EXECUTIVE SUMMARY

AllRock Consulting Limited (AllRock) was retained by the Pritec Management (Client) to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 299 West Hunt Club Rd, Ottawa, Ontario (hereinafter referred to as the 'Site').

AllRock was advised by Client that the purpose of the Phase I ESA was to assess actual or potential issues of environmental concern at the Site. It is AllRock's understanding that this Phase I ESA is required for planning approvals in relation to the proposed development of the Site, and to fulfil the requirements of an Assessment of Past Uses under Ontario Regulation 406/19.

The Phase I ESA carried out by AllRock was completed in general accordance with the Canadian Standards Association (CSA) document entitled "*Phase I Environmental Site Assessment, CSA Standard Z768-01*" dated November 2001 (reaffirmed 2022). The scope of work for the Phase I ESA consisted of a review of readily available historical information, an examination of regulatory records, a reconnaissance of the Site, interviews, a review of surrounding properties (within a 250-meter 'study area'), an evaluation of information and the preparation of a report outlining evidence of actual or potential issues of environmental concern at the Site. The Phase I ESA does not include physical sampling or testing and is based solely on visual observations and a review of available or supplied factual data.

Based on the findings of the Phase I ESA completed by AllRock, nineteen (19) potentially contaminated activities (PCAs) were identified, ten (10) of which were assessed to have resulted in Area of Potential Contamination (APEC). A summary of the identified APECs and associated contaminants of potential concern (COPCs) is provided below:

Areas of Potential Environmental Concern

APEC #	PCA#	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1	30-1	Importation of Fill Material of Unknown Quality	Entire Site	On-Site	PHCs, VOCs, PAHs, Metals and ORPs	Soil
APEC 2	N/S1-1	Application of salt for the purposes of de-icing and public safety in the parking area	Entire Site	On-Site	EC, SAR	Soil
					Na, Cl	Groundwater

APEC #	PCA#	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 3	28-1, 28-2, 28-3	Based on site visit, three (3) ASTs are present on Site.	Central Portion of the Site	On-Site	PHCs, VOCs, PAHs,	Soil
					PHCs, PAHs, VOCs	Groundwater
APEC 4	10-1	Based on CD, aerials and site visit, rear northern portion of the Site is used as service centre which contains vehicle bays and above-ground hoists under Tony Graham Lexus (2009 to present).	Northwest to southwest Portion of the Site	On-Site	PHCs, VOCs, PAHs, Metals, ORPs	Soil
					PHCs, PAHs, VOCs	Groundwater
APEC 5	46-1	Based on aerials railway spur lines were historically present on the Site from 1965 to 2005	North and southeast portion of the Site	On-Site	PHCs, VOCs, PAHs, Metals, ORP, PCBs	Soil
					PHCs, VOCs	Groundwater
APEC 6	N/S1-2	Application of salt for the purposes of de-icing and public safety at Hunt Club Road	East portion of the Site	Off-Site	EC, SAR	Soil
					Na, Cl	Groundwater
APEC 7	N/S1-3	Application of salt for the purposes of de-icing and public safety at West Hunt Club Road	South portion of the Site	Off-Site	EC, SAR	Soil
					Na, Cl	Groundwater
APEC 8	46-2	Based on the site visit and aerials, a railway is present from 1965 to present	North portion of the Site	Off-Site	PHCs, VOCs, PAHs, Metals, ORP, PCBs	Soil
					PHCs	Groundwater

APEC #	PCA#	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 9	10-3, 31-1, 31-2	Based on the ERIS report records Schober Motor & Cycle, waste generation for petroleum distillates, waste oils and lubricants, and photo processing waste	North portion of the Site	Off-Site	PHCs, VOCs	Groundwater
APEC 10	28-4, 28-5, N/S2-1, N/S3-1	ERIS records, HLUI records, and aerial imagery indicated a tank nest at 369 West Hunt Club Road and a historic tank nest inferred to be associated with 300 Hunt Club Road, both linked to petroleum/diesel tanks and fuel spills. Trans-Northern Pipeline Inc. also reported waste generation involving light fuels, oils, sludges, and an unknown quantity of diesel and aviation fuel spills.	West portion of the Site	Off-Site	PHCs, VOCs	Groundwater

Legend:
PHCs – Petroleum Hydrocarbons in the F1-F4 fraction range
PAHs – Polycyclic aromatic Hydrocarbons
VOCs – Volatile organic compounds, including benzene, toluene, ethylbenzene, and xylenes (BTEX), bromomethane, and trihalomethanes (THMs);
Metals – O. Reg. 153/04 metals, including hydride forming metals
PCBs – Polychlorinated biphenyls
ORP – Other Regulated Parameters, including hot water-soluble boron (HWS-B), cyanide (CN-), electrical conductivity (EC), hexavalent chromium (CrVI), mercury (Hg), Na – Sodium in groundwater, Cl – Chloride in groundwater and sodium adsorption ratio (SAR)
#10 – Commercial Autobody Shops
#28 – Gasoline and Associated products Storage in Fixed Tanks
#30– Importation of Fill Material of Unknown Quality
#31 – Ink Manufacturing, Processing and Bulk Storage

#46 – Rail Yards, Tracks and Spurs
#55 – Transformer Manufacturing, Processing and Use
#N/S1 – Not Specified PCA related to Salt Application
#N/S2 – Not Specified PCA related to fuel spill
#N/S3 – Not Specified PCA related to recorded waste generator

Based on the findings of this Phase I ESA, AllRock recommends completing a subsurface investigation (Phase II ESA) at the Site.

1 INTRODUCTION

AllRock Consulting Limited (AllRock) was retained by the Pritec Management (Client) to conduct a Phase I Environmental Site Assessment (ESA) of the property located at 299 West Hunt Club Road, Ottawa, Ontario K2E 1A6 (hereinafter referred to as the 'Site').

The purpose of the Phase I ESA was to identify actual or potential environmental concerns at the Site, including potentially contaminating activities (PCAs) within the Site and surrounding properties. For the purpose of this Phase I ESA, the Study Area is the area within a 250 m radius of the Site boundaries.

It is AllRock's understanding that this Phase I ESA is required as part of the due diligence requirements in relation to the proposed development.

1.1 Scope of the Investigation

The Phase I ESA carried out by AllRock was completed in general accordance with the Canadian Standards Association (CSA) document entitled "*Phase I Environmental Site Assessment, CSA Standard Z768-01*" dated November 2001 (reaffirmed 2022) and Ontario Regulation 406/19 made under the Environmental Protect Act (EPA) – On-Site and Excess Soil Management, dated April 23, 2024 (Excess Soil Regulation), as amended. This report will not satisfy the requirements for the submission of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04 (as amended).

The scope of work for the Phase I ESA included the following:

- Review readily available historical information and examine regulatory records;
- Contact government agencies regarding the status of the Site with respect to their files, to identify any tank registrations, incident reports, fuel oil spills or any other relevant information with respect to the Site;
- Review and evaluate documents provided from the Client or Site Representative;
- An environmental database review completed by Environmental Risk Information Services Ltd. (ERIS) covering the Site and the Phase I Study Area;
- Conduct a Site reconnaissance and interview person(s) knowledgeable of the Site; and,
- Prepare a report based on the above, outlining evidence of actual or potential issues of environmental concern at the Site.

2 SITE SETTING

2.1 Location and Physical Description

The Site is an irregularly shaped parcel with a total area of approximately 0.79 hectares. The Site is currently occupied by a commercial building used as an automobile dealership with and service

garage (Tony Graham Lexus) and corresponding parking areas. The land uses of the Phase I Study Area predominately consist of commercial and industrial land uses.

Figures depicting the Site and Phase I Study Area are included in ***Appendix A***.

2.2 Topographic, Geological and Hydrogeological Conditions

A summary of the topography of the Site and surrounding areas, as well as relevant geological and hydrogeological information are included in the following table:

Table 2-1: Topographic, Geological and Hydrogeological Condition Summary

Subject	Description
Topography of the Site and Surrounding Area	The ground surface elevation of the site is approximately 85.8 m above sea level (masl). The topography of study area is generally flat with the gradual slope direction towards the south, based on information from the ERIS Physical Setting Report (PSR).
Fill Materials	No fill material was observed at the Site; however, fill material may have been brought to the Site during its initial development and is likely present beneath the building and paved surfaces.
Subsurface Soils	According to the 2025 AllRock Geotechnical Report (as further discussed in section 3.4), the subsurface conditions generally consist of natural fill, described as brown, medium-grained, and medium-dense silt sand, extending to a depth of 4.5 m at all borehole locations. Below the natural fill, a native silty clay layer was encountered, extending to approximately 6 m depth. Underlying the clay, a silty sand layer was encountered at all borehole locations. This layer was described as brownish-grey, fine-grained, and medium-dense, extending to the termination depth of 8 m below ground surface at all borehole locations. According to surficial geology information from the ERIS Physical Setting Report (PSR), the subsurface soils primarily consist of sand, with clay and silt present in the northern portion of the site underlying erosional terraces.
Bedrock Type	The bedrock at the Site consists of dolostone and sandstone. It is associated with the strata of Beekmantown Group.
Inferred Depth to Bedrock	According to the 2025 AllRock Geotechnical Report, the depth to bedrock is inferred to range from 10 to 28 mbgs (meters below ground surface).
Inferred Depth to Groundwater	Based on ERIS well records, groundwater in the Phase I Study Area was encountered at depths ranging from 3.05 to 9.14 mbgs. Based on AllRock 2025 Geotechnical Investigation, water levels were measured at a depth of approximately 6.0 mbgs.
Nearest Open Water Body	The Rideau River is located approximately 1.1 km east of the Site, and Nepean Creek is located approximately 500 meters north of the Site.

