Appendix F – City of Ottawa Historic Land Use Inventory (HLUI)
Appendix G – Aerial Photographs
Appendix H – Topographic Map
Appendix I – Photographic Log
Appendix J – Qualifications of Assessors

1. Executive Summary

Lopers & Associates ("Lopers") was retained by Semper Paratus Management Inc. ("SEMPER"), a property management company for Metcalfe Realty Company Limited, to complete a Phase One Environmental Site Assessment ("Phase One ESA") of the commercial property with Civic address No. 85 Albert Street, Ottawa, Ontario ("Phase One Property", "Property" or "Site").

Based on the information reviewed as part of this Phase One ESA, specifically the title search, Fire Insurance Plans ("FIPs") and aerial photographs, the Phase One Property has been developed or occupied for residential use since 1862 until at least 1946. A commercial parking lot was present at the Property between at least 1956 and 1965. The Phase One Property was redeveloped with the present day 15 storey commercial office building with 4 levels of underground parking in 1976.

Metcalfe Realty Company Limited purchased the Property in 1958, and it is understood that a concept has been proposed to retrofit the Site building for residential use. The Phase One Property is immediately surrounded by:

- A municipal Right-of-Way (Albert Street) and commercial buildings to the south;
- A multi-storey commercial building followed by municipal Right-of-Way (Metcalfe Street), followed by a multi-storey commercial development (World Exchange Plaza) to the west;
- Multi-storey commercial buildings followed by a municipal Right-of-Way (Elgin Street) followed by the National Arts Centre ("NAC") to the east; and,
- A multi-storey commercial building followed by a municipal Right-of-Way (Queen Street – with the Ottawa Light Rail Transit ("OLRT") beneath) followed multi-storey commercial buildings to the north.

There were no potentially contaminating activities ("PCAs") identified at the Phase One Property.

Sixty-eight (68) properties with PCAs in the Phase One Study Area were identified as part of this Phase One ESA. The Phase One Study Area encompasses the Site as well as land within 250 m of the Site. Neighbouring property PCAs consist of a historical railway, various historical automotive garages, gas stations and dry cleaners. The PCAs at neighbouring properties in the Phase One Study Area are located significant distances and at down- or cross-gradient orientations with respect to the Phase One Property and are not considered to represent Areas of Potential Environmental Concern ("APECs") for the Phase One Property. It was also considered that the majority of the properties in the Phase One Study Area with historical PCAs have been redeveloped with multi-storey commercial buildings with several levels of

underground parking, which would further reduce the potential for contaminant migration from these properties.

Given that there were no APECs identified at the Phase One Property, a Phase Two Environmental Site Assessment is not recommended for the Phase One Property at this time.

2. Introduction

Lopers & Associates ("Lopers") was retained by Semper Paratus Management Inc. ("SEMPER"), a property management company for Metcalfe Realty Company Limited, to complete a Phase One Environmental Site Assessment ("Phase One ESA") of the commercial property with Civic address No. 85 Albert Street, Ottawa, Ontario ("Phase One Property", "Property" or "Site"). Figure 1 provides the Site Location within the City of Ottawa.

The Phase One Property is legally described as Lot 24 and Part of Lot 25 (North Albert Street) Registered Plan 3922, in the City of Ottawa as obtained from a Legal Survey completed by Stantec Geomatics Ltd. ("Stantec"), on April, 2026, provided by FULLER. The property identification number ("P.I.N.") of 04115-0044 is associated with the Phase One Property, as obtained from the Survey Plan. A copy of the legal survey plan is presented in Appendix A. Based on approximate dimensions obtained from the City of Ottawa geoOttawa website, the Phase One Property has an approximate area of 953.8 m^2 (0.10 Hectares). Figure 2 Site Plan provides the boundaries and general layout of the Phase One Property.

The approximate elevation of the Phase One Property as indicated on the legal survey, City of Ottawa mapping and confirmed through geoOttawa is approximately 72 m above mean sea level (m AMSL). The approximate centre of the Phase One Property has Latitude and Longitude coordinates of 45° 25′ 20″ N and 75° 41′ 45″ W and Universal Transverse Mercator (UTM) coordinates of 446000 m E and 5030088 m N. As of April 15, 2026, the Phase One Property had the zoning definition MD S45, which signifies Mixed Downtown Use Zone with a maximum height restriction of between 140 and 145 m ASL.

The Phase One Property is currently owned by Metcalfe Realty Company Limited, a subsidiary company of Fuller Group of Companies ("FULLER"). It is Lopers' understanding that FULLER has a concept to convert the existing Site building at the Phase One Property from commercial office space to a multi-unit residential building.

This Phase One ESA was commissioned by Mr. Philip Thibert, Director of Real Property for Fuller Group of Companies, a parent company of Metcalfe Realty Company Limited. Fuller Group of Companies has a business address of 2700 Queensview Drive, Ottawa, Ontario, K2B 8H6 and a business telephone number of 613-820-6000.

3. Scope of Investigation

This Phase One ESA has been completed as per the details of scope presented in Lopers' Letter entitled "Proposal for Phase One Environmental Site Assessments, Proposed Redevelopment Properties, 85 Albert Street and 116 Albert Street, Ottawa, ON", dated January 29, 2026, reference No. PRO-043-26-FULLER.

The Phase One ESA has been prepared in accordance with the technical requirements and formatting guidance as presented by the Ministry of Environment, Conservation and Parks (MECP) in Ontario Regulation (O.Reg.)153/04, as amended March 29, 2026. This format is based on the provincial regulation for brownfields redevelopment and has been adopted as a standard for the City of Ottawa for development applications.

The scope of work for the Phase One ESA involved the following components:

- Historical Research (review of available historical reports, public environmental databases, Fire Insurance Plans (FIPs), City Directories, Aerial Photographs, geological mapping and any other relevant environmental records which were readily accessible at the time of the Phase One ESA);
- Requests for Information from the MECP Freedom of Information (FOI) and City of Ottawa Historical Land Use Inventory (HLUI);
- Subcontracted research of environmental databases through Environmental Risk Information Services (ERIS), which includes records maintained by the Technical Standards and Safety Authority (TSSA), among others;
- Property Title Search (subcontracted through Read Abstracts Limited);
- Physical Site inspection;
- Interviews with persons knowledgeable about the Property and past uses;
- Interpretation of findings; and,
- Preparation of a Phase One ESA report.

The specific objectives of the Phase One ESA are to:

- Conduct a Phase One Environmental Site Assessment of the Property as per the applicable regulation.
- Provide an environmental record of the Phase One Property, in a manner that can be assessed, tested and reconstructed, to document and demonstrate:
  - How the objectives of the Phase One ESA were achieved and how the requirements for the objectives were met;
  - Whether further investigation is required to submit a Record of Site Condition (RSC) for filing;
  - Whether there exists an adequate basis for further investigation; and,
  - The basis for required certifications.

4. Records Review

a) General

i. Phase One Study Area

The Phase One Study Area includes the Phase One Property and properties with the boundaries within 250 m of the Phase One Property limits. Based on a review of the Phase One Property and properties in the Phase One Study Area, their associated historical and/or current uses and operations and physical characteristics of the Phase One Study Area, it was determined that an assessment of properties within 250 m of the Phase One property would be sufficient to meet the objectives of the scope of this investigation for a Phase One ESA. Figure 3 depicts the 250 m radius around the Phase One Property.

ii. First Developed Use Determination

A review of the FIPs from the City of Ottawa shows the Phase One Property was first developed for residential use as early as 1902. The title search indicates ownership transfers prior to this time period to individuals and/or land developers as early as 1862, which are suspected to be associated with early residential development of the Property. This use was maintained until at least 1946, based on the FIPs and title search.

Aerial photographs reviewed from 1928 through 1946 confirm what appears to be the same residential buildings on the Phase One Property.

The first developed use determination was for residential use circa 1862.

The Phase One Property was observed to be occupied by a 15 storey commercial office building during the 2026 Phase One Site Inspection. Based on the most recent use of the Phase One Property, the current O.Reg. 153/04 property use classification is interpreted to be Commercial Use.

iii. Fire Insurance Plans

FIPs, were reviewed where available, for the City of Ottawa as part of this Phase One ESA.

Early development of the Phase One Property is depicted on Sheet 33 of the September 1902 (Revised 1912) FIPs. The Property was initially developed with approximately 3 municipal addresses at 87, 91 and 93 Albert Street. The Property use shown in the FIPs is for residential purposes, with what appears to be two residential structures: a single family dwelling at 87 Albert Street and a semi-detached residential building at 91 and 93 Albert Street. The Phase One Property is shown again on Sheet 114 of the November 1925 (Revised 1948) FIPs, and shows the Site configuration unchanged from earlier FIPs; however, the building at 87 Albert

Street is shown as "Board of Health", which appears to be an institutional conversion of the existing residential dwelling.

The Phase One Property is shown again on Sheet 114 of the November 1963 FIPs, which shows that the Site has been cleared and is not developed with any permanent structures.

There were 16 Potentially Contaminating Activities ("PCAs") identified at properties in the Phase One Study Area from the FIPs review; these PCAs are presented in Table 1 below.

Table 1: Potentially Contaminating Activities Identified during FIP Review

Plan Reference No.	PCA	Address	Orientation	APEC (Y/N)
1	Garage & Repairs	82 Albert Street & 85-87 Slater Street	20 m south	N
2	Gas Station with 2 Underground Storage Tanks ("USTs")	100 Albert Street	30 m southwest	N
3	Electrical Transformers	63 Albert Street	40 m east	N
4	Garage & Repairs	72 Albert Street	40 m southeast	N
5	Chinese Laundry (Dry Cleaner)	58 Metcalfe Street	60 m west	N
6	Garage & Repairs	94 Slater Street	100 m south	N
7	Electrical Transformers	82-92 Slater Street	100 m south	N
8	Garage & Repairs	146 Albert Street	120 m west	N
9	Garage & Repairs	135-141 Albert Street	140 m west	N
10	Laundry (Dry Cleaner)	110 Slater Street	130 m southwest	N
11	Fuel Oil Storage Tank	140 Slater Street	170 m southwest	N
12	Gas Station with 4 USTs	79-87 O'Connor Street	170 m west-southwest	N
13	Garage & Repairs	25 Albert Street	190 m east	N
14	Chinese Laundry (Dry Cleaner)	82-84 O'Connor Street	240 m west-southwest	N
15	Garage & Repairs with UST	171 Slater Street	245 m southwest	N

Lopers reviewed the City of Ottawa Development Applications website as part of the historical research completed for this investigation. A recent Phase Two ESA completed at the 77 Metcalfe Street property (G2S Consulting Inc. report reviewed on the City of Ottawa Development Applications website), which includes PCA #1 and PCA #2 was completed in 2025 and did not identify the presence of soil or groundwater contamination at this property. It was also noted that the 77 Metcalfe Street property was redeveloped with commercial office towers, with associated basement/parking levels which are expected to have removed any underlying soil from this property. These historical activities at this property have not been interpreted to have contributed to an APEC at the Phase One Property.

All of the other PCAs identified at properties in the Phase One Study Area as part of the FIP review were interpreted to be located at significant distances and/or cross- or down-gradient orientations with respect to the Phase One Property and were not interpreted to represent Areas of Potential Environmental Concern ("APECs") for the Property.

The aforementioned PCAs are identified by their plan reference numbers, which are depicted on Figure 3: Surrounding Land Use, and are summarized in Table 8, Section 7. (b).

iv. Chain of Title

A chronological chain of title was prepared by READ Abstracts Limited for the Phase One Property. The chain of title provides the names of historical owners, lessees and dates of ownership for the Phase One Property dating from 1837 to January 11, 2013, when the last commercial lease was registered at the Property. The legal description as obtained from the Chain of Title was Lots 24, and Part of Lot 25, Plan 3922, north side of Albert Street in the City of Ottawa, with property identifier number of 04115-0044.

Based on additional historical research completed as part of this Phase One ESA and a review of the chain of title, the Phase One Property was undeveloped with no developed use prior to 1851. A chain of title ownership summary was prepared dating back to 1851 and is presented in Table 2 below. A copy of the Chain of Title for the Phase One Property, as prepared by READ Abstracts Limited for the Phase One Property is provided in Appendix C.

Table 2: Chain of Title Ownership Summary

Year(s)	Phase One Property Ownership
Lot 24, Plan 3922	
April 28, 1951	Land Registered to Nicholas Sparks
1862 - 1869	N. Sparks & Gary Wright & Slater
1869 - 1877	William Porter
1877 - 1881	William Hodgson
1881 - 1889	Charles A. Moore
1889 - 1893	W.H. & B. F. W. Hurdman
1893 - 1895	F.E.K. Hurdman
1895 - 1896	Peter Whelen
1896 - 1899	Ottawa Investment Company Ltd.
1899 - 1946	Hiram Robinson
1946 - 1947	Davidson R. Mac Lavish
1947	Rosalie Securities Limited

Year(s)	Phase One Property Ownership
1947 - 1954	Davidson R. Mac Lavish
1954 - 1958	Wellington Realty Construction Limited
September 1, 1958 - Present	Metcalfe Realty Company Limited
Lot 25, Plan 3922	
April 28, 1837	Land Registered to Nicholas Sparks
1862 - 1874	N. Sparks & Gary Wright & Slater
1874 - 1888	Elizabeth H. May
1888	George S. May
1888 - 1901	William C. May
1901 – 1919	Hiram Robinson
1919 - 1948	Joseph W. D'Amour
1948 – 1954	Fred Aubrey
1954 – 1959	Wellington Realty Construction Limited
September 1, 1959 - Present	Metcalfe Realty Company Limited

There were many commercial leases registered at the Phase One Property between 1961 and 2013; none of the leased corporations are interpreted to have been associated with PCAs. There were no PCAs identified as a result of the type of owners of the Phase One Property based on the chain of title ownership summary.

v. Environmental Reports

No previous environmental reports for the Phase One Property were provided as part of the historical review for this Phase One ESA. According to FULLER representatives, no previous environmental studies have been completed for the Phase One Property.

b) Environmental Source Information

A review of the readily available environmental source information records was completed as part of this Phase One ESA.

As part of environmental source information review, Environmental Risk Information Systems (ERIS) was also contracted to complete a search of their records of environmental databases within 250 m of the Site. The pertinent search results to this Phase One ESA are presented in the following subsections. A copy of the ERIS database search dated March 4, 2026 is included as Appendix D.

National Pollutant Release Inventory

The National Pollutant Release Inventory (NPRI) is a database maintained by Environment and Climate Change Canada (ECCC). Reporting of releases of pollutants into the natural environment are reported annually by corporations and/or their representatives and posted for public record by ECCC. Presently, data is available and posted for the years 1994 through 2023. No records were reported in a review of the NPRI registry on April 29, 2026, and the results were confirmed through the subcontracted ERIS search.

There were 6 properties listed in the NPRI registry within the Phase One Study Area, however none of the information reviewed with respect to these listings are interpreted to be associated with PCAs and do not represent APECs for the Phase One Property.

Polychlorinated Biphenyl (PCB) Inventories

The MECP, formerly known as the Ministry of Environment and Energy, published the "Ontario Inventory of PCB Storage Sites". The inventory documented the company information, physical address, and number of tonnes of liquid PCBs by region. No records were identified within 250 m of the Phase One Property during a review of this document, and the results were confirmed through the subcontracted ERIS search.

The ERIS search also reviewed the National PCB Inventory, which details in use PCB containing equipment in federal, provincial and private facilities; this database was last updated in 2008. No records were identified at the Phase One Property during a review this database. There were four properties identified in the National PCB Inventory within the Phase One Study Area; none of these PCB storage sites are considered to be associated with PCAs and none are considered to represent APECs for the Phase One Property.

Environmental Instruments

Environmental Instruments, such as Environmental Compliance Approvals (ECAs), Certificates of Approval (CAs), Environmental Activity and Sector Registry (EASR), Environmental Bill of Rights (EBR), Permits to Take Water (PTTWs), Risk Management Plans (RMPs), and Certificates of Property Use (CPUs) are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also contains the filing of any such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA; the response dated April 29, 2026 is included as Appendix E. The FOI response did not identify any records of Environmental Incidents at the Phase One Property.

There were listings for 24 ECAs, 18 CAs, 7 EASRs, 12 EBRs, 1 PTTW at neighbouring properties in the Phase One Study Area. None of the records of environmental instruments were interpreted to be related to PCAs and do not represent APECs for the Phase One Property.

Inventory of Coal Gasification Plants

The document "Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, Volume II", produced by Intera Technologies Ltd. for the Ontario Ministry of the Environment, dated July 1988 was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document and the results were confirmed through a recently completed subcontracted ERIS search.

Environmental Records of Incidents, Orders, Offences, Spills, Discharges of Contaminants or Inspections maintained by the Ministry

Environmental records of incidents, orders, offences, spills, discharges of contaminants or inspections are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information (FOI) request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA; the MECP decision letter did not identify any records of spills or discharges at the Phase One Property. The ERIS search did not identify any reports of environmental incident records at the Phase One Property, with the exception of a release of refrigerant gases in 2025, which is not associated with a PCA and does not represent an APEC for the Property.

There were 3 properties with records of (environmentally significant) spills identified within 250 m of the Phase One Property. The spills interpreted to be associated with PCAs included:

- 2 Transformer oil spills at 88 Slater Street, 100 m south of the Property – PCA #7 associated with O.Reg. PCA: Transformer Manufacturing, Processing and Use.
- Fuel oil spill at 75 Albert Street, adjacent to the east of the Property – PCA #16 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.
- A diesel fuel spill at 100 Sparks Street, 100 m northwest of the Property – PCA #17 associated with O.Reg. PCA: Gasoline and Associated Products Storage in Fixed Tanks.

According to Metcalfe Realty Company Limited's records, the spill at 75 Albert Street occurred in 2009 when an oil tank was removed and a fuel line was cut that still contained heating oil. The spill was reportedly contained to the B2 parking level of the building and was cleaned up following the release.

The PCAs associated with spills identified at properties in the Phase One Study Area are not considered to represent APECs for the Property based on their distances and/or orientations with respect to the Phase One Property.

Waste Management Records

Waste management records, including current and historical waste storage locations and waste generator and waste receiver information maintained pursuant to Regulation 347 of the Revised Regulations of Ontario, 1990 (General — Waste Management) made under the Act, or its predecessors are maintained by the MECP on a property specific basis and can generally be obtained by submitting a Freedom of Information ("FOI") request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA, which did not identify any waste management records at the Phase One Property. The following Waste Management Records were identified in the MECP files:

- Artext Electronic Publishers Inc. was listed as a waste generator of photo processing wastes.
- Metcalfe Realty Company Limited was registered as a waste generator of waste oils & lubricants and other liquid organic wastes.

