Phase One Environmental Site Assessment

110 O'Connor Street, Ottawa, Ontario

G2S25042A

Groupe Mach Inc.
630 Saint-Paul Street West, Suite 600
Montreal, Quebec
H3C 1L9

April 2025 (revised October 2025)

Executive Summary

G2S Consulting Inc. (G2S) was retained by Groupe Mach Inc. (the Client) to complete a Phase One Environmental Site Assessment (ESA) for the property located at 110 O'Connor Street in Ottawa, Ontario (hereinafter referred to as the 'Site'). Refer to Drawing 1 in Appendix A for the Site Location Plan. Authorization to proceed with the Phase One ESA was provided by Mohamad Kheir Hassoun of Groupe Mach Inc.

The rectangular shaped Site is located on the west side of O'Connor Street, located at the southwest corner of the intersection with Slater Street and O'Connor Street, and covers an approximate area of 0.21 ha (0.51 ac.). The Study Area consists of residential and commercial land use, and the Rideau Canal is located approximately 565 m northeast of the Site.

G2S understands the Client requires a Phase One ESA for due diligence purposes related to the redevelopment of the Site for residential purposes. The Site was most recently used for commercial purposes (commercial and office building) and is proposed to be used for residential use. Since there is a change in property use planned (commercial to residential), a Record of Site Condition (RSC) is required under O. Reg. 153/04, as amended. This Phase One ESA was completed in accordance with Schedule D. of O. Reg. 153/04.

This Phase One ESA was conducted to:

i. Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One ESA property;

ii. Determine the need for a Phase Two ESA; and

iii. Provide a basis for carrying out any Phase Two ESA required.

Based on information from the records review, the first developed use of the Site was prior to 1875, and was developed with seven residential dwellings. The Site was then developed with eight dwellings in the early 1900s. A grocery store and bakery were developed within the northern portion of the Site in 1912, as well as the central portion of the Site was occupied by a dry cleaner. The northern portion of the Site was redeveloped into a dry cleaner in the 1920s, with the central portion of the Site was developed with a residential dwelling , and the southern portion of the Site was occupied by an apartment building and a tailor. A dry cleaner was located within the central and southern portions of the Site in the 1940s to the 1950s, with the remaining Site being occupied by residential land use. The previously mentioned buildings were demolished in the 1960s, and the Site was redeveloped with an apartment building within the northern portion of the Site, and commercial buildings were developed within the southern portion of the Site. The present building configuration was developed within the 1970s and was occupied by various commercial tenants. The Site has been vacant since 2022, and is presently in the early stages of being prepared for demolition.

Historical review of the Site and surrounding properties within a 250 m radius of the Site identified nine on-Site PCAs and several off-Site PCAs, as defined in O. Reg. 153/04. The PCAs were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, expected chemical storage amounts, etc. Based on review and evaluation of the information gathered, the following APECs have been identified:

APEC 1: West central portion of Site – Current and historical presence of three diesel aboveground storage tanks (ASTs) located within the underground parking levels. Presence of fill and vent pipes associated with the ASTs.

APEC 2: Entire Site – A geotechnical report by others identified fill material present beneath the Site to a depth of 5.33 m below ground surface (bgs).

APEC 3A: Northeastern portion of Site – Historical presence of a dry cleaner from the years 1912 – 1922.

APEC 3B: East central portion of Site – Historical presence of a dry cleaner in 1912.

APEC 3C: Southeastern portion of Site – Historical presence of a dry cleaner from the years 1948 – 1955.

APEC 3D: Northwestern portion of Site – Historical use of 174 Slater Street as a dry cleaner from the years 1912 – 1922.

APEC 4: Central portion of Site – Current and historical presence of a transformer vault within the central portion of the Site.

APEC 5: Western portion of Site – Historical use of de-icing salt located on paved portions of the Site.

APEC 6: Southern portion of Site – Historical presence of a dry cleaner located at 124 O'Connor Street (south adjacent) from the years 1922 – 1941.

APEC 7A: Western portion of Site – Historical use of 170 Slater Street (west adjacent) as an autobody shop, from the years 1948 – 1966.

APEC 7B: Northwest portion of Site – Historical presence two underground storage tanks (USTs) in the 1940 - 1960 located along the northeastern portion of 170 Slater Street (west adjacent).

APEC 7C: Western portion of Site – Historical use of 170 Slater Street (west adjacent) for metal plating in the 1930s.

APEC 7D: Western portion of Site – Historical use of 170 Slater Street (west adjacent) as a metal fabricator in the 1970s.

Regarding APEC 5 (de-icing salt use), per Section 49.1 of O. Reg 153/04, assessment of this APEC is not required. Under the Regulations, where a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, the applicable standard is deemed not to be exceeded. In this regard, further assessment of this APEC is not required.

Based on the findings of this Phase One ESA, a Phase Two ESA is recommended to investigate the potential for contamination related to the above-noted APECs.

1. Introduction

G2S Consulting Inc. (G2S) was retained by Groupe Mach Inc. (the Client) to complete a Phase One Environmental Site Assessment (ESA) for the property located at 110 O'Connor Street in Ottawa, Ontario, hereinafter referred to as the 'Site'. Refer to Drawing 1 in Appendix A for the Site Location Plan. Authorization to proceed with the Phase One ESA was provided by Mohamad Kheir Hassoun of Groupe Mach Inc.

G2S understands the Client requires a Phase One ESA to support an application for Record of Site Condition (RSC) related to the redevelopment of the Site for residential purposes. The Site was most recently used for commercial purposes (vacant) and is proposed to be used for residential use. Since there is a change in property use planned (commercial to residential), a RSC is required under O. Reg. 153/04, as amended. This Phase One ESA was completed in accordance with Schedule D. of O. Reg. 153/04.

1.1 Terms of Reference

The nature of a Phase One ESA by definition is a nonintrusive site examination of "readily accessible features"; therefore, the Phase One ESA does not quantify the chemical or physical quality of the exposed or inaccessible features such as materials beneath buildings or buried on Site. In this regard, the Phase One ESA must be viewed as a mechanism that may assist in reducing, rather than eliminating, the uncertainty of encountering environmental contaminants during future use of the Site.

This Phase One ESA was conducted to:

i. Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One ESA property;

ii. Determine the need for a Phase Two ESA; and

iii. Provide a basis for carrying out any Phase Two ESA required.

1.2 Phase One ESA Property Information

Table 1: General Site Details

Municipal Address:	110 O'Connor Street, Ottawa, Ontario
General Site Location:	West side of O'Connor Street, southwest of the intersection with Slater Street and O'Connor Street
Approximate Plan Area:	Approximate plan area of 0.21 hectares (0.51 acres) with frontage of approximately 66 m on O'Connor Street and a depth of approximately 29 m.
Property Identification Number (PIN):	04115-0095 (LT)
Legal Description:	PCL 42-1, SEC 3922 ; PT LT 42 & LT 43, PL 3922 , S SLATER ST ; PT LTS 42 & 43, PL 3922 , N LAURIER ST, BEING PT 1, 4R401 ; OTTAWA
Current Site Owner and Contact Information:	Édifice 110 O'Connor Inc. / 110 O'Connor Building
Current Site Occupant:	Vacant (fourteen-storey office building with mechanical penthouse and three basement levels)

The Phase One Study Area includes the Site and lands within approximately 250 m of the Site, as shown on Drawing 2 in Appendix A (hereinafter referred to as the 'Study Area').

2. Scope of Investigation

This assessment was performed in accordance with the Phase One ESA protocols and included the following tasks:

1. Records review.

2. Interviews with pertinent Site contacts.

3. A Site reconnaissance to assess current Site and Study Area conditions and the presence of any visual indications or olfactory evidence of potential contamination. A detailed review of regulatory compliance issues was not within the terms of reference for this assignment.

4. An evaluation of the information gathered from the records review, interviews, and Site reconnaissance.

5. Preparation of this report discussing the information compiled and the corresponding conclusions and recommendations.

3. Records Review

G2S reviewed reasonably accessible information and records to determine the land use history of the Site and Study Area.

3.1 General

3.1.1 Phase One ESA Study Area Determination

In accordance with O. Reg. 153/04, the Phase One ESA must include, at a minimum the Site and any other property that is located within 250 m of the Site boundaries. This is referred to as the Phase One ESA Study Area (Study Area) as depicted on Drawing 2 in Appendix A.

3.1.2 First Developed Use Determination

In accordance with the O. Reg. 153/04, the following definition applies:

"First developed use" means *the earlier of,*

i. The first use of a phase one property in or after 1875 that resulted in the development of a building or structure on the property, and

ii. The first potentially contaminating use or activity on the phase one property.

Based on information from the records review, the first developed use of the Site was prior to 1875, and was developed with seven residential dwellings. The Site was then developed with eight dwellings in the early 1900s. A grocery store and bakery was developed within the northern portion of the Site in 1912, as well as the central portion of the Site was occupied by a dry cleaner. The northern portion of the Site was redeveloped into a dry cleaner in the 1920s, with the central portion of the Site was developed with a residential dwelling, and the southern portion of the Site was occupied by an apartment building and a tailor. A dry cleaner was located within the central and southern portions of the Site in the 1940s to the 1950s, with the remaining Site being occupied by residential land use. The previously mentioned buildings were demolished within the 1960s, and the Site was redeveloped with an apartment building within the northern portion of the Site, and commercial buildings were developed within the southern portion of the Site. The present building configuration was developed within the 1970s and was occupied by various commercial tenants.

3.1.3 Chain of Title

A land title search for the Site was conducted online at the Teranet Express website for the Ottawa Region Land Registry Office. As well, historical data including land registry information was obtained by P.L.P Titles Ltd. and Site ownership information was provided dating back to 1823.

The Land Registry documents indicates that the Site was transferred from Cominar on Real Estate Holdings Inc. to the current owner, Édifice 110 O'Connor Inc./110 O'Connor Building Inc. in 2022. For ease of reference, the Land Registry documents, and chain of title information are included in Appendix B and summarized in Section 6.1 of this report.

3.1.4 ERIS Database Records

An RSC Database report was requested from Environmental Risk Information Service (ERIS) for the Site and 250 m Study Area in October 2020. An EcoLog ERIS report provides environmental and historical information compiled from over 45 government and private source records covering various time periods. The report is used to aid in the identification of possible environmental concerns or risks for commercial, industrial and residential sites, including Certificates of Approval and Waste Generator Permits. The records are summarized below:

Table 2: ERIS Database Records

Database	Location/ Direction and Distance from Site	Pertinent Information
Ontario Spills	110 O'Connor Street (Site)	- Discharge or Emission to Air of freon from chiller to atmosphere in 2009.
		- Equipment failure at Cascades Recovery Inc. of 15 L of hydraulic oil to pavement in 2011, no anticipated environmental impact.
		- Equipment failure of refrigerant gas to atmosphere in 2016.
	Intersection of Slater Street and O'Connor Street (Northeast adjacent)	- Equipment failure of pipe or hose leak of 5 gallons of antifreeze to road and catch basin in 2007 from OC Transpo. - Collision/accident of diesel to storm sewer in 2013.
	171 Slater Street (~15 m north)	- Service line strike causing natural gas (methane) to discharge into air from Enbridge Gas Distribution Inc. in 2010.
	151 Slater Street (~25 m northeast)	- Leak/break of natural gas (methane) into the air from Thomas Fuller Construction Co. Limited by human error in 2019.
	269 Laurier Avenue West (~45 m west)	- Leak/break of glycol/water 100-gallon solution to sewer in 2019.
	78 O'Connor Street (~45 m north)	- Discharge or emission to air from equipment failure, 110 kg of R134a refrigerant to atmosphere in 2003 from Bell Canada.
		- Other discharges to the ground of 0.5 L diesel fuel due to equipment failure in 2007 from Bell Canada.
		- Discharge or emission to air of freon R123 (CFC) due to equipment failure in 2009 from Bell Canada.
		- Discharge or emission to air due to malfunction of system of 28.6 kg of refrigerant in 2009 from Bell Canada.
		- Leak/break, release of 226.8 kg of refrigerant to air in 2013 from Bell Canada.
		- Leak/break, release of refrigerant to air in 2017 from Bell Canada.
		- Leak/break of refrigerant to air in 2018 from Bell Canada.

Database	Location/ Direction and Distance from Site	Pertinent Information
		- Leak/break of refrigerant to air of halocarbon release from HVAC unit in 2019 from Bell Canada.
	199 Slater Street (~65 m northwest)	- Other container leak due to corrosion reported by Trow Engineering of 220 L furnace/crankcase oil leak from a rusted tank in 1991.
	219 Laurier Avenue West (~80 m east)	- Equipment failure, causing a spill of 15 L petroleum-based oil in a multi-commercial high rise building of oily water in an elevator pit in 2012 by Dundee Realty Management Corporation.
	Albert Street & O'Connor Street (~75 m north)	- Leak/break of motor oil to storm sewer due to incident in 2019.
		- Fire/explosion by Waste Management of Canada due to douse water (particulate contaminant) for vehicle fire. No year was provided.
	Infront of 300 Laurier Avenue West (~65 m southwest)	- 25 L hydraulic oil spill to catch basin in 2005.
	68 O'Connor Street (~85 m north)	- Leak/break of halon to the air due to equipment failure at Bell Canada in 2009.
	130 Albert Street (~95 m northeast)	- Cooling system leak as a fire/explosion by Ottawa Hydro, 300 L non-PCB transformer oil to ground.
		- Operator/water solution of glycol/water solution by Enbridge gas in 2017.
	50 O'Connor Street (~100 m north)	- Used cooking grease spill from dumpster to catch basin. No year was provided.
	170 Queen Street (~105 m north)	- Operator/human error of adhesives to the pavement in 2018.
		- Leak/break of 2 L form release agent to gravel in 2017.
		- Leak/break of 5L of hydraulic oil due to equipment failure to gravel in 2018 at OLRT Constructors.
	99 Bank Street (~120 m northwest)	- Leak/break of 0.5 L of compressor oil (mineral oil) to the land of OLRT Constructors <Unofficial>
	154 O'Connor Street (~120 m south)	- Possible underground tank leak of an unknown amount due to failed pressure test in 1994 at Shell Canada Products Ltd.
		- Confirmed underground tank leak due to corrosion of an 1,800 L furnace oil missing from underground storage tank in 1993 by Shell Canada Products Ltd.
	Bank Street and Laurier Avenue West (~135 m southwest)	- Equipment failure – malfunction of system components of waste management, 9L of transmission oil to ground in 2012.
	100 Metcalfe Street (~150 m northeast)	- Leak/break of glycol/water solution to catch basin in 2013 by OC Transpo Bus Service.