Subject	Description
Inferred Groundwater Flow Direction	The inferred groundwater flow direction is east-southeast, towards the Rideau River.

3 HISTORICAL RECORDS REVIEW

3.1 Aerial Photographs

AllRock contacted Environmental Risk Information Services Ltd. (ERIS) to obtain aerial photographs for the Site and surrounding area. Copies of aerial photographs dated 1936, 1945, 1956, 1985 and 2025, were provided by ERIS and reviewed. In addition, AllRock reviewed satellite imagery dated 1965, 1991, 2005, 2009, 2014 and 2021 obtained from geoOttawa map, as well as imagery dated 2025 obtained from Google Earth™. A summary of inferred information with is provided in the following table:

Table 3-1: Aerial Photographs Summary for the Site and Phase I Study Area

Year	Site	Phase I Study Area
1936	The Site appears to consist of agricultural land.	The Study Area appears to consist of vacant land. Railway line similar in location and orientation to the present-day is apparent adjacent north of the site **(PCA 46 – Rail Yards, Tracks and Spurs).**
1945	Similar to 1936.	Similar to 1936.
1956	Similar to 1945.	To the west, a cluster of eleven (11) inferred large-scale ASTs are observed approximately 120 m west of the Site. It is inferred the tank nest corresponds to a petroleum storage and distribution operation located at 369 West Hunt Club. To the southwest a cluster of seven (7) inferred large-scale ASTs are observed approximately 160 m southwest of the Site. It is inferred the tank nest corresponds to 300-340 West Hunt Club. **(PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks).** These tanks are further discussed in Section 4.3 and 4.4.
1965	Similar to 1956.Two (2) railway spur lines are apparent at the Site; one runs along the northern portion of the Site, and the other extending from the central-eastern portion to the southern portion of the Site associated with Railway line present	Two (2) additional inferred ASTs appears to have been added to the cluster of ASTs to the southwest. Six inferred ASTs appear to have been removed and four larger inferred ASTs appears to have been added to the cluster of ASTs to the west.

Year	Site	Phase I Study Area
	adjacent north of the Site **(PCA 46 – Rail Yards, Tracks and Spurs)**.	
1985	Similar to 1965.	One additional inferred AST appears to have been added to the cluster of ASTs to the west.
1991	Similar to 1985.	The Study Area appears to be developed to the north, beyond the railway track, which is inferred to consist of commercial developments with associated roads. To the south, a roadway similar in location and orientation to present-day West Hunt Club Road is apparent.
2005	The Site appears to be stripped of vegetation, and the railway spur lines are no longer present.	One additional inferred AST appears to have been added to the cluster of ASTs to the west. A total of eleven (11) ASTs are present in the west, similar in location and orientation to the present-day tank nest associated with 369 West Hunt Club. Details of these tanks are discussed in section 4.3 of this report. To the southwest, approximately 160 m, a cluster of nine (9) ASTs inferred to be associated with 300–340 West Hunt Club Road have been removed, and site redevelopment is visible. To the east, beyond Hunt Club Road, a building similar to present-day Land Rover Hunt Club is visible with associated parking area.
2009	The Site appears to have been developed with a building similar in size and configuration to the present-day Tony Graham Lexus dealership shop. The remainder of the Site appears to have been developed with associated parking areas.	Similar to 2005.
2014	Similar to 2009.	To the south and southwest, beyond West Hunt Club Road, 300–350 West Hunt Club located approximately 160 m southwest appears to be developed with inferred commercial buildings and associated parking areas.
2021	Similar to 2014.	To the southeast, beyond West Hunt Club Road, the Study Area appears to be developed with commercial plazas located approximately 60 m from the Site.

Year	Site	Phase I Study Area
2025	Similar to 2021.	Similar to 2021.

3.2 VERISK Information Intelligence

AllRock contacted Verisk Information Intelligence (Verisk) to obtain copies of Fire Insurance Plans pertaining to the Site and surrounding area. Verisk provided a written response dated October 20, 2025, indicating there were no records on-file for the Site and Study Area.

A copy of Verisk's report is provided in ***Appendix D***.

3.3 City Directories

AllRock reviewed the city directories (CDs) and notes that no city directories were available prior to 1960 or subsequent to 2024. A summary of the pertinent information within the Site and Study Area are provided in table below:

Table 3-3: Summary of City Directory Findings

Address	Distance and Direction	Operation	PCA #
299 West Hunt Club Rd	Phase I Property	- Tony Graham Lexus (2021-2024)	10
295 West Hunt Club Rd	10 m east	- Mark Motors of Ottawa (2006/2007-2021) - Laurin & Co (2012) - Land Rover Hunt Club (2023-2024) - Jaguar Hunt Club (2023-2024)	10
369 West Hunt Club Rd	Adjacent west	- Ultramar (2021-2024) - Shell Canada (2012-2024) - Suncor (2008-2007) - Thermoshell Inc. (2012-2017) - Bluewave Energy (2017)	28
195 Colonnade Road	40 m northeast	- Westboro Carpet & Draperies/Westboro Flooring & Décor (1987-2024)	-
199 Colonnade Road S	30 m north	- The Plastic Shop (1997) - Cadillac Plastic Canada (1997-2000) - Enviro Lasers Limited (2000-2012) - Zofort Industries (2012-2024)	-
203 Colonnade Road	30 m north	- Melanie Graphics (2006-2007) - Promark Telecon Inc (2006-2007) - Canadian Construction Controls (2012) - Creative Windows & Doors (2012) - Polemar Inc. (2012) - Sonatic System Inc. (2012)	-
211 Colonnade Road	75 m northwest	- Malmberg Printers (1987-2017) - Plan Group (2017)	31

Address	Distance and Direction	Operation	PCA #
215 Colonnade Road	115 m northwest	- Armstrong Construction (1981-1991) - Armstrong Monitoring Corporation (1987-2024)	-
350 West Hunt Club Rd	200 m southwest	- Kia On Hunt Club (2023-2024)	10

Note:
#10 – Commercial Autobody Shops
#28 – Gasoline and Associated products Storage in Fixed Tanks
#31 – Ink Manufacturing, Processing and Bulk Storage

Additional operations were identified in the CDs database; however, based on the nature of the operations, the distance between these properties and the Site, and the inferred groundwater flow direction, these properties are unlikely to contribute to potential impacts at the Site.

3.4 Previous Reports

No previous environmental reports were provided for AllRock's review; however, AllRock prepared a report entitled “Geotechnical Investigation Report, 299 West Hunt Club Road, Ottawa, Ontario” for PRITEC Management, and dated September 3, 2025 (2025 AllRock Geotech Report).

On February 25, 2025, three (3) boreholes, numbered BH1-25 to BH3-25, were advanced to a depth of 8 mbgs, one (1) of which was installed with a monitoring well. The subsurface conditions generally consisted of a layer of fill beneath surficial asphalt. The fill can be described as brown, medium grained, and medium dense silty sand. The layer extended to a depth of 4.5 mbgs at all borehole locations. Below the natural fill, a native silty clay layer was encountered extending to approximately 6 meters depth. Underlaying the clay, a silty sand layer was encountered at all borehole locations. The layer was described as brownish/grey fine grained, and medium dense. The layer extended to the termination depth of 8 mbgs at all borehole locations.

A monitoring well was installed as part of this investigation. A return visit to the site to measure water levels was conducted on March 20, 2025. The measured depth to water was 6.0 mbgs.

4 REGULATORY RECORDS REVIEW

4.1 Technical Standards & Safety Authority

A request for information pertaining to the Site was submitted to the Technical Standards & Safety Authority (TSSA). The TSSA maintains a database containing incidents and occurrence reports, the presence, specifications and permitting of petroleum storage tanks and environmental reports. Based on the response from TSSA, no records were available for the Site.