Given that these waste generators are related to business operation and/or building maintenance, and were registered with the MECP, they are not interpreted as PCAs or to represent APECs for the Phase One Property.

The MECP FOI records also documented a waste audit at the Property in 2013; no PCAs were identified in the waste audit records.

Registered Waste Generators at neighbouring properties within the Phase One Study Area are summarized in Table 3 below.

Table 3: Off-Site Waste Generators Summary

PCA Report Reference No.	Address	Generator	Waste Classes Related to PCAs (Years Listed)	Distance from Site
PCA # 2	75 Slater Street	R.W. Tomlinson Ltd., Albert Slater Properties GP Inc.	Oil skimmings & sludges, Light Fuels (2021 – 2022)	20 m south
PCA # 6	88 Slater Street	Ottawa Hydro	Oil skimmings & sludges, PCBs (1986 - 2001)	100 m south
PCA # 7	84 Slater Street	Hydro One Networks Inc.	Oil skimmings & sludges, PCBs (2011 – 2025)	100 m south
PCA # 8	150 Albert Street	Chateau Ottawa Hotel Inc., Four Seasons Hotel Ltd. Ottawa Sheriden Hotel	Halogenated Solvents (1988 – 2001) PCBs (2013)	150 m west-southwest

PCA Report Reference No.	Address	Generator	Waste Classes Related to PCAs (Years Listed)	Distance from Site
PCA # 12	151 Slater Street	Metcalfe Realty Company Limited, Bonanza Printing	Petroleum Distillates, Light Fuels, Heavy Fuels, Oil skimmings & sludges (2009 - 2012, 2019, 2020)	150 m southwest
PCA # 16	75 Albert Street	Metcalfe Realty Company Limited	Heavy Fuels (2009, 2010, 2012)	Adjacent to east
PCA # 17	100 Wellington Street	Public Works and Government Services Canada	Oil skimmings & sludges (2002 – 2004)	190 m northwest
PCA # 18	55 Metcalfe Street	The Manufacture Life Insurance Company	Petroleum distillates, Oil skimmings & sludges (2009-2025)	Adjacent to west
PCA # 19	60 Queen Street	Ron Engineering	Light Fuels (2011)	Adjacent to northeast
PCA # 20	90 Elgin Street	Public Works and Government Services Canada	Petroleum Distillates, Oil skimmings & sludges, waste oils and lubricants (1999 – 2017)	70 m south
PCA # 21	90 Sparks Street	Globe Limited, Carrier Commercial Service, Public Works and Government Services Canada, MLP Management Limited Partnership	PCB Waste (1994 – 2004) Waste oils and lubricants, Petroleum Distillates (2003 - 2025)	50 m north
PCA # 22	80 Elgin Street	G & N Contracting, British High Commission	Oil skimmings & sludges, waste oils and lubricants (1994 – 2022)	50 m east
PCA # 23	61 Queen Street	Arnon Developments	Oil skimmings & sludges (2017)	50 m northeast
PCA # 24	116 Albert Street	Metcalfe Realty Company Limited	Waste oils and lubricants (1991 – 2001)	60 m southwest
PCA # 25	99 Metcalfe Street	Morguard Investments Ltd.	Oil skimmings & sludges (2009 – 2019)	100 m south
PCA # 26	66 Slater Street	Colonnade Bridgeport	Light Fuels (2020)	100 m south
PCA # 27	30 Metcalfe Street	Taillefer Plumbing & Heating INC.	Oil skimmings & sludges (2016)	90 m northwest
PCA # 28	40 Elgin Street	Allied Properties REIT, National Capital Commission	Petroleum Distillates, Oil skimmings & sludges, waste oils and lubricants (1997 – 2025)	100 m northeast
PCA # 29	123 Slater Street	Metcalfe Realty Company Limited	Waste oils and lubricants, Light Fuels (2006 – 2025)	110 m southwest
PCA # 30	130 Slater Street	Bradda Printing Services Inc.	Photo processing Wastes, Petroleum Distillates (1988 – 2025)	130 m southwest
PCA # 31	150 Slater Street	Carrier Commercial Service, Manulife, JLL	Waste Oils & Lubricants, Oil skimmings & sludges (2011 - 2025)	200 m southwest

PCA Report Reference No.	Address	Generator	Waste Classes Related to PCAs (Years Listed)	Distance from Site
PCA # 32	67 Sparks Street	Public Works and Government Services Canada, RW Tomlinson Ltd.	Oil skimmings & sludges (2012, 2022)	120 m north
PCA # 33	59 Sparks Street	Public Works and Government Services Canada	PCB Waste (1994 – 2001)	130 m north
PCA # 34	85 Sparks Street	Public Works and Government Services Canada	Light Fuels, Waste oils and lubricants, Oil skimmings & sludges, PCBs (1994 - 2025)	120 m north

PCA # 36	1 Elgin Street	National Arts Centre	Light Fuels, Waste oils and lubricants, Oil skimmings & sludges, PCBs (1988 - 2025)	140 m east
PCA # 37	100 Sparks Street	National Capital Commission	Light Fuels (2009, 2011)	100 m northwest
PCA # 38	106 Sparks Street	Ashcroft Homes Ltd.	Waste oils and lubricants, Light Fuels (2016)	120 m northwest
PCA # 39	112 Sparks Street	National Capital Commission	Light Fuels (2006)	130 m northwest
PCA # 40	107 Sparks Street	Public Works and Government Services Canada	Light Fuels, Waste oils and lubricants, Oil skimmings & sludges, PCBs (1994 - 2025)	150 m northwest
PCA # 41	111 Sparks Street	Ontario Petroleum Pump	Light Fuels (2007 - 2008)	160 m northwest
PCA # 42	151 Sparks Street	Public Works and Government Services Canada	PCBs, Waste oils and lubricants (2007, 1992 – 2025)	230 m northwest
PCA # 43	132 Queen Street	Hilary Cleaners, Sketchley Cleaning	Halogenated Solvents (1986 – 1998)	180 m west-northwest
PCA # 44	45 O'Connor Street	QuadReal Property Group Limited Partnership	Waste oils and lubricants, Oil skimmings & sludges, Petroleum Distillates (2011 - 2025)	200 m west
PCA # 45	191 Laurier Avenue West	Cadillac Fairview Corporation, Carrier Commercial Service	PCBs, Waste oils and lubricants (2002 – 2005, 2020)	170 m southwest
PCA # 46	200 Laurier Avenue West	Gillin Engineering & Construction Ltd., Kidinks Holdings Inc.	Oil skimmings & sludges (2017 – 2022)	220 m southwest
PCA # 47	219 Laurier Avenue West	Glenview Corporation	Oil skimmings & sludges (2003 – 2006)	180 m southwest

The PCAs associated with waste generators identified at properties in the Phase One Study Area are not considered to represent APECs for the Property based on the present day nature of

operations at these properties, their distances and/or orientations with respect to the Phase One Property. The locations of these PCAs are depicted on Figure 3: Surrounding Land Use and are summarized in Table 8 in Section 7. (b).

MECP Property Specific Reports

Reports submitted to the Ministry related to environmental conditions are maintained by the MECP on a property specific basis and can generally be obtained by submitting an FOI request. If records exist, they can generally be obtained through the MECP through additional communications. The subcontracted ERIS search also confirms the filing of such records associated with properties.

An FOI request was submitted to the MECP as part of this Phase One ESA, which did not identify any MECP Property Specific Reports for the Phase One Property. The ERIS search did not identify any records of environmental reports at the Phase One Property, or properties within 250 m of the Phase One Property.

Technical Standards and Safety Authority

Records of retail fuel storage tanks, retail fuel outlets, spills, releases, and other associated information is maintained by the Technical Standards and Safety Authority (TSSA). These records can be obtained upon request from the TSSA. The subcontracted ERIS search also confirms the filing of such records associated with properties.

The subcontracted ERIS search did not identify any records of private and retail fuel storage tanks or historical incidents at the Phase One Property. The following records of private and/or retail fuel storage tanks were reported at neighbouring properties in the Phase One Study Area:

Table 4: Off-Site Fuel Storage Tanks

PCA Report Reference No.	Address	Owner	Fuel Storage Tank Records	Distance from Site
PCA # 20	90 Elgin Street	Great West Life	Diesel Generator Aboveground Fuel Tank	70 m south
PCA # 34	85 Sparks Street	Public Works and Government Services Canada	Fuel Storage Tank System	150 m north
PCA # 37	96-100 Sparks Street	Public Works and Government Services Canada	Diesel Generator Underground Fuel Tank	125 m west-northwest
PCA # 42	151 Sparks Street	Public Works and Government Services Canada	Fuel Storage Tank System	250 m northwest

The PCAs associated with fuel storage tanks identified at properties in the Phase One Study Area are not considered to represent APECs for the Property based on their distances and/or

orientations with respect to the Phase One Property. The locations of these PCAs are depicted on Figure 3: Surrounding Land Use and are summarized in Table 8 in Section 7. (b).

Registry Filings

Records of notices and instruments, including records of site condition (RSC), which have been posted in the environmental registry, are maintained by the MECP. These records can be reviewed electronically on the MECP Environmental Site Registry (ESR) website. The subcontracted ERIS search also confirms the filing of such records associated with properties. The website was reviewed for RSCs filed at the Phase One Property and in the Phase One Study Area; no RSCs have been filed for the Phase One Property.

Three RSCs have been filed at properties in the Phase One Study Area, including:

- 75 Slater Street, approximately 50 m south.
- 131 Queen Street, approximately 150 m west-northwest; and,
- 130 Slater Street, approximately 130 m southwest.

RSC filings at these properties and the associated available records do not indicate the presence of previously unidentified PCAs at these properties.

Areas of Natural and Scientific Interest

Records of areas of natural and scientific interest (ANSIs) formerly referred to as areas of natural significance, are maintained by the Ministry of Natural Resources and Forestry (MNRF) and are available for review on the Ontario GeoHub website. The website was reviewed on April 29, 2026, for records of ANSIs in the Phase One Study Area. There were no ANSIs identified within 250 m of the Phase One Property.

Current and Historical Landfills

Records of historical and operating landfills is maintained by the MECP. The document "Waste Disposal Site Inventory", produced by the Ontario Ministry of the Environment, dated June 1991 was reviewed as part of this Phase One ESA. No records were identified within 250 m of the Phase One Property during a review of this document.

The City of Ottawa contracted Golder Associates Ltd. to conduct an inventory and assessment of former waste disposal sites in within the City of Ottawa. The document "Old Landfill Management Strategy, Phase 1 – Identification of Sites, City of Ottawa, Ontario", produced by Golder Associates Ltd., finalized October 2004, was reviewed as part of this Phase One ESA. No records of active or former landfills were identified within 250 m of the Phase One Property during a review of this document.

City of Ottawa Historical Land Use Inventory

The City of Ottawa's Planning, Infrastructure and Economic Development department was contacted to complete a search of the Historical Land Use Inventory (HLUI) maintained by the

City. Through the HLUI response, received on April 8, 2026, there were no activities (of environmental significance) associated with the Phase One Property. There were several activities interpreted to be associated with PCAs at neighbouring properties in the Phase One Study Area, as summarized in Table 5.

Table 5: Potentially Contaminating Activities Identified during HLUI Review

Plan Reference No.	PCA	Address	Orientation	APEC (Y/N)
PCA # 1	Automotive Garage & 3 USTs	88 (82) Albert Street 85 Slater Street	20 m south	N
PCA # 2	Gasoline Service Station, 2 USTs & Dry Cleaners	100 Albert Street 77 (75-77) Metcalfe Street	30 m southwest	N

PCA # 67	Dry Cleaners, Gasoline Service Station & 4 USTs	111 Albert Street (59 O'Connor Street)	190 m west	N

" ( ) " - Indicates historical address
AST – Aboveground Storage Tank
UST – Underground Storage Tank

Additional activities were identified at properties in the HLUI study area; however, these activities were not interpreted to have been associated with PCAs. None of the identified listed 'activities' at neighbouring properties found in the review of the HLUI were considered to represent APECs based primarily on commercial redevelopment of the majority of the Phase One Study Area and also considering the distances and/or orientation of the historical PCAs with respect to the Phase One Property, also considering commercial redevelopment of many of the properties with historical PCAs. A copy of the HLUI response letter is included in Appendix F.

The locations of these PCAs identified in the HLUI research are depicted on Figure 3: Surrounding Land Use and are summarized in Table 8 in Section 7. (b).

c) Physical Setting Sources

i. Aerial Photographs

Aerial Photographs were reviewed for the Phase One Property and Phase One Study Area from available sources as part of the historical review. Aerial photographs were reviewed from historical research previously completed in the Phase One Study Area, Google Earth Aerial Imagery, from the City of Ottawa website and from the National Air Photo Library. Aerial Photographs were reviewed over the period of 1928 through 2022, which depict most of the historical development of the Phase One Study Area. A summary of the information gleaned from the aerial photographs is provided below. Copies of the aerial photographs reviewed are provided in Appendix G.

1928 Aerial Photograph

The Phase One Property is developed with what appears to be the former residential structures on the south and central portions of the Property. The present-day Albert Street Right-of-Way runs along the south limit of the Phase One Property, while Metcalfe Street is present approximately 40 m to the west of the Property. Neighbouring properties to the north, east, west and south of Albert Street appear to be used primarily for residential purposes.

1946 Aerial Photograph

No significant changes appear to have been made to the Phase One Property. What appears to be a retail fuel outlet is present on the southeast corner of the Albert Street and Metcalfe Street intersection, approximately 30 m southwest of the Phase One Property. Increased commercial and multi-tenant residential development is apparent at several properties in the Phase One Study Area.

1956 Aerial Photograph

The historical residential buildings at the Phase One Property have been demolished and the entire Phase One Property appears to have been paved and used as a parking lot. Redevelopment of the surrounding properties in the Phase One Study Area for interpreted commercial and/or multi-tenant residential purposes is apparent in this photograph. The former suspected retail fuel outlet, approximately 30 m southwest of the Phase One Property, has been cleared and the property appears to have been redeveloped with a multi-storey commercial building.

1965 Aerial Photograph

The Phase One Property appears to be used as a parking lot. The neighbouring property to the east of the Phase One Property has been redeveloped with what appears to be the present day

multi-storey commercial building. Increased high-rise redevelopment is apparent in the Phase One Study Area.

1976 Aerial Photograph

The Phase One Property has been redeveloped with what appears to be the present day commercial office building. The neighbouring property to the north of the Site has had its historic building cleared, while the neighbouring property to the northeast has been redeveloped with what appears to be the present day multi-storey commercial building. No other significant changes appear to have been made at the neighbouring properties in the Phase One Study Area.

1991 Aerial Photograph

No significant changes appear to have been made to the Phase One Property. The neighbouring property to the west and north of the Phase One Property has been redeveloped with what appears to be the present day multi-storey commercial office building. No other significant changes appear to have been made at the neighbouring properties in the Phase One Study Area.

2002 Aerial Photograph

No significant changes appear to have been made to the Phase One Property. The neighbouring property to the west of Metcalfe Street, further west of the Phase One Property has been redeveloped with what appears to be the present day multi-storey commercial office building (World Exchange Plaza). No other significant changes appear to have been made at the neighbouring properties in the Phase One Study Area.

2011 Aerial Photograph

No significant changes appear to have been made at the Phase One Property or at the neighbouring properties in the Phase One Study Area.

2022 Aerial Photograph

No significant changes appear to have been made at the Phase One Property. The property to the south of Albert Street, further southeast of the Phase One Property has been redeveloped with what appears to be the present day commercial office building at 90 Elgin Street. No other significant changes appear to have been made at the neighbouring properties in the Phase One Study Area.

Summary

A former suspected retail fuel outlet located approximately 30 m southwest of the Phase One Property was identified in the 1950s, this activity represents PCA #2. It was noted that this property was cleared and redeveloped with a multi-storey commercial building, with subgrade parking; it is inferred that redevelopment of this property would have removed any remnant

environmental impacts from the historical retail fuel outlet, additionally the record is over 70 years old and PHCs are expected to biodegrade naturally with time; as such this property has not been interpreted to represent an APEC for the Phase One Property.

Topography, Hydrology, Geology

The Ontario Ministry of Natural Resources and Forestry's ("MNRF's") Topographic Map GIS website was used to produce a topographic map showing the location of the Phase One Property, nearby water bodies and the regional topography of the Phase One Study Area. A copy of the Topographic Map is provided in Appendix H. The local topography in the vicinity of the Phase One Study Area generally slopes gently downward to the east. The Phase One Property is generally at grade with the neighbouring properties and Right-of-Ways. The nearest surface water body identified on the mapping is The Ottawa River, located approximately 550 m northwest of the Phase One Property. The Rideau Canal (manmade and concrete-lined thus not interacting with groundwater) is present approximately 240 m east of the Property.

Information on the regional surficial soil was obtained from the Geological Survey of Canada map 1425A titled Surficial Materials and Terrain features Ottawa Hull. Based on a review of the map, the natural soil conditions in the Phase One Property consist of "Glacial Deposits of till, heterogeneous mixture of material ranging from clay to large boulders, generally downwards into unmodified till; surface generally modified by wave or river action; topography flat to hummocky".

Information on the regional bedrock was obtained from the Ontario Geological Survey Map P2716 titled 'Paleozoic Geology Ottawa Area'. Based on a review of the map, the Phase One Study Area is underlain by Shale bedrock of the Carlsbad Formation, described as a "fossiliferous, calcareous siltstone and silty bioclastic limestone".

Well records and borehole logs, obtained from the MECP Water Well Records database, the subcontracted ERIS search and from historical investigations at the Phase One Property were reviewed. Based on these records, the general stratigraphy of the Phase One Property and Phase One Study Area consists of sand and gravel fill, underlain by silty clay, underlain by interbedded shale and limestone bedrock. The approximate depth to bedrock is expected to range from 4 to 6 m below ground surface**.**

Fill Materials

The Phase One Property is generally at grade with the neighbouring properties and Right-of-Ways. The entire footprint of the Phase One Property has been developed with a building and 4 storeys of underground parking. It is inferred that the Property was surfaced with granular base fill material prior to construction; this fill type is not considered to represent a PCA, as gravel does not meet the definition of soil.

i. Water Bodies and Areas of Natural Significance & Ground Water Information

The nearest surface water body identified on the mapping is Ottawa River, located approximately 550 m northwest of the Phase One Property. The Rideau Canal (manmade) is present approximately 240 m northeast of the Property. There were no areas of natural and scientific interest (ANSIs or areas of natural significance) identified in the Phase One Study Area.

