek is no longer visible. It is assumed the creek was channelized as part of the residential development to the south of the Site.</li> </ul>	
1999	geoOttawa	<ul style="list-style-type: none"> <li>Similar to 1994</li> </ul>	<ul style="list-style-type: none"> <li>An equipment and storage yard is visible on the property to the east (2799 Swansea Crescent). A pump island is visible on the eastern portion of the property.</li> <li>The property to the northwest of the Site, across Conroy Road appears to be under development, based on the disturbed vegetation and earth works.</li> <li>Extensive commercial development has occurred to the north, east and northwest of the Site.</li> <li>Earth movement is visible on the property to the southeast of the Site (3203 Conroy Road).</li> </ul>	<p>52 - Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems</p> <p>28 - Gasoline and Associated Products Storage in Fixed Tanks</p>
2007	geoOttawa	<ul style="list-style-type: none"> <li>Similar to 1999</li> </ul>	<ul style="list-style-type: none"> <li>Similar to 1999</li> <li>The property to the south along Johnston Road has been developed for residential use.</li> <li>A retail fuel outlet (3201 Conroy Road) is visible to the south the Site at the intersection of Conroy Road and Johnston Road.</li> <li>Earth movement is visible on the property to the southeast of the Site (3203 Conroy Road).</li> </ul>	<p>28 - Gasoline and Associated Products Storage in Fixed Tanks</p> <p>30 - Importation of Fill Material of Unknown Quality</p>
2011	geoOttawa	<ul style="list-style-type: none"> <li>No significant changes from 2007</li> </ul>	<ul style="list-style-type: none"> <li>No significant changes from 2007</li> </ul>	No new concerns identified
2015	geoOttawa	<ul style="list-style-type: none"> <li>The building previously present on the Site has been demolished, and the Site appears to be inactive.</li> </ul>	<ul style="list-style-type: none"> <li>Across Conroy Road to the northwest, the property has been developed as a City works yard (3100 Conroy Road). The western portion of this property appears to be used a snow dump. Three ASTs are visible in the middle of the property.</li> </ul>	<p>27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles</p> <p>28 - Gasoline and Associated Products Storage in Fixed Tanks</p>

Year	Source	Key Features - Site	Key Features - Surroundings	Possible PCAs/APECs
2017	geoOttawa	<ul style="list-style-type: none"> <li>No visible changes from 2015</li> </ul>	<ul style="list-style-type: none"> <li>Additional commercial development is visible to the east of the Site along Swansea Crescent.</li> <li>The private fuel outlet at 2799 Swansea Crescent (to the east of the Site) has been redeveloped.</li> </ul>	No new concerns identified
2021	geoOttawa	<ul style="list-style-type: none"> <li>No visible changes from 2017</li> </ul>	<ul style="list-style-type: none"> <li>No significant changes from 2017</li> </ul>	No new concerns identified
2023	National Air Photo Library	<ul style="list-style-type: none"> <li>The Site is vegetated</li> </ul>	<ul style="list-style-type: none"> <li>No significant changes from 2021</li> </ul>	No new concerns identified

Based on the review of the aerial photographs described above, the Site appears to have been used as an amusement park with miniature golf, a driving range and a go-kart track since at least 1984. The surrounding properties to the north, west and east to have been used for commercial purposes since 1984, the south has been used for residential purposes. Ever increasing commercial development has occurred at the properties located to the north, east and west of the Site. The Site appears vacant since at least 2015.

#### 4.2.5 Topography, Hydrology, Geology

A topographic map of the Site and Phase One Study Area was obtained from Atlas of Canada – Toporama. Geological plans for the Site were also reviewed from previous environmental reports provided by the Client. A summary of reviewed information is presented in the table below:

##### SUMMARY OF TOPOGRAPHY, HYDROLOGY AND GEOLOGY

<b>Site &amp; Regional Topography:</b>	The Site is flat, and no major topographic features are mapped on the Site. The Phase One Study Area generally slopes to the east towards the Greens Creek, which flows north towards the Ottawa River.
<b>Approximate Site Elevation:</b>	84 m above sea level (asl).
<b>Surface Water Drainage:</b>	Overland flow with infiltration
<b>Inferred Groundwater Flow Direction:</b>	South towards McEwan Creek. McEwan Creek flows generally to the east towards Greens Creek.
<b>Physiography and Soil Stratigraphy:</b>	The Site and Phase One Study Area are located on older alluvial deposits: clay, silt, sand, gravel and some organic remains. Borehole/well records report the soil stratigraphy at the Site comprises surficial organics overlying fat clay, a sand deposit, till and probable bedrock to the maximum borehole termination depths of approximately 12.8 m bgs.
<b>Bedrock and Approximate Depth:</b>	The underlying bedrock at this Site is of the Georgian Bay Formation, Blue Mountain Formation and Billings Formation consisting of shale, limestone, dolostone and siltstone at approximately 12.8 m bgs.

The topographic map is reproduced in Appendix VIII.

#### 4.2.6 Fill Materials

Fill materials are suspected to be present at the Site, used during construction of the go-kart track, building, driveway and parking lot. Note that suspected fill material was identified by Pinchin during the previous Phase II ESA / geotechnical investigation within the former parking lot area and in the vicinity of the former building at BH5. It is assumed that this would be engineered fill imported at the time of the development of the Site and would be limited to specific areas on the western portion of the property.

#### 4.2.7 Water Bodies and Areas of Natural Significance

Based on a review of information and records in the preceding sections, a summary of water bodies, areas of natural significance, and groundwater sensitivity information within the Phase One Study Area is provided in the table below.

##### WATER BODIES AND AREAS OF NATURAL SIGNIFICANCE

<b>Surface Water:</b>	<p>McEwan Creek is located approximately 350 m south of the Site. Based on aerial photographs, it is assumed that the creek was channelized as part of the construction of the residential development to the south of the Site (i.e., south of Johnston Road). McEwan Creek discharges to Ramsay Creek and ultimately Greens Creek approximately 2.2 km southeast of the Site.</p> <p>The Mather Award Drain is located 1,200 m northeast of the Site. The Mather Award Drain also directs water generally to the southeast to Greens Creek. The Mather Award Drain drains into the Greens approximately 3.17 km to the east of the Site.</p> <p>A ditch is located on the northside of the rail line to the north of the Site. The ditch is mapped on the Rideau Valleys Conservation Authorities (RVCA) GIS mapping website. However, the ditch is not expected to meet the definition of a waterbody per O. Reg 153/04 as it is not anticipated to be permanent feature.</p>
<b>Area of Natural Significance:</b>	None at, or within 30 m of the Site.
<b>Wellhead and Intake Protection Areas:</b>	None located within the Phase One Property, or within the Phase One Study Area.
<b>Municipal Drinking Water System:</b>	All properties are deemed to be connected to the municipal drinking water system supplied by the City of Ottawa.

#### 4.2.8 Well Records

A total of sixteen well records were identified in the Phase One Study Area in the ERIS report (Appendix V). A summary of relevant water well records with sufficient information on the hydrogeological and geological characteristics of the Phase One Study Area are summarized in the table below:

**SUMMARY OF SELECTED WATER WELL RECORDS**

Well ID/ Tag	Year	Type of Well	Location	General Stratigraphy	Approximate Depth to Water Table (m bgs)
1535222	2004	Record of abandonment of four sample well/test holes on Site for a Phase II ESA by National Capital Commission.	The Site	Silty sand up to 0.7 m underlain by clay up to 5.0 m bgs.	Water found at 3 m bgs
7280108 7280107 7280106	2016	Record of three observation/monitoring/test hole at the adjacent property to the south.	3169 Conroy Road	Silty sand up to 0.91 m bgs underlain by clay and silt from 3.1 m to 6.1 m bgs.	Not provided
7311680	2018	Record of one observation well at the City of Ottawa garage at the east side of the property.	2799 Swansea Crescent	Black fill up to 0.5 m bgs, followed by clay to a depth of 6.7 m bgs.	Not provided
7049870 7152103	2007 2010	Record of abandonment of three monitoring well at the retail fuel outlet, which are later decommissioned in 2010.	3100 Conroy Road	Fine sand up to a depth of 1 m bgs, underlain by clay to a depth of 20 m bgs.	Not provided
7280061 7280060	2016	Record of abandonment of two test hole/ observation well.	2191 Thurston Road	Gravel fill up to a depth of 3 m bgs, followed by clay to a depth of 20 m bgs.	Not provided
7119472	2009	Record of abandonment of three test hole/ observation well at the OCM Manufacturing Inc.	2183 Thurston Road	Loose sand fill up to a depth of 0.61 m, followed by clay to a depth of 7.32 m bgs.	Not provided
7280063	2017	Record of abandonment of monitoring well. Type not provided	2191 Thurston Road	Gravel fill up to a depth of 3 m bgs, underlain by clay to a depth of 20 m bgs.	Not provided

It should be noted that many wells in the province have been decommissioned or abandoned without appropriate reporting to the MECP; in addition to issues regarding the accuracy of well locations, some MECP database listings pertain to wells that are possibly no longer in use or in existence.

It is important to note that a Phase II Environmental Site Assessment (ESA) was conducted on the Site in 2004 by the National Capital Commission, during which four boreholes were drilled. This information was obtained from the Ontario well records. The corresponding report was not provided to Terrapex by the Client.

### 4.3 SITE OPERATING RECORDS

As the Site was determined not to constitute an Enhanced Investigation Property as defined in O. Reg. 153/04, a review of site operating records was not required by the regulation.

## 5.0 INTERVIEWS

### 5.1 SITE REPRESENTATIVE

A representative of the property owner with knowledge of the Site was interviewed by Terrapex. Relevant information obtained during the interview is summarized below.