A copy of AllRock’s request to the TSSA is provided in ***Appendix C*** in this report.

4.2 Ministry of the Environment, Conservation and Parks

A Freedom of Information (FOI) Request was submitted to the MECP for information on file with respect to the Site. The MECP maintains a database containing environmental concerns, orders, chemical spills and/or leaks at the Site, Certificates of Approvals, Environmental Compliance Approvals (ECAs), and other environmental issues that may have impacts the Site's condition. The MECP has since issued a response (Decision Letter MECP FOI A-2025-07009, dated November 14, 2025), indicating that following a thorough search of ministry files. Based on AllRock review of the letter no PCAs were identified within the Site and surrounding properties.

A copy of MECP Decision Letter to MECP is provided in ***Appendix C*** of this report.

4.3 Historic Land Use Inventory (HLUI)

A HLUI report was requested from the City of Ottawa to obtain information on past land use activities at the Site and in the surrounding area. The purpose of the HLUI is to identify types and locations of historical land uses that may have the potential to cause contamination of soil, groundwater, or surface water within the City of Ottawa.

One (1) Environmental Risk Management Area (ERMA) was identified within 500 m of the subject site. This ERMA relates to contaminated soil and/or groundwater within the right-of-way at 339 West Hunt Club Road, where petroleum hydrocarbons (PHCs) were identified in connection with the operation of the former bulk fuel storage facility at that Site.

Eleven (11) aboveground storage tanks (ASTs) were identified at Shell Canada Products, located at 369 West Hunt Club Road, which were installed between 1954 and 1966. These include five (5) gasoline tanks with volumes of 8,636,688 Litres (L), 335,023 L, 5,217,000 L, 1,614,639 L, and 12,932,617 L; three (3) diesel tanks with volumes of 5,269,276 L, 2,469,576 L, and 6,875,135 L; two (2) aviation fuel tanks with volumes of 3,219,557 L and 1,608,528 L; and one (1) tank classified as other with a volume of 3,988,218 L.

A copy of the response is provided in ***Appendix C*** of this report.

4.4 Environmental Risk Information Service Ltd.

AllRock submitted a request to ERIS for a review of all federal, provincial, and private source databases relating to the Site and Study Area. A copy of the ERIS report is provided in ***Appendix E*** of this report.

Based on AllRock's review of the ERIS report, two (2) records were identified for the Site, while four hundred and thirteen (413) records were identified within the Study Area.

A summary of the notable findings within the Study Area are provided below in *Table 4-1*:

Table 4-1: ERIS Summary of Study Area Findings

Location	Distance and Direction	Summary	PCA #
369 West Hunt Club Road	Adjacent west	A cluster of eleven (11) inferred large-scale ASTs are observed for gasoline tank, diesel tank and aviation fuel tank since at least 1954.	28
195 Colonnade Road	30 m north	One (1) record of engine oil spill of approximately 20 L was recorded in 2021 as a result of construction machinery manufacturing.	-
199 Colonnade Road	30 m north	Three (3) records of waste generation were recorded from 1988 to 1998 under Schober Motor & Cycle Repair inferred to have a garage, including petroleum distillates, and waste oils and lubricants. Two (2) records of Scott's manufacturing Directory (SCT) for Plastic products, signs and advertising specialities, office supplies and all other miscellaneous chemical product manufacturing under The Plastic shop and Envirolaser Limited.	10
203 Colonnade Road	30 m north	Various records of waste generation were recorded from 1990 to 2019 under Makita Power Tools Canada Limited, Promark Telecon inc., Image Factory, and Colonnade Bridgeport Reality Management, including petroleum distillates, photo processing wastes, alkaline wastes, acid wastes, waste compressed gasses, paint/pigment/coating residues, inert organic waste and other metals.	31
211 Colonnade Road	75 m northwest	Various records of waste generation were recorded from 1986 to 2012 under Malberg Printers Limited, and 1716485 Ontario Limited, for photo processing wastes. Two (2) records of SCT were recorded for other printing, supportive activities for printing, engineering services, and other equipment manufacturing under Malmberg Printers Inc. and Plan Group.	31
339 Hunt Club Road	90 m west	Various records of waste generation were recorded from 1992 to 2022 under Trans-Northern pipeline Inc., and Shell Canada Products at 339 Hunt Club Road, including light fuels, waste oils and lubricants, and waste oil skimmings/sludges. Two (2) record of unknown volume of gasoline spill	N/S2, N/S3

Location	Distance and Direction	Summary	PCA #
		were recorded in 1994. Two (2) spill records, one 14 L diesel spill and another 5 L was recorded in 1994 under Trans-Northern pipeline Inc. One (1) spill record of unknown volume for aviation oil was recorded in 2009 under Trans-Northern pipeline Inc.	
215 Colonnade Road	115 m northwest	Various records of waste generation were recorded from 1986 to 2022 under Armstrong Construction/Armstrong Monitoring Corporation for halogenated solvents, alkaline wastes, acid wastes, waste compressed gasses, paint/pigment/coating residues, inert organic waste and other metals.	-
300 West Hunt Club Road	140 m southwest	Nineteen (19) EXP were recorded for diesel tank since 1990. Ten (10) DTNK records were also noted for a diesel tank up to approximately 2010–2012. One (1) RST was recorded for a petroleum/oil tank between 1989 and 1996, and one (1) PRT was recorded up to 1995. The tank sizes and secondary containment details are unknown.	28
340 West Hunt Club Road	200 m southwest	Eight (8) ASTs were recorded for Petroleum tank since 1997.. The tank sizes and secondary containment details are unknown.	28

Note:
#10 – Commercial Autobody Shops
#28 – Gasoline and Associated products Storage in Fixed Tanks
#30– Importation of Fill Material of Unknown Quality
#31 – Ink Manufacturing, Processing and Bulk Storage
#N/S1 – Not Specified PCA related to Salt Application
#N/S2 – Not Specified PCA related to fuel spill
#N/S3 – Not Specified PCA related to recorded waste records

Additional records were identified in the ERIS database; however, based on the nature of the records, the distance between these properties and the Site, and the inferred groundwater flow direction, these properties are unlikely to contribute to an APEC at the Site.

4.5 Well Records

The Water Well Information System (WWIS) database provided by ERIS, along with records from the MECP Well Records, were reviewed. Based on the information obtained a no wells were identified on-Site, and twenty-six (26) wells were located within the Study Area. A summary of the well details, including groundwater levels, bedrock depth, and domestic well usage, are summarized in the table below:

Table 4-2: Well Record Details

Well Detail	Summary
Water supply wells	Three (3) domestic wells were listed within the Study Area, all of which have now been decommissioned.
Depth to Bedrock	10.0 – 28.0 mbgs
Groundwater Levels	3.0 – 7.6 mbgs

5 SITE RECONNISANCE

5.1 General

AllRock conducted a Site reconnaissance on October 27, 2025, to visually inspect the Site for the presence of environmental concerns, including but not limited to petroleum storage tanks, surface soil staining, hazardous materials, chemicals and waste storage, operations and adjacent properties. The Site reconnaissance was completed by a member of AllRock Nathan Martin under the direction of AllRock's QP overseeing this project. The Site reconnaissance was completed between the hours of 10:00 AM and 12:00 PM under sunny weather conditions (14°C). The reconnaissance was completed on foot and consisted of a walk-through of the Site and Study Area.

5.2 On-Site Observations

A summary of the on-Site observations and interview details is presented in Table 5.1 below:

Table 5-1: Summary of Site Reconnaissance and Interviews

Category	Details
Site Representatives	Mr. Mike Torunski (Director) and Mr. Thomas (General manager)
First Developed Land Use	Site representatives indicated that the building was originally constructed in 2009 and has been owned and occupied by Tony Graham Lexus since 2009. The Site was formerly vacant.
Description of Tanks	Three (3) ASTs were observed within the Site at the time of the Site Reconnaissance. These tanks are further discussed in Section 5.2.2.
Description of Underground Utilities	Underground utilities servicing the site include water, sanitary sewer, natural gas, electrical, and telecommunication services. One (1) pad mounted transformer was observed in good condition with no visible staining observed at the southern portion of the Site indicating subsurface utilities on the Site.
Details of Sewage Works	Sanitary wastewater generated from the building is discharged to the municipal sewer system.
Details of Stormwater Drainage	Storm sewers and catch basins were observed along West Hunt Club Road during the site visit. Multiple catch basins were also noted both inside and outside the site building.
Details of Ground Cover	The parking area is covered with asphaltic pavement, with a mixed garden and lawn located on the eastern portion.