The Phase One Property and Study Area are not located in the vicinity of any well-head protection areas or other designation identified by the City of Ottawa in its official plan for the protection of ground water. The Phase One Study Area is serviced by municipally treated drinking water. No private or agricultural water supply wells are located within the Phase One Study Area.

i. Well Records

Well records and borehole logs, obtained from the MECP Water Well Records database, the subcontracted ERIS search and from historical investigations at the Phase One Property were reviewed. No water supply wells were identified at the Property or in the Phase One Study Area.

The Phase One Study Area is located in the urban core of the City of Ottawa has been historically provided with municipally treated potable water and as such it is not suspected that any potable water wells are present in the Phase One Study Area.

Monitoring well clusters were identified in the Phase One Study Area. Based on these records, the general stratigraphy of the Phase One Property and Phase One Study Area consists of sand and gravel fill, underlain by silty clay, underlain by interbedded shale and limestone bedrock. The approximate depth to bedrock is expected to range from 4 to 6 m below ground surface (m BGS), with a perched groundwater table at approximately 2 to 3 m BGS.

d) Site Operating Records

The Phase One Property has been occupied by a high-rise, multi-tenant commercial office building with 4 levels of underground parking since circa 1976. Site operating records consist of maintenance records for mechanical equipment at the Site. None of the maintenance records provided for review at the time of the Site inspection indicated the presence of PCAs at the Site.

5. Interviews

Mr. Philip Thibert, the owner's representative of the Site, was interviewed by Mr. Lopers on June 18, 2026 at the time of Site inspection. Mr. Thibert stated that he had been familiar with the Site since 2024. Mr. Thibert stated that, to his knowledge, the Site had been used for commercial office purposes from its redevelopment in the 1976.

Mr. Thibert stated that the building has always been heated and cooled by natural gas fired equipment. Mr. Thibert stated that there were no underground storage tanks ("USTs") at the Site and that any aboveground storage tanks ("ASTs") that may have been associated with former backup generator equipment were removed from the Phase One Property after conversion of backup power to natural gas. Mr. Thibert was not aware of any spills at the Phase One Property.

6. Site Reconnaissance

a) General Requirements

Lopers completed the Site Inspection on June 18, 2026, between the hours of 2:00 and 4:00 PM. Weather conditions were sunny with an ambient air temperature of approximately 22 degrees Celsius. The Phase One Property was developed with a 15 storey commercial office building with a rooftop penthouse mechanical level and four levels of underground parking, at the time of the Site Investigation. The Site Investigation was completed by Mr. Luke Lopers, who is a registered Professional Engineer (Environmental) in the province of Ontario and a Qualified Person (QP) for Environmental Site Assessments, and has been conducting Phase I/One Environmental Site Assessments and environmental reconnaissance since 2006. Mr. Lopers was accompanied by Mr. Philip Thibert, Director of Real Property for Fuller Group of Companies, a parent company of Metcalfe Realty Company Limited.

Photographs were taken of the exterior of the Phase One Property and on the interior of the building. A copy of the Photographic Log and written descriptions of the photos are provided in Appendix I.

b) Specific Observations at Phase One Property

The Phase One Property was developed with a 15 storey commercial office building at the time of the Site Investigation. The building is used for office space by various commercial tenants. The building footprint occupies the entire Phase One Property.

There were four storeys of underground parking, the ground level has a fitness centre and the storeys above are occupied by commercial office units. The entrance to the underground parking levels is present on the southeast portion of the building, with an entrance ramp from Albert Street to the south. The exterior of the building was poured and/or precast concrete. The building's roof was an inverted style roof with gravel covering insulation and a membrane. Three sumps were identified in the lowest underground parking level. The sumps extended approximately 1.8 m below the floor slab and were actively managing stormwater at the time of the Site Investigation. The sumps discharge to the municipal storm sewer system.

No ASTs or visual indications of the presence of USTs, such as vent and fill pipes or access hatches, were observed as part of the Site Investigation. It was reported that there may have been a historical AST at the Property for backup power supply, however, this AST was removed prior to the Site Investigation.

No potable water wells were observed at the Phase One Property during the Site Investigation. The Phase One Property is provided with potable water by the City of Ottawa through an underground connection from Albert Street to the south of the building.

Underground utility corridors for sanitary and storm sewers, potable water, private electricity and natural gas lines lead to the building, generally from Albert Street to the south of the building.

The Site building is heated and cooled with natural gas fired furnaces and or heating, ventilating and air conditioning (HVAC) units.

There were no significant cracks or stains on the concrete floors of the building. Three sumps present on the lower underground parking level; there were no odours, or sheens on the water surface.

The building was connected to the City of Ottawa municipal sanitary sewer system. There were no septic tanks or leaching beds observed at the Phase One Property as part of the Site Investigation. There are no septic tanks or leaching beds at the Property.

The entirety of the Phase One Property footprint is developed with the associated structure, with the majority of the remainder of the Phase One Property surfaced with asphalt or pavement.

There were no current railway lines, tracks or spurs identified at the Phase One Property. A passenger light rail transit system is present below Queen Street, approximately 30 m north of the Phase One Property; this railway system was not interpreted as a PCA. Historical railway lines (PCA #48) have been removed and replaced with paved municipal rights-of-way.

No surficial staining was observed on the gravel covered surfaces of the Phase One Property during the Site Investigation. No vegetation or stressed vegetation was observed.

i. Enhanced Investigation Property

The Phase One Property is not currently operating for any industrial use or any of the following commercial uses: as a garage, as a bulk liquid dispensing facility, including a fuel outlet, or for the operation of dry cleaning equipment. The Phase One Property is hence not an enhanced investigation property.

c) Land Use Observations of the Phase One Study Area

Properties in the Phase One Study Area were reviewed from publicly accessible Rights-of-Way as part of the Site Investigation on June 18, 2026. Uses of these lands were noted and any

potential presence of PCAs was also assessed. Neighbouring land uses were recorded as follows:

North: Land immediately north of the Phase One Property is occupied by a commercial office building followed by Queen Street right-of-way, below which is a segment of the Ottawa Light Rail Transit ("OLRT") system; this recently constructed railway system is used for passenger transportation and was not interpreted as a PCA. Commercial development is present north of Queen Street.

East: Commercial buildings are present immediately east of the Phase One Property, followed by Elgin Street right-of-way, followed by the National Arts Centre ("NAC").

South: Albert Street right-of-way is present to the south of the Phase One Property. Land south of Albert Street is occupied by a hotel and commercial office buildings followed by Slater Street right-of-way. The property south of Slater Street is occupied by a Hydro Ottawa hydro transformer station.

West: Land immediately west of the Phase One Property is occupied by a commercial office building followed by Metcalfe Street right-of-way. Commercial development (World Exchange Plaza) is present west of Metcalfe Street.

Neighbouring land uses are shown on Figure 3: Surrounding Land Use. The following PCAs were physically observed to be present in June 2026 during the review of land use in the Phase One Study Area:

- A Hydro Ottawa Transformer Station (PCA #6) was observed at 74 Slater Street, approximately 100 m south of the Phase One Property.
- An AST (PCA #68) was observed at 150 Laurier Avenue West, approximately 240 m south-southeast of the Phase One Property.

The current uses of the neighbouring properties are not considered to represent any APECs for the Phase One Property.

7. Review and Evaluation of Information

a) Current and Past Land Use

The current and past land use of the Phase One Property, dating back to the first developed use, is provided in Table 6 below.

Table 6: Current and Past Land Use

Year	Name of Owner	Description of Property Use	Property Use	Other observations from historical sources
1837 - 1862	Nicholas Sparks	Undeveloped	Agricultural or Other Use	No development is shown at the Property or neighbouring lands. Nicholas Sparks was a farmer who was known to have prepared land for development.
1862 - 1946	Individuals	Property residential dwellings. Institutional listing.	Residential Use With some Institutional Use	1902 and 1925 FIPs and 1928-1946 aerial photographs depict Property developed for residential purposes with 3 residential structures on the Property. The property may have also been partially used for institutional purposes.
1947 - 1958	Investment / Holdings Corporations	Property used as a parking lot	Commercial Use	Observations from 1956 aerial photograph shows the Phase One Property used as a paved parking lot.
1958 - 1972	Metcalfe Holdings Company Limited	Property used as a parking lot	Commercial Use	Observations from 1963 FIP and 1965 aerial photograph shows the Phase One Property used as a paved parking lot.
1972 - Present				Observations from 1976 to 2022 aerial photographs shows the Phase One Property developed with a multi-storey commercial building. Site inspection confirms that the Phase One Property is a commercial office building.

b) Potentially Contaminating Activities

There were no Potentially Contaminating Activity was identified at the Phase One Property.

There were 68 PCAs were identified at neighbouring properties in the Phase One Study Area and are summarized in Table 7 below.

Table 7: Potentially Contaminating Activities in the Phase One Study Area

PCA Report Reference #	Potentially Contaminating Activity	Location
PCA #1	Former Automotive Garage & Repairs (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	82 Albert Street & 85-87 Slater Street, approximately 20 m south
PCA #2	Former retail fuel outlet with associated underground storage tanks (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	100 Albert Street, approximately 20 m southwest
PCA #3	Electrical Transformers (O.Reg. 153/04 PCA Item 18: and Electricity Generation, Transformation and Power Stations)	63 Albert Street, approximately 40 m east
PCA #4	Former Automotive Garage & Repairs (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	72 Albert Street, approximately 40 m southwest
PCA #5	Former Chinese Laundry (Dry Cleaner) (O.Reg. 153/04 PCA Item 37: Operation of Dry Cleaning Equipment (where chemicals are used))	58 Metcalfe Street, approximately 60 m west
PCA #6	Former Automotive Garage & Repairs (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	94 Slater Street, approximately 100 m south
PCA #7	Hydro Ottawa Transformer Station (O.Reg. 153/04 PCA Item 18: and Electricity Generation, Transformation and Power Stations)	76-92 Slater Street, approximately 100 m south
PCA #8	Former Automotive Garage & Repairs (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	146 Albert Street, approximately 120 m west
PCA #9	Former Automotive Garage & Repairs (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	131-135 Albert Street, approximately 140 m west
PCA #10	Former Laundry (Dry Cleaner) (O.Reg. 153/04 PCA Item 37: Operation of Dry Cleaning Equipment (where chemicals are used))	130 Slater Street, approximately 130 m southwest
PCA #11	Fuel Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	140 Slater Street, approximately 170 m southwest
PCA #12	Former retail fuel outlet with 4 associated underground storage tanks (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	79-87 O'Connor Street, approximately 170 m southwest
PCA #13	Garage & Repairs (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems)	25 Albert Street, approximately 190 m east
PCA #14	Former Chinese Laundry (Dry Cleaner) (O.Reg. 153/04 PCA Item 37: Operation of Dry Cleaning Equipment (where chemicals are used))	82-84 O'Connor Street, approximately 240 m west-southwest

PCA Report Reference #	Potentially Contaminating Activity	Location
PCA #15	Former Automotive Garage & Repairs with UST (O.Reg. 153/04 PCA Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material used to Maintain Transportation Systems) (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	171 Slater Street, approximately 245 m southwest
PCA #16	Suspected fuel (heating oil) storage tank, reported heating oil spill (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	75 Albert Street, adjacent to east
PCA #17	Suspected fuel (heating oil) storage tank, reported heating oil spill (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	100 Sparks Street, approximately 100 m northwest
PCA #18	Suspected fuel storage tank, waste generator (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	55 Metcalfe Street, adjacent to west
PCA #19	Suspected fuel storage tank, waste generator (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	60 Queen Street, adjacent to northeast
PCA #20	Suspected fuel storage tank, waste generator (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	90 Elgin Street, approximately 70 m south

PCA #68	Aboveground Storage Tank (O.Reg. 153/04 PCA Item 28: Gasoline and Associated Products Storage in Fixed Tanks)	150 Laurier Avenue West, approximately 240 m south-southeast

c) Areas of Potential Environmental Concern

It was noted that the majority of the properties in the Phase One Study Area with historical PCAs have been redeveloped with multi-storey commercial buildings with several levels of underground parking, which would reduce the potential for contaminant migration from these properties.

None of the identified PCAs at neighbouring properties in the Phase One Study Area are considered to represent APECs for the Phase One Property based primarily on commercial redevelopment of the majority of the Phase One Study Area and also considering the distances and/or orientation of the historical PCAs with respect to the Phase One Property.

d) Phase One Conceptual Site Model

Three Figures are provided to visually depict the Conceptual Site Model. Figure 1: Key Plan shows the location of the Phase One Property within the City of Ottawa. Figure 2: Site Plan depicts environmentally significant features at the Phase One Property; this Figure also depicts the current general conditions of the Phase One Property. Figure 3: Surrounding Land Use

shows the current uses of properties in the Phase One Study Area, location of PCAs at the Property and neighbouring lands.

The Phase One Property is located at Civic No. 85 Albert Street, Ottawa, Ontario and has an approximate area of 953.8 m^2 (0.10 Hectares).

Based on the information reviewed as part of this Phase One ESA, specifically the title search, FIPs and aerial photographs, the Phase One Property has been developed or occupied for residential use since 1862 until at least 1946. A commercial parking lot was present at the Property between at least 1956 and 1965. The Phase One Property was redeveloped with the present day 15 storey commercial office building with 4 levels of underground parking in 1976.

Metcalfe Realty Company Limited purchased the Property in 1958, and it is understood that a concept has been proposed to retrofit the Site building for residential use. The Phase One Property is immediately surrounded by:

- A municipal Right-of-Way (Albert Street) and commercial buildings to the south;
- A multi-storey commercial building followed by municipal Right-of-Way (Metcalfe Street), followed by a multi-storey commercial development (World Exchange Plaza) to the west;
- Multi-storey commercial buildings followed by a municipal Right-of-Way (Elgin Street) followed by the NAC to the east; and,
- A multi-storey commercial building followed by a municipal Right-of-Way (Queen Street – with the OLRT beneath) followed multi-storey commercial buildings to the north.

The Phase One Study Area includes the Phase One Property and properties with the boundaries within 250 m of the Phase One Property limits. Based on a review of the Phase One Property and properties in the Phase One Study Area, their associated historical and/or current uses and operations and physical characteristics of the Phase One Study Area, it was determined that an assessment of properties within 250 m of the Phase One property was sufficient to meet the objectives of the scope of this investigation for a Phase One ESA.

There were no water bodies at the Phase One Property or in the Phase One Study Area. The nearest surface water body identified on the mapping is The Ottawa River, flowing east, is located approximately 550 m northwest of the Phase One Property. The Rideau Canal (manmade and concrete-lined thus not interacting with groundwater) flowing north, is present approximately 240 m east of the Property. No drinking water wells are located at the Phase One Property and the Phase One Study Area is serviced by municipally treated non-potable water. The local topography in the Phase One Area slopes gently downward to the south.

Based on the historical research, the general stratigraphy of the Phase One Property and Phase One Study Area consists of sand and gravel fill, underlain by silty clay, underlain by interbedded shale bedrock. The approximate depth to bedrock is expected to range from 4 to 6 m below ground surface; bedrock was likely removed at the Site during construction of the building to

accommodate construction of the 4 underground parking levels at the Property. Groundwater is naturally expected at a depth of approximately 4 to 8 m BGS and flow in a predominantly northeast direction (towards the Ottawa River), however, groundwater levels are expected to be significantly altered by the presences of deep foundations and active sump pits.

There were no potentially contaminating activities identified at the Phase One Property.

Sixty-eight (68) properties with PCAs in the Phase One Study Area were identified as part of this Phase One ESA. Neighbouring property PCAs consist of a historical railway, various historical automotive garages, gas stations and dry cleaners. It was noted that the majority of the properties in the Phase One Study Area with historical PCAs have been redeveloped with multi-storey commercial buildings with several levels of underground parking, which would reduce the potential for contaminant migration from these properties.

None of the identified PCAs at neighbouring properties in the Phase One Study Area are considered to represent APECs for the Phase One Property based primarily on commercial redevelopment of the majority of the Phase One Study Area and also considering the distances and/or orientation of the historical PCAs with respect to the Phase One Property. Underground utility corridors for sanitary and storm sewers, potable water, private electricity and natural gas lines lead to the building, generally from Albert Street to the south of the building. Underground utility corridors do have the potential to affect contaminant distribution and transport, however, they are likely located above the groundwater table, given the depth of underground parking structures in the Phase One Study Area.

The uncertainty or absence of information obtained in the components of this Phase One ESA is not expected to affect the validity of the conclusions or conceptual site model.

8. Conclusions

i. Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

There were no potentially contaminating activities identified at the Phase One Property.

Sixty-eight (68) properties with PCAs in the Phase One Study Area were identified as part of this Phase One ESA. Neighbouring property PCAs consist of a historical railway, various historical automotive garages, gas stations and dry cleaners.

It was noted that the majority of the properties in the Phase One Study Area with historical PCAs have been redeveloped with multi-storey commercial buildings with several levels of underground parking, which would reduce the potential for contaminant migration from these properties.

None of the identified PCAs at neighbouring properties in the Phase One Study Area are considered to represent APECs for the Phase One Property based primarily on commercial redevelopment of the majority of the Phase One Study Area and also considering the distances and/or orientation of the historical PCAs with respect to the Phase One Property.

A Phase Two Environmental Site Assessment is not recommended for the Phase One Property.

ii. Record of Site Condition Based on Phase One Environmental Site Assessment Alone

Given that there were no APECs identified at the Phase One Property, a Phase Two Environmental Site Assessment is not required before an RSC may be submitted with respect to all or part of the Phase One Property.

An RSC is not being sought for the Phase One Property to document the change from commercial to residential land use as it is recognized that recent changes to O.Reg. 153/04 include and exemption that does permit commercial office building conversion to residential use without the filing of an RSC.

iii. Signatures

The Qualified Person for this study is Mr. Luke Lopers, P. Eng. Mr. Lopers is a Professional Engineer registered in Ontario since 2012 and has been working on environmental site assessments since 2006. Mr. Lopers has been an author, project manager and/or peer reviewer for hundreds of Phase One ESAs and Phase Two ESAs as well as previously filed RSCs.