#### SUMMARY OF SITE-KNOWLEDGEABLE PERSON INTERVIEW

<b>Name and Position of Knowledgeable Person:</b>	John Larche Regional Manager, Miller Waste Systems
<b>Interview Date:</b>	Through email June 11, 2025
<b>Limitation(s) of Knowledge:</b>	Mr. Larche has been involved with the Site since 2023 although he also had visited the go-kart track while it was in operation.
<b>Site History, Use(s):</b>	The Site was previously used as a go-kart business. The Site has been vacant since 2015.
<b>Knowledge of Previous Environmental Reports:</b>	None
<b>Current or Previous Fuel or Chemical Storage:</b>	To his knowledge, the property featured one large structure. The east side of the building contained the office area, ticket counter, and canteen. The south (track side) portion of the same structure was used for overnight storage of the go-karts and for performing maintenance. Fuel was stored and handled inside the service area using handheld fuel jugs.
<b>Knowledge of Spills, Leaks, Discharges:</b>	Mr. Larche was not aware of any large spills during the operation of the go-kart track. Although to his recollection, the go-karts regularly leaked oil and fuel. These leaks were typically limited to the track and staging areas.  More recently, there has been evidence of illegal dumping at the Site. The materials dumped ranged from general household waste and bricks to BBQs and several piles of yellow bags of unknown contents partially covered with dirt.

The statements and information provided by knowledgeable person were consistent with information obtained from other sources as part of the Phase One ESA investigation. No additional information pertaining to the Site could be provided.

Specific limitations associated with the interview of the knowledgeable person are provided in Section 3.3.

## 6.0 SITE RECONNAISSANCE

### 6.1 GENERAL REQUIREMENTS

The reconnaissance of the Site and the Phase One Study Area was conducted by Terrapex staff of Terrapex, as follows:

#### SITE RECONNAISSANCE PARTICULARS

Date, Time, and Duration of Investigation	Weather Conditions	Guide	Occupant/Use of Facility During the Investigation	Enhanced Investigation Property <sup>1</sup>	Names and Qualifications of Persons Conducting the Investigation
June 4, 2025 10:00 – 2:00 pm	Overcast	None	Unoccupied	No	Sree Padmakumar, M.Eng., EIT.

<sup>1</sup> As per clause 32 (1) of O. Reg. 153/04

Cursory observations of the surrounding properties within the Phase One Study Area made during the Site reconnaissance were limited to areas visible from the Site or from publicly accessible areas and vantage points. During the Site reconnaissance, Terrapex photographed the general Site layout, as well as any specific environmental concerns identified on the site or on surrounding properties within the Phase One Study Area.

Specific limitations encountered during the Site reconnaissance are provided in Section 3.3.

The site location plan is shown on Figure 1. The site layout is shown on Figure 2. Selected photographs including general descriptions are provided in Appendix X.

### 6.2 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

#### 6.2.1 Site Description, Structures, and Other Improvements

The Site is located on the east of Conroy Road accessed from a driveway from Conroy Road along the southern portion of the property. The Site is vacant that consists of an abandoned go-kart racetrack on the western portion of the Site, mini golf course situated on the central portion of the Site, and a former golf range on the east side of the property.

At the time of inspection, the Site was heavily vegetated. There are couple of utility poles on Site, which are not in use but trace back to the Conroy Road.

#### 6.2.2 Storage Tanks

No aboveground storage tanks were observed during the inspection. However, a concrete pad was observed during the inspection, located on the central portion the property which may represent the slab of the former building. Based on other records, there was a former UST located to the north of the building, but no evidence of a UST was observed.

### 6.2.3 Water Sources

A cistern was noted to be located within the area of the former mini-put green (refer to Photograph 7). No other signs of water sources were visible on the Site.

### 6.2.4 Underground Utilities

A summary of the buried utilities at the Site based on inquiries and observations at the Site is provided in the table below.

#### UTILITIES PRESENT ON SITE

Utility	Present on Site	Description & Location
Electrical	No	Hydro poles were observed on the Site that likely provided overhead hydro to the Site during operations.
Gas	No	No evidence of gas being present on Site was observed.
Oil/Fuel	No	None observed
Sewer	No	NA
Water	No	A concrete pad with a concrete lip cemented during the inspection, located to the east of the property between the former mini-golf and the golf range. From reviewing the old water well records, a site map from a previous phase II shows that this location had a drinking water well.
Communications	No	Disconnected telecommunication line are visible on the utility poles on Site, tracing back to the Conroy Road.

### 6.2.5 Interior Features of Buildings and Structures

No buildings on Site were observed.

### 6.2.6 Exterior Observations

The former racetrack with asphalt surface was visible on the western portion of the Site. The location of the former driving range was heavily vegetated and was not accessible during the investigation. Piles of construction debris were observed and are assumed to have been illegally dumped at the Site during the time of the inspection (refer to Photograph 4, 13 and 14). No buildings were present at the Site.

### 6.2.7 Enhanced Investigation Property

The Site is not considered an Enhanced Investigation Property.

### 6.3 PHASE ONE STUDY AREA, OTHER THAN PHASE ONE PROPERTY

A summary of the observations from reconnaissance of the Phase One Study Area is provided in the table below.

#### SURROUNDING PROPERTY FEATURES AND OBSERVATIONS

Feature	Approximate Location	Details
Land Use	North	Railway tracks, various commercial properties.
	East	City of Ottawa garage and other commercial properties beyond.
	South	Residential properties, and a retail fuel outlet beyond.
	West	City of Ottawa work yard, and commercial properties beyond.
Water Body	None	None observed.
Area(s) of Natural Significance	None	None observed.
Municipal Drinking Water System	None	The properties surrounding the Site is served by the municipal drinking water system.
Well(s) for Consumption/ Agricultural Use	None	None observed.
PCA <sup>1</sup>	North, East and South of the Site	Previous auto garage, cinematic on north, City of Ottawa garage on the east and a fuel retail outlet on the south.

<sup>1</sup>As set out in Table 2 in Schedule D of O. Reg. 153/04, or otherwise as determined by the QP.

### 6.4 WRITTEN DESCRIPTION OF INVESTIGATION

The site reconnaissance was conducted to identify, describe, and document specific items at the Site and at surrounding properties within the Phase One Study Area, in accordance with Schedule D of O. Reg. 153/04. Written descriptions detailing the observations made by Terrapex personnel during the site reconnaissance are provided above in Sections 6.2 and 6.3, for the Site and the Phase One Study Area, respectively.

Discussions regarding the identification of PCAs on the Site and on surrounding properties with the Phase One Study Area are provided below in Section 7.2.

## **7.0 REVIEW AND EVALUATION OF INFORMATION**

### **7.1 CURRENT AND PAST USES**

The current registered owner of the Site is WO MW Realty Limited , which has owned the property since 2024. The Site was first developed, for commercial use, in approximately 1981. A summary of the current and past uses of the property is provided in Table 1 appended to this report.

### **7.2 POTENTIALLY CONTAMINATING ACTIVITY**

Based on the review, evaluation, and interpretation of the information obtained from the records review, interviews, and site reconnaissance, two PCAs were identified on the Site and twenty-one PCAs were identified within the Phase One Study Area. Details regarding the PCAs are provided in Table 2 appended to this report. Refer to Figure 4 for the location of the PCAs with respect to the Site and the Phase One Study Area limits.

### **7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN**

An area of potential environmental concern (APEC), as defined in O. Reg. 153/04, is the area on, in, or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One environmental site assessment, including through, (a) identification of past or present uses on, in or under the Phase One Property and (b) identification of potentially contaminating activity.

A total of two APECs were identified pertaining to the site as detailed in Table 3 appended to this report and shown on Figure 5.

### **7.4 PHASE ONE CONCEPTUAL SITE MODEL**

The Phase One Conceptual Site Model (CSM) has been developed based on the findings of the records review, site reconnaissance, and interviews completed to date as described by the foregoing sections of this report. The Phase One CSM consists of the narrative within this report and the Figures contained in this report.

## **8.0 CONCLUSIONS**

### **8.1 WHETHER PHASE TWO ESA REQUIRED BEFORE RSC SUBMITTED**

If the City wishes to confirm the soil and/or groundwater quality in the area of the identified APECs, subsurface investigations would be recommended. Based on the identification of APECs from this Phase One ESA, if future development requiring a change in land use is considered, a Phase Two ESA would be required to support filing a RSC.

### **8.2 RC BASED AN PHASE ONE ESA ALONE**

A RSC cannot be filed for the Phase One Property based solely on this Phase One ESA.

### **8.3 SIGNATURES**

This report has been completed in accordance with the terms of reference for this project as agreed upon by WO MW Realty Limited (Client) and Terrapex Environmental Ltd. (Terrapex) and generally accepted engineering or environmental consulting practices in this area.

Terrapex has exercised due care, diligence, and judgement in the performance of this assessment; however, studies of this nature have inherent limitations. This report is intended to provide only a general assessment of the environmental conditions encountered at the site. By necessity, the findings and observations regarding actual or potential contamination of the property are based solely on the extent of observations and information gathered during the assessment, and subsequent investigations of differing scope may reveal conflicting results. Findings and observations may also change with the passage of time. Where applicable, observations of nearby properties were limited to areas visible from the site or from publicly accessible areas and vantage points.

Terrapex has relied in good faith on information and representations obtained from the Client and third parties and, except where specifically identified, has made no attempt to verify such information. Terrapex accepts no responsibility for any deficiency or inaccuracy in this report as a result of any misstatement, omission, misrepresentation, or fraudulent act of those providing information. Terrapex shall not be responsible for conditions or consequences arising from relevant facts that were concealed, withheld, or not fully disclosed at the time of the study.

This report has been prepared for the sole use of WO MW Realty Limited . Terrapex accepts no liability for claims arising from the use of this report, or from actions taken or decisions made as a result of this report, by parties other than WO MW Realty Limited .

The objectives and requirements set out in Schedule D of O. Reg. 153/04 have been applied in carrying out this environmental site assessment.

