**Subject: Phase 1 Environmental Site Assessment
774 Bronson Avenue and 557 Cambridge Street South
Ottawa, Ontario
Project No. 151-13503-00**

Dear Mr. Smith,

We are pleased to forward our Phase 1 Environmental Site Assessment (ESA) report for the above-noted property. The assessment was carried out in accordance with O. Reg. 153/04 (last amendment: O. Reg. 269/11).

The report provides site information from inspections, records reviews, interviews, and our conclusions for your consideration.

Thank you for the opportunity to be of service on this project. We trust that this report will be satisfactory for your current needs. If you have any questions or require further information, please contact our office at your convenience.

Yours truly,
WSP Canada Inc.

A handwritten signature in black ink, appearing to read "Philip Romeril".

1 EXECUTIVE SUMMARY

WSP Canada Inc. (WSP) was retained to conduct a Phase 1 Environmental Site Assessment (ESA) of the Phase 1 Property is comprised of two adjacent properties with municipal addresses of 774 Bronson Avenue and 557 Cambridge Street South in Ottawa, Ontario. The objective of the assessment was to determine any real or potential environmental liabilities associated with the Phase 1 Property through the completion of a historical records review, site reconnaissance and interviews. The results of this Phase 1 ESA are documented in this report and reflect site conditions observed at the time of the site reconnaissance.

Based on information obtained as part of the Phase 1 ESA records search, site reconnaissance and interview process, the following findings are presented:

- The inferred shallow groundwater flow direction is southwesterly.
- The Phase 1 Property is currently empty except for two unoccupied office trailers located adjacent to the Bronson Avenue. These two adjacent trailers appeared to have been used as a model home sales office (approximately 65 m²) and a construction office (approximately 16 m²).
- Surficial geology is absent in the vicinity of the Phase 1 Property with limestone bedrock of the Verulam Formation anticipated at surface.
- The Phase 1 Property was first developed prior to 1928 with residential use on 744 Bronson Avenue portion. Various commercial businesses including a contractor business with lumber storage have existed on the Cambridge Street South portion.

Several potentially contaminating activities (PCAs) were identified on-Property and within the Phase 1 Study Area (P1SA). Those activities that were deemed to be contributing to an area of potential environmental concern (APEC) for the Phase 1 Property are summarized below:

POTENTIALLY CONTAMINATING ACTIVITY	OBSERVATIONS
30. Importation of Fill Material of Unknown Quality	<u>On-Property</u> – Fill of unknown origin on site. APEC #1
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	<u>On-Property</u> – Western portion of Site for historical wood treating. APEC #2
28. Gasoline and Associated Products Storage in Fixed Tanks	<u>On-Property</u> – Records review identified historical fuel oil used for heating of former building. PHCs in the F3 and F4 ranges detected in groundwater. Since location of these former tanks is not known the whole Phase 1 Property should be considered as APEC #3 <u>P1SA</u> – Records review identified historical fuel oil used for heating on was a gasoline station with USTs, pump island and associated piping contributes to APEC #3 on the east end of the Phase 1 Property
37. Operation of Dry Cleaning Equipment (where chemicals are used)	<u>P1SA</u> – Adjacent historic dry cleaning business. –southeast corner of the Phase 1 Property. APEC #4

The following areas of potential environmental concern and associated contaminants of concern were identified on the Site:

ENVIRONMENTAL CONCERN	LOCATION	AREA OF CONCERN	CONTAMINANTS OF CONCERN	MEDIA	RISK LEVEL
Fill material APEC #1	On-Property	Whole Property.	BTEX, PHCs, PAHs, M&I	Soil	High - lead and mercury impacts already detected in fill material plus fill from the historical development and recent building demolition.
Historic wood treating APEC #2	On-Property	West end	M&I, As, Cr (VI) Hg, PAHs	GW & Soil	Moderate-fractured bedrock with large hydraulic conductivity.
Historic gasoline station with USTs and associated equipment APEC #3	Off-Property On-Property	Eastern end Whole Property	BTEX, PHCs, PAHs, M&I	GW & Soil	High – PHC impacts already detected in fractured bedrock with large hydraulic conductivity
Dry cleaning operations APEC #4	Off-Property	Southeast portion	BTEX, PHCs, VOCs, PAHs	GW & Soil	Moderate to high-fractured bedrock with large hydraulic conductivity

Notes:

BTEX – Benzene, Toluene, Ethylbenzene, and Xylenes
 GW – Groundwater
 PHCs – Petroleum Hydrocarbons
 VOCs – Volatile Organic Compounds
 PAHs - Polycyclic Aromatic Hydrocarbons
 M&I – Metals and Inorganics
 As – Arsenic
 Hg – Mercury
 Cr (VI) – Chromium (hexavalent)

Based on information obtained as part of the Phase 1 ESA, it is concluded that there are environmental concerns at the Phase 1 Property related to soil and/or groundwater quality that warrant further assessment. A record of site condition (RSC) cannot be filed based upon this Phase 1 ESA alone.

The ESA findings are subject to the limitations and qualifiers included as Section 8.2 of this report.

2 INTRODUCTION

WSP Canada Inc. (WSP) was retained to conduct a Phase 1 Environmental Site Assessment (ESA) of the Phase 1 Property is comprised of two properties with the municipal addresses of 774 Bronson Avenue and 557 Cambridge Street South in Ottawa, Ontario, hereinto referred to as the 'Phase 1 Property'. The Phase 1 Property is located on the west side of Bronson Avenue and on the east side of Cambridge Street South in a mixed commercial and residential area in the Glebe-Dows Lake area. The Phase 1 Property is rectangular in shape and approximately 0.4 hectares (0.9 acres) in area. The Phase 1 Property is currently empty except for two trailers located adjacent to the Bronson Avenue. These two adjacent trailers appeared to be a former model home sale office (approximately 65 m²) and a construction office (approximately 16 m²). A site location map is provided as **Figure 1**.

The site plan showing the limits of the Phase 1 Property is presented on **Figure 2**.

2.1 PHASE 1 PROPERTY INFORMATION

Property information for the Phase 1 Property is provided in the table below.