Category	Details
Details of Current or Former Railway Lines	None observed or reported.
Areas of Stained Soil, Vegetation, and Pavement	Staining was observed beneath the Tank #1 on the asphalt surface located at the exterior north corner of the Site building.
Stressed Vegetation	None observed or reported.
Areas of Fill and Debris Materials	No fill material was observed at the Site; however, fill material may have been brought to the Site during its initial development.
Unidentified Substances Outside Buildings and Structures	None observed or reported.

The Site reconnaissance was documented with field notes and photographs, with selected photographs included in **Appendix B** of this report.

5.2.1 Description of On-Site Buildings and Structures

Table 5-2: Summary of Site Buildings and Structures

Category	Details
General Observation	The Site comprises a two-storey commercial building, along with an asphalt parking area.
Description of Below-Ground Structures	None observed or reported.
Potable and Non-Potable Water Sources	Municipal water supply provided by the City of Ottawa.
Details of any Drains, Pits and Sumps	Several floor drains were observed within the service centre of the dealership shop. Catch basins were observed outside the building, which collect surface run-off from rain and drains into the municipal sewer system. Sanitary sewage generated from the building is discharged to the municipal sewer system.
Exit and Entry Points	Main entrance to the Site building at the front (east side).
Details of Heating System	Heating is provided by a natural-gas-fired forced-air furnace.
Details of Cooling System	The building utilizes a standard air-conditioning unit for cooling.
Details of Stains or Corrosion on Floors	None observed or reported.

Category	Details
Details of any Unidentified Substances	None observed or reported.
Chemical Inventory and Hazardous Materials	None observed or reported.

5.2.2 Storage Tanks

Table 5-3: On-Site Storage Tank Details

Location	Tank No.	Size (L)	Product Stored	Year	Secondary Containment
Exterior north corner of the Site building	Tank #1	2,272-L	Used Fuel-oil	-	None observed
Exterior north corner of the Site building	Tank #2	Inferred to be approximately 2,000-L	Used glycol	2010	None observed
North end of Site Building at service centre	Tank #3	Inferred to be approximately 2,000-L	Fuel-oil	Unknown	Yes

5.2.3 Enhanced Investigation Property

O. Reg. 153/04 defines an Enhanced Investigation Property as a property that is being used or has been used, in whole, or in part, in the following manner:

- For an industrial use; or,
- For any of the following commercial uses:
    - As a garage;
    - As a bulk liquid dispensing facility, including a gasoline outlet; or,
    - For the operation of dry-cleaning equipment.

Based on the current on-Site operations (automotive dealership shop with a service centre), the Site is considered to be an Enhanced investigation Property. As such, additional items were investigated and following additional detail were noted:

Table 5-4: Enhanced Investigation Property Details

Subject	Description
Manufactured Products	Based on the ERIS and site visit, no products are currently being manufactured on the Site.
Raw Materials Handling and Storage	Based on the ERIS and site visit, no raw materials are suspected to have been handled or stored on the Site.
Vehicle and Equipment maintenance Areas	Based on the site visit, rear northern portion of the Site is used as service centre which contains vehicle bays and above-ground hoists.
Hydraulic Lift Equipment	Eight (8) hydraulic above-ground hoists are present at the service centre.

5.3 Surrounding Properties

The Site and surrounding area predominately consisted of commercial land uses at the time of the Site reconnaissance. A summary of the adjacent properties and details obtained from publicly accessible areas, are described in the following table:

Table 5-5: Surrounding Properties Summary

Direction	Description	Inferred Groundwater Gradient Relative to the Site
North	Railway tracks, followed by Commercial properties.	Transgradient
East	Hunt Club Road, followed by Land Rover Dealership shop	Downgradient
South	West Hunt Club Road, followed by Commercial properties	Transgradient
West	Industrial Park and eleven (11) ASTs at 369 West Hunt Club Road associated with Shell Canada Products.	Upgradient

5.4 Identified PCAs from Site and Surrounding Properties Reconnaissance

Based on the review of the site reconnaissance of the Site and surrounding properties, the identified PCAs are summarized in the table below

Table 5-6: Summary of Identified PCAS from Site and Surrounding Properties Reconnaissance

PCA Designation	Location	Approximate Distance from Site	PCA Description
30-1	On-Site	N/A	Fill material of unknown quality may have been placed during the development of the Site.

PCA Designation	Location	Approximate Distance from Site	PCA Description
N/S1-1	On-Site	N/A	It is anticipated that seasonal de-icing salts would be used for pedestrian and/or vehicular safety on paved surfaces within the Site
10-1	On-Site	N/A	Tony Graham Lexus Auto Service operation from 2009 to present. Based on the site visit, rear northern portion of the Site is used as service centre which contains vehicle bays and above-ground hoists.
28-1, 28-2	On-Site	N/A	Based on the site visit, two (2) tanks, Tank #1 and Tank #2, are located at the exterior north corner of the Site Building.
28-3	On-Site	N/A	Based on the site visit, Tank #3 is located at the north end of the Site Building at the service centre.
55-1	On-Site	N/A	One (1) pad mounted transformer was observed in good condition with no visible staining observed at the southern portion of the Site
N/S1-2	Adjacent east	N/A	It is anticipated that seasonal de-icing salts would be used for pedestrian and/or vehicular safety along the Hunt Club Road.
N/S1-3	Adjacent south	N/A	It is anticipated that seasonal de-icing salts would be used for pedestrian and/or vehicular safety along the West Hunt Club Road.
46-2	Adjacent north	N/A	Based on the site visit and aerials, a railway line was observed within the Study Area.
28-4	Adjacent west	369 West Hunt Club Road	Based on the site visit and aerials, an automotive dealership shop is present under Land Rover Hunt Club (2005 to present).
10-2	10 m east	295 West Hunt Club Road	Based on the site visit and aerials, an automotive dealership shop inferred to have a service garage is present under Land Rover Hunt Club (2005 to present).

Note:
#10 – Commercial Autobody Shops
#28 – Gasoline and Associated products Storage in Fixed Tanks
#30– Importation of Fill Material of Unknown Quality

#46 – Rail Yards, Tracks and Spurs
#55 – Transformer Manufacturing, Processing and Use
#N/S1 – Not Specified PCA related to Salt Application

6 REVIEW AND EVALUATION OF INFORMATION

6.1 Potentially Contaminating Activity

The details and locations of all PCAs that were identified by AllRock at the Site and within the Study Area are summarized in *Table 6-1* below:

Table 6-1: Potentially Contaminating Activities

Address	Approximate Distance from Site	PCA Description	PCA Designation	Contributing to an APEC?
On-Site	-	Fill material may have been used during the development of the Site.	30-1	Yes
On-Site	-	It is anticipated that seasonal de-icing salts would be used for pedestrian and/or vehicular safety in the parking area.	N/S1-1	Yes
On-Site	-	Based on CD, aerials and site visit, an automotive dealership with a service centre is present under Tony Graham Lexus (2009 to present).	10-1	Yes
On-Site	-	Based on site visit, Tank #1 is present at the exterior north corner of the Site building.	28-1	Yes
On-Site	-	Based on the site visit, Tank #2 is located at the exterior north corner of the Site Building.	28-2	Yes
On-Site	-	Based on the site visit, Tank #3 is located at the north end of the Site Building at the service centre.	28-3	Yes
On-Site	-	Based on aerials railway spur lines were historically present on the Site (1965-2005).	46-1	Yes
On-Site	-	Based on the site visit, a concrete pad mounted transformer is present in the southern portion of the Site.	55-1	No

Address	Approximate Distance from Site	PCA Description	PCA Designation	Contributing to an APEC?
N/A	Adjacent east	It is anticipated that seasonal de-icing salts would be used for pedestrian and/or vehicular safety along the Hunt Club Road.	N/S1-2	Yes
N/A	Adjacent south	It is anticipated that seasonal de-icing salts would be used for pedestrian and/or vehicular safety along the West Hunt Club Road.	N/S1-3	Yes
N/A	Adjacent north	Based on the site visit and aerials, a railway line was observed within the Study Area.	46-2	Yes
369 West Hunt Club Road	Adjacent west	Based on ERIS, HLUI records, site visit and aerials, a cluster of eleven (11) ASTs has been present on-Site from 1954 to present. Tanks details are discussed in subsequent sections of this report.	28-4	Yes
295 West Hunt Club Road	10 m east	Based on the site visit and aerials, an automotive dealership shop inferred to have service garage is present under Land Rover Hunt Club (2005 to present).	10-2	No
199 Colonnade Road	30 m north	Based on ERIS, historical Schober Motor & Cycle Repair was present from 1988 to 1998 with waste generation records for petroleum distillates, and waste oils and lubricants.	10-3	Yes
203 Colonnade Road	30 m north	Based on ERIS, waste generation records were reported from 1992 to 1996 under Image Factory for photo processing wastes. CD records note Melanie Graphics (2006-2007).	31-1	Yes
211 Colonnade Road	75 m northwest	Based on ERIS, waste generation records were reported from 1986 to 2012 under Malberg Printers Limited for photo processing wastes.	31-2	Yes