Database	Location/ Direction and Distance from Site	Pertinent Information
	122 Bank Street (~150 m west)	- Cooling system leak of 741 lbs of freon to the air by Public Works ad Government Services Canada in 2004.
		- Equipment failure, release of 125 kg of R11 refrigerant to atmosphere by Jackson Building in 2006.
		- Equipment failure, release of 220 kg of R11 to atmosphere freon to the air in 2007.
		- Release of R123 to atmosphere by SNC-Lavalin Inc. in 2010.
		- Possible R123 leak from chiller to the air in 2010.
		- Leak/break, release of R123 refrigerant to atmosphere in 2016.
		- Release of refrigerant to atmosphere, including 167 kg of halocarbon (R123) by Brookfield Global Integrated Solutions in 2018.
	O.C. Transpo Mackenzie Bridge along Albert to Bank Street (~155 m northwest)	- Pipe/hose leak due to equipment failure, spill of 30 L motor oil to roadway, sanded and swept in 1999.
	Bank Street & Albert Street (~155 m northwest)	- Discharge or emission to air of methane gas at Enbridge Gas Distribution Inc. in 2007.
	250 Albert Street (~160 m northwest)	- Air pollution, release of 45 kg freon R22 from an A/C unit in 2011 by Telus. - Discharge or emission to air of 64 lbs of freon due to equipment failure by Telus Integrated Communications (2000) Inc., in 2011.
	109 Albert Street (~165 m northwest)	- Leak/break, release of 3 L of hydraulic oil to ground in 2017.
	100 Queen Street (~165 m northeast)	- Gasoline to sanitary sewer of light hydrocarbon to the land by OLRT in 2017.
		- Leak/break of 1L hydraulic oil due to equipment failure by the City of Ottawa in 2018.
	155 Queen Street at O'Connor St. to 54 Elgin St. crossing Northeast along Elgin St to 1 Rideau St and 117 Rideau (~165 m north)	- Leak/break, spill of 8-10 L of diesel fuel to rock, with the potential to impact groundwater from a container/drum/tote in 2014.
	181 Queen Street (~180 m northwest)	- Road in front of 181 Queen Street, contained spill of 618 L of hydraulic oil to asphalt in 2007.
		- Diesel spill to parking lot/sewer from a motor vehicle in 2011.
		- Leak/break, spill of 5 gallons of hydraulic oil from truck to road due to equipment failure of OLRT by EllisDon Corporation in 2017.
		- Leak/break, release of 365 kg freon refrigerant in 2019 by Morguard Investments Ltd.
	131 Queen Street (~180 m northeast)	- Leak/break of 4-inch gas main strike, release of natural gas (methane) in 2017 by Enbridge Gas Distribution Inc.

Database	Location/ Direction and Distance from Site	Pertinent Information
	249 Slater Street (~185 m west)	- Leak/break, spill of 5 L diesel fuel to the ground by Clean Water Works Inc. in 2014.
	129 Queen Street (~190 m northeast)	- Leak/break of ~19 L of hydraulic oil to the sidewalk by OLRT Constructors in 2017.
	333 Laurier Avenue (~195 m west)	- Leak/break of 5 L of glycol to roof and drainage system due to equipment error of Telus Communication Company in 2015.
	81 Metcalfe Street (~200 m northeast)	- Leak/break of an unknown amount of hydraulic oil to street and catch basin by the City of Ottawa in 2017.
	205 Queen Street (~205 m northwest)	- Operator/human error, spill of 25 L of grease to catch basin in 2015.
	340 Laurier Avenue West (~205 m southwest)	- Pipe/hose leak of 1,800 L ethylene glycol to property and sewer in 2002.
	Metcalfe Street and Albert Street intersection (~210 m northeast)	- Equipment failure of an Ottawa city bus at a bus stop, spill of 5 L of antifreeze to a catch basin in 1992.
		- Leak/break causing spill of 25 L hydraulic fluid to road and catch basin from boom truck due to equipment failure by Bell Canada Ltd in 2019.
	170 Laurier Avenue West (~210 m northeast)	- Discharge or emission to air of natural gas in 2009.
	88 Slater Street (~230 m northeast)	- Fire/explosion of non-PCB transformer oil to ground due to a leaking cable from a cooling system leak in 1995 from Ontario Hydro Sub-Station transformer.
		- Equipment failure of 5 L of transformer oil to ground from a cooling system leak by Ontario Hydro in 1992.
		- Leak/break of 10 L of coolant due to equipment failure from OC Transpo in 2017.
Ontario Regulation 347 Waste Generators Summary	263 Laurier Avenue West (South adjacent)	- Hunt Club Press Ltd. (1992 – 1998), waste generator (ON1642400), waste class 264 – Photo processing Wastes for commercial printing.
		- Quadrapress Inc. (1994 – 1998), waste generator (ON1937100), waste class 264 – Photo processing Wastes for duplicating services
	124 O'Connor Street, Suite 200 (South adjacent)	- Artext Electronic Publishing Inc. (1986 – 1998), Platemaking, waste generator (ON0940700, ON0940701), waste class 264 – Photo processing Wastes for platemaking
	150 Slater Street (~15 m east)	- The Manufacturers Life Insurance Company (2013 – 2018), waste generator (ON9451993), waste classes: 146 – Other specified inorganics, 212 – Aliphatic solvents, 252 – Waste oils & lubricants, 145 – Paint/pigment/coating residues, 251 – Oil skimming's & sludges for real estate property managers.

Database	Location/ Direction and Distance from Site	Pertinent Information
		- Carrier Commercial Service a Division of UTC Canada (2018), waste generator (ON7259096), waste class 252 – Waste crankcase oils and lubricants
	171 Slater Street (~15 m north)	- Health Canada (2006), waste generator (ON8424028), waste classes: 112 – Acid waste, 121 – Alkaline wastes, 146 – Other specified inorganics for other federal government public administration.
		- Health Canada (2014), waste generator (ON8921109), waste classes: 148 – Inorganic laboratory chemicals, 263 – Organic laboratory chemicals, 242 – Halogenated pesticides, 331 – Waste compressed gases
		- Health Canada Corporate Services Branch (2021), waste generator (ON9358836), waste generator 312 – Pathological wastes
	151 Slater Street (~25 m northeast)	- Bonanza Printing & Copying Centre Inc. (1997 – 2001), waste generator (ON1763101), waste classes: 145 – Paint/pigment/coating residues, 264 – Photo processing wastes, for commercial printing
		- Crawford & Company Canada Inc. (Unit 900) (2009), waste generator (ON9988348), waste class 112 – Acid waste, for quick printing and graphic design services.
		- Metcalfe Realty Company Limited (2009 – 2021), waste generators (ON8110072, ON3248030, ON9534121), waste classes: 221 – Light fuels and 131 – Neutralized wastes, 251 – Waste oils/sludges (petroleum based), 222 – Heavy fuels, lessors of non-residential buildings.
	140 O'Connor Street (~35 m south)	- Government of Canada – Finance Canada Property & Material Management (1986 – 1990), waste generator (ON0269301), waste class 264 – Photo processing wastes, as a financial economic administrator.
		- Finance and Treasury Board of Canada Department (1992 – 2009), waste generator (ON0269301), waste classes: 148 – Inorganic laboratory chemicals, 264 – Photo processing wastes, 121 – Alkaline wastes, 122 – Alkaline wastes, 146 – Other specified inorganics, as a finance/economical administration.
		- Gannon Blackburn Electric Inc. (2018), waste generator (ON3963680), waste class 146 – Other specified inorganic sludges, slurries or solids.

Database	Location/ Direction and Distance from Site	Pertinent Information
	171 Bank Street (~35 m south)	- O & Y Properties Inc. (1994 – 2001), waste generator (ON0383905), waste classes: 213 – Petroleum distillates, 252 – Waste oils & lubricants, as a non-residential building operator.
		- Rostrust Investments Inc. (1995 – 2004), waste generator (ON2079000), waste classes: 121 – Alkaline wastes, 148 – Inorganic laboratory chemicals, 212 – Aliphatic solvents, 213 – Petroleum distillates, 243 – PCBs, 252 – Waste oils & lubricants, 263 – Organic laboratory chemicals, as a non-residential building operator.
	181 Bank Street (~45 m southwest)	- Black Photo Corporation (1997 – 2001), waste generator (ON1338160), waste class 264 – Photo processing wastes, as a camera photo supplier.
	269 Laurier Avenue West (~45 m west)	- The Great West Life Assurance Company (2007 – 2020), waste generator (ON8478731), waste classes: 251 – Oil skimming's & sludges, 145 – Wastes from the use of pigments, coatings and paints, 212 – Aliphatic solvents and residues, 233 – Other polymeric wastes, 251 – Waste oils/sludges (petroleum based), 252 – Waste crankcase oils and lubricants, 331 – Waste compressed gases including cylinders, for real estate property managers.
		- Public Safety Canada (2016 – 2019), waste generator (ON3939522), waste classes: 212 – Aliphatic solvents, 252 – Waste crankcase oils and lubricants, 263 – Misc. waste organic chemicals
	78 O'Connor Street (~45 m north)	- Bell Canada (1986 – 2021), waste generator (ON0473817), waste classes: 114 – Other inorganic acid wastes, 263 – Organic laboratory chemicals, 331 – Waste compressed gases, 121 – Alkaline wastes, 145 – Paint/pigment/coating residues, 146 – Other specified inorganics, 148 – Inorganic laboratory chemicals, 212 – Aliphatic solvents, 243 – PCBs, 251 – Oil skimming's & sludges, 252 – Waste oil & lubricants, 263 – Organic laboratory chemicals, 112 – Acid waste, 221 – Light fuels, 222 – Heavy fuels, 331 – Waste compressed gases, as a telecommunication carrier.
		- Glebe Mechanical Inc. (2002 – 2004), waste generator (ON4220799), waste class 221 – Light fuels.

		- Nav Canada (2009), waste generator (ON3805959), waste class 312 – Pathological wastes, as air traffic control.
	255 Albert Street (~205 m northwest)	- Eldorado Resources Ltd. (1986 – 1993), waste generator (ON0008201), waste classes: 211 – Aromatic solvents, 212 – Aliphatic solvents, 241 – Halogenated solvents, as other smelting.
		- Her Majesty the Queen (Fed. Gov.) (2010 – 2021), waste generator (ON5262665), waste classes: 212 – Aliphatic solvents, 263 – Organic laboratory chemicals, as other federal government public administration.
		- The Great-West Life Assurance Company (2010 – 2021), waste generator (ON5262665), waste classes: 145 – Wastes from the use of pigments, coatings and paints, 212 – Aliphatic solvents, 252 – Waste oil & lubricants, 262 – Detergents and soaps, 331 – Waste compressed gases including cylinders, as real estate property managers.

Database	Location/ Direction and Distance from Site	Pertinent Information
	340 Laurier Avenue West (~205 m southwest)	- Jer Ottawa ULC (2001 – 2004), waste generator (ON0383914), waste classes: 148 – Inorganic Laboratory Chemicals, 212 – Aliphatic solvents, 213 – Petroleum distillates, 222 – Heavy fuels, 242 – Halogenated pesticides, 252 – Waste oils & lubricants, 263 – Organic laboratory chemicals, 145 – Paint/pigment/coating residues, 264 – Photo processing wastes, 266 – Phenolic wastes, 331 – Waste compressed gases, as other services.
		- Ottawa 340 Laurier Avenue West Inc. (2004 – 2005), waste classes: 145 – Paint/pigment/coating residues, 212 – Aliphatic solvents, 213 – Petroleum distillates, 252 – Waste oils & lubricants, 263 – Organic laboratory chemicals, 331 – Waste compressed gases, as an administrative management and general management consulting services.
		- Public Works and Government Services Canada (2004 – 2009), waste generator (ON9217037), waste classes: 112 – Acid waste – heavy metals, 121 – Alkaline wastes – heavy metals, 146 – Other specified inorganics, 212 – Aliphatic solvents, as all other waste management services.
		- Starlight Investments (2016), waste generator (ON5301151), waste class 212 – Aliphatic solvents, as plumbing, heating and air-conditioning contractors.
		- TNC 340 Laurier Ltd. (2014 – 2016), waste generator (ON8056777 and ON2961230), waste classes: 251 – Oil skimming's & sludges, and 148 – Inorganic laboratory chemicals, 135 – Reactive anion wastes, 122 – Alkaline wastes – other metals, 221 – Light fuels, 212 – Aliphatic solvents, 211 – Aromatic solvents, 145 – Paint/pigment/coating residues, as real estate property managers.
		- Epic Realty Partners (2014), waste generator (ON6191200), waste class 251 – Oil skimming's & sludges.
		- Demo Core (2021), waste generator (ON8037772), waste classes: 145 – Wastes from the use of paints, coatings and paints, 243 – PCB, 212 – Aliphatic solvents and residues.
	280 Slater Street (~205 m west)	- Snapshot 1 Hour Photo Lab Ltd. (1994 – 2001), waste generator (ON1886300), waste class 264 – Photo processing wastes, as a camera and photo supplier.
		- Morguard Investments Limited (2007 – 2016), waste generator (ON5260950), waste classes: 145 – Paint/pigment/coating residues, 112 – Acid waste – heavy metals, 212 – Aliphatic

