## EXECUTIVE SUMMARY

---

A Phase 1 Environmental Site Assessment (ESA) was undertaken by St. Lawrence Testing & Inspection Co. Ltd. (St. Lawrence Testing) for a commercial property located with the PIN of 04629-0906 in Nepean, Ontario (hereafter referred to as the Site or Site property) at the request of Halo Car Wash.

The purpose of this ESA was to assess for any areas of potential environmental concern (APEC) related to the current and past uses of the Site property along with any environmental concerns that may have resulted from adjoining and neighbouring properties. This ESA was completed in general accordance with Ontario Regulation 153/04 (Record of Site Condition) to support the development of a vehicle carwash facility on the Site property.

To complete this ESA, a records review of available documents pertaining to the Site property was conducted that included an Environmental Risk Information Services (ERIS) report, historical aerial photographs, satellite images, well records, insurance records and fire insurance plans along previous environmental reports, a title search from the Crown patent and a Historical Land Use Inventory report supplied by the City of Ottawa Planning Department. An email exchange was held with the current owner for any knowledge they had with regards to the Site. Three Site visits were performed on February 10, 2025, May 13, 2025, and on October 8, 2025, that included a visual inspection of the Site property along with observations of the adjoining and neighbouring properties. Observations of the adjoining and neighbouring properties were carried out from the Site property boundaries and from publicly accessible areas.

The Site property is located within the Nepean Crossroads Centre that operates as a multi-site commercial/retail area. The Site property is irregular in shape and measures 3,639.46 m<sup>2</sup> in area. The Site property is located at the east side of Lancelot Drive. Lancelot Drive originates off West Hunt Club Road that is located approximately 70 m to the south from the Site property.

The Site is not served with potable water at the time of this report; however, potable is available through the City of Ottawa's Municipal Services (Appendix K). There are several surface water catch basins located on the Site property. These are connected to the municipal sewer system.

The Site property originally operated as an agricultural farm with a house, barn and sheds until approximately 1984 when the house, barn and shed were removed/demolished. A report prepared by the Ministry of Transportation of Ontario (MTO) in 1996 summarized a subsurface investigation on the property located at 585 West Hunt Club Road. This work also encompassed the Site property. Twenty-two test pits (TP 1 to TP 22) were dug, and soil samples were collected from selected test pit locations (TP1, TP 2, TP 3, TP 4, TP 11 and TP 12) for metal analysis. The test results were compared to the standards

used in 1996. St. Lawrence Testing compared the available results with the standards listed in Ontario Regulation 153/04, Table 3 for a commercial property with coarse soil and non-potable groundwater and found that they satisfied these standards.

The Site property remained vacant for several years after that until commercially developed around 1997 as an exterior storage area for a large retail store (RONA) located at 585 West Hunt Club Road. The Site eventually became a parking lot and has remained so to this day.

The Site is approximately 88.2 m above sea level with a general slope direction to the south southeast. The bedrock is composed of limestone, dolostone and sandstone of the Beekmantown Group of the Ordovician period. The glacial deposit is composed of undifferentiated silty sandy till on Paleozoic terrain having low to medium permeability. The soil characterization for the Site property is silty clay with poor drainage and has a high run-off potential. The inferred groundwater flow will be towards the Nepean Creek located approximately 380 m northeast of the Site property.

The Site property was snow covered during the initial visit conducted in February 2025. A brief assessment of the grounds was conducted again on May 13, 2025, after the snow had melted and confirmed the Site property is an asphalted parking lot with no structures present. There were no mounds of fill materials present, and no observations of fuel spillage were noted. The adjoining and neighbouring properties remained similar in use as noted in the initial Site visit. A third Site visit was conducted on October 8, 2025, that included supporting photographs. The Site is best described as an unused private, asphalt covered parking lot. No structures are present.

The adjoining property to the south and located at 575 West Hunt Club Road is a commercial building containing the offices for Van Houtte Coffee Services along with Peak Investment Services Inc. and the Bariatric Medical Institute. The neighbouring property to the southeast and located at 545 West Hunt Club Road is a vacant retail home furnishing building. This property was occupied by Upper Room Home Furnishings and closed in September 2024. The neighbouring property to the east and across an access laneway is an LCBO store located at 543 West Hunt Club Road. The neighbouring property to the north and across an access laneway is a RONA hardware store located at 585 West Hunt Club Road. The neighbouring property to the west and across Lancelot Drive is an asphalt covered exterior storage area for RONA. To the southwest and located at 595 West Hunt Club Road is a commercial building occupied by a safety store (The Safety House), a Smoke FX Vape Shop along with a massage unit (Massage Addict). No visual indications of above ground fuel storage tanks were found at these properties.

The Pinhey Forest is an area of natural and scientific interest and is located approximately 300 m southwest of the Site property and outside the scope of this ESA.

On the basis of our ESA, St. Lawrence Testing determined that there are no APECs within a 250 m radius of the Site property that would warrant further environmental work (i.e. Phase 2 ESA).

## 1. INTRODUCTION

The Site property is located within the Nepean Crossroads Centre that operates as a multi-site commercial/retail area. The Site property is irregular in shape and measures 3,639.46 m<sup>2</sup> in area. The Site property is located at the east side of Lancelot Drive. Lancelot Drive originates from West Hunt Club Road. West Hunt Club Road is located approximately 70 m to the south from the Site property. The Site property has yet to be assigned a civic address by the City of Ottawa; however, the property identification number is 04629-0906.

The current owner of the Site property is Melron Properties Enterprises Inc. under a numbered company 1427163 Ontario Inc. The address for Melron Properties Enterprises Inc. is 7 Perrin Ave., Nepean, ON.

The Site currently operates as a private asphalt covered parking lot and is not associated with the businesses occupying the Nepean Crossroads Centre. No structures are present on the Site property.

## 2. SCOPE OF INVESTIGATION

This Phase 1 ESA was prepared under general accordance with Ontario Regulation 153/04 (Records of Site Condition). St. Lawrence Testing retains sole discretion to increase or decrease the scope of the work based on the on-going findings.

- Carry out a Phase I ESA to investigate the potential environmental legacy of the Site.
- Carry out Site investigations and records review from sources such as (but not necessarily including) existing reports by others (to be supplied by the client), historical maps, historical documents, title search, government (Municipal and Provincial) and other information in consideration of various protocols and other sources as could be developed within the investigation time frame.
- Carry out a Site walkover and interviews.
- Evaluate the information gathered from the records review, interviews and site reconnaissance.
- Prepare a Phase I ESA outlining the findings and provide comments based on the findings as well as using information available to St. Lawrence Testing received on or before the completion date of the report.
- A qualified person shall ensure that the Phase I ESA meets the requirements of Schedule D of O. Reg. 153/04.

- Denial of access to a qualified person, or someone supervised by a qualified person, to a structure or building or to any other part of the Phase I property or
- Any area under the Phase I property, for any reason other than safety or inaccessibility is an impediment that precludes meeting the general or specific objectives, components or requirements of a Phase 1 ESA.
- The client shall be responsible for providing St. Lawrence Testing with a current site survey showing any current building (s) and site configuration prior to RSC submission

All matters not listed in the terms of reference or general conditions are specifically excluded from St. Lawrence Testing's responsibilities and reporting.

### 3. RECORDS REVIEW

#### a. General

##### i. Phase 1 Study Area

The Phase 1 study area is identified by PIN 04629-0906 within the City of Ottawa. The Site property has yet to be assigned a municipal address. The Site property is located within the Nepean Crossroads Centre. Figure 1 shows a Site survey. Figure 2 shows the general location of the Site property within Nepean. Figure 3 shows the Site location and Figure 4 shows the Site property dimensions. Figures are attached in Appendix A.

The Site currently operates as a private asphalted parking lot. The properties located within a 250 m radius of the Site are commercial in use.

##### ii. First Developed Use

The first developed use of the Site property was determined via a 1925 aerial photograph. At this time, the Site was part of a larger agricultural use property that contained a house, a barn and several out-buildings. The Site continued to operate as agricultural/residential until 1984 when the structures were demolished. The Site remained vacant until 1997 when it was first commercially developed as a storage yard/parking lot for a property located at 585 West Hunt Club Road. A Historic Land Use Inventory report prepared by the City of Ottawa and is attached in Appendix B.

**iii. Fire Insurance Plans**

A search for available fire insurance plans was requested from VERISK through Environmental Risk Information Services (ERIS). No fire insurance plans are available covering the Site property. The VERISK report is found in Appendix C.

**iv. Chain of Title**

A title search from the Crown Patent to the current owner was obtained from Kibby Lutz Abstracts Inc. and is found below. The Chain of Title is attached and found in Appendix D.

<b>Instrument #</b>	<b>Doc. Type</b>	<b>Date</b>	<b>Party From</b>	<b>Party To</b>

#### **v. Environmental Reports**

Appendix E contains several historical environmental reports. An Environmental Investigation report prepared by the Ministry of Transportation (MTO) in 1996 was reviewed that involved a property located at 585 West Hunt Club Road. The Site was part of this property at that time.

An Environmental Investigation report prepared by the Ministry of Transportation in 1996 was reviewed that involved a property located at 585 West Hunt Club Road. The Site was part of this property at that time.

A review of available aerial photographs carried out indicated that the Site was originally a farm from 1953 to 1958. The Site was no longer used as a farm, but a barn structure remained present until 1984. In 1984 only a house remained. After 1984 the Site property was vacant.

Another report prepared by the MTO in 1996 summarized a subsurface investigation on the property located at 585 West Hunt Club Road. This work also included the Site property. Twenty-two test pits (TP 1 to TP 22) were dug, and soil samples were collected from selected test pit locations (TP1, TP 2, TP 3, TP 4, TP 11 and TP 12) for metal analysis. The test results were compared to the standards used in 1996. St. Lawrence Testing compared the available results with the standards listed in Ontario Regulation 153/04, Table 3 for a commercial property with coarse soil and non-potable groundwater and found that they satisfied these standards.

The location of TP 6 was to the north of the Site property. This test pit contained a 22,000 L steel underground diesel fuel storage tank that was present. This tank was removed, and no soil contamination was noted in the report. However, the soil was not analyzed for petroleum hydrocarbons to confirm their opinion of the soil at this location.

The sketch provided suggests that TP 8 and TP 22 were located on or very close to the Site property. The soil at TP 8 was described as a 'grey clay soil mixed with building bricks to a 1.5-meter depth with no

visual evidence of contamination, no suspect odour'. The description of the soil located at TP 22 was noted as 'typical barn materials (i.e. concrete, steel roof-sheeting and wooden beams)'. Unfortunately, no analyses of the soil were conducted at TP 8 and TP 22.

A previous Phase 1 ESA prepared using CSA Standard Z768-01 was prepared for the Site property in May 2025 by St. Lawrence Testing (Report #25C110). The report concluded there were no areas of potential environmental concern with respect to the Site property. This report is found in Appendix F.

A geotechnical investigation (report #25C038R2) conducted on the Site property in March 2025 by St. Lawrence Testing and attached in Appendix G indicated that the surface is covered with 50 mm of asphalt. Below the asphalt is gravel fill that extends between 0.48 to 0.53 m. Below the gravel is a brown, moist, compact silty sand. With depth the brown becomes grey, brown, generally around 1.5 m and grey, generally around 2.3 m. The moisture becomes very moist generally between 1.8 m to 2.3 m. The silty sand was noted to be wet between 2.3 m to 3.0 m at Boreholes 2, 3 and 4. The ground water was noted at 2.3 m at Boreholes 2 and 3 and at 3.0 m at Boreholes 1 and 4. Bedrock was encountered at a depth of 3.28 m at Borehole 2 and 2.44 m at Borehole 3. No environmental observations were included.

A Freedom of Information (FOI) response was received from the Ministry of Environment Conservation and Parks (MOECP) with respect to our inquiry regarding any environmental report they have on file from January 1975 to October 2025. This can be found in Appendix H. The reply indicated that some of the information available was severed or withheld. A public report on corporate ownership was available along with a Municipal and Private Sewage works report prepared in 1998 for Mobius Development Ltd. St. Lawrence Testing is of the opinion that these reports would not contain any pertinent information of environmental issues for the Phase 1 property.

**b. Environmental Source Information**

St. Lawrence Testing submitted a request to Environmental Risk Information Services (ERIS) for a review of available Federal, Provincial and Private Sector databases. The complete ERIS report is provided in Appendix I.

There were no records found directly associated with the Site property in the ERIS Historical Searches database including in the Anderson's Waste Disposal sites, the Commercial Fuel Oil Tanks, the Inventory of Coal Gasification Plants and Coal Tar Sites, Fuel Storage Tanks, Historic Fuel Storage Tanks, Private and Retail Fuel Tanks, Retail Fuel Tanks, Transport Canada Fuel Storage

Tanks, TSSA Incidents, National PCB Inventory, Nation Pollutant Release Inventory, Record of Site Condition, Waste Disposal Site -MOE CA Inventory.

However, there were 55 records found for properties within a 250 m radius of the Site boundaries in the database search.

<b>Database</b>	<b>Site Property</b>	<b>250 m Radius</b>	<b>Description</b>
Borehole	0	1	The record involved a geotechnical investigation in 1971 that was located approximately 153 m south of the Site. This work would not have posed an environmental risk to the Site property.
Certificates of Approval	0	7	The first record involved a property located approximately 177 m northwest at 585 West Hunt Club Road. In 2008 an approval was granted for the release of substances into the air. The specifics of the approval were not provided in the record. This approval would pose a low environmental risk to the Site as any releases into the air would readily disperse and be diluted in the atmosphere. The second record involved municipal sewage works that occurred in 1993 and located approximately 115 m southwest at West Hunt Club Road and Lancelot Drive. This work would have posed a low environmental risk as this location is at a lower elevation to the Site. The final 3 records all involved a fiber optic company located approximately 150 m east of the Site. Four approvals were granted in 1995, 1998, 1998 and 1999 for releases into the air. The 5 <sup>th</sup> record involved the

**St. Lawrence Testing  
& Inspection Co. Ltd.**  
Report No. 25C272

			cancellation of an approval for the release into the air. These approvals involved the release of acetone, ethyl alcohol, into the air and the use of exhaust hoods. These approvals would pose a low environmental risk to the Site as any releases into the air would readily disperse and be diluted in the atmosphere.
Delisted Fuel Tanks	0	1	This record involved a former liquid propane tank located approximately 177 m northwest at 585 West Hunt Club Road. The presence of a liquid propane tank at this location would pose a low environmental risk to the Site as any releases of propane would evaporate into the air and be diluted before reaching the Site property.
Environmental Registry	0	4	The first record involved a property located approximately 117 m northwest at 585 West Hunt Club Road. In 2008, an approval was granted for the discharge into the natural environment other than water (i.e. air). This approval would have posed a low environmental risk to the Site as any releases into the air would be dispersed and diluted before reaching the Site. The next record involved a permit in 2020 for activities to achieve an overall benefit to a species. This concerned a proposed residential development to be located approximately 227 m south of the Site where Butternut trees were found. This would not have posed an

**St. Lawrence Testing  
& Inspection Co. Ltd.**  
Report No. 25C272

			<p>environmental risk to the Site property. The last 2 records concerning two approvals in 1998 &amp; 2001 for the discharge into the natural environment other than water (i.e. air) by JDS Uniphase Inc. located approximately 245 m southeast. These approvals would have posed a low environmental risk to the Site as any releases into the air would be dispersed and diluted before reaching the Site.</p>
Environmental Compliance Approval	0	1	<p>This record concerned the Rona Home &amp; Garden located approximately 117 m northwest at 585 West Hunt Club Road. In 2008, an approval was granted for the use of natural gas fueled heaters, a standby diesel fueled generator along with a dust collection system. This approval would have posed a low environmental risk to the Site as any releases into the air from the exhaust and escaping dust would be dispersed and diluted before reaching the Site.</p>
ERIS Historical Searches	0	8	<p>There were 2 records involving 585 West Hunt Club Road, 2 records for 565 West Hunt Club Road, 2 records for 595 West Hunt Club Road, one record involving a location at 570 West Hunt Club Road &amp; 159 Cleopatra Drive and one record for a property located at 174 Cleopatra Drive. These would not have posed an environmental risk to the Site.</p>

**St. Lawrence Testing  
& Inspection Co. Ltd.**  
Report No. 25C272

Pesticide Registry	0	7	All 7 records involved Rona Home & Garden located approximately 117 m northwest at 585 West Hunt Club Road. The records indicated that this location is a limited vendor of pesticides for retail. Considering the small volumes of pesticides available at this location, these pesticides would pose a low environmental risk to the Site property.
Scott's Manufacturing Directory	0	3	All 3 records involved JDS Uniphase Ltd. located approximately 150 m southeast at 570 West Hunt Club Road. This business manufactures optical instruments and lenses along with measuring and controlling devices. The presence of this business would pose a low environmental risk to the Site property.
Ontario Spills	0	1	There was one spill that occurred on the Site property. There was a 3 L hydraulic oil spill onto the concrete at 585 West Hunt Club Road in November 2024. The spill was contained and cleaned up. The record indicated the environmental consequences were low and would not have resulted in sub-surface contamination onto the Site property.
Water Well Information System	0	2	The first record involved a domestic water supply well located approximately 153 m northeast. The Ontario Well Records described this well as being drilled in 1975. The presence of a domestic water supply well at this location would pose a

			low environmental risk to the Site. The next record involved an abandoned monitoring well located approximately 165 m south southwest at 162 Cleopatra Drive. This well was installed in 2006. The presence of a monitoring well at this location would pose a low environmental risk as this location is at a lower elevation to that of the Site property.
--	--	--	--

There were 20 records found in Ontario Regulation 347 Waste Generators Summary database for properties located within a 250 m radius of the Site.

<b>Location</b>	<b>Distance from Site/Elevation</b>	<b>Wastes Generated</b>
Rona Home & Garden 585 West Hunt Club Road	117 m NW /↑	Waste detergents & soaps were generated in 2016. Waste compressed gases & cylinders, waste crankcase oils & lubricants, organic and inorganic wastes, organic non-halogenated pesticides & herbicides, inorganic sludges, slurries & solids, halogenated pesticides & herbicides, detergents & soaps, aliphatic solvents along with light fuels in 2018, 2020, 2021 and 2022.
Simplex Intl Time Equipment Co. Ltd. 575 Heston Drive	56 m SE /↓	Alkaline waste-heavy metals were generated from 1993 to 2001.
Ottawa Catholic School Board 570 West Hunt Club Road	153 m SSE /↓	Paint, pigments & coating residues, petroleum distillates, PCBs, waste oils & lubricants along with waste compressed gases were generated in 2002. Paint, pigments & coating residues were generated from 2014 to 2018 and 2020.

		Paint, pigments & coating residues along with aliphatic solvents were produced in 2021 and 2022.
JDS Uniphase Corporation 570 West Hunt Club Road	153 m SSE / ↓	Waste oils & lubricants, organic and inorganic waste, aliphatic solvents and halogenated solvents in 1992, 1993, 1996, 1997 & 1998. Aliphatic solvents were produced in 1994 & 1995. Halogenated solvents, waste oils & lubricants, aliphatic solvents, organic & inorganic laboratory chemicals along with inorganic acid waste from 1999 to 2001. Organic & inorganic waste, waste oils & lubricants, aliphatic solvents, oil skimmings & sludges along with waste compressed gases from 2002 to 2004.

**c. Physical Settings**

**i. Aerial Photographs & Satellite Images**

Historical aerial photographs for the Site were obtained through ERIS for the years 1925, 1936, 1946, 1953, 1965, 1976, 1985, and 1994. In addition to these, satellite images viewed using Google Earth from the years 2004, 2007, 2008, 2014, 2018, 2021 and 2024 were also reviewed. These are all attached in Appendix J.

Year	Description
1925	The Site property appears agricultural in use. There is a house, a barn and outbuildings present to the northeast of the Site. The adjoining and neighbouring properties appear agricultural in use. Merivale Road is present further to the east of the Site.

1936	There appears to be no significant changes in the use of the Site property or on the adjoining and neighbouring properties since the 1925 photograph was taken.
1946	There appears to be no significant changes to the Site property since the 1936 photo was taken. The surrounding properties appear agricultural or rural in use.
1953	There appears to be no significant changes in the use of the Site property and at the surrounding properties since the 1946 photo was taken. Further to the east and across Merivale Road are large above ground storage tanks now present.
1965	The Site property remains rural/agricultural in use. There appears to be development present further to the east and to the northeast of the Site along the west side of Merivale Road. The adjoining properties to the north, west and south appear agricultural in use.
1976	The Site property remains rural in use. There is further development to the east and northeast of the Site. The adjoining properties to the north, west and south remain agricultural or undeveloped. West Hunt Club Road is not present along the south side of the Site property.
1985	The Site property appears vacant. The buildings once located to the northeast of the Site property are now absent. The adjoining properties to the east, west and south remain undeveloped. West Hunt Club Road is not present. The property located further to the east is developed and appears commercial in use.

1994	The Site property remains vacant. There is now a large structure located to the south of the Site property. West Hunt Club Road is present further to the south and there is a short access road where Lancelot Drive will eventually be located. The adjoining properties to the north, east and west remain undeveloped.
2004	The Site is covered with asphalt and appears to operate as an exterior storage area as there are numerous objects located along the north side. The Site is bound by laneways along the east, north and west sides. The adjoining property located to the south contains a large irregular shaped commercial building. The neighbouring properties located to the north and west are asphalt covered parking lots. The neighbouring property located to the southwest contains an irregular shaped commercial building. The neighbouring property located to the east contains a large irregular shaped building. Another irregular shaped building is present to the southeast.
2007	The Site property appears to be an exterior storage area with many objects present. The adjoining and neighbouring properties appear similar in use as they did in the 2004 image.
2008	The Site property appears vacant with no objects present. The adjoining and neighbouring properties appear similar in use as they did in the 2004 image.
2014	There appears to be no significant changes in the use of the Site property since the 2008 image was recorded except for a vehicle located at the centre of the Site. The adjoining property located to the south appears

	unchanged in use since the 2008 image. The neighbouring property located to the west now appears to operate as an exterior storage area. The neighbouring properties located to the north and east have remained similar in use since the 2008 image.
2018	There appears to be no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2014 image was recorded.
2021	There appears to be no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2018 image was recorded.
2024	There appears to be no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 20121 image was recorded.

ii. Topography, Hydrology, Geology

According to the Physical Settings Report prepared by Environmental Risk Information Services (ERIS), the Site is approximately 88.2 m above sea level with a general slope direction to the south southeast. This report includes a current topographic map and is found in Appendix K. A groundwater flow diagram is attached in Figure 5 within Appendix A.