Table 2-1 Property Information

CRITERIA	PHASE 1 PROPERTY INFORMATION
Current Site Owner	Samcon Cambridge Inc.
Phase 1 Representative	Mr. Fraser Smith Assistant Vice President Textbook Suites Inc. 51-A Caldari Road, Unit 1M Concord, ON L4K 4G3 Tel: 416-477-7744 x 238 Email: fraser@textbooksuites.com
Municipal Addresses	774 Bronson Avenues and 557 Cambridge Street South, Ottawa, Ontario
Property Identification Numbers (PINs)	04103-0125 (LT) and 04103-0215 (LT)
Legal Descriptions	Lots 3 and 4 Plan 28 and Lot 37, Part Lot 38, Plan 28 designated as Part 4, 5R14360

3 SCOPE OF WORK

The purpose of the assessment was to:

- Assess the actual or potential environmental liabilities;
- Characterize any liabilities of environmental concern;
- Assess environmental risks;
- Provide a basis for subsequent investigations of this Property based on the Phase 1 ESA findings.

As such, the objective of the assignment was:

- To undertake a Phase 1 ESA for the Phase 1 Property in accordance with O. Reg. 153/04 (last amendment: O. Reg. 269/11).

The scope of this investigation includes:

- Records Review
- Interviews (& Correspondence)
- Site Reconnaissance

4 RECORDS REVIEW

Below is a summary of the records review undertaken by WSP as part of this Phase 1 ESA.

The records review provides information regarding the physical setting, history of development, and land use in connection with the Phase 1 Property and adjacent properties. Searches of databases and records not included in the EcoLOG ERIS report were conducted specifically for the subject Phase 1 Property. Information sources are summarized in **Table 4-1** below. An EcoLOG ERIS report was obtained for the subject Property and lands within a 250 m radius (i.e., the Phase 1 Study Area (P1SA)) and this information has been summarized in **Table 4-2** and a copy of the EcoLOG ERIS report is provided in **Appendix A**.

Table 4-1 Summary of General Records Review

SOURCE	RECORDS REVIEW RESULT
(i) Phase 1 Study Area Determination	The Phase 1 study area for this undertaking included properties wholly, or partly, within 250 m of the Property boundaries. Properties wholly beyond 250 m of the boundary were not considered due to the low potential for them to cause an adverse environmental impact.
(ii) First Developed Use Determination	The first developed use of the Phase 1 Property was determined by a review of a historical chain of title search and aerial photographs. The chain of title indicates that this Property was transferred from The Crown to a private individual in 1801. The historic building on the east side of the Phase 1 Property (774 Bronson Avenue) were first noted on the 1933 aerial photograph. It is inferred that the first development was before 1933.
(iii) Fire Insurance Plans (FIPs)	<p>The available Fire Insurance Plans for 1912 and 1963 were reviewed in order to identify the occupancy history of the Phase 1 Property, and properties within the P1SA. A copy of these two FIPs can be found in Appendix E.</p> <p>Based on the FIP review, the following pertinent information was noted:</p> <p>1912</p> <ul style="list-style-type: none"> ▪ The west side of the Phase 1 Property is undeveloped. ▪ The east side of the Phase 1 Property contains a large building in the middle of the property (774 Bronson Avenue) and a small building along the north property line. ▪ The northeast adjacent property (770 Bronson Avenue) appears to be undeveloped. ▪ A storage yard (with designated piling area's - lumber) called 'Fraserfield Yard, R. Booth' is located on the east side of Cambridge Street South (Identified as 'Turner' in the FIP). The storage yard extends north of Carling Avenue, along the west side of Lebreton Street. ▪ Another storage yard is located approximately 220 m north of the subject Property, just north of Powell Street. ▪ The southeast adjacent property contains a building along the north property line. ▪ The southwest adjacent property is undeveloped. ▪ The northwest adjacent property has two (2) small buildings in the centre of the property. ▪ The northeast adjacent property is undeveloped.

SOURCE

RECORDS REVIEW RESULT

	<p>1963</p> <ul style="list-style-type: none"> ▪ The west side of the Phase 1 Property contains a large 'C' shaped building identified as 'G.A. Crain & Sons Ltd. Contractors'. The property is identified as 551, 553 and 555 Cambridge Street South. Lumber storage is identified on the north side of the property. ▪ The east side of the property contains three (3) buildings that are identified as containing the addresses of 772, 774, 774 ½, 776, 776 ½, 778, and 780 Bronson Avenue. ▪ The northeast adjacent property located at 770 Bronson Avenue is identified as a Gasoline Service Station containing three USTs. ▪ The southwest adjacent property (identified as 581 Cambridge Street South) contains lumber storage along the north property line with a Planing mill in the centre of the property. 'MacDonnell & Conveyers Limited, Power & Light Elec.' is also identified on the eastern portion of the Phase 1 Property. ▪ 788 Bronson Avenue (located approximately 20 m south of the Phase 1 Property) has a large building with multiple tenants, one of which is identified as a Dry Cleaner. ▪ A gasoline service centre containing three (3) USTs is located at 745 LeBreton Street (on the corner of Carling Avenue and LeBreton Street) approximately 220 m northwest of the Phase 1 Property. ▪ The property located at 400 Bell Street South (between the intersections of Carling Avenue and Bell Street South and LeBreton Street) is identified as 'Federal District Commission' and contains a Machine shop on the southeast corner of the Site as well as a UST on the mid-east section of the property. This property is located approximately 120 m northwest of the Site. 																																																
(iv) Chain of Title	<p>WSP retained EcoLOG Eris to conduct a title search. The Phase 1 Property is comprised of two properties 774 Bronson Avenue and 557 Cambridge Street. The title search documents are included in Appendix B.</p> <p>774 BRONSON AVENUE</p> <table border="1"> <thead> <tr> <th>TIME PERIOD</th> <th>SITE OWNER</th> </tr> </thead> <tbody> <tr><td>Pre-1801</td><td>The Crown</td></tr> <tr><td>1801-1831</td><td>C. (v) Environmental Reports	<p>Updated Geotechnical Study dated November 2015 prepared for SRM Architects Inc. by WSP includes data produced by Genivar (predecessor to WSP) in a report issued in January 2012.</p> <p>Five boreholes were advanced with two being augered to refusal on bedrock and three being cored into the bedrock for the installation of monitoring wells to a maximum depth of 4.7 m below ground surface (mbgs).</p> <p>The soils consisted of fill materials comprised of one or more of the following materials: sand, gravel, sandy silt, construction debris. Bedrock was encountered about 1 mbgs except at one location where fill materials extended to 2.2 mbgs. The bedrock rock quality designation (RQD) values were generally poor to very in to a depth of approximately 3 mbgs.</p> <p>Groundwater was encountered from 1.9 to 2.3 mbgs or within the fractured bedrock on December 12, 2011.</p> <p>The limited soil and groundwater analytical results from December 2011 indicated exceedances of the 2011 MOE Table 7 Site Condition Standards for lead and mercury in soil and petroleum hydrocarbons in the F3 and F4 fractions in groundwater in two monitoring wells (i.e. FG-1 and FG-3).</p>																																						
(vi) Vernon City Directories	<p>The available City of Ottawa Directories for 2000, 1988/89, 1980, 1970, 1960, 1950, 1940, 1930, 1920 and 1910 were reviewed at Library and Archives Canada in order to identify the occupancy history of the Phase 1 Property, and properties within the P1SA.</p> <p>Based on the street directory review, the following pertinent information was noted:</p> <ul style="list-style-type: none"> ▪ The east and west sides of the Phase 1 Property (774 Bronson Avenue and 551 Cambridge Street South) were not listed in the City directories on or before 1920. ▪ 774 Bronson Street was listed as being residential from 1930 to 1980. A music studio occupied the Site in 1940 and 1988/89. A company called 'Perspective Computer Systems Inc.' occupied the Site in 1988/89. ▪ 784 Bronson Avenue is listed as a photo finisher/print shop from 1950-1960, and CU Copy in 2000. ▪ 551 Cambridge Street South was listed as residential from 1930-1940. It was not listed in 1940. A company called 'Standard Brands Ltd. Food mfrs' occupied the subject Property from 1960-1970. 'Atiba Enterprise Ltd.' occupied the Site in 1980, followed by 'Cambridge Family Medicine Centre', 																																						