Database	Location/ Direction and Distance from Site	Pertinent Information
		solvents, 121 – Alkaline wastes – heavy metals, 146 – Other specified inorganics, 251 – Oil skimming's & sludges, as all other financial investment activities.
		- Carrier Commercial Service, a Division of UTC (2018 – 2019), waste generator (ON2991932), waste class 252 – Waste crankcase oils and lubricants
	192 Bank Street (~205 m southwest)	- Ottawa Magazine Inc. (1986 – 2001), waste generator (ON0897800), waste class 123 – Alkaline phosphates, as other publishing industries.
	264 Albert Street (~215 m northwest)	- Zippy Print (1992 – 2000), waste generator (ON1491606), waste classes: 145 – Paint/pigment/coating residues, 264 – Photo processing wastes, for platemaking.
		Allegra Printing (Out of Business) (1999 – 2001), waste generator (ON2422401), waste classes: 145 – Paint/pigment/coating residues, 212 – Aliphatic solvents, 264 – Photo processing wastes
	151 Metcalfe Street (~215 m southeast)	- Morguard Investments Limited (2017), waste generator (ON4782941), waste class 252 – Waste crankcase oils and lubricants.
	88 Slater Street (Slater Substation) (~230 m northeast)	- Ottawa Hydro (1986 – 2001), waste generator (ON0456600), waste classes: 243 – PCBs, 252 – Waste oils & lubricants, as an electrical power system.
Inventory of PCB Storage Sites	78 O'Connor Street (~45 m north)	- Bell Canada was registered as a PCB storage site in 1992.
Variances for Abandonment of Underground	150 Slater Street (~15 m east)	- Riaz Baksh, variance approved in 2009, for an abandoned underground storage tank (UST)
TSSA Historic Incidents	78 O'Connor Street (~45 m north)	- Incident/near-miss occurrence of 0.5 L of liquid fuel of Bell Canada Building, no year listed.
	Bank Street and Albert Street (~155 m northwest)	- Natural gas pipeline strike at a multi-unit residential building in 2007.
Private and Retail Fuel Storage Tanks	199 Slater Street (~65 m northwest)	- Tilden Car Rentals Inc. is registered as a private 27,276 L fuel tank.
	154 O'Connor Street (~120 m south)	- Bytown Towing & Autocare Ltd.is a retail 68,100 L tank.
Fuel Storage Tank	199 Slater Street (~65 m northwest)	- Tilden Car Rentals Inc. FS Liquid Fuel Tank Single Wall UST in 1965, capacity 18,184 L.
		- Tilden Car Rentals Inc. FS Liquid Fuel Tank Single Wall UST in 1990, registered as capacity 9,092 L.
	154 O'Connor Street (~120 m south)	- Bytown Towing & Autocare Ltd., a 22,700L fibreglass double wall horizontal aboveground storage tank (AST) liquid fuel tank in 2009.
		- Bytown Towing & Autocare Ltd., two 22,700L fibreglass double wall horizontal aboveground storage tank (AST) liquid fuel tank in 1980.

Database	Location/ Direction and Distance from Site	Pertinent Information
Fuel Storage Tank Historic	154 O'Connor Street (~120 m south)	- Bytown Towing & Autocare Ltd, from 1980 to 2007, with three 22,700 L gasoline liquid fuel single wall USTs.
		- Bytown Towing & Autocare Ltd, from 1979 to 2008, with four 22,700 L gasoline liquid fuel single wall USTs.
Pipeline Incidents	131 Queen Street (~180 m northeast)	- Pipeline Damage due to a 4 inch pipeline hit, associated with Enbridge Ga in 2017.
	142 Nepean Street (~200 m south)	- Enbridge Gas Inc. pipeline damage in 2020.

Several of the above environmental source records were deemed to represent PCAs for the Site, and are summarized in Table A of Appendix G. The ERIS report and environmental records are included in Appendix C.

3.1.5 Fire Insurance Plans

Fire Insurance Plans (FIPs) for the Site and surrounding properties were available through a Phase One ESA report by others requested by Opta Environmental and the FIPs available were for the years 1878, 1895, 1901, 1912, 1922, 1948, 1955 and 1963.

The FIP from 1878 indicates the Site was developed with seven residential dwellings, historical addresses included 94 to 116 O'Connor Street, and one vacant lot, historically 118 O'Connor Street. The adjacent properties were developed as residential dwellings.

The 1895 and 1901 FIPs indicate 118 O'Connor Street was developed with a residential dwelling. No other changes occurred within the Site and adjacent land uses.

The 1912 FIP indicates 94-96 O'Connor Street was occupied by a grocery store, 100 O'Connor Street was occupied by a bakery, 100-104 O'Connor Street was occupied by residential dwellings, 174 Slater Street and 106 O'Connor Street was occupied by a Chinese Laundry. Residential dwellings occupied 108-110 O'Connor Street, and The Rosslyn occupied 116 O'Connor Street, and a tailor was identified at 118 O'Connor Street.

The 1922 FIP indicated 94-96 O'Connor Street was occupied by a Cleaning and Pressing business with residential dwellings on the upper levels. Residential dwellings occupied 98-108 O'Connor Street, and a cobbler occupied 110 O'Connor Street. The Rosslyn and the tailor still occupied 116 and 118 O'Connor Street, respectively. A drycleaning business occupied 174 Slater Street.

The 1948 FIP indicated 94-100 O'Connor Street was occupied by Curtis Apartments. Residential dwellings were occupied by 102-108 O'Connor Street. 100 ½ O'Connor Street was occupied by a cobbler. A dry cleaner was indicated at 110 O'Connor Street. The Rosslyn is indicated as a rooming house at 116 O'Connor Street, and a tailor still occupies 118 O'Connor Street.

The 1955 FIP indicated 94-100 O'Connor Street was occupied by a grocery store and offices. Shop and repairs was occupied by 100 ½ O'Connor Street. 102-104 O'Connor Street was occupied by a commercial building, and 106 O'Connor Street was occupied by a grocery store. 108 O'Connor Street was occupied by a restaurant. A dry cleaner was indicted at 110 O'Connor Street and 118 O'Connor Street. An office building occupied 116 O'Connor Street.

The buildings located at 102-114 O'Connor Street have been demolished in the 1963 FIP. Apartments with a restaurant occupied 94-100 O'Connor Street. The central portion of the Site was vacant, and an office building was located at 116 O'Connor Street and 118 O'Connor Street was occupied by a dwelling.

The following Potentially Contaminating Activities (PCAs) were identified:

Table 3: Fire Insurance Plans, Potentially Contaminating Activities

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
94 O'Connor Street (Presently 110 O'Connor Street)	Site	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP bottom commercial floor occupied by Cleaning & Pressing.	1922
106 O'Connor Street (Presently 110 O'Connor Street)		**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1915 FIP identified a dry cleaner.	1912 – 1915
110 O'Connor Street		**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1948 and 1955 FIP identified a dry cleaner.	1948 – 1955
174 Slater Street (Presently 110 O'Connor Street)		**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1922 FIPs identified a dry cleaner within the northwestern portion.	1912 – 1922
118 O'Connor (Presently 110 O'Connor Street)		**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	1955 labelled a building as cleaning.	1955
120 O'Connor (presently 124 O'Connor Street)	South adjacent	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP identified a dry cleaner.	1922
263 Laurier Avenue W (Presently 170 Slater Street)	East adjacent	**PCA #10** – Commercial Autobody Shops	The 1948, 1955 and 1963 FIPs identified Campbell Motors Ltd. Garage. A UST is located north of the building on site.	1948 – 1963
		PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks		
263A Laurier Avenue West		**PCA #10** – Commercial Autobody Shops	The 1965 FIP identified a garage and repair shop, including a paint shop	1963

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
(Presently 170 Slater Street)			associated with 263 Laurier Avenue West.	
120 O'Connor Street (Presently 124 O'Connor Street)	South adjacent	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1922 FIPs identified a dry cleaner.	1912 – 1922
126 O'Connor Street (Presently 124 O'Connor Street)		**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1948 FIP identified a dry cleaner located at the corner of Laurier Avenue West and O'Connor Street.	1948
87 O'Connor Street (Presently 151 Slater Street)	~25 m northeast	**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks **PCA #10** – Commercial Autobody Shops	The 1948 FIP identified a gasoline service station with six USTs located at the corner of Slater Street and O'Connor Street.	1948
79 O'Connor Street (Presently 151 Slater Street)	~25 m northeast	**PCA #10** – Commercial Autobody Shops **PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1965 FIP identified Auto servicing and one UST at the corner of slater and O'Connor.	1965
84 O'Connor (Presently 82 O'Connor Street)	~40 m north	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 and 1955 FIP identified a dry cleaner.	1922 – 1955
		PCA #31 – Ink Manufacturing, Processing and Bulk Storage	1912 FIP identified a Printing & Bindery.	1912
230 – 234 Laurier Avenue West (Presently 234 Laurier Avenue West)	~45 m southeast	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1955 FIP identified Mutual Press LTD printing services.	1955
234 Laurier Avenue West		**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1948 and the 1963 FIP identified three USTs and a gasoline service station along the western portion of	1948 – 1963

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
			the property, occupied by Cities Service Ltd.	
		PCA #31 – Ink Manufacturing, Processing and Bulk Storage	The 1948 and 1963 FIP identified Mutual Press Ltd. occupied by printing.	1948 – 1963
192 Albert Street (Presently 78 O'Connor Street)	~50 m north	**PCA #10** – Commercial Autobody Shops	The 1922 FIP identified garage repairs and battery storage and servicing.	1922
		PCA #6 – Battery Manufacturing, Recycling and Bulk Storage		
302 Laurier Avenue West (Presently 171 Bank Street)	~60 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1955 FIP identified Superior Cleaners.	1955
304 Laurier Avenue West (Presently 171 Bank Street)	~60 m southwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1963 FIP identified a Cleaning & Pressing.	1963
212 Albert Street (Presently 222 Albert Street)	~65 m northwest	**PCA #10** – Commercial Autobody Shops	Th 1948 FIP identified a Canadian Pacific Express Co. Garage.	1948
128 Bank Street (Presently 215 Slater Street)	~80 m northwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP identified a cleaning and pressing service.	1922
113 – 117 Bank Street (Presently 215 Slater Street)	~90 m northwest	**PCA #2 –** Iron and Steel Manufacturing and Processing	The 1878 and 1895 FIP identified Bank St. Foundry	1878 – 1895
233 – 226 and 199 Albert St (Presently 215 Slater Street)	~90 m northwest	**PCA #10** – Commercial Autobody Shops	The 1948 FIP identified an autobody repair shop.	1948
146 Albert Street (Presently 130 Albert Street)	~95 m northeast	**PCA #10** – Commercial Autobody Shops	The 1948 and 1955 FIP identified Waverly Garage and Albert Street garage.	1948 – 1955
118 Slater Street (Presently 130 Slater Street)	~100 m east	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1955 FIP identified a Printing office off of Bomnc Electrotype Co Ltd.	1955

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
199 Albert Street (Presently 50 O'Connor Street)	~105 m north	**PCA #10** – Commercial Autobody Shops **PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1948 and 1963 FIP identified Auto Repairs & Garage with two USTs identified along Albert Street.	1948 – 1963
199 Albert Street	~105 m north	**PCA #10** – Commercial Autobody Shops	The 1922 FIP identified a garage.	1922
220 Albert Street (Presently 222 Albert Street)	~105 m northwest	**PCA #6** – Battery Manufacturing, Recycling and Bulk Storage	The 1922 FIP identified a storage and battery servicing.	1922
210 Albert Street (Presently 222 Albert Street)	~105 m northwest	**PCA #10** – Commercial Autobody Shops	The 1955 FIP identified as a C.P.R. Express Garage.	1955
156 O'Connor Street (Presently 154 O'Connor Street)	~120 m south	**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1963 FIP identified a gasoline service station with three USTs located along Gloucester.	1963
223 – 235 Albert Street (Presently 99 Bank Street)	~130 m northwest	**PCA #28** – Gasoline and Associated Products Storage in Fixed Tanks	The 1963 FIP identified UST along Albert St, associated with Finnegan Car Rentals Ltd.	1963
228 Albert Street (Presently 150 Bank Street)	~130 m northwest	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1922 FIP identified a paper & stationary and engraving blueprints.	1922
137 Albert Street (Presently 111 Albert Street)	~135 m northeast	**PCA #10** – Commercial Autobody Shops	The 1955 FIP identified Albert St Garage and federal motor sales.	1955
147-149 Albert Street (Presently 111 Albert Street)	~135 m northeast	**PCA #54** – Textile Manufacturing and Processing	1912 FIP identified Grant Holden Graham Ltd. as a wholesaler and manufacturer of tents and awnings.	1912
124 – 136 Queen Street (Presently 111 Albert Street)	~135 m northeast	**PCA #31** – Ink, Manufacturing, Processing and Bulk Storage	The 1912 FIP identified a paper box factory and printing , labelled as The Ottawa Paper Box. The 1963 FIP identified paper staging and printing.	1912 1963