The reviewer for this study is Ms. Natasha Corrin, P.Eng. Ms. Corrin is a Professional Engineer registered in Ontario since 2005 and has reviewed many of Phase One and Two ESAs in Ontario and the rest of Canada leading to, or incorporated into Risk Assessments. The qualifications of the assessor/Qualified Person and reviewer are included in Appendix J.

Sincerely,

Luke Lopers, P.Eng., QP_{ESA}

Natasha Corrin, M.A.Sc., P.Eng., QP_{RA}

9. Limitations

The findings and conclusions of this Phase One ESA are based on the information provided and/or reviewed as part of this study.

This Phase One ESA has been completed with the standard of care generally expected in the industry for a study of this nature.

This Phase One ESA has been prepared for the sole use of Semper Paratus Management Inc. and Metcalfe Realty Company Limited for the purposes of a due diligence assessment of the potential liabilities which may exist at the Phase One Property. No other party is permitted to rely on the conclusions or findings of this report without the written consent of Lopers & Associates and Metcalfe Realty Company Limited.

There were no portions of the Phase One Property which were inaccessible, or components of this ESA where insufficient information was available to complete the interpretation.

Changes to the physical setting of the Phase One Property, Phase One Study Area and applicable regulations governing Phase One Environmental Site Assessments have the potential to influence the validity of the conclusions and opinions presented in this Phase One ESA.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

First Matter:			
Second Matter:			
Investigation 1:			
Investigation 2:			
Penalty Imposed:			

Description: Percy Pyper Limited was fined $10,000 and Willis McKeown, Willy's Roll-offs Ltd. and 1092066 Ontario Inc. o/a McKeown Contracting each received a suspended sentence after being convicted of one violation under the Environmental Protection Act, for failing to comply with a court order. Willis McKeown is the sole Director of Percy Pyper Limited who owns property located on Bank Street in Ottawa. 1092066 Ontario Inc. o/a McKeown Contracting possesses a waste management system approval issued by the ministry to transport waste and Willy's Roll-Offs Ltd. is an Ontario corporation. Mr. McKeown was to remove and dispose of demolition waste from a building located at 90 Elgin Street in Ottawa. It was understood when the contract was awarded to McKeown Contracting that the waste material was to be processed at the Elgin site. The Bank site owned by Percy Pyper Limited has had large amounts of waste deposited on it and has been the subject of numerous prosecutions under Ontario's environmental legislation over the years. As a result and as part of the sentencing, a court order was issued, prohibiting the deposit of any material on the Bank site property. At least 60 loads of waste materials were transported from the Elgin site to a vacant property adjacent to the Bank site. Mr. McKeown had a prior agreement with the owner of the property adjacent to Bank site that he could, if/when necessary, store materials and/or equipment at the vacant property. The Bank site is a property owned by Percy Pyper Limited. There is no fence or other barrier separating the Bank site from the abutting property where the demolition material was being deposited. As a result, some of the demolition material was deposited onto the Bank site property contrary to the court order. Percy Pyper Limited was fined $10,000 plus a victim fine surcharge of $2,500 and was given 30 days to pay the fine. Mr. McKeown, Willy's Roll-offs Ltd. and 1092066 Ontario Inc. o/a McKeown Contracting were each given a suspended sentence. A court order was issued that requires the three corporate defendants to carry out a monitoring program at the property over the next two years at a cost of approximately $60,000 and to provide a report to the ministry.

Court Location:	Ottawa	***Ministry District:***	
Publication City:			
Publication Title:	Excavation Company fined $90,000 for Environmental Protection Act Violations		
Act:	Environmental Protection Act		
Act(s):			
First Matter:			
Second Matter:			
Investigation 1:			
Investigation 2:			
Penalty Imposed:	1150021 Glenn O. Wright Corporation was convicted of one violation under the Environmental Protection Act and was fined $90,000, plus a victim fine surcharge of $22,500, with 60 days to pay the fine.		
Description:	The conviction relates to causing the discharge of natural gas into the natural environment, that may have caused an adverse effect.		
Background:	1150021 Glenn O. Wright Corporation provides heavy equipment rentals and excavation services under the name of Glenn Wright Excavating. In 2017, the company was subcontracted through a verbal agreement to conduct construction work including the installation of drainage tile at a site near 131 Queen Street in Ottawa. On May 2, 2017, the excavator operator was digging a trench at the site, when the equipment bucket struck a buried two-inch gas utility tee junction box that was connected to a four-inch natural gas line, causing the junction to crack and spill natural gas to the environment. Over several hours, approximately eight thousand cubic metres of natural gas was released. Prior to the excavation work, the proper certified natural gas locations had been acquired, but the abandoned gas utility tee was not noted. The Technical Standards and Safety Authority (TSSA) guidelines and best practices for excavations around utilities state that hand digging must occur within 12 inches of any gas line. Enbridge Gas Distributions Inc., the ministry and the Ottawa Fire Services attended the scene and evacuated the public, multiple business/government establishments and several area streets, thereby affecting the city's transit system. The natural gas was shut-off, which affected 44 area customers for several hours. The city transit system incurred approximately $12,481.00 in additional operator costs as a result of the disruption, and Enbridge Gas incurred costs of $39,459.07 to repair the gas line. The ministry's Environmental Investigations and Enforcement Branch investigated and laid one charge which resulted in one conviction.

Description: Willy's Roll-Off Ltd., 1092066 Ontario Inc., Willis and Susan McKeown and Percy Pyper Ltd. Pled guilty to impairing water quality, establishing a waste disposal site without approval, and failing to transport waste only to an approved site. They were fined a total of $150,000 plus victim fine surcharges. Numerous inspections conducted by the ministry in 2006 revealed quantities of construction and demolition waste deposited in a former aggregate pit site in Ottawa. The companies did not have approval to store waste at the site and only had ministry approval to transport waste to an approved site. Inspectors also discovered a pond that was almost completely covered in waste. Water samples revealed that water quality may have been impaired. The companies were charged following an investigation by the ministry's Investigations and Enforcement Branch. Four of the defendants pled guilty to depositing, causing or permitting waste to be deposited at a property that resulted in leachate being discharged into water that may have impaired the quality of water. The four defendants also pled guilty to permitting the delivery of waste to the pit without approval. As well, three of the defendants pled guilty to failing to ensure that adequate steps were taken to comply with ministry approval requirements. The defendants were fined a total of $150,000 plus victim fine surcharges.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Oct 2025

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2025

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Aug 2025

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Dec 31, 2025

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Jul 2025

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Jan 31, 2026

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Dec 31, 2025

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Jan 31, 2026

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2025

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Offenders Registry: Federal EOR

The Environmental Offenders Registry, enforced by Environment and Climate Change Canada and Parks Canada, tracks corporations convicted under specific federal environmental laws. The registry includes corporate convictions resulting from court proceedings. Court prosecutions are one of several enforcement measures used when violations or potential violations are detected. Other measures like tickets, warning letters, or compliance orders may also be employed to restore compliance. Although not affected by the Environmental Enforcement Act, convictions obtained by Environment and Climate Change Canada under the Species at Risk Act and the Pollution Prevention Provisions of the Fisheries Act are also included.

Government Publication Date: Nov 30, 2025

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

Excess Soil Registry: Provincial ESNR

The Excess Soil Registry is made available by the Resource Productivity and Recovery Authority (RPRA). Excess soil is soil dug up mainly during construction and excavation activities that must be removed from the development site because it cannot or will not be reused. The Minister of the Environment, Conservation and Parks directed the RPRA to establish and maintain the Excess Soil Registry, enabling regulated parties to comply with registration and filing notice requirements, the ministry to access data, and the public to view information from those filings. From January 1, 2023, construction and development project leaders, as well as operators and owners of soil Reuse Sites, and Residential Development Soil Depot sites, must file notices detailing how excess soil is reused and disposed of in compliance with Ontario's Excess Soil Regulation.

Government Publication Date: Aug 31, 2025

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Oct 2025

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Sep 30, 2025

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Feb 2025

Historical Business Activity Risk: Federal HBAR

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this list does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including BC Directories, Hendersons, Mights, Sun Directories, Vernons, and Wrights; spanning roughly 1920s through 1960 depending on information available by city.

This list is currently limited to sites as reported in the following provinces: Alberta, British Columbia, Saskatchewan, Manitoba, New Brunswick, Nova Scotia, Ontario, and Quebec.

Government Publication Date: 1920s - 1960

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2024

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jan 31, 2026

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

Notice of Contamination List: Federal NOC

This dataset contains Notice of Contamination (NOC) submissions reported to the Canada Energy Regulator (CER), including the most recent annual update information where applicable. Regulated companies are required to submit an NOC when contamination is identified or encountered during any phase of a facility's lifecycle and confirmed through analytical sampling, or when contamination resulting from an incident cannot be remediated within 12 weeks of being reported to the CER. Blank values in the Annual Update Year and annual update fields indicate that the site has achieved remediation closure, has been identified as third-party contamination, or was reported recently and does not yet require an annual update.

Government Publication Date: Nov, 2025

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Dec 31, 2025

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-May 2025

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Dec 31, 2025

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Jan 31, 2026

Ontario PFAS Spills: Provincial PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances: Federal PFCH

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI: Federal PFHA

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per - and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR: Provincial PPHA

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Dec 31, 2025

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004 - 31 Jan, 2026

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directories: Private SCT

Scott's Directories is a data bank containing information on various manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, applicable NAICS Codes, and product categories are included in this database.

Government Publication Date: 1992-Mar 2011; Feb 2025

Ontario Spills: Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Dec 2025

Wastewater Discharger Registration Database: Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2024

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Jan 31, 2026

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Waste Management Site: Provincial WMS

This data contains Waste Disposal Site types collected by the Ministry of Natural Resource (MNR). The new data class brings over data from the Waste Management Information System (WMIS), which is an MS Access based database used by MNR to track Waste Management Sites. This was married with the spatial data from Waste Disposal Sites where possible. Different Waste Disposal Site types collected by the Ministry of Natural Resources include: compost disposal, hazardous waste disposal, household waste disposal, industrial waste disposal, septic drying bed, septic field, sewage disposal, tile bed, and transfer station. The data is currently under development, meaning the data is currently in the process of being created by the MNR.

Government Publication Date: April 30, 2025

Water Well Information System: Provincial WWIS

This database consists of information submitted by well contractors detailing locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table. The database is provided by the Ontario Ministry of Environment, Conservation and Parks.

Government Publication Date: Jul 31, 2025

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Dear Luke Lopers:

RE: MECP FOI A-2026-01690, Your Reference LOP26-043A – Decision Letter

This letter is further to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 85 Albert Street, Ottawa.

After a thorough search through the ministry files, records were located in response to your request. The final decision has been made to provide partial access to the requested information. The official responsible for making the access decision on your request is the undersigned.

Some of the information has been severed or withheld under the following sections of the Act:

s.22 (a) Records that are publicly available as follows:

- For corporate ownership (ONBIS records, Articles of Incorporation, Articles of Amendment) download forms ON00242E and 5310E to search for a public record available from Service Ontario at https://www.ontario.ca/page/ontario-business-registry-all-services

  Go to “33. Searching the Public Record” to locate the forms.

Section 57 of the Act authorizes certain fees to be charged for processing a request. Our charges for processing this request are:

- Search Time 0.8 @ 30/hour $24.00
- **Total** **$24.00**

In order to receive a copy of the records please forward this amount to our office. Payment(s) may be made by **May 29, 2026.** If payment has not been received by this date, the file will be closed, and you will be required to submit a new request.

- Payments can be made electronically at Freedom of Information Request for Property Information, or by cheque or money order made to the Ministry of Finance.

Please **do not** mail cash or send your payment information via email.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at http://www.ipc.on.ca. Please note there may be a fee associated with submitting the appeal.

If you decide to pursue this request after the deadline has passed, please contact the analyst below to discuss options that are available.

If you have any questions regarding this matter, contact Tara Hachey at tara.hachey@ontario.ca.

Yours truly,

Tara Hachey

For:

Josephine DeSouza
Manager, Access, and Privacy Office

Incident Information

Incident Summary:	SCB, Pro-Active Inspection (Office Building) *cannot be longer than 60 characters*
Incident Description:	On July 4, 2013, Provincial Officer Ronald Castillo (1403) of the Sector Compliance Branch - Ministry of the Environment conducted an inspection of a group of office buildings "The Fuller Building" and "85 Albert" located at 75 and 85 Albert Street, Ottawa. The group of office buildings is legally owned by Metcalfe Realty Company Limited. The purpose of the inspection was to ensure that the group of office buildings was operating in accordance with Ontario Regulations (O. Regs.) 102/94 and 103/94. O. Reg. 102/94 requires the Company to complete a waste audit and waste reduction work plan and update them annually. O. Reg. 103/94 requires the source separation for the purpose of reuse or recycling of the following materials: aluminum food or beverage cans, cardboard, fine paper, glass bottles and jars, newsprint, and steel food or beverage cans. At the time of the inspection, Officer Castillo met briefly with Mr. Alain Morin (Operations Manager) and Mr. Andre Paquette (Building Manager). Mr. Morin confirmed that the office buildings are legally owned by Metcalfe Realty Company Limited. From this meeting, Mr. Morin indicated that the gross floor areas of the office buildings are 160,000 and 89,000 square feet being used as office spaces for "The Fuller Building" and "85 Albert," respectively. The group of office buildings meets the legislative threshold of 10,000 square metres (approximately 107,640 square feet) as set out in O. Reg. 102/94 and O. Reg. 103/94 and is therefore subject to the requirements of the two Regulations noted above. Furthermore, it was noted that the office buildings maintain Cascades Recovery Inc. as their waste contractor, which further separates the waste according to each category. The two office buildings have one common waste storage area, where a single stream collection is implemented in coordination with their waste hauler. Corrugated cardboard waste, mixed beverage container waste, and mixed paper wastes are stored in each blue rolled cart. There was no issue of non-compliance with O. Reg. 103/94. During the inspection and subsequent discussion with Mr. Morin, the following were noted: 1) A Waste Audit had been conducted and a written report had been prepared, as required by 42(1) & (2) of O. Reg. 102/94; 2) A written Waste Reduction Work Plan (WRWP) had been prepared for this site as required by s. 21 of O. Reg. 102/94. The copy of WRWPs for the 2 office buildings were posted on-site. Please refer to Field Inspection Observations section for more details. The company complies with O. Reg. 102/94 and O. Reg. 103/94. No further action required.

OTTAWA, ONT
K2P 1P9

Dear MR. R. LALONDE:

Re: Acknowledgement of Subject Waste Registration

In accordance with Subsection 18(3) of Ontario Regulation 347, this letter acknowledges receipt of your Generator Registration Letter dated **December 1, 1993.** The Generator Registration Number assigned to your company is:

ON0940702

for the site located at:

225 METCALFE STREET, SUITE 710
OTTAWA, ONT

A list of acknowledged waste number(s) is attached as Schedule "A". The format of this schedule has been modified since July 1993. A waste number now appears only once, regardless of the number of different waste streams which may have identical waste numbers. The waste description is also generic. However, you are still required to register all waste streams, even if they have identical waste numbers.

For off-site disposal of subject waste, the appropriate waste number(s) acknowledged in Schedule "A", and the Generator Registration Number, must be entered in Part A of each manifest form after receipt of this generator registration document. Under Ontario's Environmental Protection Act, the property receiving the waste must be approved as a disposal site for the waste it is receiving. The disposal of waste at a uncertified site is illegal.

The selection of accurate waste numbers is your responsibility. This acknowledgement must **not** be considered a confirmation of the accuracy of the information submitted by you. Should the waste numbers(s) **you have selected** be deemed incorrect by the Ministry, or improper waste disposal occurs at any time, you may be subject to legal action as provided by the Environmental Protection Act and Regulation 347.

It is important to note that under Subsection 18(4) of Regulation 347, a supplementary Generator Registration Report must be submitted to the Ministry within 15 days for any of the following reasons:

1. if the name, address or telephone number of your company or generating site changes, or

2. if there is a significant change in the description, the waste number, or the physical or chemical characteristics of your registered waste(s), or

3. **if you generate a hazardous or liquid industrial waste that has not been registered with the Ministry, even if its waste number is already listed on Schedule "A".**

Your Generator Registration Report has been forwarded to the District Office of this Ministry that is closest to your generating site. Staff of the District Office conduct post-registration audits and may contact you for additional information or may visit your site.

Should you have any questions concerning generator registration or manifesting requirements, please contact the Regulation 347 officer at the appropriate Regional Office of the Ministry.

Environmental Protection Act

SCHEDULE "A"

In accordance with information submitted with your generator registration report(s), the site indicated below is registered for the waste number(s) shown on this schedule, which **may represent more than one waste stream.** This attached Schedule forms part of the acknowledgement of generator registration for the following site:

225 METCALFE STREET, SUITE 710
OTTAWA, ONT

identified by Generator Registration Number **ON0940702**, dated in Toronto, December 30, 1993.

WASTE STREAM	WASTE NUMBER
1. PHOTOPROCESSING WASTES	264C
2. PHOTOPROCESSING WASTES	264T

End of record.

Attn: Mr. Y. Desjardins
Property Manager

Dear Mr. Desjardins:

RE: Acknowledgement of Subject Waste Registration

As prescribed by Section 15(4) of Ontario Regulation 309, this letter acknowledges receipt of your Generator Registration Report(s) **dated June 21, 1991 and further correspondence as outlined in Schedule "B"** for the following site:

85 Albert St.
Ottawa, Ontario

The Generator Registration Number assigned to your company at this site is:

ON0979503

Please note that this Generator Registration Number must be used only in conjunction with the site for which it was issued.

This acknowledgement letter supersedes the previous acknowledgement letter dated July 26, 1991 for this site.

Please ensure that the company name shown in this letter is complete and accurate. This would be the corporate name or, if a partnership or proprietorship, the name of the principal(s). If you intend to carry on business under a separate name or style, this should also be entered. If there is a discrepancy, it is your responsibility to re-register providing us with your complete and accurate company name.

A list of the waste stream(s) covered by this acknowledgement is attached to this letter as Schedule "A".

Under the Environmental Protection Act of Ontario, off-site and on-site disposal of subject wastes is only permissible if the property receiving the waste has been approved as a waste disposal site. The disposal of waste materials in an uncertified site is unlawful.

For **off-site** disposal of subject wastes, the waste number(s) describing the waste stream(s) in Schedule "A" and the Generator Registration Number must be entered on manifest forms for each waste transaction after you have received this generator registration document.