Respectfully submitted,

**TERRAPEX ENVIRONMENTAL LTD.**

Sree Padmakumar, M.Eng, EIT.,

## TABLES

**TABLE 1: TABLE OF CURRENT AND PAST USES OF THE PHASE ONE PROPERTY**

(Refer to clause 16(2)(b), Schedule D, O. Reg. 153/04)

Year	Name of Owner	Description of Property Use	Property Use <sup>1</sup>	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
1840 - 1870	William Moxley	Vacant	Agricultural or Other Use	No information available for this time period.
1870 - 1872	Elizabeth Moxley	Vacant	Agricultural or Other Use	No information available for this time period.
1872 - 1874	Richard Moxley	Vacant	Agricultural or Other Use	No information available for this time period.
1874 - 1877	John Crawford	Vacant	Agricultural or Other Use	No information available for this time period.
1877 - 1877	Samuel Benoit	Vacant	Agricultural or Other Use	No information available for this time period.
1877 - 1885	M.L.. Crawford	Vacant	Agricultural or Other Use	No information available for this time period.
1885	John Simmons	Vacant	Agricultural or Other Use	No information available for this time period.
1885 - 1931	James Gorman	Vacant	Agricultural or Other Use	No information available for this time period.
1931 - 1952	Ellen Gorman	Vacant	Agricultural or Other Use	No information available for this time period.
1952 - 1954	Her Majesty the Queen	Vacant	Agricultural or Other Use	No information available for this time period.
1954 - 2005	National Capital Commission (NCC)	Use as a golf cart track and driving range from 1981 to 2011.	Agricultural or Other Use	The Site was developed as a golf-kart and driving range "Thunderbird Golf & Go-Karts" in 1981 based on aerial photographs and insurance inspection reports. The
2005	Pineland Amusement Ltd.	Use as a golf cart track and driving range from 1981 to 2011.	Commercial Use	The Site operated as a golf kart track and driving range from 1981 to 2011.
2014	3145 Conroy Road Inc.	Vacant	Commercial Use	The building previously present on the Site has been demolished, and the Site appears to be inactive.
2024	WO MW Realty Limited	Vacant	Commercial Use	The Site is abandoned and vacant.

Notes:

1 - for each owner, specify one of the following types of property use (as defined in O. Reg. 153/04) that applies:

Agriculture or other use | Commercial use | Community use | Industrial use | Institutional use | Parkland use | Residential use

2 - when submitting a record of site condition for filing, a copy of this table must be attached

**TABLE 2: POTENTIALLY CONTAMINATING ACTIVITIES ON, IN OR UNDER THE PHASE ONE PROPERTY AND STUDY AREA**

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 1A	28 - Gasoline and Associated Products Storage in Fixed Tanks	The Site	The presence of the former UST located at the Site.	Previous Reports Ontario Well Records HLUI City Directory Insurance Inspection Reports	Possible	Likely, the only known references to this UST is a mention in previous reports and well records, with no confirmed location identifier	APEC 1
PCA 1B	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	The Site	The storage of gasoline and repair of go-karts within the area of the main building as described in the inspection reports.	Insurance Inspection Reports	Possible	Unknown of the exact storage of materials	APEC 2
PCA 2A	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	2799 Swansea Cres (170 m east)	The operation of the City of Ottawa automotive garage at the City work yard.	ERIS Report Aerial Photographs HLUI	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No
PCA 2B	28 - Gasoline and Associated Products Storage in Fixed Tanks	2799 Swansea Cres (170 m east)	The operation of the current and former private fuel outlet associated with the City of Ottawa works yard.	Aerial Photographs ERIS	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 2C	39. Paint Manufacturing, Processing and Bulk Storage	2799 Swansea Cres (170 m east)	A record was provided for the approval for two spray paint booths in the automotive and carpentry sections of the building with approval provided in 2000.	ERIS	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No
PCA 3A	28 - Gasoline and Associated Products Storage in Fixed Tanks	3100 Conroy Road (145 m northwest)	The operation of the City of Ottawa works yard, and the private retail fuel outlet with reported spills.	ERIS Aerial Photographs HLUI Site Inspection	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No
PCA 3B	Other – Operation of Snow Dump	3100 Conroy Road (200 m northwest)	The operation of the City of Ottawa snow dump located at City works yard	ERIS Report Aerial Photographs HLUI	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No
PCA 3C	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	3100 Conroy Road (200 m northwest)	Operation of a garage associated with the City works yard	ERIS Site Inspection	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No
PCA 3D	48 - Salt Manufacturing, Processing and Bulk Storage	3100 Conroy Road (200 m northwest)	Assumed salt storage at the City works yard due to a reported 1,000 L calcium chloride spill in 2013	ERIS	Unlikely to being cross-gradient of the Site.	No information is available on the operations	No

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 4	46 - Rail Yards, Tracks and Spurs	Located to adjacent northern boundary of the Site (adjacent to the north)	The presence of the Canadian National rail line was identified along the north property boundary.	HLUI Aerial Photographs Site Inspection	Unlikely as any impacts are expected to be localized to the rail line	None	No
PCA 5	28 - Gasoline and Associated Products Storage in Fixed Tanks	3201 Conroy Road (157 m south southwest)	Records indicated the presence of a Petro-Canada retail fuel outlet with four double walled fibreglass 50,000 L USTs which were installed in 2002.	ERIS City Directories HLUI Aerial Photographs	Not likely due to being down-gradient from the Site	None	No
PCA 6	Other - Spills	Thurston Road & Conroy Road (167 m west northwest)	A spill of 113 L diesel fuel to water-filled ditch was reported in 1995.	ERIS	Not likely due to being cross-gradient and the distance from the Site	Unclear if environmental assessment and/or remediation was conducted	No
PCA 7	30 - Importation of Fill Material of Unknown Quality	3203 Conroy Road (adjacent to southeast corner of the Site)	The importation of fill to the property was visible in the aerial photographs (2007)	Aerial Photographs	Not likely as fill does not appear to extend onto the Site	Type and extent of fill material is unknown	No
PCA 8A	31 - Ink Manufacturing, Processing and Bulk Storage	2000 Thurston Drive (30 m to the north)	The property was listed as a waste generator for paint, pigment, coating from 1991 to 2021. The city directories identified the property as a printing business.	ERIS HLUI	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills.	Quantities of waste generated are unknown  Waste handling practices are unknown	No

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 8B	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	2000 Thurston Drive (30 m to the north)	The property was listed as a waste generator for paint, pigment, coating from 1991 to 2021. HLUI identify the property as automotive garage ('Hyper Performance Auto Care').	ERIS HLUI	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills.	Quantities of waste generated are unknown Waste handling practices are unknown	No
PCA 9	28 - Gasoline and Associated Products Storage in Fixed Tanks	2001 Thurston Drive (183 m to the north)	The suspected presence of a diesel fuel tank for a back up generator based on air emissions approval.	ERIS	Not likely as there have been no reported spills	Volumes of tank not provided.	No
PCA 10A	31 - Ink Manufacturing, Processing and Bulk Storage	2100 Thurston Drive (30 m to the north)	The property was listed as a generator of variety of wastes. Property was identified as "FND Graphics".	ERIS	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills.	Quantities of waste generated are unknown Waste handling practices are unknown	No
PCA 10B	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	2100 Thurston Drive (30 m to the north)	The property was listed as a generator of variety of wastes. The property was identified as an automotive garage ("Imperial Auto") in HLUI.	ERIS HLUI	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills.	Quantities of waste generated are unknown Waste handling practices are unknown	No

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 11	31 - Ink Manufacturing, Processing and Bulk Storage	2140 Thurston Drive (30 m to the north)	The property was listed as a generator of halogenated solvents and is suspected to be a former/current printing business. The property was identified in waste generator records as "Loeb printing"	ERIS HLUI City Directory	Possible	Quantities of waste generated are unknown  Waste handling practices are unknown	APEC 3
PCA 12	19 - Electronic and Computer Equipment Manufacturing	2150 Thurston Drive (30 m to the north)	The property was listed as a waste generator for various wastes including halogenated solvents and was identified as manufacturing electrical components.	ERIS	Possible	Significant uncertainty as it is unknown if actual manufacturing was completed.	APEC 4
PCA 13	Other – Waste Generation	2160 Thurston Drive (30 m to the north)	The property was listed as a generator of variety of wastes including photo processing waste and petroleum distillates from 1992 to 2001.	ERIS	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills.	Quantities of waste generated are unknown  Waste handling practices are unknown	No
PCA 14	19 - Electronic and Computer Equipment Manufacturing	2161 Thurston Drive (175 m north)	Property is identified manufacturer of printed circuit boards under M.P.C Circuit Inc. established in 1984.	ERIS HLUI	Not likely due to the distance from the Site	No information is available on the operations  Waste handling practices are unknown	No

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 15	19 - Electronic and Computer Equipment Manufacturing	2170 Thurston Drive (30 m to the north)	The property is registered for the manufacturing of computer and peripheral equipment under the business name "Cemtech".	ERIS	Not likely as there is no reported waste generation or spills	Significant uncertainty as it is unknown if actual manufacturing was completed.	No
PCA 16	19 - Electronic and Computer Equipment Manufacturing	2183 Thurston Drive 175 m to the north northeast	Property is suspected of electronics manufacturing based on waste generator records and other ERIS records. The business as identified as OCM Manufacturing.	ERIS HLUI City Directory	Not likely due to the distance from the Site	Significant uncertainty as it is unknown if actual manufacturing was completed.	No
PCA 17	Other – Waste Generator	2200 Thurston Drive (100 m northeast)	The property is listed as a generator of variety of wastes including petroleum distillates and waste oils and lubricants. Properties are listed as "Moham Electric" and "Schindler Elevator"	ERIS HLUI	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills	No information is available on the operations Waste handling practices are unknown	No
PCA 18	27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	2188 Thurston Road Or 2184 Thurston Drive (46 m north)	The property is listed as a waste generator of waste oils and lubricants and petroleum distillate and photo processing waste between 1992 and 2002.  Property is identified as an automotive garage in ERIS records and in City directories from 1993 to 1994 (Thurston Auto Repairs)	ERIS City Directory	Not likely due to nature of the wastes generated and quantities are expected to be relatively minor with no reported spills	No information is available on the operations Waste handling practices are unknown	No

PCA <sup>1</sup>	Potentially Contaminating Activity <sup>2</sup>	Address/ Location/ Distance/ Direction	Description	Data Source	Likelihood To Affect the Site / Rationale	Uncertainty	Area(s) of Potential Environmental Concern
PCA 19	30 - Importation of Fill Material of Unknown Quality	3169 Thurston Road (adjacent to the south)	The importation of fill to the property was visible in the aerial photographs (1976 and 1984)	Aerial Photographs	Not likely as fill does not appear to extend onto the Site	Type and extent of fill material is unknown	No

<sup>1</sup> As shown on Figure 4.