SOURCE	RECORDS REVIEW RESULT
	<p>'Marbeau Enterprises Ltd.' And 'Beaudoin Enterprises Ltd.' In 1988/89. The Site was listed as 'Windsor Home Cleaning and Residential' in 2000.</p> <ul style="list-style-type: none"> ▪ 549 Cambridge Street South, which is suspected to have been part of the north side of the subject Property was listed as 'Black and McDonald' from 1980-1988/89. ▪ The northeast adjacent property located at 770 Bronson Avenue was listed as 'Cities Service Co./Nesbitt Geo D Serv Stn', 'Cities Service Oil Co. Ltd./Steeles Service Station', 'Steeles Bob BP Serv Station', 'Emilio's Petro-Canada Service Station', and 'Emilio Linda Enterprises Ltd.' From 1950 to 2000. A business called 'Nesbitt Geo D Auto Garage' was identified as being located south of Carling in 1940. ▪ The north adjacent property located at 270 Carling Avenue was listed as 'Capital Ostomy Corner Inc. (ostomy supplies)' in 1988/89. In 1980 it was listed as 'Cantu Furniture & Interiors', and in 1970 it was 'Dept of Natl Defense HQ Directorate of Flight Safety'. ▪ The northwest adjacent property located at 280 Carling Avenue was listed as residential from 1930-2000. ▪ The southwest adjacent property located at 567 Cambridge Street South was listed as 'The King's Daughters Apartments' from 1970-2000. ▪ The southeast adjacent property at 786 Bronson Avenue was listed as a social service facility in 2000, a labour union office from 1970-1988/89 followed by residential from 1950-1960. ▪ The west adjacent property was listed as a school from 1930-2000. ▪ The west adjacent property (1 Fredrick Place) was listed as residential from 1940-2000. The street was not listed in 1930. ▪ The property listed at 299 Carling Avenue (120 metres northwest of the Phase 1 Property) was listed as Energy Mines & Resources Geologic Survey of Canada from 1980-1988/89. ▪ 788 Bronson Avenue (located 20 m south of the Phase 1 Property) is listed as 'Langley's Clnrs' from 1940-1970. 'Canadian Press Steel Works Freeth Chas w cabt mkr' is listed as having occupied the property in 1930. ▪ 790 Bronson Avenue (located 30 m south of the Site) is listed as 'Macdonell & Conyers Lumber Co. Ltd.' From 1950-1960 <p>The property located at 387 Bell Street South was listed as an air conditioning and refrigeration company from 1960 to 1988/89. The property is located approximately 160 m north of the Phase 1 Property</p>
(vii) Previous Report(s)	

4.1 ENVIRONMENTAL SOURCE INFORMATION

Table 4-2 Summary of Environmental Records

SOURCE	RECORDS REVIEW RESULT
(i) City of Ottawa	The City of Ottawa Zoning By-Law 2008-250 indicates that the zoning for the Site is Commercial (Arterial Mainstreet Zone - AM1[2003] S296). A copy of the zoning map and permitted uses is included in Appendix E .
(ii) EcoLog ERIS Complete Database Report	<p>WSP obtained an EcoLog Environmental Risk Information Service (ERIS) Report for the P1SA. The ERIS report tabulates the results of a search of provincial, federal, and private source databases which are considered relevant in the identification of potential environmental risks associated with the Phase 1 Property.</p> <p>The ERIS Report did not report any records for the subject Property. The ERIS Report also identified 107 records for properties within the P1SA. The ERIS report also identified several records which were "unplottable" but pertained to the P1SA. A copy of the ERIS report is included in Appendix A and the results are summarized below.</p>