For **on-site** disposal of subject wastes covered by this acknowledgement, including on-site incineration, landfilling and discharges to sanitary sewers, every generator shall retain records for a period of at least two years. These records shall include the generator registration number, waste name(s), waste number(s), quantity and disposition of the waste(s).

For off-site disposal of any **registerable solid wastes** shown in Schedule "A" (waste classes ending in the letter "N"), manifesting is not required at this time. These wastes can be disposed of at most approved municipal landfilling sites.

The selection of accurate waste classes is the responsibility of each waste generator. This acknowledgement must not be considered as a confirmation of the accuracy of information submitted by you. Based on the information you have provided, the waste class(es) that has (have) been selected appear(s) to be correct. If, due to new information or re-assessment of information submitted, you feel your waste is inappropriately classified, you should apply for a revision to your registration using the Generator Registration Report, Form 2. Should the waste class(es) that you have selected be deemed incorrect by the Ministry, or improper waste disposal occurs at any time, you may be subject to legal action as provided by the Environmental Protection Act and Regulation 309.

Your Generator Registration Report has now been forwarded to the District Office of this Ministry that is closest to your generating site. The District Office will be conducting a post-registration audit and may be contacting you for additional information or may be conducting site visits.

It is important to note that under Section 15(4) of Ontario Regulation 309, a new Generator Registration Report must be submitted to the Ministry within fifteen (15) days for any of the following reasons:

1. If the name, address or telephone number of your company or waste generating site changes.

2. If the description, the waste class or physical or chemical characteristics of your registered wastes change(s).

3. If you generate a hazardous or liquid industrial waste that has not been registered with the Ministry.

If the quantity of registered wastes or your carrier or receiver changes, automatic re-registration is not required. However, in order to update our file, we may periodically request additional information when we observe or suspect a significant change as compared to the most recent information submitted by you for registration purposes.

Should you have any questions concerning generator registration or manifesting requirements, please contact the Waste Management Branch Reviewer identified below at 323-5157.

Yours truly,

Director
Regulation 309, R.R.O., 1980
Environmental Protection Act

Re: Inspection of office buildings "The Fuller Building" and "85 Albert"
Located at 75 and 85 Albert St., Ottawa

To Whom It May Concern:

On July 4, 2013, I attended the above-noted group of office buildings for the purpose of conducting an inspection, which focused on ensuring compliance with Ontario Regulations 102/94 and 103/94. I met briefly with Mr. Alain Morin (Operations Manager) and Mr. Andre Paquette (Building Manager) and discussed the requirements of the regulations, as they apply to office buildings. From our discussion, it is my understanding that the buildings have gross floor areas of approximately 160,000 and 89,000 square feet being used as office spaces for the group of office buildings "The Fuller Building" and "85 Albert," respectively. Therefore, the group of office buildings is subject to the requirements of both regulations.

Please be advised that all office buildings that have a total floor area of at least 10,000 square metres (approximately 108,000 square feet) must comply with Ontario Regulations 102/94 and 103/94. To achieve compliance, the office building is required to undertake the following:

1. Conduct a Waste Audit that includes, but is not limited to, the following:
   A. An examination of the amount, nature and composition of the waste;
   B. An examination of the manner in which the waste is generated and managed, including management decisions and polices that relate to waste production.

2. Prepare and implement a Waste Reduction Work Plan that includes, but is not limited to, the following:
   A. Plans to reduce, reuse and recycle the waste generated;
   B. Identify who is responsible for implementing each part of the Work Plan;

C. A timetable that outlines when each part of the Plan will be implemented; and
D. A description of the expected results.
E. Measures for communication to the employees.
In addition, the complete plan or its summary will be posted for the benefit of members of the public.

3. Implement a Source Separation Program for the waste that is generated that includes, at a minimum, but is not limited to, the following:
A. The provision of information to users and potential users of the Source Separation Program that describes the performance of the Program, and encourages its full use.
B. Supervision of the Program to ensure that reasonable efforts are made for its full use.

The inspection for compliance with O.Reg.102/94 and O.Reg.103/94 at these sites on July 4, 2013 **did not reveal any issue of non- compliance at that time.** To remain in compliance, you are required to continue the source separation program for all scheduled wastes (aluminum food or beverage cans, corrugated cardboard, fine paper, glass bottles and jars, newsprint, and steel food or beverage cans) that are generated in the office building to further promote separation efforts.

I have enclosed links to the relevant guidance documents and web-based resources to assist you. If after reviewing these materials you have any questions, please contact me for assistance at: for assistance at: Tel: 1-416-314-1613; Toll free: 1-866-482-9967; Fax: 416-314-4464 or by Email: Ronald.Castillo@ontario.ca.

Inspection Information

Inspection Report 1-IT5ZZ **Pass/Fail** PASS

Incident Report Reference Number (IRRN):

Inspection Report Summary

On July 4,, 2013, Provincial Officer Ronald Castillo (1403) of the Sector Compliance Branch - Ministry of the Environment conducted an inspection of a group of office buildings "The Fuller Building" and "85 Albert" located at 75 and 85 Albert Street, Ottawa. The group of office buildings is legally owned by Metcalfe Realty Company Limited.

The purpose of the inspection was to ensure that the group of office buildings was operating in accordance with Ontario Regulations (O. Regs.) 102/94 and 103/94. O. Reg. 102/94 requires the Company to complete a waste audit and waste reduction work plan and update them annually. O. Reg. 103/94 requires the source separation for the purpose of reuse or recycling of the following materials: aluminum food or beverage cans, cardboard, fine paper, glass bottles and jars, newsprint, and steel food or beverage cans.

At the time of the inspection, Officer Castillo met briefly with Mr. Alain Morin (Operations Manager) and Mr. Andre Paquette (Building Manager). Mr. Morin confirmed that the office buildings are legally owned by Metcalfe Realty Company Limited. From this meeting, Mr. Morin indicated that the gross floor areas of the office buildings are 160,000 and 89,000 square feet being used as office spaces for "The Fuller Building" and "85 Albert," respectively. The group of office buildings meets the legislative threshold of 10,000 square metres (approximately 107,640 square feet) as set out in O. Reg. 102/94 and O. Reg. 103/94 and is therefore subject to the requirements of the two Regulations noted above. Furthermore, it was noted that the office buildings maintain Cascades Recovery Inc. as their waste contractor, which further separates the waste according to each category. The two office buildings have one common waste storage area, where a single stream collection is implemented in coordination with their waste hauler. Corrugated cardboard waste, mixed beverage container waste, and mixed paper wastes are stored in each blue rolled cart. There was no issue of non-compliance with O. Reg. 103/94.

During the inspection and subsequent discussion with Mr. Morin, the following were noted:

1) A Waste Audit had been conducted and a written report had been prepared, as required by 42(1) & (2) of O. Reg. 102/94;

2) A written Waste Reduction Work Plan (WRWP) had been prepared for this site as required by s. 21 of O. Reg. 102/94. The copy of WRWPs for the 2 office buildings were posted on-site.

Please refer to Field Inspection Observations section for more details.

The company complies with O. Reg. 102/94 and O. Reg. 103/94. No further action required.

Checklist Name: **HEALTH & ENVIRONMENTAL IMPACT - ICI Office Buildings**

Observation:	Was there any indication of a potential for a human health impact or environmental impairment during the inspection and/or the review of relevant material?
Observation Type:	Impact Response: No
Comments/Findings:	At the time of the inspection there was no indication of a potential for a human health impact or environmental impairment during the inspection and/or the review of relevant material.
Observation:	Was there any indication of a known or anticipated human health impact during the inspection and/or review of relevant material, related to this Ministry's mandate?
Observation Type:	Impact Response: No
Comments/Findings:	At the time of the inspection there was no indication of a known or anticipated human health impact during the inspection and/or review of relevant material, related to this Ministry's mandate.
Observation:	Was there any indication of a known or anticipated environmental impact during the inspection and/or review of relevant material?
Observation Type:	Impact Response: No
Comments/Findings:	At the time of the inspection there was no indication of a known or anticipated environmental impact during the inspection and/or review of relevant material.
Observation:	Was there any indication of a known or suspected violation of a legal requirement during the inspection and/or review of relevant material which could cause a human health impact or environmental impairment?
Observation Type:	Impact Response: No
Comments/Findings:	At the time of the inspection there was no indication of a known or suspected violation of a legal requirement during the inspection and/or review of relevant material which could cause a human health impact or environmental impairment.

Recommended Actions

Continue updating the Waste Audit and Waste Reduction Work Plan (WRWP) Reports annually. Post the copy of the updated WRWP Report or its summary. Continue the implementation of source separation program in the office building as per Ontario Regulation 103/94.

This Inspection Report does not in any way suggest that there is or has been compliance with all applicable legislation and regulations as they may apply to this facility. It is, and remains, the responsibility of the owner and/or the operating authority to ensure compliance with all applicable legislative and regulatory requirements.

Inspection Report Summary (Included in Final Report)

On July 4, 2013, Provincial Officer Ronald Castillo (1403) of the Sector Compliance Branch - Ministry of the Environment conducted an inspection of a group of office buildings "The Fuller Building" and "85 Albert" located at 75 and 85 Albert Street, Ottawa. The group of office buildings is legally owned by Metcalfe Realty Company Limited.

The purpose of the inspection was to ensure that the group of office buildings was operating in accordance with Ontario Regulations (O. Regs.) 102/94 and 103/94. O. Reg. 102/94 requires the Company to complete a waste audit and waste reduction work plan and update them annually. O. Reg. 103/94 requires the source separation for the purpose of reuse or recycling of the following materials: aluminum food or beverage cans, cardboard, fine paper, glass bottles and jars, newsprint, and steel food or beverage cans.

At the time of the inspection, Officer Castillo met briefly with Mr. Alain Morin (Operations Manager) and Mr. Andre Paquette (Building Manager). Mr. Morin confirmed that the office buildings are legally owned by Metcalfe Realty Company Limited. From this meeting, Mr. Morin indicated that the gross floor areas of the office buildings are 160,000 and 89,000 square feet being used as office spaces for "The Fuller Building" and "85 Albert," respectively. The group of office buildings meets the legislative threshold of 10,000 square metres (approximately 107,640 square feet) as set out in O. Reg. 102/94 and O. Reg. 103/94 and is therefore subject to the requirements of the two Regulations noted above. Furthermore, it was noted that the office buildings maintain Cascades Recovery Inc. as their waste contractor, which further separates the waste according to each category. The two office buildings have one common waste storage area, where a single stream collection is implemented in coordination with their waste hauler. Corrugated cardboard waste, mixed beverage container waste, and mixed paper wastes are stored in each blue rolled cart. There was no issue of non-compliance with O. Reg. 103/94.

During the inspection and subsequent discussion with Mr. Morin, the following were noted:

1) A Waste Audit had been conducted and a written report had been prepared, as required by 42(1) & (2) of O. Reg. 102/94;

2) A written Waste Reduction Work Plan (WRWP) had been prepared for this site as required by s. 21 of O. Reg. 102/94. The copy of WRWPs for the 2 office buildings were posted on-site.

Please refer to Field Inspection Observations section for more details.

The company complies with O. Reg. 102/94 and O. Reg. 103/94. No further action required.

Ronald

Further to our conversation yesterday. Attached are the recycling invoices of the property in question also; we would like to confirm that the waste reduction waste work program implemented in the our property is shared from time to time with our client (building occupants) as needed by use of memo's or direct communication. Our onsite Building Manager on a daily basis always promoting our recycling program to all of our clients.

We have one outstanding issue is to provide the address where the recycling is been taken to after the site pickup. The information is not available at this time but Mario Martel will be providing this information next week.

We hope this is satisfactory.

Yours truly,

Alain Morin

Subject: RE: Waste Audit information.

Good Morning Mr. Morin,

You might have been away on vacation when I am sending this e-mail.

Thanks for exerting your best effort to provide the documents I requested prior to your vacation.

I would be looking forward to hearing from Mr. Martel about the information about the final destination of the recyclable waste, which were collected from the office buildings I inspected.

Have a great day.

Best regards,

Ronald Castillo

Subject: Waste Audit information.

Ronald

Further to our conversation yesterday. Attached are the recycling invoices of the property in question also; we would like to confirm that the waste reduction waste work program implemented in the our property is shared from time to time with our client (building occupants) as needed by use of memo's or direct communication. Our onsite Building Manager on a daily basis always promoting our recycling program to all of our clients.

We have one outstanding issue is to provide the address where the recycling is been taken to after the site pickup. The information is not available at this time but Mario Martel will be providing this information next week.

We hope this is satisfactory.

Yours truly,

Alain Morin
Operations Manager

Ministry of the Environment Waste Form

Report of a Waste Audit

Industrial, Commercial and Institutional Establishments

As required by O. Reg. 102/94

- *This report must be prepared 6 months after becoming subject to O. Reg. 102/94 and a copy retained on file for at least five years after it is prepared, and be made available to the ministry upon request.*
- *For large construction and demolition projects, please refer to the forms included with "A Guide to Waste Audits and Waste Reduction Work Plans for Construction and Demolition Projects as Required Under Ontario Regulation 102/94"* **(revised July 2008)**

I. General Information

Name of Owner and/or Operator of Entity(ies) and Company Name: Metcalfe Realty Company Limited		
Name of Contact Person: Alain Morin	**Telephone #:** 613-563-4442	**Email address:** amorin@metcalferealty.com
Street Address(es) of Entity(ies): 75 Albert Street		
Municipality: Ottawa-Carleton		

Type of Entity (check one)			
Retail Shopping Establishments		Hotels and Motels	
Retail Shopping Complexes		Hospitals	
Office Buildings	X	Educational Institutions	
Restaurants		Large Manufacturing Establishments	

Note: O. Reg. 102/94 does not apply to multi-unit residential buildings.

II. Description of Entity

Provide a brief overview of the entity(ies):

This building is located at 75 Albert Street.

- **Total rentable area:** 160,390
- **Number of floors:** 11 floors plus two basement levels
- **Washrooms:** Men's and Women's washroom on each floor, barrier free at B-1 level.
- **Amenities:** On-site cafeteria, boardroom rental available for tenants. On major transit arteries for easy access from all parts of the City. Close to Parliament Hill, the Courthouse, the Central Business District, the National Arts Centre, the Ottawa Convention Centre, shopping, dining and major hotels.

../2

III. How Waste is Produced And Decisions Affecting the Production of Waste

For each category of waste that is produced at the entity(ies), explain how the waste will be produced and how management decisions and policies will affect the production of waste.	
Categories of Waste	**How Is the Waste Produced and What Management Decisions/Policies Affect Its Production?**
Example: Disposable Food Packaging	***Generated by customers eating inside restaurant. Food packaging is used for health reasons. Reusable mugs for customers consuming coffee/tea inside restaurant is being reviewed.***
Aluminum food and beverage cans	Brought in by tenants from outside sources or from food service areas within building.
Cardboard	Generated as part of packaging for occupant and facility management supplies
Fine paper	Generated as part of office operations.
Glass Food and beverages bottles	Brought in by tenants from outside sources or from food service areas within building.
Newsprint	Generated by tenants from outside sources.
Steel food and beverage cans	Brought in by tenants from outside sources or from food service areas within building
PET (#1) plastic food and beverage bottles	Brought in by tenants from outside sources or from food service areas within building
HDPE (#2) plastic jugs, crates, totes,drums	Generated by food service areas within building
LDPE (#4) plastic film (shrink wrap)	Generated as packaging for various office supplies and food packaging
Polystyrene (#6)	Brought in by tenants from outside sources or from food service areas within building
Organics	Brought in by tenants from outside sources or from food service areas within building
Boxboard/shoe box, cereal, etc.	Same as Cardboard
Glossy magazines, catalogues, flyers	Generated by tenants from outside sources.
Tetra (milk/Juice) containers	Same as Aluminum
Paper and waxed paper drink cups	Same as organics
Skids	Occasionally brought in with supplies for building maintenance
Paper towels	Generated in washrooms, food service areas and by housekeeping for cleaning purposes
Printer cartridges	Generated as part of office operations for printers/faxes
IT Equipment/Audio Visual	Tenants are responsible for disposal of Electronics
Furniture	Tenants are responsible for disposal of furniture
Building/renovation material	Contractors are responsible for disposal
Printer cartridges	Generated as part of office operations for printers/faxes
Disposable Take out food Containers	Brought in by tenants from outside sources or from food service areas within building.
Other: Misc Waste	Generated by tenants as part of office operations

Note: When completing this form, write "n/a" in the columns where the entity will not produce any waste for a category of waste.

./3

IV. MANAGEMENT OF WASTE

For each category of waste listed below, indicate which waste items will be disposed or reused/recycled and how each item will be managed at the entity(ies).		
Category	**Waste to be Disposed**	**Reused or Recycled Waste**
Example: Beverage cans	***Staff/clients may place in garbage bins***	***Staff/clients place cans in recycling receptacles. Collection staff later collect cans. Those in garbage are disposed; those in recycling receptacles are recycled.***
Aluminum food and beverage cans	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup
Cardboard	Tenants may place in waste	Maintenance staff flatten, place in designated area in parking garage until pick up day
Fine paper	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup (some shredded)
Glass food & beverage bottles/jars	Same as Aluminum	Same as Aluminum
Newsprint	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup
Steel food and beverage cans	Same as Aluminum	Same as Aluminum
PET (#1) plastic food and beverage bottles	Same as Aluminum	Same as Aluminum
HDPE (#2) plastic jugs, crates, totes and drums	Same as aluminum	Same as Aluminum
LDPE (#4) plastic film	Placed in waste containers	Tenants place in waste bins, maintenance staff bring to compactor shared by 85 Albert Street.
Polystyrene (#6)	Placed in waste containers	Same as LDPE (#4)
Organics	Placed in waste containers	Same as LDPE (#4)
Boxboard shoe boxes, cereal boxes, etc.	Tenants may place in waste	Same as Cardboard
Glossy magazines/catalogues/flyer	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup
Tetra (milk/Juice) containers	Tenants may place in waste	Same as aluminum
Paper and waxed paper drink cups	Placed in waste containers	These items would be acceptable for green bin collection
Egg Carton (cardboard)	Tenants may place in waste	Same as cardboard
Skids	n/a	n/a
Paper Towels	Placed in waste containers	Same as LDPE (#4)
Printer cartridges	n/a	Cartridges are recycled via manufacturers
IT equipment/Audio Visual	Tenants manage	Tenants manage
Furniture	n/a	n/a
Building/renovation material	Contractors manage	Contractors manage
Disposable take out food pkg	Placed in waste containers	Same as LDPE (#4)
Other: Misc. Waste	Placed in waste containers	Same as LDPE (#4)

Note: When completing this form, write "n/a" in the columns where the entity will not produce any waste for a category of waste.

