Stantec

# Executive Summary

Stantec Consulting Ltd. (Stantec) conducted a Phase One Environmental Site Assessment (ESA) on the northeast part of 1900 Cyrville Road, Ottawa, Ontario, hereinafter referred to as the "Phase One Property" or the "Site". The objective of the Phase One ESA was to determine if Areas of Potential Environmental Concern (APECs) exist at the Phase One Property as a result of past and/or current potentially contaminating activities (PCAs) on the Phase One Property or adjacent/neighbouring properties within at least 250 metres (m) of the perimeter of the Phase One Property ("Phase One Study Area").

The Phase One ESA was undertaken for Costco Wholesale Canada Ltd. (Costco) in support of a Site Plan Control Application (SPCA) for a proposed retail fuel outlet (RFO) at the Site. Stantec understands that a Record of Site Condition (RSC) is not required by the Ontario Ministry of the Environment, Conservation, and Parks (MECP) as the current land use of the Phase One Property will remain unchanged from its current commercial use. As such, the Phase One ESA was completed in general accordance with Ontario Regulation 153/04 (O. Reg. 153/04), as amended.

The Phase One Property exists as an asphalt concrete paved parking area encompassing approximately 0.29 hectares in size and immediately bound by off-site parking areas to the north, west, and south, and Cyrville Road to the east. The Site is located on the west side of Cyrville Road, approximately 30 m south of Innes Road.

**Phase One Property**

Based on the historical review, the Phase One Property was first developed with a residential dwelling and a barn prior 1945 until it was redeveloped for commercial use circa 1991. Since 1991, the Phase One Property has been used exclusively as a laneway and parking area associated with the existing Gloucester Costco Business Centre Warehouse located on the adjacent west part of 1900 Cyrville Road.

Given that the Phase One Property was redeveloped from its former residential/agricultural land use to the present-day parking area for commercial use, fill material of unknown origin was likely imported for Site grading. Fill material of unknown quality was also encountered during a subsurface field investigation conducted on February 27 and 28, 2025 at the Phase One Property. This subsurface investigation was completed as part of a Limited Excess Soil Program and a Preliminary Geotechnical Investigation for the proposed development. Hence, fill material of unknown quality (PCA-1) is expected to be present, representing an APEC at the Phase One Property (**APEC-1**).

The 2025 subsurface investigation consisted of the advancement of four boreholes across the Site, of which, one was completed as a groundwater monitoring well. No groundwater samples were submitted as part of this field program. Select soil samples were collected and submitted for laboratory analysis. The soil analytical results, compared to the applicable O. Reg. 153/04 Table 3 Site Condition Standards (SCS) for industrial, commercial, and community land use, indicated the presence of petroleum hydrocarbon (PHC) impacted soil exceeding the applicable Table 3 SCS at the investigated location in the northwest corner of the Phase One Property from a sampling depth of approximately 2.9 m below ground surface. The identified PHC-impacted soil was considered a PCA (PCA-2) contributing to an APEC (**APEC-2**) at the Phase One Property.

Following the historical and records review, a site reconnaissance was conducted to investigate any new PCAs associated with the current use and/or operations at the Phase One Property. No additional PCAs were identified at the Site.

**Phase One Study Area**

Based on the historical review, the properties within the Phase One Study Area were largely undeveloped and used for residential and agricultural purposes prior to 1945 until circa 1976. Neighbouring lands along Innes Road were partially developed for commercial to light industrial uses. A total of nine off-site PCAs were identified on the neighbouring properties. Two historical off-site PCAs were identified with the adjacent east properties located at 1720 Innes Road and 1901 Cyrville Road (formerly 1500-1550 Innes Road), approximately 30 m east of the Phase One Property. These properties were listed as a commercial bus company that operated a private fuel outlet (PFO) and service garage (PCA-3a) and registered as a hazardous waste generator (PCA-3b). Based on the proximity of these operations relative to the Site, these PCAs contribute to an APEC (**APEC-3**) at the Phase One Property. The remaining eight off-site PCAs (PCA-4 to PCA-11) were not considered to represent APECs, based on the separation distances of the PCAs relative to the Phase One Property, the downgradient or cross-gradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or the nature of operations and potential contaminants related to these operations.

Following the historical and records review, a visual assessment of publicly-accessible off-site properties in the area of the Phase One Property was conducted during the site reconnaissance. Properties within the Phase One Study Area consisted primarily of commercial retailers along Innes Road, commercial and residential on Cyrville Road (north of the Innes Road), and a mix of commercial properties along Cyrville Road (south of Innes Road). One existing PCA (i.e., an RFO) was identified 155 m west on Innes Road; however, based on the separation distance relative to the Phase One Property, the RFO located at 1494 Innes Road does not contribute to an APEC.

## Conclusions

Based on the results of this Phase One ESA, four PCAs (PCA-1, PCA-2, PCA-3a, and PCA-3b) were found to contribute to three APECs (APEC-1, APEC-2, and APEC-3) at the Phase One Property, as per Table 2 of Schedule D of O. Reg.153/04, as amended. The PCAs contributing to APECs are as follows:

- **APEC-1**: *Item 30 - Importation of Fill Material of Unknown Quality*, resulting from the redevelopment of the Site in circa 1991, as identified during the 2025 subsurface investigation (PCA-1);
- **APEC-2**: *Other - Soil Contamination*, resulting from the on-site PHC F2-impacted soil identified during the 2025 excess soil sampling program (PCA-2);
- **APEC-3a**: *Item 52 - Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems*, resulting from historical commercial bus depot operations located at 1720 Innes Road and 1901 Cyrville Road (formerly 1500-1550 Innes Road), approximately 30 m east of the Site (PCA-3a); and
- **APEC-3b**: *Other - Hazardous Waste Generation*, resulting from the historical commercial bus depot operations at 1720 Innes Road and 1901 Cyrville Road, approximately 30 m east of the Site (PCA-3b).

## Recommendations

Given that the above APECs have the potential to impact soil and groundwater at the Site, Stantec recommends that a Phase Two ESA is conducted in accordance with O. Reg. 153/04, as amended, to evaluate the environmental conditions at the Phase One Property. This recommended Phase Two ESA is also a mandatory requirement of the SPCA submission to the City of Ottawa based on the Phase One ESA findings.

The statements made in this Executive Summary are subject to the project conditions described in the Closure (**Section 8.0**) and are to be read in conjunction with the remainder of this report.

# 1 Introduction

## 1.1 Phase One Property Information

The Phase One Property (hereinafter also referred to as the Site) is situated within the northeast part of a commercial property with a civic address of 1900 Cyrville Road, Ottawa, Ontario, which is Gloucester Costco Business Centre Warehouse (Costco Business Centre). The Phase One Property consists of an exterior parking lot with some landscaped area associated with the off-site Costco Business Centre operations and an access road fronting Cyrville Road on the north portion. Information on the Phase One Property is provided in **Table 1** below.

**Table 1 Phase One Property Information**

| Phase One Property | Description |
|---|---|
| Municipal Address | Northeast part of 1900 Cyrville Road, Ottawa, Ontario |
| Legal Description | Part of Lot 22, Concession 3 of Ottawa Front, in the Geographical Township of Gloucester (now in the City of Ottawa), Northeast Portion of Part 1 of Plan 5R-13035. |
| Property Identification Number | 04351-0007 (northeast portion) |
| Coordinates (UTM) | 18T 452878.14 E, 5029298.35 m N |
| Area | Approximately 0.29 hectares |
| Zoning* | GM12 – General Mixed-Use Zone (City of Ottawa Zoning By-law 2008-250) |
| Current Use | Vehicular parking associated with the Costco Business Centre |
| Utility Services | Municipal water and sanitary/sewer services |

**Note(s):**

* It should be noted that a new Zoning By-law was approved by the Ottawa City Council on January 28, 2026 (New Zoning By-law 2026-50 – FINAL DRAFT). The Phase One ESA Property is zoned as MS2 – Mixed Use Zone (Mainstreet) in the new Zoning By-law. An enactment of this new Zoning By-law is anticipated to be in mid-March 2026.

A Survey Plan is provided in **Appendix A**. Figures showing the Site Location and the Site Features are included in **Appendix B**. Select Site photographs are presented in **Appendix C**.

## 1.2 Contact Information

Stantec Consulting Ltd. (Stantec) was commissioned by Costco Wholesale Canada Ltd. (Costco) to conduct this Phase One Environmental Site Assessment (ESA). Contact information for the Phase One Property owner is as follows:

**Patrick Lau:**
Costco Wholesale Canada Ltd.
#330, 9090 avenue du Pare
Montréal, Québec  H2N 1Y8

# 2 Scope of Investigation

## 2.1 Phase One ESA Scope of Work

The Phase One ESA was conducted for Costco in support of a Site Plan Control Application (SPCA) to the City Ottawa for a proposed retail fuel facility development at the Site. The Phase One ESA was completed in general accordance with Ontario Regulation 153/04 (O. Reg. 153/04), as amended. Stantec understands that a Record of Site Condition (RSC) is not required by the Ontario Ministry of Environment, Conservation, and Parks (MECP) for the SPCA purposes.

The objectives of this Phase One ESA were to:

- Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in, or under the Phase One Property.
- Assess the potential need for a Phase Two ESA.
- Provide a basis for carrying out a Phase Two ESA, if necessary.
- Provide adequate preliminary information about environmental conditions in the land or water on, in, or under the Phase One Property to conduct a risk assessment following completion of a Phase Two ESA, if required.

A Phase One ESA is intended to reduce, but not necessarily eliminate, uncertainty regarding the potential for contamination at a property. The Phase One ESA carried out by Stantec at the Phase One Property satisfied the general requirements of O. Reg. 153/04 and consisted of the following:

- A review of records that included, but was not limited to, the following (where available):
    - Publicly available city directories, aerial photographs, fire insurance plans, geological and topographic maps.
    - Requests to the MECP for documents related to various environmental concerns associated with the municipal address that comprises the Phase One Property and select neighbouring properties (e.g., spills, incident reports, etc.).
    - Requests to the Technical Standards and Safety Authority (TSSA) for records related to fuel storage tanks, spills, and contamination records for the municipal address that comprises the Phase One Property.
    - Request to the Municipality for documents related to various environmental concerns associated with the municipal address that comprises the Phase One Property and select neighbouring properties.
    - An Environmental Risk Information Services (ERIS) report consisting of a search of available databases within a 250 metres (m) radius of the centre of the Phase One Property.
- An interview of a person having knowledge of the Phase One Property.

- A site reconnaissance to identify Potential Contaminating Activities (PCAs) associated with:
    - Current on-site operations.
    - Waste generation.
    - Fuel, chemical and waste storage.
    - Exterior conditions including surface features, fill material and wells.
    - Off-site activities and operations.
- Evaluation of information from records reviewed, interviews, and site reconnaissance.
- Preparation of a Phase One ESA report.

A Phase One ESA does not include sampling or testing of air, soil, groundwater, surface water, or building materials. This assessment did not include a review or audit of compliance with any environmental legislation applicable to the Phase One Property, or of any environmental management systems which may exist for the Phase One Property.

A site reconnaissance was conducted by Mia Dinh of Stantec on May 9, 2025, and more recently by Ryan Story of Stantec on February 17, 2026 to verify that the Site remained unchanged since the May 2025 site visit. The Phase One Property and readily visible and publicly accessible portions of adjoining and neighbouring properties within the Phase One Study Area were observed for PCAs. Stantec was unaccompanied during the site reconnaissance, however, a questionnaire interview form pertinent to the Phase One Property was submitted to Costco on February 18, 2026. Completed questionnaire form was received from Patrick Lau of Costco via email on February 26, 2026.

The Phase One ESA was performed under the supervision of Mandy Witteman, M.A.Sc., P.Eng., $QP_{ESA.}$ This Phase One ESA report was reviewed by Jaka Suryana, B.Sc., P.Eng., $QP_{ESA}$ and Randy Sinukoff, M.A.Sc., P.Eng., $QP_{ESA}$. Qualifications of the project team are shown in **Appendix D**.

## 2.2 Regulatory Framework

In Ontario, the roles and powers of the MECP when dealing with contaminated sites are outlined primarily in the *Environmental Protection Act* (R.S.O. 1990). The MECP has a mandate to address conditions where there is an adverse effect, or the likelihood of an adverse effect, associated with the presence or discharge of a contaminant. O. Reg. 153/04 provides roles and responsibilities for property owners and consultants to use when assessing the environmental condition of a property when determining whether or not restoration is required and in determining the kind of restoration needed to allow continued use or reuse of a property. The regulation includes generic numerical standards for soil and ground water quality for specific land and ground water uses. A Phase One ESA is an initial step in the site assessment process, which may lead to the requirement for restoration work if areas of potential environmental contamination are identified. During a Phase One ESA, samples are not collected; however, if there are previous soil or groundwater sample results available, the results are compared to the applicable O. Reg. 153/04 Site Condition Standards (SCS).

# 3 Records Review

## 3.1 General

### 3.1.1 Phase One Study Area Determination

Surrounding properties located wholly or partially within 250 m of the Phase One Property boundaries were determined to be the Phase One Study Area. PCAs identified on properties outside the Phase One Study Area were not expected to contribute to an area of potential environmental concern (APEC) at the Phase One Property.

### 3.1.2 First Developed Use Determination

The first developed use of the Phase One Property was determined through a review of the 1945, 1955, 1965, 1976, 1985, and 1991 aerial photographs. Based on the 1945 aerial photograph, the Phase One Property appeared as developed land, occupied by a residential dwelling and a barn until the Site was redeveloped circa 1991 with its current commercial land use as a parking lot. While the exact year of first developed used was not known, for the purpose of this assessment, the first developed use of the Phase One Property was inferred to be residential and agricultural uses in circa 1945.

### 3.1.3 Fire Insurance Plans

A search of Fire Insurance Plans (FIPs) for the Phase One Property or properties within the Phase One Study Area indicated that there were no records available.

### 3.1.4 City Directories

A search of the city directories for the Phase One Study Area was completed and summarized by ERIS. City directory records between 1960 and 2023 were reviewed in order to identify historical listings of the Site and properties within the Phase One Study Area that may represent PCAs and contribute to APECs at the Phase One Property.

Stantec's review of the city directories for the Phase One Property identified that the overall Costco Business Centre property was previously listed under a private individual with the municipal address of 1542 Innes Road in 1976 until 1981/1982. The property (at whole) was listed as 'vacant' and 'not verified' in 1991 and 1996, respectively. In the 1997 city directories, the property, bearing the current municipal address of1900 Cyrville Road, was listed under Price Club (now Costco). The previous municipal address of 1542 Innes Road was no longer listed. From 1997 to 2000, Actmedia Canada Inc. was included in the listing for 1900 Cyrville Road, followed by In Store Focus from 2012 to 2017, Dr. Michelle Davidson Association (opticians/optical store), Glentel/Wireless ETC (cellular telephone services), and a Tire Care Centre from 2021 to 2023.

Based on the findings of the city directories review, Stantec inferred that the Phase One Property was used for residential/agricultural purposes prior to 1991, and has been used as a commercial parking lot associated with the Costco Business Centre since circa the mid-1990s.

It should be noted that a Tire Care Centre was listed at this property from 2021 to 2023. Stantec inferred that the Tire Care Centre could have performed automotive fluid service as well (i.e., oil changes, brake fluid and transmission fluid maintenance services, etc.), and thus, was considered to represent an off-site PCA. The city directories from 1971 to 2023 also listed several commercial service providers, restaurants, and retailers on surrounding lands along Innes Road and Cyrville Road. Three additional off-site PCAs were identified during the review of the city directories and are summarized in **Table 2** below.

**Table 2 City Directory Records – Off-Site PCAs**

| Municipal Address(es) | Listing and/or Description | Potentially Contaminating Activities | Approximate Location Relative to the Phase One Property | Listed Year(s) |
|---|---|---|---|---|
| 1900 Cyrville Road | Tire Care Centre (part of off-site Costco Business Centre) | Other - Hazardous Waste Generation | 100 m southwest | 2012 – 2022 |
| 1500-1550 Innes Road (now 1720 Innes Road and 1901 Cyrville Road) | Capital Coach Lines, Laid Law, City Truck Bus Service Centre, Capital Buses | Item 52 - Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems | 30 m east | 1971 - 1997 |
| 1494 Innes Road | Essa Station (retail fuel outlet) | Item 28 - Gasoline and Associated Products Storage in Fixed Tanks | 155 m west | 1991 – 2006/07 |
| 1741 Innes Road | Essa Station, McEwen Fuels, Saab Station (retail fuel outlet) | Item 28 - Gasoline and Associated Products Storage in Fixed Tanks | 230 m northwest | 1971 – 2006/07 |

Based on the proximity of the commercial bus company located on the adjacent east property and service centre listed in the 1991 city directories, Stantec inferred that this commercial business operated a vehicle/bus maintenance garage. Therefore, this off-site PCA is considered to contribute to an APEC (**APEC-3**) at the Phase One Property. The two retail fuel outlets (RFO) located at 1494 and 1741 Innes Road are not considered to represent PCAs contributing to APECs at the Phase One Property, based on the separation distances from the Site. A copy of the city directory records is provided in **Appendix E**.

A summary of the PCAs identified on properties within the Phase One Study Area is presented on **Figure No. 3**, **Appendix B**, and discussed in **Section 6.2**.

### 3.1.5 Chain of Title

Stantec obtained a GeoWarehouse® report for the municipal property addressed 1900 Cyrville Road, Ottawa, Ontario to verify authoritative property ownership information in lieu of a chain of title search for the Phase One Property. The report indicated the entities of the last three property transfers/land title holders between May 1994 and March 2022.