The bedrock is composed of limestone, dolostone and sandstone of the Beekmantown Group of the Ordovician period. The glacial deposit is composed of undifferentiated silty sandy till on Paleozoic terrain having low to medium permeability. The soil characterization for the Site property was not provided in the Physical Settings report; however,

the soil to the west of Lancelot Drive is described as a silty clay with poor drainage and has a high run-off potential.

The inferred groundwater flow will be southeast with the slope then towards the Nepean Creek located approximately 380 m northeast of the Site property.

iii. Fill Materials

No fill material was observed on the Site property during the recent visit.

iv. Water Bodies and Areas of Natural Significance

The Site property contains no waterbodies. No waterbodies were observed within a 250 m radius of the Site. There are no areas of natural significance within a 250 m radius; however, the Pinhey Forest is an area of natural and scientific interest and is located approximately 300 m southwest of the Site property. This is outside the 250 m study radius of this ESA.

v. Well Records

No wells were observed on the Site property. No wells were identified on the Ontario Well records web site.

d. Site Operating Records

No Site operating records were available for review.

#### 4. INTERVIEW

A telephone interview with Mr. H. William Cuff, representative for the Site property, was attempted on 3 individual days using the contact information provided on the Melron Property Enterprises Inc. letterhead. No one answered the telephone, and no voice mail prompt was provided to leave a message. The address for Melron Property Enterprises Inc. is a private residence, and it is possible that Mr. Cuff may be away on vacation. Another attempt to reach Mr. Cuff by telephone was conducted on October 9, 2025. There was no answer, and no voice prompt was provided to leave a message. An email was sent to Mr. Cuff and he replied on October 14, 2025. Mr. Cuff stated that he acquired the Site property from RONA in 2000. He believes RONA developed the Site as a parking lot in 1998. Mr. Cuff wrote that there has been no upgrades to the

Site property since it was originally developed as a parking lot. He knew of no environmental issues with the Site property.

## 5. SITE RECONNAISSANCE

A Site visit was performed by Mr. Steven Rowland an Environmental Technician of St. Lawrence Testing on February 10, 2025. The Site visit lasted approximately 1 hour. The weather was sunny. The Site property appeared to be an unused parking lot and was covered with deep snow at the time of this visit. Vehicle access on to the Site property could not be made due to the snow; however, the satellite image from 2024 shows access locations at the east and west sides of the Site property.

No structures, above ground storage tanks, PCB or asbestos containing materials were observed. Site photographs taken at the time of this visit are found in Appendix H. Mr. Rowland advised that another visit is necessary once the snow has melted.

A second Site visit was conducted on May 13, 2025, by Mr. Gilbert McIntee P. Eng., the undersigned environmental engineer. Mr. McIntee determined that the Site property is an asphalted parking lot with no structures present. There were no mounds of fill materials present, and no observations of fuel spillage were noted.

A third Site visit was conducted on October 8, 2025 by Mr. Rowland. The Site visit lasted approximately 1 hour. The weather was partly sunny with a temperature of 12 °C. Site photographs taken at the time are found in Appendix L. The Site property can best be described as an asphalt covered private parking lot. Access onto the Site can be made from the west and east sides. No structures are present. There are several surface water catch basins located within the Site property. No fill material or surface staining was observed on the Site property. There was visual evidence of borehole drilling found within the Site property.

The neighbouring properties located to the west and north are part of a retail building supply store (RONA). There is lumber material stored on the west property and numerous bags of small volume soil located at the north property. These materials are stored neatly and show no visual evidence of contamination.

## 6. REVIEW and EVALUATION OF INFORMATION

### a. Current and Past Uses

Past uses of the Site property are inferred from historical aerial photographs, chain of title and previous reports.

Year	Use of Site property
Patent to 1984	Rural/agricultural
1985 to 1997	Vacant
1997 to present	Commercial

The current use of the Site property as a parking lot poses a low environmental risk of sub-surface contamination. The past use of the Site property as agricultural/residential also poses a low risk of sub-surface contamination.

**b. Potential Contaminating Activity**

No potential contaminating activity as described in Table 2 of Ontario Regulation 153/04 are present on the Site property.

**c. Areas of Potential Environmental Concern**

No areas of potential environmental contaminating activities described in Table 2 of Ontario Regulation 153/04 are present on the adjoining properties located within a 250 m radius of the Site. A report from 1996 prepared by the Ministry of Transportation summarized a subsurface investigation on the property located at 585 West Hunt Club Road. At the time, this work also included the Site property. Twenty-two test pits (TP 1 to TP 22) were dug, and soil samples were collected from selected test pit locations (TP1, TP 2, TP 3, TP 4, TP 11 and TP 12) for metal analysis. The test results were compared to the standards used in 1996. St. Lawrence Testing compared the available results with the standards listed in Ontario Regulation 153/04, Table 3 for a commercial property with coarse soil and non-potable groundwater and found that they satisfied these standards.

**d. Phase 1 Conceptual Site Model**

- i. A survey (R-Plan) of the Site property is attached (Figure 1).
- ii. The location of the Site property is attached (Figures 2 & 3). No structures are found on the Site property. Lancelot Drive is located along the west side of the Site property.
- iii. The Site property dimension is attached (Figure 4).
- iv. No water bodies are located within a 250 m radius of the Site property. A groundwater flow diagram is attached (Figure 5).
- v. There are no areas of natural significance within a 250 m radius of the Site property.
- vi. There are no drinking water supply wells located within a 250 m radius of the Site property. Potable water is available to be serviced to the Site property from the City of Ottawa. An email response with a diagram from the City of Ottawa is found in Appendix M.
- vii. The Site property has private roadways located along the north and east sides. These belong to the Nepean Crossroads Centre.
- viii. The use of the adjoining and neighbouring properties is shown in the attached (Figure 6).
- ix. A topographic map is included with the Physical Settings Report (Appendix K).

- x. No potentially contaminating activities were identified within a 250 radius of the Site property.
- xi. No APEC were identified within a 250 m radius of the Site property.
- xii. The presence of underground utilities has a low environmental risk for the distribution and transport of contaminates onto or through the Site property.

The Site property is approximately 88.2 m above sea level with a general slope direction to the south southeast.

The bedrock is composed of limestone, dolostone and sandstone of the Beekmantown Group of the Ordovician period.

The Site property is found to be approximately 88.2 m above sea level with a general slope direction to the southeast. The bedrock is composed of Ordovician period limestone, dolostone and sandstone of the Beekmantown Group. The glacial deposits are composed of undifferentiated silty sandy till on Paleozoic terrain having low to medium permeability. The soil characterization for the Site property was not provided in the Physical Settings report; however, the soil to the west of Lancelot Drive is described as a silty clay with poor drainage and has a high run-off potential.

A geotechnical investigation conducted on the Site property in March 2025 indicated that the surface is covered with 50 mm of asphalt. Below the asphalt is gravel fill that extends between 0.48 to 0.53 m. Below the gravel is a brown, moist, compact silty sand. With depth the brown becomes grey brown, generally around 1.5 m and grey, generally around 2.3 m. The moisture becomes very moist generally between 1.8 m to 2.3 m. The silty sand was noted to be wet between 2.3 m to 3.0 m at Boreholes 2, 3 and 4. The ground water was noted at 2.3 m at Boreholes 2 and 3 and at 3.0 m at Boreholes 1 and 4. Bedrock was encountered at a depth of 3.28 m at Borehole 2 and 2.44 m at Borehole 3.

The inferred groundwater flow will be towards the southeast in accordance with the general slope direction of the area. According to the Ottawa Watershed diagram provided by Esri Community Maps the groundwater flow travels east and towards the Nepean Creek located approximately 380 m northeast of the Site property.

## 7. Conclusions

St. Lawrence Testing has determined the following from the information and Site assessment observations obtained:

- The Site property has operated as a commercial property since 1997. Prior to this the Site property operated as a farm then became vacant.
- The exterior grounds were covered with snow and could not be assessed accurately during the Site visit in February 2025.
- A second visit to the Site property was conducted on May 13, 2025 after the snow had melted. This visit found no mounds of soil or areas of fuel spillage anywhere on the Site property.
- A geotechnical investigation was conducted on the Site property in March 2025 that included the drilling of 4 boreholes within the Site property boundaries. The work indicated that the surface is covered with 50 mm of asphalt. Below the asphalt is gravel fill that extends between 0.48 to 0.53 m. Below the gravel is a brown, moist, compact silty sand. With depth the brown becomes grey brown, generally around 1.5 m and grey, generally around 2.3 m. The moisture becomes very moist generally between 1.8 m to 2.3 m. The silty sand was noted to be wet between 2.3 m to 3.0 m at Boreholes 2, 3 and 4. The ground water was noted at 2.3 m at Boreholes 2 and 3 and at 3.0 m at Boreholes 1 and 4. Bedrock was encountered at a depth of 3.28 m at Borehole 2 and 2.44 m at Borehole 3.
- A third visit to the Site property found no visual evidence of any above or below ground fuel storage tanks on the Site property or at the adjoining properties. No groundwater monitoring wells were identified on the Site property. The MOECP Well Records website shows no wells on the Site property. The Water Well Information System database indicated there is a domestic water supply well located approximately 153 m northeast along with an abandoned monitoring well located approximately 165 m south southwest.
- The City of Ottawa Planning Department issued a Historical Land Use Inventory report centered around the Site property. The City of Ottawa had no environmental records concerning the Site.
- A FOI response was received from the MOECP. The reply indicated that some of the information available was severed or withheld. A public report on corporate ownership was available along with a Municipal and Private Sewage works report prepared in 1998 for Mobius Development Ltd. St. Lawrence Testing is of the opinion that these reports would not contain any pertinent information of environmental issues for the Site property.
- The adjoining and neighbouring properties pose a low environmental risk of subsurface contamination to the Site property. No above ground fuel tanks were observed on these properties. The storage of lumber along with bags of clean soil observed on the neighbouring properties located to the west and north pose a low environmental risk to the Site property.

On the basis of the programme conducted, St. Lawrence Testing determined that there are no areas of potential environmental concern associated with the Site property. The Site property has operated as a private parking lot for over 25 years. Before that, the Site property was part of a larger residential/agricultural property. Previous soil analysis carried out in 1996 indicating that the soil contaminates satisfied the MOE requirements of the time. Further comparison of the data was done with the current Ontario Regulation 153/04 Table 3 soil standards for a commercial property with coarse soil and non-potable groundwater. St. Lawrence Testing concludes that no further environmental work necessary.

## **8. STANDARD LIMITATIONS**

The environmental investigation was carried out to address the intent of applicable provincial guidelines. Achieving the objectives stated in the report has required us to arrive at conclusions based upon the best information presently known to us. No investigative method can completely eliminate the possibility of obtaining partially imprecise or incomplete information; it can only reduce the possibility to an acceptable level. Professional judgment was exercised in gathering and analyzing the information obtained and in the formulation of the conclusions. Like all professional persons rendering advice we do not act as absolute insurers of the conclusions we reach, but we commit ourselves to care and competence in reaching those conclusions.

Our undertaking is to perform our work within the limits prescribed by our clients, with the usual thoroughness and competence of the engineering profession. It is intended that the outcome of this investigation assists in reducing the client's risks associated with environmental impairment; our work should not be considered "risk mitigation". No other warranty expressed or implied, is included or intended in this report.

The information presented in this report is based on a limited investigation designed to provide information to support an overall assessment of the current environmental conditions in the building on the subject property. The conclusions and recommendations presented in this report reflect existing site conditions within the scope of our investigation.

This report was prepared for the exclusive use of Halo Car Wash as per the agreement and terms of reference between Halo Car Wash and St. Lawrence Testing & Inspection Co. Ltd. Any use and interpretation of this report by any other party is entirely at their own risk.

St. Lawrence Testing  
& Inspection Co. Ltd.

Dear Gib McIntee,

**Re: Information Request  
Pin # 04629-0906 Ottawa, Ontario ("Subject Property")**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City's Environmental Remediation Unit (ERU) does not have any environmental records for this property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website:  
<https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** No records found for this property.
- **Solid Waste Services:** No records found for this property.

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('ADDRESS – HLUI Summary report.xlsx'), please refer to the [Overview and User Guide.](#)

**Additional information may be obtained by contacting:**

**Ontario's Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

**The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Ottawa Public Health**

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

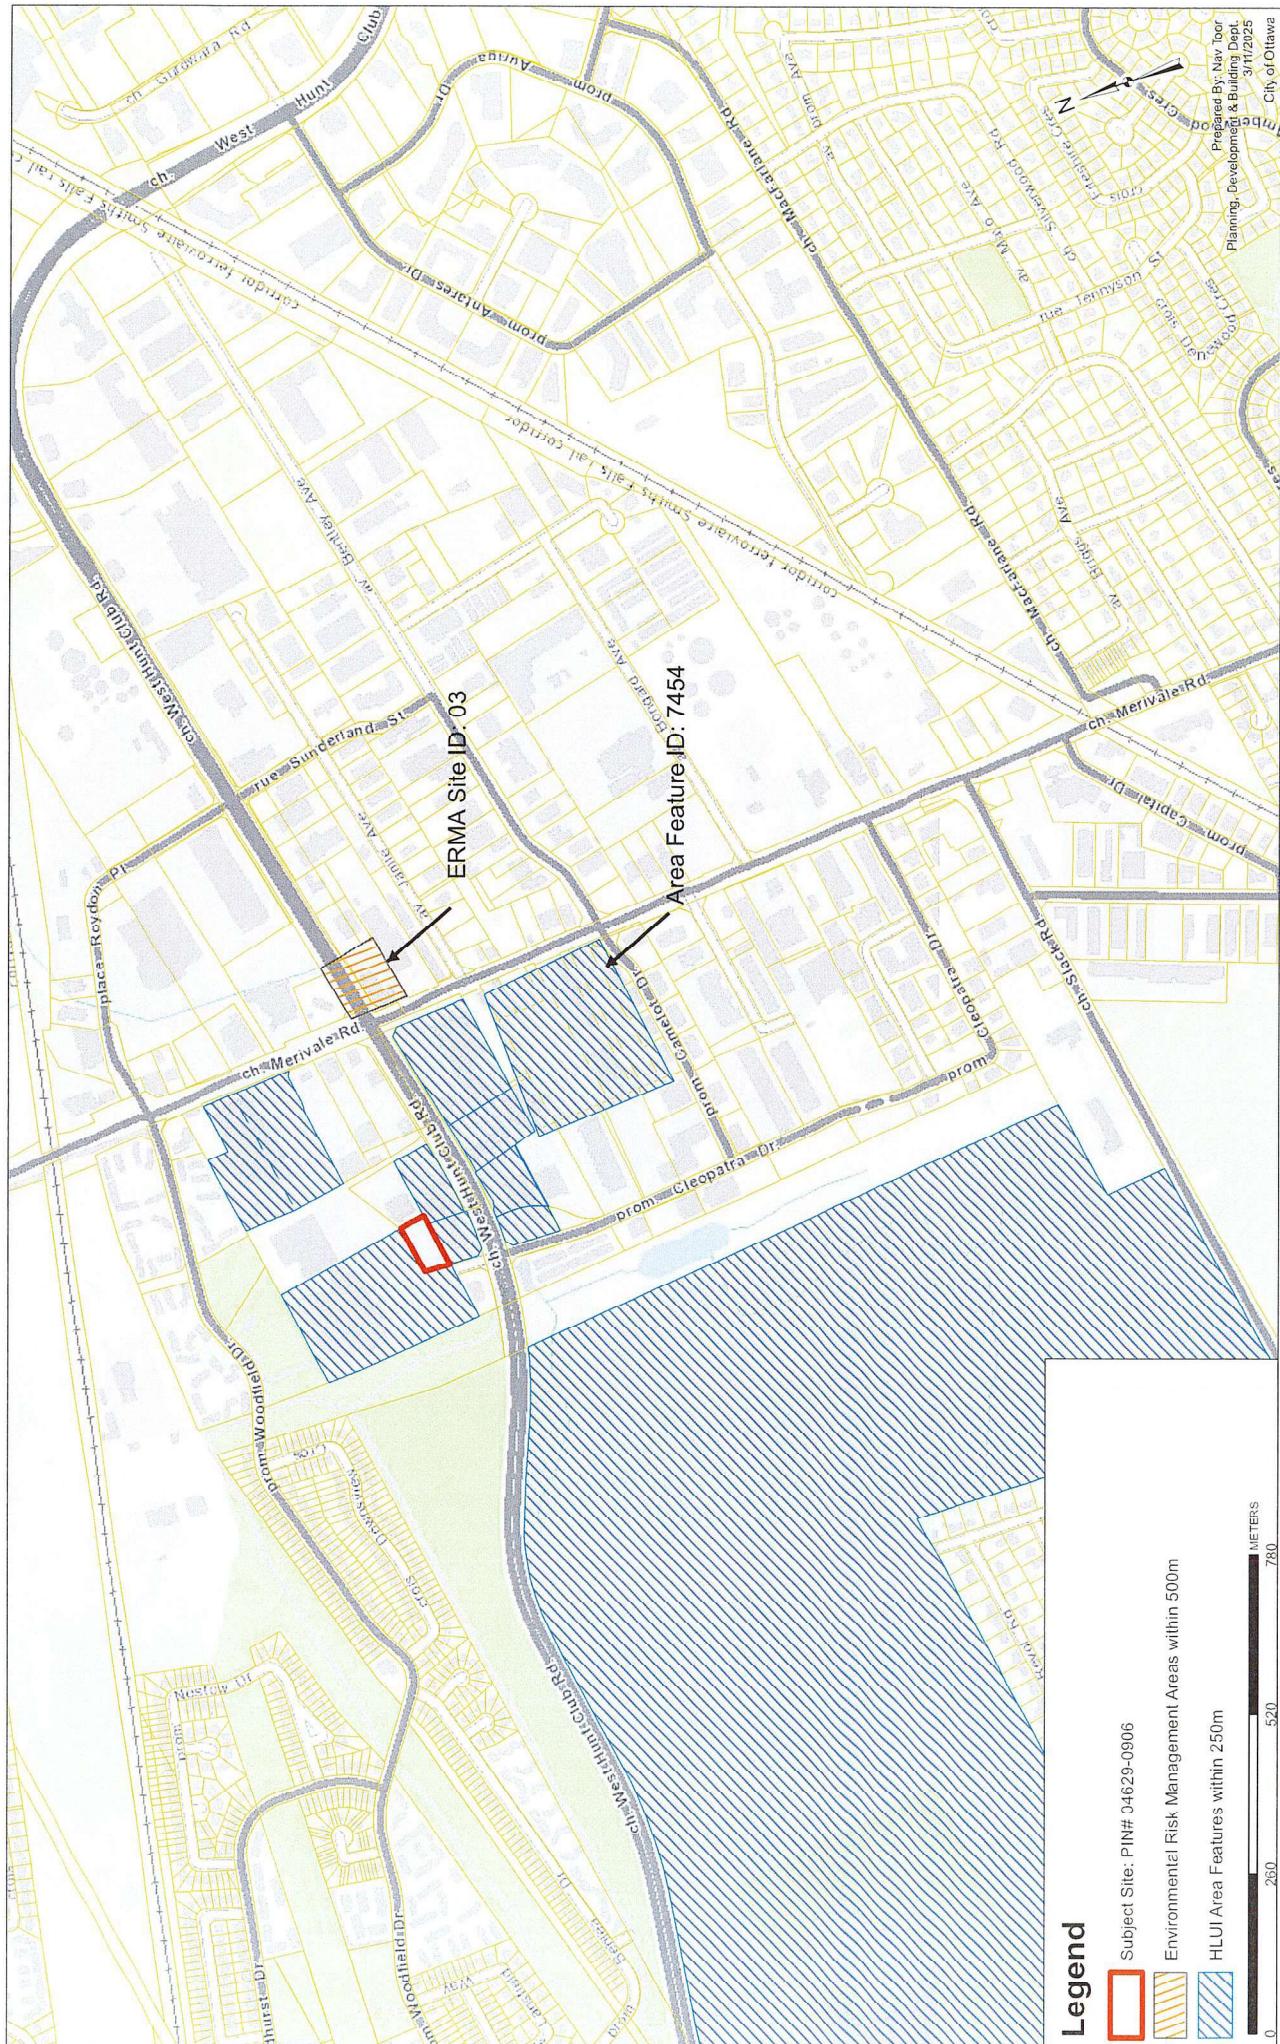

**Harnav Toor**

### Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

### Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

### Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

### Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

### Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## TERMS OF EASEMENT

The Transferor transfers to the Hydro-Electric Commission of the City of Nepean the free uninterrupted and unobstructed right and easement in perpetuity upon, over, under, along and across the land described in Box 5 on Page 1 for the following purposes:

1. To enter on and construct, repair, replace, operate and maintain lines of electricity including all necessary poles, wires, cables (both buried and aerial), markers, fixtures and equipment and all appurtenants thereto as the Commission may, from time to time, or at any time hereafter deem requisite upon, over, under, along and across the lands described in Box 5 on Page 1 for the purpose of furnishing electrical service to the premises of its customers from time to time on the lands described in Box 5 on Page 1, the adjoining lands and the lands in the vicinity of the lands described in Box 5 on Page 1.
2. Together with the right of free and unimpeded access to the Commission of its servants, agents, employees, independent contractors and workmen, together with the vehicles, supplies and equipment at all times and for all purposes necessary for or incidental to the exercise and enjoyment of the rights hereby transferred on and over the lands described in Box 5 on Page 1 and the lands of the Transferor adjacent thereto which may, from time to time, be unencumbered by other buildings or other structures from the highways or lands abutting thereon to and from the premises where any of the said lines of electricity and fixtures or any part or parts thereof are to be constructed, repaired, replaced, operated and maintained.
3. To trim, fell and remove any trees and brush along the said lands so as to keep the wires and cables clear by at least four (4') feet.
4. To erect and set the necessary guys and brace poles and anchors on the said lands described in Box 5 on Page 1 and to attach thereto the necessary guy wires.
5. To attach other wires, cables and accessories and permit the attachment of wires, cables and accessories of any other company or corporation for the purpose of only supplying a public utility service to the various owners, from time to time, of the lands described in Box 5 on Page 1 and adjoining lands.

The rights and easements herein set forth are transferred to the Commission on the condition that the Commission shall be responsible to the Transferor for any damage caused by it or its workmen, servants, agents or employees to the lands described in Box 5 on Page 1 and the adjoining lands and that the Commission shall replace as far as possible at its own expense any soil or turf removed in connection with any of its work herein referred to.