SOURCE	RECORDS REVIEW RESULT
(iii) National Pollutant Release Inventory (NPRI)	The ERIS report did not identify any NPRI records on the Phase 1 Property or within the P1SA.
(iv) PCB Inventories	<p>The ERIS report did not identify any PCB Inventory records within the P1SA, except for one record for Energy Mines and Resources located at Terrain Sciences Division 401 Lebreton Street (EcoLog Record 35), approximately 209 m west of the Phase 1 Property.</p> <p>One unplotable report in the ERIS report for Agriculture Canada located at Madwaska and Cow Lane which is outside the P1SA..</p>
(v) Compliance and Convictions	<p>The ERIS report did not identify any compliance or conviction records within the P1SA.</p> <p>One unplotable report in the ERIS report for Taggart Construction Limited for a fine for a violation of the Ontario Water Resources Act due to dewatering activities.</p>
(vi) Ministry of the Environmental Compliance Approval (ECA), Permits To Take Water (PTTW) and Certificates of Property Use (CPU)	<p>The ERIS report did not identify any MOECC ECA, PTTW, or CPU records for the Phase 1 Property. However, there are six certificates of approval within the P1SA, including the following:</p> <ol style="list-style-type: none"> 1. One record for Carleton Condominium Corporation No. 472 located at 550 Cambridge Street (EcoLog Record 11), approximately 77 m west to northwest of the Phase 1 Property. The record is for an approval for air. 2. One record for Ottawa City located at Second Avenue and Bronson Avenue (EcoLog Record 13), approximately 93 m southeast of the Phase 1 Property. The record is for approval of municipal sewage. 3. One record for R.M. of Ottawa-Carlton located at Second Avenue, Bronson Avenue and Bank Street (EcoLog Record 13), approximately 93 m southeast of the Phase 1 Property. The record is for approval of municipal water. 4. One record for 1737924 Ontario Inc. located at 804-824 Bronson Avenue (EcoLog Record 16), approximately 139 m southeast of the Phase 1 Property. The record is for approval of municipal and private sewage works. 5. One record for R.M. of Ottawa-Carlton located at Clemow Avenue, Bronson Avenue and Bank Street (EcoLog Record 17), approximately 128 m north of the Phase 1 Property. The record is for approval of municipal water. 6. One record for Canci Homes Corporation Inc. located at 385 Bell Street (EcoLog Record 23), approximately 188 m northwest of the Phase 1 Property. The record is for approval of municipal and private sewage works. <p>25 unplotable reports in the ERIS report were for Certificates of Approval issued for industrial sewage works, municipal and private sewage works, municipal water and discharge to air.</p> <p>Two unplotable PTTW was listed in the ERIS report for AECON Construction and Material Limited and Taggart Construction Limited.</p>
(vii) Inventory of Coal Gasification Plants	A search of Coal Gasification Plants from EcoLog ERIS did not report any records within the P1SA.
(viii) Records of Environmental Incidents, Orders, Offences, Spills, Discharges of Contaminants or Inspections	<p>The ERIS report did not identify any incidents, spills, discharges of contaminants or inspections on the Phase 1 Property. However within the P1SA there were: records of spills; TSSA pipeline incidents; and historic TSSA incidents:</p> <p>One record for Ottawa Hydro located at the corner of Carling and Bronson (EcoLog Record 8), approximately 54 m northeast of the Phase 1 Property. Incident date was 10/2/1991, for 14 L of non-PCB transformer oil to ground and storm sewer from a cooling system lead. Environmental Impacts were not anticipated.</p> <p>One record located at the corner of Carling and Bronson (EcoLog Record 8), approximately 54 m northeast of the Phase 1 Property. Incident date was 10/26/2003, for 1 L of gasoline to sewers. Environmental Impacts were listed as possible.</p>

SOURCE

RECORDS REVIEW RESULT

One record located at 7 Frederic Place (EcoLog Record 12), approximately 71 m west to southwest of the Phase 1 Property. A 25 mm (1") diameter heating fuel pipeline was hit.

One record for First Fuel located at 812 Bronson (EcoLog Record 15), approximately 110 m southeast of Phase 1 Property. Incident date was 1/22/1991, for 50 L leak of furnace oil to the street due to equipment failure. Environmental impacts were listed as possible.

One record located at 407 3rd Avenue (EcoLog Record 22), approximately 171 m east to southeast of the Phase 1 Property. Occurrence date was 10/31/2008 for a natural gas pipeline strike at a construction site.

One record located at 418 3rd Avenue (EcoLog Record 25), approximately 201 m southeast of the Phase 1 Property. Occurrence date was 10/22/2008 for a natural gas pipeline strike at a construction site.

One record for PUC located at 326 Powell Street (EcoLog Record 27), approximately 208 m northwest of the Phase 1 Property. Incident date was 5/29/1988 for 53 L of transformer oil (chlorin-oil test negative) to ground due to transportation accident.

One record located at 315 Powell Avenue (EcoLog Record 34), approximately 238 m north to northwest of the Phase 1 Property. MOE reported date was 8/10/2010 for 30 L of hydraulic oil spill to the street due to pipe of hose leak. Environmental impacts were not anticipated.

One record for Hydro-Ottawa located at 272 Powell Street (EcoLog Record 28), approximately 203 m north of the Phase 1 Property. Incident date was 6/10/2003 for unknown amount of transformer oil to ground. Environmental impacts were not anticipated.

One record located at 408 3rd Avenue (EcoLog Record 32), approximately 215 m east to southeast of the Phase 1 Property. Occurrence date was 10/17/2008 for a natural gas pipeline strike at a construction site.

One record located at 402 3rd Avenue (EcoLog Record 37), approximately 232 m east to southeast of the Phase 1 Property. Occurrence date was 9/26/2008 for a natural gas pipeline strike at a construction site.

One record located at 850 Bronson Avenue (EcoLog Record 39), this record is further than 250 m from the Phase 1 Property.

One record for Enbridge Gas Distribution Inc. located at 680 Bronson Avenue (EcoLog Record 40). This record is further than 250 m from the Phase 1 Property.

One record located at 860 Bronson Avenue (EcoLog Record 43). This record is further than 250 m from the Phase 1 Property.

Two records located at 659 Bronson Avenue (EcoLog Record 45). These records are further than 250 m from the Phase 1 Property.

One unplotable report for TSSA Historic Incidents and 32 unplotable reports in the ERIS report for spills were listed. Based on the descriptions of the TSSA historic record was not within 250 m of the Phase 1 Property and of the 32 spills records, only six records potentially occurred within 250 m of the Phase 1 Property, which include:

A record of 5 L furnace oil to water puddle from a pipe/hose leak.

A record for 10 L of power steering fluid to floor to catch basin. Environmental impact not anticipated.

A record for 2 L jugs of hypochlorite (Javex) spilled in trailer due to a trailer leak.

A record for diesel fuel leak from fuel pump/line into sewer. Possible environmental impacts.

A record for a leak of natural gas from a 102 mm (4") diameter gas main strike. Environmental impacts confirmed.

A spill of 100 L of gasoline spilled to catch basin and road.