Address	Approximate Distance from Site	PCA Description	PCA Designation	Contributing to an APEC?
		CD records note Malberg Printers Limited (1987-2017).		
339 West Hunt Club Road	90 m west	Various waste generation records were reported from 1992 to 2022 under Trans-Northern pipeline Inc., and Shell Canada Products for light fuels, waste oils and lubricants, and waste oil skimming/sludges. Unknown amount of diesel and aviation spill recorded from 1994 to 2009 under Trans-Northern pipeline Inc.	N/S2-1, N/S3-1	Yes
300 West Hunt Club Road	140 m southwest	Based on ERIS and aerials, cluster of nine (9) historic ASTs were apparent from 1956 to 2005. ERIS Report records nineteen (19) EXP, ten (10) DTNK, one (1) RST, and one (1) PRT for petroleum/diesel tanks.	28-5	Yes
350 W Hunt Club Road	200 m southwest	Based on the aerials, an automotive dealership shop is apparent under Kia Dealer (2023-2024).	10-4	No

Note:
CD – City Directory
ERIS – Environmental Risk Insurance Services
AST– Above-Ground Storage Tank
EXP – Expired Fuels Safety Facilities
DTNK – Delisted Fuel tanks
RST – Retail Fuel Storage Tanks
PRT – Private and Retail Fuel Storage Tanks
FST – Fuel Storage Tank
FSHT– Fuel Storage Tank-Historic
#10 – Commercial Autobody Shops
#28 – Gasoline and Associated products Storage in Fixed Tanks
#30– Importation of Fill Material of Unknown Quality

#55 – Transformer Manufacturing, Processing and Use
#31 – Ink Manufacturing, Processing and Bulk Storage
#46 – Rail Yards, Tracks and Spurs
#N/S1 – Not Specified PCA related to Salt Application
#N/S2 – Not Specified PCA related to fuel spill
#N/S3 – Not Specified PCA related to recorded waste generator

6.2 Areas of Potential Environmental Concern

The APECs identified, as well as their respective PCAs, location, and contaminants of potential concern (COPCs) is summarized in *Table 6-2* below:

Table 6-2: Areas of Potential Environmental Concern

APEC #	PCA #	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1	30-1	Importation of Fill Material of Unknown Quality	Entire Site	On-Site	PHCs, VOCs, PAHs, Metals, ORPs	Soil
APEC 2	N/S1-1	Application of salt for the purposes of de-icing and public safety in the parking area	Entire Site	On-Site	EC, SAR	Soil
					Na, Cl	Groundwater
APEC 3	28-1, 28-2, 28-3	Based on site visit, three (3) ASTs are present on Site.	Northeast Portion of the Site	On-Site	PHCs, VOCs, PAHs	Soil
					PHCs, PAHs, VOCs	Groundwater

APEC #	PCA #	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 4	10-1	Based on CD, aerials and site visit, rear northern portion of the Site building is used as service centre which contains vehicle bays and above-ground hoists under Tony Graham Lexus (2009 to present).	Central Portion of the Site	On-Site	PHCs, VOCs, PAHs, Metals, ORP	Soil
					PAHs, PHCs, VOCs	Groundwater
APEC 5	46-1	Based on aerials railway spur lines were historically present at the Site from 1965 to 2005	North and southeast portion of the Site	On-Site	PHCs, VOCs, PAHs, Metals, ORP, PCBs	Soil
					PAHs, PHCs, BTEX	Groundwater
APEC 6	N/S1-2	Application of salt for the purposes of de-icing and public safety at Hunt Club Road	East portion of the Site	Off-Site	EC, SAR	Soil
					Na, Cl	Groundwater
APEC 7	N/S1-3	Application of salt for the purposes of de-icing and public safety at West Hunt Club Road	South portion of the Site	Off-Site	EC, SAR	Soil
					Na, Cl	Groundwater

APEC #	PCA #	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 8	46-2	Based on the site visit and aerials, a railway is present adjacent north to the Site from 1965 to present	North portion of the Site	Off-Site	PHCs, VOCs, PAHs, Metals, ORP, PCBs	Soil
APEC 9	10-3, 31-1, 31-2	ERIS report records Schober Motor & Cycle, waste generation for petroleum distillates, waste oils and lubricants, and photo processing waste	North portion of the Site	Off-Site	PHCs, VOCs	Groundwater
APEC 10	28-4, 28-5, N/S2-1, N/S3-1	ERIS records, HLUI records, and aerial imagery indicated a tank nest at 369 West Hunt Club Road and a historic tank nest inferred to be associated with 300 Hunt Club Road, both linked to petroleum/diesel tanks and fuel spills. Trans-Northern Pipeline Inc. also	West portion of the Site	Off-Site	PHCs, VOCs	Groundwater

APEC #	PCA #	PCA Description	*Location of APEC on Site*	Location of PCA (On-Site or Off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
		reported waste generation involving light fuels, oils, sludges, and an unknown quantity of diesel and aviation fuel spills.				

Legend:
PHCs – Petroleum Hydrocarbons in the F1-F4 fraction range
PAHs – Polycyclic aromatic Hydrocarbons
VOCs – Volatile organic compounds, including benzene, toluene, ethylbenzene, and xylenes (BTEX), bromomethane, and trihalomethanes (THMs);
Metals – O. Reg. 153/04 metals, including hydride forming metals;
PCBs – Polychlorinated biphenyls
ORP – Other Regulated Parameters, including hot water-soluble boron (HWS-B), cyanide (CN-), electrical conductivity (EC), hexavalent chromium (CrVI), mercury (Hg), Sodium (Na) in groundwater, Chloride (Cl) in groundwater and sodium adsorption ratio (SAR)
#10 – Commercial Autobody Shops
#28 – Gasoline and Associated products Storage in Fixed Tanks
#30 – Importation of Fill Material of Unknown Quality#31 – Ink Manufacturing, Processing and Bulk Storage
#46 – Rail Yards, Tracks and Spurs
#N/S1 – Not Specified PCA related to Salt Application
#N/S2 – Not Specified PCA related to fuel spill
#N/S3 – Not Specified PCA related to recorded waste generator

6.3 Special Attention Items

6.3.1 PCBs

Polychlorinated biphenyls (PCBs) were commonly used in transformers, light ballasts, circuit breakers, capacitors, and switch gears as synthetic insulating materials until Canada banned their manufacture and importation in 1977. The ban did not include PCBs that were already in-use for electrical applications and consequently some products manufactured prior to 1977 may contain PCBs. PCB Regulations (SOR/2008-273) came into force on September 5, 2009 (amended 2015) and consists of prohibitions, permitted activities, end-of-use dates, as well as storage, labelling, reports and record requirements. These regulations required the decommissioning of equipment containing PCBs in a concentration greater than 500 milligram/kilogram (mg/kg) in December 2009 and equipment containing PCBs in a concentration of at least 50 mg/kg will be decommissioned by December 31, 2025. Light ballasts, pole top electrical transformers and their pole-top auxiliary electrical equipment containing PCBs with a concentration of 50 mg/kg or more will also be decommissioned by December 31, 2025. Exemptions to the regulation include cables, pipelines, electrical capacitors, and other equipment used in pipelines that transport natural gas, petroleum, or petroleum products. Fusion sealed capacitors in communication or electronic control equipment are also exempt.

Given that the Site was developed in 2009, it is unlikely that PCBs are associated with onsite electrical equipment.

6.3.2 UFFI

Urea formaldehyde foam insulation (UFFI) is a low-density foam insulation that was widely used to insulation and retrofitting industrial, commercial, and residential buildings. UFFI was generally injected into wall cavities of existing buildings and was approved for use in Canada from 1977 until 1980. When UFFI is injected into the building envelop it releases an excess of formaldehyde gas which can cause overexposure to building occupants resulting in adverse health effects. Buildings constructed subsequent to 1980 have a low potential to contain UFFI. Given that the Site was originally developed in the 2009, the construction predates the approval period for UFFI use. As such, the likelihood of UFFI being present within the building is considered low. No evidence of UFFI installation was observed during the Site reconnaissance.

6.3.3 Lead

Lead was commonly used as an additive in paints prior to 1950 to accelerate drying, increase durability, and make colours vibrant. Removing, repairing or disturbing the paint through normal wear-and-tear can expose individuals to adverse health effects. The Liquid Coating Materials Regulation was enacted under the Hazardous Products Act in 1976 to restrict the lead content of paints and other liquid coatings on furniture and products to 0.5% by weight. Through voluntary action between industry and government the amount of total lead in paints declined to 600 parts

per million (ppm) in 1991, and in 2010 the limit was reduced further to 90 ppm. Buildings constructed subsequent to 1990 have a low potential to contain lead-based paints. Given that the Site was originally developed in the 2009, it is unlikely that lead-based paints were used in the original construction materials and interior finishes. Furthermore, no evidence of lead-based paint was observed during the Site visit, and the presence of lead-based coatings has not been recorded in available building documentation.