VI. Extent to Which Materials or Products Used Or Sold By the Entity Consist of Recycled or Reused Materials or Product

Please answer the following questions:

1. Do you have a management policy in place that promotes the purchasing and/or use of materials or products that consist of recycled and/or reused materials or products? If yes, please describe.

   Tenants manage their own purchasing policies

2. Do you have plans to increase the extent to which materials or products used or sold* consist of recycled or reused materials or products? If yes, please describe.

   Tenants manage their own purchasing policies.

* Information regarding materials or products "sold" that consist of recycled or reused materials or products is only required from owner(s) of retail shopping establishments and the owner(s) or operator(s) of large manufacturing establishments.

Please attach any additional page(s) as required to answer the above questions.

I hereby certify that the information provided in this Report of Waste Audit is complete and correct.

Ministry of the Environment Waste Form

Report of a Waste Reduction Work Plan

Industrial, Commercial and Institutional Establishments

As required by O. Reg. 102/94

This report must be prepared 6 months after becoming subject to O. Reg. 102/94 and a copy retained on file for at least five years after it is prepared, and be made available to the ministry upon request.

I. GENERAL INFORMATION

Name of Owner and/or Operator of Entity(ies) and Company Name: Metcalfe Realty Company Limited			
Name of Contact Person: Alain Morin		**Telephone #:** 613-563-4442	**Email Address:** amorin@metcalferealty.com
Street Address(es) of Entity(ies): 75 Albert Street			
Municipality: Ottawa, Ontario			
Type of Entity (check one)			
Retail Shopping Establishments		Hotels and Motels	
Retail Shopping Complexes		Hospitals	
Office Buildings	X	Educational Institutions	
Restaurants		Large Manufacturing Establishments	

Note: O. Reg. 102/94 does not apply to multi-unit residential buildings.

II. DESCRIPTION OF THE ENTITY

Provide a brief overview of the entity(ties):

This building is located at 75 Albert Street.

- **Total rentable area:** 160,290
- **Number of floors:** 11 floors plus two basement levels
- **Washrooms:** Men's and Women's washroom on each floor, barrier free at B-1 level.
- **Amenities:** On-site cafeteria, boardroom rental available for tenants. On major transit arteries for easy access from all parts of the City. Close to Parliament Hill, the Courthouse, the Central Business District, the National Arts Centre, the Ottawa Convention Centre, shopping, dining and major hotels. On-site storage lockers available for lease to tenants

.../2

III. PLANS TO REDUCE, REUSE AND RECYCLE WASTE

For each category of waste described in Part V of "Report of a Waste Audit" (on which this plan is based), explain what your plans are to Reduce, Reuse and Recycle the waste, including: 1) how the waste will be source separated at the establishment, and 2) the programs to reduce, reuse and recycle all source separated waste.

Waste Category (as stated in Part V of your "Report of a Waste Audit")	**Source Separation and 3Rs Program**
Example: *fine paper (e.g. from an office)*	*"Fine Paper 3Rs Program"* *Reduce: Staff will be encouraged to print on both sides of each sheet.* *Reuse: Discarded paper with print only on one side will be used for note pads/scrap.* *Recycle: Staff will be provided with instructions via email. Receptacles will be provided beside each desk. Staff will empty receptacles into centralized containers. Custodial staff will empty centralized containers into bulk container at loading dock for collection by recycling company.*
Aluminum food and beverage cans	Recycling receptacles provided in key areas throughout complex. Add new signage with text and pictures to all recycling/waste receptacles to help increase recycling. Encourage occupants to bring reusable food and beverage containers to work.
Cardboard	Remind staff and tenants to continue to break down boxes and place into appropriate recycling containers. Check to ensure no cardboard is placed in waste. Encourage re-use of boxes.
Fine Paper	Recycling receptacles provided in key areas throughout complex. Add new signage with text and pictures to all recycling/waste receptacles to help increase recycling. Provide tenants and staff with recommendations for reducing, re-using and recycling paper products.
Glass Food & beverage bottles	Same as Aluminum food and beverage cans
Newsprint	Same as Fine Paper
Steel food &beverage contain.	Same as Aluminum food and beverage cans
PET(1) plastic food/drink containers	Same as Aluminum food and beverage cans
HDPE (2) plastic jugs, crates, totes	Same as Aluminum food and beverage cans
LDPE(4)Plastic film	Bubble wrap part of the Take it Back program. Clear plastic in large quantities is recyclable
Polypropylene (5) PP	Same as Aluminum food and beverage cans
Organics	No current program. Consider initiating an organics collection program.
Boxboard, shoe boxes, cereal etc.	Same as Cardboard
Glossy magazines, flyers	Same as Fine Paper
Skids	Encourage re-use of skids or returning to supplier.
Paper Towels	Same as organics
Tetra (milk/juice) containers	Same as aluminum
Paper and waxed paper drink cups	Same as organics
Printer Cartridges	Tenants manage – return to supplier
IT equipment/Audio Visual	No current program. Tenants manage the recycling/ removal of all electronics.
Furniture	Tenants manage removal of furniture
Building Materials	Contractors manage removal of building materils
Disposable takeout food pkg.	Encourage tenants and staff to bring re-usable containers from home
Misc. Waste	Continue to educate tenants and staff on what materials are recyclable

IV. RESPONSIBILITY FOR IMPLEMENTING THE WASTE REDUCTION WORK PLAN

Identify who is responsible for implementing the Waste Reduction Work Plan at your entity(ies). If more than one person is responsible for implementation, identify each person who is responsible and indicate the part of the Waste Reduction Work Plan that each person is responsible for implementing.

Name of Person	**Responsibility**	**Telephone #**
Alain Morin	Operations Manger	613-563-4442

V. TIMETABLE FOR IMPLEMENTING WASTE REDUCTION WORK PLAN

Provide a timetable indicating when each Source Separation and 3Rs program of the Waste Reduction Work Plan will be implemented.	
Source Separation and 3Rs Program	**Schedule for Completion**
Example: *Fine Paper 3Rs Program*	*"Deskside receptacles and centralized containers to be purchased in March. New collection contract for recycling to be arranged for April Kick off for program and instructions to staff regarding 3Rs program to occur in April"* ***OR*** *"3Rs Program currently in place."*
Aluminum food and beverage cans	Continue with current 3R program. Send reminder to staff and tenants to increase participation
Cardboard	Same as Aluminum food and beverage cans
Fine Paper	Same as Aluminum food and beverage cans
Boxboard, shoe boxes, cereal etc.	Same as Aluminum food and beverage cans
Newsprint/packing paper	Same as Aluminum food and beverage cans
Glossy magazines, flyers	Same as Aluminum food and beverage cans
Glass Food and beverage bottles	Same as Aluminum food and beverage cans
Milk/Juice Boxes	Same as Aluminum food and beverage cans
Steel food & beverage containers	Same as Aluminum food and beverage cans
Misc. Metal	Same as Aluminum food and beverage cans
PET (1) plastic food and beverage containers	Same as Aluminum food and beverage cans
HDPE (2) plastic jugs, crates, totes, drums	Same as Aluminum food and beverage cans
LDPE (4) Plastic film, squeezable bottles	Same as Aluminum food and beverage cans
Organics	Investigate feasibility of implementing an organics collection program
Paper Towels	Same as Organics
It equipment/Audio Visual equipment	Tenants Manage
Wood/Skids	Same as Aluminum food and beverage cans
Tetra (milk/juice) containers	Same as Aluminum
Paper and waxed paper drink cups	Same as organics
Printer Cartridges	Tenants Manage
IT equipment/Audio Visual	Tenants Manage
Furniture	Tenants Manage
Building Materials	Contractors Manage

VI. COMMUNICATION TO STAFF, CUSTOMERS, GUESTS AND VISITORS

Explain how the Waste Reduction Work Plan will be communicated to employees, customers, tenants, guests/visitors and students:
Audit results to be posted in public areas. Details of revised recycling initiatives to be sent to tenants via email, newsletters and signage. Direct contact with employees.

.../4

VII. Estimated Waste Produced By Material Type And The Projected Amount

Material Categories *(as stated in Part III)*	**Estimated Annual Waste Produced** * *(kgs or tonnes)*	**Name of Proposed 3Rs Program** *(as stated in Part III)*	**Projections to Reduce, Reuse or Recycle Waste** *(kgs or tonnes)*			**Estimated Annual Amount to be Diverted** ** (%)
			Reduce	**Reuse**	**Recycle**	
Example: Fine Paper	*1.8 tonnes*	*Fine Paper 3Rs Program*	*200 kg*	*100 kg*	*1.2 tonnes*	*83*
Aluminum food and beverage cans	.22	Aluminum 3R program	n/a	n/a	.07	31.8
Cardboard	2.7	Cardboard 3 R	n/a	n/a	2.55	94.4
Fine Paper	11.57	Fine Paper 3 R	n/a	n/a	10.67	92.2
Boxboard, shoe boxes, cereal etc.	.96	Boxboard 3 R	n/a	n/a	.33	34.4
Newsprint/packing paper	1.08	Newsprint 3 R	n/a	n/a	.99	91.7
Glossy magazines, flyers	1.93	Magazine 3 R	n/a	n/a	1.9	98.4
Glass Food and beverage bottles	.01	Glass 3 R	n/a	n/a	.01	100
Steel food & beverage containers	.12	Steel 3 R	n/a	n/a	.01	8.3
PET (1) plastic food and beverage containers	.49	Plastic 3 R	n/a	n/a	.11	22.4
HDPE (2) Plastic jugs/crates	.28	Plastic 3 R	n/a	n/a	.02	7.1
LDPE (4) Plastic film, squeezable bottles	.01	n/a	n/a	n/a	n/a	n/a
Polypropylene (5)pp	.13	n/a	n/a	n/a	.06	46.2
Polystyrene (6)	.25	n/a	n/a	n/a	n/a	n/a
Organics	5.38	n/a	n/a	n/a	n/a	n/a
Paper Towels	4.22	n/a	n/a	n/a	.05	1.2
Wood	n/a	n/a	n/a	n/a	n/a	n/a
Tetra (milk/juice) containers	.29	Tetra 3 R	n/a	n/a	.11	37.9
Paper & waxed paper drink cups	.63	n/a	n/a	n/a	n/a	n/a
Steel	n/a	n/a	n/a	n/a	n/a	n/a
Skids	n/a	n/a	n/a	n/a	n/a	n/a
Printer cartridges	n/a	Printer Cartridges 3R	n/a	n/a	n/a	n/a
IT Equipment/Audio Visual	.24	IT 3R	n/a	n/a	0	0
Furniture	n/a	n/a	n/a	n/a	n/a	n/a
Disposable takeout food packaging	1.16	n/a	n/a	n/a	n/a	n/a
Other: misc. waste	4.79	n/a	n/a	n/a	.28	n/a
TOTAL	36.24		n/a	n/a	17.16	44.6%

* Estimated Waste Produced = Waste Diverted (3Rs) + Waste Disposed

** Estimated Waste Diversion Rate = Amount of Waste Diverted (3Rs) ÷ Estimated Waste Produced x 100%

I hereby certify that the information provided in this Waste Reduction Work Plan is complete and correct.

Ministry of the Environment Waste Form

Report of a Waste Audit

Industrial, Commercial and Institutional Establishments

As required by O. Reg. 102/94

- ***This report must be prepared 6 months after becoming subject to O. Reg. 102/94 and a copy retained on file for at least five years after it is prepared, and be made available to the ministry upon request.***
- ***For large construction and demolition projects, please refer to the forms included with "A Guide to Waste Audits and Waste Reduction Work Plans for Construction and Demolition Projects as Required Under Ontario Regulation 102/94"* (revised July 2008)**

I. GENERAL INFORMATION

Name of Owner and/or Operator of Entity(ies) and Company Name: Metcalfe Realty Company Limited		
Name of Contact Person: Alain Morin	**Telephone #:** 613-563-4442	**Email address:** amorin@metcalferealty.com
Street Address(es) of Entity(ies): 85 Albert Street		
Municipality: Ottawa-Carleton		

Type of Entity (check one)			
Retail Shopping Establishments		Hotels and Motels	
Retail Shopping Complexes		Hospitals	
Office Buildings	X	Educational Institutions	
Restaurants		Large Manufacturing Establishments	

Note: O. Reg. 102/94 does not apply to multi-unit residential buildings.

II. DESCRIPTION OF ENTITY

Provide a brief overview of the entity(ies):

This building is located at 85 Albert Street.

PHYSICAL PROPERTIES

- **Total rentable area**: 89,339
- **Number of floors**: 16 floors
- **Washrooms**: Men's and Women's washroom on each floor, barrier free on ground floor

.../2

III. How Waste is Produced And Decisions Affecting the Production of Waste

For each category of waste that is produced at the entity(ies), explain how the waste will be produced and how management decisions and policies will affect the production of waste.	
Categories of Waste	**How Is the Waste Produced and What Management Decisions/Policies Affect Its Production?**
Example: Disposable Food Packaging	***Generated by customers eating inside restaurant. Food packaging is used for health reasons. Reusable mugs for customers consuming coffee/tea inside restaurant is being reviewed.***
Aluminum food and beverage cans	Brought in by tenants from outside sources or from food service areas within building.
Cardboard	Generated as part of packaging for occupant and facility management supplies
Fine paper	Generated as part of office operations.
Glass Food and beverages bottles	Brought in by tenants from outside sources or from food service areas within building.
Newsprint	Generated by tenants from outside sources.
Steel food and beverage cans	Brought in by tenants from outside sources or from food service areas within building
PET (#1) plastic food and beverage bottles	Brought in by tenants from outside sources or from food service areas within building
HDPE (#2) plastic jugs, crates, totes,drums	Generated by food service areas within building
LDPE (#4) plastic film (shrink wrap)	Generated as packaging for various office supplies and food packaging
Polystyrene (#6)	Brought in by tenants from outside sources or from food service areas within building
Organics	Brought in by tenants from outside sources or from food service areas within building
Boxboard/shoe box, cereal, etc.	Same as cardboard
Glossy magazines, catalogues, flyers	Generated by tenants from outside sources.
Tetra (milk/Juice) containers	Same as Aluminum
Paper and waxed paper drink cups	Same as organics
Egg Carton (cardboard)	Same as cardboard
Skids	Occasionally brought in for building maintenance supplies
Paper towels	Generated in washrooms, food service areas and by housekeeping for cleaning purposes
Printer cartridges	Generated as part of office operations for printers/faxes
IT Equipment/Audio Visual	Tenants are responsible for disposal of Electronics
Furniture	Tenants are responsible for disposal of furniture
Building/renovation material	Contractors manage
Printer cartridges	Generated as part of office operations for printers/faxes
Disposable Take out food Containers	Brought in by tenants from outside sources or from food service areas within building.
Other: Misc Waste	Generated by tenants as part of office operations

Note: When completing this form, write "n/a" in the columns where the entity will not produce any waste for a category of waste.

./3

IV. MANAGEMENT OF WASTE

For each category of waste listed below, indicate which waste items will be disposed or reused/recycled and how each item will be managed at the entity(ies).		
Category	**Waste to be Disposed**	**Reused or Recycled Waste**
Example: Beverage cans	***Staff/clients may place in garbage bins***	***Staff/clients place cans in recycling receptacles. Collection staff later collect cans. Those in garbage are disposed; those in recycling receptacles are recycled.***
Aluminum food and beverage cans	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup
Cardboard	Tenants may place in waste	Maintenance staff flatten, place in designated area in parking garage until pick up day
Fine paper	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup (some shredded)
Glass food & beverage bottles/jars	Same as Aluminum	Same as Aluminum
Newsprint	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup
Steel food and beverage cans	Same as Aluminum	Same as Aluminum
PET (#1) plastic food and beverage bottles	Same as Aluminum	Same as Aluminum
HDPE (#2) plastic jugs, crates, totes and drums	Same as aluminum	Same as Aluminum
LDPE (#4) plastic film	Placed in waste containers	Tenants place in waste bins, maintenance staff bring to compactor shared by 75 Albert Street.
Polystyrene (#6)	Placed in waste containers	Same as LDPE (#4)
Organics	Placed in waste containers	Same as LDPE (#4)
Boxboard shoe boxes, cereal boxes, etc.	Tenants may place in waste	Same as Cardboard
Glossy magazines/catalogues/flyer	Tenants may place in waste	Tenants place in recycling bins, maintenance staff bring to totes in parking garage for recycling pickup
Tetra (milk/Juice) containers	Tenants may place in waste	Same as aluminum
Paper and waxed paper drink cups	Placed in waste containers	These items would be acceptable for green bin collection
Egg Carton (cardboard)	Tenants may place in waste	Same as cardboard
Skids	n/a	Reused/recycled
Paper Towels	Placed in waste containers	Same as LDPE (#4)
Printer cartridges	n/a	Tenants manage
IT equipment/Audio Visual	n/a	Tenants Manage
Furniture	n/a	Tenants Manage
Building/renovation material	Contractors manage	Contractors manage
Disposable take out food pkg	Placed in waste containers	Same as LDPE (#4)
Other: Misc. Waste	Placed in waste containers	Same as LDPE (#4)

Note: When completing this form, write "n/a" in the columns where the entity will not produce any waste for a category of waste.

Note: When completing this form, write "n/a" in the "Estimated Amount of Waste Produced" column where the entity will not produce any waste for a category of waste.

* Fill out these columns each year following the initial waste audit or baseline year to determine the progress that is being made by your waste reduction program.

890008

VI. Extent to Which Materials or Products Used Or Sold By the Entity Consist of Recycled or Reused Materials or Product

Please answer the following questions:

1. Do you have a management policy in place that promotes the purchasing and/or use of materials or products that consist of recycled and/or reused materials or products? If yes, please describe.

   Tenants manage their own purchasing policies

2. Do you have plans to increase the extent to which materials or products used or sold* consist of recycled or reused materials or products? If yes, please describe.

   Tenants manage their own purchasing policies.

* Information regarding materials or products "sold" that consist of recycled or reused materials or products is only required from owner(s) of retail shopping establishments and the owner(s) or operator(s) of large manufacturing establishments.

Please attach any additional page(s) as required to answer the above questions.