In May 1994, the land ownership was transferred to 867629 Ontario Inc. from an undisclosed entity, followed by an ownership transfer to Canada Property (Trustee) No. 1 Limited in May 2005, and to the current land title holder, Costco Wholesale Canada Ltd., in March 2022.

It should be noted that the 1991 aerial photograph, shows that the property at 1900 Cyrville Road was redeveloped with the present-day warehouse/retail building and parking lot, which was first listed in the city directories in 1997, under Costco's former business name, Price Club. Based on information from GeoWarehouse® in combination with aerial photographs and city directories, Stantec inferred that the Phase One Property has been owned and operated by Costco and/or its affiliates since the early 1990s. A copy of the GeoWarehouse® report is provided in **Appendix E**.

### 3.1.6 Past Investigations

Stantec reviewed the following engineering reports as part of this assessment:

- *"Preliminary Excess Soil Sampling Program – Addition of Fuel Facility at 1900 Cyrville, Ontario"*, prepared by Stantec, Reference No. 121626297, dated May 15, 2025 (Stantec, 2025a); and
- *"Preliminary Geotechnical Investigation, Costco Gloucester Conversion to Business Center – Fuel Station Addition, 1900 Cyrville Road, Ottawa, Ontario"*, prepared by Stantec, Reference No. 121626297, dated May 2025 (Stantec, 2025b).

Stantec conducted a due diligence excess soil sampling program in conjunction with a geotechnical subsurface investigation for the Phase One ESA Property. The Sampling Analysis Plan (SAP) for the limited excess soil program was developed based on a preliminary record review of the ERIS reports and aerial images for the Site and the neighbouring properties. Two potential environmental concerns in relation to the Site were identified as fill material of unknown quality and a historical operation (i.e., private fuel outlet [PFO] and a repair garage) of a commercial bus company at the adjacent east properties at 1720 Innes Road and 1901 Cyrville Road (formerly 1550 Innes Road).

The subsurface investigation was carried out on February 27 and 28, 2025, and consisted of the advancement of four boreholes (MW25-01, BH25-02 through BH25-04, **Figure No. 2**, **Appendix B**) across the Site, of which, one was completed as a groundwater monitoring well (MW25-01). No groundwater sample was submitted as part of this subsurface investigation.

The Site geology encountered during the 2025 field investigation beneath the asphalt consisted of fill material, followed by silty sand/sand with silt, underlain by till, followed by shale (weathered) bedrock. Fill material comprised of silty sand or sandy silt with gravel was encountered at all borehole locations. Bedrock was encountered at MW25-01 at 7.6 m below ground surface (BGS).

Practical refusal to augering at inferred bedrock surface was encountered at BH25-02 and BH25-03 at 7.7 m BGS and 6.7 m BGS, respectively (Stantec, 2025b). Field observations (i.e., native overburden and thickness, and bedrock geology) were consistent with the Ontario Geological Survey (OGS) geological mapping of the Phase One Property, further discussed in **Section 3.3.4**.

Ten soil samples were collected and submitted for laboratory analysis of benzene, toluene, ethylbenzene, and xylenes (BTEX), petroleum hydrocarbon fractions 1 to 4 (PHC F1-F4), volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), and metals and inorganics as part of the preliminary excess soil sampling program (Stantec, 2025a).

Grain size distribution (GSD) analysis was conducted for four representative soil samples as part of the preliminary geotechnical investigation. Based on the GSD results, soil texture at the Site was considered to be medium to coarse grain (Stantec, 2025b).

The analytical results for soil were compared to the applicable Table 3 SCS for industrial, commercial, and community (ICC) land use. Based on the analytical results, the concentration of PHC F2 from location MW25-01 at the sample depth interval of 2.3 m to 2.9 m BGS exceeded the Table 3 SCS.

Based on Stantec's review of the above 2025 investigation findings, the following PCAs and corresponding Item No., as per *Column A of Table 2, Schedule D of O. Reg 153/04, as amended*, were identified to contribute to APECs at the Phase One Property:

- **APEC-1**: *Item 30 - Importation of Fill Material of Unknown Quality*, resulting from the redevelopment of the Site in circa 1991, as identified during the 2025 on-site subsurface investigation and further discussion in Section 3.3.1;
- **APEC-2**: *Other - Soil Contamination*, resulting from the on-site PHC F2-impacted soil identified during the 2025 excess soil sampling program;
- **APEC-3**: *Item 52 - Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems*, resulting from off-site historical commercial bus depot operations located at 1720 Innes Road and 1901 Cyrville Road (formerly 1500-1550 Innes Road), approximately 30 m east of the Site.

As previously discussed in **Section 3.1.4**, the off-site former commercial bus company operations are considered to contribute to an APEC at the Phase One Property. On- and off-site PCAs contributing to APECs at the Phase One Property are illustrated in **Figure No. 4**, **Appendix B**, and discussed in **Section 6.3**

## 3.2 Environmental Source Information

Environmental source information included environmental database searches, provincial and municipal record requests, and an ERIS request for the Phase One Property and properties within the Phase One Study Area. A copy of the ERIS report is included in **Appendix E**. The database search results and results of the record requests are presented in the following subsections.

### 3.2.1 National Pollutant Release Inventory (NPRI)

ERIS searched the NPRI database for the Phase One Property and properties within the Phase One Study Area. The Phase One Property was not listed in the NPRI database. Based on the ERIS report, an off-site NPRI record was listed under InnVest Hotels GP Ltd., located at 1486 Innes Road, approximately 200 m west of the Phase One Property. This property was registered for several air emissions in 2004. Given that the receiving media (or pollution release) is air, this registered air emitter with respect to soil and groundwater quality is not a PCA as defined by O. Reg. 153/04, as amended.

### 3.2.2 Polychlorinated Biphenyls (PCB) Inventory Databases

ERIS searched the *National Inventory of PCBs in Use and PCB Wastes in Storage in Canada* and the *Ontario Inventory of PCB Storage Sites* databases. Based on the ERIS report, no records relating to PCB storage were identified at the Phase One Property and properties within the Phase One Study Area.

### 3.2.3 Areas of Natural Significance

Stantec conducted a search on the Ontario Ministry of Natural Resources (MNR) Natural Heritage map for areas of natural and scientific interest (ANSI) and natural heritage features within the Phase One Study Area. No areas of natural significance were identified within the Phase One Study Area Property (MNR, 2023).

### 3.2.4 MECP Freedom of Information Requests

A request was submitted to the MECP Freedom of Information (FOI) office on May 1, 2025 for information and reports related to the environmental conditions, environmental incidents, orders, offences, spills, discharges of contaminants or inspection maintained by the MECP in relation to the Phase One Property. A response received from the MECP on May 22, 2025, indicated that there were no records related to the above requested information. A copy of the request and the associated response is included in **Appendix E**.

### 3.2.5 MECP Instruments

A request was submitted to the MECP FOI office for information related to Environmental Activity and Sector Registry (EASR), Certificates of Approval (COAs), Permits To Take Water (PTTW), Certificates of Property Use (CPUs), and other MECP instruments issued prior to December 1999 pertaining to the Phase One Property. A response from the MECP indicated that a former Municipal and Private Sewage Works (MPSW) was approved for 1900 Cyrville Road in 1999. Based on the nature of the approval (e.g., designing, constructing or upgrading private storm sewer infrastructure), this historical MPSW approval was not considered to represent a potential environmental concern to the Phase One Property. A copy of the request and the associated response is included in **Appendix E**.

### 3.2.6 MECP Access Environment

Stantec searched the *MECP Access Environment* database for Phase One Property and properties within the Phase One Study Area for all other MECP instruments issued after December 1999 and onwards. Based on the database search, no environmental compliance approvals (ECAs), PTTW, or CPUs were issued for the Phase One Property.

Four ECAs were issued for the surrounding properties, of which three ECAs were issued for municipal and private sewer works for the neighbouring east property at 1901 Cyrville Road to Primeline Investments, and the southeast adjacent properties at 1935 and 1951 Cyrville Road to the City of Ottawa. The one remaining ECA was issued for industrial sewer work, which referred to the removal of an oil-water separator (OWS) at 1494 Innes Road to Imperial Oil Limited, which operated an RFO. This RFO at 1494 Innes Road, located approximately 155 m west of the Phase One Property, represent an off-site PCA. Given the separation distance and relative cross/downgradient orientation with respect to the inferred groundwater in the Phase One Study Area, this PCA was not considered to contribute to an APEC at the Phase One Property.

Two pesticide licenses were issued to Lowe's (now RONA+) and RONA in 2022 and 2023, respectively, to shelve and store pesticides for retail at 1800 Innes Road, approximately 220 m east of the Phase One Property. The storage of pesticides was considered to represent a PCA to the Site. Based on the separation distance and downgradient orientation, this PCA is not considered to contribute to an APEC at the Phase One Property. No other relevant or new MECP Instruments were identified in the ERIS report. PCAs identified on properties within the Phase One Study Area are presented in **Section 6.2,** and shown on **Figure No. 3**, **Appendix B.**

### 3.2.7 MECP Environmental Site Registry

Stantec searched the *MECP Environmental Site Registry (ESR)* for RSC for the Phase One Property and properties within the Phase One Study Area. No RSC properties were identified for the Site and within the Phase One Study Area.

### 3.2.8 MECP Waste Disposal Sites

Stantec reviewed the information contained in the MECP document titled *Waste Disposal Site Inventory in Ontario* (MOE, 1991). The report includes a list of all known active and closed waste disposal site in Ontario, as of October 31, 1990. Based on review of the document, no active or closed landfill sites were listed at the Phase One Property or properties within the Phase One Study Area.

### 3.2.9 Coal Gasification Plant Waste Sites

Stantec reviewed the MECP report entitled *Inventory of Coal Gasification Plant Waste Sites in Ontario, Vol. I,* prepared by Intera Technologies Ltd. (Intera, 1987). The document includes an inventory of known coal gasification plants historically operating in Ontario.

Stantec's review of the document indicated that no former coal gasification plants were listed at the Phase One Property or surrounding properties within the Phase One Study Area.

### 3.2.10 Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars

Stantec reviewed the MECP report entitled *Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, Vol. I,* prepared by Intera Technologies Ltd. (Intera, 1988). The document includes an inventory of industrial sites that produced and/or continue to produce or use coal tar and other related tars. Stantec's review did not identify the presence of industrial sites producing or using coal tar and related tars at the Phase One Property or surrounding properties within the Phase One Study Area.

### 3.2.11 Hazardous Waste Generators and Receivers

ERIS searched the *O. Reg. 347 Waste Generators* and the *O. Reg. 347 Waste Receivers* databases for registered generators of hazardous wastes. No hazardous waste generator records exist for the Phase One Property as it has always been used for vehicular parking since circa 1991.

Based on the ERIS report, several hazardous waste generator records were listed for the following neighbouring properties:

- 1900 Cyrville Road (Costco Business Centre), located off-site to the neighbouring west, for wastes classified as light fuels, lubricants and oils, inorganic waste, in 2016, 2018, 2020, and 2021:
    - As previously discussed in **Section 3.1.4**, Stantec inferred that the hazardous waste generated off-site was associated with the former automotive service garage and tire care centre situated on the west side of the Costco Business Centre building, approximately 120 m west of the of the Phase One Property. Based on the separation distance and cross/downgradient orientation relative to the Site, this off-site PCA is not considered to contribute to an APEC at the Phase One Property.
- 1494 Innes Road (Esso Station), located 155 m west of the Site, for wastes classified as light fuels, oil skimming, sludges in 2022:
    - As previously discussed in **Section 3.1.4**, the operations associated with the RFO is a PCA that is not considered to contribute to an APEC at the Phase One Property.
- 1901 Cyrville Road and 1720 Innes Road, formerly 1550 Innes Road (Travel Way, Capital Bus, Laid Law), located 30 m east of the Site, for wastes classified as waste oils and lubricants, light fuels, petroleum distillates, aliphatic solvents, and oil skimmings and sludges in 1992 to 1999, 2002 to 2006, 2021, and 2022:
    - As previously discussed in **Section 3.1.4** and **Section 3.1.6**, these off-site bus company depot operations were considered to be a PCA contributing to an APEC at the Phase One Property.

The locations of the above-noted PCAs are presented on **Figure No. 3**, and the activity contributing to an at the Phase One Property is presented on **Figure No. 4**, **Appendix B**.

### 3.2.12 Technical Standards and Safety Authority (TSSA)

A request was submitted to the TSSA for records pertaining to outstanding instructions, incident reports, fuel oil spills, contamination records, retail facilities or licensed underground storage tanks on the Site. A response from the TSSA dated May 1, 2025 indicated that there are two propane tank records associated with the municipal address 1900 Cyrville Road, inferred to be associated with the off-site Costco Business Centre propane refill operations. Given that the receiving media of a propane gas release is air, the presence of off-site propane tanks was not considered a PCA, as defined by O. Reg 153/04, as amended. A copy of the response and the fuel safety records are included in **Appendix E**.

### 3.2.13 Delisted, Expired Tanks, Retail and Private Fuel Outlets

ERIS searched the delisted and expired tanks database, including former RFOs and PFOs for properties with the Phase One Study Area. Based on the ERIS report, several delisted, expired tanks, and other fuel related records were listed at the following properties:

- Expired gasoline underground storage tanks (USTs) (two 22,730-litre [L] capacity containing diesel and one 22,730 L capacity containing gasoline) and ancillary equipment associated with a PFO in 1983 to 2012 for an off-site property located at 1501 Innes Road, approximately 120 m northwest of the Site:
    - Based on the separation distance, this former off-site PCA was not considered to contribute to an APEC at the Phase One Property.
- Active RFO located off-site at 1494 Innes Road, including five expired USTs (22,700 L capacity containing gasoline) :
    - As previously discussed in **Section 3.1.4**, this off-site PCA was not considered to contribute to an APEC (APEC-3) at the Phase One Property.
- Former RFO with an inactive/expired UST for an off-site property located at 1741 Cyrville Road, approximately 200 m north of the Site:
    - As previously discussed in **Section 3.1.4**, this off-site PCA was not considered to contribute to an APEC at the Phase One Property.

The locations of the above PCAs are presented on **Figure No. 3**, **Appendix B**.

### 3.2.14 Historical Land Use Inventory (HLUI)

A search request for the City of Ottawa's HLUI database was requested as part of this assessment. At the time of issuing this report, a response had not been received from the City. Upon receipt of the search results, Costco will be notified of any information that could affect the findings of this assessment. A copy of the HLUI request form and file number is provided in **Appendix E**.

### 3.2.15 Former Industrial Sites in Ottawa

Stantec reviewed the City of Ottawa report entitled *Mapping and Assessment of Former Industrial Sites*, prepared by Intera Technologies Ltd. (Intera, 1988). The document includes an inventory of former industrial sites, operations and/or activities associated with each site, and any known soil and/or groundwater contamination in the City of Ottawa. Based on review of the document, no former industrial sites were listed at the Phase One Property or properties within the Phase One Study Area.

### 3.2.16 Old Landfill Management Strategy (OLMS) Document

Stantec reviewed the City of Ottawa report entitled *Old Landfill Management Strategy (OLMS), Phase I – Identification of Sites, City of Ottawa,* prepared by Golder Associates Ltd. (Golder, 2004). The document includes former waste disposal sites that are not listed in the MECP Waste Disposal Site Inventory (MOE, 1991). One former waste disposal site, referred to as Eastview Landfill (HLUI Activity ID 6521), was identified approximately 230 m east of the Phase One Property, located on properties municipally addressed as 1880, 1930, 1960 and 2090 Innes Road. No other information pertaining to year(s) of operation, waste classification or the environmental condition of this former site was provided. Based on the separation distance between the former Eastview Landfill and the Phase One Property, this PCA was not considered to contribute to an APEC at the Site. No other properties within the Phase One Study Area were listed as former a former landfill. The location of this PCA is presented on **Figure No. 3**, **Appendix B**.

### 3.2.17 Additional ERIS Search Results

A review of the ERIS report including unplottable records did not reveal any new PCAs at the Phase One Property or properties within the Phase One Study Area.

## 3.3 Physical Setting Sources

### 3.3.1 Aerial Photographs

Aerial photographs were reviewed from the City of Ottawa (geoOttawa), ERIS and Google Earth to determine the historical land uses of the Phase One Property and properties within the Phase One Study Area. The earliest available photograph reviewed was from 1945.

Aerial photographs taken in 1945, 1955, 1965, 1976, 1991, 1999, 2002, 2007, 2011, 2013, 2015, 2017, 2021, 2022, and 2024 were reviewed and summarized in **Table 3** below.