## TERMS OF EASEMENT (cont'd)

The Transferor covenants, promises and agrees not to erect on the lands described in Box 5 on Page 1 any buildings, structures, or other obstructions of any nature whatever, except property line fences, and further covenants, promises and agrees not to excavate, plant trees or change the grade of lands described in Box 5 on Page 1 and the lands where the underground cables are located without the prior written consent of the Commission.

In the event that the whole or any part of the lands described in Schedule "A" is subject to a Charge or Mortgage, the Owner shall obtain from each Chargee or Mortgagee an executed Postponement of such Charge or Mortgage in a registerable form such that each such Chargee or Mortgagee shall postpone its interest in the lands described in Schedule "A" to the interest of The Hydro-Electric Commission of the City of Nepean to the extent that this Agreement shall take effect and have priority as if it had been executed and registered before the execution and registration of the document or documents giving to the Mortgagee its interest in the lands described in Schedule "A".

THIS TRANSFER OF EASEMENT and everything herein contained shall enure to the benefit of and be binding upon the parties hereto and their respective heirs, executors, administrators, successors and assigns.

CANADA ) IN THE MATTER OF granting  
 )  
PROVINCE OF ONTARIO ) of an easement over Parts of Plan 4R-13973  
 )  
 )  
TO WIT: ) and in the matter of The Planning Act, R.S.O. 1990  
 ) Section 50(5)(c)  
 )

I, James R. McIninch, of the City of Ottawa in the Regional Municipality of Ottawa-Carleton  
DO SOLEMNLY DECLARE:

1. I am the solicitor for THE HYDRO-ELECTRIC COMMISSION OF THE CITY OF NEPEAN and as such have knowledge of the matters hereinafter declared.
  
2. The easement being acquired by the attached instrument is being acquired for the purpose of the construction of a utility line that supplies a service to the public.

And I make this solemn Declaration conscientiously believing it to be true, and knowing that it is of the same force and effect as if made under oath and by virtue of the Canada Evidence Act.

DECLARED before me at the  
City of Ottawa, in the Regional Municipality  
of Ottawa-Carleton this 27th day of

January, 1998.99

Janet Morehouse

At Commissioner, etc.

**Janet Adella Morehouse,  
A Commissioner, etc.,  
Regional Municipality of  
Ottawa-Carleton, for  
Bell, Baker, Barristers & Solicitors.  
Expires September 15, 2001.**

Form 5 -- Land Registration Reform Act, 1984

DYE & DURHAM CO. LIMITED  
Form No. 680

S

Page 2

Additional Property Identifier(s) and/or Other Information

All and singular that certain parcel or tract of land and premises situate, lying and being in the City of Nepean (formerly the Township of Nepean), in the Regional Municipality of Ottawa-Carleton, and being composed of part of Lot 28, Concession 1, Rideau Front, now designated as Parts 1, 2, 3 and 4 on a plan of survey of record in the Land Registry Office for the Land Titles Division No. 4 at Ottawa as Number 4R-15594.

THE CORPORATION OF THE CITY OF NEPEAN

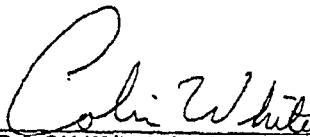

PLANNING ACT

CERTIFICATE OF THE ACTING SECRETARY-TREASURER

B 17/99

Under Subsection 53(42) of the Planning Act, R.S.O. 1990, c.P. 13, I certify that the consent of the Committee of Adjustment of the City of Nepean was given on June 15, 1999 to a conveyance of the above described land.

DATED this 24<sup>th</sup> day of  
August, 2000.

Colin S.V. White  
Colin S.V. White, Acting, Secretary-Treasurer

FOR OFFICE  
USE ONLY

10178 (12/84)

Affidavit of Residence and of Value of the Consideration  
Form 1 - Land Transfer Tax ActRefer to all instructions on reverse side.  
IN THE MATTER OF THE CONVEYANCE OF (insert brief description of land) Part of Lot 28, Concession 1, designated as Part 1.  
2, 3 and 4 on Plan 4R-15594City of Nepean, Regional Municipality of Ottawa-Carleton  
BY (print names of all transferors in full) 9051-5040 Quebec Inc.

TO (see instruction 1 and print names of all transferees in full) 1427163 Ontario Inc.

1. (see instruction 2 and print name(s) in full) Michael S. Polowin

## MAKE OATH AND SAY THAT:

1. I am (place a clear mark within the square opposite that one of the following paragraphs that describes the capacity of the deponent(s)): (see instruction 2)

(a) A person in trust for whom the land conveyed in the above-described conveyance is being conveyed;  
 (b) A trustee named in the above-described conveyance to whom the land is being conveyed;  
 (c) A transferee named in the above-described conveyance;  
 (d) The authorized agent or solicitor acting in this transaction for (insert name(s) or principal(s)) 1427163 Ontario Inc.

(e) The President, Vice-President, Manager, Secretary, Director or Treasurer authorized to act for (insert name(s) of corporation(s))

(f) A transferee described in paragraph ( ) (insert any one of paragraph (a), (b) or (c) above, as applicable) and am making this affidavit on my own behalf and on behalf of (insert name of spouse) \_\_\_\_\_, who is my spouse described in paragraph ( ) (insert only one of paragraph (a), (b) or (c) above, as applicable) and as such, I have personal knowledge of the facts herein deposed to.

2. (To be completed where the value of the consideration for the conveyance exceeds \$400,000).  
I have read and considered the definition of "single family residence" set out in clause 1(1)(a) of the Act. The land conveyed in the above-described conveyance contains at least one and not more than two single family residences. Note: Clause 2(1)(d) imposes an additional tax at the rate of one-half of one per cent upon the value of consideration in excess of \$400,000 when the conveyance contains at least one and not more than two single family residences.

does not contain a single family residence.  
 contains more than two single family residences. (see instruction 3)

3. I have read and considered the definitions of "non-resident corporation" and "non-resident person" set out respectively in clauses 1(1)(f) and (g) of the Act and each of the following persons to whom or in trust for whom the land is being conveyed in the above-described conveyance is a "non-resident corporation" or a "non-resident person" as set out in the Act. (see instructions 4 and 5) **NOTE**

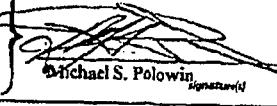

4. THE TOTAL CONSIDERATION FOR THIS TRANSACTION IS ALLOCATED AS FOLLOWS:

(a) Monies paid or to be paid in cash	..... \$ 353,988.76
(b) Mortgages (i) Assumed (show principal and interest to be credited against purchase price)	..... \$ Nil
(ii) Given back to vendor	..... \$ Nil
(c) Property transferred in exchange (detail below)	..... \$ Nil
(d) Securities transferred to the value of (detail below)	..... \$ Nil
(e) Liens, legacies, annuities and maintenance charges to which transfer is subject	..... \$ Nil
(f) Other valuable consideration subject to land transfer tax (detail below)	..... \$ Nil
(g) <b>VALUE OF LAND, BUILDING, FIXTURES AND GOODWILL SUBJECT TO LAND TRANSFER TAX (Total of (a) to (f))</b>	..... \$ 353,988.76
(h) <b>VALUE OF ALL CHATTELS - Items of tangible personal property (Retail Sales Tax is payable on the value of all chattels unless exempt under the provisions of the "Retail Sales Tax Act", R.S.O. 1990, c.54A, as amended)</b>	..... \$ Nil
(i) Other consideration for transaction not included in (g) or (h) above	..... \$ Nil
<b>(j) TOTAL CONSIDERATION</b>	..... \$ 353,988.76

5. If consideration is nominal, describe relationship between transferor and transferee and state purpose of conveyance. (see instruction 4)  
n/a

6. If the consideration is nominal, is the land subject to any encumbrance? **n/a**

7. Other remarks and explanations, if necessary.  
n/a

Sworn before me at the City of Ottawa  
in the Regional Municipality of Ottawa-Carleton  
this 30 day of September 2000  
   
Diane Theresa Seabrook, a Commissioner, etc.  
Regional Municipality of Ottawa-Carleton, for  
McCarthy Tétrault, Barristers and Solicitors.  
Expires October 31, 2000.

A Commissioner for taking Affidavits, etc.

Dated this 16 day of November, 2016

## SCHEDULE

**WHEREAS** the Transferee is the owner in fee simple of those lands and premises (the "Transferee's lands") being composed of Parts of Town Lots 5 and 6 on the North side of Adelaide Street West according to the Plan of the Town of York and designated as Parts 1 and 2, Plan 63R-545, City of Toronto.

**WHEREAS** the Transferor is the owner in fee simple of lands described as Part of Lot 28, Concession 1, Rideau Front, Nepean designated as Parts 1, 2, 3 and 4 on Plan 4R-15594, City of Ottawa (the "Property").

**THE TRANSFEROR** grants and transfers to the Transferee, its successors and assigns to be used and enjoyed as appurtenant to the Transferee's lands, a free and unencumbered easement (the "Easement") in perpetuity upon, over, in, under and across lands more particularly described on Page 1 attached (the "Easement Lands"):

1. the right to construct, operate, maintain, repair, replace, renew, or make additions at all times to telecommunications facilities (the "Facilities") or any part thereof forming part of continuous lines between the Transferee's lands and other lands including, without limitation, all necessary buried cable and wires, conduits, conduit structures, markers, maintenance holes, fixtures, equipment, and all appurtenances thereto.
2. the right of free and unimpeded access at all times to the Transferee, its contractors, agents, employees, vehicles, equipment, and supplies to and over the Easement Lands.
3. the right of free and unimpeded access at all times to the Easement Lands from and over the Property or abutting road allowances or abutting rights of way for the purpose of exercising the rights hereby granted.
4. the right to remove, trim, sever, or fell any obstructions such as trees, roots, brush, stumps, boulders or rock encountered during the course of construction or subsequent maintenance of the Facilities.

**THE TRANSFEROR** shall have the right to fully use and enjoy the Easement Lands provided that without the prior written consent of the Transferee, such consent not to be unreasonably withheld, the Transferor shall not place any buildings or other structures or dig, drill, pave or excavate within the Easement Lands.

**THE TRANSFeree** shall:

1. be responsible for any damage caused at any time by its agents or employees to the Property. When practical, the Transferee, after any of its activities, shall restore the Property appropriately. The subsequent maintenance of the Property shall be the responsibility of the Transferor.
2. indemnify and save the Transferor harmless from all actions, causes of actions, suits, claims and demands of every nature and kind whatsoever which may be made against the Transferor relating to or arising out of the placement of the Facilities by the Transferee and for which the Transferee, in law, is responsible.
3. prior to the exercise of its rights hereby granted, obtain approval of the Transferor to the location of Facilities, which approval shall not be unreasonably withheld, and which approval shall be granted by the Transferor's execution of the Transferee's construction plans, or other documentation evidencing the location of the Facilities.

**THE TRANSFEROR AND TRANSFeree** acknowledge and agree that the Transferor may request, in writing, that the Transferee relocate the Facilities at the sole expense of the Transferor. If such relocation can be accommodated by the Transferee, the relocation of the Facilities shall be to a location satisfactory to the Transferee, acting reasonably. The Transferor shall provide a new easement to facilitate the relocated Facilities, and, if required, facilitate the acquisition of any required additional easements on third party lands. The Transferee agrees to act reasonably when evaluating a relocation request. The Transferor shall reimburse the Transferee for all costs incurred by the Transferee with respect to such relocation, including, without limitation, survey costs, engineering costs, legal costs, municipal approval and permit fees, easement acquisitions including any consideration to be paid (if required) and the Transferee's reasonable labour and material costs.

**NOTWITHSTANDING** any rule of law or equity and even though any of the Facilities may become annexed or affixed to the Easement Lands, title to the Facilities shall nevertheless remain in the Transferee.

**THIS AGREEMENT** including all rights, privileges, and benefits herein contained shall extend to, be binding upon, and enure to the benefit of, the parties hereto and their respective heirs, executors, administrators, successors, and assigns.

**THE TRANSFeree**, in the event it grants a release of Easement, may abandon the Facilities annexed/affixed to the Easement Lands at its option.

## **INTEREST/ESTATE TRANSFERRED**

(1) The Transferors hereby transfer, sell, grant and convey in perpetuity to the Transferee its successors and assigns, a free and unencumbered (except as the records of the land registry office disclose) easement in, over, upon, under and/or through the lands described herein, hereafter referred to as the Easement Lands, to survey, lay, construct, install, operate, use, inspect, remove, renew, replace, alter, enlarge, reconstruct, repair, expand and maintain pipelines and all works, appurtenances, attachments, apparatus, appliances, markers, fixtures and equipment (hereinafter collectively referred to as "Works") which the Transferee may deem necessary or convenient thereto. This transfer of easement shall include the right of the Transferee, its successors, assigns, servants and agents to use the surface of the Easement Lands for ingress and egress on foot and/or with vehicles, supplies, machinery and equipment at any time and from time to time.

(2) The Transferee shall have the right at any time and from time to time to remove any boulder or rock and to sever, fell, remove or control the growth of any roots, trees, stumps, brush or other vegetation on or under the Easement Lands.

(3) The rights of the Transferee herein shall be of the same force and effect as a covenant running with the Easement Lands and shall be appurtenant to the lands and premises described in this Schedule as the Transferee's Lands.

(4) The Transferee shall have the right to assign or transfer its rights hereunder in whole or in part to another gas company and shall not be obligated to give any other party hereto notice of the same.

(5) This Transfer shall extend to, be binding upon and enure to the benefit of the estate trustees, successors and assigns of the parties hereto. If the Transferors are not the sole owners of the said lands, this Transfer shall bind the Transferors to the full extent of their interest therein and shall also extend to any after-acquired interest but all monies payable or paid to the Transferors hereunder shall be paid to the Transferors only in the proportion that their interest in the said lands bears to the entire interest therein. The Transferors hereby agree that all provisions herein are reasonable and valid and if any provision herein is determined to be unenforceable, in whole or in part, it shall be severable from all other provisions and shall not affect or impair the validity of all other provisions.

(6) The Transferors shall have the right to use and enjoy the surface of the Easement Lands except that such use and enjoyment shall not interfere with the rights of the Transferee hereunder. Without limiting the generality of the foregoing, the Transferors shall not, without the prior written consent of the Transferee, place or erect on the Easement Lands any building, structure or fence and shall not excavate, alter the grading, drill, install thereon any pit, well, foundation and/or pavement which will obstruct or prevent the exercise and enjoyment by the Transferee of its rights hereunder.

(7) The Transferors and Transferee acknowledge and agree that the Transferor may request, in writing, that the Transferee relocate the Works at the sole expense of the Transferors. The relocation of the Works shall be to a location satisfactory to the Transferee, acting reasonably. The Transferors shall provide a new easement to facilitate the relocated Works, and, if required, facilitate the acquisition of any required additional easements on third party lands. The Transferee agrees to act reasonably when evaluating a relocation request. The Transferors shall reimburse the Transferee for all costs incurred by the Transferor with respect to such relocation, including, without limitation, survey costs, engineering costs, municipal approval and permit fees, easement acquisitions (if required) and the Transferee's reasonable labour and material costs.

(8) Notwithstanding any rule of law or equity, any Works constructed by the Transferee shall be deemed to be the property of the Transferee even though the same may have become annexed or affixed to the Easement Lands.

(9) The Transferee shall at its own expense as soon as reasonably possible after the construction of any Works or other exercise of its rights hereunder, remove all surplus sub-soil and debris from the Easement Lands and restore them to their former state so far as is reasonably practicable.

Dear Sir:

Re:      Property Sale K-02004  
Environmental Investigation  
Lots 28 & 29, Con. 1, Nepean  
Hunt Club @ Merivale

---

Further to our ongoing meetings and site investigations on the above subject, please find attached reports completed by our Environmental and Remote Sensing Sections for your perusal.

The reports outline the Ministry's research into this subject and document our findings. Mr. Moore's report is a chronological review of the subject property through aerial photography since the year 1953. Mr. McRae's report is summation of the environmental investigation completed on the subject property as result of Mr. Moore's findings and our mutual field inspection.

You will note that several loads of non-hazardous solid waste materials together with a large fuel storage tank were removed from the subject and that the investigation was carried out in the accompaniment of your geotechnical advisers. In addition, tests for metal parameters from the fill material indicate that they fall well within the guideline levels for the " Clean-up of Contaminated Sites in Ontario".

In conclusion, it our opinion that the Ministry has made reasonable efforts to identify and analyze the fill material on our site. We are satisfied that potential environmental concerns have been addressed and that the fill and native soils can be considered reasonably clean.

Trusting that these efforts will address and satisfy your concerns in order that we may conclude the agreement between MTO and Melron, I remain

Yours very truly,

W.J. McCoppen  
Real Estate Officer

Re: File PSK-02004, Merivale at Hunt Club  
Nepean

This property was analyzed using Remote Sensing methods. In our study we used numerous different years of aerial photography. Each photo was interpreted to show farm activities, buildings and their locations, fill and digging areas, and any other features or activities that could be identified.

Enclosed is the brief analysis of each photo.

RE: **File K-02004, Merivale Rd. Near Hunt Club Rd., City of Nepean - Environmental Inspection Report,**

*cc XAN/JT  
D. SILVA*

At the request of the Property Section the above noted property has been reviewed by the Environmental Unit. The review was carried out to identify environmental concerns associated with the sale of the property. The information provided in this report was obtained through inspection and investigation of the property and information passed along by MTO's Remote Sensing Section.

## Background

The property is located on Lot 28 & 29, Concession I, in the City of Nepean. It is bordered, generally, by Merivale Road to the east, West Hunt Club Road to the south, an Ontario Hydro Right-of-Way to the west, and residential/parkland property to the north. There is a scrap metal dealer abutting the north-east corner of the property, and commercial sites abutting the south-east and south-west corners of the property.

According to aerial-photography, the land was part of a farm operation in the 1950's. Photos suggest that it has not been actively farmed since approximately 1975, and saw limited activity as far back as 1964. The farm buildings and dwelling were removed by 1984, and the property appears to have been unoccupied since then.

## Site Observations

The property was reviewed by means of a walk-through inspection on May 7, 1996, in the company of Mr. J. McCoppen and Terry Sullivan of MTO, Mr. H.W. Cuff of Melron Enterprises, and Mr. C. Da Silva of John D. Patterson and Associates, representing Melron Enterprises. The following was observed:

*M-A  
X*

- the south-west quadrant of the site was found to be littered with scrap metal and piles of fill material, all of which appeared to have been imported onto the site - the soil piles appeared to each be the equivalent of a dump truck load;
- the location of the former dwelling was quite evident by the presence of mounded earth in this area;
- to the west of the dwelling site was an abandoned furnace oil tank, and nearby was a 7-cm steel pipe protruding from the ground with an easy-coupler end on it, having the appearance of a tank's fill-pipe;
- several loads of brick and two-three loads of asphalt were located in an area south-east of the dwelling site where the property abuts a former commercial property (previous brick operation) - it appeared to have been pushed out onto the subject property at the time of demolition activities on that site.

The remainder of the site had the appearance of vacant farmland which had been left to return to a wild state: numerous tree growth has taken place throughout.

Based on the findings of this inspection it was decided that test-pitting should be carried out in representative areas where fill material has been placed, to ascertain the characteristics of the materials. Also, that test pits would be placed in areas where potential for impacts were most obvious.

#### **Site Investigation (May 13, 1996)**

An investigation was initiated on May 13, 1996. Besides the writer and the contractor, occasional visits were made to the site by C. Deschamps of John D. Paterson & Associates, on behalf of Melron Enterprises. Test pits were dug, using a backhoe, in some of the fill piles. The locations chosen were determined to reasonably represent the various clusters of fill present. A total of eleven test pits were excavated to allow for a visual assessment and some sampling (TP - 1a, 1b, 1c, 2a, 2b, 3a, 3b, 3c, 3d, 4, 8).

Eleven additional test pit excavations were carried out this day: one open-field test pit (TP-5); one in the vicinity of the previously identified steel filler-pipe (TP-6); one in the centre of the house ruins (TP-7); five along the perimeter fence of the scrap metal yard bounding the north-east corner of the property (TP -9, 10, 10-a, 11, 12, 13); one in the area beneath an abandoned furnace oil tank (TP-14); and one in an area where pieces of asphalt were found on the ground surface (TP-15). **(See attached sketch for test pit locations.)**

Composite soil samples were collected from four of the test pits, representing the various clusters of imported fill (TP-1b, TP-2a, TP-3b, TP-4), and composite soil samples were collected from two of the test pits placed adjacent to the scrap metal

operation (TP-11 & 12). The samples were screened for soil characteristics as they relate to land-use criteria defined in the "Proposed Guidelines for the Clean-up of Contaminated Sites in Ontario", July 1994: the parameters tested represent the standard metal groups used to identify levels of soil contamination.

The following table represents the visual observations made during the May 13, 1996 investigations. Sample results for the various metals examined are also attached.

Table-1

ID	TEST PIT SOIL CHARACTERISTICS (May 13, 1996)
TP-1a	dark brown silty clay fill to 1.0-metre depth, no visual evidence of contamination, no suspect odour.
TP-1b	dark brown silty clay fill to 1.1-metre depth, no visual evidence of contamination, no suspect odour ( <b>sample taken</b> ).
TP-1c	dark brown silty clay fill to 1.5-metre depth, water table at 1.6-metre depth, no visual evidence of contamination, no suspect odour.
TP-2a	sandy fill to 1.45-metre depth, no visual evidence of contamination, no suspect odour ( <b>sample taken</b> ).
TP-2b	silty sand fill to 0.8-metre depth plus silty clay fill to 1.6-metre depth, no visual evidence of contamination, no suspect odour.
TP-3a	dark brown clay fill to 1.0-metre depth, no visual evidence of contamination, no suspect odour.
TP-3b	grey-brown silty sand fill with some clay to 1.2-metre depth, no visual evidence of contamination, no suspect odour ( <b>sample taken</b> ).
TP-3c	fine brown sandy fill to 1.0-metre depth, no visual evidence of contamination, no suspect odour.
TP-3d	light brown sandy fill to 1.5-metre depth, no visual evidence of contamination, no suspect odour.
TP-4	grey-brown silty sand and gravel to 0.3-metre depth, evidence of a small quantity of waste wood, metal, plastic, glass and asphalt shingles mixed in with soil fill, a tar-like odour was detectable ( <b>sample taken</b> ).
TP-5	sand overburden with 25-centimetre depth of grey clay on top (may be a fill material spread out), one plastic lid from a 20-litre plastic container was found in the surface soil, no suspect odour.