SOURCE	RECORDS REVIEW RESULT
	<p>A request has been made to the MOECC - Freedom of Information (FOI) and Protection of Privacy Office for information regarding incidents or activities, which may have occurred on the subject Phase 1 Property and represent a possible environmental concern. If MOE records are obtained that are environmentally significant in terms of this ESA, an addendum will be forwarded to the Client.</p>
<p>(ix) Ontario Regulation 347 Waste Generators/Receivers Summary Records</p>	<p>The ERIS report did not identify any Ontario Regulation 347 Waste Generator Records or Ontario Regulation 347 Waste Receivers for the Phase 1 Property. There are 41 records for Waste Generators within the P1SA, including the following.</p> <p>Two records for Black & McDonald Limited located at 557 Cambridge Street South (EcoLog Records 3), approximately 4 m southwest of the Phase 1 Property. The property was listed as electrical work with oil skimmings and sludges waste.</p> <p>Six records for Taggart Corporation or unlisted located at 265 Carling Avenue (EcoLog Record 9), approximately 80 m north/northwest of the Site, for a real estate property manager. For PCB waste.</p> <p>Two records for Associated Endodontists and unknown located at 265 Carling Avenue (EcoLog Record 10), approximately 85 m northwest of the Phase 1 Property, one record was listed for a real estate property manager. Wastes at this site include pathological wastes and PCBs.</p> <p>Two records for Ottawa Hydro located at 247 Glebe Avenue (EcoLog Record 14), approximately 72 m north to northeast of the Phase 1 Property for electrical power distribution. Wastes include oil skimming & sludges, waste oils & lubricants and PCBs.</p> <p>Four records for Ottawa-Carleton District School Board (Borden High School) located at 515 Cambridge Street South (EcoLog Record 20), approximately 170 m north to northwest of the Phase 1 Property. The records are for elementary/secondary education. Wastes include inorganic laboratory chemicals, waste oils & lubricants and organic laboratory chemicals.</p> <p>One record for Goodex Equipment Rentals Ltd. located at 515 Cambridge Street (EcoLog Record 21), approximately 178 m north to northwest of the Phase 1 Property.</p> <p>One record for Ottawa-Carleton District School Board (Glebe Collegiate Institute) located at 212 Glebe Avenue (EcoLog Record 26), approximately 187 m east to northeast of the Phase 1 Property. The record is for an elementary and secondary schools. Wastes include alkaline wastes- heavy metals, organic laboratory chemicals, waste oils & lubricants, photo-processing wastes, acid wastes- heavy metals, inorganic laboratory chemicals, aliphatic solvents, light fuels, acid waste-other metals, and paint/pigment/coating residues.</p> <p>Nine records for Ottawa-Carleton District School Board (Glebe Collegiate Institute) located at 212 Glebe Avenue (EcoLog Record 33), approximately 200 m east to northeast of the Phase 1 Property. The record is for an elementary and secondary schools. Wastes include alkaline wastes- heavy metals, organic laboratory chemicals, waste oils & lubricants, photo-processing wastes, acid wastes- heavy metals, inorganic laboratory chemicals, aliphatic solvents, light fuels, acid waste-other metals, and paint/pigment/coating residues.</p> <p>Five records for Quantum Murray LP and Government of Canada- Energy Mines & Resources located at 401 Lebreton Street (EcoLog Record 35), approximately 209 m west of the Phase 1 Property. The records indicate for residential construction/Individual Development. Wastes include inorganic laboratory chemicals and organic laboratory chemicals.</p> <p>Nine records for Department of National Defense located at 360 Lebreton Street (EcoLog Record 42). This property is located greater than 250 m from the Site.</p> <p>Four unplottable records for waste generators were listed in the ERIS report and included:</p>

SOURCE	RECORDS REVIEW RESULT
	<p>One record for Government of Canada-Health & Welfare Canada located at 303 Carling Avenue, for pathological wastes.</p> <p>Two records for City of Ottawa for water and sewer line related structures construction.</p> <p>One record for Ottawa Board of Education for inorganic laboratory chemicals and organic laboratory chemicals.</p>
(x) Ministry of the Environment Waste Disposal Inventory	The ERIS report did not identify any active or closed landfill sites within the P1SA.
(xi) Records of Fuel Storage	<p>There were no fuel storage tank records identified in the ERIS report for the Phase 1 Property.</p> <p>There were 10 plotted records for the northeast adjacent property located at 770 Bronson Avenue (EcoLog Record 1) for expired facilities in the ERIS report.</p> <p>Two records for private and retail storage tanks located at 770 Bronson Avenue (EcoLog Record 2).</p> <p>One unplotable record for Mr. Gas Ltd. located on Highway 17. This site is considered greater than 250 m from the Phase 1 Property.</p> <p>An information request was submitted to the TSSA pertaining to underground and aboveground fuel storage for the Phase 1 Property. The TSSA responded that they have no records of tanks on file for the Phase 1 Property.</p>
(xii) Contaminated Sites on Federal Land	<p>The EcoLOG ERIS report did not identify any records of contaminated sites on federal land for the Phase 1 Property, however there was 1 record within the P1SA.</p> <p>The record was for the former NCC building located approximately 202 m west to northwest of the Phase 1 Property (EcoLog Record 31). A Record of Site Condition (RSC) was obtained and no further action was required. Polycyclic aromatic hydrocarbons (PAHs) and heavy metal contamination was located in the garage in the vicinity of the mechanics pit.</p>
(xiii) National Environmental Emergencies System (NEES)	<p>There were no NEES records identified in the ERIS report within the P1SA.</p> <p>There are six unplotable NEES records for First Fuel. The records indicate the site was transportation of heating oil.</p>
(xiv) Environmental Registry	<p>No Environmental Registrations were recorded within the P1SA.</p> <p>One unplotable record for Taggart Construction Limited for approval for discharge to the natural environment other than water.</p>
(xv) Pesticide Registry	<p>The EcoLOG ERIS report did not identify any records for pesticide registry on federal land for the Phase 1 Property, however there was 1 record within the P1SA.</p> <p>The record is for Terrapro Corporation located at 401 Lebreton Street South (EcoLog Record 35), approximately 209 m west of the Phase 1 Property.</p>
(xvi) Scott's Manufacturing Directory	<p>The EcoLOG ERIS report did not identify any records of manufacturing for the Phase 1 Property, however there were 10 records within the P1SA, which included:</p> <p>Four records for K & R Dental Laboratories located at 794 Bronson Ave (EcoLog Site 6), approximately 50 m southeast of the Phase 1 Property. The record indicates that the business manufactures medical equipment and supplies.</p> <p>Five records for Beyond 20/20 Inc., Canadian Post- M.D. Education Register, Association Faculties Medicine of Canada, Nortak Software Ltd. located at 265 Carling Avenue (EcoLog Record 9), approximately 80 m north to northwest of the Phase 1 Property. The records indicates that the businesses were established between 1943 to 1987 and manufactures computer systems design and related services, software publishers, periodical publishers, other publishers, professional organizations, manufacturing and reproducing magnetic and optical media.</p> <p>One record for Scaffold-Fast Inc. located at 385 Bell Street South (EcoLog Record 24), approximately 188 m west to northwest of the Phase 1 Property. The record indicates that the business was established in</p>