<sup>2</sup> As set out in Table 2 in Schedule D of O. Reg. 153/04.

**TABLE 3: TABLE OF AREAS OF POTENTIAL ENVIRONMENTAL CONCERN**

(Refer to clause 16(2)(a), Schedule D, O. Reg. 153/04)

Area of Potential Environmental Concern <sup>1</sup>	Location of Area of Potential Environmental Concern on Phase One Property	Potentially Contaminating Activity <sup>2</sup>	Location of PCA (On-Site Or Off-Site)	Contaminants Of Potential Concern <sup>3,4</sup>	Media Potentially Impacted (Ground water, Soil, and/or Sediment)
APEC 1	The area directly in the vicinity of the former UST	PCA 1A: 28 - Gasoline and Associated Products Storage in Fixed Tanks	On-Site	BTEX/PHCs	Soil & Groundwater
APEC 2	The footprint of the former building and within its immediate vicinity due to the storage of fill and maintenance and storage of go-karts.	PCA 1B: 27 - Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	On-Site	BTEX/PHCs, VOCs and PAHs	Soil & Groundwater
APEC 3	North-central portion of the Site	PCA 11: 31 - Ink Manufacturing, Processing and Bulk Storage	Off-Site	VOCs	Groundwater
APEC 4	North-central portion of the Site	PCA 12: 19 - Electronic and Computer Equipment Manufacturing	Off-Site	VOCs	Groundwater

1 - Areas of potential environmental concern means the area on, in or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One environmental site assessment, including through,

- (a) identification of past or present uses on, in or under the Phase One Property, and  
(b) identification of potentially contaminating activity.

2 - Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One study area.

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011 and as of February 19, 2021, as specified below:

**List of Method Groups:**

ABNs	Dioxins/Furans, PCDDs/PCDFs	PCBs	VOCs	Metals	B- HWS	EC	Methyl Mercury
CPs	OCs	PAHs	BTEX	As, Sb, Se	Cl <sup>-</sup>	Cr (VI)	Low or high pH
1,4-Dioxane	PHCs	THMs	Bromomethane	Na	CN <sup>-</sup>	Hg	SAR

4 - Where an identified contaminant of potential concern is not listed in the table that sets out the applicable site conditions standards in the Soil, Ground Water and Sediment Standards for which sampling and analysis is performed and is associated with potentially contaminating activity, the qualified person is referred to Subsection 43(3) of the Regulation.

5 - When submitting a record of site condition for filing, a copy of this table must be attached.

## Opta Historical Environmental Services Enviroscan<sup>TM</sup> Terms and Conditions

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Reference No. 11275084 / Building No. 01

( Surveyed By C LAFLEUR on 11-JUL-86 )

-----  
Please note that the information contained in this report was gathered during  
a physical inspection of the risk by an IAO Loss Control Representative.

If you wish to obtain building or contents rates for this risk, please refer  
to the Rate Card in the list of products available for this risk.  
Please call the IAO Help Desk or your local IAO Representative for help in  
obtaining a rate for this risk, or do it yourself by going to [www.iao.ca](http://www.iao.ca)  
and using the New X-rate to generate a new rate yourself.

-----  
IAO reports, prepared in compliance with commonly accepted risk control  
standards existing at the time services are rendered, are developed from an  
inspection of the premises and/or from data supplied by or on behalf of the  
Purchaser. IAO does not purport to list all hazards. While changes and  
modifications referred to in the reports are designed to upgrade protection  
and loss prevention of the premises, IAO assumes no responsibility for  
management and control of these activities. IAO will not be responsible to  
the Purchaser for any loss or damages, whether consequential or other,  
however caused, incurred or suffered, as a result of the service being  
provided.

M U L T I R I S K - F I R E , L I A B I L I T Y A N D  
B A S I C C R I M E  
-----

OCCUPANCY:

The insured is an owner/occupant at this location. They have been in operation since 1981 and at this location for 18 year(s). They occupy 111 sq. m and are the major occupant, having 18 employees. The premises are in good condition. The insured is interested in loss prevention, however there have not been any losses during the last 3 years.

\* Occupancy Description (Insured / major tenant if insured is non-occupant)

The insured occupies approximately 12 acres of leased land as an amusement park with miniture golf,a driving range and Go Kart track. There is one building located on the premises which is occupied by the insured as an office, ticket room,take-out canteen and storage shop area .

\* Other Classes of Occupants

None

\* Undersirable Features

The kitchen commercial hood grease filters require cleaning.

It is recommended that this location be resurveyed in 1 year(s).

-----  
BUILDING:

- \* Built - 1981 Height: Storey(s) (excluding basement) - 1
- \* There are no additions.
- \* There are no renovations.
- \* Building condition - Good

\* Area: Ground Floor - 111 sq. m Total (including basement) - 111 sq. m

-----  
BASIC CONSTRUCTION:

- \* Walls - 100% Wood Frame - Wood frame wood clad.
- \* Floors - (excluding basement) 100% Concrete
- \* Roof - 100% - Wood joist
  - Surface material(s) - Asphalt shingles
  - Roof replaced, unable to determine when.

INTERIOR FINISH:

- \* Walls - 100% non-combustible
  - \* Ceilings - 100% non-combustible
- 

BASEMENTS: None

VERTICAL OPENINGS: None

MEZZANINE: None

OUTBUILDINGS: None

-----

HEATING:

- \* Electric Baseboard Units - 15% - Electric
    - Year replaced could not be determined, % replaced could not be replaced.
    - Installation appears safe
  - \* Unheated - 85%
  - \* Fuel Tanks/Supply:
    - Supply - Propane Cylinder
    - Fuel Tank Capacity - Undetermined at the time of the survey
    - Location - Outside above ground
- 

ELECTRICAL:

- \* Condition - Good and appeared safe at the time of the survey.
  - \* Wiring - Non-Metallic
  - \* Overcurrent protection - Circuit Breakers.
  - \* Electrical system - Year replaced could not be determined, % replaced could not be replaced.
- 

PLUMBING:

- \* Condition - Good at the time of the survey.
  - \* Piping is Copper
  - \* Plumbing - Year replaced could not be determined, % replaced could not be replaced.
-

EXPOSURES: (within 15m of the risk):

- \* FRONT: OPEN
- \* REAR: OPEN
- \* LEFT: OPEN
- \* RIGHT: OPEN

-----

MUNICIPAL PROTECTION:

- \* The FUS Public Fire Protection Classification is 3
- \* Responding (career) fire department Ottawa H.P.A.
- \* Distance from risk Less than 2.5 km
- \* Access via Paved roads. Year-round.
  
- \* The building itself is easily accesible to the fire department.
- \* One hydrant within 305m

PRIVATE PROTECTION at this location includes the following:

- \* Standard extinguishers
- \* Restaurant cooking protection - Supplement attached
  
- \* An automatic sprinkler system is not present.

M U L T I R I S K - L I A B I L I T Y  
-----

OCCUPANCY - GENERAL INFORMATION

- \* Neighbourhood is predominantly commercial, residential
  - \* Insured - owner/occupant    Area occupied - 111 sq. m
  - \* 5% accessible to public.    Public access is considered moderate
  - \* Gross revenue - could not be determined at the time of the survey
- 

PREMISES information at the time of this survey

- \* The following appeared to be SATISFACTORY:

Floor surfaces & coverings; Wall & ceilings; Interior Lighting; Exterior  
Lighting; Interior Housekeeping; Exterior Housekeeping; Washrooms;  
Sidewalks, Yards & Parking Lots; Snow & ice removal; Signs & Awnings;  
Roof attachments; Fire exits

- \* Other features present:

Sale of food

- \* Elevating devices in operation - none

---

M U L T I R I S K - B A S I C C R I M E

---

NEIGHBOURHOOD:

- \* Predominantly commercial, residential
- \* Stable
- \* Best described as having a low crime rate

BUSINESS:

- \* Description - Amusement Park.
- \* Hours of Operation - 9:00 AM to 11:00 PM 7 Days a week.
- \* Typical Stock - Golf clubs and balls, Go Carts, food and drink supplies.
- \* Smash and Grab exposure is moderate
- \* There is no safe on the premises

-----

GENERAL PROTECTION at the time of this survey:

- \* The following appeared to be SATISFACTORY:

Exterior Lighting, Interior Lighting, Permisses fully fenced, Roof  
Accessability, Police Patrols, Gate(s) secured at night

- \* Security Alarm System - Yes
- 

SECURITY SYSTEM (TENANT or OWNER/OCCUPANT):

- \* A premises alarm system is in place
- \* The extent of protection by this system is perimeter, space/area
- \* The alarm is ULC Central/Monitoring station
- \* Line security is provided
- \* The type of line security is Dedicated line

PHYSICAL PROTECTION (TENANT or OWNER/OCCUPANT):

- \* The exterior locks at this location are deadbolt, slide bolt
- \* The windows are not barred

This report section is designed to provide basic crime information only. More detailed crime information can be obtained by ordering an Expanded Crime Supplement.

---

M U L T I R I S K - C O O K I N G

BUSINESS:

\* The business operates as canteen at this location, with outdoor terrace.  
The insured has been at this location for 18 years and in this type of  
business for 30 years.

\* Liquor permit - No

KITCHEN:

\* Wall Finish - Drywall  
\* Ceiling Finish - Drywall  
\* Floor Covering - Vinyl Tile  
\* Wall finish near appliances - Non-combustible  
\* Cleanliness - Good  
\* Pest Control Program - None

REFRIGERATION INSTALLATION:

\* Refrigerators - 2 - in good repair.