I hereby certify that the information provided in this Report of Waste Audit is complete and correct.		
Signature of authorized official: Alain Morin	**Title:** Operations Manager	**Date:** October 31, 2012

Ministry of the Environment Waste Form

Report of a Waste Reduction Work Plan

Industrial, Commercial and Institutional Establishments

As required by O. Reg. 102/94

This report must be prepared 6 months after becoming subject to O. Reg. 102/94 and a copy retained on file for at least five years after it is prepared, and be made available to the ministry upon request.

I. GENERAL INFORMATION

Name of Owner and/or Operator of Entity(ies) and Company Name: Metcalfe Realty Company Limited		
Name of Contact Person: Alain Morin	**Telephone #:** 613-563-4442	**Email Address:** amorin@metcalferealty.com
Street Address(es) of Entity(ies): 85 Albert Street		
Municipality: Ottawa, Ontario		

Type of Entity (check one)			
Retail Shopping Establishments		Hotels and Motels	
Retail Shopping Complexes		Hospitals	
Office Buildings	X	Educational Institutions	
Restaurants		Large Manufacturing Establishments	

Note: O. Reg. 102/94 does not apply to multi-unit residential buildings.

II. DESCRIPTION OF THE ENTITY

Provide a brief overview of the entity(ties):

This building is located at 85 Albert Street

PHYSICAL PROPERTIES

- **Total rentable area**: 89,339
- **Number of floors**: 16 floors
- **Washrooms**: Men's and Women's washroom on each floor

.../2

III. PLANS TO REDUCE, REUSE AND RECYCLE WASTE

For each category of waste described in Part V of "Report of a Waste Audit" (on which this plan is based), explain what your plans are to Reduce, Reuse and Recycle the waste, including: 1) how the waste will be source separated at the establishment, and 2) the programs to reduce, reuse and recycle all source separated waste.

Waste Category (as stated in Part V of your "Report of a Waste Audit")	**Source Separation and 3Rs Program**
Example: fine paper (e.g. from an office)	*"Fine Paper 3Rs Program"* *Reduce: Staff will be encouraged to print on both sides of each sheet.* *Reuse: Discarded paper with print only on one side will be used for note pads/scrap.* *Recycle: Staff will be provided with instructions via email. Receptacles will be provided beside each desk. Staff will empty receptacles into centralized containers. Custodial staff will empty centralized containers into bulk container at loading dock for collection by recycling company.*
Aluminum food and beverage cans	Recycling receptacles provided in key areas throughout complex. Add new signage with text and pictures to all recycling/waste receptacles to help increase recycling. Encourage occupants to bring reusable food and beverage containers to work.
Cardboard	Remind staff and tenants to continue to break down boxes and place into appropriate recycling containers. Check to ensure no cardboard is placed in waste. Encourage re-use of boxes.
Fine Paper	Recycling receptacles provided in key areas throughout complex. Add new signage with text and pictures to all recycling/waste receptacles to help increase recycling. Provide tenants and staff with recommendations for reducing, re-using and recycling paper products.
Glass Food & beverage bottles	Same as Aluminum food and beverage cans
Newsprint	Same as Fine Paper
Steel food &beverage contain.	Same as Aluminum food and beverage cans
PET(1) plastic food/drink containers	Same as Aluminum food and beverage cans
HDPE (2) plastic jugs, crates, totes	Same as Aluminum food and beverage cans
LDPE(4)Plastic film	Bubble wrap part of the Take it Back program. Clear plastic in large quantities is recyclable
Polypropylene (5) PP	Same as Aluminum food and beverage cans
Organics	No current program. Consider initiating an organics collection program.
Boxboard, shoe boxes, cereal etc.	Same as Cardboard
Glossy magazines, flyers	Same as Fine Paper
Skids	Encourage re-use of skids or returning to supplier.
Paper Towels	Same as organics
Tetra (milk/juice) containers	Same as aluminum
Paper and waxed paper drink cups	Same as organics
Printer Cartridges	Tenants manage – return to supplier
IT equipment/Audio Visual	No current program. Tenants manage the recycling/ removal of all electronics.
Furniture	Tenants manage removal of furniture
Building Materials	Contractors manage removal of building materils
Disposable takeout food pkg.	Encourage tenants and staff to bring re-usable containers from home
Misc. Waste	Continue to educate tenants and staff on what materials are recyclable

IV. RESPONSIBILITY FOR IMPLEMENTING THE WASTE REDUCTION WORK PLAN

Identify who is responsible for implementing the Waste Reduction Work Plan at your entity(ies). If more than one person is responsible for implementation, identify each person who is responsible and indicate the part of the Waste Reduction Work Plan that each person is responsible for implementing.

Name of Person	**Responsibility**	**Telephone #**
Alain Morin	Operations Manger	613-563-4442

V. TIMETABLE FOR IMPLEMENTING WASTE REDUCTION WORK PLAN

Provide a timetable indicating when each Source Separation and 3Rs program of the Waste Reduction Work Plan will be implemented.	
Source Separation and 3Rs Program	**Schedule for Completion**
Example: *Fine Paper 3Rs Program*	*"Deskside receptacles and centralized containers to be purchased in March. New collection contract for recycling to be arranged for April Kick off for program and instructions to staff regarding 3Rs program to occur in April"* ***OR*** *"3Rs Program currently in place."*
Aluminum food and beverage cans	Continue with current 3R program. Send reminder to staff and tenants to increase participation
Cardboard	Same as Aluminum food and beverage cans
Fine Paper	Same as Aluminum food and beverage cans
Boxboard, shoe boxes, cereal etc.	Same as Aluminum food and beverage cans
Newsprint/packing paper	Same as Aluminum food and beverage cans
Glossy magazines, flyers	Same as Aluminum food and beverage cans
Glass Food and beverage bottles	Same as Aluminum food and beverage cans
Milk/Juice Boxes	Same as Aluminum food and beverage cans
Steel food & beverage containers	Same as Aluminum food and beverage cans
Misc. Metal	Same as Aluminum food and beverage cans
PET (1) plastic food and beverage containers	Same as Aluminum food and beverage cans
HDPE (2) plastic jugs, crates, totes, drums	Same as Aluminum food and beverage cans
LDPE (4) Plastic film, squeezable bottles	Same as Aluminum food and beverage cans
Organics	Investigate feasibility of implementing an organics collection program
Paper Towels	Same as Organics
It equipment/Audio Visual equipment	Tenants Manage
Wood/Skids	Same as Aluminum food and beverage cans
Tetra (milk/juice) containers	Same as Aluminum
Paper and waxed paper drink cups	Same as organics
Printer Cartridges	Tenants Manage
IT equipment/Audio Visual	Tenants Manage
Furniture	Tenants Manage
Building Materials	Contractors Manage

VI. COMMUNICATION TO STAFF, CUSTOMERS, GUESTS AND VISITORS

Explain how the Waste Reduction Work Plan will be communicated to employees, customers, tenants, guests/visitors and students:
Audit results to be posted in public areas. Details of revised recycling initiatives to be sent to tenants via email, newsletters and signage. Direct contact with employees.

.../4

VII. Estimated Waste Produced By Material Type And The Projected Amount

Material Categories *(as stated in Part III)*	Estimated Annual Waste Produced * *(kgs or tonnes)*	Name of Proposed 3Rs Program *(as stated in Part III)*	Projections to Reduce, Reuse or Recycle Waste *(kgs or tonnes)*			Estimated Annual Amount to be Diverted ** (%)
			Reduce	Reuse	Recycle	
Example: Fine Paper	*1.8 tonnes*	*Fine Paper 3Rs Program*	*200 kg*	*100 kg*	*1.2 tonnes*	*83*
Aluminum food and beverage cans	.32	Aluminum 3R program	n/a	n/a	.06	50
Cardboard	3.94	Cardboard 3 R	n/a	n/a	3.91	99.2
Fine Paper	7.53	Fine Paper 3 R	n/a	n/a	7.24	96.1
Boxboard, shoe boxes, cereal etc.	.49	Boxboard 3 R	n/a	n/a	.29	59.2
Newsprint/packing paper	1.94	Newsprint 3 R	n/a	n/a	1.75	90.2
Glossy magazines, flyers	2.82	Magazine 3 R	n/a	n/a	2.82	100
Glass Food and beverage bottles	.05	Glass 3 R	n/a	n/a	.01	20
Steel food & beverage containers	.07	Steel 3 R	n/a	n/a	.03	42.9
PET (1) plastic food and beverage containers	.66	Plastic 3 R	n/a	n/a	.53	80.3
HDPE (2) Plastic jugs/crates	.59	Plastic 3 R	n/a	n/a	.09	15.3
LDPE (4) Plastic film, squeezable bottles	.01	Plastic 3R	n/a	n/a	0	0
Polypropylene (5)pp	.26	Plastic 3R	n/a	n/a	n/a	n/a
Polystyrene (6)	n/a	n/a	n/a	n/a	n/a	n/a
Organics	4.21	n/a	n/a	n/a	.04	1
Paper Towels	4.05	n/a			n/a	n/a
Wood	n/a	Wood 3R	n/a	n/a	n/a	n/a
Tetra (milk/juice) containers	.11	Tetra 3 R	n/a	n/a	.04	36.4
Paper & waxed paper drink cups	.63	n/a	n/a	n/a	.04	6.6
Steel	n/a	n/a	n/a	n/a	n/a	n/a
Skids	n/a	n/a	n/a	n/a	n/a	n/a
Printer cartridges	.04	Printer Cartridges 3R	n/a	n/a	0	0
IT Equipment/Audio Visual	.08	IT 3R	n/a	n/a	0	0
Disposable takeout food packaging	.29	n/a	n/a	n/a	n/a	0
Clothing/textiles	n/a	n/a	n/a	n/a	n/a	n/a
Batteries	n/a	Batteries 3R	n/a	n/a	n/a	n/a
Other, misc. waste	3.57	n/a	n/a	n/a	n/a	0
TOTAL	31.44		n/a	n/a	16.85	53.60%

* Estimated Waste Produced = Waste Diverted (3Rs) + Waste Disposed

** Estimated Waste Diversion Rate = Amount of Waste Diverted (3Rs) ÷ Estimated Waste Produced x 100%

I hereby certify that the information provided in this Waste Reduction Work Plan is complete and correct.

City of Ottawa Historic Land Use Inventory (HLUI)

File Number: D06-03-26-0035

April 8, 2026

Luke Lopers
Lopers & Associates

Dear Luke Lopers,

Re: Information Request
85 Albert Street**, Ottawa, Ontario ("Subject Property")**

Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City's Environmental Remediation Unit (ERU) does not have any environmental records for this property
- **Sewer Use Program:** No information found.
- **Solid Waste Services:** No information found pertaining to the subject property.
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website: https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx

Documents Provided:

HLUI Summary Report and HLUI Map

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('26-0035 HLUI Summary report.xlsx'), please refer to the Overview and User Guide."

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at https://ero.ontario.ca/ contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Ottawa Public Health

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: Public Health Inspections - Ottawa Public Health

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any

purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact HLUI@ottawa.ca.

Sincerely,

Asiya Ali ***(she/her)***

Qualifications of Assessors

PROFILE

Mr. Lopers is an environmental engineer with over 17 years of experience in environmental consulting, specializing in due diligence investigations. Mr. Lopers has extensive experience in Phase I and II Environmental Site Assessments; environmental remediation direction and supervision; record of site condition submissions; asset inventory; designated substance surveys and abatement projects; environmental expertise on legal issues; and coordination of various monitoring programs (groundwater, surface water, air).

Mr. Lopers has a strong commitment to health and safety, having experience leading a regional health and safety committee as a certified employee representative and Ottawa office safety captain. Mr. Lopers has extensive training including OSHA 40-hour HAZWOPER, ASP Health and Safety on Construction Sites in Quebec, Ontario Working at Heights, Emergency First Aid/CPR and WHMIS.

LOPERS & ASSOCIATES

EDUCATION

University of Waterloo,
B.A.Sc., Honours Environmental Engineering
Management Science Option Designation - 2002 - 2008

PROFESSIONAL EXPERIENCE

Lopers & Associates, Principal, Project Manager, Senior Environmental Engineer
Ottawa, Ontario - 2020–Present
Responsible for the management, coordination, supervision, completion and delivery of Phase I/1 and II/2 Environmental Site Assessments, Environmental Remediation Programs, Environmental litigation support, Designated Substance Surveys, scope of work development, cost estimates and proposals

GHD Limited, Project Manager, Senior Environmental Engineer
Ottawa, Ontario - 2013–2020
Responsible for the management, senior technical review, coordination, supervision, completion and delivery of Phase I/1 and II/2 Environmental Site Assessments, Environmental Remediation Programs, Environmental litigation support, Designated Substance Surveys, scope of work development, cost estimates and proposals
Office Safety Captain and Joint Health and Safety Committee team leader

Paterson Group Inc., Project Manager, Environmental Engineer
Ottawa, Ontario - 2009–2013
Responsible for supervision, completion and review for Phase I/1 and II/2 Environmental Site Assessments, Environmental Remediation Programs, Designated Substance Surveys

NEXT Environmental Inc., Site Investigation Staff
Burnaby, British Columbia - 2008–2009
Responsible for fieldwork and reporting for Stage/Phase I and II Environmental Site Assessments, Environmental Remediation Programs

PROFESSIONAL DESIGNATIONS

Licensed Professional Engineer (P.Eng.) with Professional Engineers Ontario (PEO) since 2012

Qualified Person (QP), Environmental Site Assessments with Ontario Ministry of the Environment, Conservation and Parks

SELECT LIST OF CLIENTS

Ottawa Community Housing Corporation
Brigil Construction
Willms & Shier Environmental Lawyers LLP

RECENT & RELEVANT PROJECT EXPERIENCE

Phase One Environmental Site Assessments

Project Engineer/ Project Manager & Site Assessor | Various Clients | Ottawa, Ontario | 2020-2024

Mr. Lopers has completed 18 Phase One Environmental Site Assessments since starting Lopers & Associates 2020. Several of these Phase One ESA Sites progressed to subsequent stages of investigation and remediation, which is discussed in further detail in the sections below.

Project Engineer / Manager & Site Assessor | Various Clients | Ottawa & GTA, ON, Vancouver, BC | 2006-2020

Prior to starting Lopers & Associates in 2020, Mr. Lopers completed over 250 Phase One/I Environmental Site Assessments in 3 large urban centers in Canada including Ottawa, Toronto and Vancouver. Mr. Lopers developed Phase One Environmental Site Assessment Report templates for 3 unaffiliated Engineering companies.

Phase Two Environmental Site Assessments

Project Engineer/ Environmental Project Manager & Site Supervisor | Various Clients | Ottawa, Ontario | 2020-2024

Coordination & Field Supervision consisting of meeting with underground service locators, determining investigation locations, supervising and directing drilling subcontractors, logging soil profiles for borehole logs, daily field notes and subcontractor timesheets. Also completed independent field elevation surveys and groundwater sampling in active pedestrian traffic areas.
Project Engineer/Manager for the following Phase Two ESA field investigation and/or environmental delineation and environmental remediation programs and other Site Investigations:

- Former Canex Fuel Outlet and Residential Lands, Former CFB Rockliffe, Ottawa Community Housing Corporation.
- Former Petro Canada Retail Fuel Outlet, Automotive Service Garage and Commercial Lands, Ridgewood Avenue, Brigil Construction.
- Former Urban Waste Disposal Site and Operational Commercial Lands, DuMaurier Avenue, Brigil Construction.
- Residential Properties (regional dNAPL groundwater concerns), Parkdale Avenue, Homestead Developments Corporation.
- Former Private Fuel Outlet and Construction & Equipment Rental Yard and Service Garage, 2940 Baseline Road, Brigil Construction.
- Former historic lumberyard, Central Bus Terminal and Fuel Outlet, 265 Catherine Street, Brigil Construction.
- Residential Property (adjacent up-gradient dry-cleaner APEC), Penfield Avenue, Ottawa Community Housing Corporation.
- Former Private Fuel Outlet and Contractor's Yard, Ogilvie & Cummings Avenue, Lux Place LP.
- Former Residential Developments with historic USTs, poor environmental quality fill materials and/or in vicinity to off-Site VOC groundwater plume, Gladstone Avenue & Rochester Street, Ottawa Community Housing Corporation.

Environmental Remediation Programs (Lopers & Associates)

Project Engineer/ Environmental Project Manager & Site Supervisor / Client/Owner Advisor | Various Clients | Ottawa, Ontario | 2021-2024

Coordination & Field Supervision consisting of supervising and directing excavation/remediation subcontractors, logging trucking information for off-Site disposal, daily field notes and subcontractor invoice review and approval. Independent determination of remediation extents based on field soil and groundwater sampling in active remediation/excavation under timeline constricted conditions. Filing of Record of Site Conditions with Ontario Ministry of Environment, Conservation and Parks.

- Former Private Fuel Outlet and Construction & Equipment Rental Yard and Service Garage, Baseline Road, Brigil Construction.
    - Site Environmental Project Experience dating back to 2009, with 2 unaffiliated property owners and Mr. Lopers practicing Professional Engineering for 3 unaffiliated Engineering companies.
- Former Private Fuel Outlet and Contractor's Yard, Ogilvie & Cummings Avenue, Lux Place LP.
    - Project Experience dating back to 2011, with several changes in ownership structure and with Mr. Lopers practicing Professional Engineering for 3 unaffiliated Engineering companies.
    - Site Remediation Complete, RSC #: B-403-1823439436

    - Lopers assisted the Client with regulatory approvals and in obtaining municipal brownfields redevelopment grant funding as part of Site remediation/redevelopment.
- Former lumberyard, Central Bus Terminal and Fuel Outlet, Catherine Street, Brigil Construction.
    - Project Experience dating back to 2010, with 2 unaffiliated property owners and with Mr. Lopers practicing Professional Engineering for 2 unaffiliated Engineering companies.
    - Environmental Remediation Plan prepared by Mr. Lopers Fuel terminal remediation February-April 2024. UST removal, bulk soil excavation, groundwater pump & treat & discharge to municipal storm sewer under SSA. Post-remediation groundwater monitoring in progress to support RSC application (2025)
    - Lopers is also assisting the Client with regulatory approvals and in obtaining municipal brownfields redevelopment grant funding as part of Site remediation/redevelopment.
- Former Retail Fuel Outlet and Automotive Service Garage, Ridgewood, Brigil Construction.
    - Environmental Remediation Plan prepared by Mr. Lopers Fuel remediation June-October 2024. Bulk soil excavation and off-Site disposal. Post-remediation groundwater monitoring in progress to support RSC application (2025)
    - Lopers is also assisting the Client with obtaining municipal brownfields redevelopment grant funding as part of Site remediation/redevelopment.
- Former Residential Developments with historic USTs, poor environmental quality fill materials and/or in vicinity to off-Site VOC groundwater plume, Gladstone Avenue & Rochester Street, Ottawa Community Housing Corporation.
    - Environmental Remediation Plan prepared by Mr. Lopers poor environmental quality fill remediation September-October 2024 (periodically on-goint). Bulk soil excavation and off-Site disposal.
    - Lopers is also assisting the Client with verification of contractor quantities and rates for disposal of contaminated soil.