6.3.4 Ozone-Depleting Substances

Chlorofluorocarbons (CFCs) and other ozone depleting substances (ODS) are typically used as refrigerants in rooftop HVAC units and air-conditioning units, as well as commercial and residential refrigeration systems. The main concern of these units is the prevention of leaks and the proper disposal of coolants during decommissioning. At the time of the Site Reconnaissance the bulk storage of CFCs and ODSs was not observed.

6.3.5 Asbestos

Asbestos is a group of naturally occurring minerals that are commonly found in many building construction materials. Asbestos had historically been used because of its tensile strength and resistance to fire, heat, chemicals, and water damage. Production and use of asbestos have declined since the 1970's and was phased out in the 1990's. Regulations prohibiting the import, sale and use of asbestos and products containing asbestos came into effect December 2018.

Friable asbestos relates to a material that can be crumbled or turned to powder by touch, making it release breathable asbestos fibers. Friable asbestos was widely used in but not limited to thermal insulation, pipe lagging, insulation boards, spray on paints, and plasters. Non-friable asbestos relates to materials that have a low risk of inhalation and releasing fibers either due to its nature or being sealed in place. Non-friable asbestos was widely used in but not limited to vinyl floor tiles, vinyl sheet flooring, ceiling tiles, and roofing materials.

A comprehensive inspection for asbestos requires intrusive inspections and testing by an asbestos abatement contractor which is beyond the scope of this Phase I ESA. The Site Representative reported that no asbestos surveys have been conducted at the Site and that an asbestos management plan has not been implemented at the Site.

Given that the Site was originally developed in the year 2009, it is less likely that ACMs were used in original construction materials and finishes. Additionally, no evidence of asbestos-containing materials was observed during the Site visit.

6.3.6 Water Damage and Microbial Growth

No indication of water leaks, mould or other microbial growth were seen at the Site. Mould and microbial organisms can lead to structural deterioration of the affected building materials and exposure can contribute to poor indoor air quality and adverse health effects. A comprehensive inspection for mould requires intrusive inspections into walls and/or other cavities to detect the

presence of hidden mould growth and in some circumstances air and/or surface testing may be required. Intrusive testing and a mould investigation were beyond the scope of this Phase I ESA.

6.3.7 Radon

Radon is a radioactive gas that is generated from the breakdown of uranium in soil and bedrock. Radon is invisible, odourless and tasteless. When is released from the ground into the outdoor air, it is diluted and not a concern; however, when radon accumulates in an enclosed space, it can cause adverse health effects. The air pressure inside a building is typically lower than that of the soil and the difference in pressure draws air and other gases (including radon) from the soil into the building through any openings (e.g., cracks in foundation floors and walls, construction joints, service pipes, floor drains, etc.). Radon testing was beyond the scope of this Phase I ESA.

7 CONCLUSION AND RECOMMENDATIONS

Based on the findings of the Phase I ESA completed by AllRock, nineteen (19) PCAs, of which ten (10) were identified to result in APECs at the Site.

Based on the findings of this Phase I ESA, AllRock recommends completing a subsurface investigation (Phase II ESA) at the Site.

8 TERMS AND LIMITATIONS

This Phase I ESA Report was prepared for the exclusive use of Pritec Management. This Phase I ESA was preformed to outline evidence of actual or potential issues of environmental concern for the Site located at 299 West Hunt Club Road, Ottawa, Ontario K2E 1A6, at the time of the Site reconnaissance. A Phase I ESA performed to the CSA document entitled "*Phase I Environmental Site Assessment, CSA Standard Z768-01*" dated November 2001 (reaffirmed 2022), is intended to reduce, but not necessarily eliminate, uncertainty regarding the potential for contamination of a property. The scope of work for this Phase I ESA did not include tasks for sample gathering, laboratory testing, or intrusive testing of any kind, including but not limited to designated substances, and therefore these materials may be present within concealed areas.

AllRock will not be held responsible for the use of this report by any third party, or reliance on or any decision to be made based on it without the prior written consent of AllRock. Any use a third party makes of this report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third parties. AllRock accepts no liability or responsibility of loss, injury, claim or damages suffered by any third party as a result of decisions made or actions conducted.

The evaluation and conclusions contained within this report have been prepared based on readily available documents, records, and information furnished by individuals noted in the report, at the time of the Site reconnaissance. AllRock has relied in good faith on the information provided and has assumed that information provided is factual and accurate. AllRock accepts no responsibility of any deficiency or inaccuracy in this report as a result of omissions, misstatements, misrepresentation or fraudulent acts of persons interviewed or contacted.

The CSA document entitled "*Phase I Environmental Site Assessment, CSA Standard Z768-01*" dated November 2001 (reaffirmed 2022), does not apply to environmental auditing or environmental management systems. Therefore, with respect to Site operations and conditions, compliance with applicable Federal, Provincial or Municipal acts, regulations, laws and/or statutes was not evaluated as part of the Phase I ESA.

299 West Hunt Club Road**, Ottawa, Ontario ("Subject Property")**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City's Environmental Remediation Unit (ERU) has copies of the following environmental reports for the property:

  Paterson, 2006. 299 West Hunt Club Road - Phase II ESA. 25Jul2006

  Please contact ERU-UAE@ottawa.ca to request copies of the reports if required.

- **Sewer Use Program:** No information found pertaining to the subject property.

- **Solid Waste Services:** No information found pertaining to the subject property.

- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website: https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('HLUI Summary report – 299 West Hunt Club Road.xlsx'), please refer to the Overview and User Guide."

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at https://ero.ontario.ca/ contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Fax: (613) 239-1422

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: Public Health Inspections - Ottawa Public Health

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Bator Toth

Dear Nathan Martin:

RE: MECP FOI A-2025-07009, Your Reference #: 25433 – Decision Letter

This letter is further to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

299 West Hunt Club Road, Ottawa

Timeframe: January 1, 1980 to October 15, 2025

After a thorough search through the ministry files, records were located in response to your request. The final decision has been made to provide full access to the requested information. The official responsible for making the access decision on your request is the undersigned.

Section 57 of the Act authorizes certain fees to be charged for processing a request. Our charges for processing this request are:

Search Time 1.00 hours @ $30/hour o Time taken to locate and retrieve records	$30.00
Total	**$ 30.00**

In order to receive a copy of the records please forward this amount in Canadian dollars to our office. Payment(s) may be made by **December 15, 2025**. If payment has not been received by this date, the file will be closed, and you will be required to submit a new request.

The ministry's Client Services and Permissions Branch (CSPB) has advised that there are inactive records in the Records Centre, Mississauga, and below is a description of these records:

- ECA#, Media type, Proponent name, ECA status, Record location, File storage, Year

- 0572-7RUHCE, Municipal and Private Sewage Works (MPSW), Tony Graham Motors Limited, Approved, Offsite, 0060, 2009

If you would like us to retrieve these files, **please submit a new request** and inform the analyst below. In the request description section, indicate you are seeking records from the Record Centre in relation to file number A-2025-07009. The $5 application fee for your new request will be applied towards any costs incurred with the retrieval of the records from the Records Centre.

Payment(s) may be made in Canadian dollars by one of the following options:

- Pay online through the Freedom of Information Request for Property Information Form: https://forms.mgcs.gov.on.ca/en/dataset/012-2146. Both the pdf download or "HTML" versions provide access to the payment option.
- Mail money order or cheque made payable to the "Minister of Finance (FOI)".

Please **do not** mail cash or send your payment information via email.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you decide to pursue this request after the deadline has passed, please contact the analyst below to discuss options that are available.

If you have any questions, please contact Alex Balduckie at alex.balduckie@ontario.ca.

Yours truly,

Alex Balduckie

Hello ,

NO RECORD FOUND IN CURRENT DATABASE:

- We confirm that there are NO **fuels records** in our database at the subject address(es).

For a further search in our archives, please go to the **TSSA Client Portal** to complete an Application for Release of Public Information. Please refer to Training (tssa.org) for instructions on how to use the portal. Please refer to How to Submit a Public Information Request (tssa.org) for instructions.

The associated fee must be paid via credit card (Visa or MasterCard).