\* Freezers - 2 - in good repair.

APPLIANCES:

\* Grill/Griddle - 1 Fuel - Propane  
- Automatic shut-off - Provided  
- Hood construction - Galvanized steel  
- Protection - Fixed system

\* Deep fat fryer - 1 Fuel - Electric  
- Automatic shut-off - Provided  
- Hood construction - Galvanized steel  
- Protection - Fixed system

-----

EXHAUST SYSTEM CLEANING:

- \* Filter(s) - Weekly
  - Performed by Insured
  - Filter(s) were not clean at the time of the survey.
  
- \* Hoods - Monthly
  - Performed by Insured
  - Hoods were not clean at the time of the survey.
  
- \* Ducts - As Required
  - Performed by Insured
  - It could not be determined if ducts were clean at time of survey.

EXHAUST DUCTS:

- \* Installed in 1992
- \* Arrangement - Extends through the roof; Passes through combustible materials; Protected by a fixed extinguishing system
- \* Ventilation equipment - adequate

FIXED EXTINGUISHING SYSTEMS:

- \* Wet Chemical System labelled by ULC
    - Manual emergency operation is provided
    - Installation approved
    - Certificate not available
    - Manufacturer - Pyro Chem
    - Model - PCL-165
- 

MAINTENANCE CONTRACT:

- \* Maintenance contract is available
- \* Maintained by Total Fire & Security
- \* Telephone - (613) 228-0073
- \* Date last serviced - 01-Apr-1999
- \* Stated service frequency - Annual

-----

OTHER PROTECTION:

- \* Automatic sprinklers are not provided
- \* Adequate kitchen extinguishers are provided
- \* Extinguisher types - Dry Chemical (40-B:C)
- \* ULC labelled grease extraction system not provided

---

M U L T I R I S K  
R E M A R K S / R E C O M M E N D A T I O N S  
-----

REMARKS:

- \* Fire, Liability & Basic Crime - This is a seasonal business which appears to be very successful. The insured is in operation between the months of April to mid October. The risk is not connected to the municipal water supply , all water is provided from a local well. There are 22 Go Cart in operation at the present time. There is an underground fuel storage tank located on the premises which is no longer used by the insured. All fuel required is purchased by the insured on a daily basis and stored in ULC listed safety containers. The building is well maintained with good housekeeping throughout. The insured was co-operative and readily supplied information to complete the survey and access to the premises.
- \* Cooking - The kitchen area is not in operation as yet for this season . The kitchen area was clean and tidy at the time of the survey. The hood and grease filters require cleaning(Rec.made).

\* 99-1     Cooking - The plenum and the exhaust duct of the kitchen hood  
              should be cleaned now and on a regular basis.

Ontario Branch  
Confidential Report

MULTIRISK SURVEY

Insured: PINELAND AMUSEMENTS LTD.

Location Surveyed: 3145 CONROY RD  
OTTAWA, ONTARIO  
K1G 3N4

Person Contacted: Tim Rivers  
Telephone Number: (613) 739-3064

Policy Number:  
AIS Reference: 11275084

Surveyed by: Herb Nelson  
Date of Survey: 1995.05.16

Committed to Service Excellence

NOTE: The sole purpose of this report is to provide insurance pricing and underwriting information about the particular insured and location named. Only the person requesting this survey will receive a copy of the report, and IAO asks that it be kept strictly confidential. This report does not guarantee compliance with any standards or with any federal, provincial or municipal codes, ordinances or regulations. Tests of fire and other protection equipment have not been conducted or witnessed during this survey.

IAO reports, prepared in compliance with commonly accepted risk control standards existing at the time services are rendered, are developed from a survey of the premises and/or from data supplied by or on behalf of the Purchaser. IAO does not purport to list all hazards. While changes and modifications, referred to in the reports are designed to upgrade protection and loss prevention of the premises, IAO assumes no responsibility for management and control of these activities. IAO will not be responsible to the Purchaser for any loss or damages, whether consequential or other, however caused, incurred or suffered, as a result of the services being provided.

None

It is recommended that this location be resurveyed in 1 year(s).

-----  
BUILDING:

- \* Built - 1981      Height: Storey(s) (excluding basement) - 1
- \* There are no additions.
- \* There are no renovations.
- \* Building condition - Good

\* Area: Ground Floor - 111 sq. m      Total (including basement) - 111 sq. m

-----  
BASIC CONSTRUCTION:

- \* Walls - 100% Wood Frame - Wood frame wood clad
- \* Floors - (excluding basement) 100% Concrete
- \* Roof - 100% - Wood joist
  - Surface material(s) - Asphalt shingles
  - Original roof.

INTERIOR FINISH:

- \* Walls - 100% non-combustible
  - \* Ceilings - 100% non-combustible
- 

BASEMENTS: None

VERTICAL OPENINGS: None

MEZZANINE: None

OUTBUILDINGS: None

-----

HEATING:

- \* Electric Baseboard Units - 15% - Electric
    - Original installation.
    - Installation appears safe
  - \* Unheated - 85%
  - \* Fuel Tanks/Supply:
    - Supply - Propane Cylinder (kg)
    - Fuel Tank Capacity (kg) - 136 KG.
    - Location - Outside above ground
- 

ELECTRICAL:

- \* Condition - Good and appeared safe at the time of the survey.
  - \* Wiring - Non-Metallic
  - \* Overcurrent protection - Circuit Breakers.
  - \* Electrical system - Original installation.
- 

PLUMBING:

- \* Condition - Good at the time of the survey.
  - \* Piping is Copper, Plastic
  - \* Plumbing - Original installation.
-

EXPOSURES: (within 15m of the risk):

- \* FRONT: OPEN
- \* REAR: OPEN
- \* LEFT: OPEN
- \* RIGHT: OPEN

-----

MUNICIPAL PROTECTION:

- \* The FUS Public Fire Protection Classification is 3
- \* Responding (career) fire department Ottawa
- \* Distance from risk Less than 2.5 km
- \* Access via Paved roads. Year-round.
  
- \* The building itself is easily accesible to the fire department.
- \* One hydrant within 305m

- \* Automatic sprinklers are not provided
- \* Adequate kitchen extinguishers are provided
- \* Extinguisher types - Dry Chemical (40-B:C)
- \* ULC labelled grease extraction system not provided

---

M U L T I R I S K  
R E M A R K S / R E C O M M E N D A T I O N S  
-----

REMARKS:

- \* Fire, Liability & Basic Crime - This is a seasonal business normally operating from mid April to mid September. Heat and water supplies are shut off during the off season. There is no public water supply to the premises and domestic water is supplied from a local well with filtering system.

There are 25 Go Karts on the premises. There is a 9092 litre underground gasoline tank to supply fuel for the Go Karts. Daily consumption records are maintained.

Rules are posted on the building exterior walls for the use of the mini golf and the Go Karts. Approximately 80% of the building is used as a storage shed and maintenance shop.

The insured was fully cooperative and readily supplied information for the survey and access to all areas of the premises.

- \* Cooking - The business is open for five months a year. The fixed extinguishing system is serviced on a once a year basis rather than the normal twice a year service for full time use.

No recommendations made at this time.

RE: CITY DIRECTORY RESEARCH  
3145 Conroy Road  
Ottawa, ON K1G

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

3100-3205 of Conroy Road  
All of Gardenia Court  
All of Grandpark Circle  
2755-2800 of Swansea Crescent  
All of Thurston Drive

**Search Notes:**

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

**Government Publication Date: Up to Nov 2024**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Apr 2024**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Apr 30, 2024**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**Federal [CDRY](#)

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2022**

**Commercial Fuel Oil Tanks:**Provincial [CFOT](#)

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Chemical Manufacturers and Distributors:**Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**Private [CHM](#)

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Apr 30, 2024**

**Compressed Natural Gas Stations:**Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Feb 2025**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Apr 2025**

**Certificates of Property Use:**Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Apr 30, 2025**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Aug 2024**

**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Oct 2023**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011 - Apr 30, 2025**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Apr 30, 2025**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011 - Apr 30, 2025**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Aug 31, 2024**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Apr 30, 2022****Environmental Penalty Annual Report:**Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2024****List of Expired Fuels Safety Facilities:**Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023****Federal Convictions:**Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\*****Contaminated Sites on Federal Land:**Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Jan 2025****Fisheries & Oceans Fuel Tanks:**Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019****Federal Identification Registry for Storage Tank Systems (FIRSTS):**Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: Oct 31, 2021****Fuel Storage Tank:**Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Oct 2023**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Dec 31, 2024**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Apr 2024**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: 31 Oct, 2023**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 31, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2025**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

**Government Publication Date: Dec 31, 2023**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Nov 2023**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Feb 28, 2025**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

**Government Publication Date: Feb 2024****National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Feb 28, 2025****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

**Government Publication Date: 1800-Aug 2024****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Apr 30, 2025**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date:** 1999, 2002, 2004, 2005, 2009-2014

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date:** 1920-Jan 2005\*

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011 - Apr 30, 2025

**Ontario PFAS Spills:**

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024; Aug 2024; Oct-Nov 2024

**NPRI Reporters - PFAS Substances:**

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

**Government Publication Date:** Feb 2024

**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

**Government Publication Date:** Feb 2024

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

**Government Publication Date:** Jun 30, 2024

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - Apr 30, 2025

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2021

**Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

**Government Publication Date:** 1997-Sept 2001, Oct 2004-Apr 2025

**Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Apr 30, 2024

**Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024; Aug-Feb 2025

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date:** 1990-Dec 31, 2021

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date:** 1915-1953\*

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date:** 1970 - Apr 2024

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011 - Apr 30, 2025**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Dec 31 2023**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