**Table 3 Aerial Photograph Observations**

| Year | Phase One Property Observations | Phase One Study Area Observations |
|---|---|---|
| 1945 | The Phase One Property appeared as developed and occupied by residential dwelling and a barn with a private access road between the two structures. | The neighbouring properties to the southwest and further southeast of the Phase One Property appeared to be occupied by a large barn and a farmstead, respectively, while surrounding lands appeared as agricultural fields. |
| 1955 | No significant changes were apparent at the Phase One Property. | No significant changes were apparent on the surrounding lands south of Innes Road, while lands north of Innes Road appeared to be occupied by residential dwellings north and further northeast of the Phase One Property. |
| 1965 | No significant changes were apparent at the Phase One Property. | Neighbouring properties south of Innes Road remained unchanged from the previous photograph, while properties to the north and northwest appeared to be occupied by commercial to light industrial style buildings. |
| 1976 | The Phase One Property appeared as vacant land, such that the former residential dwelling and barn were no longer present at the Site. | The adjacent land to the west/southwest was still occupied by a large barn, while the adjacent land to the east (formerly an agricultural field) was now occupied by a commercial bus company and large commercial style building.<br>No significant changes were apparent on the neighbouring lands to the northeast and northwest. Lands further north were occupied by a small residential subdivision. |
| 1991 | The Phase One Property appeared as vacant land that had been graded for a parking lot. | The adjacent east property appeared unchanged from the previous photograph; however, a PFO associated with the commercial bus company was visible at this time, while the adjacent lands to the west was no longer occupied by a large barn and had been redeveloped with the present-day commercial retail warehouse (Costco Centre), followed by a RFO.<br>The residential subdivision and commercial properties to the neighbouring north and northwest had visibly expanded. Lands further south appeared developed for commercial to light industrial purposes at this time.<br>Innes Road and Cyrville Road were present at this time in their current configuration/alignment. |

| Year | Phase One Property Observations | Phase One Study Area Observations |
|---|---|---|
| 2002 | The Phase One Property appeared as an asphalt concrete parking lot associated with the adjacent Costco Centre. | The adjacent east properties were no longer occupied by the commercial bus company. Associated structures/building had been redeveloped with the present-day commercial buildings. Remaining lands to the north, west, and south appeared to be occupied by commercial properties and residential to the northeast. |
| 2007 | No significant changes were apparent at the Phase One Property. | An off-site oil-water separator (OWS) and/or UST nest was visible on the exterior southwest corner of the Costco building.<br>No other significant changes were apparent on properties within the Phase One Study Area. |
| 2011- 2019 | No significant changes were apparent at the Phase One Property. | No significant changes were apparent on properties within the Phase One Study Area. |
| 2021 | No significant changes were apparent at the Phase One Property. | The former off-site OWS and/or UST that was visible on the exterior southwest corner of the Costco building is no longer present at this time. No other significant changes were apparent on properties within the Phase One Study Area. |
| 2024 | No significant changes were apparent at the Phase One Property. | No significant changes were apparent on properties within the Phase One Study Area. |

Based on the 1991 aerial photograph, imported fill material of unknown origin was used to grade the Site during redevelopment. As previously identified in **Section 3.1.6**, fill material of unknown quality was identified during the 2025 on-site subsurface investigation, and thus, contributing an APEC at the Phase One Property.

A PFO and a RFO were also visible on the adjacent east and west properties, respectively in 1991. The PFO was located at 1901 Cyrville Road (formerly 1550 Innes Road), approximately 30 m east of the Phase One Property. As previously identified in **Section 3.1.6**, the former operations associated with the commercial bus company, including the PFO, are an off-site PCA that contributed to an APEC (**APEC-3**) at the Phase One Property.

The RFO in the 1991 aerial photograph was located at 1494 Innes Road, approximately 155 m west of the Phase One Property. As previously identified in **Section 3.1.4**, this off-site RFO was not considered a PCA that contributes to an APEC on the Phase One Property.

Based on the 2007 to 2019 aerial photographs, a former OWS and/or UST nest was visible on the exterior southwest corner of the adjacent Costco Business Centre building. Stantec inferred that the Tire Centre at the Costco property performed automotive fluid service and hence, hazardous waste production as a result of these services. As discussed in **Section 3.1.4 and Section 3.2.11,** these off-site PCAs are not considered to contribute to an APEC at the Phase One Property. The locations of the above PCAs are presented on **Figure No. 3**, and those contributing to an APEC at the Phase One Property are presented on **Figure No. 4**, **Appendix B**.

### 3.3.2 Physiographic Maps

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website. According to this physiographic map, the Ottawa Region is situated in the Central St. Lawerence Lowland.

According to the mapping description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets”. The Phase One Property is located within the Central St. Lawrence Lowland, which is generally less than 150 m above sea level (ASL).

### 3.3.3 Topography

Topographic map of the Phase One Property, including the Phase One Study Area, was obtained from Natural Resources Canada, Atlas of Canada. The Phase One Property is located approximately 64 m ASL and slopes gently southeast toward Ruisseau Green’s Creek, approximately 120 m southeast of the Site. Surface drainage and inferred groundwater flow are expected to mimic the local topography in a southeasterly direction towards the creek.

It should be noted that the elevation of the local groundwater table can be influenced by the presence of subsurface structures, such as building foundations, weeping tiles, and underground utility corridors that may result in spatially variable elevations that do not reflect the local groundwater flow or replicate the Site topography.

### 3.3.4 Geology

Based on information obtained from the OGS surficial and bedrock geological maps, the native surficial soils in the vicinity of the Phase One Property are reported to consist of silt and fine glaciomarine deposits (OGS, 2010) with a drift thickness ranging from 5 to 10 m (GSC, 2008).

Bedrock geology in the immediate area of the Phase One Property is reported to consist of shale with interbedded limestone of the Billings Formation (OGS, 2007). This information is consistent with Stantec’s findings during the 2025 subsurface investigation (Stantec, 2025b). Bedrock was found at depths of approximately 6 m to 7 m BGS.

### 3.3.5 Water Bodies and Areas of Natural Significance

Based on the Ontario MNR’s Natural Heritage map, the nearest body of water is Ruisseau Green’s Creek, located 120 m southeast of the Phase One Property. No areas of natural significance, as defined by O. Reg 153/04, as amended were identified within the Phase One Study Area.

### 3.3.6 Well Records

Stantec conducted a search on the MECP Well Records database and reviewed the ERIS search records for well records at the Phase One Property and properties within the Phase One Study Area. No well records were identified at the Phase One Property.

The water well database records indicated records of 33 wells on properties within the Phase One Study Area, of which 18 appeared to be records describing a combination of well abandonment and monitoring wells, and 15 domestic water wells.

A review of the well records did not identify any off-site PCAs, with the exception of four well records associated with a subsurface investigation conducted in 2020 on the exterior southwest corner of the off-site Costco Business Centre. Two monitoring well records that included a figure illustrated the location of a former UST on the exterior southwest corner of the Costco Business Centre building, approximately 100 m hydraulically cross/downgradient from the Phase One Property. The remaining two records were associated with the abandonment of these wells at 1900 Cyrville Road. Stantec infers that the abandonment of these wells was not required for future monitoring and sampling. Given the separation distance and orientation (i.e., hydraulically cross-gradient/ downgradient) of this former UST with respect to the Phase One Property, this off-site PCA was not considered to contribute to an APEC at the Site.

A review of the domestic well records indicated that all potable wells were drilled between 1948 and 1962. No well abandonment records were identified for these domestic well records; however, it is unlikely that these wells still exist and/or are used for domestic purposes, given that the Phase One Property and properties within the Phase One Study Area are situated in a municipally serviced area in which potable water is sourced from the Ottawa River.

Based on the well record information for wells in the vicinity of the Phase One Property, the reported stratigraphy consisted of fill, followed by silt and sand, underlain by dense till. Bedrock comprise of black shale followed by limestone bedrock were encountered at depths ranging from 7.9 m to 8.5 m BGS. Static water levels in the overburden were not provided. However, wet soil conditions were observed at approximate depths ranging from 3.2 m to 4.6 m BGS during Stantec's 2025 subsurface investigation (Stantec, 2025b).

No other pertinent information was provided in the well records reviewed as part of this assessment. A copy of the well records identified for wells off-site at 1900- Cyrville Road and additional well records in the ERIS report is provided in **Appendix E**.

## 3.4 Site Operating Records

The Phase One Property exists as a parking lot, and as such, it is not an Enhanced Investigation Property, as defined in O.Reg.153/04, as amended.

# 4 Interviews

Stantec contacted Patrick Lau, Real Estate Development Manager for Costco Wholesale Canada Ltd., by email with an interview questionnaire requesting information on past and current activities associated with the Costco Business Centre and the overall property at 1900 Cyrville Road. The questionnaire was forwarded and completed by Kayleen Burnett of Costco (Interviewee). Kayleen Burnett has been with Costco for more than 17 years and was considered as someone knowledgeable of the activities associated with the operations at Costco.

According to the Interviewee, Costco acquired the property on January 24, 1990. At the time of acquisition, the property existed as vacant land with no former buildings or structures. Costco did not operate an automotive service garage, but rather a Tire Centre from 2012 to 2020, when it was fully decommissioned. Kayleen Burnett was not aware of any historical or current ASTs/USTs or environmental infractions since Costco has been operating at the property. Details regarding the property and pertinent information provided by the Interviewee are provided in the relevant sections of this report. A copy of the interview responses is provided in **Appendix E**.

# 5 Site Reconnaissance

## 5.1 General Requirements

A site reconnaissance was conducted by Mia Dinh of Stantec on May 9, 2025, and more recently by Ryan Story of Stantec on February 17, 2026 to verify that the Site remained unchanged since the May 2025 site visit. The site observation was completed between 12:00 pm and 2:30 pm on February 17, 2026. The weather was sunny, and the temperature was approximately -4°C. The Phase One Property and neighbouring properties within the Phase One Study Area were readily visible from publicly accessible roads and were observed for PCAs that may contribute to APECs at the Phase One Property.

Stantec was unaccompanied during the site visit. Figures detailing the Phase One Property and Study Area are included in **Appendix B**. Selected photographs of the Phase One Property and Study Area, taken during the site reconnaissance, are included in **Appendix C**.

## 5.2 Specific Observations at Phase One Property

### 5.2.1 Site Features

The Phase One Property occupies the southwest quadrant of Innes Road and Cyrville Road, forming the northeast portion of 1900 Cyrville Road. The Phase One Property is currently an asphalt-paved parking area and vehicular entrance roadway associated with the Costco Business Centre located to the adjacent west and covers an approximate footprint of 0.29 hectares. Landscaped boulevards are also present to the south of the vehicular entrance roadway and along the east perimeter of the Phase One Property.

The topography of the Phase One Property was observed to be relatively flat and at grade with the adjacent off-site parking areas to the north, west, and south, sloping gently towards the southeast. The eastern side of the Phase One Property is bordered by a landscaped area along Cyrville Road, located below the grade of the Site.

Site drainage consists of sheet flow directed to two catch basins located on the central west and central east sides of the Phase One Property. Site features observed at the Phase One Property are illustrated on **Figure No. 2, Appendix B**.

### 5.2.2 Aboveground Buildings and Structures

Three street-parking lights were noted - two on the east side and one on the west side of the Phase One Property. A shopping cart park area was observed near the south-central portion of the Phase One ESA property. No other permanent above-ground buildings or structures were observed at the Phase One Property at the time of the site reconnaissance.

### 5.2.3 Aboveground and Underground Storage Tanks

No signs of aboveground or underground storage tanks were observed at the Phase One Property at the time of the site visit.

### 5.2.4 Current or Former Railway Lines or Spurs

No evidence of a former spur line or railway was observed on the Phase One Property at the time of the site reconnaissance.

### 5.2.5 Underground Utilities and Services

Underground service locates were completed prior to the 2025 on-site subsurface investigation. These services include municipal drinking water, municipal sanitary and sewer services, natural gas, electricity, and telecommunication utility lines servicing the Costco Business Centre. Utility services enter the Costco Business Centre through subsurface conduits from Innes Road, located outside of the Phase One Property. Two stormwater catchments were noted on the west-central part of the Site, while a sanitary sewer was identified on the southern part of the Site. Private underground hydro line was also located within the Phase One Property powering the three on-site street parking lights.

### 5.2.6 Water Wells

No potable water wells were observed at the Phase One Property. One monitoring well (MW25-01, advanced by Stantec in February 2025) was noted at the time of the site reconnaissance.

### 5.2.7 Surface Staining and Stressed Vegetation

No stained surficial materials or stressed vegetation were identified at the Phase One Property during the site visit.

### 5.2.8 Imported Fill and Debris

No evidence of fill material was observed during the site reconnaissance.

## 5.3 Phase One Study Area

During the site reconnaissance, Stantec conducted a visual assessment of publicly accessible properties in the area of the Phase One Property for the presence of PCAs. Properties within the Phase One Study Area consisted primarily of commercial land uses along Innes Road, commercial and residential on Cyrville Road (north of Innes Road), and commercial along Cyrville Road (south of Innes Road). The various land uses within in the Phase One Study Area are presented on **Figure No. 3**, **Appendix B**.

A summary of the neighbouring properties observed at the time of the site reconnaissance is presented in **Table 4** below.

**Table 4 Neighbouring Land Uses**

| Direction from the Site | Description of Property Uses and Location |
|---|---|
| North | A small area of the Costco Business Centre parking lot, followed by a commercial plaza (1750 Cyrville Road) across Innes Road. |
| East | Cyrville Road, followed by commercial shopping plazas at 1720 Innes Road and 1901 Cyrville Road, and a Hydro Ottawa electrical substation at 1925 Cyrville Road. |
| South | A portion of the exterior parking lot of the Costco Business Centre, followed by Ruisseau Green's Creek then a parking lot at 1910 Cyrville Road and a commercial retailer (The Brick) at 1960 Cyrville Road. |
| West | Costco Business Centre, followed by an Esso Gas Station at 1494 Innes Road. |

A pad mounted transformer was noted on the northwest exterior corner of the Costco Business Centre building, approximately 135 m west of the Phase One Property. Based on the nature of this PCA and distance from the Site, this off-site PCA was not considered to contribute to an APEC at the Phase One Property.

No additional PCAs were identified on the neighbouring properties at the time of the site reconnaissance. As previously discussed in this report, the RFO located at 1494 Innes Road was not considered a PCA that contributed to an APEC at the Phase One Property, based on the separation and cross/downgradient orientation relative to the Site. The location of the above-discussed PCA is presented on **Figure No. 3**, **Appendix B**.

## 5.4 Written Description of Investigation

**Section 5.2** presents the findings of the site reconnaissance, including current use and/or operations at the Phase One Property. **Section 5.3** presents the findings of the inspection of properties located in the Phase One Study Area for evidence of PCAs.

No additional investigations were undertaken during the Phase One ESA to assess potential environmental concerns noted or identified during the site reconnaissance or records review. A summary of the relevant findings to the existence of APECs at the Phase One Property is provided below in **Section 6**.

# 6 Review and Evaluation of Information

## 6.1 Current and Past Uses

Based on the review of the aerial photographs from 1945 through 1985, the 1976 through 2023 city directories, and the property ownership information database for the property addressed 1900 Cyrville Road, Stantec inferred that the Phase One Property was first developed for residential and agricultural purposes prior to 1945. In 1976 to 1982, the Phase One Property was listed under a private individual bearing the municipal address of 1542 Innes Road until circa 1991, when the Site was redeveloped for commercial purposes under the current municipal address (1900 Cyrville Road). Since 1991, the Phase One Property has always been used for vehicular parking associated with the Costco Business Centre. The Costco Business Centre was initially listed as Price Club at the current municipal address in 1997. With the exception of fill material of unknown quality (**APEC-1**) and identified soil contamination (**APEC-2**) at the Site, as previously discussed in **Section 3.1.6**, no other PCAs were identified with the historical or current use of the Phase One Property.

## 6.2 Potentially Contaminating Activity

Based on the historical and current uses of the Phase One Property and properties within the Phase One Study Area, four PCAs (PCA-1, PCA-2, PCA-3a, and PCA-3b) were determined to contribute to APECs at the Phase One Property. The remaining identified eight off-site PCAs (PCA-4 to PCA-11) were not considered to contribute to APECs, based on the separation distances of the PCAs relative to the Phase One Property, the downgradient or cross-gradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or the nature of operations and potential contaminants related to these operations.

A summary of the PCAs and respective locations with respect to the Phase One Property is provided in **Table 5** and shown on **Figure No. 3**, **Appendix B**.

**Table 5 Potentially Contaminating Activities**

| PCA No. | Item No. (Column A of Table 2 of Schedule D, O. Reg. 153/04) | Description and Location of PCA | APEC No. |
|---|---|---|---|
| PCA-1 | Item 30 - Importation of Fill Material of Unknown Quality | Fill material of unknown quality on-site from redevelopment of the Phase One Property, circa 1991. | APEC-1 |
| PCA-2 | Other - Soil Contamination | PHC-impacted soil identified on-site at MW25-01 during the 2025 subsurface investigation. | APEC-2 |

| PCA No. | Item No. (Column A of Table 2 of Schedule D, O. Reg. 153/04) | Description and Location of PCA | APEC No. |
|---|---|---|---|
| PCA-3a | Item 52 - Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems | Former PFO and maintenance/repair garage associated with the historical commercial bus company located at 1901 Cyrville Road and 1720 Innes Road (formerly 1550 Innes Road), approximate 30 m east of the Phase One Property. | APEC-3a |
| PCA-3b | Other - Hazardous Waste Generation | Former hazardous waste generator associated with the historical commercial bus company located at 1901 Cyrville Road and 1720 Innes Road (formerly 1550 Innes Road), approximate 30 m east of the Phase One Property. | APEC-3a |
| PCA-4a | Item 28 - Gasoline and Associated Products Storage in Fixed Tanks | Former waste oil UST and Tire Care Centre located at 1900 Cyrville Road (Costco Business Centre), approximately 100 m southwest of the Phase One Property. | Not Applicable |
| PCA-4b | Other - Hazardous Waste Generation | Former and hazardous waste generator located at 1900 Cyrville Road, approximately 100 m southwest of the Phase One Property. | Not Applicable |
| PCA-5 | Item 55 - Transformer Manufacturing, Processing and Use | Existing concrete pad-mounted transformer situated on the northwest corner of 1900 Cyrville Road, approximately 135 m west of the Phase One Property. | Not Applicable |
| PCA-6 | Item 28 - Gasoline and Associated Products Storage in Fixed Tanks | Existing RFO located at 1494 Innes Road, approximately 155 m west of the Phase One Property. | Not Applicable |
| PCA-7 | Item 40 - Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications | Storage of pesticides at RONA+ (formerly Lowe's) located at 1800 Innes Road, approximately 230 m east of the Phase One Property. | Not Applicable |
| PCA-8 | Item 58 - Waste Disposal and Waste Management, including Thermal Treatment, Landfilling and Transfer of Waste, Other Than Use of Biosoils as Soil Conditioners | Former Eastview waste disposal site located at 1880 Innes Road, approximately 230 m east of the Phase One Property. | Not Applicable |
| PCA-9 | Item 28 - Gasoline and Associated Products Storage in Fixed Tanks | Former RFO located at 1741 Cyrville Road, approximately 200 m north of the Phase One Property. | Not Applicable |
| PCA-10 | Item 18 - Electricity Generation, Transformation and Power Stations | Electrical substation/transformer station located at 1925 Cyrville Road, approximately 170 m southeast of the Phase One Property. | Not Applicable |

| PCA No. | Item No. (Column A of Table 2 of Schedule D, O. Reg. 153/04) | Description and Location of PCA | APEC No. |
|---|---|---|---|
| PCA-11 | Item 28 - Gasoline and Associated Products Storage in Fixed Tanks | Former PFO located at 1501 Innes, approximate 120 m northwest of the Phase One Property. | Not Applicable |

## 6.3 Areas of Potential Environmental Concern

Three APECs were identified at the Phase One Property. A summary of the APECs, their locations at the Phase One Property, related PCAs, and COPCs associated with each PCAs is provided in **Table 6** below and shown on **Figure No. 4**.