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
135 – 139 Albert Street (Presently 111 Albert Street)	~135 m northeast	**PCA #10** – Commercial Autobody Shops	The 1922 FIP identified three garage repair shops.	1922
133 Queen Street (Presently 131 Queen Street)	~180 m northeast	**PCA #34** – Metal Fabrication	1895 FIP identified a Louvre Over Foundry and machine shop.	1895
		PCA #32 – Iron and Steel Manufacturing and Processing	1912 FIP identified a lead melting and press room for an editorial office.	1912
		PCA #31 – Ink Manufacturing, Processing and Bulk Storage	The 1922 FIP identified a Couriers and Printing and editorial building.	1922
			The 1948 FIP identified Citizen's Printing and Linotyping.	1948
136 Sparks Street	~180 m northeast	**PCA #31** – Ink Manufacturing, Processing and Bulk Storage	The 1963 FIP identified the Citizen Building for pressing and processing.	1963
146 Nepean Street	~200 m south	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1963 FIP identified Dry Cleaning.	1963
94 Slater Street (Presently 99 Slater Street)	~200 m east	**PCA #10** – Commercial Autobody Shops	The 1948 FIP identified an Auto Repairs.	1948
98 Albert Street(Presently 77 Metcalfe Street)	~205 m northeast	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1912 and 1922 FIP identified a dry cleaner.	1912 – 1922
77 Metcalfe Street	~205 m northeast	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1922 FIP shows two Chinese laundry. 1922, southwest, and Chinese laundry.	1922
207 Queen Street	~205 m northwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1955 FIP identified a Service Centre Cleaners.	1955
203 Queen Street	~210 m northwest	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1963 FIP identified Cleaning & Pressing.	1963

Address	Direction and Distance from Site	Potentially Contaminating Activity	Description	Years
63 Metcalfe (Presently 55 Metcalfe Street)	~225 m northeast	**PCA #37** – Operation of Dry Cleaning Equipment (where chemicals are used)	The 1955 FIP shows Cleaning & Pressing.	1955
No address (Presently 75 Slater Street)	~230 m northeast	**PCA #10** – Commercial Autobody Shops	The 1955 identified Meyers Motors Ltd.	1955
85 - 87 Slater Street (Presently 75 Slater St)	~230 m northeast	**PCA #6** – Battery Manufacturing, Recycling and Bulk Storage	The 1948 and 1963 FIPs identified a paint shop and repair shop, including volcanizing and battery servicing. The FIP identified two 1000-gallon ASTs and one 500-gallon UST.	1948 – 1963
		PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks		
		PCA #39 – Paints Manufacturing, Processing and Bulk Storage		
82 – 88 Slater Street (Presently 84 Slater Street)	~230 m east	**PCA #18** – Electricity Generation, Transformation and Power Stations	The 1912 FIP identified the Ottawa Electric Co.	1912
			Ottawa Light Heat & Power Co. Ltd. Sub-Station in 1948.	1948

Note: UST - Underground Storage Tank AST – Aboveground Storage Tank

Several of the listed occupants were deemed to represent PCAs and are summarized in Table A of Appendix G of this report.

3.1.6 Street Directories

A street directories search was conducted for the Site and Study Area through Environmental Risk Information Services (ERIS) and were reviewed in approximately five-year increments from 1950 – 2023, when publication ceased, and in approximately ten-year increments from 1875 – 1950. The Site previously consisted of 94-118 O'Connor Street. The table below summarizes the directory information for the Site.

Table 3: Street Directories, Site Occupant

Address	Occupant/Site Use	Years Occupied
110 O'Connor Street Site	J's Nails Spa	2021 – 2023
	Right Stop Computer Shop	2021 – 2023
	Treats Café Bakery	1997 – 2023
	Canada Commissaire a la Fed	2012 – 2023
	Emilio Hair Design	2012 – 2023
	IPO Gallery	2012 – 2023

Address	Occupant/Site Use	Years Occupied
	Berkshire Securities Inc.	2017
	Canarie Inc.	2017
	Dundee Realty Management Corp.	2000 – 2017
	O'Connor Convenience	2006 – 2017
	Peach Microsystems	1987 – 2017
	Ampro Camera Repair	1997 – 2012
	Berkshire Securities Inc.	2006 – 2012
	Bud's Smoke Shop	1987 – 2012
	C 3 C A Assn Inc.	2012
	Canarie Inc.	2012
	Computer Service Centre	1997 – 2007
	Berkshire Investment Group	2006 – 2007
	Sears Canada Inc.	1997 – 2000
	Vacant	1993
	U S A F Liaison Office	1987 – 1993
	F1 Govt of Canada Department of National Defense	1987 – 1993

	Burwash Ormer, clerk	1875

Several of the Site occupants were deemed to represent PCAs. Land uses for the surrounding properties as described in the reviewed directories, are included in Appendix C. PCAs identified within the Site and Study Area based on the reviewed directories and are summarized in Table A in Appendix G of this report.

3.1.7 Waste Management Records

The Site and properties within the Study Area were searched by company name in the Hazardous Waste Information Network (HWIN) and the Hazardous Waste Information System (HWIS) databases from 2022 – 2024. Properties within the Study Area were also searched for records currently registered with Resource Productivity & Recovery Authority (RPRA) (formerly HWIN), included in Appendix D. The following records were found:

Table 4: HWIN Records

Address Direction and Distance from Site	Generator Name	Registered Wastes
110 O'Connor Street Site	Groupe Mach Ottawa ON001071996 2024	122 - Alkaline solutions, sludges and residues containing other metals and non-metals, not containing cyanides
170 Slater Street West adjacent	Canada Life Assuarance C/O WSP ON001056972 2023	221 - Light fuels
150 Slater Street ~15 m east	JLL ON001059891 2023	251 - Waste oils/sludges (petroleum based)
171 Slater Street ~15 m north	Health Canada ON9358836 2022	312 - Pathological Waste
78 O'Connor Street ~45 m north	Bell Canada ON0473817 2022	112 - Acid solutions, sludges and residues containing heavy metals 114 - Other inorganic acid wastes 121 - Alkaline solutions, sludges and residues containing heavy metals 131 - Neutralized solutions, sludges and residues containing heavy metals 148 - Miscellaneous waste inorganic chemicals 212 - Aliphatic solvents and residues 251 - Waste oils/sludges (petroleum based) 252 - Waste crankcase oils and lubricants 331 - Waste compressed gases, including cylinders
220 Laurier Avenue West ~85 m southeast	JLL ON6588995 2022	251 - Waste oils/sludges (petroleum based)
130 Slater Street ~95 m east	BRADDA PRINTING SERVICES INC. ON1032400 2022	213 - Petroleum distillates 264 – Photo processing wastes

Address Direction and Distance from Site	Generator Name	Registered Wastes
123 Slater Street ~105 m northeast	The Printing House ON3657993 2022	265 - Graphic arts wastes
	Metcalfe Realty ON001059485 2023	221 - Light fuels
111 Albert Street ~135 m northeast	SHOPPERS DRUG MART ON6141970 2022	261 – Pharmaceuticals 312 - Pathological Waste
155 Queen Street ~165 m north	TJX Canada ON001062086 2023	212 - Aliphatic solvents and residues
	Morguard Investment Limited ON001055671 2023	251 - Waste oils/sludges (petroleum based)
100 Queen Street ~165 m northeast	LaVie Executive Health Centre ON2874770 2022	312 - Pathological Waste
	Kean Plumbing Inc. ON001064120 2024	212 - Aliphatic solvents and residues
81 Metcalfe Street ~200 m northeast	Colonnade Bridgeport Realty Management ON001068474 2024	150 - Inert inorganic wastes
99 Metcalfe Street ~205 m northeast	Glenview Homes ON001070301 2024	122 - Alkaline solutions, sludges and residues containing other metals and non-metals, not containing cyanides 146 - Other specified inorganic sludges, slurries or solids
	The Downtown Dental Clinic ON7534992 2022	312 - Pathological Waste
35 O'Connor Street ~210 m northeast	Gemtec ON001070113 2024	146 - Other specified inorganic sludges, slurries or solids
55 Metcalfe Street ~225 m northeast	The Manufacture Life Insurance Company ON001060820 2023	251 - Waste oils/sludges (petroleum based)
84 Slater Street ~230 m east	Hydro One Networks Inc. ON8150356 2022	146 - Other specified inorganic sludges, slurries or solids

Address Direction and Distance from Site	Generator Name	Registered Wastes
		251 - Waste oils/sludges (petroleum based)

Several of the above noted occupants represented a PCA and are summarized in a Table A of Appendix G of this report.

3.1.8 Environmental Reports

G2S was provided with previous reports completed for the Site and the following is a general summary of the information obtained. Refer to the reports for particulars.

Table 5: Summary of Previous Environmental Reports

Report Details	Findings and Conclusions
Title: Phase I Environmental Site Assessment 110 O'Connor Street, Ottawa, Ontario **Date of Report:** November 12, 2021 **Author of the Report:** Le Groupe Gesfor Poirier, Pinchin	• At the time of the investigation, the Site was developed with a fourteen-storey commercial building with a two-storey mechanical penthouse, and three levels of underground parking. • Running Room and a hair salon occupied the ground floor of the building, with the remaining floors being vacant. • The present configuration of the Site building was developed within the 1970s with extensive renovations completed in 1999 and 2011. • Three diesel fired emergency generators are present within the Site, with one located within the underground parking garage, and two are located within the mechanical penthouse. • The previous Site occupant included the Department of National Defense and occupied the remaining floors. • Previous Site occupants included several dry cleaners, residential and various commercial uses. • Two single walled 1,500 L diesel aboveground storage tanks (ASTs) were identified within the underground parking garage, and two single walled 1,500 L diesel ASTs were identified within the mechanical penthouse. • Three diesel-fired emergency generators were located within the underground parking garage, and an emergency generator is located within the mechanical penthouse. • The Phase One ESA did not recommend a Phase Two ESA.
Title: Geotechnical Subsoil Investigation Report **Date of Report:** August 25, 2023 **Author of the Report:** Solroc Inc.	• The proposed use of the Site was to demolish the existing building with the exception of the foundation walls and the basement levels and construct additional 22 levels. • Three boreholes were advanced within the third level of underground parking levels, as well as two boreholes located within the exterior. • Borehole BH-5 was advanced off the Site due to limited space within the alleyway. • Five test pits were excavated to reveal the existing building

Report Details	Findings and Conclusions
	foundations and to observe the underlying soils. • The bedrock was encountered within the underground levels at a depth of 0.67 and 1.52 m below ground surface (bgs). The bedrock encountered within the exterior boreholes at depths of 4.67 and 5.74 m bgs. • Fill materials were identified within the boreholes to depths between 0.67 and 5.33 m bgs. • Groundwater was identified within the bottom of the test pits, no depth was noted. • Groundwater was identified within the third level of underground parking at a depth of 1.28 m bgs, and groundwater was identified within the exterior location at a depth of 5.36 m bgs. • The native soil encountered within the subsurface soil was identified as silty sand with some gravel.

3.2 Environmental Source Information

Table 6: Environmental Source Information

Document	Source	Pertinent Information
The City of Ottawa Official Plan: Schedule B1 – Downtown Core Transect Schedule C11-C – Natural Heritage System (East)	City of Ottawa website	Site and Study Area are generally classified as an 'Evolving Neighbourhood, Hub, and Corridor/Mainstreet'. Site and Study Area are generally classified as 'Urban Area'. No natural heritage features were identified.
Ministry of Natural Resources (MNR) and Forestry, Ontario, Natural Heritage Areas database	MNR online	No areas of natural significance are located within the Site or Study Area.
National Pollutant Release Inventory (NPRI) database	NPRI online	Search for records in the vicinity of the Site was conducted in two-year increments for the years 1993-2023. No records were found for the Site or Study Area.
Ontario Inventory of Polychlorinated Biphenyl (PCB) Storage Sites (1991 & 1995)	MECP	No records were identified within the Site. The following record was identified within the Study Area: - 78 O'Connor Street (~45 m north): Occupied by Bell Canada as a major site with 5.388 tonnes in 1991.
Environmental Bill of Rights Registry (EBR)	MECP	The following record has been identified for the Site: - Dundee Realty Management Corp. (2004), for the purpose of four natural gas fired boilers and one water heater tank with three standby diesel generator sets for emergency situations. The following records have been identified within the Study Area: - 78 O'Connor Street (~45 m north): Bell Canada (2003) for two standby generator sets, two natural gas

Document	Source	Pertinent Information
		fired boilers, one natural gas fired water tanks, and two cooling towers. - 234 Laurier Avenue West (~45 m southeast): Her Majesty the Queen (2002), for one standby diesel generator set. - 269 Laurier Avenue West (~45 m west): GWL Realty Advisors Inc. (2005), for three natural gas fired boilers and a standby diesel generator. -140 Slater Street (~60 m east): WHWW Hotels (Ottawa) Company (2006), for four natural gas fired hot water boilers, one natural gas fired hot water tank, one natural has fired air, and one standby natural gas generator set. - 220 Laurier Avenue West (~85 m southeast): The Manufacturers Life Insurance Company (2005), for one standby diesel generator. - 130 Albert Street (~90 m northeast): Metcalfe Realty Company Limited (2011), for the use of two cooling towers - 50 O'Connor Street (~100 m north): CanWest MediaWorks Inc. (2007), for one standby natural gas generator set - 99 Bank Street (~120 m northwest): EDS Canada Inc (2004), for one standby diesel generator and two existing natural gas fired boilers, as well as one new standby diesel generator. - 191 Laurier Avenue West (~125 m east): The Cadillac Fairview Corporation Limited (2004 – 2008), for the use of one natural gas fired humidifier, one standby natural gas generator, and one cooling tower. - World Exchange Plaza (~135 m northeast): bvIMC Realty Corporation (2006), for twelve natural gas fired boilers, five natural gas fired heating, two standby diesel generator sets, and seven cooling towers. - 250 Albert Street (~160 m northwest): TELUS Integrated Communications (2000) Inc. (2002) for one standby diesel generator set. - 131 Queen Street (~180 m northeast): Morguard Corporation (2007), for two natural gas fired boilers, two natural gas fired humidifiers, and five natural gas fired units, one standby diesel generator set. - 123 Metcalfe Street (~200 m east): Gillin Engineering and Construction Ltd. (2005), for multiple natural gas fired heating and cooling systems. - 255 Albert Street (~205 m northwest): Office of the Superintendent of Financial Institutions of Canada (2005), for the use of one standby diesel generator set, and GWL Realty Advisors Inc. (2007), for six natural gas fired boilers and a diesel generator. - 77 Metcalfe Street (~205 m northeast): The Cadillac Fairview Corporation Limited (2004), for one standby diesel generator set and one cooling tower.