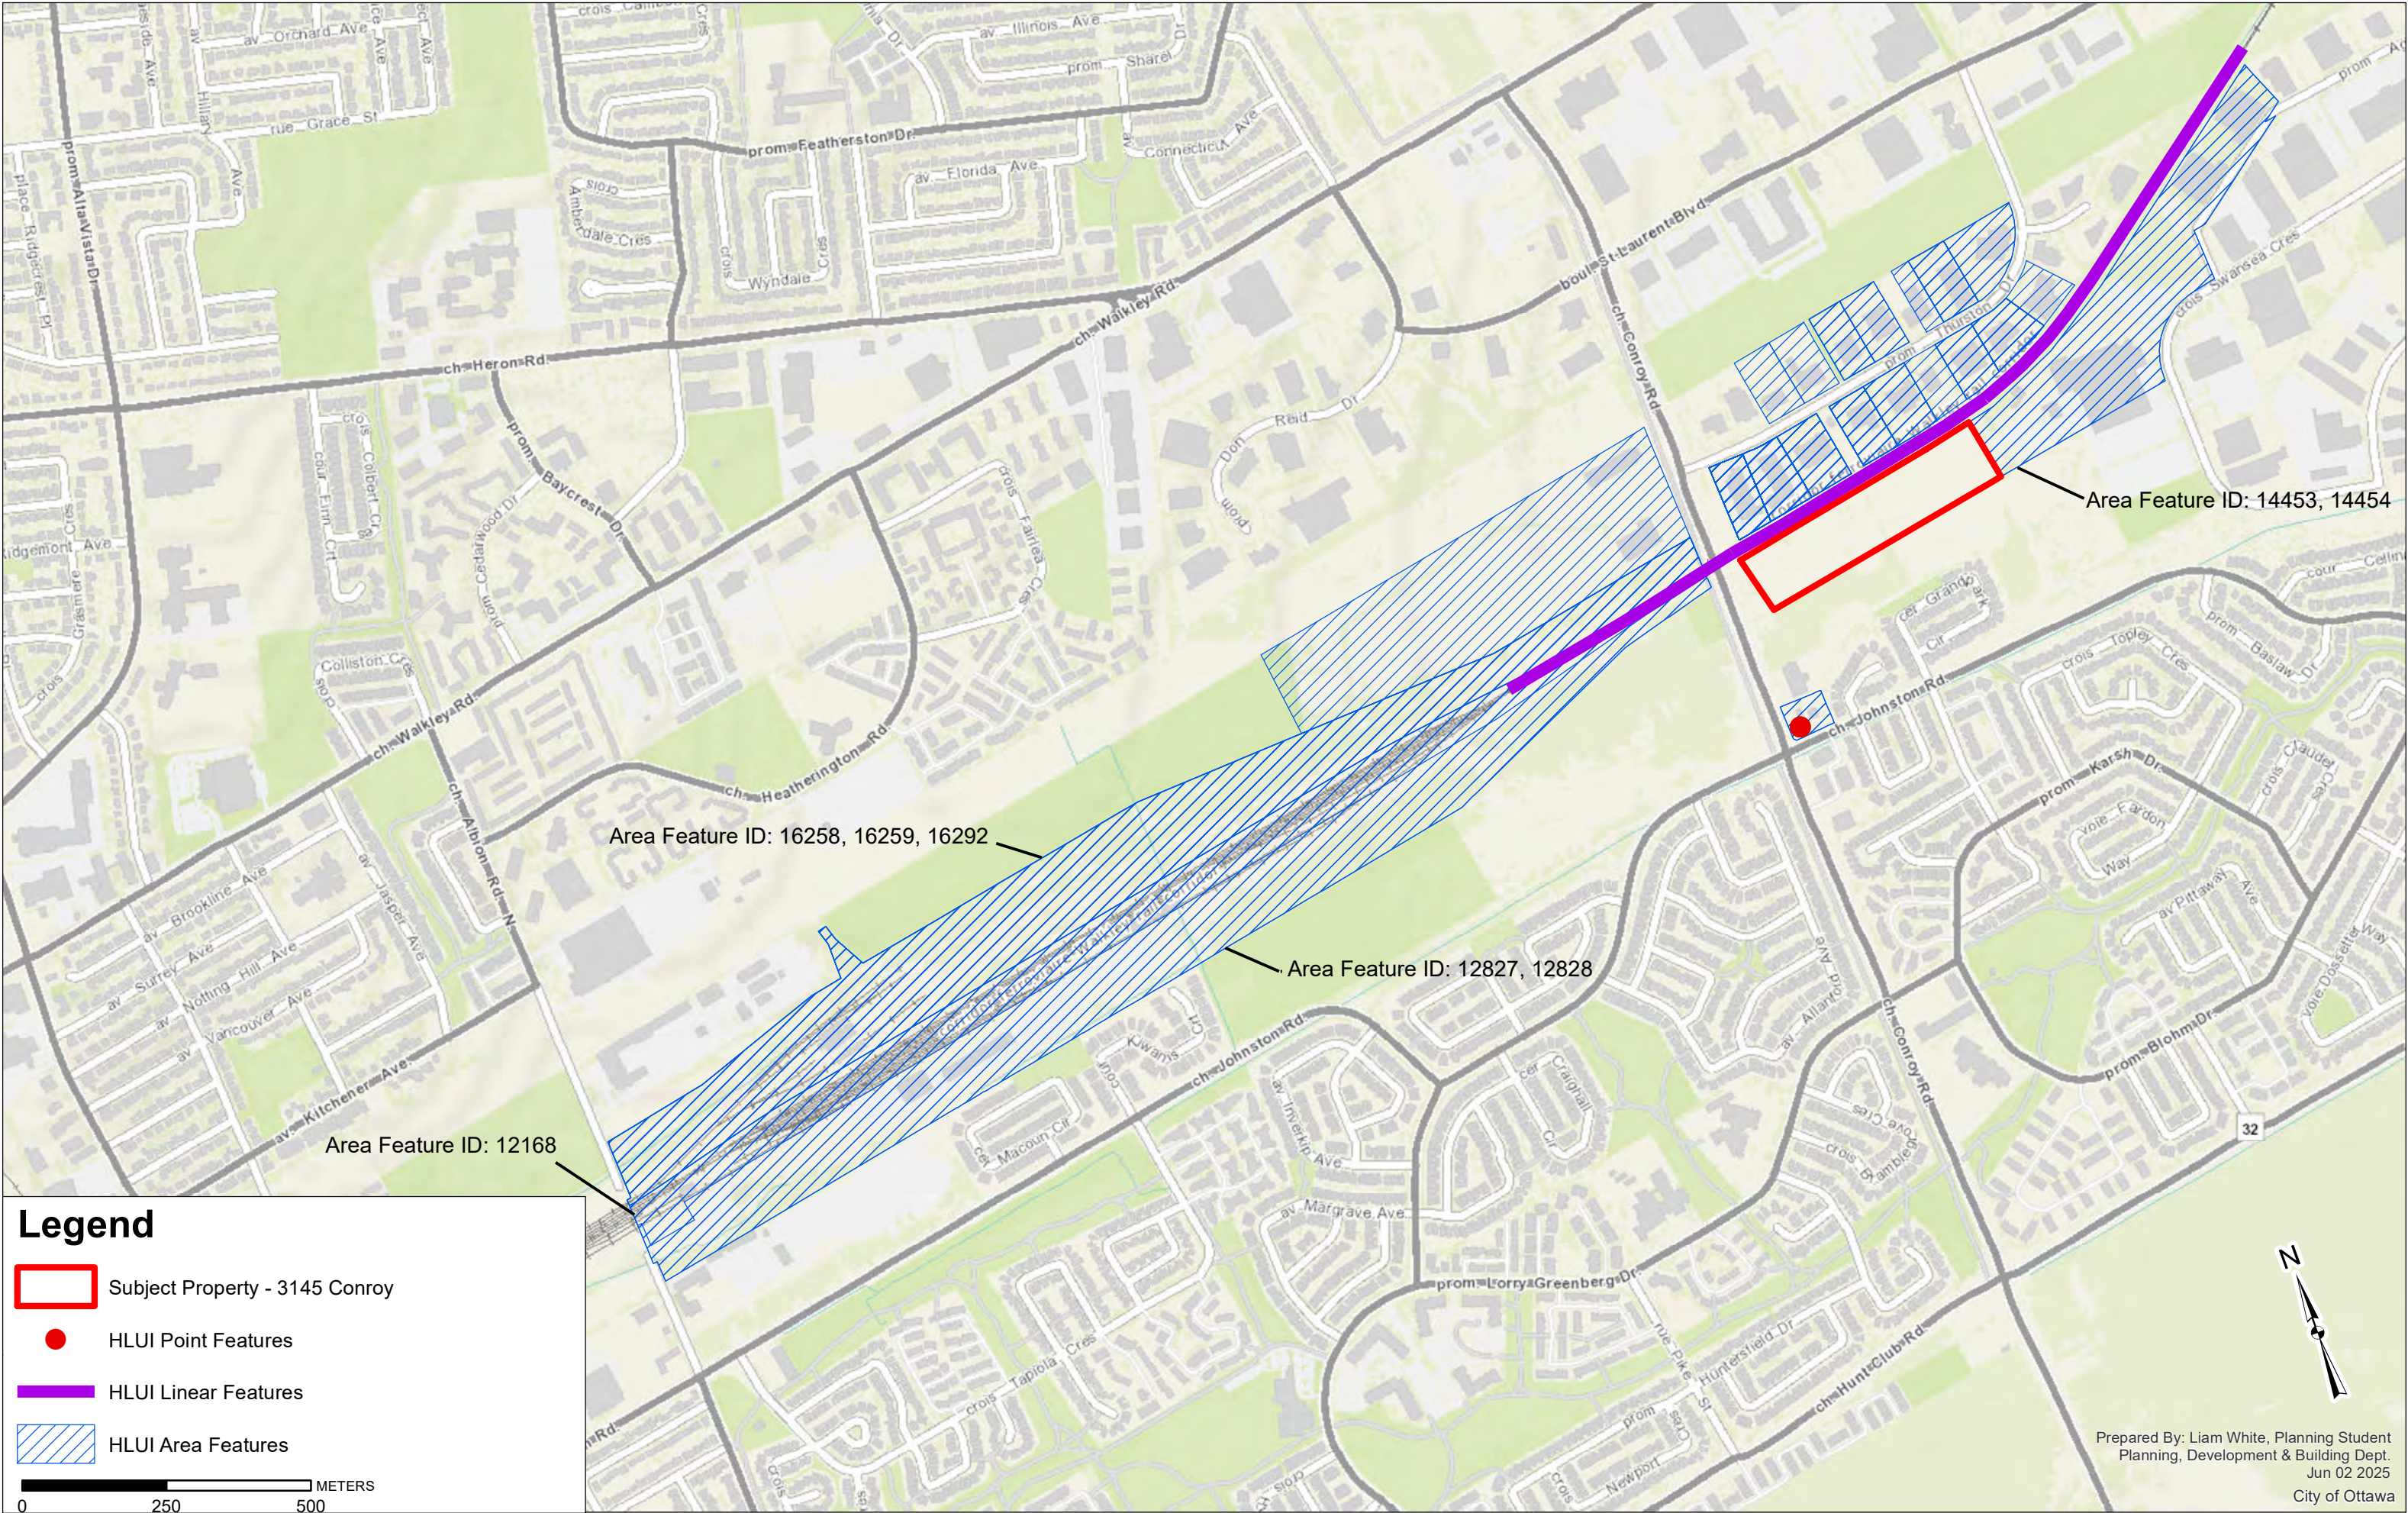

## **APPENDIX VI**

### **GOVERNMENT AND REGULATORY INFORMATION**

HISTORIC LAND USE INVENTORY (HLUI) - REPORT REFERENCE MAP - 3145 CONROY

File Number: D06-03-25-0051

June 10<sup>th</sup>, 2025

Gregory Sabourin  
Terrapex Environmental Ltd.

*Sent via email : g.sabourin@terrapex.com*

Dear Gregory Sabourin,

**Re: Information Request  
3145 Conroy Road, Ottawa, Ontario ("Subject Property")**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City's Environmental Remediation Unit (ERU) does not have any environmental records for this property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:  
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** No records found for this property.
- **Solid Waste Services:** No records found for this property.

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('HLUI Summary Report - D06-03-25-0051 - 3145Conroy.xlsx'), please refer to the [Overview and User Guide](#)."

**Additional information may be obtained by contacting:**

**Ontario's Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

**The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Ottawa Public Health**

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

**Liam White**

Justin Serroul  
Terrapex Environmental Ltd.

Dear Justin Serroul  
RE: Request #: EPI-2025-2000006132  
Requestor provided Site Name: 3145 conroy rd, Ottawa  
Requestor provided Client Reference: CO1004.00  
Site address: 3145 conroy Road, ottawa

This letter confirms that, after conducting a thorough search of its source system applications, the ministry has identified potential records related to your property request. Our search indicates that the ministry may hold the following records:

- Waste Generator number/classes
- Municipal and Private Sewage Works<sup>1</sup>
- Sewage Approval<sup>1</sup>

If you would like to submit a Freedom of Information (FOI) request to the ministry, please return to the table on the Requests tab of the EPI application and select "Submit FOI" under the Actions column in the row identified by EPI-2025-2000006132.

If you have any questions regarding the matter, please contact the ministry at [eproperty@ontario.ca](mailto:eproperty@ontario.ca).

Sincerely,

Environmental Property Information (EPI) Program

#### **Disclaimer**

This search result is provided for informational purposes only and is not intended to provide specific advice or recommendations. The Ministry of the Environment, Conservation and Parks (MECP) cannot and does not guarantee that the information provided is current, accurate, complete, or free of errors. Any reliance upon this information is solely at the risk of the user.

<sup>1</sup> In addition to the core reports (e.g. Environmental Compliance Approval), there may be extensive supporting documentation associated with this record type. When transferring your request over to FOI, we encourage you to refine the scope of your request to only the supporting documentation required for your purposes, as the inclusion of this additional documentation can add significant processing time.

Madame,  
Monsieur, Justin Serroul  
Objet : No de demande : EPI-2025-2000006132  
Nom du site fourni par le demandeur : 3145 conroy rd, Ottawa  
Référence client fournie par le demandeur: CO1004.00  
Adresse du site: 3145 conroy Road, ottawa

La présente lettre confirme que, après avoir effectué une recherche exhaustive dans ses applications de système source, le ministère a circonscrit des dossiers potentiels reliés à votre demande concernant des biens immobiliers. Notre recherche indique que les dossiers suivants peuvent être en possession du ministère:

- Waste Generator number/classes
- Municipal and Private Sewage Works<sup>1</sup>
- Sewage Approval<sup>1</sup>

Si vous souhaitez soumettre une demande de liberté d'information (FOI) au ministère, veuillez retourner au tableau de l'onglet Requêtes de l'application EPI et sélectionner "Soumettre FOI" dans la colonne Actions de la ligne identifiée par EPI-2025-2000006132.

Si vous avez des questions concernant votre demande, nous vous invitons à communiquer avec le ministère à l'adresse électronique suivante : [eproperty@ontario.ca](mailto:eproperty@ontario.ca).

Veuillez recevoir mes salutations les plus sincères,

Programme d'Information Environnementale de la propriété

#### **Avertissement**

Ce résultat de recherche est fourni uniquement à titre informatif et n'a aucunement pour but de donner des conseils particuliers ou des recommandations. Le ministère de l'Environnement de

la Protection de la nature et des Parcs (MEPP) ne peut pas garantir que les renseignements fournis sont à jour, exacts, complets et exempts d'erreurs. L'utilisateur qui se fie à ces renseignements le fait à ses seuls risques.

<sup>1</sup> En plus des rapports de base (par exemple, l'approbation de conformité environnementale), il peut y avoir de nombreux documents justificatifs associés à ce type d'enregistrement. Lors du transfert de votre demande vers FOI, nous vous encourageons à affiner la portée de votre demande en ne tenant compte que des pièces justificatives requises pour vos besoins, car l'inclusion de ces documents supplémentaires peut ajouter un temps de traitement important.