TP-6	steel underground storage tank (2.1-metre diameter X 5.5-metre length) with a 7-centimetre standpipe in one end and an open threaded-orifice in the centre, no visual evidence of contamination in the area, the interior of the tank smelled of weathered diesel fuel - approximately 5-centimetres of residue remained in the tank.
TP-7	pieces of brick, rock, concrete, and steel roofing were observed (typical of building demolition materials and likely from the previous dwelling located there).
TP-8	grey clay soil mixed with building bricks to a 1.5-metre depth, no visual evidence of contamination, no suspect odour.
TP-9	native fine sand soil extending beyond the 1-metre trench depth, no visual evidence of contamination, no suspect odour (trench length approximately 3.6-metres).
TP-10	native fine sand soil extending beyond the 1-metre trench depth, no visual evidence of contamination, no suspect odour (trench length approximately 2.4-metres).
TP-10a	native fine sand soil extending beyond the 25-centimetre excavation (abuts a small surface spill of tar-like material from the scrap yard property), no visual evidence of contamination, no suspect odour.
TP-11	native fine sand soil extending beyond the 1-metre trench depth, a small quantity of brick material and a piece of steel were found, no suspect odour.
TP-12	native fine sand soil extending beyond the 1-metre trench depth, no visual evidence of contamination, no suspect odour.
TP-13	native fine sand soil extending beyond the 1-metre trench depth, no visual evidence of contamination, no suspect odour.
TP-14	silty clay to 0.6-metre depth, miscellaneous non-hazardous solid waste materials from 0.6 to 2.7 metre depth (metal, glass, 1-drum, bike frame, asphalt shingles, carpet remnants....), no suspect odour, waste was encountered at 2.1-metre depth.
TP-15	clay with silt and gravel to 25-centimetre depth with sandy silt extending beyond 0.76-metre trench depth, no visual evidence of contamination even though pieces of asphalt were present on ground surface, no suspect odour.

### Site Investigation (cont'd) and Remedial Activity (May 23, 1996)

Following the identification of an under-ground fuel tank (TP-6) and the presents of buried waste materials (TP-14), and following a more extensive review of aerial-photography for the area, a further site investigation was carried out on May 23, 1996. Persons present at this time were: J. McCoppen, L. Lough and the writer representing MTO, plus the contractor; Marc Darcy of John D. Paterson and Associates representing Melron Enterprises, and a brief appearance by H. W. Cuff, of Melron Enterprises. The following account of findings and activities is offered.

- A 22,000 litre diesel fuel tank was removed, and hauled off-site, from the area identified as TP-6, and approximately 60-litres of residual diesel fuel were hauled away for disposal, as a liquid industrial waste (221L), via waste manifest number Z 86686-3 (attached). Although there was no evidence of soil contamination, soil was imported to fill the void left by the tank.
- Further excavation was carried out in the area of TP-14, to determine the extent of the waste material present. The water previously encountered at this location was no longer present, suggesting that it was not representative of the ground-water table but, rather, a perched water-table condition (the area was previously the site of a swimming pool which may have contributed to water being held in this area). It was decided that arrangements would be made to remove the waste materials to a waste disposal site.
- Based on the information gathered from aerial-photography, a test pit was placed north of the barn site area near a former out-building (TP-16), five more were placed north-west of the former barn site (TP's - 17, 18, 19, 20, 21): the aerial-photos revealed suspect excavation and deposition activities in these areas. Test-pits in the areas identified as TP-17&18, revealed the presents of non-hazardous solid waste materials (i.e., asphalt shingles, metal pieces, plastics, and cloth). A trench (TP-19) was dug in a north-south alignment through this general area (approximately 26 metres in length) to assess the extent of waste dumping; only native soils were found. A test pit (TP-21) was placed in an area where a stretch of asphalt had been laid down; only native soils were found. One further excavation was made (TP-22) in a mounded area south of the former barn site. The materials there proved to be typical of barn materials (i.e., concrete, steel roof-sheeting and wooden beams) and are believed to be material pushed out following the demolition of the barn. (To locate the test pits mentioned, see the attached sketch.)

### Site Remedial Activity (May 28, 1996)

The removal of non-hazardous solid waste materials, previously identified during test pit excavation activities, was carried out on this day by a local contractor under the supervision of L. Lough of MTO and the writer: five loads of waste material mixed with earth, with an average weight of 13 tonne, were removed from the area identified as TP-14, to an Approved waste disposal site at Carp. The five loads represented the extent of the waste materials found at this location.

Three loads of non-hazardous solid waste material mixed with soil were removed the following day from the test pit excavations previously identified as TP-17&18, under the supervision of Mr. L. Lough of MTO. Mr. Lough indicated that the three loads represented the extent of waste materials found in the two test pit areas.

### Discussion

Soil samples collected from representative excavations were, as mentioned, tested for metal parameters. The concentrations of metals were compared to maximum concentrations laid out in the Proposed Guideline for the Clean-up of Contaminated Sites in Ontario, 1994 (table "B:" - "surface soil and groundwater clean-up criteria for two land uses (residential/parkland and industrial/commercial) in a non-potable groundwater situation"). Non of the samples exceeded the criteria; the metal concentrations tested were well below the criteria maximum limits.

As previously explained, eight truck-loads of non-hazardous solid waste mixed with major quantities of soil were removed from excavations where wastes were found during excavation activities. Removal was initiated to allow for proper disposal of the identified waste materials.

The site continues to have scattered remnants of metal, asphalt, and brick materials; however, these items are not considered an environmental impact in the present context since they are on the surface and quite inert in characteristic. Waste dumping does not appear to be occurring at this point in time.

An exhaustive search of the property was not carried out. The activities as discussed here-in, however, are thought to be a reasonable attempt at identifying and addressing what seen as the most significant environmental concerns.

**RE: Property located at PT LT 28, CON 1, PIN 04629-0906, Nepean, ON  
Phase 1 Environmental Assessment  
Report No. 25C110**

Dear Mr. Lupovici:

In accordance with verbal and emailed instructions received from you, this report is submitted, outlining the results of a Phase 1 Environmental Site Assessment carried out for a commercial property located at Pt Lt 28, Con 1, with the property identification number (PIN) of 04629-0906 in Nepean, Ontario.

## **1.0 EXECUTIVE SUMMARY & INTRODUCTION**

A Phase 1 Environmental Site Assessment (ESA) was undertaken by St. Lawrence Testing & Inspection Co. Ltd. (St. Lawrence Testing) for a commercial property located PT LT 28, Con 1 with the PIN of 04629-0906 in Nepean, Ontario at your request.

St. Lawrence Testing was advised that the purpose of this Phase I ESA was to assess the potential issues of environmental concern related to the current and

past uses of the property along with any environmental concerns that may have resulted from adjoining and neighbouring properties.

This Phase I ESA was completed in general accordance with the Canadian Standards Association (CSA) document “Phase I Environmental Site Assessment, CSA Standard Z768-01”, November 2001 (reaffirmed 2016 with no changes). Subject to the limitations outlined in Section 8.0 of this report, the scope of work included:

- Site visits were performed that included a visual inspection of the property on February 10, 2025 and on May 13, 2025 after the snow had melted. Observations of the adjoining and neighbouring properties were carried out from the Phase 1 property boundaries and from publicly accessible areas.
- A request was submitted to the City of Ottawa Planning Department for Historical Land Use Inventory report.
- A records review of available documents pertaining to the property included an Environmental Risk Information Services (ERIS) report, historical aerial photographs, satellite images, well records, insurance records and fire insurance plans available.
- A telephone interview with Mr. H. William Cuff representing the current owner of the Phase 1 property (1427163 Ontario Inc. c/o Melron Property Enterprises Inc.) was attempted over 3 separate occasions.
- A title search was ordered to determine the Phase 1 property ownership from the Crown patent to the present owner.

- A summary of any environmental concerns and the evaluation of these concerns are finalized in this report; all subject to the limitations outlined in Section 8.0 of this report.

The Site property is located within the Nepean Crossroads Centre that operates as a multi-site commercial/retail area. The Phase 1 property is located at the east side of Lancelot Drive. Lancelot Drive originates off West Hunt Club Road that is located approximately 70 m south from the Phase 1 property.

The Phase 1 property was snow covered during the site assessment conducted in February 2025. An assessment of the grounds was conducted again on May 13, 2025 after the snow had melted. The Phase 1 property is an asphalted parking lot with no structures present. There were no mounds of fill materials present, and no observations of fuel spillage were noted.

The Phase 1 property originally operated as an agricultural farm with a house, barn and sheds present until approximately 1984 when the house, barn and shed were removed/demolished. The Phase 1 property remained vacant for several years after that. The Phase 1 property was commercially developed around 1997 as an exterior storage area for a large retail store located at 585 West Hunt Club Road. It eventually became a parking lot and has remained so to this day.

The Phase 1 property is subject to easements in favour of The Hydro Electric Commission of the City of Nepean, Bell Canada and Enbridge Gas Distribution Inc.

The adjoining property to the south and located at 575 West Hunt Club Road is a commercial building containing the offices for Van Houtte Coffee Services along with Peak Investment Services Inc. and the Bariatric Medical Institute.

The neighbouring property to the southeast and located at 545 West Hunt Club Road is a vacant retail home furnishing building. This property was occupied by Upper Room Home Furnishings and closed in September 2024. The neighbouring property to the east and across an access laneway is an LCBO store located at 543 West Hunt Club Road. The neighbouring property to the north and across an access laneway is a RONA hardware store located at 585 West Hunt Club Road. The neighbouring property to the west and across Lancelot Drive is an asphalt covered exterior storage area for RONA. To the southwest and located at 595 West Hunt Club Road is a commercial building occupied by a safety store (The Safety House), a Smoke FX Vape Shop along with a massage unit (Massage Addict). No visual indications of above ground fuel storage tanks were found at these properties.

On the basis of the programme conducted, St. Lawrence Testing has determined:

- The Phase 1 property has operated as a commercial property since 1997. Prior to this the Phase 1 property operated as a farm then became vacant.
- A second site visit to the Phase 1 property was conducted on May 13, 2025 after the snow had melted. This visit found no mounds of soil or areas of fuel spillage anywhere on the Phase 1 property.

- No visual evidence of any above or below ground fuel storage tanks were found on the Phase 1 property or at the adjoining property to the south.
- The City of Ottawa Planning Department issued a Historical Land Use Inventory report centered around the Phase 1 property. The City of Ottawa had no environmental records for this property.
- The adjoining and neighbouring properties pose a low environmental risk of subsurface contamination to the Phase 1 property. No above ground fuel tanks were observed on these properties.

St. Lawrence Testing determined that there are no areas of potential environmental concern associated with the Phase 1 property (hereafter referred to as the “Site” or “Site property”). No further environmental work is required.

## **2.0 SITE DESCRIPTION**

### **2.1 Site Location**

The Site does not have a municipal address at this time. It is located within a developed commercial area north of West Hunt Club Road and west of Merivale Road in Nepean (Ottawa), Ontario. The Site is to the south of 585 West Hunt Club Road, directly west of 543 West Hunt Club Road and directly north of 575 West Hunt Club Road. Access onto the Site property is made of Lancelot Drive at the west side or from a shared lane found on the east side.

The Site is approximately 75 m north of West Hunt Club Road and approximately 360 m west of Merivale Road. Highway 416 is located approximately 6.1 Km west traveling along West Hunt Club Road.

## 2.2 Site Operations

The Site property is currently a 3,639.46 m<sup>2</sup> asphalt covered parking lot. Prior to this, the Site was rural/agricultural in use with a house, barn and sheds until 1984. The Site became vacant in 1984 and was commercial around 1997 as an exterior storage area for 585 West Hunt Club Road then became a parking lot.

## 2.3 Topographic, Geologic and Hydrogeologic Setting

According to the Physical Settings Report prepared by Environmental Risk Information Services (ERIS), the Site is approximately 88.2 m above sea level with a general slope direction to the south southeast.

The bedrock is composed of limestone, dolostone and sandstone of the Beekmantown Group of the Ordovician period. The glacial deposit is composed of undifferentiated silty sandy till on Paleozoic terrain having low to medium permeability. The soil characterization for the Site property was not provided in the Physical Settings report; however, the soil to the west of Lancelot Drive is described as a silty clay with poor drainage and has a high run-off potential.

The inferred groundwater flow will be towards the Nepean Creek located approximately 380 m northeast of the Site property.

The Pinhey Forest is an area of natural and scientific interest and is located approximately 300 m southwest of the Site property. This area also contains swampy locations.

### **3.0 RECORDS REVIEW**

#### **3.1 Aerial Photographs**

Historical aerial photographs for the Site were obtained through ERIS for the years 1925, 1936, 1946, 1953, 1965, 1976, 1985, and 1994. In addition to these, satellite images viewed using Google Earth from the years 2004, 2007, 2008, 2014, 2018, 2021 and 2024 were also reviewed.

The aerial photograph taken in 1925 shows the Site property as agricultural in use. There is a house, a barn and outbuildings present to the northeast of the Site. The adjoining and neighbouring properties appear agricultural in use. Merivale Road is present further to the east of the Site.

The aerial photograph taken in 1936 shows no significant changes in the use of the Site property or on the adjoining and neighbouring properties since the 1925 photograph was taken.

The aerial photograph taken in 1946 shows no significant changes to the Site property since the 1936 photo was taken. The surrounding properties appear agricultural or rural in use.

The aerial photograph taken in 1953 shows no significant changes in the use of the Site property and at the surrounding properties since the 1946 photo was taken. Further to the east and across Merivale Road are large above ground storage tanks now present.

The aerial photograph taken in 1965 shows the Site property as rural/agricultural in use. There appears to be development present further to the east and to the northeast of the Site along the west side of Merivale Road. The adjoining properties to the north, west and south appear agricultural in use.

The aerial photograph taken in 1976 shows the Site property as rural in use. There is further development to the east and northeast of the Site. The adjoining properties to the north, west and south remain agricultural or undeveloped. West Hunt Club Road is not present along the south side of the Site property.

The aerial photograph taken in 1985 shows the Site property as undeveloped. The buildings once located to the northeast of the Site property are now absent. The adjoining properties to the east, west and south remain undeveloped. West Hunt Club Road is not present. The property located further to the east is developed and appears commercial in use.

The aerial photograph taken in 1994 shows the Site property as undeveloped. There is now a large structure located to the south of the Site property. West Hunt Club Road is present further to the south and

there is a short access road where Lancelot Drive will eventually be located. The adjoining properties to the north, east and west remain undeveloped.

The satellite image taken in 2004 shows the Site property as developed. The Site is covered with asphalt and appears to operate as an exterior storage area as there are numerous objects located along the north side. The Site is bound by laneways along the east, north and west sides. The adjoining property located to the south contains a large irregular shaped commercial building. The neighbouring properties located to the north and west are asphalt covered parking lots. The neighbouring property located to the southwest contains an irregular shaped commercial building. The neighbouring property located to the east contains a large irregular shaped building. Another irregular shaped building is present to the southeast.

The satellite image taken in 2007 shows the Site property operating as an exterior storage area with many objects present. The adjoining and neighbouring properties appear similar in use as they did in the 2004 image.

The satellite image taken in 2008 shows the Site property as vacant with no objects present. The adjoining and neighbouring properties appear similar in use as they did in the 2004 image.

The satellite image taken in 2014 shows no significant changes in the use of the Site property since the 2008 image was recorded except for a vehicle located at the centre of the Site. The adjoining property located

to the south appears unchanged in use since the 2008 image. The neighbouring property located to the west now appears to operate as an exterior storage area. The neighbouring properties located to the north and east have remained similar in use since the 2008 image.

The satellite image taken in 2018 shows no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2014 image was recorded.

The satellite image taken in 2021 shows no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2018 image was recorded.

The satellite image taken in 2024 shows no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2021 image was recorded.

### **3.2 Property-Use Records**

A search for fire insurance plans was undertaken by ERIS/Verisk. There was no fire insurance plans available covering the Site property.

### **3.3 Insurance Inspection Reports**

A search for insurance inspection reports was undertaken by ERIS/Verisk. There were no insurance reports available for the Site property.

### 3.4 Municipal Records

A request was submitted on February 13, 2025 to the City of Ottawa for a Historical Land Use Inventory report to provide any information the City of Ottawa may have regarding the Site property. The City of Ottawa sent a reply on March 11, 2025. The response stated that the Environmental Remediation Unit for the City of Ottawa did not have any environmental records with respect to the Site property. No records were found involving the Sewer Use Program or the Solid Waste Services.

### 3.5 Title Search

The legal description of the Site property is Part of Lot 28 Concession 1, Rideau Front, Nepean being Parts 1, 2, 3 and 4 on Plan 4R-15594, Ottawa. Subject to an Easement in Favour of the Hydro-Electric Commission of the City of Nepean over Part 2 on Plan 4R-15594 as in LT1176238; Subject to an Easement over Parts 9, 10 and 11 on 4R29778 as in OC1868150; Subject to an Easement as in OC1880904; Together with an Easement over PT 5 4R13839, PTS 1, 2 & 3 4R29778 as in OC1894191; Together with an Easement over PTS 6, 7 & 8 4R29778 as in OC1894192; Together with and Easement over PTS 10-24 4R25818 as in OC1894193; Subject to an Easement over PTS 9, 10 & 11 4R29778 in favour of PT 2 4R13593, PTS 1-10 4R13839, PTS 1-9 25 4R25818, PTS 3, 4, 5 4R13165 Except PTS 1-9, 25 4R25818, PT 1 4R13165 Except PTS 1-4 4R15594 as in O1894194; Together with an Easement over PT 3 4R14613 as in OC1894195; Together with an Easement over PT 5 4R29778 as in OC 1894196; Together with an

Easement over PTS 12-16 4R29778 as in OC1894197; City of Ottawa.

The Property Identification Number is 04629-0906.

The following table lists the title chain from the Crown patent to the current owner.

Instrument #	Doc. Type	Date	Party From	Party To
	Patent	Nov 26, 1846	Crown	Robert Nesbit (PT LT 28, CON 1)
R026724	Will	June 6, 1866	Robert Nesbitt	James Nesbitt
NP19100	Will	Nov 20, 1901	James Nesbitt	Robert A. Nesbitt
3638GR	Probate	Oct 1, 1902	Robert A Nesbitt	Wm. N. Nesbitt
410491	Release	Jan 11, 1960	Wm. N. Nesbitt	Thomas D. Nesbitt
569879	Deed	Jan 5, 1970	James R. Nesbitt, Charles M. Nesbitt	The Crown
LT1073225	Transfer	Sept 10, 1997	Her Majesty The Queen in Right of the Province of Ontario	1204325 Ontario Limited
LT1076373	Transfer	Sept 24, 1997	1204325 Ontario Limited	9051-5040 Quebec Inc.
LT1176238	Easement	Jan 27, 1999	9051-5040 Quebec Inc.	The Hydro Electric Commission of the City of Nepean
4R15594			R-Plan	
LT1321909	Transfer	Sept 28, 2000	9051-5040 Quebec Inc.	1427163 Ontario Inc. (Current Owner)
OC1868150	Transfer Easement	Feb 15, 2017	1427163 Ontario Ltd.	Bell Canada
OC1880904	Transfer Easement	April 13, 2017	1427163 Ontario Ltd.	Enbridge Gas Distribution Inc.

No Rights of Way were identified in the chain of title; however, several easements are associated with the Site property in favour of The Hydro Electric Commission of the City of Nepean, Bell Canada along with Enbridge Gas Distribution Inc.

### 3.6 Prior Environmental Assessment Reports

An Environmental Investigation report prepared by the Ministry of Transportation in 1996 was reviewed that involved a property located at 585 West Hunt Club Road. The Site was part of this property at that time.

A review of available aerial photographs carried out indicated that the Site was originally a farm from 1953 to 1958. The Site was no longer used as a farm, but a barn structure remained present until 1984. In 1984 only a house remained. After 1984 the Site property was vacant.

Another report prepared by the MTO in 1996 summarized a subsurface investigation on the property located at 585 West Hunt Club Road. This work also included the Site property. Twenty-two test pits (TP 1 to TP 22) were dug, and soil samples were collected from selected test pit locations (TP1, TP 2, TP 3, TP 4, TP 11 and TP 12) for metal analysis. The test results were compared to the standards used in 1996. St. Lawrence Testing compared the available results with the standards listed in Ontario Regulation 153/04, Table 3 for a commercial property with coarse soil and non-potable groundwater and found that they satisfied these standards.

The location of TP 6 was to the north of the Site property. This test pit contained a 22,000 L steel underground diesel fuel storage tank that was present. This tank was removed, and no soil contamination was noted in the report. However, the soil was not analyzed for petroleum hydrocarbons to confirm their opinion of the soil at this location.

The sketch provided suggests that TP 8 and TP 22 were located on or very close to the Site property. The soil at TP 8 was described as a 'grey clay soil mixed with building bricks to a 1.5-meter depth with no visual evidence of contamination, no suspect odour'. The description of the soil located at TP 22 was noted as 'typical barn materials (i.e. concrete, steel roof-sheeting and wooden beams)'. Unfortunately, no analyses of the soil were conducted at TP 8 and TP 22.

### 3.7 Company Records

No company records were available for review.

### 3.8 Regulatory Information

St. Lawrence Testing submitted a request to Environmental Risk Information Services (ERIS) for a review of available Federal, Provincial and Private Sector databases.

There were no records found associated with the Site property in the ERIS Historical Searches database; however, there were 55 records for the properties within a 250 m radius of the Site boundaries.

Database	On-Site	Within a 250 m radius
Borehole	0	1
Certificates of Approval	0	7
Delisted Fuel Tanks	0	1
Environmental Registry	0	4
Environmental Compliance Approval	0	1
ERIS Historical Searches	0	8
Ontario Reg. 347 Waste Generators Summary	0	20
Pesticide Registry	0	7
Scott's Manufacturing Directory	0	3
Ontario Spills	0	1
Water Well Information System	0	2

There was 1 record found in the Borehole database. This database includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. The record involved a geotechnical investigation in 1971 that was located approximately 153 m south of the Site. This work would not have posed an environmental risk to the Site property.