Document	Source	Pertinent Information
		- 280 Slater Street (~205 m west): Canadian Nuclear Safety Commission (2004) for the use of a standby diesel generator. - 270 Albert Street (~210 m northeast): GT Group Telecom Services Corp. (2000) for one standby diesel generator. - 170 Metcalfe Street (~220 m southeast): The Canadian Red Cross Society (2011), for the use of one standby diesel generator set. - 55 Metcalfe Street (~225 m northeast): Health Canada (2007), for one standby natural gas generator.
Inventory of Coal Gasification Plant Waste Sites in Ontario	MECP	No records for the Site or Study Area.
Inventory of Industrial Sites Producing and Using Coal Tar and Related Tars in Ontario	MECP	No records for the Site or Study Area.
Historic Land Use Inventory (HLUI) Request	City of Ottawa	A HLUI application was submitted for the Site and Study Area, only new records and information is included below, and the full list is included in Appendix C: - 255 Albert Street (~205 m northwest) was historically a machine shop occupied by Ketchum & Co in 1901, and identified 9 USTs for Colonial Coach Lines and McColl-Frontenac Oil Co. -190 Sparks Street (~180 m north) was occupied by an auto service centre in 1940, and several ASTs and USTs for Blue Line Taxi and Colonial Coach Lines. - 146 Albert Street (presently 130 Albert Street) (~90 m northeast), and Monsanto Canada LNC as other rubber products in 2001. One 27,240 L fuel oil aboveground storage tank (AST) was located in the fourth level basement for Metcalfe Realty Co. Ltd, year unknown. - 84 O'Connor (presently 82 O'Connor Street) (40 m north) wholesaler of petroleum products was identified in 1960, with a UST in 1956. - 150 Albert Street (~55 m northeast) identified Stewart – Warner Sales and Service as an autobody and service shop from the years 1930 – 1950, and five USTs for Waverly Motors, By-Town Inn and W C W Whitcher. - 150 Metcalfe Street (~165 m southeast) identified Gary's Automotive from 2006 – 2012, and one unspecified fuel oil tank. -100 Albert Street (~135 m northeast) identified two USTs in 1948.

Document	Source	Pertinent Information
		- 88 Slater Street (~230 m east) identified two aboveground storage tanks (ASTs) in 1948 associated with Ottawa Light and Heat Power Company. - 167 Queen Street (presently 190 Queen Street) (~175 m northwest) identified a UST associated with U.K. Government Offices in 1948. - 111 Albert Street (historically 139 Albert Street) (~145 m northeast) identified a UST associated with Albert St Garage in 1948. Historical address 147 Albert Street identified two unidentified gasoline tanks with permits, and one 13,620 L fuel oil AST within fuel storage room in 1948. - 123 Slater Street (~105 m northeast) identified a 27,240 L bunker oil AST located in fourth sub basement. - 161 Bank Street (~105 m southwest) identified a fuel oil 9,988 L AST, enclosed within a room, year unknown. - 257 Lisgar Street (~240 m south) identified a 22,700 L fuel oil AST for Wentworth Development Corporation (Ottawa) Ltd, year unknown. - 200 Sparks Street (~230 m northwest) identified a 4,450 L fuel oil AST located within a masonry vault. - 156 Sparks Street (~180 m north) identified a 4,450 L fuel oil UST listed at the corner of O'Connor and Queen Street intersection, associated with Zellers. - 152 Metcalfe Street (~150 m southeast) identified a 4,540 L fuel oil UST at St. George's Anglican Church – Welch & Johnston, year unknown. - 150 Slater (~15 m east) identified a 4,540 L fuel oil AST. - 220 Queen Street (~200 m northwest) identified a 2,270 L fuel oil UST associated with Central Taxi – Canadian Oil Co. - 100 Metcalfe Street (~150 m northeast) identified a 2,270 L gasoline UST and 22,700 L fuel oil AST for Shaw's Dairy – Cities Service Oil Co. - 162 Bank Street (~150 m west) identified three 4,540 L gasoline UST for Imperial Oil. - 114 Metcalfe Street (~160 m east) identified a 13,620 L UST fuel oil located within a former coal bin. - 171 Bank Street (~60 m southwest) identified 4,540 L fuel oil tank (not specified), a 2,270 L gasoline UST, and 13,620 L fuel oil UST with Dominion Furnishing Co, Chateau Drivurself Ltd – Sun Oil, and Excelsior Life Insurance – Canadian Comstock, and BP Canada as a gas station in 1965. - 168 Laurier Avenue West (~205 m southeast) a 19,662 L fuel oil unspecified tank for YWCA. - 187 Bank Street (~170 m southwest) identified a fuel oil UST for S Hartman.

Document	Source	Pertinent Information
		- 203 Bank Street (~195 m southwest) identified a 13,620 L fuel oil UST for Eiffel Construction Ltd., year unknown. - 171 Nepean Street (~170 m southwest) identified a 6,810 L fuel oil AST for Lowe-Martin Co. - 340 Laurier Avenue West (~205 m southwest) identified 27,240 L fuel oil AST for Sir Wilfred Laurier Building, and 9,080 L gasoline UST for Myers Motors. - 88 Albert Street (~235 m east) identified waste oil ASTs for M Landreville Garage, and a 22,700 L fuel oil UST for Beacon Realty Building. - 116 Albert Street (~140 m northeast) identified two 27,240 L fuel oil AST for The Royal Trust Co. - 190 O'Connor Street (~195 m south) identified two 4,540 L fuel oil ASTs for Eiffel Construction Ltd., with the tanks located within the basement address. - 71 Bank Street (~225 m northwest) identified 4 USTs for John D Cipera. - 78 O'Connor Street (~45 m north) identified 3 ASTs and one UST for Bell Canada. - 220 Albert Street (~105 m northwest) identified a gasoline UST for Anderson & Jarvis. - 131 Queen Street (~180 m northeast) identified a 22,700 L fuel oil AST for Ottawa Citizen.
Freedom of Information (FOI) Request	MECP	The following records were released for the Site: - Certificate of Approval Air for four natural gas fired boilers and one water heater tank in 2004 for Dundee Realty Management Corp. - Application for Approval of Air for three emergency generators in 2003 for Dundee Realty Management Corp. and includes emission summary and dispersion modelling report check list, including a facility description of four natural gas-fired heating boilers and a gas domestic water heater located within the rooftop penthouse with two stacks for each of the boilers. Calculation sheets for emissions, dispersions and transportation, utilities and public works are included. - In 1999, there is a request for 50 litres of PCB transfer waste oils for Dundee Realty Management Inc. and the shipment will include 2,500 kg ballasts. - An incident report was registered in 2009 for R134A to atmosphere from a chiller located within the penthouse, due to water temperature increasing and rupturing the disk. - An incident report was registered in 2014 for re-sweep audit and met the facility requirements. - An incident report was registered in 2011 and included 15 L of hydraulic oil to pavement at the loading dock at 110 O'Connor Street.

Document	Source	Pertinent Information
		- An incident report was registered in 2016 for an unknown amount of rayon refrigerant to the atmosphere. - An incident report was registered in 2009 for a pro-active inspection of the Site to ensure the facility was in compliance with Ontario Regulation 102/94 and Ontario Regulation 103/94 under the Environmental Protection Act. - An occurrence report was registered in 1998 for a pickup of PCB ballasts from Dundee Realty Limited at Site 100 O'Connor Street. ***G2S Note***: It is assumed that there was an error made with the address in the last page of the record, and should have been 110 O'Connor Street.
Waste Disposal Site Inventory, June 1991	MECP	No records for the Site or Study Area.
Brownfields Environmental Site Registry	MECP online	The following properties within the Study Area have Records of Site Conditions (RSCs) filed: - 131 Queen Street (~180 m northeast): Previous work within the property included a Phase One ESA and a Phase Two ESA from the years 2001 and 2004. No contaminants were identified, and no Risk Assessment (RA) was filed. - 75 Slater Street (~230 northeast): APECs identified on the property as a former automotive garage, fill material of unknown quality, an existing hydro substation in 2022, a former automotive service garage, two former USTs at the southeast corner of the Site, and application of de-icing salt. Soil contamination was identified for metals, no groundwater was exceedances were identified.
Technical Standards and Safety Authority (TSSA)	TSSA via email	The Site and immediate properties were searched for TSSA records. No records were identified.

Several of the above noted environmental records were deemed to represent a PCA to the Site,and is summarized in a Table A of Appendix G of this report. The environmental source information is included in Appendix D.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

For ease of reference, aerial photographs are included as Drawings 4 through 9 in Appendix A. The following table summarizes the information.

Table 7: Aerial Photographs

Year	Site Description	Study Area Description
1928	The Site is developed with eight buildings along the eastern portion of the Site.	All the roadways within the Study Area have been developed. Buildings are developed within the Study Area and appear to be residential and/or commercial buildings.
1965	The Site has been redeveloped with three buildings. The central portion of the Site appears to be used for storage.	The south adjacent building located at 124 O'Connor Street has been redeveloped into the present-day configuration. The west adjacent property appears to be developed for industrial or commercial land use. The Study Area is in the beginning stages of development, similar to present day.
1976	The Site has been redeveloped into the present-day multi-unit commercial building configuration.	The west adjacent property has been redeveloped into a parking lot. The Study Area is continuing to be developed with multi-tenant commercial or residential high rises.
1999		
2008		
2024		150 Slater Street (~15 m east) has been redeveloped with the current building structure. The Study Area has been developed similar to present.

3.3.2 Ontario Base Maps/Topographic and Other Maps

For ease of reference, selected maps are included as Drawings 10 through 13 in Appendix A. The following table summarizes the information.

Table 8: Topographic and Other Maps

Item	Year	Site Description	Study Area Description
Topographic Map	1950	The Site appears to be developed, no details of the buildings are depicted. The ground elevation is approximately 68 m above sea level (ASL) and elevations are decreasing towards the Rideau Canal and towards the Ottawa River.	The Study Area appears fully developed; no buildings are depicted. All roadways are developed within the Study Area. The Rideau Canal is located east of the Study Area, and the Ottawa River is located north of the Study Area.
Topographic Map	1983	The Site is shaded red indicating commercial and residential use.	The Study Area is shaded red, indicating residential/commercial use.
Topographic Map	1998		
The Community Map of Canada Vector Basemap	2024	The Site is developed with current building footprint, similar to present. No elevations are depicted.	The Study Area is developed with commercial and residential properties.

Item	Year	Site Description	Study Area Description
Soil Associations of Southern Ontario	1960	The Site and Study Area is dominantly Lincoln (D.G.G.) Haldimand clay, formed on till or lacustrine sediments.	
Palaeozoic Geology of Southern Ontario, Map 2254, Ontario Division of Mines	1972	The Site and Study Area is underlain by grey and black shale of the Upper Ordovician Georgian Bay (Whitby (Eastview and Billings)) Formation.	

3.3.3 Hydrology and Hydrogeology

The building covers the eastern portion of the Site and therefore limited surface water is generated at the Site; however, floor drains are located across the paved areas located throughout the underground parking levels of the Site and flow towards stormwater sumps located within the third level underground parking level. Surface water is expected to runoff the paved surfaces along the western portion of the Site towards catch basin located along the southwestern portion of the Site.

The Ottawa River is located approximately 570 m north of the Site and the Rideau Canal is located approximately 565 m northeast, flowing north/northwest towards the Ottawa River. Surface elevations in the area decrease to the north/northeast towards the Rideau Canal. Based on our observations and review, the expected direction of groundwater flow underlying the Site is northeast towards the Rideau Canal.

3.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

The Ottawa River is located approximately 570 m north of the Site and the Rideau Canal is located approximately 565 m northeast, no woodlands, wellhead protection zones, or areas of natural significance are not located within the Site.

Several monitoring well records were identified within the Study Area; no drinking water well records were located. The Site is within a developed urban setting and potable water is provided from a piped municipal supply that is sourced from the Ottawa River.

3.3.5 Well Records

According to the MECP records, there were several monitoring well records within the Study Area (included in Appendix E) and none on-Site. A record from a monitoring well located south of the Site identified soil as grey sand and gravel fill to a depth of 0.4 m below ground surface (bgs), underlain by brown sand fill to a depth of 0.5 m bgs, underlain by brown and black sandy clay fill to a depth of 1.5 m bgs. Grey silty clay with some sand was identified to a depth of 4.8 m bgs, underlain by black and brown shale at 4.8 m bgs. The static water level was not recorded.

3.4 Site Operating Records

Site operating records were requested via a Phase One ESA questionnaire provided by G2S at the time of this Phase One ESA report. The following chart summarizes the records:

Table 9: Site Operating Records

Site Operating Records	
Regulatory Permits and Records	No records available
Material Safety Data Sheets	No records available
Underground Utility Drawings	No records available
Chemical Inventory and Storage	No records available
Storage Tanks	No records available
Environmental Monitoring Data	No records available
Waste Management Records	No records available
Process, Production and Maintenance Documents	No records available
Spills and Discharges	No records available
Emergency Response and Contingency Plans	No records available
Environmental Audit Reports	No records available
Facility Site Plans	No records available

4. Interviews

4.1 Site Personnel

An interview regarding the Site was conducted with Site Representative and Designer Manager for the Site, Mr. Mohamad Kheir Hassoun on February 27, 2025. A Phase One Questionnaire has not been returned at the issuance of this report.

4.2 Third Party Individuals

Third party individuals were not available for interview at the time of this Phase One ESA.