SOURCE	RECORDS REVIEW RESULT
(xvii) Water Well Information System	<p>1957 and manufactures construction and mining (except petroleum) machinery, and industrial machinery and equipment.</p> <p>The EcoLOG ERIS report identified 2 well records within the P1SA. The approximate location of the wells is shown in Figure 2. The records are described below.</p> <p>Well ID #7122535 was drilled for monitoring use in March 2009 to a depth of 8.8 m. The stratigraphy at this location is described as sand, topsoil to a depth of 0.6 m, underlain by fill to a depth of 3.6 m, underlain by limestone.</p> <p>Well ID #7207473 was drilled in April 2013. No further details were in the record.</p>
(xviii) Boreholes	<p>The EcoLOG ERIS report identified six borehole records within the P1SA. The records are described below.</p> <p>Borehole ID #809487 was drilled in February 1989 to a depth of 1.5 m. The stratigraphy at this location is described as asphalt to 0.1 m, underlain by crushed stone to a depth of 0.4 m, underlain by sand trace silt, trace gravel to a depth of 1.0 m, underlain by silt-sand.</p> <p>Borehole ID #809488 was drilled in February 1989 to a depth of 1.5 m. The stratigraphy at this location is described as asphalt to 0.1 m, underlain by crushed stone to a depth of 0.4 m, underlain by fill- miscellaneous sand with silt to a depth of 1.0 m, underlain by sandy topsoil a depth of 1.1 m, underlain by sand trace silt.</p> <p>Borehole ID #613104 was drilled in June 1971 to a depth of 4.4 m. The stratigraphy at this location is described as artificial to 0.8 m, underlain by unspecified to a depth of 2.0 m, underlain by bedrock.</p> <p>Borehole ID #613085 was drilled to a depth of 64.0 m. The stratigraphy at this location is described as gravel to 2.4 m, underlain by sand to a depth of 5.5 m, underlain by bedrock.</p> <p>Borehole ID #809486 was drilled in February 1989 to a depth of 1.5 m. The stratigraphy at this location is described as asphalt to 0.1 m, underlain by tar and chip to a depth of 0.2 m, underlain by crushed stone to a depth of 0.5 m, underlain by sand trace silt.</p> <p>Borehole ID #613098 was drilled in December 1957 to a depth of 6.6 m. The stratigraphy at this location is described as artificial to 0.8 m, underlain by sand to a depth of 3.4 m, underlain by unspecified.</p>
(xix) Areas of Natural Significance	No areas of natural significance (ANSI) neither provincially significant life science nor earth science ANSIs are located on the Phase 1 Property.

4.2 PHYSICAL SETTING SOURCES

Table 4-3 Summary of Physical Setting Sources

SOURCE	RECORDS REVIEW RESULT
(i) Aerial Photographs – National Air Photo Library Aerial Imagery- Google Earth	<p>Aerial photographs from 1933, 1945, 1965, 1977, and 1994 and aerial imagery from 2004, 2008, 2012, and 2015 were reviewed for this assessment. Copies of the select air photos and aerial imagery are included in Appendix C. Significant information depicted from these photographs, where possible, are summarized below:</p> <p>1933 (1:6,000)</p> <ul style="list-style-type: none"> ▪ A building appears to occupy the east side of the Phase 1 Property (774 Bronson Avenue) with the west of the Site (557 Cambridge Street South) disturbed but undeveloped. ▪ Cambridge Street South appears to be disturbed, but not paved. ▪ A large building occupies both the northwest and north adjacent properties (280 and 270 Carling Avenue) a small building occupies the northeast adjacent property (770 Bronson Avenue).

SOURCE

RECORDS REVIEW RESULT

- Properties west of Cambridge Street South are undeveloped and appears to be a storage yard with small structures located across the property (lumber storage facility).
- Buildings are present south of the Phase 1 Property on Bronson Avenue and Cambridge Street South.
- An open landscaped space (soccer field) and large building (school), similar to what was observed during the Phase 1 Property visit are present on the east adjacent property.
- A disturbed area with small structures which appears to be another large outdoor storage facility is present approximately 120 m northwest of the Phase 1 Property at 299 Carling Avenue.
- Properties southeast and northeast of the Phase 1 Property appear to be developed residential.

1945 (1:10,000)

- Northeast and south adjacent properties to the Phase 1 Property appear to be similar to the 1933 aerial photograph.
 - Properties west of Cambridge Street South are developed with residential buildings similar to what was observed during the site visit.
 - The north adjacent property (270 Carling Avenue) appears to be vacant
 - A building is located on the northwest adjacent property (280 Carling Avenue).
 - The outdoor storage facility observed in the 1933 photograph located at 299 Carling Avenue does not contain any structures or developments, however continues to be disturbed.
 - A small building and disturbed area is located approximately 70 m north of the Phase 1 Property at 540 Cambridge Street South (at the west corner of Carling Avenue)
- Properties north of the Phase 1 Property are developed with buildings, possibly commercial.

1965 (1:15,000)

- The scale of the photograph limits an accurate view of the Phase 1 Property and adjacent properties
- A building similar to the one observed during the site visit is present on the southwest adjacent property (567 Cambridge Street South)
- The north adjacent property (270 Carling Avenue) appears to be occupied by a building.
- The previously disturbed property at 299 Carling Avenue contains a building on the south side.
- A larger building is present on the property located at 540 Cambridge Street South, located approximately 70 m north of the Phase 1 Property.

1977 (1:10,000)

- Buildings are located on the east and west side of the Phase 1 Property.
- The adjacent properties appear to be similar to the 1965 aerial photograph.

1994 (1:10,000)

- The Phase 1 Property and adjacent properties are similar to the 1977 aerial photograph.

SOURCE	RECORDS REVIEW RESULT
	<p>2004 (Online)</p> <ul style="list-style-type: none"> Buildings are shown on the Phase 1 Property and surrounding properties appear similar to current conditions. <p>2008 (Online)</p> <ul style="list-style-type: none"> Similar to previous aerial image. <p>2012 (Online)</p> <ul style="list-style-type: none"> Similar to previous aerial image. <p>2015(Online)</p> <ul style="list-style-type: none"> Phase 1 Property and surrounding properties appear similar to current conditions.
(ii) Topography, Hydrology, Geology	<p>The Phase 1 Property topography is generally flat.</p> <p>The topographic contours presented on Figure 3 indicate that the elevation of the Phase 1 Property is approximately 75 m above sea level (mASL) and sloping down to the southwest. As a result, the inferred shallow groundwater flow direction is anticipated to be southwesterly. However, buried utility corridors may result in local variations to this groundwater flow direction.</p> <p>The regional physiography, surficial geology, and bedrock topography and geology are presented on Figures 4, 5 and 6, respectively.</p> <p>Surficial geology in the vicinity of the Phase 1 Property is described as “Paleozoic Bedrock” (OGS, 2014). The underlying bedrock within the area is Verulam Formation (OGS, 2014).</p> <p>Groundwater flow in the bedrock is inferred to be southerly as shown on Figure 6.</p>
(iii) Fill Materials	<p>There were no records of fill materials at the Phase 1 Property, based on the records review. However asphalt, gravel and rubble material, likely a result of former demolition activities was observed on the Site.</p>
(iv) Water Bodies and Areas of Natural Significance	<p>The nearest water body is Dows Lake located approximately 370 m southwest. Areas of Natural Significance were not found on or near the Phase 1 Property.</p>
(v) Well Records	<p>There were no well records found for the Phase 1 Property. The EcoLog ERIS report identified two records of wells within the P1SA. The wells are located on at various properties to the northeast and west of the Phase 1 Property, as shown on Figure 7.</p>

4.3 Site operating records

No operating records of the site were available for review.