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

Kind regards,

Cassandra Cecilia | Public Information & Records Agent

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Waste Class: 212 I,148 C,331 I,145 I,112 C,263 B,122 C,148 B,331 R,331 C

Waste Class Decoded:

212 - ALIPHATIC SOLVENTS; 148 - INORGANIC LABORATORY CHEMICALS; 331 - WASTE COMPRESSED GASES; 145 - PAINT/PIGMENT/COATING RESIDUES; 112 - ACID WASTE - HEAVY METALS; 263 - ORGANIC LABORATORY CHEMICALS; 122 - ALKALINE WASTES - OTHER METALS; 148 - INORGANIC LABORATORY CHEMICALS; 331 - WASTE COMPRESSED GASES; 331 - WASTE COMPRESSED GASES

Generator Info (as of Apr 2025)

Generator Company Name: Armstrong Monitoring Corporation
Generator Site Address: 215 Colonnade Road South
City: Ottawa
Province State: Ontario
Country: Canada
Postal Code: K2E7K3
Waste Class: 212 I, 148 C, 331 I, 145 I, 112 C, 263 B, 122 C, 148 B, 331 R, 331 C

Waste Class Decoded:

212 - ALIPHATIC SOLVENTS; 148 - INORGANIC LABORATORY CHEMICALS; 331 - WASTE COMPRESSED GASES; 145 - PAINT/PIGMENT/COATING RESIDUES; 112 - ACID WASTE - HEAVY METALS; 263 - ORGANIC LABORATORY CHEMICALS; 122 - ALKALINE WASTES - OTHER METALS; 148 - INORGANIC LABORATORY CHEMICALS; 331 - WASTE COMPRESSED GASES; 331 - WASTE COMPRESSED GASES

Waste Characteristic Decoded:

I - Ignitable; C - Corrosive; I - Ignitable; I - Ignitable; C - Corrosive; B - Hazardous Waste Chemical; C - Corrosive; B - Hazardous Waste Chemical; R - Reactive; C - Corrosive

Project Description: This application is for the approval of new welding fume exhaust system, to be installed in an existing vehicle repair garage. This system will be made up of four sub-systems. Each sub-system will have three pick up points connected to a single exhaust fan on the roof. The system will exhaust fumes from conventional MIG welding and plasma arc cutting operation on stainless steel, plain steel and aluminium.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2024

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Jul 2025

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2025

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Aug 31, 2025

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Jul 2025

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Jul 31, 2025

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Aug 31, 2025

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Jul 31, 2025

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Apr 30, 2025

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2025

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Mar 31, 2025

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Feb 2025

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jul 31, 2025

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Jun 30, 2025

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-Aug 2024

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Aug 31, 2025

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Jul 31, 2025

Ontario PFAS Spills: Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR: Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Aug 31, 2025

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-Aug 2025

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-May 2025

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Jul 31, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

RE: CITY DIRECTORY RESEARCH
299 West Hunt Club Road
Ottawa,ON K2E 1A6

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

175-225 of Colonnade Road

250-400 of W Hunt Club Road

Search Notes:

Coverage splits between Ottawa and Nepean.

Search Results Summary

Data from 2012 to 2017 does not include residential information

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography as well as hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Bedrock Geology

0 0.2 0.4 KM

N

This map shows bedrock geologic units in the area. Please refer to the report for detailed descriptions. Data coverage is shown to the right. Gray indicates no data available in the area.