## **NO RECORD FOUND IN CURRENT DATABASE**

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please go to the [TSSA Client Portal](#) to complete an Application for Release of Public Information.

Please refer to [How to Submit a Public Information Request \(tssa.org\)](#) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org).

Kind regards,

**Kimberly Gage | Public Information & Records Agent**

**Viewing Direction:**  
Northeast

**Description:** A utility pole is located along the northern fence line of the property. Although the utility line terminates at this pole, it extends back to another pole situated adjacent to the railway line.

## **APPENDIX XI**

### **QUALIFICATION OF THE ASSESSORS**

<b>Education:</b>	M.Eng. in Environmental Engineering	2022	University of Ottawa, Ottawa
	M.Tech in Construction Engineering and Management	2018	SRM Institute of Science and Technology (formerly SRM University), Chennai
	B.Tech in Civil Engineering	2015	University of Calicut, Calicut
<b>Professional Associations:</b>	Professional Engineers of Ontario		
	ECO Canada		
<b>Safety Training:</b>	Standard First Aid and CPR		
	Petroleum Oriented Safety Training (POST)		
	Workplace Hazardous Materials Information System (WHMIS)		
	40-Hour HAZWOPER training		

**Environmental Scientist – November 2022 to Present**

As an Environmental Scientist, I have led and contributed to numerous environmental and geotechnical projects across Ontario, consistently adapting my approach to meet the specific needs of diverse clients, including petroleum companies, developers, municipal and federal authorities. My work adheres to CSA, O. Reg. 153/04 and industry standards, encompassing all phases of site investigation, client coordination, and data analysis.

**Core Responsibilities:**

- Conducted detailed site inspections and stakeholder interviews in compliance with Ontario Regulations.
- Authored Phase II Environmental Site Assessment (ESA) reports, groundwater monitoring summaries, and remediation reports based on site-specific findings.
- Built and maintained strong client relationships by tailoring communication and project delivery and regulatory requirements.
- Oversaw and directed borehole drilling, monitoring well installation, test pitting, tank removals, and groundwater sampling.
- Managed multi-phase sampling programs, collecting soil, groundwater, surface water, wastewater, effluent, soil vapour, and ambient air for laboratory analysis.
- Directed geotechnical field programs, including in situ testing and instrumentation, and prepared comprehensive borehole log sheets.
- Conducted data analysis, comparing lab and field results against federal and provincial standards to assess compliance.
- Generated technical figures and visual data summaries for client reports.
- Maintained Quality Assurance/Quality Control (QA/QC) across all deliverables.

**Representative projects include the following:****1. Petroleum Client – Former Retail Fuel Facility (London, Ontario) – 2022**

As part of a detailed Phase II Environmental Site Assessment (ESA), I executed field activities to evaluate shallow soil and groundwater conditions at a former fuel retail site. My responsibilities included:

- Coordinating with drilling and contracting firms to maintain schedule and efficiency.
- Developing site-specific health and safety plans.
- Supervising all field activities to ensure data quality and adherence to safety standards.
- Conducting and overseeing a comprehensive test-pitting program.

**2. Petroleum Client – Retail Fuel Facility (Burlington, Ontario) – 2023**

I conducted site investigations for assessing shallow subsurface conditions. Key contributions included:

- Coordinating fieldwork with contractors and drillers.
- Preparing site-specific health and safety plans.
- Supervising field activities, ensuring full compliance.
- Overseeing borehole drilling and monitoring well installation.
- Collecting soil and groundwater samples using standard procedures.
- Performing site surveys to establish ground surface and groundwater elevations.

**3. Petroleum Client – Former Retail Fuel Facility (Belleville, Ontario) – 2023**

Focused on deep soil and groundwater conditions, I carried out:

- Coordination with contractors for drilling logistics.
- Creation of detailed health and safety documentation.
- Oversight of drilling and monitoring well installation.
- Ground and water elevation surveys.
- Execution of subsurface sampling activities.

**4. City of Ottawa – Former Retail Fuel Facility (Ottawa, Ontario) – 2023**

I participated in the investigation of a municipally owned former fuel site, with tasks including:

- Contractor coordination and scheduling.
- H&S plan development.
- Field supervision.
- Surveying for groundwater and surface elevations.
- Soil and groundwater sampling and monitoring well oversight.

