Specifically refer to the tree conservation prepared and report prepared by IFS Associates and servicing and grading plan prepared by DB Grey Engineering. Pay particular attention to tree offsets from utility lines.
- It is the responsibility of the appropriate contractor or official to report any errors, omissions or discrepancies in this plan with actual conditions or other consultant plans prior to commencing work. The Landscape Architect is not responsible for subsurface conditions.
- It is the responsibility of the appropriate contractor to obtain all required permits and to obey all local bylaws and regulations.
- It is the responsibility of the appropriate contractor to determine the location of all underground services before the start to include: telephone cables, cable television, hydro cables, lights and power lines, weeping tiles, storm and sanitary sewers, natural gas lines, irrigation lines, etc.
- The contractor is to reinstate all areas and items damaged as a result of construction activities.
- Plant substitutions will not be accepted without prior approval of the Landscape Architect in writing.
- Positive drainage to be maintained at all times away from the building. This drawing not to be used for grading, refer to engineer's drawing for grading.