5 Interviews

Table 5-1 Details of Interview with Jim Lumsden

REQUIRED INFORMATION	SPECIFICS
i. Date, place, and method of the interviews and the name of person being interviewed	Date: Email on December 18, 2015
	Interview method: Email
	Interviewee: Jim Lumsden
ii. Reason why the person was identified as an interview subject	Mr. Lumsden is a neighbour and has approximately 50 years of knowledge of the Phase 1 Property.

<p>iii. Relevant information concerning potentially contaminating activity and areas of potential environmental concern noted by the interviewer.</p>	<p>Mr. Lumsden indicated that he has lived in the area for over 50 years. He stated the following:</p> <p>In Bronson there was a pair of wood frame semi-detached 2 storey houses.</p> <p>Also there was a 2 storey brick building with various light commercial uses like corner store and Chinese restaurant and cut stone retailer.</p> <p>All these were likely heated with oil furnaces then natural gas.</p> <p>770 Bronson Avenue, approximately 30 years ago the gasoline tanks were replaced and then about 20 years ago removed.</p> <p>There seemed to be an environmental process at the time. The owner was Emilio Lyndia and the property was sold for development.</p> <p>The property is fenced off but no demolition has taken place.</p> <p>The parcel of land that is textbook extends through to Cambridge Street South. This land has been commercial with 1 and 2 storey concrete block and brick dating back to the 1940's.</p> <p>Land use was doctors' offices and wholesale distribution with some upstairs apartments.</p> <p>Another land use was for an electrical contractor.</p> <p>Heating for these buildings was likely oil furnaces later converted to gas. An old furnace oil line went up the street there.</p> <p>The demolition involved some asbestos removal and then demolition and sorting and removal by truck.</p> <p>He did not believe that there were any basements on Cambridge but likely on Bronson.</p> <p>He indicated that oil tanks were limited to 200 gallon residential types and was not aware of any spills.</p> <p>The property to the south on Bronson was a 2 storey wood frame house but became a 2 storey office in the 1960's.</p> <p>On Cambridge street the next door neighbour is an old 4 storey apartment building and a 1960's six-storey apartment.</p> <p>The six-storey apartment was built on the site of an old lumber yard.</p>
Reliability	Very reliable as Mr. Lumsden has lived in the area for over 50 years.

6 SITE RECONNAISSANCE

Table 6-1 Site Reconnaissance Investigation Notes

REQUIRED INFORMATION	SPECIFICS
date and time of the investigation	December 2, 2015.
weather conditions	The temperature was approximately 5°C and weather conditions were overcast during the visit.
the length of time of the investigation,	2 hours
whether the facility was operating at the time of the investigation, where the phase one property is an enhanced investigation property that is currently being used for one of the uses described in clause 32 (1) (b) of the regulation	<p>Site reconnaissance was conducted by Ms. Kathryn Maton. The site reconnaissance also included a visual inspection of adjacent properties and surrounding properties located wholly or partly within the P1SA. The visual inspection was conducted from the Phase 1 Property boundary and publicly accessible areas to identify any potentially contaminating activities, water bodies and areas of natural significance.</p> <p>Select photographs taken during the site reconnaissance are provided in Appendix D.</p>
The name and qualifications of the person conducting the investigation	Ms. Kathryn Maton, C.E.T. conducted the assessment. See additional information in Section 8.3 .

6.1 SPECIFIC OBSERVATIONS AT PHASE ONE PROPERTY

The following table summarizes the specific site reconnaissance observations.

Table 6-2 Site Reconnaissance Observations

GENERAL

i. Subject Site Structures and Improvements including Below-Ground Structures	The Phase 1 Property was vacant except for two unoccupied mobile trailers located adjacent to Bronson Avenue. These two trailer appeared to be used as a model home sales office (approximately 65 m ²) and a construction office (approximately 16 m ²).
ii. Underground Storage Tanks (UST)	There were no underground storage tanks (USTs) observed during the site reconnaissance. No information on historical USTs was obtained.
iii. Above Ground Storage Tanks (AST)	There were no above ground storage tanks (ASTs) observed during the site reconnaissance. No information on historical ASTs was obtained.
iv. Potable and Non-potable Water Sources	Potable water is likely provided via the municipal water distribution system.
Underground Utilities and Corridors	
Underground Utilities and Corridors	There were no indications that underground utilities, however underground electrical, water and sewer services are anticipated.
Features and Structures of On-Site Buildings	
i. Entry and Exit Points	The entrance and exit into the model home sales office was from Bronson Avenue (east side) and the entrance and exit into the construction trailer was on the west side.
ii. Heating & Cooling Systems	A portable window air conditioning unit was observed on the south side of the construction office trailer. A small furnace was observed on the north side of the model home office trailer. It is not known what fuel supplies the furnace but electricity is suspected.
iii. Drains, Pits, Sumps	There were no drains, pits or sumps observed on the Phase 1 Property.
iv. Unidentified Substances	No evidence of unidentified substances that could have an effect on the environmental conditions of the Phase 1 Property was observed.
Wells and Sewage Works	
i. Wells	A monitoring well was observed on the northwest portion of the Phase 1 Property. It was observed to be in good condition (i.e., FG-1).
ii. Sewage Works	There were no sewage works observed at the Site.
Ground Surface and Railway Lines	
iii. Ground Surface	The ground surface of the Phase 1 Property was bare soil with some pieces of asphalt and vegetation in the west portion and compact gravel on the east portion. An asphalt driveway runs along the north side of the Phase 1 Property.
iv. Railway Lines and Spurs	No evidence of railway lines or spurs was observed at the Phase 1 Property.
Soil and Vegetation	
i. Stained Soil, Vegetation or Pavement	No areas of stained soil, pavement, or vegetation were observed.
ii. Stressed Vegetation	No evidence of stressed vegetation was observed on the Phase 1 Property.
iii. Areas where fill and debris materials appear to have been placed or graded	Compacted gravel fill material was observed on the east portion of the Phase 1 Property. The west side of the Phase 1 Property had pieces of asphalt and debris mixed with soil which was likely from former demolition operations. The Phase 1 Property was generally graded so as to be level with the surrounding properties.
iv. Potentially contaminating activity	Potentially contaminating activities were not identified at the Phase 1 Property during the site visit. The north adjacent property located at 770 Bronson Avenue was under construction, and it was surrounded by hoarding.