**Table 6 Areas of Potential Environmental Concern**

| APEC No. Description | Location of APEC on Phase One Property | PCA Item No. (Column A of Table 2 of Schedule D, O. Reg. 153/04) | Location of PCA (on-/ off-site) | Contaminants of Potential Concern[1] | Media Potentially Impacted (Groundwater, Soil and/or Sediment) |
|---|---|---|---|---|---|
| **APEC-1**<br>Fill material of unknown quality (PCA-1) | Across entire Phase One Property | Item 30 - Importation of Fill Material of Unknown Quality | On-Site | BTEX<br>PHC F1-F4<br>PAHs<br>Metals<br>As, Sb, Se | Soil |
| **APEC-2**<br>Identified PHC-impacted soil (PCA-2) | Northwest corner of Phase One Property | Other - Soil Contamination | On-Site | BTEX<br>PHC F1-F4<br>PAHs | Soil, Groundwater |
| **APEC-3a**<br>Former commercial bus depot operations, including a PFO and repair garage at 1901 Cyrville Road and 1720 Innes Road, formerly 1500-1550 Innes Road (PCA-3a) | Eastern Part of Phase One Property | Item 52 - Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems | Off-Site | VOCs<br>PHC F1-F4<br>PAHs | Soil, Groundwater |
| **APEC-3b**<br>Former hazardous waste generator associated with the commercial bus depot operations located at 1901 Cyrville Road and 1720 Innes Road, formerly 1500-1550 Innes Road (PCA-3b) | Eastern Part of Phase One Property | Other - Hazardous Waste Generation | Off-Site | VOCs<br>PHC F1-F4<br>PAHs | Soil, Groundwater |

**Note(s):**

[1] Contaminants of Potential Concern (COPCs):

BTEX: Benzene, Toluene, Ethylbenzene and Xylene

PAHs: Polycyclic Aromatic Hydrocarbons

PHC F1-F4: Petroleum Hydrocarbon Fractions 1 to 4

VOCs: Volatile Organic Compounds

Hydride-forming Metals: Arsenic (As), Antimony (Sb), Selenium (Se)

## 6.4 Contaminants of Potential Concern

The COPCs associated with the APECs with respect to the soil matrix and/or groundwater in, on or under the Phase One Property include the following:

- BTEX: Benzene, Toluene, Ethylbenzene and Xylene;
- PAHs: Polycyclic Aromatic Hydrocarbons;
- PHCs (F1-F4): Petroleum Hydrocarbons, Fractions 1 to 4;
- VOCs: Volatile Organic Compounds; and
- Metals and hydride-forming metals: Arsenic (As), Antimony (Sb), Selenium (Se).

## 6.5 Phase One Conceptual Site Model

A conceptual site model (CSM) was created to provide a summary of the findings of the Phase One ESA. The Phase One CSM is summarized in the **Figure Nos. 1 to 4** in **Appendix B**, which illustrate features and details in relation to the Phase One Property and the Phase One Study Area. In general, the figures illustrate the following, where applicable:

- Existing buildings and structures on the Phase One Property;
- Underground utilities and services at the Phase One Property;
- Geological and hydrogeological setting of the Phase One Property;
- Potable water wells located at the Phase One Property and Phase One Study Area;
- Water bodies and areas of natural significance located in whole or in part within the Phase One Study Area;
- Adjacent and neighbouring land uses;
- PCAs within the Phase One Study Area; and
- APECs at the Phase One Property.

The following subsections provides a narrative summary of the Phase One CSM.

**Existing Buildings and Structures**

Three street-parking lights (two on the west side and one on the east side) and a shopping cart park area (near the south-central portion) were identified at the Phase One Property. No other permanent above-ground buildings or structures are present at the Phase One Property.

**Underground Utilities and Services**

Underground service locates were completed prior to the 2025 on-site subsurface drilling program. Identified utility services at the Phase One Property included municipal sanitary and sewer services, and electricity line that was observed to enter the northern part of the Phase One Property from the Innes Road.

Underground service corridors are generally situated 1.5 to 2.5 m BGS and may act as a preferential pathway for contaminant transport and distribution. Utilities and services at the Phase One Property are shown in **Figure No. 4**.

### Importation of Fill Material

It is expected that the fill material of unknown origin was imported to grade the Phase One Property during redevelopment circa 1991. Fill material was observed at the Site during the 2025 subsurface investigation, as such, fill material of unknown quality across the Site was considered to contribute to an APEC (**APEC-1**) at the Phase One Property.

### Geological Setting

Based the OGS maps, the native surficial soils in the immediate are of the Phase One Property were identified to consist of silt and fine glaciomarine deposits (OGS, 2010). The reported overburden thickness ranges between 5 to 10 m BGS (GSC, 2008). Bedrock in the area of the Phase One Study Area is reported to consist of shale with limestone bedrock of the Billings Formation (OGS, 2007).

The Site geology encountered during the 2025 field investigation (Stantec, 2025b) consisted of silty sand/sand with silt, followed by till, overlying shale bedrock. Bedrock was encountered at MW25-01 at 7.6 m BGS. Practical refusal to augering at the inferred bedrock surface was encountered at BH25-02 and BH25-03 at 7.7 and 6.7 m BGS, respectively. Wet soil conditions were encountered at approximate depths ranging from 3.2 to 4.6 m BGS at BH25-03 and BH25-01, respectively. These field observations are consistent with the OGS geological mapping of the Phase One Property.

### Inferred Groundwater Flow Direction

The Phase One Property is located approximately 64 m ASL and slopes gently southeast/east toward Ruisseau Green's Creek, approximately 120 m southeast of the Site. Surface drainage and inferred groundwater flow are expected to mimic the local topography in a southeasterly direction towards the creek.

It should be noted that the elevation of the local groundwater table can be influenced by the presence of subsurface structures, such as building foundations, weeping tiles, and underground utility corridors that may result in spatially variable elevations that do not reflect the local groundwater flow or replicate the Site topography.

### Potable Water Wells

No potable well records were identified at the Phase One Property. 15 potable drinking wells were identified within the Phase One Study Area, all of which were drilled between 1948 to 1962. It is expected that these potable wells no longer exist given that potable drinking water in the Phase One Property and surrounding areas is serviced through the municipal distribution system sourced from the Ottawa River.

### Water Bodies and Areas of Natural Significance

Based on the Ontario MNR's Natural Heritage map, the nearest body of water is Green's Creek, located 120 m southeast of the Phase One Property, as shown on **Figure No. 2**. No areas of natural significance were identified within the Phase One Study Area, as shown on **Figure No. 3**.

### Neighbouring Land Uses

Neighbouring land uses within the Phase One Study Area consists primarily of commercial lands along Innes Road and Cyrville Road with a residential subdivision further northeast of the Phase One Property, as shown on **Figure No. 3**.

### Potentially Contaminating Activities and Areas of Potential Environmental Concern

A total of 11 PCAs were identified, two of which were identified at the Phase One Property and nine off-site within the Phase One Study Area, as presented on **Figure No. 3** and in **Table 5**.

Based on the proximity, the downgradient or cross-gradient locations relative to the inferred groundwater flow direction in the Phase One Study Area and/or nature of each PCA and the COPCs related to these PCAs, two on-site and two off-site PCAs were considered to contribute to APECs at the Phase One Property, as presented on **Figure No. 4** and in **Table 6**.

### Contaminants of Potential Concern

The COPCs associated with the APECs with respect to the soil matrix and/or groundwater in, on or under the Phase One Property include the following:

- Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX);
- Petroleum Hydrocarbons, fractions 1 through 4 (PHCs, F1-F4);
- Polycyclic Aromatic Hydrocarbons (PAHs);
- Volatile Organic Compounds (VOCs); and
- Metals, including hydrides.

### Discussion of Uncertainty or Absence of Information

The information available for review as part of the preparation of the Phase One ESA was considered to be sufficient to conclude that there are PCAs that have resulted in APECs at the Phase One Property, and that there are no deviations from the Phase One ESA requirements specified in O. Reg. 153/04, or absence of information that has resulted in uncertainty that would affect the validity of the Phase One CSM.

# 7 Conclusions and Sign-off

## 7.1 Conclusions and Recommendation

The Phase One ESA was conducted for Costco in support of a SPCA to the City Ottawa for a proposed retail fuel facility development at the Phase One Property. The Phase One ESA has been completed in general accordance with O. Reg. 153/04, as amended. Stantec understands that an RSC is not required as the proposed land use for the retail fuel outlet will remain unchanged.

Based on the findings of this Phase One ESA, a Phase Two ESA was considered required, as per O. Reg 153/04, as amended, in order to investigate the soil and groundwater quality within the APECs at the Phase One Property. The Phase Two ESA is a mandatory requirement of the SPCA submission to the City of Ottawa.

## 7.2 Signatures

The site reconnaissance was completed by Mia Dinh, M.Sc., E.I.T. in May 2025, and Ryan Story, B.Sc., in February 2026. The report was written by Mandy Witteman, M.A.Sc, P.Eng., $QP_{ESA}$, and was reviewed by Jaka Suryana, B.Sc., P.Eng., $QP_{ESA}$. This report was reviewed and approved for transmittal by Randy Sinukoff, M.A.Sc, P.Eng., $QP_{ESA}$. Credentials of the project team members are provided in **Appendix D**.

Regards,

**STANTEC CONSULTING LTD.**

Subject to discussion presented herein, the objectives and requirements set out in O.Reg.153/04 for a Phase One Environmental Site Assessment were applied in carrying out the environmental site assessment and preparing this report.

# 8 Closure

This report documents work that was performed in accordance with generally accepted professional standards at the time and location in which the services were provided. No other representations, warranties or guarantees are made concerning the accuracy or completeness of the data or conclusions contained within this report, including no assurance that this work has uncovered all potential liabilities associated with the identified property.

This report provides an evaluation of selected environmental conditions associated with the identified portion of the property that was assessed at the time the work was conducted and is based on information obtained by and/or provided to Stantec at that time. There are no assurances regarding the accuracy and completeness of this information. All information received from the client or third parties in the preparation of this report has been assumed by Stantec to be correct. Stantec assumes no responsibility for any deficiency or inaccuracy in information received from others.

The opinions in this report can only be relied upon as they relate to the condition of the portion of the identified property that was assessed at the time the work was conducted. Activities at the property subsequent to Stantec's assessment may have significantly altered the property's condition. Stantec cannot comment on other areas of the property that were not assessed.

Conclusions made within this report consist of Stantec's professional opinion as of the time of the writing of this report and are based solely on the scope of work described in the report, the limited data available and the results of the work. They are not a certification of the property's environmental condition. This report should not be construed as legal advice.

This report has been prepared for the exclusive use of the client identified herein and any use by any third party (with the exception of the City of Ottawa to support an SPCA for the Phase One Property) is prohibited. Stantec assumes no responsibility for losses, damages, liabilities or claims, howsoever arising, from third party use of this report.

The locations of any utilities, buildings and structures, and property boundaries illustrated in or described within this report, if any, including pole lines, conduits, water mains, sewers and other surface or sub-surface utilities and structures are not guaranteed. Before starting work, the exact location of all such utilities and structures should be confirmed and Stantec assumes no liability for damage to them.

The conclusions are based on the site conditions encountered by Stantec at the time the work was performed at the specific testing and/or sampling locations, and conditions may vary among sampling locations. Factors such as areas of potential concern identified in previous studies, site conditions (e.g., utilities) and cost may have constrained the sampling locations used in this assessment. In addition, analysis has been carried out for only a limited number of chemical parameters, and it should not be inferred that other chemical species are not present. Due to the nature of the investigation and the limited data available, Stantec does not warrant against undiscovered environmental liabilities nor that the sampling results are indicative of the condition of the entire site. As the purpose of this report is to identify site conditions which may pose an environmental risk, the identification of non-environmental risks to structures or people on the site is beyond the scope of this assessment.

Should additional information become available which differs significantly from our understanding of conditions presented in this report, Stantec specifically disclaims any responsibility to update the conclusions in this report.

# Appendix D Assessor Qualifications

# Mandy Witteman M.A.Sc., P.Eng., QPesa

Environmental Engineer

Ottawa, Ontario

Mandy is new to Stantec as of the beginning of November of 2025. She has over 9 years of experience in consulting, from completing environmental site assessments, remediation, and brownfield redevelopment projects across Ontario. Before entering the environmental consulting field, she worked in oil sands and hard-rock tailings R&D, where she supported pilot-scale testing and advanced numerical seepage modelling in the unsaturated zone/capillary fringe.

Dedicated to advancing sustainable land redevelopment and reclamation, Mandy delivers practical, science-based solutions that balance regulatory requirements with community benefit. Her project experience spans the full delivery cycle—from site investigation and remedial design to regulatory coordination, technical reporting, and environmental management. She brings a thoughtful, solutions-oriented approach to every project she supports.  Mandy holds federal reliability status.

## EDUCATION

Bachelor of Engineering, Environmental , Carleton University , Ottawa, Ontario, Canada, 2008

Master of Applied Science, Environmental, Carleton University, Ottawa, Ontario, Canada, 2013

## CERTIFICATIONS & TRAINING

WHMIS, Stantec Consulting Ltd. , Ottawa, Ontario, 2025

OHSA , Stantec Consulting Ltd. , Ottawa, Ontario, 2025

## REGISTRATIONS

Registered Professional Engineer #100529831, Professional Engineers Ontario, 2022-Present

## PROJECT EXPERIENCE

### ENVIRONMENTAL SITE ASSESSMENTS, PHASE II ESA AND REMEDIATION

Smithville Development Plan - Phase II ESA | Smithville, Ontario, Canada | 2025-Present | Report Author

Conducted peer-review of past reports, preparing Phase II ESA reports for five separate lots: two reports in compliance with O. Reg. 153/04 in supporting of filing RSCs and three in accordance with CSA Standards.

Phase II ESA, Updated Phase II CSM, Remediation, & Filing RSC - Commercial to Residential Building Conversion, 130 Slater Street, Ottawa, Ontario * | 2025 | Project Manager | Report Author, QPesa

Conducted a peer review and gap analysis; developed the scope of work, proposal and cost estimates; scheduled and coordinated subsurface investigations; managed remediation and post-remediation soil and groundwater sampling programs; prepared an updated Phase II ESA and remediation report for due diligence; prepared an updated Phase II CSM in support of filing a Record of Site Condition (RSC) in accordance with O. Reg. 153/04; and filed the RSC to accepted acknowledgment.

Update Phase I & II ESAs and Soil Remediation - Former Hurdman Rail Yards, 130 Lees Avenue, Ottawa, Ontario* | 2025 | Project Manager | Report Author, QPesa

Conducted a peer review; prepared an updated Phase I & Phase II ESA in accordance with O. Reg 153/04.  Developed a remedial action plan to be conducted concurrently with excess soil removal.

Update Phase I & II ESAs & Updated Phase II CSM - Dedicated Parkland, Former Lees Avenue Railyards, Ottawa, Ontario* | 2025 | Project Manager | Report Author, QPesa

Updated Phase I & Phase II ESA in compliance with O. Reg 153/04, and updated Phase II CSM in support of filing a Risk Assessment based RSC for a dedicated parkland space to be conveyed to the City of Ottawa.

** denotes projects completed with other firms*

Enhanced Investigation Phase I & II ESAs - Residential Redevelopment of former Coca Cola Bottling Works, Ottawa, Ontario* | 2024 | Report Author | Field Engineer, QPesa

Completed a technical peer review, updated a Phase I ESA report as an enhanced investigation property, developed a sampling analysis plan (SAP) to address several areas of potential concerns, delineate existing soil contamination, and supervised the Phase II ESA and Phase III ESA field program, collected and submitted additional soil samples to prepare a characterization report (SCR), surveyed newly install monitoring wells, and conducted groundwater monitoring and sampling.

Phase I & II ESAs - Residential Redevelopment of 1050 Bank Street, Ottawa, Ontario* | 2022 | Project Coordinator | Report Author

Coordinated and scheduled the Phase II ESA field program; authored the Phase I ESA, Phase II ESA, and Phase II CSM in support of the filing of an RSC.

Phase I & Phase II ESAs - Residential Redevelopment of 1335-1339 Bank Street, Ottawa, Ontario* | 2021 | Project Coordinator | Report Author

Conducted a peer-review and gap analysis, prepared the scope of work for the Phase I ESA, Phase II ESA, and a remedial action plan in support of a redevelopment project. Authored the Phase I ESA and Phase II ESA reports in accordance with O. Reg 154/04.