**5. Petroleum Client – Retail Fuel Facility (Kingston, Ontario) – 2024**

I conducted a Phase II ESA at an operational petroleum site. Responsibilities involved:

- Coordination and logistics with drilling teams.
- Site-specific safety planning.
- On-site supervision during borehole drilling and well installation.
- Soil and groundwater sampling and surveys.
- Report writing for the Phase II ESA.

**6. City of Ottawa – Suspected Sewage Leakage (Park, Ottawa, Ontario) – 2024**

This project involved investigating suspected subsurface sewage issues:

- Coordination with contractors.
- Site-specific H&S planning.
- Site surveying.
- Soil sampling.
- Reporting based on findings.

**7. City of Ottawa – O-Train Expansion Geotechnical Testing (Multiple Sites, Ottawa, Ontario) – 2024**

My involvement supported critical transportation infrastructure development. I:

- Drafted tailored health and safety plans for each site.
- Conducted concrete testing (slump, air, cylinder preparation) per CSA standards.
- Acted as client liaison during fieldwork, managing updates, concerns, and deliverables.

**8. Petroleum Client – Multiple Sites (Kapuskasing and Hearst, Ontario) – 2024**

I executed Phase II ESA field activities across northern Ontario locations, including:

- Coordinating with drillers and subcontractors.
- H&S plan preparation.

- Overseeing field activities.
- Monitoring well installation.
- Conducting elevation surveys.
- Soil and groundwater sampling.
- Reporting on site conditions and results.

**9. Petroleum Client – Retail Fuel Facility (North Bay, Ontario) – 2024**

I executed DSS survey, including:

- H&S plan preparation.
- Overseeing field activities.
- Collecting DSS investigation and sampling.
- Reporting on site conditions and results.

**10. Petroleum Client – Bulk Retail Fuel Facility (Pembroke, Ontario) – 2025**

As part of a detailed Phase I and II Environmental Site Assessment (ESA), I executed field activities to evaluate shallow soil and groundwater conditions at a bulk fuel retail site. My responsibilities included:

- Comprehensive site inspection for Phase I
- Coordinating with drillers and subcontractors.
- H&S plan preparation.
- Overseeing field activities.
- Monitoring well installation.
- Conducting elevation surveys.
- Soil and groundwater sampling.
- Reporting on site conditions and results.

**11. Petroleum Client – Former Retail Fuel Facility (Smith Falls, Ontario) – 2025**

As part of a detailed Phase I and II Environmental Site Assessment (ESA), I executed field activities to evaluate soil and groundwater conditions at a former fuel retail site. My responsibilities included:

- Comprehensive site inspection for Phase I
- Coordinating with drillers and subcontractors.
- H&S plan preparation.
- Overseeing field activities.
- Monitoring well installation.
- Conducting elevation surveys.
- Soil and groundwater sampling.
- Reporting on site conditions and results.

**Education:** B.Eng. Environmental Engineering 2010 Carleton University, Ottawa

**Professional Associations:** Professional Engineers of Ontario (PEO) – Membership Number: 100165530

**EXPERIENCE** 2010 to present – Terrapex Environmental Ltd., Ottawa, Ontario

Mr Sabourin is project manager responsible for supervising environmental site assessments for various municipal residential, commercial and developer clients. Mr. Sabourin has a wide variety of field experience including but not limited to borehole drilling, groundwater sampling, soil and sub-slab vapor sampling, and remedial supervision. Mr. Sabourin is registered with the Ontario Ministry of the Environment, Conservation and Parks (MECP) as a Qualified Person (QP) for undertaking Environmental Site Assessment activities and certifying Records of Site Condition (RSC) and has experience filing in the registry.

**PROJECT EXPERIENCE**

**Municipal client:** Completed several Phase I environmental site assessments (ESA) at properties owned by a municipality compliant with CSA standards. The work completed included site inspections to identify visible signs and/or potential sources of contamination possible, contaminant transport pathways, and potential receptors. Conducted interviews with relevant people who had a connection to the site. Conducted research and reviewed available documents including requesting information from public and private entities; interpreting aerial photographs; reviewing city directories, and previous environmental reports and acquired information; drafting of site plans; and, report composition. Additional responsibilities included client and tenant liaison. All Phase I ESAs were finalized with a recommendation for either no further work or the design and completion of a Phase II ESA.

**Commercial Client:** Was an integral part of a team that completed a Phase One ESA and a subsequent Phase Two ESA at a former industrial Site in Ottawa ON. The ESAs were completed so the Site could be re-developed into childcare facility. Since the Site was to be redeveloped into a more sensitive land use this necessitated the filing of a RSC with the Ministry of Environment, Conservation and Parks (MECP). Responsibilities included developing the conceptual site model (CSM), liaison with the clients and property owner for the supporting documentation needed for the RSC filing, filling out the electronic RSC form and addressing MECP comments during the initial review.

**Petroleum Client:** Conducted field and reporting tasks for a soil remediation project at a former gas station and commercial property, in Ottawa, Ontario. The area excavated was based on results of a previous Phase II ESA and observations of the soil conditions during the excavation. The total soil excavated and disposed of offsite was 4,700 metric tonnes. Responsibilities included supervision and direction of all excavation activities, collection of confirmatory soil samples, interpretation of laboratory analytical data, drafting of site plans and analytical results figures, and report composition.

**Technology Client:** Conducted field and office activities for Human Health and Ecological Risk Assessment (HHERA) for site located in eastern Ontario that was contaminated by historic use and storage of chlorinated solvents. Responsibilities included management of sub-contractors, liaison with client and land owners, health and safety, groundwater monitoring and sampling, sub-slab vapour and ambient air sampling, drafting of site plans, review of historic reports, completion of data gap analysis, and annual report composition. In order to support the HHERA, Mr. Sabourin conducted a building floor and subgrade investigation consisting of the installation and sampling of sub-slab vapour probes and conducting preliminary pilot sub-slab communicative testing for the eventual design and installation of a sub-slab depressurization system.

**Government Client:** Provided multi-year environmental consulting services to a government campus in Ottawa, Ontario with respect to due diligence monitoring of the facilities sanitary effluent flow. Responsibilities included reviewing sanitary sewer plans and selecting sample locations, completion of a health and safety plan, supervising and training Terrapex staff in collection of sanitary effluent samples using manual and automatic sampling methodologies, and writing reports comparing the analytical results to the Ottawa's sewer-use bylaw. The sanitary effluent sampling program has since expanded to include additional buildings and facilities.

**Position:** Senior Project Manager, Ottawa Office

**Qualifications:** B.Sc. (Eng) Environmental

<b>Experience:</b>	Terrapex Environmental Ltd.	2003 to present
	Terrapex Environnement Ltée.	2000 to 2003
	Regional Municipality of Ottawa – Carleton	May to Sep. 1999

Mr. Brown is a senior project manager responsible for supervising site assessments, and remediations for various residential, commercial and petroleum clients. Mr. Brown has conducted numerous Phase I/One Environmental Site Assessments (ESA), including historical research, site inspection and report preparation. Mr. Brown has extensive experience in Phase II/Two ESAs, small- and large-scale site remediations (both in-situ and ex-situ), environmental monitoring programs for sites impacted with petroleum, VOCs, PAHs and/or heavy metals, air sampling, peer reviews, and data interpretation. Mr. Brown is registered with the Ontario Ministry of the Environment, Conservation and Parks (MECP) as a Qualified Person (QP) for undertaking Environmental Site Assessment activities and certifying Records of Site Condition (RSC). He also provides senior technical review on all reports/correspondence issued for his projects. More recently, Mr. Brown has assumed a supervisor role responsible for personnel management, and quality control. His major clients have included Parkland Corp., Valero Energy Inc., Canadian Tire, Tim Hortons, and Minto Properties Inc.

#### **Representative projects include the following:**

Parkland Corp. Account Manager and Senior Technical Reviewer. Since 2013, Mr. Brown has been responsible for assigning work requests in Ontario. This includes managing projects (administering budgets, allocating technical resources, arranging subcontractors, and adhering to schedules), regular client updates; conducting data review/analysis; preparing ESA and remediation workplans and budget estimates; data interpretation, overall QA/QC of correspondence and reports, reviewing invoices and liaising with the public and regulatory agencies if required.

Valero Energy Inc. Account Manager and Senior Technical Reviewer. Since 2019, responsible for overseeing compliance sampling, site assessments and site investigations, overall QA/QC of correspondence and reports, and liaising with regulatory agencies if required.

Project Manager, Senior Technical Reviewer and QP for a project to complete a risk assessment and obtain a Record of Site Condition (RSC) of a petroleum hydrocarbon impacted site in Ottawa. This project included a data gap analyses, completion of a Phase One and Two ESA, supplemental investigations to assess soil vapour and sub-slab soil vapour conditions, development of a conceptual site model, preparation of a human health and ecological risk assessment, liaison with the MECP and other stakeholders.

Project Manager, Senior Technical Reviewer and QP for the completion of a multi-stage Phase Two ESA as part of the proposed development of a bulk fuel. Mr. Brown reviewed the previously completed Phase One ESA to identify any data gaps, developed the sampling and analysis plan to assess all the areas of potential environmental concern (APECs) for the identified contaminants of concern (COCs), directed the assessment work, reviewed the analytical results, developed the conceptual site model (CSM) and had overall responsibility for the Phase Two ESA in accordance with the requirements of O. Reg. 153/04.

Project Manager, Senior Technical Reviewer for a remediation project that included the excavation around the perimeter of two adjacent residences to expose the foundation and to allow for removal of a waterproofing membrane previously applied by others that was linked to chemical odours in the residences. It was further determined that during application the waterproofing product had been diluted with a xylene-based solvent. The former waterproofing membrane was removed and necessary remediation was conducted, including excavation beneath the footing of one of the residences to excavate contaminated soil. In total 412.12 tonnes of soil and 3,620 L of water was pumped from the excavation as part of the remediation. Terrapex also assist with monitoring vapour concentrations inside the residences over the course of the project (indoor air sampling was conducted by another consultant).