There were 7 records found in the Certificates of Approval database. The Ministry of the Environment Conservation and Parks (MOECP) states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable

water supplies, stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. The first record involved a property located approximately 177 m northwest at 585 West Hunt Club Road. In 2008 an approval was granted for the release of substances into the air. The specifics of the approval were not provided in the record. This approval would pose a low environmental risk to the Site as any releases into the air would readily disperse and be diluted in the atmosphere. The second record involved municipal sewage works that occurred in 1993 and located approximately 115 m southwest at West Hunt Club Road and Lancelot Drive. This work would have posed a low environmental risk as this location is at a lower elevation to the Site. The final 3 records all involved a fiber optic company located approximately 150 m east of the Site. Four approvals were granted in 1995, 1998, 1998 and 1999 for releases into the air. The 5<sup>th</sup> record involved the cancellation of an approval for the release into the air. These approvals involved the release of acetone, ethyl alcohol, into the air and the use of exhaust hoods. These approvals would pose a low environmental risk to the Site as any releases into the air would readily disperse and be diluted in the atmosphere.

There was 1 record found in the Delisted Fuel Tanks database. This record involved a former liquid propane tank located approximately 177 m northwest at 585 West Hunt Club Road. The presence of a liquid propane tank at this location would pose a low environmental risk to the Site as any releases of propane would evapourate into the air and be diluted before reaching the Site property.

There were 4 records found in the Environmental Registry database. This database lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. The first record involved a property located approximately 117 m northwest at 585 West Hunt Club Road. In 2008, an approval was granted for the discharge into the natural environment other than water (i.e. air). This approval would have posed a low environmental risk to the Site as any releases into the air would be dispersed and diluted before reaching the Site. The next record involved a permit in 2020 for activities to achieve an overall benefit to a species. This concerned a proposed residential development to be located approximately 227 m south of the Site where Butternut trees were found. This would not have posed an environmental risk to the Site property. The last 2 records concerning two approvals in 1998 & 2001 for the discharge into the natural environment other than water (i.e. air) by JDS Uniphase Inc. located approximately 245 m southeast. These approvals would have posed a low environmental risk to the Site as any releases into the air would be dispersed and diluted before reaching the Site.

There was 1 record found in the Environmental Compliance Approval database. On October 31, 2011, a faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. A single ECA addresses all of a business's emissions, discharges and wastes. This record concerned the Rona

Home & Garden located approximately 117 m northwest at 585 West Hunt Club Road. In 2008, an approval was granted for the use of a natural gas fueled heaters, a standby diesel fueled generator along with a dust collection system. This approval would have posed a low environmental risk to the Site as any releases into the air from the exhaust and escaping dusts would be dispersed and diluted before reaching the Site.

There were 8 records found in the ERIS Historical Searches database. This database lists all environmental risk reports completed since March 1999. Available fields for this database include site location, date of report, type of report, and search radius. There were 2 records involving 585 West Hunt Club Road, 2 records for 565 West Hunt Club Road, 2 records for 595 West Hunt Club Road, one record involving a location at 570 West Hunt Club Road & 159 Cleopatra Drive and one record for a property located at 174 Cleopatra Drive. These would not have posed an environmental risk to the Site.

There were 20 records found in the Ontario Regulation 347 Waste Generators Summary database. Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site.

<b>Location</b>	<b>Distance from Site/Elevation</b>	<b>Wastes Generated</b>
Rona Home & Garden 585 West Hunt Club Road	117 m NW /↑	Waste detergents & soaps were generated in 2016. Waste compressed gases & cylinders, waste crankcase oils & lubricants, organic and inorganic wastes, organic non-halogenated pesticides & herbicides, inorganic sludges, slurries & solids, halogenated pesticides & herbicides, detergents & soaps, aliphatic solvents along with light fuels in 2018, 2020, 2021 and 2022.
Simplex Intl Time Equipment Co. Ltd. 575 Heston Drive	56 m SE /↓	Alkaline waste-heavy metals were generated from 1993 to 2001.
Ottawa Catholic School Board 570 West Hunt Club Road	153 m SSE /↓	Paint, pigments & coating residues, petroleum distillates, PCBs, waste oils & lubricants along with waste compressed gases were generated in 2002. Paint, pigments & coating residues were generated from 2014 to 2018 and 2020. Paint, pigments & coating residues along with aliphatic solvents were produced in 2021 and 2022.
JDS Uniphase Corporation 570 West Hunt Club Road	153 m SSE /↓	Waste oils & lubricants, organic and inorganic waste, aliphatic solvents and halogenated solvents in 1992, 1993, 1996, 1997 & 1998. Aliphatic solvents were produced in 1994 & 1995. Halogenated solvents, waste oils & lubricants, aliphatic solvents, organic & inorganic laboratory chemicals along with inorganic acid waste from 1999 to 2001.

		Organic & inorganic waste, waste oils & lubricants, aliphatic solvents, oil skimmings & sludges along with waste compressed gases from 2002 to 2004.
--	--	--

As the handling, storage and disposal of these wastes are regulated, the waste generated at these locations would pose a low environmental risk to the Site property.

There were 7 records found in the Pesticide Registry database. The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides. All 7 records involved Rona Home & Garden located approximately 117 m northwest at 585 West Hunt Club Road. The records indicated that this location is a limited vendor of pesticides for retail. Considering the small volumes of pesticides available at this location, these pesticides would pose a low environmental risk to the Site property.

There were 3 records found in the Scott's Manufacturing Directory database. This database lists information on over 200,000 manufacturers across Canada. All 3 records involved JDS Uniphase Ltd. located approximately 150 m southeast at 570 West Hunt Club Road. This business manufactures optical instruments and lenses along with measuring and controlling devices. The presence of this business would pose a low environmental risk to the Site property.

There was 1 record found in the Ontario Spills database. This database lists spills and incidents made available by the Ministry of the

Environment, Conservation and Parks. There was one spill that occurred on the Site property. There was a 3 L hydraulic oil spill onto the concrete at 585 West Hunt Club Road in November 2024. The spill was contained and cleaned up. The record indicated the environmental consequences were low and would not have resulted in sub-surface contamination onto the Site property.

There were 2 records found in the Water Well Information System database. This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. The first record involved a domestic water supply well located approximately 153 m northeast. The Ontario Well Records described this well as being drilled in 1975. The presence of a domestic water supply well at this location would pose a low environmental risk to the Site. The next record involved an abandoned monitoring well located approximately 165 m south southwest at 162 Cleopatra Drive. This well was installed in 2006. The presence of a monitoring well at this location would pose a low environmental risk as this location is at a lower elevation to that of the Site property.

#### **4.0 SITE VISIT**

A Site visit was performed by Mr. Steven Rowland of St. Lawrence Testing on February 10, 2025. The Site property was covered with deep snow at the time of this visit. Mr. Rowland performed a thorough visual inspection of the Site where access was safe to walk over. Only visual observations were noted.

An additional assessment of the Site property was conducted on May 13, 2025 after the snow had melted.

#### 4.1 General Observations

The Site property was snow covered at the time of the Site visit in February 2025. The Site is located on the east side of Lancelot Drive. Lancelot Drive originates off West Hunt Club Road. Vehicular access onto the Site was not available due to the deep snow. However, satellite images of the Site property show that there are vehicular access locations at the east and west sides.

The second Site visit conducted on May 13, 2025, determined that the Site property is an asphalted parking lot with no structures present. There were no mounds of fill materials present, and no observations of fuel spillage were noted.

#### Hazardous Materials

No hazardous materials were observed.

#### Unidentified Substances

No unidentified substances were observed.

#### Storage Tanks

The Site property is a parking lot. No storage tanks are suspected to be present.

#### Odours

No unusual odours were detected during the Site visit.

**Potable Water Supply**

The Site property is a parking lot. Potable water may be available to the Nepean Crossroads Centre.

**Special Attention Items**

**Polychlorinated Biphenyls (PCBs)**

The Site property is a parking lot. No PCB containing materials are suspected to be present.

**Asbestos-Containing Materials (ACMs)**

The Site property is a parking lot. No asbestos-containing materials are suspected to be present.

**Lead**

In 1976, the lead content in interior paint was limited to 0.5% by weight under the federal Hazardous Products Act. Lead is also associated with plumbing solder and old pipes as well as other lead-based products such as wall shielding (x-ray rooms).

The Site property is a parking lot. No lead containing materials are suspected to be present.

**Ozone-Depleting Substances**

No ozone-depleting substances were observed.

**Urea Foam Formaldehyde Insulation (UFFI)**

The Site property is a parking lot. No UFFI is suspected to be present.

**Radon**

Radon is an odourless, invisible gas that occurs in soils upon the decay of naturally found uranium. Natural radon levels vary and are closely related to geologic formations. Radon may enter buildings through basement sumps or other openings in the basement floor. The guideline from Health Canada for radon is 200 Bq/m<sup>3</sup>.

The Eastern Ontario District Health Unit conducted a study of 99 homes within the region. The survey found that 93.9% of the homes in the survey had radon levels below the 200 Bq/m<sup>3</sup> guideline.

As the underlying bedrock geology consists of limestone, dolostone, shale, arkose and sandstone, the possibility of radon being present at a concentration that would cause illness is small. However, radon cannot be detected without specialized equipment and testing for radon is outside the scope of this report.

**Mold**

No mold was observed on the Site property.

**Noise & Vibration**

A handheld sound meter was used to measure the noise levels near the northeast corner of the Site property. The decibel reading varied from 54.7 db. to 68.3 db. as traffic passed by. No noticeable vibrations were felt during the Site visit.

### Electric and Magnetic Fields

We tested for the presence of both electric and magnetic fields using a portable electromagnetic radiation meter near the east side of the Site property where overhead electrical distribution lines were observed. An electromagnetic field was detected. This field is believed to emanate from the ground mounted transformer located on the neighbouring property (LCBO) located to the east. This field dissipated with distance. There is also another ground mounted transformer located near the southwest corner of the Site property. No electromagnetic field was detected at this transformer.

### 4.2 External Observations

#### General Description of Site Structures

The Site property is a parking lot. No structures are present.

#### Observations of Adjoining Properties

A visual observation of adjoining properties was performed from the Site boundary and from the surrounding public roads. The Site property is located within the Nepean Crossroads Centre that operates as a multi-site commercial/retail area.

The adjoining property to the south and located at 575 West Hunt Club Road is a commercial building containing the offices for Van Houtte Coffee Services along with Peak Investment Services Inc. and the Bariatric Medical Institute.

The neighbouring property to the southeast and located at 545 West Hunt Club Road is a vacant retail home furnishing building. This property was occupied by Upper Room Home Furnishings until it closed in September 2024. The neighbouring property to the east and across an access laneway is an LCBO store located at 543 West Hunt Club Road. This property contains a large ground mounted electrical transformer located near the northwest corner of the building. The neighbouring property to the north and across an access laneway is a RONA hardware store located at 585 West Hunt Club Road. The neighbouring property to the west and across Lancelot Drive is an asphalt covered exterior storage area for RONA. To the southwest and located at 595 West Hunt Club Road is a commercial building occupied by a safety store (The Safety House), a Smoke FX Vape Shop along with a massage unit (Massage Addict). No visual indications of above ground fuel storage tanks were found at these properties.

The Pinhey Forest is an area of natural and scientific interest and is located approximately 300 m southwest of the Site property. This area also contains swampy locations.

#### Wells

There were no wells observed on the Site property. No well records were found on the Ontario Well Records website involving the Site property.

#### Sewage Disposal

The Site property is a parking lot. Sewage disposal may be available to the Nepean Crossroads Centre.

**Pits and Lagoons**

No pits or lagoons were observed on the Site.

**Stained Material**

The second visit to the Site property found no staining on the asphalt.

**Fill**

No fill material was observed.

**Stressed Vegetation**

The Site property is a parking lot and devoid of vegetation. The second Site visit did not find any stressed vegetation on the adjoining properties.

**Wastewater**

Surface wastewater would travel to a catch basin located along the east access laneway. A satellite image taken of the Site property shows a catch basin located within the parking lot.

**Watercourses, Ditches, or Standing Water**

The Nepean Creek located approximately 380 m northeast of the Site property. No ditches or standing water were observed on the Site property.

**Roads, Rights of Way and Parking Facilities**

The Site property is located within the Nepean Crossroads Centre that operates as a multi-site commercial/retail area. Lancelot Drive is a 2-

lane, asphalted roadway that travels north and south along the west side of the Site property. Lancelot Drive originates off West Hunt Club Road that is located approximately 70 m to the south of the Site property. There are 2 asphalted travel lanes that are found along the north and east sides of the Site property. These permit vehicular traffic within the Nepean Crossroads Centre.

There were no rights of way found in the chain of title; however, the Site property is subject to easements in favour of The Hydro Electric Commission of the City of Nepean, Bell Canada and Enbridge Gas Distribution Inc.

The Site property was last utilized as a parking lot for patrons of the Nepean Crossroads Centre.

#### 4.3 Interior Observations

The Site property is a parking lot. No structures are present.

#### Heating and Cooling Systems

The Site property is a parking lot. There are no heating or cooling systems present.

#### Drains and Sumps

A satellite image taken of the Site property shows a catch basin located within the parking lot. No other drains were found directly on the Site property.

#### Mechanical Equipment

The Site property is a parking lot. No mechanical equipment is present.

### **5.0 INTERVIEWS**

A telephone interview with Mr. H. William Cuff, representative for the current owner of the Site property, was attempted on 3 individual days using the contact information provided on the Melron Property Enterprises Inc. letterhead. No one answered the telephone, and no voice mail prompt was provided to leave a message. The address for Melron Property Enterprises Inc. is a private residence and it is possible that Mr. Cuff may be away for the winter months.

### **6.0 FINDINGS and EVALUATION OF FINDINGS**

St. Lawrence Testing has determined the following from the information and Site assessment observations obtained:

- The Site property has operated as a commercial property since 1997. Prior to this the Site property operated as a farm then became vacant.
- The exterior grounds were covered with snow and could not be assessed accurately during the Site visit in February 2025.
- A second visit to the Site property was conducted on May 13, 2025 after the snow had melted. This visit found no mounds of soil or areas of fuel spillage anywhere on the Site property.
- No visual evidence of any above or below ground fuel storage tanks were found on the Site property or at the adjoining property to the south.

- The City of Ottawa Planning Department issued a Historical Land Use Inventory report centered around the Site property. The City of Ottawa had no environmental records concerning the Site.
- The adjoining and neighbouring properties pose a low environmental risk of subsurface contamination to the Site property. No above ground fuel tanks were observed on these properties.

## **7.0 CONCLUSIONS**

We have completed a Phase 1 Environmental Assessment in general accordance with CSA Z768-01 on the Site property located at PT LT 28, Con 1 with the PIN of 04629-0906 in Nepean, Ontario.

On the basis of the programme conducted, St. Lawrence Testing determined that there are no areas of potential environmental concern associated with the Site property. No further environmental work necessary.

## **8.0 STANDARD LIMITATIONS**

The environmental investigation was carried out to address the intent of applicable provincial guidelines. Achieving the objectives stated in the report has required us to arrive at conclusions based upon the best information presently known to us. No investigative method can completely eliminate the possibility of obtaining partially imprecise or incomplete information; it can only reduce the possibility to an acceptable level. Professional judgment was exercised in gathering and analyzing the information obtained and in the formulation of the conclusions. Like all professional persons rendering advice

we do not act as absolute insurers of the conclusions we reach, but we commit ourselves to care and competence in reaching those conclusions.

Our undertaking is to perform our work within the limits prescribed by our clients, with the usual thoroughness and competence of the engineering profession. It is intended that the outcome of this investigation assists in reducing the client's risks associated with environmental impairment; our work should not be considered "risk mitigation". No other warranty expressed or implied, is included or intended in this report.

The information presented in this report is based on a limited investigation designed to provide information to support an overall assessment of the current environmental conditions in the building on the subject property. The conclusions and recommendations presented in this report reflect existing site conditions within the scope of our investigation.

This report was prepared for the exclusive use of Halo Car Wash as per the agreement and terms of reference between Halo Car Wash and St. Lawrence Testing & Inspection Co. Ltd. Any use and interpretation of this report by any other party is entirely at their own risk.

## **9.0     QUALIFICATIONS OF THE ASSESSOR**

Mr. Gilbert G. McIntee, P.Eng: Mr. McIntee has been conducting environmental assessments and remediation for over 25 years and is a QP (Qualified Person).

Mr. Steven Rowland, B.Sc.: Mr. Rowland has a post graduate diploma in Environmental Science and has worked at St Lawrence Testing for 14 years as an environmental technician. Prior to this, he worked in pharmaceutical research and has designed and inspected research facilities in Canada and the United States.

Report No. 25C272

Appendix G  
Geotechnical Subsurface Investigation. Halo Car Wash 585 West Hunt Club  
Rd., Nepean, Ontario

March 24, 2024

Mr. Jordan Lupovici  
Halo Car Wash  
1010 Ontario Street  
Stratford, ON  
N5A 6Z3

**RE: Halo Car Wash 585 West Hunt Club Rd., Nepean, Ontario  
Geotechnical Subsurface Investigation  
Report No. 25C038**

Dear Mr. Lupovici:

As requested by you, this report is submitted on the geotechnical subsurface investigation at the property just North of West Hunt Club Rd. in Ottawa, Ontario.

**A) DESCRIPTION OF FIELD WORK**

Prior to starting the field drilling, locates were requested through Ontario One Call. When we initially visited the site, the whole site was covered with more than 300 mm of snow throughout.

The drilling was done on March 18, 2025. At the time of drilling, a lot of the snow had melted but there were still drifts of snow over close to half of the site. The drill was from Eastern Ontario Diamond Drilling or Hawkesbury, Ontario. Supervision was by the undersigned geotechnical engineer.

A total of 4 boreholes were put down at the site. The boreholes were advanced by split spoon sampling. Standard Penetration tests were carried out along with

the split spoon sampling. The recovered samples were placed in glass jars while on the site. The jars were returned to our lab for later detailed lab examination and one gradation test. While on site we paid close attention for potential fuel contamination odours. None were noted.

A sketch showing the borehole locations is attached to this report.

**B) STRATIGRAPHY**

The stratigraphy at the 4 boreholes is fairly similar.

The surface is covered with 50 mm of asphalt. Below the asphalt is gravel fill that extends between 0.48 to 0.53 m.

Below the gravel is a brown, moist, compact silty sand. With depth the brown becomes grey brown, generally around 1.5 m and grey, generally around 2.3 m. The moisture becomes very moist generally between 1.8 m to 2.3 m. The silty sand was noted to be wet between 2.3 m to 3.0 m at Boreholes 2, 3 and 4.

We hit bedrock at 3.28 m at Borehole 2 and 2.44 m at Borehole 3.

For the specific information at each borehole, the borehole logs should be referred to.

**C) GEOTECHNICAL DISCUSSION**

**1. General**

It is our understanding that a one storey car wash building is to be built near the centre of the lot in an East West direction.

## **2. Foundations**

The foundations for the building can be footings designed with a bearing capacity of 150 KPa S.L.S. and 225 KPa U.L.S. The seismic factor is Site Class C. The building design frost depth in this area is 1.5 m below the final exterior surface.

## **3. Slab on Grade**

The soil conditions are acceptable for a normal slab on grade.

The upper asphalt should be removed. The upper gravel should also be lowered.

The gravel below the new slab should be 150 mm of Granular "A" compacted to 95% Standard Proctor Density. If the loading will exceed 25 KPa S.L.S. the compaction should be to 100% Standard Proctor Density.

## **4. New Sewers and Watermain**

The bedrock depths at Boreholes 2 and 3 should be noted in case the sewers or watermains are coming in from the West end. The frost design depth in asphalted areas is 2.3 m.

For any new sewers and watermains, the sewers and watermains must be just below 2.3 m.

The bedding for the services should be 150 mm of Granular "A" compacted to 95% Standard Proctor Density. The cover material should be 150 mm of Granular "A" compacted to 95% Standard Proctor Density.

The backfill for the trench can be the site silty sand. This should be compacted in maximum 300 mm lifts to 95% Standard Proctor Density.

When it is time to restore the gravel subbase and base in the trench areas, the subgrade should be recompacted to 95% Standard Proctor Density prior to applying the subbase course.

The subbase, base and asphalt should match what now exists. The subbase should be the total gravel thickness less 150 mm and should be Granular "B" Type 2 compacted to 100% Standard Proctor Density. The base should consist of 150 mm of Granular "A" compacted to 100% Standard Proctor Density. The asphalt should consist of 50 mm of HL3 compacted to 96% Marshall Density.

**D) CONSTRUCTION CONTROL**

**St. Lawrence Testing  
& Inspection Co. Ltd.**

Report No. 25C038

Continued

Page 5

In order to ensure that the recommendations for footings, backfill and compaction are adhered to, it is recommended that our firm be retained to inspect, test and report accordingly.

Respectfully submitted,

ST. LAWRENCE TESTING & INSPECTION CO. LTD.

Steven Rowland  
St. Lawrence Testing  
814 Second Street West  
Cornwall, Ontario K6J 1H6  
[steve@stlawrencetesting.com](mailto:steve@stlawrencetesting.com)

Dear Steven Rowland:

**RE: MECP FOI A-2025-06813 – Decision Letter**

This letter is further to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

Part of Lot 28 Concession 1, Rideau Front, Nepean (see map)

Timeframe: January 1, 1975 to October 3, 2025

After a thorough search through the ministry files, records were located in response to your request. The final decision has been made to provide partial access to the requested information. The official responsible for making the access decision on your request is the undersigned.

Some of the information has been severed or withheld under the following sections of the Act:

- s.17(1) Corporate information supplied to the ministry in confidence for the protection of third-party records
- s.22(a) Records that are publicly available as follows:
  - For corporate ownership (ONBIS records, Articles of Incorporation, Articles of Amendment) download forms ON00242E and 5310E to search for a public record available from Service Ontario at <https://www.ontario.ca/page/ontario-business-registry-all-services>. Go to "33. Searching the Public Record" to locate the forms.
- Records or information that are not relevant to the request (e.g., records that are blank, outside of the date range or do not relate directly to the subject matter) have been removed and marked "Not Responsive" or 'N/R'.

Section 57 of the Act authorizes certain fees to be charged for processing a request. Our charges for processing this request are:

Search Time 0.83 hours @ \$30/hour	\$25.00
○ Time taken to locate and retrieve records	
<b>Total</b>	<b>\$25.00</b>

In order to receive a copy of the records please forward this amount in Canadian dollars to our office. Payment(s) may be made by **December 3, 2025**. If payment has not been received by this date, the file will be closed and you will be required to submit a new request.