Phase I ESA Update, Supplemental Phase II ESA, RAP - RSC Property Development Plan of former Philips Cables, Brockville, Ontario* | 2020 | Project Coordinator | Report Author

Completed a peer review and gap analysis, updated Phase I ESA, Supplemental Phase II ESA, and prepared a RAP, in support of a proposed subdivision based on a grandfathered RSC.

## EXCESS SOIL / BENEFICIAL REUSE

Excess Soil Management - Former Hurdman Rail Yards, 130 Lees Avenue, Ottawa, Ontario* | 2024 - 2025 | Report Reviewer, Qpesa

Reviewed reports prepared in accordance with O. Reg 406/19 and Excess Soil Rules: Assessment of Past Use (APU), Sampling Analysis Plan (SAP), Soil Characterization Report (SCR), and Excess Soil Destination Assessment Report (ESDAR).

Excess Soil Management - Redevelopment of 500 Montgomery Avenue, Ottawa, Ontario* | 2025 | Report Reviewer, QPesa

Reviewed reports prepared in accordance with O. Reg 406/19 and Excess Soil Rules: APU, SAP, SCR, and ESDAR, as well as filed an excess soil notice with the RPRA.

## CONTAMINATED SITE INVESTIGATION, ASSESSMENT, MANAGEMENT AND REMEDIATION

Davieaux Island Light Station Abatement and Structural Rehabilitation | Public Services and Procurement Canada on behalf of Department of Fisheries and Oceans Canada | Davieaux Island Lighthouse, Thunder Bay, Unorganized, ON, Canada | 2025-Present | Report Author

Supporting and updating the financial liabilities associated with the status of each FSCI upon completion of the abatement and remediation programs (i.e., Liability Reports).

Supplemental Phase III ESA - LaSalle Academy, Ottawa, Ontario | CAD 24M | 2026-Present | Project Coordinator

Coordinating and scheduling supplemental Phase III ESA field program.

## GEOTECHNICAL / GEO-ENVIRONMENTAL ENGINEERING

Hydraulic-cut off Wall - Allen SK Potash Mine, Potash Corp. * | 2015 | QA/QC Field Engineer

Completed geotechnical QA/QC of a 2 km hydraulic cut-off wall by conducting daily material tests in accordance with the ASTM Standards (soil gradation, slump and permeability tests) and API Drilling Standards (filtrate and fines tests) ensure construction materials met design specifications at every 10- station. Prepared daily construction reports.

## EMPLOYMENT HISTORY

### Groupe ABS Inc.
Senior Environmental Engineer
2024 - 2025 · 1 year(s)

Project delivery of all phases of the ESA and site remediation programs in compliance with O.Reg. 153/04, filing generic and RA-based RSCs.

### Pinchin Ltd.
Environmental Project Manager
2024 - 2024 · 1 year(s)

Managed and conducted all phases of the ESAs and remediation programs in accordance with O.Reg. 153/04, for city applications, as well as for real property assets in compliance with the CSA Standards.

### Paterson Group Inc.
Intermediate Environmental Engineer
2018 - 2023 · 5 years

Managed and conducted all phases of the ESAs, and contaminated site remediation programs, in accordance with O.Reg. 153/04, for city applications and filing RSCs, as well as for real property asset management in compliance with the CSA Standards.

** denotes projects completed with other firms*

**Thurber Engineering Ltd.**
Geotechnical Engineer-in-Training (E.I.T.)
2014 - 2015 · 1 year(s)

Supported Thurber's in-house R&D team in developing pilot and bench-scale programs for oil sands operators, focusing on polymer-amended and thickened tailings to improve water management and meet Alberta Energy Regulator (AER) Directive 074 requirements. Served as Geotechnical QA/QC sub-consultant during a 6-month secondment at a Saskatchewan potash mine, oversaw construction of a 2 km hydraulic cut-off wall by conducting daily geotechnical testing based on ASTM Standards and API Drilling Standards, prepared daily construction reports, and collaborate with on-site engineers and contractors.

**Carleton University**
Research Engineer
2013 - 2014 · 1 year(s)

Assisted with several bench-scale tests adding different doses of polymer to oil sand tailings to find the optimal dose to maximize the dewatering of tailings. This study was facilitated by an oil sand operator with the goal of reclaiming processed material for reuse during extraction, while minimizing the overall volume of tailings to manage. Responsible for monitoring the quality of data, constructed and designed the instrumentation clusters (programmed and calibrated various types of specialized geotechnical sensors).

**SLR Consulting Ltd.**
Junior Environmental Engineer
2008 - 2009 · 1 year(s)

Prepared Phase II ESA reports and conducted environmental field activities (i.e., environmental drilling and soil sampling and groundwater and monitoring programs).

# Jasper Koo

Environmental Site Assessor

17 years of experience · Markham, Ontario

Jasper completed a Bachelor of Applied Technology in Integrated Environmental Site Remediation from Seneca College. He later went on to complete a Master of Science in Environmental Planning at the Technische Universität Berlin in Berlin, Germany, where his research focused on analyzing biodiversity offsetting as an incentive for Brownfield restoration. Most recently, he completed an Environmental Management Certificate at Durham College.

## EDUCATION

Certificate, Durham College / Environmental Management, Toronto, Ontario, Canada, 2021

Master of Science, Technische Universität Berlin / Environmental Planning, Berlin, Germany, 2019

Bachelor of Applied Technology, Seneca College, Toronto, Ontario, Canada, 2007

## CERTIFICATIONS & TRAINING

Own Your Safety - Utility Infrastructure Awareness Certificate, Markham, Ontario, Canada, 2024

Certificate, Enbridge 2025 Contractor Safety & Environment Orientation, Markham, Ontario, Canada, 2025

Standard First Aid with CPR Level C and AED Certificate, Markham, Ontario, Canada, 2024

POST 2024 Level 2 – BBS – Orientation and Test Certificate, Markham, Ontario, Canada, 2024

## PROJECT EXPERIENCE

### ENVIRONMENTAL SITE ASSESSMENTS PHASE I, II

Phase II Environmental Site Assessment – Ministry of Transportation | Toronto, Ontario, Canada | 2025 | Environmental Site Assessor

Coordinated Phase II Environmental Site Assessment for the Ministry of Transportation. Contributions included coordinating with stakeholders for fieldwork (drilling, locates, soil and groundwater sampling), as well as historical background investigations, interviews, and reporting.

Phase One Environmental Site Assessment – Ottawa Catholic School Board | Ottawa, Ontario, Canada | 2025 | Environmental Site Assessor

Conducted Phase One Environmental Site Assessment for the Ottawa Catholic School board. The Phase One was conducted for due diligence purposes. Contributions included historical background investigations, interviews, and reporting.

Phase I and II Environmental Site Assessment – Portfolio of Retail Stores | Various Locations, Ontario, Canada | 2025 | Environmental Site Assessor

Conducted Phase I and II Environmental Site Assessments for multiple commercial sites. Contributions included background investigations, interviews, and reporting.

Phase I Environmental Site Assessment | Various Locations, Ontario, Canada | 2025 | Environmental Site Assessor

Conducted Phase I Environmental Site Assessments for various private companies. Contributions included background investigations, interviews, and reporting.

Phase II Environmental Site Assessment – Mattamy Homes | Scarborough, Ontario, Canada | 2025 | Environmental Site Assessor

Conducted Phase II Environmental Site Assessment for the Mattamy Homes. Contributions included carrying out locates, drilling, and groundwater monitoring and sampling programs.

Phase I Environmental Site Assessment – Ferma Energy | Various Locations, Ontario, Canada | 2025 | Environmental Site Assesso

Conducted Phase I Environmental Site Assessments for a portfolio of properties for Ferma Energy. Contributions included background investigations, interviews, and reporting.

Phase I Environmental Site Assessment – Proposed Telecommunication Towers | Bell Mobility Inc. | Various Locations, Ontario | 2024 | Environmental Site Assessor

Conducted Phase I Environmental Site Assessments for a portfolio of properties for Bell Mobility Inc for telecommunication tower compounds for internal due diligence purposes. Contributions included background investigations, interviews, and reporting.

Phase I Environmental Site Assessment | Cannington, Ontario | 2024 | Environmental Site Assessor

Completed site reconnaissance for a Phase I ESA for road conveyance purposes on a private property.

## EXCESS SOIL

Assessment of Past Uses – City of Ottawa | Ottawa, Ontario, Canada | 2025 | Environmental Site Assessor

Conducted an Assessment of Past Uses for the City of Ottawa to support excess soil services. Contributions included historical background investigations, interviews, and reporting.

Soil Classification (SCR) and Excess Soil Destination Assessment Report (ESDAR) | The Regional Municipality of York | Newmarket, Ontario | 2024 | Environmental Site Assessor

Stantec provided support for the widening and reconstruction of Yonge Street from Davis Drive to Green Lane. Jasper provided assistance with the SCR and ESDAR reporting.

## GROUNDWATER

Surface Water Monitoring Program and Reporting – Ministry of Transportation | Barrie, Ontario, Canada | 2024 | Environmental Site Assessor

Conducted bi-weekly surface water monitoring program for the Ministry of Transportation. Contributions include field work and bi-weekly reporting.

Groundwater Monitoring Program and Reporting – Shell Canada Products | Various locations, Ontario, Canada | 2025 | Environmental Site Assessor

Coordinated and conducted quarterly groundwater monitoring program for Shell Canada Products. Contributions included coordinating with relevant stakeholders for fieldwork and reporting, as well as field work.

Multiple Groundwater Monitoring Programs | Various Locations, Ontario | 2024 | Environmental Site Assessor

Completed surface water and groundwater monitoring and sample collection (purge or no purge, bailer or low flow methods) at multiple upstream and downstream sites. Involved assessing water levels, hydrocarbon/volatile vapours, measuring light non-aqueous phase liquids (LNAPL) and dense non-aqueous phase liquids (DNAPL). Clients include Metrolinx, Ministry of Transportation, Suncor, Enbridge, Shell, Trans-Northern Pipelines Inc., and Husky.

## SOIL SAMPLING

Phase II Environmental Site Assessments | Various Locations, Ontario | 2024 | Environmental Site Assessor

Environmental drilling programs involving drilling and installing groundwater monitoring wells at sites with historical impacts. Responsible for drilling supervision, logging and sampling soils, and well development. Clients include Metrolinx, Enbridge, and Extendicare.

Soil Sampling Program | Trans-Northern Pipelines Inc. | Stouffville, Ontario | Environmental Site Assessor

Completed topsoil sampling program. Roles included supervising contractors, coordinating with landowners and tenants, and fieldwork.

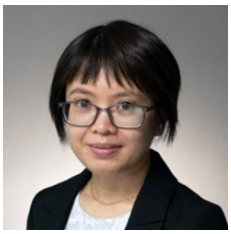
Soil Sampling Program | M&R Holdings | Scarborough, Ontario | 2024 | Environmental Site Assessor

Completed sampling soil bags containing unknown quality and source. Roles included coordinating with property owners and fieldwork.

## DECOMMISSIONING

Well Decommissioning Program | Various Locations, Ontario | 2024 | Environmental Site Assessor

Completed decommissioning wells. Roles included supervising contractors and fieldwork.



# My Dinh M.Sc., E.I.T.

Environmental Engineer-In-Training

Ottawa, Ontario

Mia Dinh is an Environmental Engineer in Training with 2.5 years of experience in Designated Substances Survey (DSS)/abatement, indoor air quality, mold inspection, Phase I Environmental Site Assessments, excess soil management, to hydrogeology. Mia is involved at different stages of projects from proposals, field work, data analysis, to reporting. Mia has prepared dozens of technical documents, including DSS reports, abatement specifications, asbestos management plans, phase I environmental site assessments, assessment of past uses, sampling and analysis plans, soil characterization reports, water taking and discharge plans, environmental compliance approval/permits to take water annual reports, etc.

Prior to her consulting career, Mia had a six-month contract as an Environmental Scientist with the Métis Nation of Saskatchewan. She involved in the Environmental Monitoring Initiative for the Pinehouse village. The project's scope was to monitor the safety of traditionally harvested country foods by collecting and testing representative water, fish, berries, and mammal tissue samples from the areas.

Mia has additional 2 years of experience as a Research Associate at the Naturally Acceptable and Technologically Sustainable (NATS) Toilet, Thailand which involved reinventing technologies for decentralized wastewater treatment in developing countries funded by the Bill and Melinda Gates Foundation. Mia helped to develop solar septic tank technology. Solar septic tank prototypes were installed in several provinces in Thailand.

## EDUCATION

M.Sc., Environmental Engineering, Carleton University, Ottawa, ON, Canada, 2019

M.Eng., Asian Institute of Technology, Pathumthani, Thailand, 2015

B.Sc., Environmental Engineering, Ho Chi Minh City University of Technology, Ho Chi Minh City, Vietnam, 2013

## CERTIFICATIONS & TRAINING

Certificate, Enbridge's 2025 Contractor Safety & Environment Orientation, Ottawa, Ontar, Canada, 2024

## PROJECT EXPERIENCE

### MOLD ASSESSMENT AND ABATEMENT

Mold Assessment – 160 Elgin – Gowling WLG | Ottawa, Ontario, Canada | 2024 | Environmental EIT

Mia performed mold inspection and air sample collection.

### DESIGNATED SUBSTANCE SURVEYS

Pre-Construction Designated Substance Surveys, Aberdeen Pavilion – City of Ottawa | Ottawa, Ontario, Canada | 2024 | Environmental EIT

Designated substance surveys of the historic Aberdeen Pavilion prior to extensive retrofits and upgrades. Extensive lead paint sampling for full abatement of lead-containing materials. Mia performed fieldwork and prepared report.

Project Specific DSSs in Federal Buildings Portfolio, Various Federal Buildings in Ottawa – BGIS | Ottawa, Ontario, Canada | Environmental EIT

Mia worked independently to perform targeted asbestos and designated substance assessments ahead of a wide variety of building renovations, following client security, health, and safety, and reporting protocols. She helped with proposals, site visit coordination, and site visits. She prepared reports in accordance with federal and provincial (ON and QC) regulations (2022, 2023, and 2024).

DSSs, Various Pump Stations in Ottawa – City of Ottawa | Ottawa, Ontario, Canada | 2022 & 2023 | Environmental EIT

Mia performed fieldworks and prepared project specific DSS reports at six City Pump Stations.

DSS at Highway Infrastructure (Bridges, Culverts) – MTO Eastern Region | Ontario, Canada | 2022 & 2023 | Environmental EIT

Mia performed numerous designated substance surveys at bridges and culverts at various locations in eastern Ontario, both field work and reporting.

DSS at Various Condominiums – Condominium Management Group (CMG) | Ottawa, Ontario, Canada | 2022 & 2023 | Environmental EIT

Mia performed designated substance surveys for various project managers at CMG, from coordination to site work, to reporting.

DSS, Multiple Buildings – Hazelview Properties Inc.* | Toronto, Ontario, Canada | 2022 | Environmental Scientist

Mia performed hazardous material assessments and helped with reporting.

** denotes projects completed with other firms*

DSS, Ontario Science Centre – Colliers Project Leaders* | Toronto, Ontario, Canada | 2022 | Environmental Scientist

Mia was the field technician for the designated substance survey.

## ASBESTOS ASSESSMENTS AND ABATEMENT DESIGN

Asbestos Inspection – Art Court – City of Ottawa | Ottawa, Ontario, Canada | 2024 | Environmental EIT

Mia coordinated field work with client, carried out the asbestos inspection and sample collection as well as authored the report.

Type 2 Asbestos Abatement Oversight, Accessibility Improvement, Jeanne Mance Building, 200 Eglantine Driveway – BGIS | Ottawa, Ontario, Canada | 2024 | Environmental EIT

Type 2 asbestos abatement oversight as well as perimeter and clearance airborne fiber testing at a 21-storey government office building. Mia performed fieldwork and helped with reporting.

Type 1 Asbestos Abatement Oversight, Geological Survey of Canada Asbestiform Mineral Storage Abatement Program, 601 Booth Street – BGIS | Ottawa, Ontario, Canada | 2023 | Environmental EIT

Type 1 abatement of asbestiform minerals and storage equipment of the Geological Survey of Canada's (GSC) National Mineral Collection, and transportation of selected specimens to the Canadian Museum of Nature in Gatineau, Quebec. Mia performed fieldwork and prepared report.

Type 1 Asbestos, Level 1 Mold & Lead Abatement Oversight, 705 Progress Avenue, Scarborough – City of Toronto* | Toronto, Ontario, Canada | 2022 | Environmental Scientist

Minimal abatement oversight and air monitoring for a multi-purpose complex (jewelry shop, dance studio, sprinkler room, shelter) at 705 Progress Avenue, Scarborough. Mia's tasks included abatement oversight, air sampling, PCM sample analysis followed NIOSH 7400.

Asbestos Containing Material Reassessment, Multiple Buildings in Ottawa – Morguard Corporation* | Ottawa, Ontario, Canada | 2022 | Environmental Scientist

Mia performed annual reassessment of asbestos-containing materials at various buildings in Ottawa.

Abatement Specification, University of Toronto, Mississauga – University of Toronto* | Mississauga, Ontario, Canada | 2022 | Environmental EIT

Mia prepared Type 1 asbestos abatement specification document.

## INDOOR AIR QUALITY ASSESSMENT

Indoor Air Quality Monitoring, 2821 Birchmount Road – Toronto Community Housing Corporation* | Toronto, Ontario, Canada | 2022 | Environmental Scientist

Mia performed hazardous material assessments and helped with reporting.

## CONTAMINANT MANAGEMENT

Excess Soils Assessment I Hunt Club Storm Water Management Facility Retrofit – City of Ottawa | Ottawa, Ontario, Canada | 2022 & 2023 | Environmental EIT

Mia's duties included conducting field work and generating reports. Scope of work included Sampling and Analysis Plan, Soil Characterization Report, and construction monitoring.