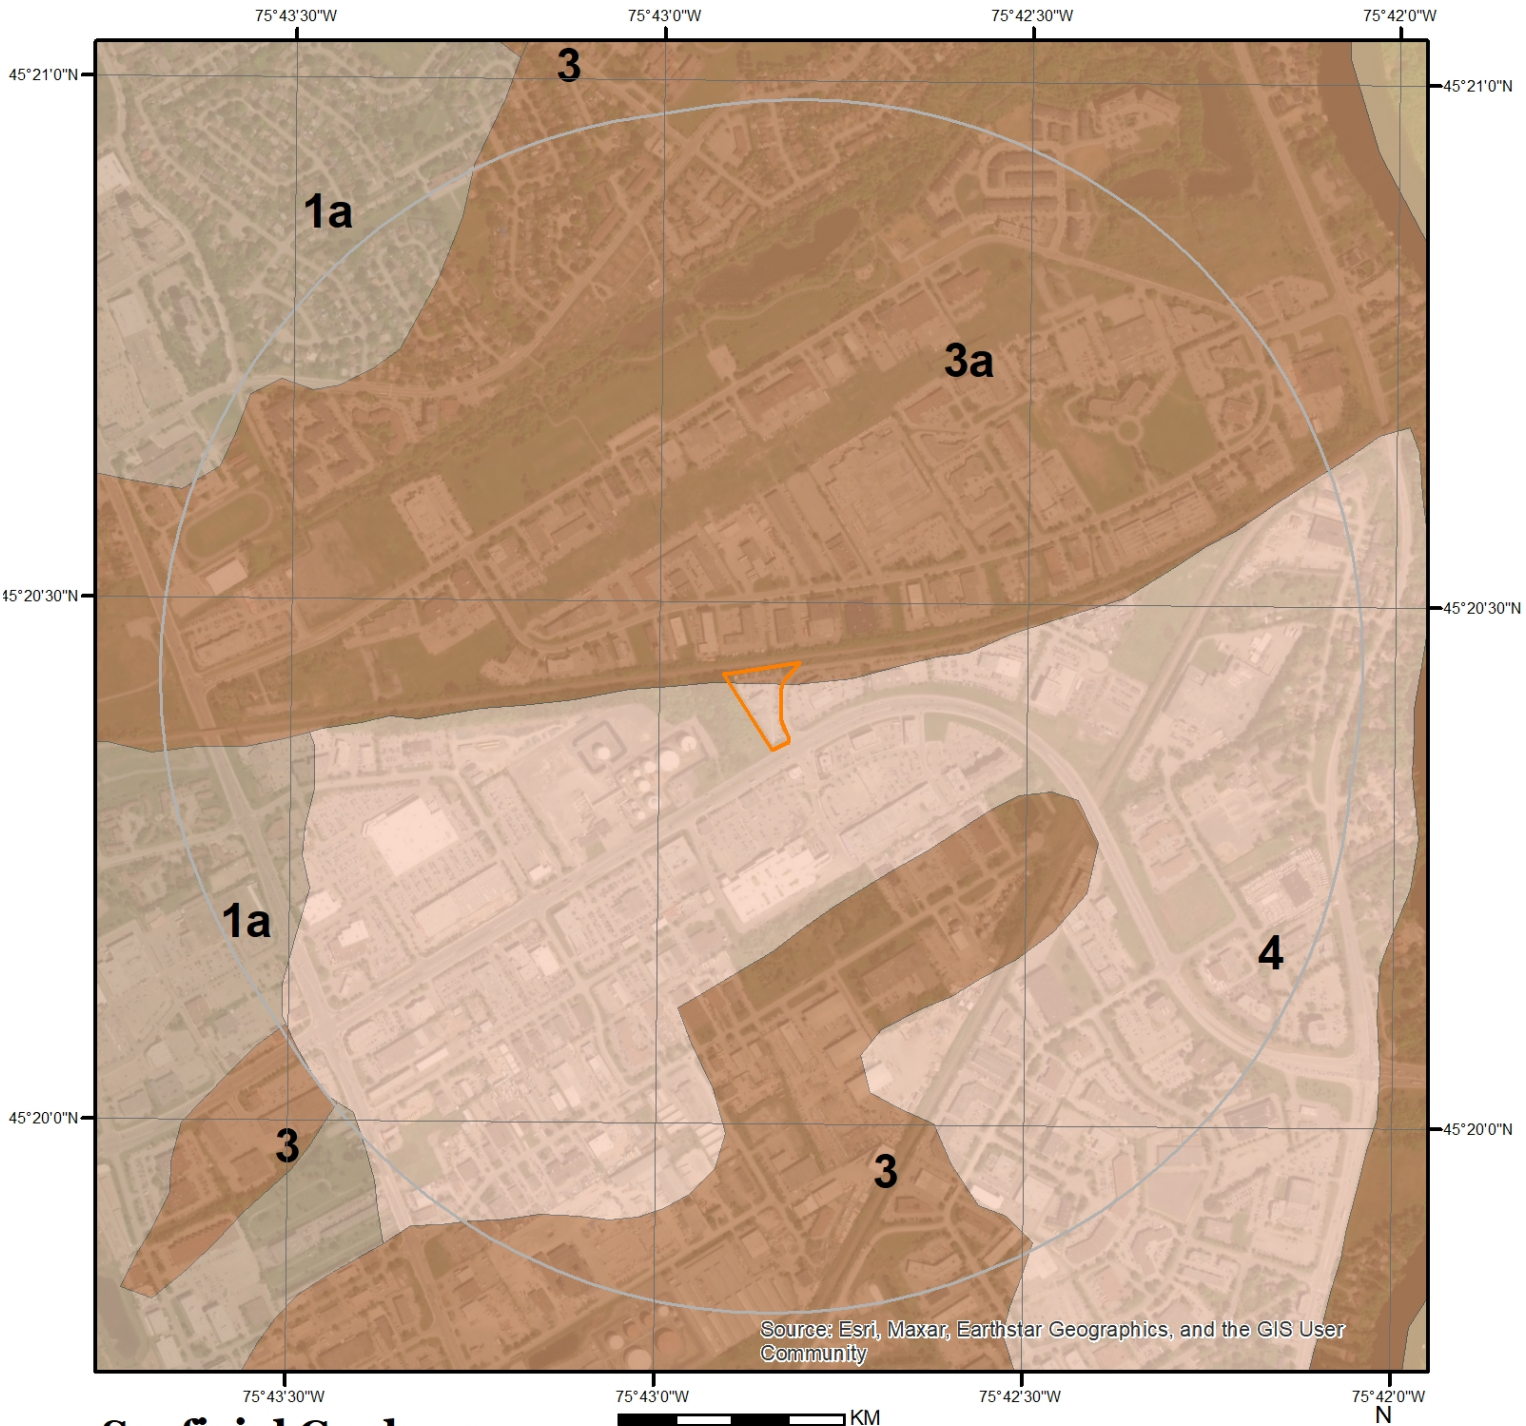
ERIS

Geologic Information

Detailed bedrock geology information about each unit within the search radius is provided below.

Unit ID 19115

Unit Name:	
Rock Type:	Dolostone, sandstone
Strata:	Beekmantown Group
Super Eon:	
Eon:	PHANEROZOIC (Present to 542.0 Ma)
Era:	PALEOZOIC (251.0 Ma to 542.0 Ma)
Period:	ORDOVICIAN (443.7 Ma to 488.3 Ma)
Epoch:	LOWER ORDOVICIAN
Province:	
Tectonic Zone:	



Surficial Geology

This map shows surficial geologic labels in the area. Please refer to the report for detailed descriptions. Data coverage is shown to the right. Gray indicates no data available in the area.

Geologic Information

Detailed surficial geology information about each unit within the search radius is provided below.

Unit ID 1a

Geological Deposit:	Till
Deposit Age:	Quaternary
Primary Material:	diamicton
Secondary Material:	
Primary General:	glacial
Primary General Modifier:	
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	N-NE
Carbon Content:	
Formation:	Undifferentiated silty-sandy till on Paleozoic terrain
Permeability:	Low-Medium
Material Description:	Sandy and silty compact diamicton, grey at depth but brown where oxidized; calcareous where derived from sedimentary rocks and not leached; consists dominantly of lodgment till. In areas that lie below marine limit (198 m a.s.l.) it is overlain by a discontinuous lag consisting of gravel, sand and boulders

Unit ID 3a

Geological Deposit:	Offshore marine deposits
Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	clay, silt
Secondary Material:	
Primary General:	glaciomarine
Primary General Modifier:	foreshore/basinal
Veneer:	silt, sand
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	Low
Material Description:	Clay and silt underlying erosional terraces; upper part of marine deposits removed to variable depths by fluvial erosion so in places clay is uniform blue-grey; unit includes lenses, bars and channel fills to sand and pockets of nonmarine silt that were formed during terrace (or channel) cutting.

Unit ID 4

Geological Deposit:	Deltaic and estuarine deposits

Geologic Information

Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	sand
Secondary Material:	
Primary General:	glaciomarine
Primary General Modifier:	deltaic
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	High
Material Description:	Medium-to fine-grained sand, in some places fossiliferous; lies outside abandoned channels; most common deposit is a combined strip delta-sand plain that developed as water levels fell.

Unit ID 3

Geological Deposit:	Offshore marine deposits
Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	clay, silt
Secondary Material:	sand
Primary General:	glaciomarine
Primary General Modifier:	foreshore/basinal
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	Low
Material Description:	Clay, silty clay and silt, commonly calcareous and fossiliferous; locally overlain by thin sands. Upper parts are generally mottled or laminated reddish brown and bluish grey and may contain lenses and pockets of sand, but at depth the clay is uniform and blue-grey.

Soil Information

Radon Information

Detailed radon information for the project property is provided below.

Radon Zone Information

ID:	144852	**Radon Rank:**	LOW

Health Canada Radon Information

Health Region:	3551
Health Region Name:	City of Ottawa Health Unit
Province or Territory:	ON
Number Homes in Survey:	64
% Below 200 Bq/m3:	93.8
% Above 200 Bq/m3:	6.2
200 to 600 Bq/m3:	6.2
% Above 600 Bq/m3:	0

Area of Natural and Scientific Interest Information

There is no ANSI unit available in this area.

Area of Natural and Scientific Interest Information

Detailed ANSI information is provided below.

No records found for the project property or surrounding properties.

Appendix

Federal Sources

Bedrock Geology of Canada — **BEDROCK GEOLOGY**

The Geological Map of Canada is scaled at 1:5,000,000. This map is created by Geological Survey of Canada and published by Natural Resources Canada.

Health Canada Radon Information — **RADON**

This source is the results from the Cross-Canada Survey of Radon Concentrations in Homes, a two-year study conducted by Health Canada's National Radon Program. The aims of this study were to obtain an estimate of the proportion of the Canadian population living in homes with radon gas levels above the guideline of 200 Bq/m3, to identify previously unknown areas where radon gas exposure may constitute a health risk, and to build, over time, a map of indoor radon gas exposure levels across Canada.

National Energy Board Wells — **NEBP**

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Soil Landscapes of Canada (SLC) — **SLC**

Major characteristics of soil and land such as surface form, slope, water table depth, permafrost and lakes.

Surficial Geology of Canada — **SURFICIAL GEOLOGY**

This map contains information on surficial materials and associated landforms left by the retreat of the last glaciers and non glacial environments. It is based on compilation of existing maps. This data was authored by the Geological Survey of Canada and published by Natural Resources Canada.

Toporama — **TOPORAMA**

Toporama covers the entire area of Canada's landmass and provides topographic, geo-referenced, and symbolic information in a raster format at 1:50,000 scale. This is a digital topographic reference product made available by Natural Resources Canada (NRCan).

Provincial Sources

Area of Natural and Scientific Interest — **ANSI**

Areas of Natural and Scientific Interest (ANSIs) are lands and waters with features that are important for natural heritage protection, appreciation, scientific study or education. This dataset is made available by Ontario Ministry of Natural Resources.

Bedrock Geology of Ontario — **BEDROCK GEOLOGY**

The Bedrock Geology layer shows the distribution of bedrock units underlying Ontario at a 1:250,000 scale. The geology of the province consists of Precambrian rocks of the Canadian Shield and Phanerozoic sedimentary rocks that overlie the Canadian Shield. This layer was compiled by the Precambrian Geoscience Section of Ontario Geological Survey.

Ontario Detailed Soil Survey (DSS3) — **SOIL SURVEY**

Soil surveys have been published for most of the agricultural areas, and many surrounding areas, across Canada. Data from these surveys comprise the most detailed soil inventory information in the National Soil DataBase. Data is made available by Agriculture and Agri-Food Canada

Ontario Oil and Gas Wells — **OOGW**

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Provincial Groundwater Monitoring Network — **GROUNDWATER**

Appendix

Groundwater level and chemistry data from monitoring wells that are part of the Provincial Groundwater Monitoring Network (PGMN) Program. Precipitation data (rain) is also available for some sites. This data is provided by Ontario Ministry of Environment and Climate Change.

Surficial Geology of Ontario **SURFICIAL GEOLOGY**

The Surficial Geology dataset contains a layer depicting the distribution and characteristics of surficial deposits across southern Ontario. This data set is authored by the Ontario Geological Survey.

Topographic Map of Ontario **TOPOGRAPHIC MAP**

The Ontario Basic Mapping program provides a relationship between topographic information and the provincial geographical referencing grid, thereby forming the foundation for a comprehensive provincial geographical referencing system. This data is made available by the Ontario Ministry of Natural Resources and Forestry. This is ERIS self-designed topographic map template at 1:10,000.

Water Well Information System **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Wetlands of Ontario **WETLAND**

The Ministry of Natural Resources and Forestry has made available a database of wetlands in Ontario. Certain attributes identify wetlands that have been evaluated with the Ontario Wetland Evaluation System (OWES), and of those which ones have been designated as Provincially Significant Wetlands (PSW).

Private Sources

Oil and Gas Wells **OGWE**

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Radon Zone Information **RADON**

The Radon Potential Map is developed by Radon Environmental Management Corporation. Its objective was to illustrate the relative variation of radon risk across the country, and in 2011 it published its first geologic Radon Potential Map of Canada.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Limited Partnership disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above.