The ministry's Environmental Assessment and Permissions Division (EAPD) has advised that there are inactive records in the Records Centre, Mississauga, and below is a description of these records:

- - 3-0082-98-006, Municipal and Private Sewage Works (MPSW), Mobius Development Ltd., Approved, Offsite, NA, 1998

If you would like us to retrieve these files, **please submit a new request** and inform the analyst below. In the request description section, indicate you are seeking records from the Record Centre in relation to file number A-2025-06813. The \$5 application fee for your new request will be applied towards any costs incurred with the retrieval of the records from the Records Centre.

Payment(s) may be made in Canadian dollars by one of the following options:

- Pay online through the Freedom of Information Request for Property Information Form: <https://forms.mgcs.gov.on.ca/en/dataset/012-2146>. Both the pdf download or "HTML" versions provide access to the payment option.
- Mail money order or cheque made payable to the "Minister of Finance (FOI)".

Please **do not** mail cash or send your payment information via email.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you decide to pursue this request after the deadline has passed, please contact the analyst below to discuss options that are available.

If you have any questions, please contact Amina Shah at 437-339-1251 or [amina.shah@ontario.ca](mailto:amina.shah@ontario.ca).

Yours truly,

Ashen.

for

Josephine DeSouza

## Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. Note: Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial

AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

*Government Publication Date: Sept 2002\**

### **Aggregate Inventory:**

Provincial

AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

*Government Publication Date: Up to Nov 2024*

### **Abandoned Mine Information System:**

Provincial

AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

*Government Publication Date: 1800-Apr 2024*

### **Anderson's Waste Disposal Sites:**

Private

ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

*Government Publication Date: 1860s-Present*

### **Aboveground Storage Tanks:**

Provincial

AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

*Government Publication Date: May 31, 2014*

### **Automobile Wrecking & Supplies:**

Private

AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

*Government Publication Date: 1999-Apr 30, 2024*

### **Borehole:**

Provincial

BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

*Government Publication Date: 1875-Jul 2018*

**Certificates of Approval:**

Provincial

CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

*Government Publication Date: 1985-Oct 30, 2011\**

**Dry Cleaning Facilities:**

Federal

CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

*Government Publication Date: Jan 2004-Dec 2022*

**Commercial Fuel Oil Tanks:**

Provincial

CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

*Government Publication Date: Oct 2023*

**Chemical Manufacturers and Distributors:**

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

*Government Publication Date: 1999-Jan 31, 2020*

**Chemical Register:**

Private

CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

*Government Publication Date: 1999-Apr 30, 2024*

**Compressed Natural Gas Stations:**

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

*Government Publication Date: Dec 2012 -May 2024*

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

*Government Publication Date: Apr 1987 and Nov 1988\**

**Compliance and Convictions:**

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

*Government Publication Date: 1989-Dec 2024*

**Certificates of Property Use:**

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

*Government Publication Date: 1994 - Dec 31, 2024*

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

*Government Publication Date: 1886 - Aug 2024***Delisted Fuel Tanks:**

Provincial

DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

*Government Publication Date: Oct 2023***Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

*Government Publication Date: Oct 2011-Oct 31, 2024***Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

*Government Publication Date: 1994 - Dec 31, 2024***Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

*Government Publication Date: Oct 2011-Oct 31, 2024***Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

*Government Publication Date: 1992-2007\****ERIS Historical Searches:**

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

*Government Publication Date: 1999-Aug 31, 2024***Environmental Issues Inventory System:**

Federal

EIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

*Government Publication Date: 1992-2001\**

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

*Government Publication Date: Apr 30, 2022*

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

*Government Publication Date: Jan 1, 2011 - Dec 31, 2023*

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

*Government Publication Date: Oct 2023*

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

*Government Publication Date: 1988-Jun 2007\**

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

*Government Publication Date: Jun 2000-Nov 2024*

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

*Government Publication Date: 1964-Sep 2019*

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

*Government Publication Date: Oct 31, 2021*

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

*Government Publication Date: Oct 2023*

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

*Government Publication Date: Pre-Jan 2010\**

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

*Government Publication Date: 1986-Nov 30, 2022*

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

*Government Publication Date: 2013-Apr 2024*

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

*Government Publication Date: 2006-June 2009\**

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

*Government Publication Date: 1950-Aug 2003\**

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

*Government Publication Date: 31 Oct, 2023*

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

*Government Publication Date: Mar 31, 2022*

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

*Government Publication Date: 1998-2009\**

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

*Government Publication Date: 1846-Feb 2024*

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

*Government Publication Date: 1974-1994\**

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

*Government Publication Date: Dec 31, 2022*

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

*Government Publication Date: Up to May 2001\**

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

*Government Publication Date: Mar 1999-Nov 2023*

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

*Government Publication Date: 2001-Apr 2007\**

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

*Government Publication Date: 2008-Dec 31, 2024*

**National Energy Board Wells:**

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

*Government Publication Date: 1920-Feb 2003\**

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

**Government Publication Date: Feb 2024****National Pollutant Release Inventory - Historic:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2024****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

**Government Publication Date: 1800-Aug 2024****Inventory of PCB Storage Sites:**

Provincial

OPCW

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Dec 31, 2024**

**Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date:** 1999, 2002, 2004, 2005, 2009-2014

**Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date:** 1920-Jan 2005\*

**Pesticide Register:**

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011-Oct 31, 2024

**Ontario PFAS Spills:**

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date:** 1988-Jun 2024; Aug 2024; Oct-Nov 2024

**NPRI Reporters - PFAS Substances:**

Federal

PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

**Government Publication Date:** Feb 2024

**Potential PFAS Handlers from NPRI:**

Federal

PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

**Government Publication Date:** Feb 2024

**Pipeline Incidents:**

Provincial

PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Potential PFAS Handlers from EASR:**

Provincial

PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

**Government Publication Date:** Jun 30, 2024

**Private and Retail Fuel Storage Tanks:**

Provincial

PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial

PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Dec 31, 2024****Ontario Regulation 347 Waste Receivers Summary:**

Provincial

REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2021****Record of Site Condition:**

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

**Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2025****Retail Fuel Storage Tanks:**

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Apr 30, 2024****Scott's Manufacturing Directory:**

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\*****Ontario Spills:**

Provincial

SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024****Wastewater Discharger Registration Database:**

Provincial

SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2021****Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\*****Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2024**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

*Government Publication Date: Feb 28, 2022*

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

*Government Publication Date: Oct 2011 - Oct 31, 2024*

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

*Government Publication Date: Up to Oct 1990\**

**Water Well Information System:**

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

*Government Publication Date: Dec 31 2023*

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

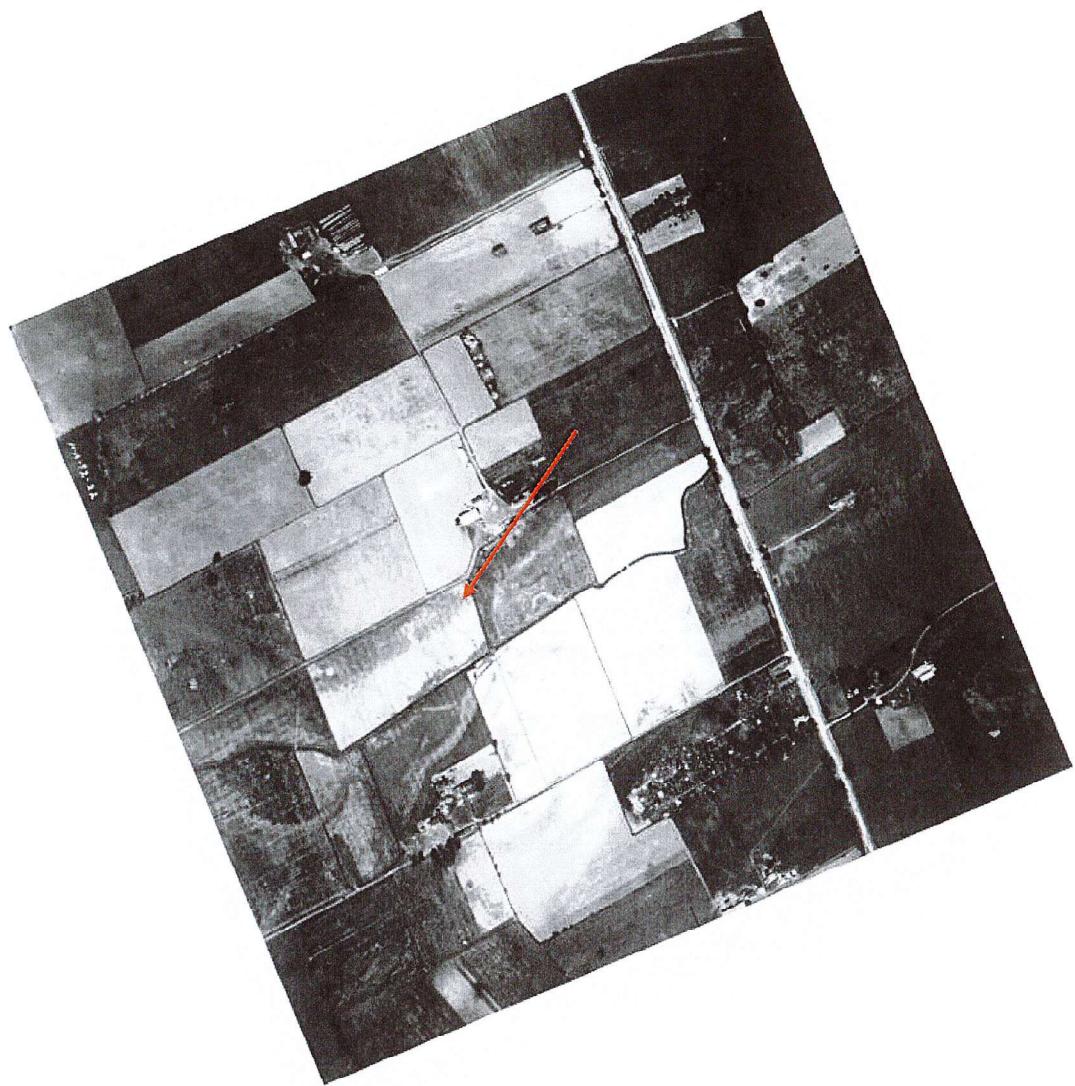

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**St. Lawrence Testing  
& Inspection Co. Ltd.**  
Report No. 25C272

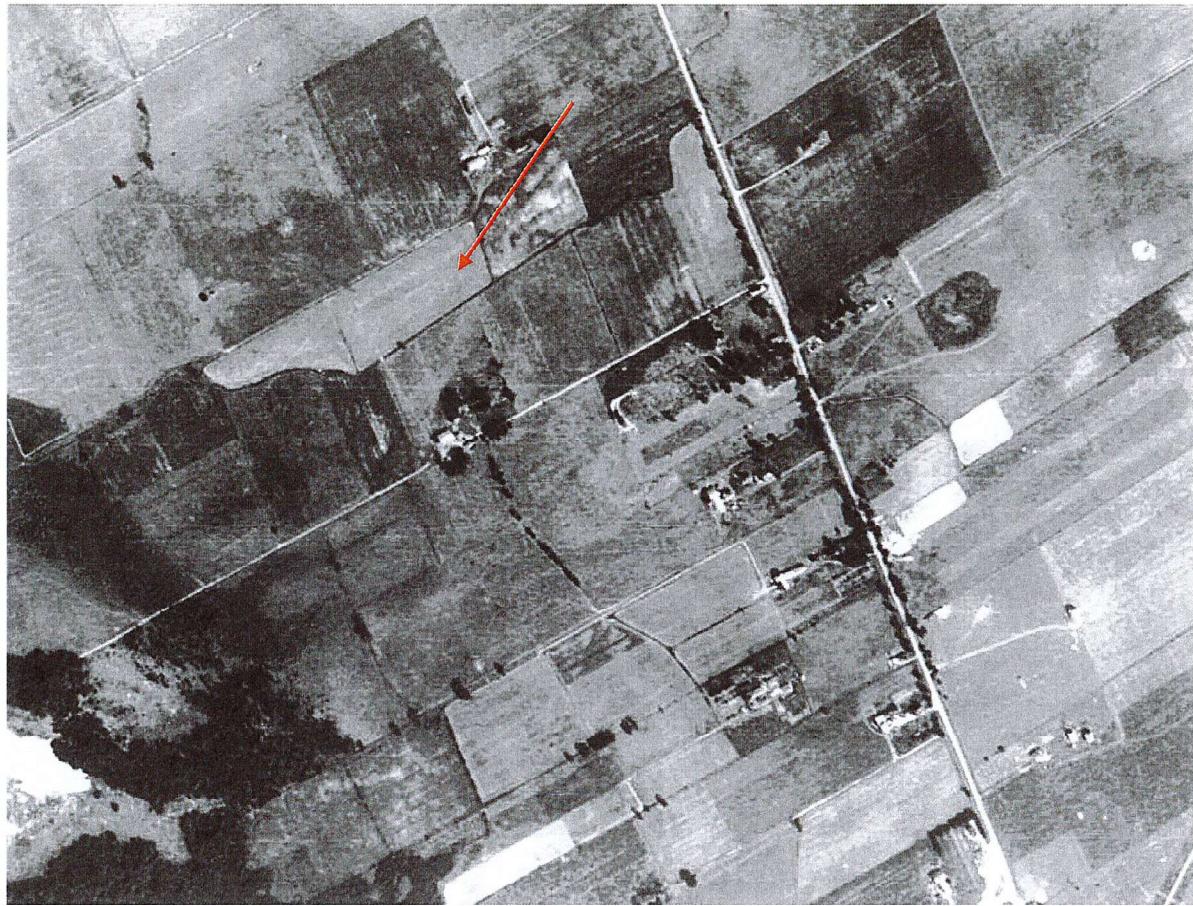

**Appendix J**  
**Historical Aerial and Satellite Images**

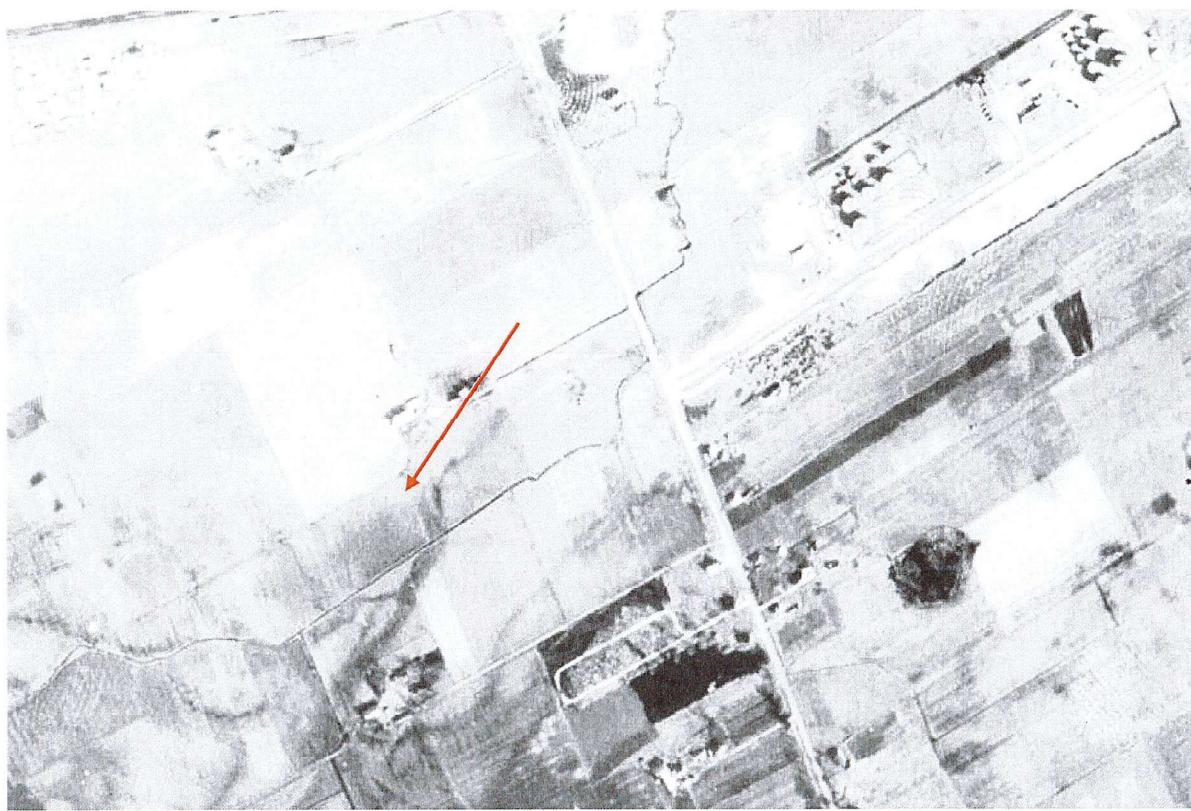

The aerial photograph taken in 1925 shows the Site property as agricultural in use. There is a house, a barn and outbuildings present to the northeast of the Site. The adjoining and neighbouring properties appear agricultural in use. Merivale Road is present further to the east of the Site.

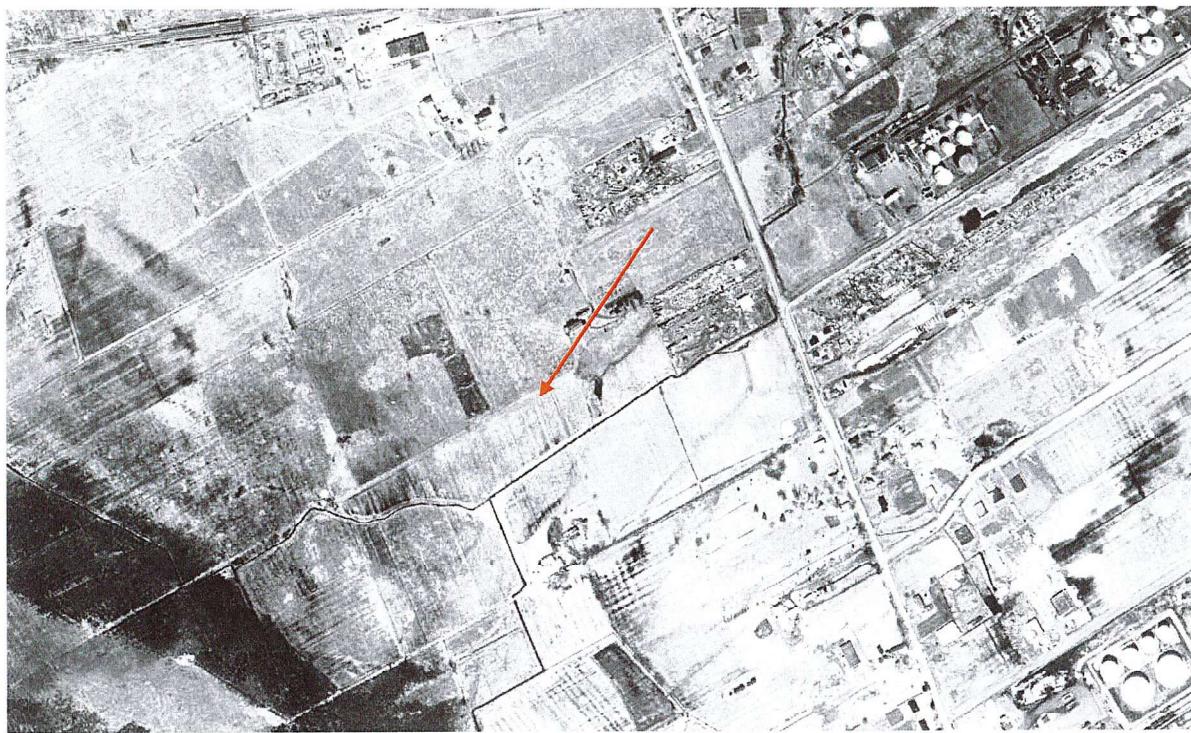

The aerial photograph taken in 1936 shows no significant changes in the use of the Site property or on the adjoining and neighbouring properties since the 1925 photograph was taken.

The aerial photograph taken in 1946 shows no significant changes to the Site property since the 1936 photo was taken. The surrounding properties appear agricultural or rural in use.

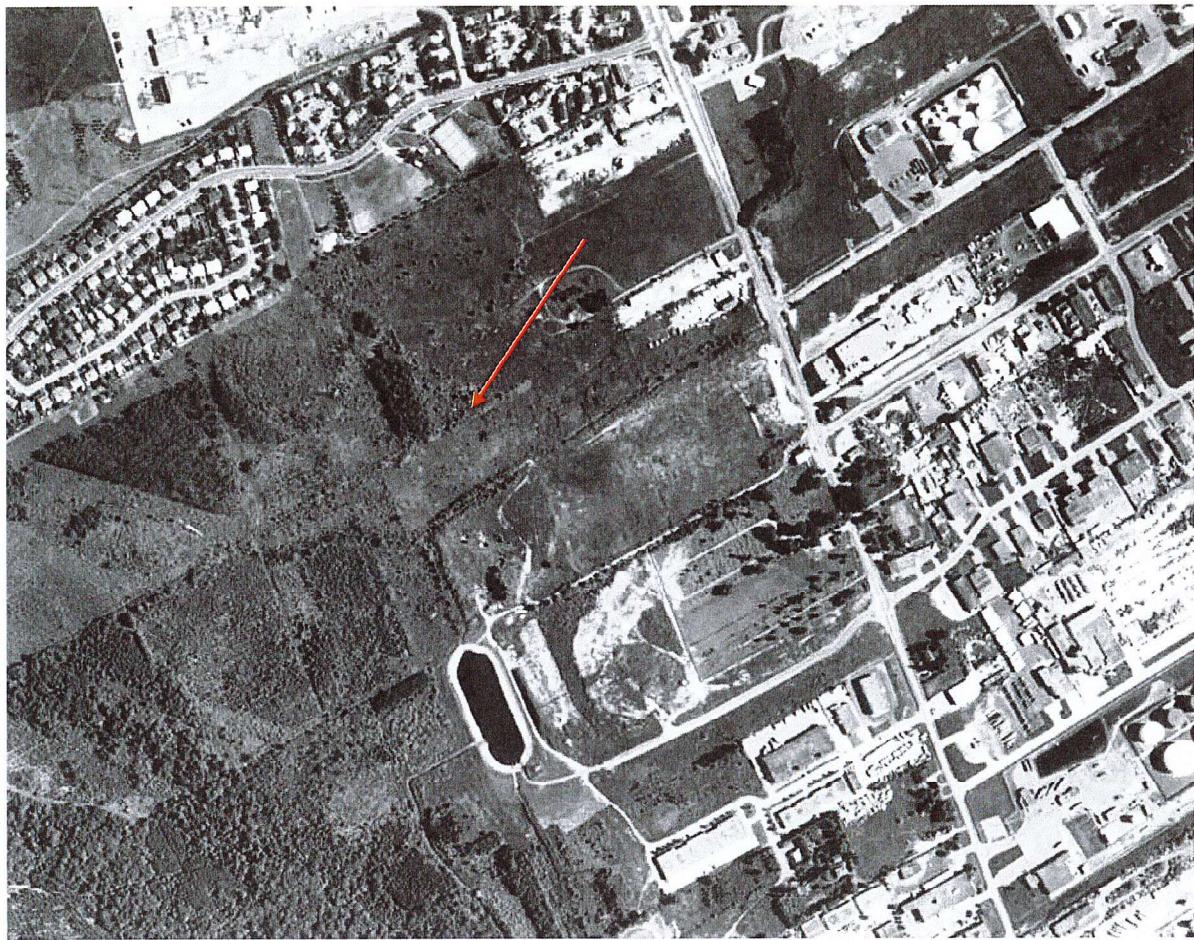

The aerial photograph taken in 1953 shows no significant changes in the use of the Site property and at the surrounding properties since the 1946 photo was taken. Further to the east and across Merivale Road are large above ground storage tanks now present.