4.3 Government Officials

The following government officials were contacted as part of this Phase One ESA:

1. Ministry of the Environment, Conservation and Parks (MECP), Freedom of Information and Protection of Privacy Office; and

2. Technical Standards and Safety Authority (TSSA).

5. Site Reconnaissance

Observations of the Site, adjacent, and surrounding properties were conducted by walking over the Site. Adjacent and surrounding properties were observed from within the Site or by other public means. Refer to Drawing 3 (Site Plan) in Appendix A. Photographs of the Site and the Study Area are included in Appendix F.

5.1 General Requirements

Table 10: Site Reconnaissance

Date:	February 19, 2025
Time:	1:00 p.m.
Weather:	Sunny, -15 ºC
Person who conducted the Site visit:	Hailey Perras, B.Sc.
Site Contact/Personnel accompanying G2S during Site visit	Peter Tasse
Qualified Person supervising the Site visit:	Steve Campbell, P.Geo.
Facility Operating: (Yes/No)	No

5.2 Specific Observations at the Phase One Property

General Observations:
The Site is developed as a rectangular 14-storey vacant commercial office building, with three levels of underground parking. The ground floor historically consisted of six suites: Running Room, J's Nails & Spa, The Fresh Flower & Gift Emporium, Metcalfe Hair Design, INS Market, and Right Shop Computer Shop. The Site is an active demolition zone, with the ground floor inaccessible due to active sparks. Four active elevators are present within the central portion of the building. Four elevators are located within the central portion of the Site. The second and third floor is currently empty due to a demolition company removing the interior building materials. The remaining floors are vacant offices and historical use of a yoga studio and gym, awaiting to be demolished. Mini excavators were present within the upper levels and are associated with the demolition process. A mechanical penthouse has an empty diesel aboveground storage tank (AST), with no details depicted. The first day tank is 458 L AST, and the second day tank is a 909 L AST, and are associated with the backup generators located on the roof. An abandoned chiller is located within the mechanical penthouse, associated with the induction units along the perimeters of each floor. Tracer dye appears to be present below the boiler loop. The first level of underground parking consisted of an empty diesel tank and one coloured diesel tank, with approximately 700 L remaining, no details were depicted. The ASTs are connected to two sets of fill and vent pipes along the western edge of the building. The tanks were within a concrete basin, no spills or leaks were present. One propane tank is located near the AST's. A diesel AST is located within the east central portion of the first level of parking, with fill and vent pipes located within the exterior of the western building edge. The second level of underground parking lot contains miscellaneous storage of building materials. The third level of underground parking lot consists of stormwater sump pumps associated with runoff water from drains located throughout the parking levels.

The western portion of the Site is asphalt covered, and a ramp going into the underground parking lot, no longer active.	
On-Site Potentially Contaminating Activities	
PCA #28 – Gasoline and Associated Products Storage in Fixed Tanks	
Interior Observations	
Item	Observations
Building Observations	A fourteen-storey office building with three levels of underground levels of parking, and a two-storey mechanical penthouse.
Existing and Former Heating and Cooling Systems	No utilities are active on-Site.
Description of Below-Ground Structures	Three levels of underground parking garages.
Exit and Entry Points	Entrance is via Slater Street.
Drains, Pits and Sumps	Drains located throughout the building leading to stormwater management sump within the third-floor basement level.
Mechanical Equipment	Historical use of four elevators located within the central portion of the Site.
Stained Materials	Not applicable.
Noise, Odours, Vibrations	Not applicable.
Storage Tanks and Bulk Containers	One 458 L double walled AST and one 909 L ASTs are located within the mechanical penthouse. Two coloured diesel ASTs are located within a concrete basin within the first level of underground parking levels, no details are depicted. One 945 L AST is located within the west central portion of the Site.
Unidentified Substances	Not applicable.
Hazardous Materials and Special Attention Items:	It is noted that a Designated Substances Survey (DSS) was not within the requested scope of work for this Phase One ESA. In this regard, the following is provided for information purposes only and does not constitute a DSS.
(i) Polychlorinated Biphenyls	Polychlorinated Biphenyls (PCBs) were widely used for cooling and lubricating electrical equipment from the 1930s to the 1970s. The use of PCBs was prohibited in the late 1970s. Transformers are located within the mechanical penthouse, therefore PCBs may be present on-Site.
(ii) Asbestos Containing Materials	Asbestos is a generic term referring to a group of naturally occurring fibrous mineral silicates. Asbestos was used in many products due to its strength and resistance characteristics. Common uses include boiler and pipe insulation, spray-on fireproofing, floor and ceiling tiles, asbestos-cement products, etc. Legislation banned the use of asbestos-containing materials (ACMs) in the mid to late 1980s. Due to the age of the building, there is potential for ACMs to be present in the building.
(iii) Lead	Lead is a heavy metal typically found in pipes, batteries, lead solder, cabling, insecticides, paints, glass and as an additive to gasoline. In 1976, the federal government limited the amount of lead for interior paints to 0.5% by weight or 5,000 ppm. The Surface Coating Materials Regulation (SOR/2005-

	109) dated April 19, 2005, as amended, pursuant to the 2005 Hazardous Products Act, revised the standard to limit the amount of lead in certain paints to 0.06% (600 ppm). In October 2010, this was revised to 0.009 % (90 ppm). Due to the age of the building, there is potential for lead based paint to be present on-Site.
(iv) Mercury	Mercury is typically found in a variety of building materials including paints, thermostats and mercury-vapour lamps. Potential mercury-containing equipment may be located on-Site.
v) Ozone Depleting Substances	Ozone-Depleting Substances (ODSs) include any substances containing chlorofluorocarbon ("CFCs"), hydro chlorofluorocarbon ("HCFCs"), halon or any other material capable of destroying ozone in the atmosphere. Federal regulations eliminated the production and import of CFCs by January 1, 1996 and put a freeze on the production and import of HCFC-22 by January 1, 1996. The regulation also requires the complete replacement of HCFC-22 equipment by the year 2020. Potential ODS-containing equipment may be located on-Site including refrigerators and an air conditioning units.
(vi) Urea Formaldehyde Foam Insulation	Urea Formaldehyde Foam Insulation (UFFI) was used as an insulation material for existing buildings (commonly houses) from the mid-1970s until its ban in Canada in 1980.
Site Limitations	None observed.
Exterior Observations	
Item	Observations
Structure Exteriors	Temporary construction fencing is located within the northern portion of the Site.
Hazardous Materials	None observed.
Storage Tanks and Containers	None observed.
Unidentified Substances	None observed.
Wells	None observed.
Potable Water Supply	Municipal (Ottawa River).
Underground Utility and Service Corridors	Utilities were decommissioned due to the ongoing demolition activities on-Site.
Sewage Disposal	Not applicable.
Pits and Lagoons	None observed.
Stained Materials	None observed.
Stressed Vegetation	None observed.
Ground Surface	Asphalt
Fill Materials	Subsurface investigations completed by others in 2023 identified the presence of fill material across the Site to depths of up to 5.3 m bgs.
Watercourses, Ditches and/or Standing Water	None observed on Site.
Roads, Parking Facilities and Rights of Way	Access to the Site is via Slater Street and O'Connor Street.

Noises, Odours, Vibrations	Noises due to active demolition.
Waste Disposal	Not applicable.
Storage	Demolition debris is located throughout various levels and within the underground parking levels.
Adjacent Land Uses	
North	Slater Street followed by 171 Slater Street; a multi-tenant commercial building.
South	124 Laurier Avenue West; vacant.
East	O'Connor Street followed by 150 Slater Street; a multi-unit commercial building.
West	170 Slater Street; a parking garage.
Current or Former Railway Lines or Spurs	None observed on Site or in the Study Area.

5.2.1 Enhanced Investigation Property

An enhanced investigation of the Site is necessary when the Site is being used for one of the following uses as described in clause 32 (1) (b) of Ontario Regulation 153/04 of the Environmental Protection Act (EPA). Clause 32 (1) (b) identifies properties that are being used in whole or in part for:

i. For industrial use
ii. As a garage
iii. As a bulk liquid dispensing facility including gasoline service station
iv. For the operation of dry-cleaning equipment.

The Site is currently vacant and has historically been occupied as a multi-tenant commercial building. The Site has historically been utilized by several dry cleaners; therefore, an enhanced investigation is required.

5.2.2 Operations

The current property use is commercial; and the previous uses were commercial and residential. In general, the first developed use of the Site was prior to 1875, and was developed with seven residential dwellings. The Site was then developed with eight dwellings in the early 1900s. A grocery store and bakery was developed within the northern portion of the Site in 1912, as well as the central portion of the Site was occupied by a dry cleaner. The northern portion of the Site was redeveloped into a dry cleaner in the 1920s, with the central portion of the Site was developed with a residential dwelling, and the southern portion of the Site was occupied by an apartment building and a tailor. A dry cleaner was located within the central and southern portions of the Site in the 1940s to the 1950s, with the remaining Site being occupied by residential land use. The previously mentioned buildings were demolished in the 1960s, and the Site was redeveloped with an apartment building within the northern portion of the Site, and commercial buildings were developed within the southern portion of the Site. The present building configuration was developed within the 1970s and was occupied by various commercial tenants, until 2022, and has been vacant until present.

According to a title search, the Sparks Estate was established in 1869 for residential use, with various owners throughout the 1900s, until 1972 when Narono Holdings Limited occupied the present-day Site configuration. Narono Holdings Limited then transferred the Site to Lehndorff United Properties (Canada) Limited in 1981, and then transferred to 110 O'Connor Fourth Holdings Ltd in 1981. Esbo Properties Ltd owned the property from 1981 to 1989, and Continental Saxon Holdings Limited from 1995 to 2008, and Cominar on Real Estate Holdings Inc. owned the property from 2007 to 2021, when the current owners of Edifice 110 O'Connor Inc./110 O'Connor Building Inc.

G2S was unable to find contact information for previous owners for 110 O'Connor Street, information regarding the former operations at the Site, including processing or manufacturing was limited.

5.2.3 Hazardous Materials

It is unknown if there were hazardous material on Site that were related to former industrial uses. Regulatory permits, records and material safety data sheets (MSDS) were not available.

5.2.4 Products Manufactured

It is unknown what products were manufactured, no previous Site occupants indicated previous industrial use.

5.2.5 By-Products and Wastes

It is unknown what by-products and wastes were generated, other than domestic waste as part of the former commercial use on Site:

- One record for Groupe Mach Ottawa for alkaline solutions in 2024.

5.2.6 Raw Materials – Handling and Storage

It is unknown which raw materials were used on Site. Inventories of chemicals, chemical usage and chemical storage areas were not available.

5.2.7 Details of Drums, Totes and Bins

No evidence of any former drums, totes or bins was noted on Site.

5.2.8 Details of all Oil/Water Separators

No evidence of oil/water separators were noted during the Site reconnaissance.

5.2.9 All Vehicle and Equipment Maintenance Areas

The former auto garage was located within the east central portion of the Site in the 1920s.

5.2.10 Details of All Spills

As previously indicated, the EcoLog ERIS report identified three spill records for the Site. One spill was indicated in 2009 of chiller leak to the atmosphere. Equipment failure of Cascades Recovery Inc. of 15 L of hydraulic oil to pavement in 2011 was reported with no environmental

impact, no details of where the spill occurred was noted within the report. The third spill reported included equipment failure of refrigerant gas to the atmosphere in 2016.

5.2.11 Details of Liquid Discharge Points

Several stormwater sumps were observed in the floor of the underground levels to facilitate water run off within the basement.

5.2.12 Details of Operations

Details of former operations including processing or manufacturing and equipment used in processing or manufacturing were obtained from a 1972 Opta Inspection Report.

5.2.13 Details of all Hydraulic Lift Equipment

The building historically had hydraulic elevator cable style elevating devices, which was housed in an elevator service room on the mechanical penthouse. The elevator serviced all floors.

5.3 Written Description of Investigation

The investigation carried out by G2S included inspection and examination of the Site as well as a visual inspection of the Study Area from areas accessible to the public. The investigation included documenting Site and Study Area conditions through notes and photographs and review of reasonably accessible information. The data complied was reviewed and evaluated for APECs, as presented in this report.

6. Review and Evaluation of Information

6.1 Current and Past Uses

Based on the information gathered from the Site visit, records review and interviews, the following is a summary of the current and past uses of the Site:

Table 11: Summary of Current and Past Site Uses

Year	Name of Owner	Description of Property Use	Property Use	Other Observations
S ½ Lot C Con C Rideau Front – Township of Nepean				
Prior to 1823	Crown	Undeveloped	Agricultural or other use	Based on information from title search, no aerial photos or Fire Insurance Plan (FIP) available.
1823 – 1826	John B. Honey			
1826	Nicholas Sparks			
N ½ Lot C Con C Rideau Front				
Prior to 1834	Crown	Undeveloped	Agricultural or other use	Based on information from title search, no aerial photos or Fire Insurance Plan (FIP) available.

6.2 Potentially Contaminating Activities

The following Potentially Contaminating Activities (PCAs) were identified for the Site and/or Study Area and are summarized on Table A in Appendix G and shown on Drawing 14 in Appendix A.

6.2 Areas of Potential Environmental Concern

Based on review and evaluation of the PCAs, APECs were identified at the Site and are summarized on Table B in Appendix G and shown on Drawing 15 in Appendix

7. Phase One Conceptual Site Model

Site Description

The rectangular shaped Site is located on the west side of O'Connor Street, located at the southwest corner of the intersection with Slater Street and O'Connor Street, and covers an approximate area of 0.21 ha (0.51 ac.). The Study Area consists of residential and commercial land use, and the Rideau Canal is located approximately 565 m northeast of the Site. The Site location is illustrated on Drawing 1 in Appendix A and photographs of Site are included in Appendix F.