Designated Substance Surveys

Project Manager for portfolio Designated Substance Surveys and Hazardous Building Materials Assessment | Ottawa, Pembroke, Southeastern Ontario | 2010- 2024

- DSSs at various municipal facilities for the City of Pembroke, Pembroke, Ontario. Preparation of Asbestos Management Plan. Supervised 3 staff (remotely from Ottawa) completing DSS on 10 municipal facilities.
- HBMAs at various institutional buildings for the Catholic District School Board of Eastern Ontario, Southeastern Ontario. Supervised 2-3 staff (remotely from Ottawa) complete 10-20 DSS on schools and maintenance buildings, generally after hours or on weekends.

Project Manager for asbestos containing material (ACM) surveys, designated substance surveys (DSSs), Hazardous Building Materials Assessments (HBMAs) or mould assessments at the following sites:

- DSSs and ACM surveys at various residential, buildings (dwellings and apartment buildings) for private residential clients, Ottawa, Ontario.
- DSS and abatement oversight and contractor approvals during demolition, residential buildings (townhouses) for Ottawa Community Housing Corporation, 818 Gladstone Avenue, Ottawa, Ontario.
    - Completed contractor compliance oversight and daily field inspection reports. Provided additional recommendations when warranted.
- DSS for residential buildings (townhouses) for Ottawa Community Housing Corporation, 66-82 Finch Private, Ottawa, Ontario.
- DSS for residential buildings (adjoining rooming houses) for Ottawa Community Housing Corporation, 214-224 Somerset Street East, Ottawa, Ontario.
- DSS commercial building (Central Bus Terminal) for Brigil Construction, 265 Catherine Street, Ottawa, Ontario.
- DSS commercial buildings (2 Commercial Plaza buildings) for Brigil Construction, 729 Ridgewood Avenue, Ottawa, Ontario.

Environmental Litigation Support

Project Manager, Field Engineer, Expert Witness l Ottawa, Ontario | 2014-2020

Project Manager, Field Engineer and Expert Witness for a fuel spill, remediation program, groundwater monitoring program and litigation review for redevelopment of a residential property adjacent to a central heating plant at an institutional facility.

- Coordination & Field Supervision consisting of meeting with underground service locators, determining investigation locations, supervising and directing drilling and remediation subcontractors, logging soil profiles for borehole logs, daily field notes and subcontractor timesheets. Also completed independent field elevation surveys and groundwater sampling.

Project Manager, Field Engineer, Expert Witness l Gladstone Avenue, Ottawa, Ontario | 2021-2023

Project Manager, Field Engineer and Expert Witness for assessment of damages resulting from temporary expropriation of residential lands for industrial use (Bridge Construction).

- Coordination & Field Supervision consisting of determining investigation locations, supervising and directing drilling subcontractors, logging soil profiles for borehole logs. Also completed independent field elevation surveys and groundwater sampling. Completed environmental investigation, remediation and management cost estimates for different scenarios to determine incremental costs resulting from Site occupancy.

Select Federal and Provincial Experience

- Field Engineer, PWGSC representative for monitoring access road reconstruction, asset inventory, camp drainage assessment, reservoir construction progress monitoring l Outcome Consultants (PWGSC) l Governmental Facilities, Eureka, Nunavut l June 2022

- Environmental Project Manager, Field Assessor for UST removal, DSS, Abatement Review & Compliance Monitoring l BGIS (PWGSC) l CRA Taxation & Data Centre, 875 Heron Road, Ottawa, Ontario l 2017-2019

- Environmental Project Manager, Field Assessor for Project Specific DSSs l BGIS (PWGSC) l 20 to 30 buildings in Ottawa & Gatineau l 2016-2019

- Environmental Project Manager, Field Assessor for Environmental Compliance Audit l BGIS (PWGSC) l Tunney's Pasture (select facilities), Ottawa, Ontario l 2016

- Planning Coop Student for Executive Assistant to Director of Ministry of Transportation l St. Catharines, Ontario l 2003

Natasha Corrin

M.A.Sc., P.Eng., QP_{RA}
Senior Risk Assessor

CORRIN
ENVIRONMENTAL CONSULTING

Areas of Specialty

Areas of expertise include Human Health Risk Assessment, Ecological Risk Assessment and Risk Management for contaminated sites and environmental impact assessments.

Professional Memberships and Affiliations

Professional Engineer #100079432, Professional Engineers Ontario, 2005-present
Qualified Person for Risk Assessment, Ontario, 2011 - present

Education

M.A.Sc. Chemical Engineering, University of Waterloo, 1999
B.Eng. Chemical Engineering, McGill University, 1997
Graduate Course Engineering Risk Assessment, University of Idaho, 2010

Experience

Ms. Corrin is a professional engineer and senior risk assessor with over 20 years of experience in environmental consulting. She reviews and carries out projects related to human health and ecological risk assessment and risk management for contaminated sites. In this role, her responsibilities include planning and designing site specific human health and ecological risk assessments, particularly complex risk assessments that involve consumption of country foods and/or emerging contaminants. She provides senior technical advice and oversight to project teams and acts as the senior technical lead for risk assessment on complex multi-disciplinary projects. She has been responsible for developing standard operating procedures including those for the collection and brewing of Labrador tea according to traditional methods as well as the collection of various types of vegetation for human and animal consumption. Additionally, she has conducted peer reviews on behalf of Public Works and Government Services Canada and the Department of National Defence. Ms. Corrin is designated as a Qualified Person for Risk Assessment (QP_{RA}) in Ontario and has worked on numerous risk assessments under Ontario Regulation 153/04, successfully receiving approval under the regulatory process. Ms. Corrin believes in a holistic approach to managing contaminated sites and collaborates closely with clients and other stakeholders on projects so that objectives are achieved efficiently.

Risk Assessments

Soil Vapour and Indoor Air Quality Assessment, Residential Development, Etobicoke Ontario. Senior Risk Assessor, 2022
Corrin Environmental Consulting evaluated sub-slab vapour data and indoor air quality data related to a historical fuel spill below a residential building. Work included providing technical input into the sampling programs, comparing data to Ontario Health Based Indoor Air Criteria and providing recommendations for additional work.

Modified Generic Risk Assessment, Site in Brantford, Ontario. Qualified Person for Risk Assessment, 2021-2022
Completed a Tier 2 Risk Assessment for a client where land use was changing from commercial to residential. Liaised with MECP District Engineer and Standards Development Branch. The main source of contamination was material used to infill the Grand River in the 1880s. MGRA received approval from the MECP and the client was able to obtain their RSC for the site.

Tier 3 Risk Assessment under O.Reg. 153/04, Site in Ottawa, Ontario. Qualified Person for Risk Assessment, 2022
Completed a Pre-Submission Form and Tier 3 Risk Assessment for a client where land use was changing from commercial to residential. Liaised with MECP District Engineer and Standards Development Branch. The main contaminants were chlorinated solvents in groundwater in a complex hydrogeological

environment. The contamination was from an upgradient, off-site source, and the site is part of a larger area designated by the City of Ottawa as an Environmental Risk Management Area due to the contaminated groundwater. Groundwater migration is complicated by dewatering associated with the presence of the Light Rail Train adjacent to the site. Non-standard delineation was applied at the site.

Human Health Risk Assessment for the Iqaluit Main Power Plant. Iqaluit, Nunavut. Qulliq Energy Corporation. Senior Risk Assessor, 2022.
Evaluated if human health risks could be present at the site due to historical fuel spills. Quantitatively evaluated risks associated with the inhalation pathway inside the plant and provided recommendations for additional work to reduce uncertainties.

Due Diligence Risk Assessment, Development Site in Ottawa, Ontario. Senior Risk Assessor, 2021
Completed a due diligence risk assessment for a development in Ottawa where a residence was being demolished and the site was being developed into a multi-unit property. Evaluated potential risks at the site and recommended risk management measures. Assessment was used to satisfy lender requirements related to financing the project.

Human Health and Ecological Risk Assessment, Ottawa, Ontario. Senior Risk Assessor, QP_{RA}, 2011-2018
Conducted human health and ecological risk assessment for numerous sites under O.Reg. 153/04. Tasks included preparation and submission of Pre-Submission Form and completion of Risk Assessment including hazard assessment, problem formulation, toxicity assessment and risk characterization. Developed Risk Management Plans. Contaminants of concern at the sites have included VOCs, PAHs, PHCs, metals, and methane. Some of the sites have been considered sensitive due to high or low pH and presence of species at risk.

Various Due Diligence Risk Assessments for Real Estate Clients, Ontario – GWLRA. Risk Assessor, 2011-2015
Ms. Corrin has conducted numerous due diligence risk assessments for real estate clients for the purpose of financing or re-financing their sites as well as for satisfying requirements of the insurers.

Residential Development, Ottawa, Ontario – Claridge. Senior Risk Assessor, 2015
QP_{RA} for a risk assessment at a residential high-rise development in downtown Ottawa. The site had been impacted by upgradient chlorinated solvents. Ms. Corrin is the technical director and reviewer for the risk assessment. Ms. Corrin used a pro-active approach engaging local district engineers resolving issues related to risk management and off-site migration of contaminants early in the RSC process.

National Research Council's National Fire Laboratory (NFL), Mississippi Mills, Ontario. Senior Risk Assessor, 2015-2018
NRC's NFL property is approximately 78 hectares in size and includes one large main structure (Building U-96) located approximately in the centre of the property. The NFL facility has historically been used to conduct a wide range of full-scale scenarios to test fire detection, fire suppression and smoke movement and to test the performance of building materials and systems. Fire testing associated with aqueous film forming foam (AFFF) was conducted at the site, with process waters containing PFAS reportedly discharged to ground surface. Since PFAS was discovered in soil, groundwater, and surface water at the site, work has involved in a multi-disciplinary PFAS investigation program that has included on-site groundwater, soil, surface water, and sediment sampling, off-site residential drinking water sampling, targeted soil removal, ecological assessment programs, and air deposition studies. Ms. Corrin was the Senior Lead for the Human Health Risk Assessment for risks associated with exposure to soil, water, vegetation, big game and small game at the Site.

Tundra Mine Detailed HHERA for INAC, Tundra Mine, NWT. Project Manager and Senior Risk Assessor, 2016-2017
INAC requested that the HHERA be completed to assess residual risks associated with the remediated mine site in order to facilitate project closure. Ms. Corrin was the project manager and senior risk assessor involved in designing and managing a DQRA for the Tundra Mine, 240 km northeast of Yellowknife. For the human health risk assessment, the critical receptor was a First Nation Hunter. Exposure pathways evaluated included direct contact with soil, ingestion of surface water and consumption of: berries, small game, large game, fish and Labrador tea. Terrestrial ecological receptors were evaluated as well as aquatic receptors in lakes downstream of the Tailings Containment Area. Lines of evidence used to assess risks to

aquatic receptors included: surface water and sediment chemistry, benthic community survey, Hyalella critical body residue analysis, fish internal and external health examinations and biological habitat assessment. A comprehensive sampling program was planned and executed and included collection of soil, surface water, fish tissue, benthic invertebrates, Hyalella, berries and Labrador tea from both impacted and reference areas. A risk management plan was developed. Ms. Corrin managed a multi-disciplinary team, worked with multiple stakeholders including INAC, Expert Support, and First Nations Communities. As the senior risk assessor, Ms. Corrin planned the technical direction of the risk assessment, developed the risk management plan and reviewed all deliverables.

PEER REVIEW PROJECTS

Peer Reviews of Numerous Small Craft Harbour Waterlot Assessments, Maritime and Gulf Region – PSPC/DFO. Senior Risk Assessor 2021, 2022

Responsible for the review and provision of construction comments related to the review of reports for 8 sites in the 2021/22 Fiscal Year and 6 sites in the 2022/23 Fiscal Year. Work conducted included sediment sampling, benthic community assessment and tissue analysis. Reports included descriptions of field work, dive work, historical reviews and human health and ecological risk assessments.

Vendor of Record (VOR) Risk Assessment Peer Reviews on behalf of the Ontario Ministry of Environment, Conservation and Parks. Senior Reviewer, 2014 – 2018

Natasha has been part of MECP teams that were Vendors of Record (VORs) reviewing risk assessments conducted under Ontario Regulation 153/04 on behalf of the Ministry. As part of the VOR team, Natasha has an in depth understanding of the regulation and the required steps to get a risk assessment through the review and approvals process.

3rd Party Peer Review, Risk Assessment Camp Ipperwash, Lambton Shores, Ontario – DND. Project Manager/Senior Risk Assessor, 2016

A 3rd party peer review was performed for an aquatic site assessment and risk assessment conducted in surface water bodies at the Former Camp Ipperwash in Lambton Shores, Ontario. The Site was appropriated from the Stony Point Indian Reserve in 1942 and used for infantry training. The site assessment work investigated impacts associated with sediment and surface water including metals, polycyclic aromatic hydrocarbons (PAHs) and DDT. The risk assessment considered potential risks to aquatic life including benthic invertebrates, fish and turtles, particularly associated with biomagnifying contaminants. Risks to human health were also considered associated with the consumption of fish.

AQUATIC TOXICOLOGY / DEVELOPMENT OF DISCHARGE CRITERIA

Development of Discharge Limits for the Abercrombie Ash Management Site - Nova Scotia Power Incorporated. Senior Risk Assessor, 2019-2020

Natasha worked on a multi-disciplinary team to develop effluent discharge criteria for aluminum, chromium (VI) and molybdenum at the site. The work involved process engineers, biologists, site assessors and risk assessors. The process engineers worked on reducing concentrations of chromium (VI) and molybdenum in the discharge by evaluating numerous treatment options. The preferred option was piloted and implemented and included the use of a combined granular activated carbon and resin recirculation system. Acute discharge criteria were developed based on multiple lines of evidence including a literature review of available information combined with surface water and sediment chemistry as well as an aquatic habitat assessment and benthic community analysis. The numeric limits were selected based on the 5th percentile of the species sensitivity distributions of acute effects data.

CLIMATE CHANGE

Climate Change Impacts and Indices for the National Capital Region - NCC and City of Ottawa. Facilitator, Senior Reviewer, 2019

Conducted stakeholder engagement sessions and facilitated workshops to get feedback from multiple stakeholder groups from the NCC and City of Ottawa regarding how climate change impacts their sector (e.g., contaminated sites, recreation, transportation, public health, water/wastewater) and what climate change parameters and indices would be most valuable tothem for future vulnerability assessments and resilience planning. Natasha provided senior technical advice, reviewed deliverables and was a facilitator at the workshop and stakeholder engagement sessions.

Natasha Corrin – Senior Risk Assessor

Stakeholder Engagement

Completion of Two Stakeholder Engagement Sessions to support the Clyde River Small Craft Harbour Development, Nunavut - PSPC/DFO. Senior Risk Assessor and Assistant Project Manager, July 2020 – March 2021

Planned and led biological studies and stakeholder engagement sessions to support the design of the Clyde River Small Craft Harbour. Coordinated meetings with the Hamlet Council and the Hunters and Trappers Organization. Held IQ sessions with elders and used participatory maps to gather insights into historical and current use of the area. Also engaged with ECCC, DFO, NIRB, NPC, Arctic Fisheries Alliance, sealift operators, CIRNAC, GN Petroleum Products Division and fuel provider.

Soil Reuse

Screening Level Risk Assessments for Soil Reuse at City of Ottawa Infrastructure Projects – Various locations, City of Ottawa, Ontario. Senior Risk Assessor, 2022 -2023.

Evaluated available data including soil, groundwater and leachate data (if available) to determine if there were potential risks to human and ecological receptors associated with reusing material at integrated roadway and sewer projects in consideration of O.Reg. 406/19 and O.Reg. 153/04. Made recommendations for soil reuse on and off-site.

Soil Reuse Program at a Development Site in Hawkesbury, Ontario - United Counties of Prescott-Russell. Project Manager/Senior Risk Assessor, 2020 and 2022 for Project Close-out.

Selenium exceedances in soil were identified at a redevelopment site in Hawkesbury, Ontario. Completed a risk assessment that identified that the exceedances would not pose a risk to human health or the environment if the soil were to be reused at the site and avoided costly site assessment and soil removal fees. Provided advice in the context of Ontario Regulation 406/19 (the excess soil management regulation), provided specification for a tender document related to excess soil management, advice for excess soil management and cost saving strategies, tender support and construction support. Provided follow-up work post-construction to close out the project. Hired MP as a subconsultant for both phases of the project to collaborate on creative solutions for soil management and money-saving options for the client.

Soil Reuse Program at the Cliff Central Heating and Cooling Plant, Ottawa, Ontario - PCL Constructors Canada Inc. Senior Environmental Engineer, November 2020

Reviewed historical reports and evaluated options for soil reuse at the site in consideration of potential risks to human health, the environment and planned risk management measures. Determined that soil could be reused at the site, saving disposal fees for contaminated soil.

Courses and Presentations Given

- Science, Approaches and Challenges in Human Health Risk Assessment When Considering PFAS. RPIC Federal Contaminated Sites Regional Workshop. Halifax, NS. June 2019.
- Lessons learned in the FCSAP Program: Custodian and ESD Perspective. Natasha Corrin. Oral Presentation. RPIC, 2018.
- Understanding the Impacts of Confounding Uncertainties with PFAS – from Assessment to Communication with Stakeholders. Half-Day Professional Development Session. Natasha Corrin – presented HHRA and ERA. RPIC, 2018.
- FCSAP Project Managers Toolkit. Half-Day Professional Development Session. Natasha Corrin – presented Site Closure Tool and TRAV. RPIC, 2016.
- Site Closure Tool/Tool for Risk Assessment Validation. Half-Day Professional Development Session. Natasha Corrin, Golder; Andrew Henderson, Franz. RPIC, 2014.