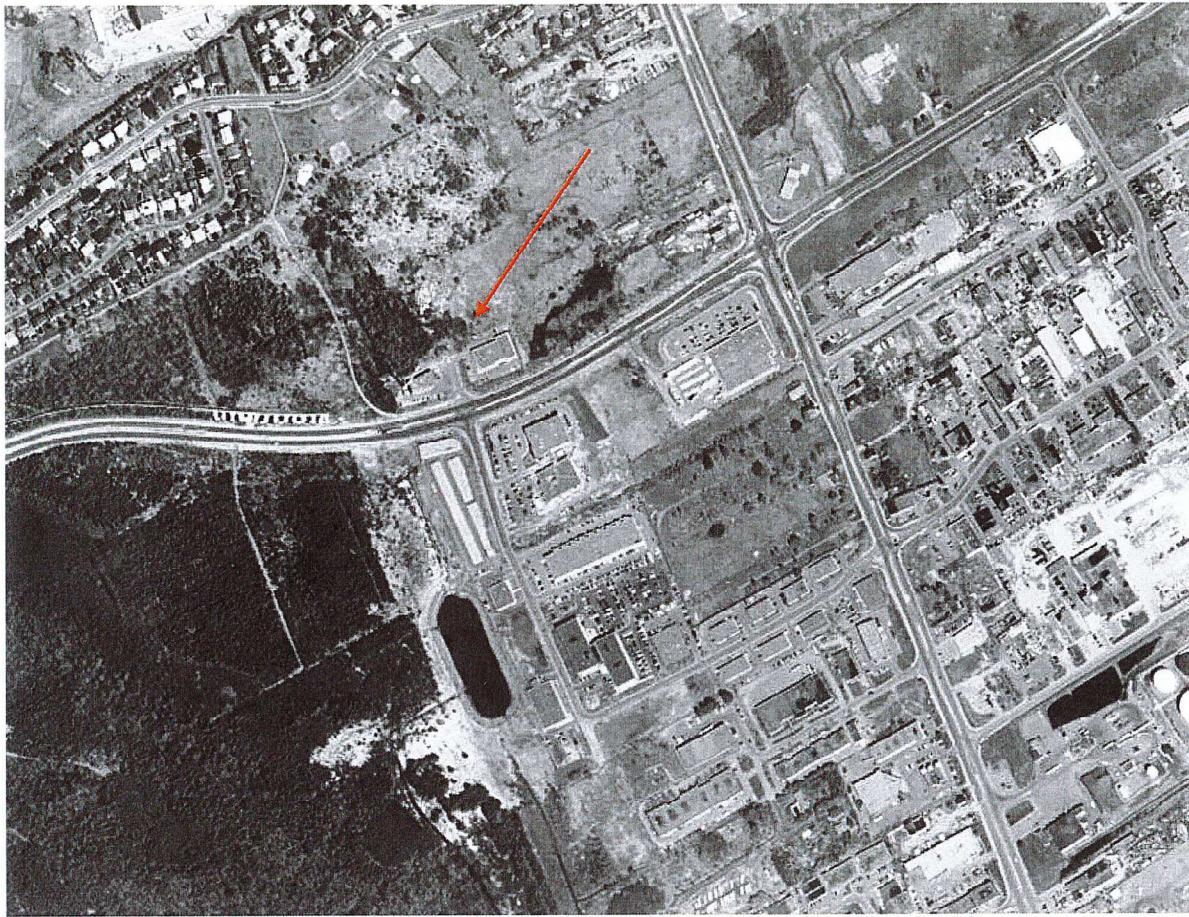

The aerial photograph taken in 1965 shows the Site property as rural/agricultural in use. There appears to be development present further to the east and to the northeast of the Site along the west side of Merivale Road. The adjoining properties to the north, west and south appear agricultural in use.

The aerial photograph taken in 1976 shows the Site property as rural in use. There is further development to the east and northeast of the Site. The adjoining properties to the north, west and south remain agricultural or undeveloped. West Hunt Club Road is not present along the south side of the Site property.

The aerial photograph taken in 1985 shows the Site property as undeveloped. The buildings once located to the northeast of the Site property are now absent. The adjoining properties to the east, west and south remain undeveloped. West Hunt Club Road is not present. The property located further to the east is developed and appears commercial in use.

The aerial photograph taken in 1994 shows the Site property as undeveloped. There is now a large structure located to the south of the Site property. West Hunt Club Road is present further to the south and there is a short access road where Lancelot Drive will eventually be located. The adjoining properties to the north, east and west remain undeveloped.

The satellite image taken in 2004 shows the Site property as developed. The Site is covered with asphalt and appears to operate as an exterior storage area as there are numerous objects located along the north side. The Site is bound by laneways along the east, north and west sides. The adjoining property located to the south contains a large irregular shaped commercial building. The neighbouring properties located to the north and west are asphalt covered parking lots. The neighbouring property located to the southwest contains an irregular shaped commercial building. The neighbouring property located to the east contains a large irregular shaped building. Another irregular shaped building is present to the southeast.

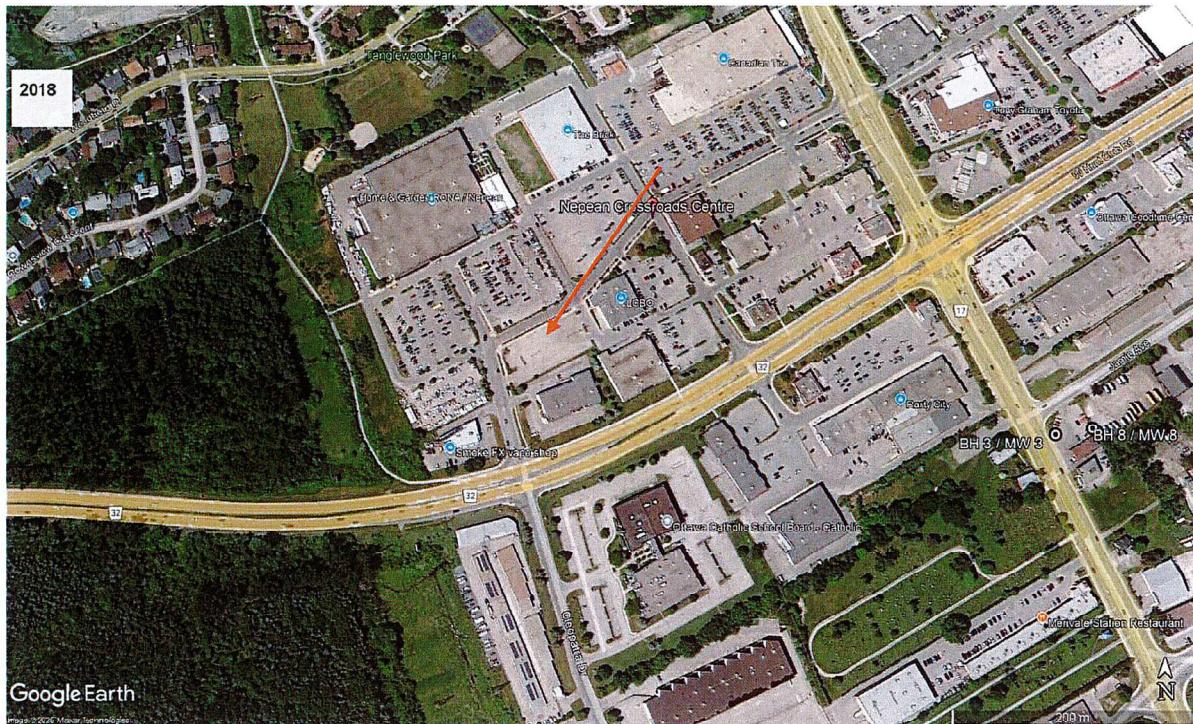

The satellite image taken in 2007 shows the Site property operating as an exterior storage area with many objects present. The adjoining and neighbouring properties appear similar in use as they did in the 2004 image.

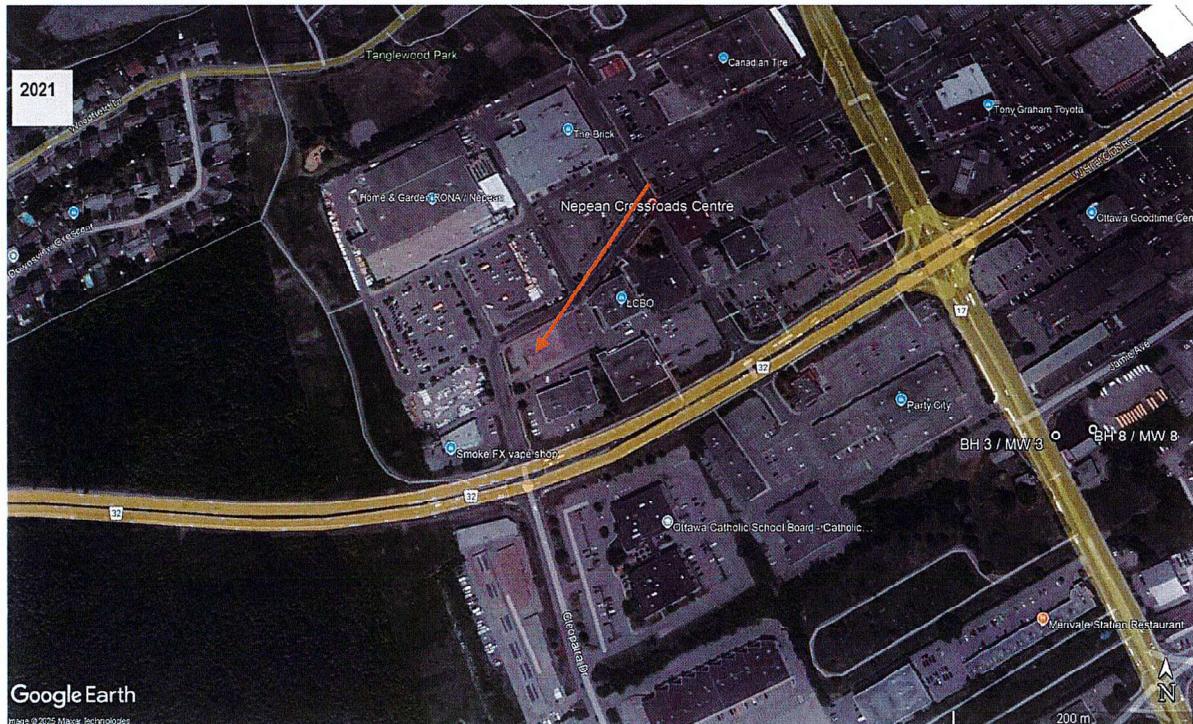

The satellite image taken in 2008 shows the Site property as vacant with no objects present. The adjoining and neighbouring properties appear similar in use as they did in the 2004 image.

The satellite image taken in 2014 shows no significant changes in the use of the Site property since the 2008 image was recorded except for a vehicle located at the centre of the Site. The adjoining property located to the south appears unchanged in use since the 2008 image. The neighbouring property located to the west now appears to operate as an exterior storage area. The neighbouring properties located to the north and east have remained similar in use since the 2008 image.

The satellite image taken in 2018 shows no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2014 image was recorded.

The satellite image taken in 2021 shows no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 2018 image was recorded.

The satellite image taken in 2024 shows no significant changes in the use of the Site property or at the adjoining and neighbouring properties since the 20121 image was recorded.

**Appendix K  
Physical Settings Report**

## Property Information

Order Number:	25021200500p
Date Completed:	February 13, 2025
Project Number:	
Project Property:	Parking lot south of 585 Hunt Club Road, Ottawa Parking lot south of 585 West Hunt Club Road Ottawa ON K2G 5X6

Wells and Additional Sources.....	29
Report Summary.....	30
Detail Report.....	31
Radon Information.....	39
Area of Natural and Scientific Interest.....	40
Appendix.....	42
Liability Notice.....	44

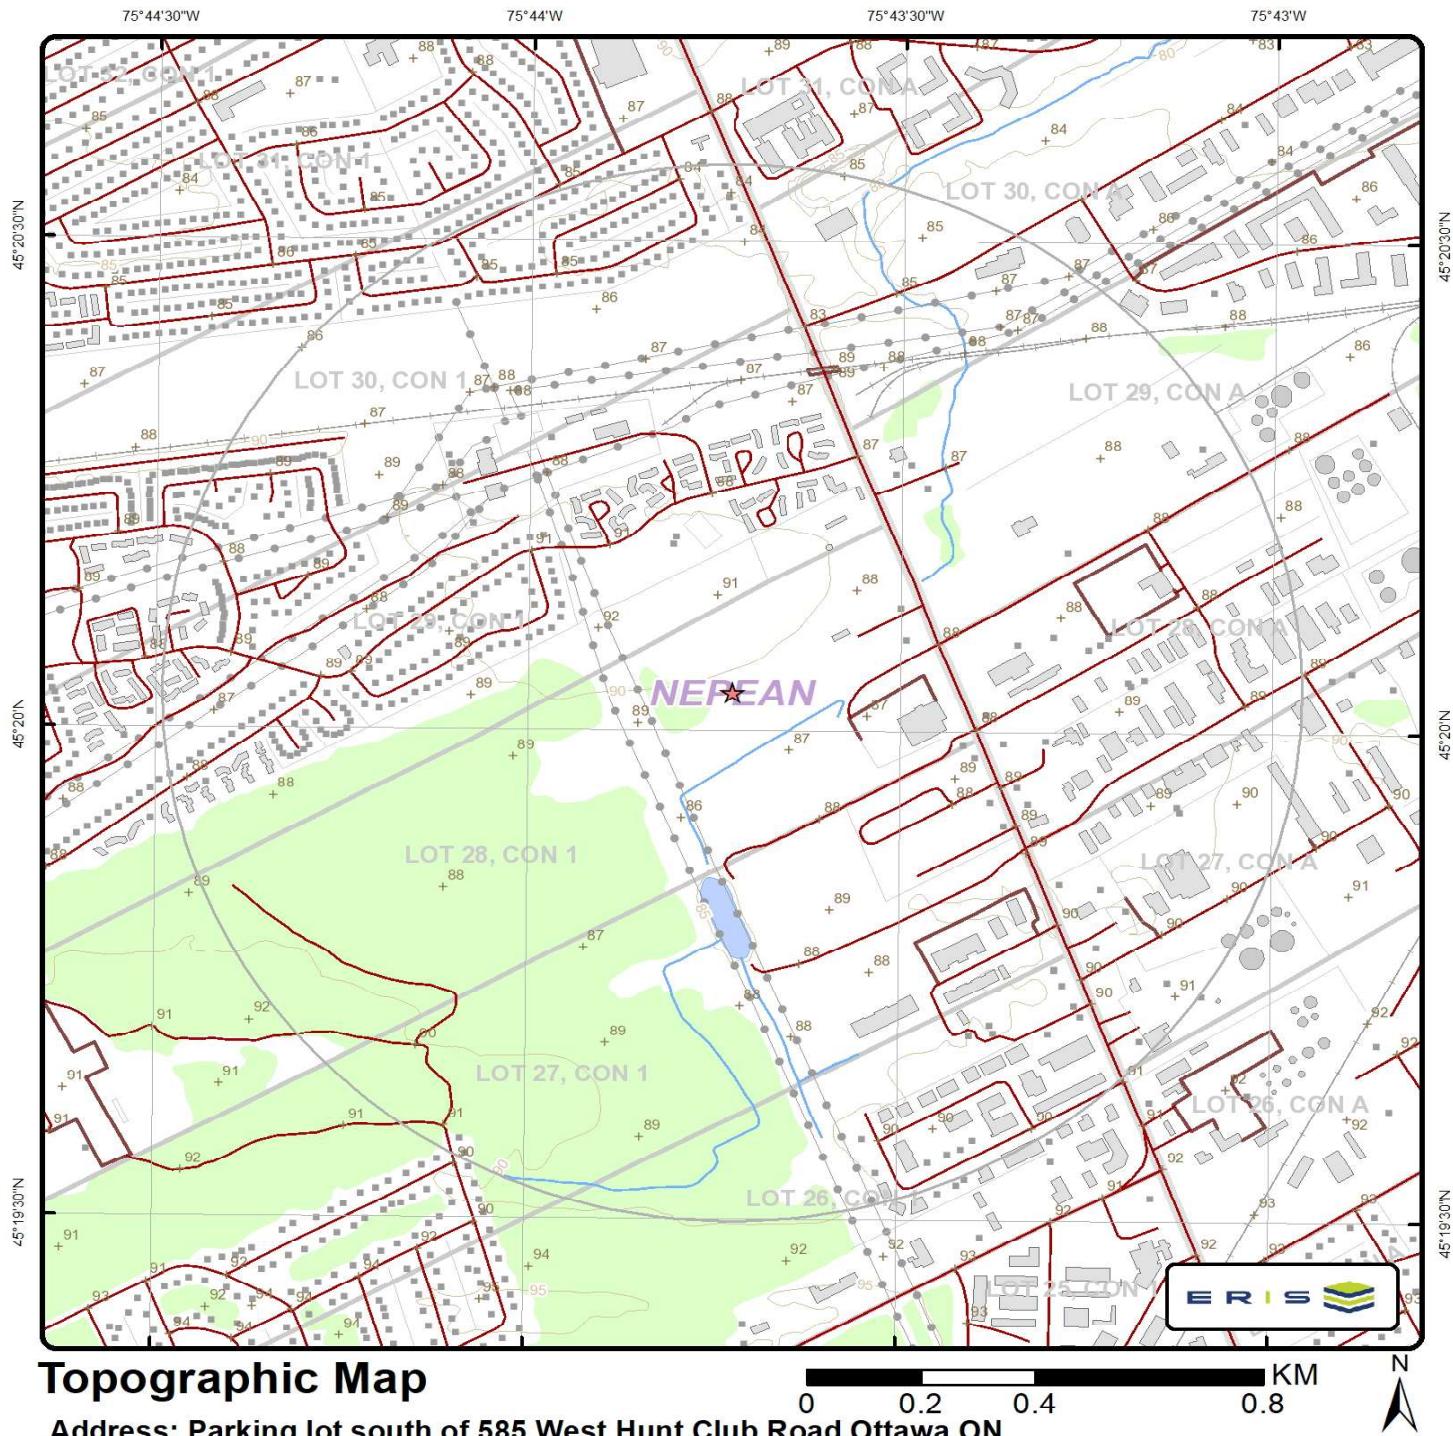

The ERIS **Physical Setting Report - PSR** provides comprehensive information about the physical setting around a site and includes a complete overview of topography as well as hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

### Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

## Topographic Information

+	Spot Height (metre)	—	Transportation Structure	—	Contour Line	—	Wooded Area
▪	Building Point	•	Utility Line	—	Pit or Quarry	—	Conservation Authority
桅	Towers	—	Water Structure	—	Waterbody	—	Conservation Area

Forested Wetland	Peatland Bog	Shallow Water	

## Geologic Information

## Bedrock Geology

This map shows bedrock geologic units in the area. Please refer to the report for detailed descriptions. Data coverage is shown to the right. Gray indicates no data available in the area.

## Geologic Information

Detailed bedrock geology information about each unit within the search radius is provided below.