The first developed use of the Site was prior to 1875 and was developed with seven residential dwellings. The Site was then developed with eight dwellings in the early 1900s. A grocery store and bakery was developed within the northern portion of the Site in 1912, as well as the central portion of the Site was occupied by a dry cleaner. The northern portion of the Site was redeveloped into a dry cleaner in the 1920s, with the central portion of the Site was developed with a residential dwelling, and the southern portion of the Site was occupied by an apartment building and a tailor. A dry cleaner was located within the central and southern portions of the Site in the 1940s to the 1950s, with the remaining Site being occupied by residential land use. The previously mentioned buildings were demolished in the 1960s, and the Site was redeveloped with an apartment building within the northern portion of the Site, and commercial buildings were developed within the southern portion of the Site. The present building configuration was developed within the 1970s and was occupied by various commercial tenants. The Site building has been vacant since 2022 and is presently in the process of demolition.

Water Bodies/Areas of Natural Significance

No waterbodies or woodlands are located within the Study Area. The City of Ottawa official plan zones the Stie and Study Area as an Urban Area; the Ministry of Natural Resources (MNR) map does not identify any areas of natural significance.

No wellhead protection areas were identified within the Study Area; however, the Site is not located within an intake protection zone.

Surface water from the Site is expected to flow across the paved areas along Metcalfe Street and Albert Street towards catch basins. Surface water is expected flow towards the catch basins and drains located within the underground parking levels and drain towards a stormwater sump.

Drinking Water Wells

No drinking water well records were located. The Site is within a developed urban setting and potable water is provided from a piped municipal supply that is sourced from the Ottawa River.

Geological and Hydrogeological Setting

The Site is located approximately 68 m above sea level. The Rideau Canal is located approximately 565 m northeast, flowing north towards the Ottawa River, located approximately 570 m north. Surface elevations in the area generally decrease towards the northeast. Based on our observations and review, the expected direction of groundwater flow underlying the Site is northeast towards the Rideau Canal.

Underground Utilities

Underground utilities were identified on-Site as part of a concurrent Phase Two ESA being completed by G2S. Based on the shallow depth of most utility lines and the expected depth of groundwater in the area, utilities are unlikely to affect contaminant distribution and transport.

Surrounding Properties

The Phase One ESA Study Area is developed primarily for residential and commercial land use (as shown on Drawing 2 in Appendix A). Slater Street is located north of the Site followed by a multi-unit commercial building, a parking lot is located west adjacent, a vacant office building is located south adjacent to the Site, and O'Connor Street followed by a multi-unit commercial building is located to the east.

Potentially Contaminating Activities (PCAs)

Historical review of the Site and surrounding properties within a 250 m radius of the Site identified nine PCAs on-Site and several off-Site PCAs, as defined in O. Reg. 153/04. PCAs identified during the Phase One ESA are summarized in Table A of Appendix G.

Areas of Potential Environmental Concern (APECs)

The PCAs were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, expected chemical storage amounts, etc. Based on review and evaluation of the information gathered, twelve APECs were identified on-Site and are summarized in Table B of Appendix G.

8. Conclusions and Recommendations

This Phase One ESA was conducted to:

i) develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One ESA property;

ii) determine the need for a Phase Two ESA; and

iii) provide a basis for carrying out any Phase Two ESA required.

The assessment was performed in accordance with the Phase One ESA protocols outlined in O.Reg. 153/04, as amended, which came into force on July 1, 2011, and meets the requirements of Schedule D of the Regulation.

Based on information from the records review, the first developed use of the Site was prior to 1875, and was developed with seven residential dwellings. The Site was then developed with eight dwellings in the early 1900s. A grocery store and bakery was developed within the northern portion of the Site in 1912, as well as the central portion of the Site was occupied by a dry cleaner. The northern portion of the Site was redeveloped into a dry cleaner in the 1920s, with the central portion of the Site was developed with a residential dwelling, and the southern portion of the Site was occupied by an apartment building and a tailor. A dry cleaner was located within the central and southern portions of the Site in the 1940s to the 1950s, with the remaining Site being occupied by residential land use. The previously mentioned buildings were demolished in the 1960s, and the Site was redeveloped with an apartment building within the northern portion of the Site, and commercial buildings were developed within the southern portion of the Site. The present building configuration was developed within the 1970s and was occupied by various commercial tenants. The Site has been vacant since 2022 and is presently in the process of demolition.

Historical review of the Site and surrounding properties within a 250 m radius of the Site identified nine on-Site PCAs and several off-Site PCAs, as defined in O. Reg. 153/04. The PCAs were assessed based on observations of the operations, their location relative to the Site with respect to the inferred groundwater flow direction, their tenure, expected chemical storage amounts, etc. Based on review and evaluation of the information gathered, the following APECs have been identified:

APEC 1: West central portion of Site – Current and historical presence of three diesel aboveground storage tanks (ASTs) located within the underground parking levels. Presence of fill and vent pipes associated with the ASTs.

APEC 2: Entire Site – A geotechnical report by others identified fill material present beneath the Site to a depth of 5.33 m below ground surface (bgs).

APEC 3A: Northeastern portion of Site – Historical presence of a dry cleaner from the years 1912 – 1922.

APEC 3B: East central portion of Site – Historical presence of a dry cleaner in 1912.

APEC 3C: Southeastern portion of Site – Historical presence of a dry cleaner from the years 1948 – 1955.

APEC 3D: Northwestern portion of Site – Historical use of 174 Slater Street as a dry cleaner from the years 1912 – 1922.

APEC 4: Central portion of Site – Current and historical presence of a transformer vault within the central portion of the Site.

APEC 5: Western portion of Site – Historical use of de-icing salt located on paved portions of the Site.

APEC 6: Southern portion of Site – Historical presence of a dry cleaner located at 124 O'Connor Street (south adjacent) from the years 1922 – 1941.

APEC 7A: Western portion of Site – Historical use of 170 Slater Street (west adjacent) as an autobody shop, from the years 1948 – 1966.

APEC 7B: Northwest portion of Site – Historical presence two underground storage tanks (USTs) in the 1940 - 1960 located along the northeastern portion of 170 Slater Street (west adjacent).

APEC 7C: Western portion of Site – Historical use of 170 Slater Street (west adjacent) for metal plating in the 1930s.

APEC 7D: Western portion of Site – Historical use of 170 Slater Street (west adjacent) as a metal fabricator in the 1970s.

Regarding APEC 5 (de-icing salt use), per Section 49.1 of O. Reg 153/04, assessment of this APEC is not required. Under the Regulations, where a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both, the applicable standard is deemed not to be exceeded. In this regard, further assessment of this APEC is not required.

Based on the findings of this Phase One ESA, a Phase Two ESA is recommended to investigate the potential for contamination related to the above-noted APECs.

8.1 Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

It is the opinion of G2S that a Phase Two ESA is required before an RSC can be submitted for the Site.

8.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

It is the opinion of G2S that an RSC cannot be submitted for the Site based on a Phase One ESA alone.

9. Qualifications of the Assessors

This Phase One ESA was conducted by Hailey Perras, B.Sc. Ms. Perras is responsible for the successful completion of field work and reporting. Ms. Perras has completed numerous projects on behalf of private and public sector clients for industrial, commercial, and residential sites.

This Phase One ESA was reviewed by Ms. Stephanie Lewis, B.A. Ms. Lewis has been trained to conduct Phase One and Two ESAs in accordance with the CSA and O. Reg 153/04, as amended. She is a senior project manager with over 10 years of professional experience specializing in environmental investigations and project management. Her main areas of expertise include Phase One and Phase Two ESAs, project management, site cleanup/remediation, UST and AST removals, and site remediation. She has completed numerous projects on behalf of private and public-sector clients for industrial, commercial, and residential sites.

This Phase One ESA was reviewed by Mr. Steve Campbell, P. Geo. Mr. Campbell has over 20 years of environmental consulting experience, including Phase One and Two ESAs, hazardous materials management, contaminant hydrogeology, air quality, environmental monitoring and remediation of contaminated sites. Mr. Campbell is responsible for the overall management of projects, QA/QC, and health and safety, as well as acting as a technical lead on projects. Mr. Campbell is a Qualified Person as defined in Ontario Regulation 153/04 for signing off on Phase One and Two ESAs, remediation reports and Records of Site Condition (RSCs). Mr. Campbell has managed numerous asbestos, designated substances and mould assessments, as well as remediation programs.

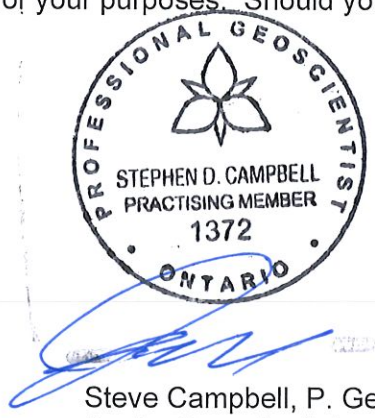
11. Limitations

This Phase One Environmental Site Assessment (ESA) has been prepared for the sole benefit of the Client (Groupe Mach Inc.) and is intended to provide a Phase One ESA for the Site, 110 O'Connor Street in Ottawa, Ontario. The Phase One ESA may not be relied upon by any other person or entity without the expressed written consent of the Client and G2S Consulting Inc. (G2S). Any use which a third party makes of this Phase One ESA, or any reliance on decisions made based on it, is the responsibility of such third parties. G2S accepts no responsibility for any loss, damage, expenses, or penalties suffered by any third parties that may arise or result from the use of any information or recommendations contained in this report.

The report is based solely on the scope of services which are specifically referred to in this report. No physical or intrusive testing has been performed, except as specifically referenced in this report. This report is not a certification of compliance with past or present regulations, codes, guidelines and policies.

The findings in this Phase One ESA are limited to the conditions at the Site at the time of this investigation (February to April 2025) and supplemented by a historical review and data obtained by G2S as described herein as well as information provided by the Site representative as reported herein. Conclusions presented in this Phase One ESA should not be construed as legal advice.

If Site conditions, regulations, codes, guidelines and applicable standards change or if any additional information becomes available at a future date, changes to the findings, conclusions and recommendations in this Phase One ESA may be necessary.



This assessment does not wholly eliminate uncertainty regarding the potential for existing or future costs, hazards or losses in connection with the Site and must be viewed as a mechanism to reduce risk rather than eliminate the risk of contamination concerns.

