Storm Tech Storage Tanks
Our File No.: 119068

The Storm Tech storage tanks are designed to exceed American Association of State Highway and Transportation Officials (AASHTO) LRFD recommended design factors for Earth load and Vehicular live loads (previously known as HS-20). This means that when properly installed, the tanks can support the load from typical heavy vehicles such as fire trucks, garbage trucks, and the like.

Novatech recommends construction inspection during installation of the Storm Tech storage tanks to ensure proper placement, backfill and compaction is achieved in accordance with the manufacturer recommendations.

We are available if there are any questions regarding the above.

Yours truly,

NOVATECH