---

### Unit ID 19115

Unit Name:

Rock Type: Dolostone, sandstone

Strata: Beekmantown Group

Super Eon:

Eon: PHANEROZOIC (Present to 542.0 Ma)

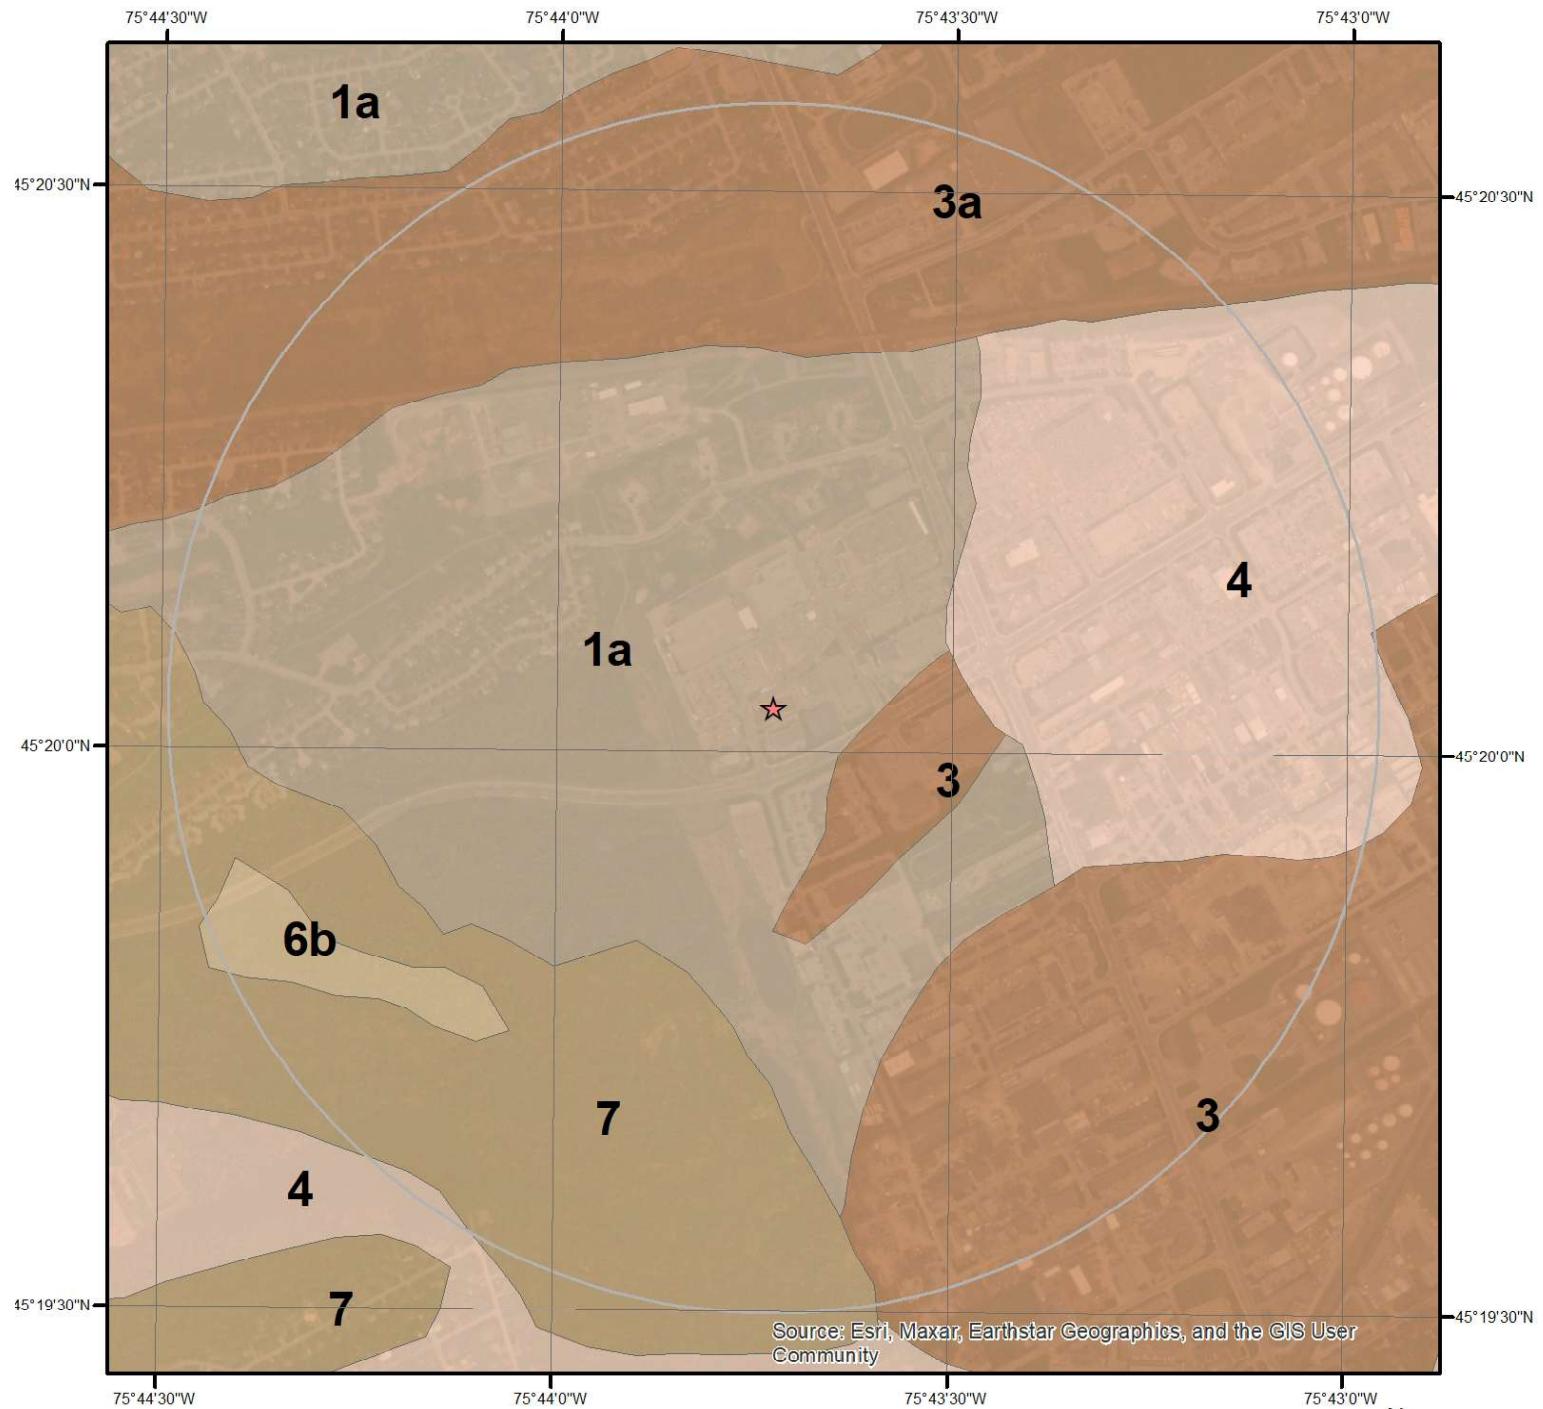

Era: PALEOZOIC (251.0 Ma to 542.0 Ma)

Period: ORDOVICIAN (443.7 Ma to 488.3 Ma)

Epoch: LOWER ORDOVICIAN

Province:

Tectonic Zone:

## Surficial Geology

This map shows surficial geologic labels in the area. Please refer to the report for detailed descriptions. Data coverage is shown to the right. Gray indicates no data available in the area.

## Geologic Information

Detailed surficial geology information about each unit within the search radius is provided below.

---

### Unit ID 3a

Geological Deposit:	Offshore marine deposits
Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	clay, silt
Secondary Material:	
Primary General:	glaciomarine
Primary General Modifier:	foreshore/basinal
Veneer:	silt, sand
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	Low
Material Description:	Clay and silt underlying erosional terraces; upper part of marine deposits removed to variable depths by fluvial erosion so in places clay is uniform blue-grey; unit includes lenses, bars and channel fills to sand and pockets of nonmarine silt that were formed during terrace (or channel) cutting.

---

### Unit ID 4

Geological Deposit:	Deltaic and estuarine deposits
Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	sand
Secondary Material:	
Primary General:	glaciomarine
Primary General Modifier:	deltaic
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	High
Material Description:	Medium-to fine-grained sand, in some places fossiliferous; lies outside abandoned channels; most common deposit is a combined strip delta-sand plain that developed as water levels fell.

---

### Unit ID 7

Geological Deposit:	Organic deposits
Deposit Age:	Recent

## Geologic Information

Primary Material:	organic deposits
Secondary Material:	
Primary General:	wetland
Primary General Modifier:	
Veneer:	
Episode:	Hudson
Sub Episode:	
Strata Modifier:	Surface
Provenance:	
Carbon Content:	
Formation:	
Permeability:	High
Material Description:	Mainly muck and peat in bogs, fens, swamps and poorly drained areas.

### Unit ID 1a

Geological Deposit:	Till
Deposit Age:	Quaternary
Primary Material:	diamicton
Secondary Material:	
Primary General:	glacial
Primary General Modifier:	
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	N-NE
Carbon Content:	
Formation:	Undifferentiated silty-sandy till on Paleozoic terrain
Permeability:	Low-Medium
Material Description:	Sandy and silty compact diamicton, grey at depth but brown where oxidized; calcareous where derived from sedimentary rocks and not leached; consists dominantly of lodgment till. In areas that lie below marine limit (198 m a.s.l.) it is overlain by a discontinuous lag consisting of gravel, sand and boulders

### Unit ID 3

Geological Deposit:	Offshore marine deposits
Deposit Age:	Quaternary (Champlain Sea)
Primary Material:	clay, silt
Secondary Material:	sand
Primary General:	glaciomarine
Primary General Modifier:	foreshore/basinal
Veneer:	
Episode:	Wisconsin
Sub Episode:	Michigan
Strata Modifier:	Surface
Provenance:	
Carbon Content:	

## Geologic Information

Formation:

Permeability:

Low

Material Description:

Clay, silty clay and silt, commonly calcareous and fossiliferous; locally overlain by thin sands. Upper parts are generally mottled or laminated reddish brown and bluish grey and may contain lenses and pockets of sand, but at depth the clay is uniform and blue-grey.

### Unit ID 6b

Geological Deposit:

Alluvial deposits

Deposit Age:

Recent

Primary Material:

sand

Secondary Material:

silt

Primary General:

fluvial

Primary General Modifier:

abandoned floodplain

Veneer:

Episode:

Hudson

Sub Episode:

Strata Modifier:

Surface

Provenance:

Carbon Content:

Formation:

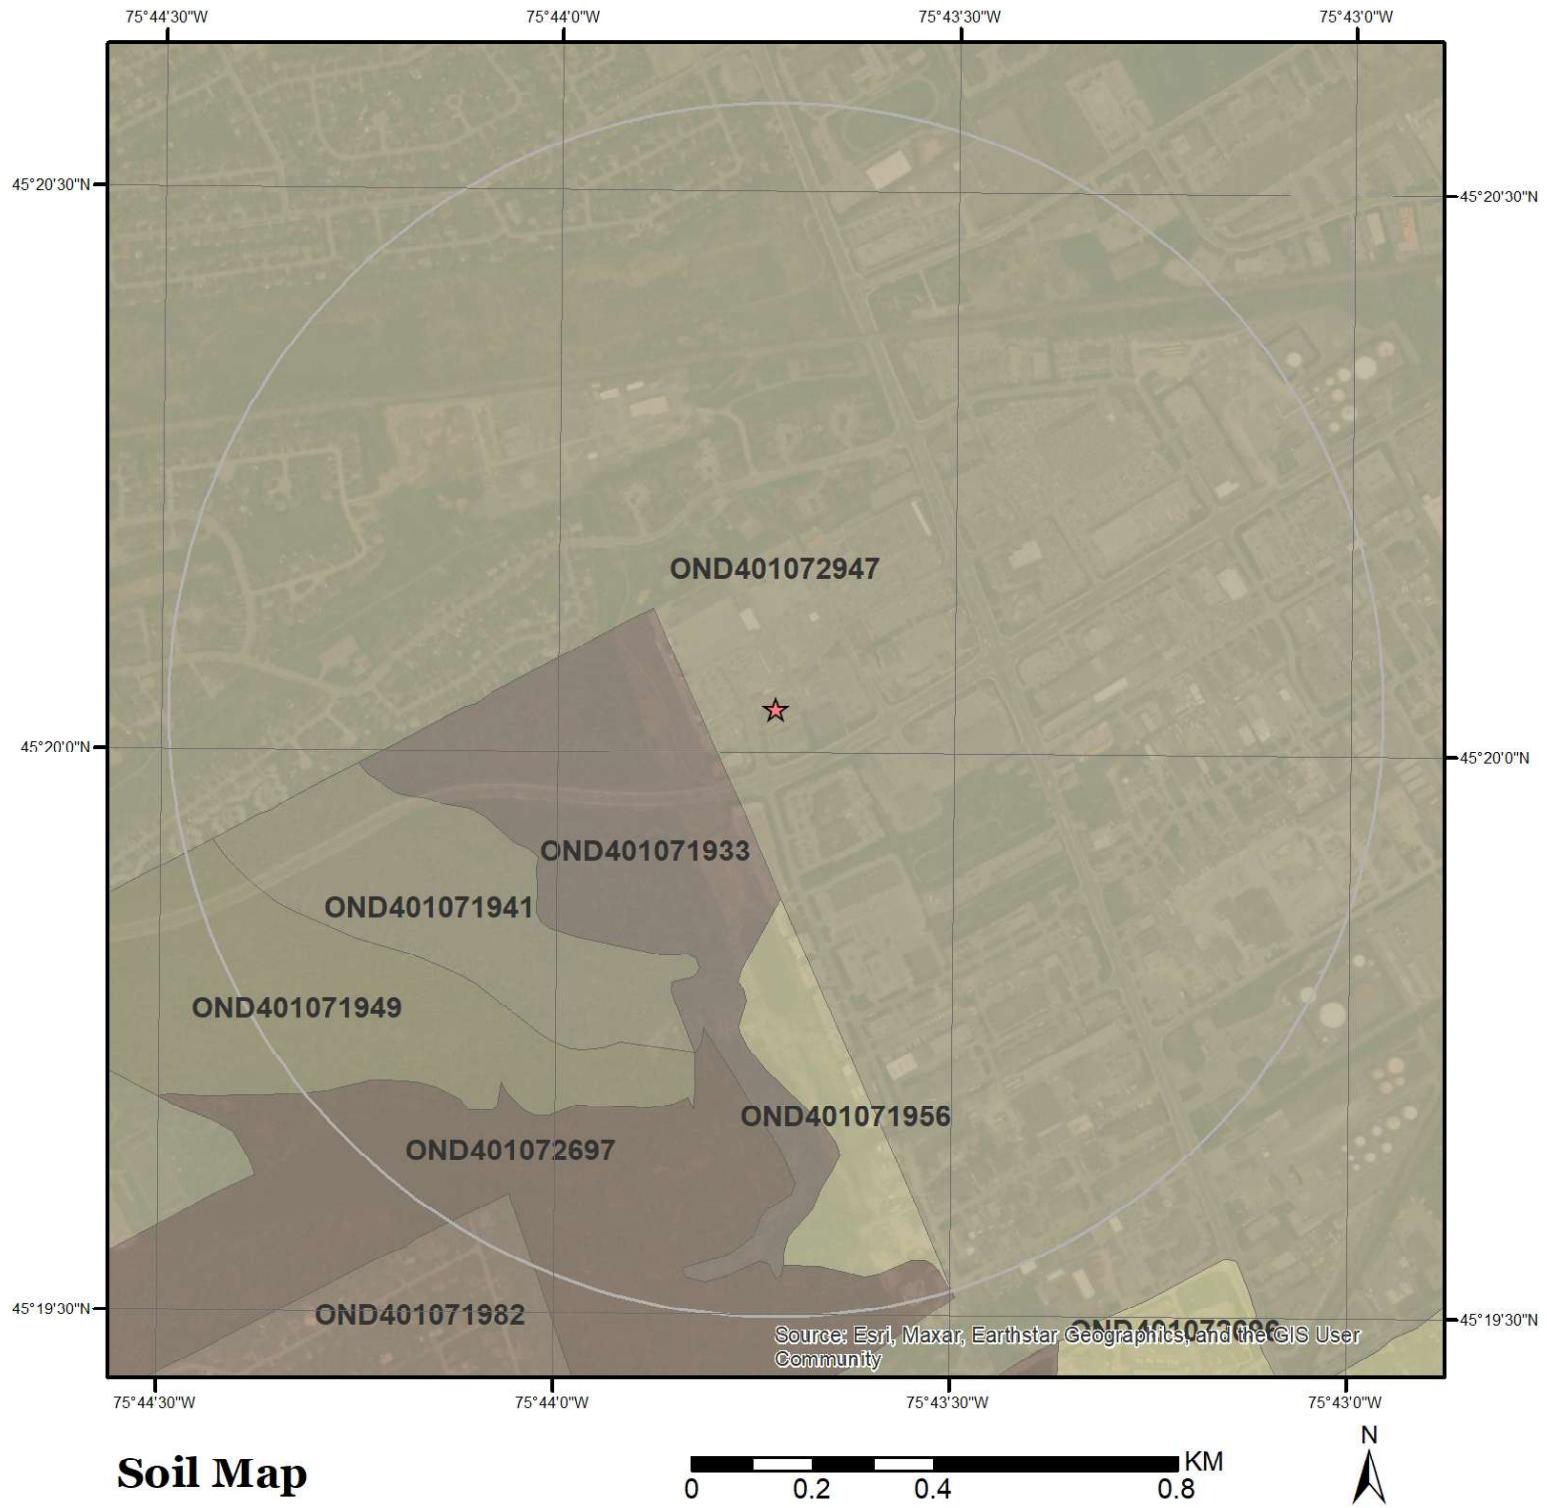

Variable

Permeability:

Material Description:

Medium grained stratified sand with some silt; in the form of fluvial terraces and channels cut in marine clay, and bars and spits within abandoned channels.

## Soil Information

## Soil Map

This map shows soil units around the target property. Please refer to the report for detailed soil descriptions.

## Soil Information

Detailed soil information about each unit within the search radius is provided below.

## Radon Information

Detailed radon information for the project property is provided below.

### Radon Zone Information

---

**ID:** 144852      **Radon Rank:** LOW

### Health Canada Radon Information

---

**Health Region:** 3551  
**Health Region Name:** City of Ottawa Health Unit  
**Province or Territory:** ON  
**Number Homes in Survey:** 64  
**% Below 200 Bq/m<sup>3</sup>:** 93.8  
**% Above 200 Bq/m<sup>3</sup>:** 6.2  
**200 to 600 Bq/m<sup>3</sup>:** 6.2  
**% Above 600 Bq/m<sup>3</sup>:** 0

## Area of Natural and Scientific Interest Information

## Area of Natural & Scientific Interest (ANSI)

 ANSI Area

Source: ANSI (ANSI) March 2017, Ontario Ministry of Natural Resources

## Area of Natural and Scientific Interest Information

Detailed ANSI information is provided below.

---

**ANSI ID: 251213648**

ANSI Name:	Pinhey Forest
Type:	Candidate ANSI, Life Science
Significance:	Regional
Area (sqm):	1620058.434
Comments:	Ansi, Life Science

## Appendix

### Federal Sources

#### Bedrock Geology of Canada

**BEDROCK GEOLOGY**

The Geological Map of Canada is scaled at 1:5,000,000. This map is created by Geological Survey of Canada and published by Natural Resources Canada.

#### Health Canada Radon Information

**RADON**

This source is the results from the Cross-Canada Survey of Radon Concentrations in Homes, a two-year study conducted by Health Canada's National Radon Program. The aims of this study were to obtain an estimate of the proportion of the Canadian population living in homes with radon gas levels above the guideline of 200 Bq/m<sup>3</sup>, to identify previously unknown areas where radon gas exposure may constitute a health risk, and to build, over time, a map of indoor radon gas exposure levels across Canada.

#### National Energy Board Wells

**NEBP**

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

#### Soil Landscapes of Canada (SLC)

**SLC**

Major characteristics of soil and land such as surface form, slope, water table depth, permafrost and lakes.

#### Surficial Geology of Canada

**SURFICIAL GEOLOGY**

This map contains information on surficial materials and associated landforms left by the retreat of the last glaciers and non glacial environments. It is based on compilation of existing maps. This data was authored by the Geological Survey of Canada and published by Natural Resources Canada.

#### Toporama

**TOPORAMA**

Toporama covers the entire area of Canada's landmass and provides topographic, geo-referenced, and symbolic information in a raster format at 1:50,000 scale. This is a digital topographic reference product made available by Natural Resources Canada (NRCan).

### Provincial Sources

#### Area of Natural and Scientific Interest

**ANSI**

Areas of Natural and Scientific Interest (ANSIs) are lands and waters with features that are important for natural heritage protection, appreciation, scientific study or education. This dataset is made available by Ontario Ministry of Natural Resources.

#### Bedrock Geology of Ontario

**BEDROCK GEOLOGY**

The Bedrock Geology layer shows the distribution of bedrock units underlying Ontario at a 1:250,000 scale. The geology of the province consists of Precambrian rocks of the Canadian Shield and Phanerozoic sedimentary rocks that overlie the Canadian Shield. This layer was compiled by the Precambrian Geoscience Section of Ontario Geological Survey.

#### Ontario Detailed Soil Survey (DSS3)

**SOIL SURVEY**

Soil surveys have been published for most of the agricultural areas, and many surrounding areas, across Canada. Data from these surveys comprise the most detailed soil inventory information in the National Soil DataBase. Data is made available by Agriculture and Agri-Food Canada

#### Ontario Oil and Gas Wells

**OOGW**

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

#### Provincial Groundwater Monitoring Network

**GROUNDWATER**

## Appendix

Groundwater level and chemistry data from monitoring wells that are part of the Provincial Groundwater Monitoring Network (PGMN) Program. Precipitation data (rain) is also available for some sites. This data is provided by Ontario Ministry of Environment and Climate Change.

### Surficial Geology of Ontario

### **SURFICIAL GEOLOGY**

The Surficial Geology dataset contains a layer depicting the distribution and characteristics of surficial deposits across southern Ontario. This data set is authored by the Ontario Geological Survey.

### Topographic Map of Ontario

### **TOPOGRAPHIC MAP**

The Ontario Basic Mapping program provides a relationship between topographic information and the provincial geographical referencing grid, thereby forming the foundation for a comprehensive provincial geographical referencing system. This data is made available by the Ontario Ministry of Natural Resources and Forestry. This is ERIS self-designed topographic map template at 1:10,000.

### Water Well Information System

### **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

### Wetlands of Ontario

### **WETLAND**

The Ministry of Natural Resources and Forestry has made available a database of wetlands in Ontario. Certain attributes identify wetlands that have been evaluated with the Ontario Wetland Evaluation System (OWES), and of those which ones have been designated as Provincially Significant Wetlands (PSW).

## Private Sources

### Oil and Gas Wells

### **OGWE**

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

### Radon Zone Information

### **RADON**

The Radon Potential Map is developed by Radon Environmental Management Corporation. Its objective was to illustrate the relative variation of radon risk across the country, and in 2011 it published its first geologic Radon Potential Map of Canada.

**To:** 311@ottawa.ca; Steve Rowland; DRENGWest / EPAINGOuest; Dieme, Abi  
**Cc:** Gib McIntee; Gib McIntee; Roy, Jean-Miguel  
**Subject:** 585 West Hunt Club Road (City File#D07-12-25-0132)

Good morning Steve,

The site has direct access to private watermains, though the exact location should be confirmed through locates. LRL Engineering are preparing the Civil Design for the site, and should be able to coordinate with you on this matter.

Below is a snapshot from GeoOttawa where approximate location of existing services are shown. You may access this information by visiting

<https://maps.ottawa.ca/geoottawa/>

Let us know if you have any more questions.

Regards,

Oleksandr (Alex) Polyak, B.Eng., C.E.T., P.Eng.

**Subject:** question re: Potable water availability

Good morning,

St. Lawrence Testing is preparing a Phase 1 ESA for a property located at PIN 04629-0906. This property is within the Nepean Crossroads Centre and is currently a parking lot. In preparing the ESA, I would like to know if this property is currently serviced or can be serviced with potable water from the City of Ottawa.

Best regards,

Steve Rowland