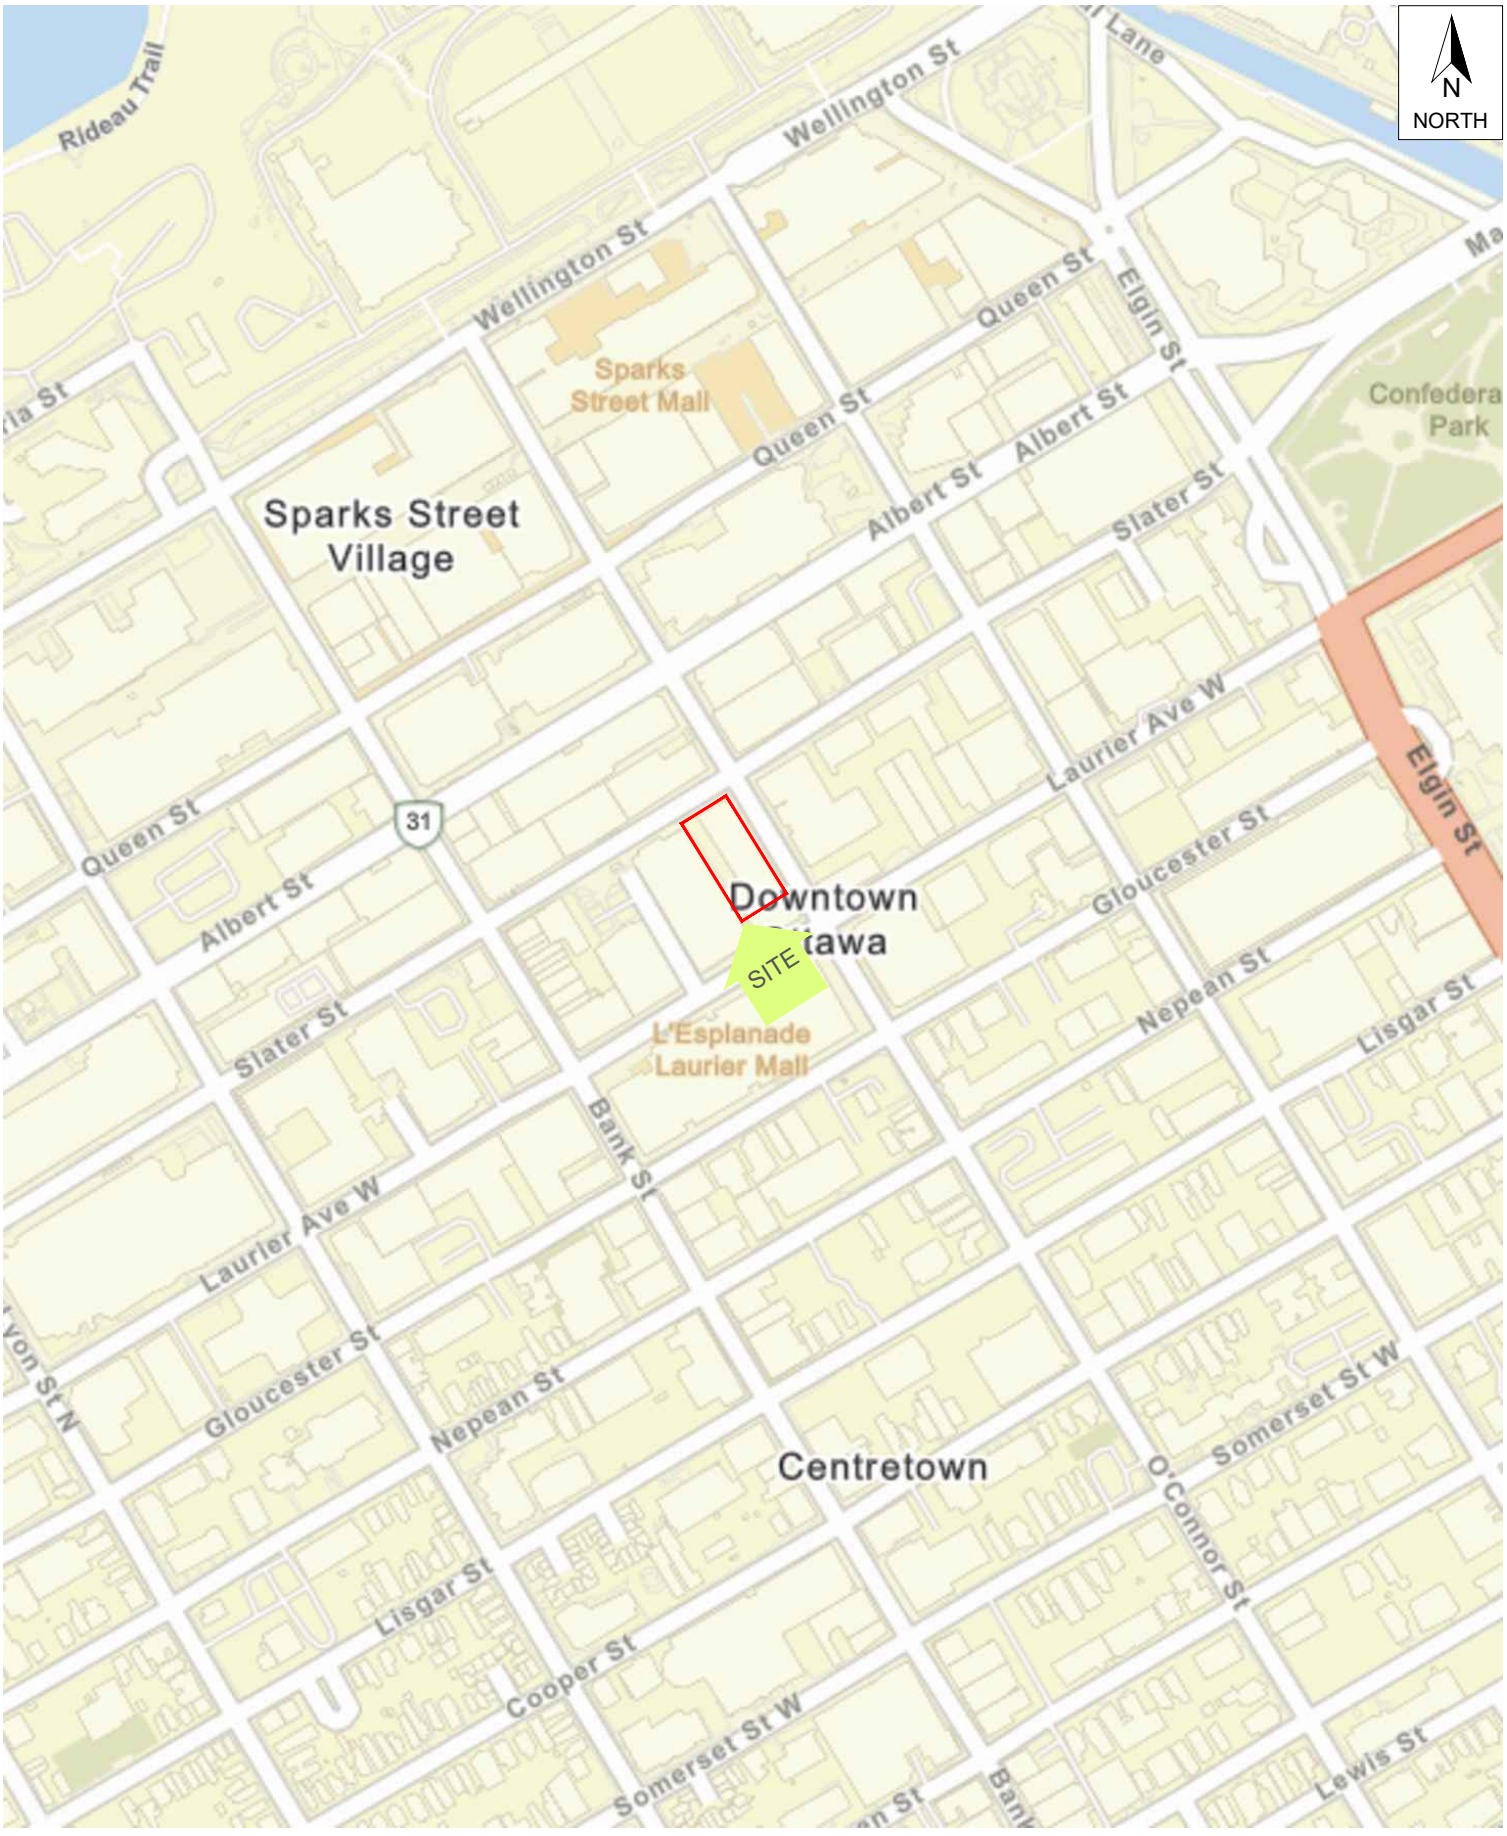
12. Signatures and Closing Remarks

We trust this Phase One ESA is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

G2S Consulting Inc.

Hailey Perras, B.Sc.
Environmental Technician



Steve Campbell, P. Geo.
Senior Geoscientist

Stephanie Lewis, B.A.
Senior Project Manager

LEGEND

- APPROXIMATE SITE BOUNDARY
- MONITORING WELLS INSTALLED BY OTHERS (2023)
- BOREHOLE ADVANCED BY OTHERS (2023)
- 1878 - 1955 HISTORICAL BUILDING FOOTPRINT
- 1963 HISTORICAL BUILDING FOOTPRINT
- ABOVEGROUND STORAGE TANK (AST)

AREAS OF POTENTIALLY ENVIRONMENTAL CONCERN

APEC 1 — WEST CENTRAL PORTION OF SITE - CURRENT AND HISTORICAL PRESENCE OF THREE DIESEL ABOVEGROUND STORAGE TANKS (ASTs) LOCATED WITHIN THE UNDERGROUND PARKING LEVELS. PRESENCE OF FILL AND VENT PIPES.

APEC 2 — ENTIRE SITE - A GEOTECHNICAL REPORT BY OTHERS IDENTIFIED FILL MATERIAL PRESENT BENEATH THE SITE TO A DEPTH OF 5.33 M BELOW GROUND SURFACE

APEC 3A — NORTHEASTERN PORTION OF SITE - HISTORICAL PRESENCE OF A DRY CLEANER FROM THE YEARS 1912 - 1922.

APEC 3B — EAST CENTRAL PORTION OF SITE - HISTORICAL PRESENCE OF A DRY CLEANER IN 1912.

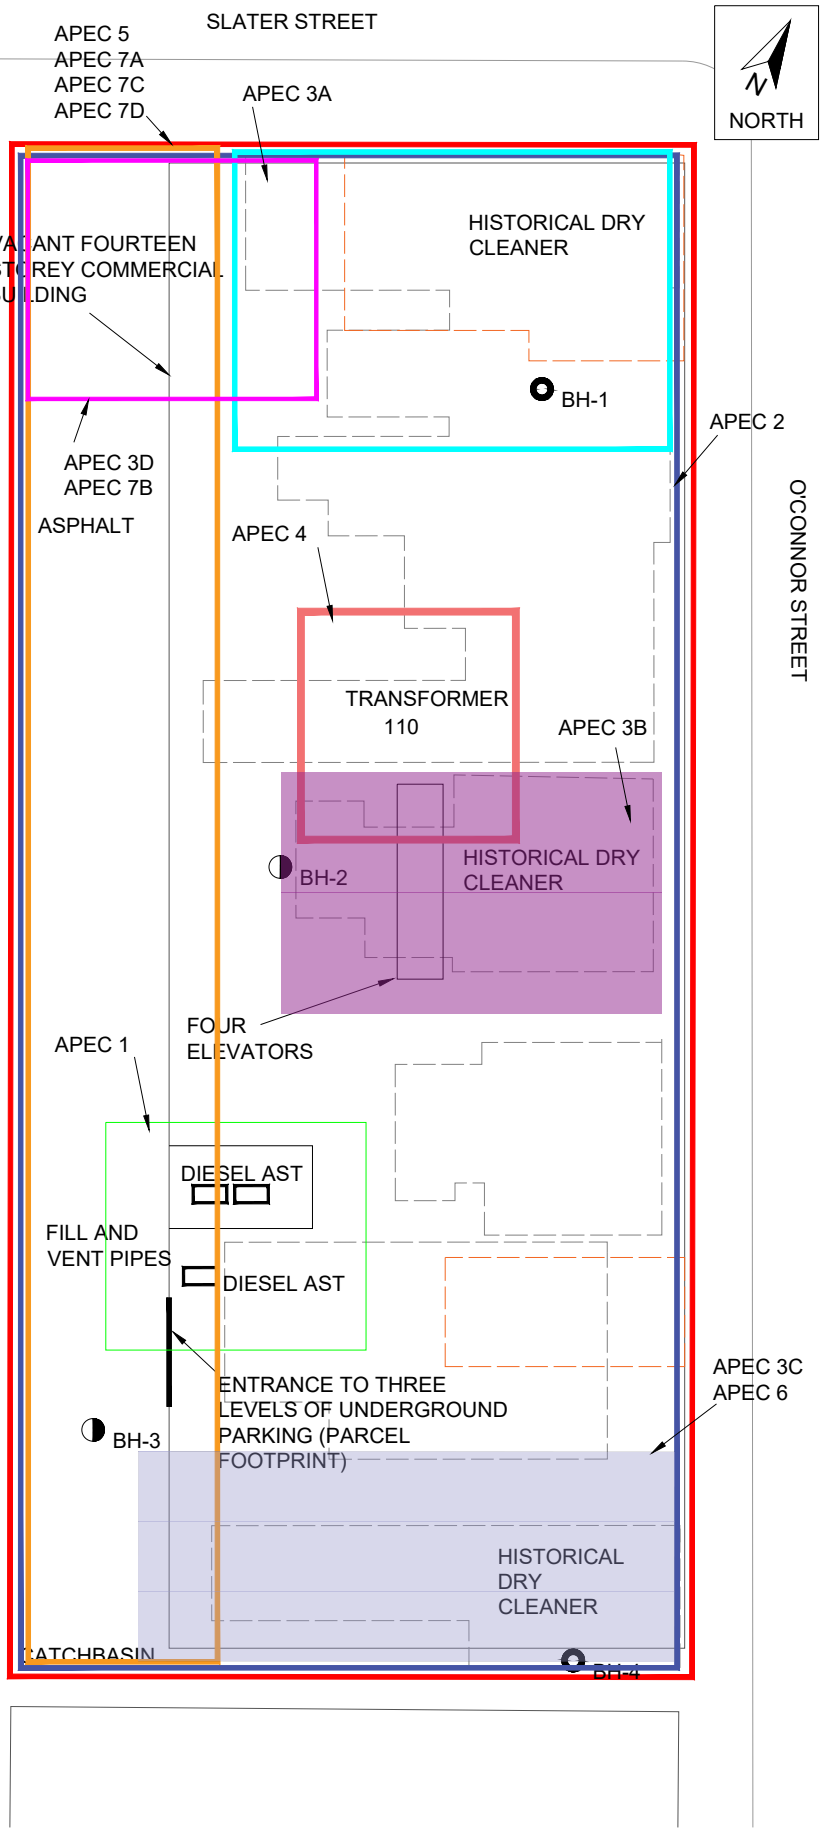
APEC 3C — SOUTHEASTERN PORTION OF SITE - HISTORICAL PRESENCE OF A DRY CLEANER FROM THE YEARS 1948 - 1955.

APEC 3D — NORTH WESTERN PORTION OF SITE - HISTORICAL USE OF 174 SLATER STREET AS A DRY CLEANER FROM THE YEARS 1912 - 1922.

APEC 4 — CENTRAL PORTION OF SITE - CURRENT AND HISTORICAL PRESENCE OF A TRANSFORMER VAULT WITHIN THE CENTRAL PORTION OF THE SITE.

APEC 5 — WESTERN PORTION OF SITE - HISTORICAL USE OF DE-ICING SALT LOCATED ON PAVED PORTIONS OF THE SITE.

APEC 6 — SOUTHERN PORTION OF SITE - HISTORICAL PRESENCE OF A DRY CLEANER LOCATED AT 124 O'CONNOR STREET (SOUTH ADJACENT) FROM THE YEARS 1922 - 1941.



APEC 7A — WESTERN PORTION OF SITE - HISTORICAL USE OF 170 SLATER STREET (WEST ADJACENT) AS AN AUTOBODY SHOP, FROM THE YEARS 1948 - 1966.

APEC 7B: — NORTHWEST PORTION OF SITE - HISTORICAL PRESENCE TWO UNDERGROUND STORAGE TANKS (USTS) IN THE 1940 - 1960 LOCATED ALONG THE NORTHEASTERN PORTION OF 170 SLATER STREET (WEST ADJACENT).

APEC 7C: — WESTERN PORTION OF SITE - HISTORICAL USE OF 170 SLATER STREET (WEST ADJACENT) FOR METAL PLATING IN THE 1930S.

APEC 7D: — WESTERN PORTION OF SITE - HISTORICAL USE OF 170 SLATER STREET (WEST ADJACENT) AS A METAL FABRICATOR IN THE 1970S.

RE: CITY DIRECTORY RESEARCH
77 Metcalfe St and 110 O'Connor St
Ottawa,ON K1P 5L6

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

61-294 of Albert Street
96-219 of Bank Street
1-160 of Elgin Street
31-210 of Gloucester Street
140-360 of Laurier Ave W
231-311 of Lisgar Street
55-180 of Metcalfe Street
89-178 of Nepean Street
50-198 of O'Connor Street
50-234 of Queen Street
66-300 of Slater Street
25-240 of Sparks Street

Search Notes:

Laurier Ave W is also known as 140-360 Maria Street in Ottawa. Ottawa, Ontario, is last listed in 1875.