Excess Soils Assessments & Due Diligence Investigations – City of Ottawa | Ottawa, Ontario, Canada | 2023 | Environmental EIT

The project involved detail design and tendering of 13 small diameter culvert renewals, including in-kind replacement and liner rehabilitation. Mia helped with the Assessment of Past Uses report.

Excess Soils Assessment – Ashton Station Drainage Improvement – MTO, Ashton | Ontario, Canada | 2023 | Environmental EIT

Mia's duties included conducting field work and generating reports. Scope of work included Assessment of Past Uses, Sampling and Analysis Plan, and Soil Characterization Report.

Excess Soils Assessments & Due Diligence Investigations – MTO | Cobden, Ontario, Canada | 2023 | Environmental EIT

The project involved detail design and tendering of 3 culvert renewals. Mia helped with the Assessment of Past Uses and Soil Investigation report.

Excess Soils Assessments & Due Diligence Investigations Etienne Road Bridge Culverts – City of Ottawa | Ottawa, Ontario, Canada | 2023 | Environmental EIT

The project involved detail design and tendering of renewal of Etienne Road bridge culvert. Mia helped with soil sampling and site reconnaissance.

Phase 1 Environmental Site Assessment, Rehabilitation of Arthur Street – Town of Gananoque | Gananoque, Ontario, Canada | 2023 | Environmental EIT

Mia's duties included field work, reporting, communication with subcontractors, clients, and stakeholders. Scope of work included Sampling and Analysis Plan and Soil Characterization Report.

Phase I ESA, Meridian Road SE – McLeod Law, LLP | Calgary, Alberta, Canada | 2023 | Environmental EIT

Mia helped with the interview, site reconnaissance, and reporting for a Phase I ESA for an industrial site in Calgary.

Highway Engineering Services on Retainer, Mega 16 (4019-E-0019/20) & Mega 17 (4019-E-0021/22), Mega 18 (4019-E-0023/24) – MTO Eastern Region, Eastern Ontario | Ottawa, Ontario, Canada | 2020-2023 | Environmental EIT

Assignment 2 – Preliminary Design & Class EA for the Highway 416/Barnsdale Road Interchange, Ottawa, GWP 4057-20-00 – MTO – 2022 Mia participated in windshield surveys to support Contamination Overview Studies.

** denotes projects completed with other firms*

Highway Engineering Services on Retainer, Mega 16 (4019-E-0019/20) & Mega 17 (4019-E-0021/22), Mega 18 (4019-E-0023/24) – MTO Eastern Region, Eastern Ontario | Ontario, Canada | 2020-2023 | Environmental EIT

Assignment 14 – Detail Design, Class EA & Construction Ready Contract Package for the Replacement of the Aultsville Creek Culvert on Highway 401, East of Upper Canada Road, GWP 4134-16-00, WP 4178-16-01, Excess Soils Assessments & Due Diligence Investigations, Aultsville – 2023 The project involved removal and replacement of the Aultsville Culvert. Mia helped with the fieldwork and the soil management plan report.

## HYDROGEOLOGIC ASSESSMENTS

Morgan's Grant Statewood Stormwater Management Facility Rehabilitation – City of Ottawa | Ottawa, Ontario, Canada | 2024 | Environmental EIT

Mia performed different types of fieldwork such as slug tests, hand augering, visual inspection, infiltration tests. She also works on reporting.

Water Taking & Discharge Plan for the Duford Street Pipe Repair – City of Ottawa | Ottawa, Ontario, Canada | 2024 | Environmental EIT

Mia prepared Water Taking and Discharge Plan (WTDP) report to support the registration of the pipe repair work on the Environmental Activity and Sector Registry (EASR).

Preliminary, Detail Design & Environmental Assessment, Highway 17, 2 New Rest Centres & Improvements to the Batchawana Bay Rest Area, District of Algoma, GWP 5049-20-00, 5021-E-0009, Water Taking & Discharge Plan | Ontario, Canada | 2024 | Environmental EIT

Mia prepared Water Taking and Discharge Plan (WTDP) report to support the registration of the proposed construction for the improvements to the Highway 17 Batchawana Bay Rest Area on the Environmental Activity and Sector Registry (EASR).

Water Taking & Discharge Plan for the Rehabilitation of Arthur Street – Town of Gananoque | Gananoque, Ontario, Canada | 2022 | Environmental EIT

Mia performed slug test, calculated groundwater flow, and prepared Water Taking and Discharge Plan (WTDP) report to support the registration of the Rehabilitation of Arthur Street from Stone Street to Charles Street on the Environmental Activity and Sector Registry (EASR).

Constraints Analysis for a Battery Energy Storage System (BESS) Project in Peterborough – Northland Power | Peterborough, Ontario, Canada | 2023 | Environmental EIT

Mia provided an overview of hydrogeology and contamination of the site to identify any significant constraints that would prevent construction and operation of the BESS project.

Groundwater Assessment | The Summer Village of Ghost Lake (SVGL) | Alberta, Canada | 2023 | Environmental EIT

Mia conducted interviews and groundwater sampling at six selected households in Ghost Lake Village, Alberta.

Permit to Take Water and Environmental Compliance Approval – Coco Properties Corporation now GIP | Ontario, Canada | Environmental EIT

Mia helped with the pumping record and groundwater monitoring tables for the permit renewal for different sites (2022, 2023 & 2024).

Amherst Island Shoreline Assessment, Water Well – Baird W.F. & Associates Coastal Engineers Ltd. | Amherst Island, Ontario, Canada | 2023 | Environmental EIT

Mia completed a water well desktop review to support the conceptual design of shoreline improvements at four separate segments on Amherst Island in the Loyalist Township.

Hydrogeology Assessment to Support Severance Application, Smiths Falls & Carleton Place – Private Landowners | Ontario, Canada | 2022-2023 | Environmental EIT

Mia participated in well surveys and hydrogeology assessment questionnaires to support severance applications for several sites.

## ENVIRONMENTAL MONITORING

Métis Nation of Saskatchewan (MN-S)* | Regina, Saskatchewan, Canada | 2020-2021 | Environmental Scientist

Mia's main project at MN-S was Environmental Monitoring Initiative for Pinehouse village in Saskatchewan. Her duties included researching the area, locating potential contaminated sources from uranium mines north of Saskatchewan, and checking bathymetric maps and discharge data to locate sampling points. She also helped to organize a meeting to talk about collaboration with the Pinehouse community which was well received. She was responsible for coordinating and checking the sample results gathered by the community, and reporting findings to the Senior Scientist and Director at MN-S.

## INTERNATIONAL

Naturally Acceptable and Technologically Sustainable (NATS) Toilet* | Pathum Thani, Thailand | 2015-2017 | Research Associate

Mia helped to develop solar septic tank technology that could improve the efficiency of current onsite sanitation systems in developing countries. She was on the technology team, her duties included performing the field survey, developing ideas for new products, communicating with the design team so they could design, optimize features of the products, and giving technical advice for management team.

** denotes projects completed with other firms*

# Jaka Suryana B.Sc., P.Eng., QP ESA

Senior Environmental Engineer, Associate

15 years of experience

Jaka has been involved in the environmental consulting industry for contaminated site investigation and remediation, and renewable fuels projects for over 15 years. He provides senior technical and project management support to a variety of environmental programs in Ontario and Alberta.

He has completed a wide range of Phase I, II and III Environmental Site Assessments (ESAs), Human Health Risk Assessments, soil vapour and air quality investigations, and in-situ and ex-situ remediation programs, primarily for urban places (e.g., retail fuel outlets, dry-cleaning operations, retail, wastewater treatment plant, municipal lands). He has led and supported these environmental projects for both public and private sector clients. The projects have involved due diligence assessment, intrusive site characterization, contaminant risk evaluation, implementation of field sampling programs and risk management measures, determination of subsurface contaminant migration, and/or design of contaminant remediation.

Jaka is well-versed in federal and select provincial environmental regulatory frameworks, and is defined as a Qualified Person for ESA under Ontario Regulation 153/04.

## EDUCATION

Diploma,Chemical Engineering Technology with Honours, Seneca College of Applied Arts & Technology, Toronto, Ontario, Canada, 2006

Bachelor of Science, Chemical Process Engineering with Second Class Honours, Queen's University, Kingston, Ontario, Canada, 2010

## REGISTRATIONS

Professional Engineer #151645, Association of Professional Engineers and Geoscientists of Alberta, 2015-Present

Professional Engineer #100535532, Professional Engineers Ontario, 2019-Present

## MEMBERSHIPS

Member, Ontario Society of Professional Engineers, 2016-Present

Member, Qualified Persons Community of Ontario, 2025-Present

## PROJECT EXPERIENCE

### FINANCIAL, INSURANCE, & REAL ESTATE

Environmental Site Assessment, Risk Management & Remediation Application - REIT Properties | Various Locations, Alberta | 2012-Present | Account Manager, Senior Reviewer

Managed various environmental projects for over 15 commercial sites in Alberta for a Toronto-based REIT company focusing on urban retail-centered properties. Projects were generally conducted for environmental due diligence, financial and/or insurance purposes for existing sites or potential acquisition/disposition sites. Responsibilities consisted of account management, proposal preparation, technical project management, financial management, project execution and completion. Technical assessments included, but not limited to, site characterizations, vapour inhalation risk assessment, remedial applications and/or risk management. Chemicals of potential concern were typically associated with petroleum hydrocarbons (PHCs), dry cleaning related volatile organic compounds (VOCs), polycyclic aromatic hydrocarbons (PAHs), metals.

Phase I Environmental Site Assessments, Various Sites in Ontario and Alberta | Various Locations (Ontario & Alberta) | 2015-Present | Project Manager, Senior Reviewer (QP ESA)

Project manager and senior reviewer for various Phase I ESA projects for sites in Ontario and Alberta. The type of projects varied; typically for due diligence purposes for real estate transactions (acquisition/disposition, financing, insurance, etc.) or for regulatory purposes for Site Plan Application / Record of Site Condition. The projects were completed in accordance with the CSA standards or provincial standards such as O. Reg. 153/04 in Ontario.

Environmental Site Assessment, Residential Fuel Oil Release | Lombardy, Ontario, Canada | 2019 | Project Manager, Field Engineer

Managed a Limited Phase II ESA and spill clean-up program related to 180 L fuel oil release from an aboveground storage tank in a basement of a residential property during fuel delivery. Acted as the environmental consultant on behalf of the insurer and homeowners, and liaised findings of the investigation to the Technical Standards and Safety Authority (TSSA).

In-Situ and Ex-Situ Chemical Reduction Remediation of PCE Impacts - Active Shopping Plaza | Sherwood Park, Alberta | 2021-2024 | Project Manager, Senior Reviewer

Managed a remediation program of dry-cleaner solvent impacts from a historical operation within an active multi-tenant commercial shopping plaza. The dry-cleaner impacts encompassed an approximate area of 655 square metres and had extended vertically up to a depth of 9 metres below grade (mbg). A combined in-situ and ex-situ chemical reduction (ISCR and EXCR) approach was implemented. The ISCR approach included injections of 70,000 L of EHC-L reducing reagent into 371 injection drive points within targeted areas. Bioaugmentation to biodegrade the PCE using Kb-1 Plus bacterial culture was also implemented in conjunction with the ISCR injection. The EXCR approach involved excavation of the source soils up to a depth of approximately 7.5 mbg, and application of Daramend reagent within the final extent of the excavation.

## COMMERCIAL RETAIL

Phase I & II Environmental Site Assessments - Grocery Store Sites | Various Locations, Alberta | 2012-2024 | Project Manager, Senior Reviewer

Managed Phase I and II ESA projects for various commercial grocery store sites throughout Alberta. Responsibilities included proposal preparation, project management, project execution and completion. Projects generally consisted of site characterizations, vapour inhalation risk assessment and risk management.

Environmental Remediation, Former Dry Cleaners CRU | Calgary, Alberta, Canada | 2019-2024 | Project Manager, Senior Reviewer

Managed an environmental remediation program associated with identified subsurface cVOC impacts in soil, soil vapour and indoor air, related to a former dry-cleaning operation within a commercial retail unit in a multi-tenant shopping plaza. Environmental programs have included routine monitoring and sampling program (indoor and outdoor), an application of an on-site vapour mitigation system (sub-slab depressurization fan), and more recently an indoor in-situ chemical oxidation (ISCO) injection programs. The ISCO injection programs consisted of injecting a total of 63,315 L of sodium persulfate with sodium hydroxide activator into 44 vertical drive point injection locations within the retail unit. Environmental activities have also been completed to satisfy the regulatory requirements outlined in the Risk Management Plan for the Site.

## COMMERCIAL MIXED USE

Chlorinated Organic Impact ESA, HHRA and Remediation Programs | Alberta | 2012-2024 | Project Engineer, Senior Reviewer

Completed site investigations of several dry cleaning and chemical facilities where chlorinated solvents have been used and released to the environment. Typically, the assessments have included delineation of the soil and groundwater contaminant plumes, followed by the completion of a human health risk assessment to derive appropriate site-specific, risk-based criteria then containment or risk management measures, or both.

## RESIDENTIAL / COMMERCIAL DEVELOPMENTS

Implementation of Risk Management Plan | Calgary, Alberta | 2015-2016 | Assistant Project Manager, Field Engineer

Coordinated, executed and reported on an implementation of a regulatory approved risk management plan (RMP) during construction stage of a five-story mixed use commercial/ residential development. The RMP implementation is associated with VOC impacts from an on-site former dry cleaner and PHC impacts from an off-site former service station, and involved managements of workers' health & safety, impacted soil and groundwater, and residual impacts. The soil management consisted of soil characterization during excavation and for post-excavation confirmatory sampling. A total of approximately 9,500 tonnes of impacted soils were removed from the site during the excavation. the groundwater management involved groundwater quality assessment during construction dewatering and post-construction.

Phase One ESA for Site Plan Approval Application* | Ajax, Ontario, Canada | 2025 | Project Manager, QP ESA

Project Manager of a Phase One ESA project in the Town of Ajax to support a Site Plan Approval application to the Regional Municipality of Durham. The Site Plan Approval application was for a proposed residential subdivision development of an existing agricultural land use. The Phase One ESA was completed in accordance with O. Reg. 153/04 requirements. Responsibilities included project scoping and planning, budgeting, client communication, reporting, and preparing a Reliance Letter for the Region.

## REGIONAL / SUBURBAN PLANNING

Alberta Municipal Affairs, Preliminary Sediment Sampling Program – Human Health Receptor Pathways, 2013 Flood Impacted Residential Communities | High River, Alberta | 2013 | Site Assessor

Executed collection of sediment samples related to the 2013 summer flooding from 13 residential communities in High River, Alberta for a preliminary assessment of potential environmental impacts in sediment from the flood to human health receptors.

Create TO - Environmental Programs* | Toronto, Ontario | 2024-2025 | Client Manager, QP ESA

Primary Client Manager for CreateTO, an agency mandated by the City of Toronto to manage the City’s portfolio of real estate assets. Led various project RFPs involving environmental, geotechnical and hydrogeology investigations for various site redevelopments across Toronto. Proposed environmental scope of work typically involved O. Reg. 153/04 for Record of Site Condition (Phase One and Two ESAs, Tier 3 / modified generic risk assessments, and risk management measures), O. Reg. 406/19 (onsite and excess soil management), and remediation feasibility studies.

** denotes projects completed with other firms*

City of Chestermere - Environmental Programs* | Chestermere, Alberta, Canada | 2024-2025 | Client Manager, Senior Reviewer

Successfully led the team to secure a Master Service Agreement with the City of Chestermere for Environmental Engineering Services. Primary Client Manager to support the City for contaminated site services, environmental planning, and hazardous materials assessments and management.

## OIL & GAS DOWNSTREAM, RETAIL

Downstream Retail Fuel Outlets - Environmental Programs Across Alberta | Alberta | 2012-2024 | Account Manager, Senior Reviewer

Managed and coordinated for a portfolio of over 50 Husky and former Mohawk downstream facilities within Alberta (active and legacy sites). Works involved completion of Phase II/III environmental site assessments and the risk management or remediation of PHC contaminated sites (remedial extraction system, chemical injection treatment, excavation). Supported client in 2022 for disposition of 30+ of the client-owned active retail fuel outlet sites.

Gasoline Plume Assessment and Remediation Program - Former Husky Service Station | Calgary, Alberta | 2012-2024 | Project Engineer, Technical Reviewer

Managed environmental assessment and remediation of a large gasoline plume extending from a former service station in the City of Calgary to beneath high traffic roadways and adjacent commercial and parkland properties. Site assessments have included air, groundwater and soil quality investigations, as well as operation, maintenance, modification and performance evaluation of a remediation system involving a full-scale high vacuum extraction and an interception trench groundwater pumping and vacuum extraction remediation system.

Shell GESS (Global Environmental Services Strategy) | Multiple Sites, Alberta | 2012-2014 | Field Engineer

Planned, executed and reported on various environmental site assessment and environmental remediation projects for over 20 active and former service station sites throughout Alberta. Projects consisted of soil, groundwater and soil vapour quality investigations involving petroleum hydrocarbons. Major fieldwork activities involved groundwater, soil and air quality monitoring and sampling, as well as installation, operation, maintenance and decommissioning of various remediation systems and methods, such as soil vapour extraction, air sparge, multi-phase extraction systems and chemical oxidation treatment method.

Husky, Shell and Parkland Industries, Assessment and Remediation Program | Provost, Alberta | 2014-2015 | Project Coordinator, Field Engineer

Project coordinator for the assessment and remediation of a former bulk station then service station facility. Following initial investigation, onsite source removal included the site decommissioning then excavation, land treatment and replacement of approximately 8,000 $m^3$ of petroleum hydrocarbon impacted soils. Residual offsite impact are being managed through the operation of a combined sparging/injection and vapour extraction system, combined with a program of natural attenuation monitoring/ sampling and on-going soil vapour and indoor air testing to monitor the risk to commercial receptors in the area.

Petroleum Hydrocarbon Assessment, Risk Management and Remediation Program – Active and Legacy Retail Fuel Outlets | Canada | 2016-Present | Project Manager, Senior Reviewer

Project Manager and Quality Reviewer for a portfolio of over 50 active and legacy retail fuel outlets in Western and Eastern Canada. Jaka was responsible for all aspects of project management including contract, schedule, budget, resourcing, liaising with the contractors, municipality, regulator, and third-party stakeholder (as applicable), and communication of project risks and recommendations to the client. One of the sites involved ongoing remediation of a large PHC plume extending from a former service station under roads and nearby offsite properties in Calgary. This remediation work included phased ESAs (air, groundwater, soil), application of a high-vacuum extraction and interception trench remediation system, and development of a RMP for on-site and off-site properties.

## FEDERAL GOVERNMENT

Knapp Point Minor Shore Light - Remedial Confirmation | Wolfe Island, Ontario | 2018 | Project Manager, Field Engineer

Project manager for a remedial confirmation assessment of soil conditions and designated substances/hazardous material for a non-active minor shore light on a federal land. Chemicals of potential concern in soils included metals parameters, associated with lead-based paint on the exterior of the existing structure. The assessment was assessed using applicable federal guidelines and/or provincial guidelines (if federal guidelines are not available). Responsibilities included managing project as a whole from the client communications, project planning, program coordination, field execution and technical support, financial management and reporting.

** denotes projects completed with other firms*

Baseline Environmental Conditions Assessment and Geotechnical Study at Proposed Staging Area for the Kingston Inner Harbour Sediment Management Project | Kingston, Ontario | 2025-Present | Project Manager

Project Manager for a Baseline Environmental Conditions Assessment and Geotechnical Study for PWGSC, on behalf of Transport Canada and Parks Canada. Jaka managed the background review and development of a detailed work plan for the subsequent intrusive investigations to support the proposed sediment management project planned for 2027. Responsibilities included overall management of the project consisting of communications with PWGSC and various stakeholders, project coordination (resource and tasks allocation, project scheduling), multidisciplinary team management (environmental and geotechnical), project financial overview and management, and providing senior technical environmental support.

## OIL & GAS MIDSTREAM, PIPELINES

Enbridge Emergency Spill Response Environmental Investigations | Anzac, Alberta | 2012 | Field Engineer

Provided field support for soil, groundwater & surface water investigations for remedial activities during the ICS Emergency Response Phase for a large petroleum hydrocarbon pipeline spill due to a ruptured pipeline

Enbridge Post-Spill Remedial Multi-Phase Extraction Application | Sherwood Park, Alberta | 2017 | Technical Advisor

Provided technical advisories and data analysis on the remedial multi-phase extraction application following petroleum hydrocarbon pipeline spill.

## SPILL RESPONSE

Panther Industries Inc., Hydrochloric Acid Spill Release | Sherwood Park, Alberta | 2012-2013 | Field Engineer

Conducted emergency spill response and remedial activities following an approximate 6,000 litres release of hydrochloric acid into a creek water body. Developed containment and remediation strategies through containment extraction and acid neutralization, and successfully remediated the creek to its condition prior to the incident.

Federated Insurance, Diesel Fuel Spill Site Remediation | Boyle, Alberta | 2013 | Field Engineer

Coordinated emergency response and remediation of 30,000 litres of dyed diesel fuel release into muskeg following a tractor-trailer highway incident. Managed supervision of excavation and material transportation/disposal activities as part of the spill clean-up.

## PASSENGER RAIL TRANSIT

City of Calgary, Preliminary Phase II Environmental Site Assessment, The City of Calgary Green Line North LRT | Calgary, Alberta | 2015-2016 | Technical Advisor

Provided technical and health & safety support for a Preliminary Phase II ESA at select properties located along the proposed route of The City of Calgary's Green Line North LRT project. The City of Calgary Green Line North LRT was intended to add approximately 40 km of line to the City of Calgary's LRT system, extending from Seton in the south, through downtown and to North Pointe in the north. The objective of the Preliminary Phase II ESA was to assess for the presence or absence of potential environmental impacts in soil and groundwater beneath the select properties for environmental due diligence purposes prior to construction development. The potential environmental concern included, but were not limited to, former service stations, dry cleaners and other historical activities of potential concern. The Preliminary Phase II ESA was conducted in conjunction with a geotechnical investigation completed by another consultant.

## WASTEWATER TREATMENT

City of Kingston, Design of Ravensview Water Treatment Facility Upgrade* | Kingston, Ontario | 2008 | Student Consultant

Developed a preliminary design for an upgrade of an existing water treatment plant in Kingston in order to double the current capacity. Conceptual design involves primary, secondary and tertiary wastewater treatment utilizing various methods, such as coagulation, flocculation, granulation, filtration and disinfection.

City of Calgary, Limited Phase II Environmental Site Assessment, Bonnybrook Wastewater Treatment Plant - Proposed Plant D Expansion | Calgary, Alberta | 2014 | Technical Support

Reported on the results of the Limited Phase II ESA to assess general subsurface conditions in soil and groundwater, and methane concentration in soil vapour beneath the area of the proposed Plant D Expansion of the Bonnybrook Wastewater Treatment Plan, which is located within the 100 year flood plain of the Bow River. The chemicals of potential concern included petroleum hydrocarbons, volatile organic compounds, salinity, metals, polycyclic aromatic hydrocarbons, water chemistry and fecal coliforms in soil and/or groundwater, and methane in subsurface soil vapour. The results were assessed using various guidelines involving AESRD 2014 Tier 1 guidelines, AESRD 2014 Environmental Quality Guidelines for Alberta Surface Waters, CCME 2005 Guidelines for Compost Quality (PN 1340), Health Canada 2014 Guidelines for Canadian Drinking Water Quality and AEP 1999 Guidance Document on Management of Methane Gas Adjacent to Landfills.

## COMMUNITY INVOLVEMENT

Citizen Appointees, City of Kingston - Kingston Environmental Advisory Forum (KEAF), Kingston, Ontario, Canada 2023-2025

** denotes projects completed with other firms*

## PRESENTATIONS

Remediation of soil and groundwater PCE impacts beneath a multi-tenant commercial building in Alberta. *EES1125H - Contaminated Site Remediation Course, University of Toronto*, 2025.

In-Situ & Ex-Situ Remediation of cVOC Impacts in Conjunction with Site Construction Activities: Challenges and Perspectives from the Landowner, Remedial Contractor and Environmental Consultant. *Remediation Technologies Symposium East (Niagara Falls, ON)*, 2023.

Dear Mia Dinh:

RE: **MECP FOI A-2025-02856 / Your Reference 121626297 – Acknowledgement Letter**

The Ministry is in receipt of your request made pursuant to the Freedom of Information and Protection of Privacy Act. **The search will be conducted on the following:**

**1900 Cyrville Road, Ottawa**

**Time Period: 1900/01/01 to 2025/04/30**

**If there is any discrepancy, please contact us immediately.**

Please note the file number that has been assigned to your request. This number should be referred to in all future communications with our office.

If you have any questions, please contact Jessica Wilson at jessica.wilson@ontario.ca.

Yours truly,
Jessica Wilson

Dear Mia Dinh:

RE: **MECP FOI A-2025-02856, Your Reference 121626297 – Decision Letter**

This letter is in response to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to:

1900 Cyrville Road, Ottawa

Time Period: 1900/01/01 to 2025/04/30

The ministry's District Office has advised that there are inactive records in the Records Centre, Mississauga, and below is a description of these records:

- 3-1725-98-996, Municipal and Private Sewage Works (MPSW), Cornerstone Builders Ltd., Approved, Offsite, NA, 1999

If you would like us to retrieve these files, **please submit a new request** and inform the analyst below. In the request description section, indicate you are seeking records from the Record Centre in relation to file number A-2025-02856. The $5 application fee for your new FOI request will be applied towards any costs incurred with the retrieval of the records from the Records Centre.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Shannon Neita at shannon.neita@ontario.ca.

Yours truly,

***Shannon Neita***

**Your File No.:** **884370**
**SR No.:** **3161994**

Dear Madam/Sir:

We are in receipt of your correspondence wherein you requested the release of information regarding the above noted subject.

A search of TSSA public records **did not** identify/reveal/locate any documents relating to the following Program(s):

| Program | No Record |
|---|---|
| **Fuels Safety** | ☐ |
| **Boiler/Pressure Vessel** | ☐ |
| **Elevating & Amusement Devices** | ☐ |

Requested records relating to the following Program(s) were located:

| Program | Record | Documents Attached |
|---|---|---|
| **Fuels Safety** | ☒ | ☒ |
| **Boiler/Pressure Vessel**** | ☐ | ☐ |
| **Elevating & Amusement Devices** | ☐ | ☐ |
| **Other** | ☐ | ☐ |

**For BPV, if it has been indicated that records have been located but are not attached, it is likely that TSSA may not be the keeper of the records you are looking for, see note below.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

Should you have any questions, please contact Public Information at publicinformationservices@tssa.org.

Yours truly,

*Mariah Falzon*

# Limitations and Notices:

***TSSA Fuels Safety:***

If you have environmental concerns regarding this property, you should consider hiring an environmental consultant to conduct an environmental assessment of the property in question.

- Sites that have not been licensed since 1987 may not be in TSSA records.

- Be advised, TSSA Fuels Safety Division did not register:
  - private fuel underground/ aboveground storage tanks prior to January of 1990; and
  - furnace oil tanks prior to May 1, 2002.

- Fuels Safety Division does not register
  - private waste oil tanks in apartments, office buildings, residences etc.; and
  - aboveground gas or diesel tanks.

- The *Technical Standards and Safety Act* and associated regulations do not require the registration of private fuel outlets, nor does it require that any documentation on these facilities be submitted to or reviewed or approved by TSSA. As a result, TSSA has limited information on these facilities. TSSA cautions that any information provided may be inaccurate, incomplete or out of date.

***TSSA Elevating & Amusement Devices Program Notice:***

- All orders and/or directions issued by the TSSA Inspector have a compliance date and the owner or designated contractor are required to comply within the specified time limit.

- All written declarations of compliance (where eligible) should be sent to TSSA. Once a declaration of compliance has been received, the outstanding order will be resolved.

- Each report shows the details and date of the inspection conducted by TSSA at the requested location.

- The Ontario Amusement Devices Regulation (O. Reg. 221/01) was adopted in 2001. Since that time, TSSA retains copies of technical dossiers of new amusement devices in Ontario (as per TSSA's retention policy). However, for rides that existed prior to the adoption of the Regulation, which were subject to a "grandfathering-in" clause, technical dossiers were not required to be filed with the TSSA. However, if the amusement ride remains in operation, as per ASTM requirements, the owner/licensee must possess an operations document for the device in question.

***TSSA Boilers and Pressure Vessels (BPVs) Program Notice:***

- Be advised, TSSA does not typically inspect BPVs. These inspections are usually performed by insurance companies.

- **Inspection reports are not always submitted to TSSA by insurance companies; therefore, while TSSA may have some evidence of a BPV at a location on file, there may be no inspection records pertaining to BPVs located at the address provided.

- As of July 1, 2018, BPVs in Ontario may not be operated unless the Director has issued a current certificate of inspection (COI) to the owner or operator. A COI will be issued to the owner or operator of the BPV by TSSA after TSSA has received a Record of Inspection (ROI) from the insurer/third-party inspector, the associated fees have been paid and the BPV has passed a periodic inspection.

- Please note that if the BPV in question is insured, the insurance company may have additional inspection records. Please contact the insurer directly should you wish to obtain further information.

**Orders Issued To:** COSTCO WHOLESALE CANADA LTD.

**Task Notes**

On July 29, 2019 the periodic Propane inspection was done at 1900 Cyrville Road in Ottawa Ontario of the (Costco propane refill).

I spoke with staff who were able to show me the site and viewed one employee filling 20lb propane cylinders safely.

The equipment is maintained by Superior Propane who was last on site for inspection on March 29, 2019.

There was a pressure test tag also affixed to the piping to reflect this inspection.

We tested the E-Stop and viewed the site with no visual infraction noted at this time.

Inspection complete.

TSSA's time involved with this inspection will be billed to the above named client in the form of cost recovery fees by authority of Section 19 of the TSSAct, 2011 and according to TSSA billing policy.

## Task Notes

TSSA Inspector David Barclay conducted a Propane Periodic Inspection at 1900 Cyrville Rd; Ottawa(Costco) on January 25, 2013.

On site Inspection of Propane storage tank, cylinder storage, signage, licences, fire extinguishers, soap for leaks, dispensing equipment, record of daily inspection of hoses and dispensing equipment, found the following code infractions:

-Purge vent pipes rusty.
-Records of Daily Inspection of hoses and dispensing equipment not available during this inspection.
-Soap to be readily available at dispensing area for leak checking.

Consulted with Bruno Monderie, advised of code infractions and compliance date.

Inspection Complete.

Pursuant to my Authority under Section 21 of the TSSAct, 2000, you are hereby Ordered to comply with the above Orders forthwith.

**Task Notes**

TSSA Inspector David Barclay conducted an Inspection and Verification of the Propane Risk Safety Management Plan Report at 1900 Cyrville Rd; Ottawa(Costco) on March 21, 2012.

Inspection and Verification of RSMP Report found several deficiencies with the report. Consulted with Bruno Monderie who made all necessary corrections to the report and made this Inspector an updated copy of the RSMP report which was sent to Anne Brown at TSSA, Toronto office.

-Page 4 Under heading Discription of the maximum volume, types and storage location of other hazardous materials on site, 3000L Motor oil storage tank located in garage was added, also under heading Description of fire and emergency equipment indicated on facility site map, location of Emergency stop button was corrected to indicate the actual location mounted on building.
-Page 5 (7) Propane Supplier Key Contact Person, Name and Official Title was missing and added. certificate holders, was missing a Target date which has now been added.
-Page 7 under heading On-site specific training provided to certificate holders was missing the training date, has been added.
-Page 10 Missing lock out procedures, has been added.
-Page 12 under heading Tank setback coordinates, left side to property line was inaccurate and has been corrected.
-Page 14 Under heading Distance from Tank to Closest Building or Feature the distance recorded from tank to Travelodge hotel was inaccurate and has been corrected.

-Site Plan Map missing location of Bulk Motor Oil storage tank, has been added to map.

RSMP Inspection Complete.

Cost recovery fees will be billed to the above named client by Authority of Section 19 of the TSSAct, 2000 and according to TSSA billing policy.

## Task Notes

TSSA Inspector David Barclay conducted a Propane Periodic Inspection at 1900 Cyrville rd; Ottawa, April 1, 2011 and found the following noncompliances:

- Purge vent pipe rusty needs to be painted.
- No smoking sign needed on cylinder cage.
-Piping in cylinder fill cabinet rusty.
-Cylinder fill hose worn down to wires due to dragging on cement pad also found Costco employees closing cylinder cabinet door on hose.
-Distance between posts for protection of supply tank more than 54" in one location, lamp post is not protection for tank.
-Purge nozzel missing neoprene gasket.
-Rusted pipes located in "chase" need attention.
The above Inspector's Orders are a result of the inspection. Cost recovery fees will be billed to the above named client by Authority of Section 19 of the TSSAct, 2000 and according to TSSA billing policy.
Pursuant to my Authority under Section 21 of the TSSAct, 2000, you are hereby Ordered to comply with the above Orders forthwith.
-Pipes located in "chase" rusted, need attention.
-Cylinder cage needs protection from trucks backing up to building to load/unload, spoke with Bruno Monderie who will relocate cages.

## Required Fees

**Please don't hesitate to visit the Historic Land Use Inventory website more information. Fees must be paid in full at the time of application submission.**

**Planning Fee** $213.00

## Submittal Requirements

The following are required to be submitted with this application:

1. **Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
2. **Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Development and Building Services Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
3. **A site plan or key plan of the property, its location and particular features.**
4. **Any significant dates or time frames that you would like researched.**

## Disclaimer
## For use with HLUI Database

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Stantec Consulting Ltd. ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.

3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.

4. Copyright is reserved to the City.

5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.

6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.

7. All information collected under this request and all records provided in response to this request are subject to the provisions of the Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56, as amended.

**To:** Cardenas, Gerardo <Gerardo.Cardenas@stantec.com>
**Subject:** Interview questions for Costco Phase One ESA Report (Required by City's Comments)

**Interview questions:**

1. **What approximate year did Costco purchase/acquire the property?** 1/24/1990

2. **What was the condition of the property at the time of purchase/property acquisition?**

- Was the site developed or vacant unused land? Vacant

- Any buildings and types of buildings (slab-on-grade, poured concrete, temporary structures, and trailers)? N/A

- Land use: commercial, industrial, residential? Commercial

- Site operations (i.e., refuelling trucks on site, storing waste or fuel)? N/A

3. **Did Costco offer automotive repair services (i.e., tire and oil changes, etc.)?** Tire Center pre-2020; fully decommissioned in 220

4. **Any waste oil ASTs stored on-site, hazardous waste, and/or chemical/fuel spills on-site during site operations?** Not to our knowledge

5. **Any back up generators and diesel fuel storage for associated generators?** Not to our knowledge

6. **Any known information about the neighbouring properties that may be a potential environmental concern or risk of impacting the site?** Not to our knowledge

# Well Record - Regulation 903

*Ontario Water Resources Act*

## Notice of Collection of Personal Information

Personal information contained on this form is collected pursuant to sections 35-50 and 75(2) of the *Ontario Water Resources Act* and section 16.3 of the Wells Regulation. This information will be used for the purpose of maintaining a public record of wells in Ontario. This form and the information contained on the form will be stored in the Ministry's well record database and made publicly available. Questions about this collection should be directed to the Water Well Customer Service Representative at the Wells Help Desk, 125 Resources Road, Toronto Ontario M9P 3V6, at 1-888-396-9355 or wellshelpdesk@ontario.ca.

Fields marked with an asterisk (*) are mandatory.

# Well Record for Well Cluster - Part 3 of 3
# Detailed Drawing of All Well Locations

**Note**: This **Well Record for Well Cluster Part 3 - Detailed Drawing of all Well Locations,** must be attached to Parts 1 and 2. The drawing must include all property boundaries, an arrow indicating the North direction, all named roads and sufficient measurements to locate all wells in the cluster in relation to fixed points. The drawing must show the location of each well and each well must be numbered on the drawing to match number used for that well on the **Well Record for Well Cluster Parts 1 and 2.** The well with the well tag must be clearly identified on the Drawing.
UTM coordinates should appear beside each well, if space permits. Additional comments on wells can be included on the drawing

**Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary: Summary By Data Source

## BORE - Borehole

A search of the BORE database, dated 1875-Jul 2018 has found that there are 4 BORE site(s) within approximately 0.25 kilometers of the project property.

| Lower Elevation | Address | Direction | Distance (m) | Map Key |
|---|---|---|---|---|
| | ON | W | 106.38 | 7 |
| | ON | NE | 159.72 | 19 |
| | ON | E | 220.69 | 33 |
| | ON | WNW | 239.03 | 41 |

## CA - Certificates of Approval

A search of the CA database, dated 1985-Oct 30, 2011* has found that there are 5 CA site(s) within approximately 0.25 kilometers of the project property.

| Lower Elevation | Address | Direction | Distance (m) | Map Key |

# Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update.* ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

***Abandoned Aggregate Inventory:*** Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

***Government Publication Date: Sept 2002****

***Aggregate Inventory:*** Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

***Government Publication Date: Up to Nov 2024***

***Abandoned Mine Information System:*** Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

***Government Publication Date: 1800-Apr 2024***

***Anderson's Waste Disposal Sites:*** Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

***Government Publication Date: 1860s-Present***

***Aboveground Storage Tanks:*** Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

***Government Publication Date: May 31, 2014***

***Automobile Wrecking & Supplies:*** Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

***Government Publication Date: 1999-Apr 30, 2024***

***Borehole:*** Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

***Government Publication Date: 1875-Jul 2018***

***Certificates of Approval:*** Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

***Government Publication Date: 1985-Oct 30, 2011****

***Dry Cleaning Facilities:*** Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

***Government Publication Date: Jan 2004-Dec 2022***

***Commercial Fuel Oil Tanks:*** Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

***Government Publication Date: Oct 2023***

***Chemical Manufacturers and Distributors:*** Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

***Government Publication Date: 1999-Jan 31, 2020***

***Chemical Register:*** Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

***Government Publication Date: 1999-Apr 30, 2024***

***Compressed Natural Gas Stations:*** Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

***Government Publication Date: Dec 2012 -Feb 2025***

***Inventory of Coal Gasification Plants and Coal Tar Sites:*** Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

***Government Publication Date: Apr 1987 and Nov 1988****

***Compliance and Convictions:*** Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

***Government Publication Date: 1989-Mar 2025***

***Certificates of Property Use:*** Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

***Government Publication Date: 1994 - Feb 28, 2025***

***Drill Hole Database:*** Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

***Government Publication Date: 1886 - Aug 2024***

***Delisted Fuel Tanks:*** Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

***Government Publication Date: Oct 2023***

***Environmental Activity and Sector Registry:*** Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

***Government Publication Date: Oct 2011-Mar 31, 2025***

***Environmental Registry:*** Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

***Government Publication Date: 1994 - Feb 28, 2025***

***Environmental Compliance Approval:*** Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

***Government Publication Date: Oct 2011-Mar 31, 2025***

***Environmental Effects Monitoring:*** Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

***Government Publication Date: 1992-2007****

***ERIS Historical Searches:*** Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

***Government Publication Date: 1999-Aug 31, 2024***

***Environmental Issues Inventory System:*** Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

***Government Publication Date: 1992-2001****

***Emergency Management Historical Event:*** Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

***Government Publication Date: Apr 30, 2022***

***Environmental Penalty Annual Report:*** Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

***Government Publication Date: Jan 1, 2011 - Dec 31, 2024***

***List of Expired Fuels Safety Facilities:*** Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

***Government Publication Date: Oct 2023***

***Federal Convictions:*** Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

***Government Publication Date: 1988-Jun 2007****

***Contaminated Sites on Federal Land:*** Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

***Government Publication Date: Jun 2000-Jan 2025***

***Fisheries & Oceans Fuel Tanks:*** Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

***Government Publication Date: 1964-Sep 2019***

***Federal Identification Registry for Storage Tank Systems (FIRSTS):*** Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

***Government Publication Date: Oct 31, 2021***

***Fuel Storage Tank:*** Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

***Government Publication Date: Oct 2023***

***Fuel Storage Tank - Historic:*** Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

***Government Publication Date: Pre-Jan 2010****

***Ontario Regulation 347 Waste Generators Summary:*** Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

***Government Publication Date: 1986-Jun 30, 2024***

***Greenhouse Gas Emissions from Large Facilities:*** Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

***Government Publication Date: 2013-Apr 2024***

***TSSA Historic Incidents:*** Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

***Government Publication Date: 2006-June 2009****

***Indian & Northern Affairs Fuel Tanks:*** Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

***Government Publication Date: 1950-Aug 2003****

***Fuel Oil Spills and Leaks:*** Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

***Government Publication Date: 31 Oct, 2023***

***Landfill Inventory Management Ontario:*** Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

***Government Publication Date: Mar 31, 2022***

***Canadian Mine Locations:*** Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

***Government Publication Date: 1998-2009****

***Mineral Occurrences:*** Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

***Government Publication Date: 1846-Feb 2025***

***National Analysis of Trends in Emergencies System (NATES):*** Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

***Government Publication Date: 1974-1994****

***Non-Compliance Reports:*** Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

***Government Publication Date: Dec 31, 2023***

***National Defense & Canadian Forces Fuel Tanks:*** Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

***Government Publication Date: Up to May 2001****

***National Defense & Canadian Forces Spills:*** Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

***Government Publication Date: Mar 1999-Nov 2023***

***National Defence & Canadian Forces Waste Disposal Sites:*** Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

***Government Publication Date: 2001-Apr 2007****

***National Energy Board Pipeline Incidents:*** Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

***Government Publication Date: 2008-Dec 31, 2024***

***National Energy Board Wells:*** Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

***Government Publication Date: 1920-Feb 2003****

***National Environmental Emergencies System (NEES):*** Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

***Government Publication Date: 1974-2003****

***National PCB Inventory:*** Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

***Government Publication Date: 1988-2008****

***National Pollutant Release Inventory:*** Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

***Government Publication Date: Feb 2024***

***National Pollutant Release Inventory - Historic:*** Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

***Government Publication Date: 1993-May 2017***

***Oil and Gas Wells:*** Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

***Government Publication Date: 1988-May 31, 2024***

***Ontario Oil and Gas Wells:*** Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

***Government Publication Date: 1800-Aug 2024***

***Inventory of PCB Storage Sites:*** Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

***Government Publication Date: 1987-Oct 2004; 2012-Dec 2013***

***Orders:*** Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

***Government Publication Date: 1994 - Feb 28, 2025***

***Canadian Pulp and Paper:*** Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

***Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014***

***Parks Canada Fuel Storage Tanks:*** Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

***Government Publication Date: 1920-Jan 2005****

***Pesticide Register:*** Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

***Government Publication Date: Oct 2011-Mar 31, 2025***

***Ontario PFAS Spills:*** Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

***Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024***

***NPRI Reporters - PFAS Substances:*** Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

***Government Publication Date: Feb 2024***

***Potential PFAS Handlers from NPRI:*** Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

***Government Publication Date: Feb 2024***

***Pipeline Incidents:*** Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

***Government Publication Date: Feb 28, 2021***

***Potential PFAS Handlers from EASR:*** Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

***Government Publication Date: Jun 30, 2024***

***Private and Retail Fuel Storage Tanks:*** Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

***Government Publication Date: 1989-1996****

***Permit to Take Water:*** Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

***Government Publication Date: 1994 - Feb 28, 2025***

***Ontario Regulation 347 Waste Receivers Summary:*** Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

***Government Publication Date: 1986-1990, 1992-2021***

***Record of Site Condition:*** Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

***Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2025***

***Retail Fuel Storage Tanks:*** Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

***Government Publication Date: 1999-Apr 30, 2024***

***Scott's Manufacturing Directory:*** Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

***Government Publication Date: 1992-Mar 2011****

***Ontario Spills:*** Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

***Government Publication Date: 1988-Jun 2024; Aug-Jan 2025***

***Wastewater Discharger Registration Database:*** Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

***Government Publication Date: 1990-Dec 31, 2021***

***Anderson's Storage Tanks:*** Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

***Government Publication Date: 1915-1953****

***Transport Canada Fuel Storage Tanks:*** Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

***Government Publication Date: 1970 - Apr 2024***

***Variances for Abandonment of Underground Storage Tanks:*** Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

***Government Publication Date: Feb 28, 2022***

***Waste Disposal Sites - MOE CA Inventory:*** Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

***Government Publication Date: Oct 2011 - Mar 31, 2025***

***Waste Disposal Sites - MOE 1991 Historical Approval Inventory:*** Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

***Government Publication Date: Up to Oct 1990****

***Water Well Information System:*** Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

***Government Publication Date: Dec 31 2023***

# Definitions

***Database Descriptions:*** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

***Detail Report***: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

***Distance:*** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

***Direction:*** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

***Elevation:*** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

***Executive Summary:*** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

***Map Key:*** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

***Unplottables:*** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

# Executive Summary: Summary By Data Source

### FCS - Contaminated Sites on Federal Land

A search of the FCS database, dated Jun 2000-Jan 2025 has found that there are 1 FCS site(s) within approximately 0.80 kilometers of the project property.

| Lower Elevation | Address | Direction | Distance (m) | Map Key |
|---|---|---|---|---|
| Innes Road | Ottawa ON | ESE | 712.64 | 9 |

### FST - Fuel Storage Tank

A search of the FST database, dated Oct 2023 has found that there are 35 FST site(s) within approximately 0.80 kilometers of the project property.

| Equal/Higher Elevation | Address | Direction | Distance (m) | Map Key |

# Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

# Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update.* ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

***Abandoned Aggregate Inventory:*** Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

***Government Publication Date: Sept 2002****

***Aggregate Inventory:*** Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

***Government Publication Date: Up to Nov 2024***

***Abandoned Mine Information System:*** Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

***Government Publication Date: 1800-Apr 2024***

***Anderson's Waste Disposal Sites:*** Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

***Government Publication Date: 1860s-Present***

***Aboveground Storage Tanks:*** Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

***Government Publication Date: May 31, 2014***

***Automobile Wrecking & Supplies:*** Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

***Government Publication Date: 1999-Apr 30, 2024***

***Borehole:*** Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

***Government Publication Date: 1875-Jul 2018***

***Certificates of Approval:*** Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

***Government Publication Date: 1985-Oct 30, 2011****

***Dry Cleaning Facilities:*** Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

***Government Publication Date: Jan 2004-Dec 2022***

***Commercial Fuel Oil Tanks:*** Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

***Government Publication Date: Oct 2023***

***Chemical Manufacturers and Distributors:*** Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

***Government Publication Date: 1999-Jan 31, 2020***

***Chemical Register:*** Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

***Government Publication Date: 1999-Apr 30, 2024***

***Compressed Natural Gas Stations:*** Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

***Government Publication Date: Dec 2012 -Feb 2025***

***Inventory of Coal Gasification Plants and Coal Tar Sites:*** Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

***Government Publication Date: Apr 1987 and Nov 1988****

***Compliance and Convictions:*** Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

***Government Publication Date: 1989-Mar 2025***

***Certificates of Property Use:*** Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

***Government Publication Date: 1994 - Feb 28, 2025***

***Drill Hole Database:*** Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

***Government Publication Date: 1886 - Aug 2024***

***Delisted Fuel Tanks:*** Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

***Government Publication Date: Oct 2023***

***Environmental Activity and Sector Registry:*** Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

***Government Publication Date: Oct 2011-Mar 31, 2025***

***Environmental Registry:*** Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

***Government Publication Date: 1994 - Feb 28, 2025***

***Environmental Compliance Approval:*** Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

***Government Publication Date: Oct 2011-Mar 31, 2025***

***Environmental Effects Monitoring:*** Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

***Government Publication Date: 1992-2007****

***ERIS Historical Searches:*** Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

***Government Publication Date: 1999-Aug 31, 2024***

***Environmental Issues Inventory System:*** Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

***Government Publication Date: 1992-2001****

***Emergency Management Historical Event:*** Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

***Government Publication Date: Apr 30, 2022***

***Environmental Penalty Annual Report:*** Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

***Government Publication Date: Jan 1, 2011 - Dec 31, 2024***

***List of Expired Fuels Safety Facilities:*** Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

***Government Publication Date: Oct 2023***

***Federal Convictions:*** Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

***Government Publication Date: 1988-Jun 2007****

***Contaminated Sites on Federal Land:*** Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

***Government Publication Date: Jun 2000-Jan 2025***

***Fisheries & Oceans Fuel Tanks:*** Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

***Government Publication Date: 1964-Sep 2019***

***Federal Identification Registry for Storage Tank Systems (FIRSTS):*** Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

***Government Publication Date: Oct 31, 2021***

***Fuel Storage Tank:*** Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

***Government Publication Date: Oct 2023***

***Fuel Storage Tank - Historic:*** Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

***Government Publication Date: Pre-Jan 2010****

***Ontario Regulation 347 Waste Generators Summary:*** Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

***Government Publication Date: 1986-Jun 30, 2024***

***Greenhouse Gas Emissions from Large Facilities:*** Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

***Government Publication Date: 2013-Apr 2024***

***TSSA Historic Incidents:*** Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

***Government Publication Date: 2006-June 2009****

***Indian & Northern Affairs Fuel Tanks:*** Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

***Government Publication Date: 1950-Aug 2003****

***Fuel Oil Spills and Leaks:*** Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

***Government Publication Date: 31 Oct, 2023***

***Landfill Inventory Management Ontario:*** Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

***Government Publication Date: Mar 31, 2022***

***Canadian Mine Locations:*** Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

***Government Publication Date: 1998-2009****

***Mineral Occurrences:*** Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

***Government Publication Date: 1846-Feb 2025***

***National Analysis of Trends in Emergencies System (NATES):*** Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

***Government Publication Date: 1974-1994****

***Non-Compliance Reports:*** Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

***Government Publication Date: Dec 31, 2023***

***National Defense & Canadian Forces Fuel Tanks:*** Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

***Government Publication Date: Up to May 2001****

***National Defense & Canadian Forces Spills:*** Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

***Government Publication Date: Mar 1999-Nov 2023***

***National Defence & Canadian Forces Waste Disposal Sites:*** Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

***Government Publication Date: 2001-Apr 2007****

***National Energy Board Pipeline Incidents:*** Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

***Government Publication Date: 2008-Dec 31, 2024***

***National Energy Board Wells:*** Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

***Government Publication Date: 1920-Feb 2003****

***National Environmental Emergencies System (NEES):*** Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

***Government Publication Date: 1974-2003****

***National PCB Inventory:*** Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

***Government Publication Date: 1988-2008****

***National Pollutant Release Inventory:*** Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

***Government Publication Date: Feb 2024***

***National Pollutant Release Inventory - Historic:*** Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

***Government Publication Date: 1993-May 2017***

***Oil and Gas Wells:*** Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

***Government Publication Date: 1988-May 31, 2024***

***Ontario Oil and Gas Wells:*** Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

***Government Publication Date: 1800-Aug 2024***

***Inventory of PCB Storage Sites:*** Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

***Government Publication Date: 1987-Oct 2004; 2012-Dec 2013***

***Orders:*** Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

***Government Publication Date: 1994 - Feb 28, 2025***

***Canadian Pulp and Paper:*** Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

***Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014***

***Parks Canada Fuel Storage Tanks:*** Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

***Government Publication Date: 1920-Jan 2005****

***Pesticide Register:*** Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

***Government Publication Date: Oct 2011-Mar 31, 2025***

***Ontario PFAS Spills:*** Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

***Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024***

***NPRI Reporters - PFAS Substances:*** Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

***Government Publication Date: Feb 2024***

***Potential PFAS Handlers from NPRI:*** Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

***Government Publication Date: Feb 2024***

***Pipeline Incidents:*** Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

***Government Publication Date: Feb 28, 2021***

***Potential PFAS Handlers from EASR:*** Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

***Government Publication Date: Jun 30, 2024***

***Private and Retail Fuel Storage Tanks:*** Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

***Government Publication Date: 1989-1996****

***Permit to Take Water:*** Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

***Government Publication Date: 1994 - Feb 28, 2025***

***Ontario Regulation 347 Waste Receivers Summary:*** Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

***Government Publication Date: 1986-1990, 1992-2021***

***Record of Site Condition:*** Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

***Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2025***

***Retail Fuel Storage Tanks:*** Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

***Government Publication Date: 1999-Apr 30, 2024***

***Scott's Manufacturing Directory:*** Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

***Government Publication Date: 1992-Mar 2011****

***Ontario Spills:*** Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

***Government Publication Date: 1988-Jun 2024; Aug-Jan 2025***

***Wastewater Discharger Registration Database:*** Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

***Government Publication Date: 1990-Dec 31, 2021***

***Anderson's Storage Tanks:*** Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

***Government Publication Date: 1915-1953****

***Transport Canada Fuel Storage Tanks:*** Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

***Government Publication Date: 1970 - Apr 2024***

***Variances for Abandonment of Underground Storage Tanks:*** Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

***Government Publication Date: Feb 28, 2022***

***Waste Disposal Sites - MOE CA Inventory:*** Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

***Government Publication Date: Oct 2011 - Mar 31, 2025***

***Waste Disposal Sites - MOE 1991 Historical Approval Inventory:*** Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

***Government Publication Date: Up to Oct 1990****

***Water Well Information System:*** Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

***Government Publication Date: Dec 31 2023***

# Definitions

***Database Descriptions:*** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

***Detail Report***: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

***Distance:*** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

***Direction:*** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

***Elevation:*** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

***Executive Summary:*** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

***Map Key:*** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

***Unplottables:*** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