v. Details of unidentified substances found at the property	None observed.
Enhanced Investigation Property	
i. Enhanced Investigation Property	Based on the current and historic uses, the Phase 1 Property is not considered an enhanced investigation property as described in clause 32 (1) (b) of O. Reg. 153/04.
Site Limitations	
Site Limitations	The interior of the mobile trailers located were not accessible at the time of the site visit. The ground beneath the trailers was not visible due to the presence of the trailers.
Additional Potential Environmental Concerns	
i. PCB Materials and Equipment	PCB-containing materials may be present in electrical transformers and ballasts produced prior to 1920. Two pole-mounted transformers were observed on the southeast corner of the Phase 1 Property along Bronson Avenue and in the northwest corner along Cambridge Street South. Fluorescent lighting with ballasts containing PCBs may be present inside the two office trailers.
ii. Lead Containing Materials (LCMs)	The ages of the two office trailers are unknown; therefore it is possible for LCMs to be present.
iii. Asbestos Containing Materials (ACMs)	The ages of the two offices trailers are unknown; therefore it is possible for ACMs to be present.
iv. Urea Formaldehyde Foam Insulation (UFFI)	The ages of the two office trailers are unknown, therefore it is possible for UFFI to be present.
v. Ozone Depleting Substances (ODSs)	A portable window air conditioning unit was observed on the south side of the construction office. The refrigerant in the unit may contain chloro-fluorocarbon (CFC) or hydrochlorofluorocarbons (HCFC), both of which are recognized as Ozone Depleting Substances (ODSs)
vi. Herbicides and Pesticides	At the time of the site reconnaissance, there was no evidence of unacceptable use of herbicides and pesticides.
vii. Pits and Lagoons	No pits or lagoons were observed during the site reconnaissance.
viii. Air Emissions	There were no sources of air emissions requiring an ECA observed on-site.

6.2 OBSERVATIONS WITHIN PHASE 1 STUDY AREA

As part of the site reconnaissance a visual inspection of adjacent properties and properties located within the P1SA was conducted from the boundary of the Phase 1 Property and from publicly accessible areas to identify any potentially contaminating activities (PCAs). At the time of the site reconnaissance, land use within the P1SA was mixed commercial and residential as indicated on **Figure 7** and summarized below in **Table 6-3**.

Table 6-3 Phase 1 Study Area Reconnaissance Observations

IDENTIFIABLE FEATURES	SPECIFIC OBSERVATIONS
Immediately Adjacent Properties	
Adjacent Land Uses	<p>North: Residential apartment building with a parking garage (northwest), commercial (northeast) actively under construction (fenced off – not visible).</p> <p>South: Vacant office building under renovation and apartment building</p> <p>East: Soccer Field (Ottawa-Carleton School Board)</p> <p>West: Residential</p>
Phase 1 Study Area Properties	

Water Bodies	Dow's Lake is located approximately 380 m west of the Site.
Areas of Natural Significance	Areas of Natural Significance were not identified.

6.3 WRITTEN DESCRIPTION OF INVESTIGATION

The written description of the investigation and reconnaissance are documented throughout Section 5.0 with areas of environmental concern identified and discussed in Section 7.0 below.

7 REVIEW AND EVALUATION OF INFORMATION

7.1 CURRENT AND PAST USES

The following table summarizes the current and historic property use of the Site as inferred from records obtained during the Phase 1 ESA records review:

Table 7-1 Current and Past Land Use

YEAR	NAME OF OWNER	DESCRIPTION OF PROPERTY USE	PROPERTY USE	OTHER OBSERVATIONS FROM AERIAL PHOTOGRAPHS, FIRE INSURANCE PLANS, ETC.
744 Bronson Avenue				
pre-1801	The Crown	Undeveloped Crown Land	Agricultural or other use	
1886 – 1924	C. Walleser R.D. Fraser James Desnoyes John Keefer Michael Doan Patrick Shuhan George Pennock Murdock Beaton George Little Alexander Mackay	Unknown when developed privately-owned land	Agricultural or other use to residential	1912 FIP indicates two buildings on the subject Property. 1963 FIP indicates Phase 1 Property contains three buildings. 1933 Aerial Photograph building shown on Property. City Directories listed the property as residential from 1930 (first listing) to 1980.
1924 – 1936	Shaw Bread Company Limited Canada Bread Company Limited Ottawa Upholstered Furniture Ltd. Canada Bread Company	Bread manufacture and Furniture Upholstery Company	Commercial use	
1936-1978	Ambassador Realty Inc.			City Directories indicated a music company occupied the Site in 1940.
1978-1989	Professional Institute of the Public Service of Canada			City Directories indicated a music company and a computer business occupied the subject Property in 1988/89.
1989-2012	Crainplan Limited			
2012-2015	Samcon Cambridge Inc.	Vacant	Commercial use	

YEAR	NAME OF OWNER	DESCRIPTION OF PROPERTY USE	PROPERTY USE	OTHER OBSERVATIONS FROM AERIAL PHOTOGRAPHS, FIRE INSURANCE PLANS, ETC.

Contractors. 1977 Aerial Photograph indicates buildings on the Phase 1 Property. City Directories indicated various commercial businesses including Crain George A & sons Ltd. and Crain Derek Arch & City Planner Crainplan Ltd.
1970 – 2012	George Crain and Reginald Crain Edwin Crain and Geoffrey Crian George Crain and Sons Limited Crainplan Limited	Contractors Business	Commercial use	1983 Aerial Photograph The building is shown on the Phase 1 Property.
2012-2015	Samcon Cambridge Inc.	Vacant	Commercial use	2015 Aerial Image shows buildings removed from Phase 1 Property.

7.2 POTENTIALLY CONTAMINATING ACTIVITY

Potentially contaminating activities (PCAs) on the Phase 1 Property or within the P1SA that may be contributing to an area of potential environmental concern (APEC) are summarized and assessed in the **Table 7-2** below. All PCAs including the number and location (if known) of USTs are illustrated on the Phase 1 Conceptual Site Model provided as **Figure 7**. Refer to *O. Reg. 153/04, Schedule D, Table 2* for a complete list of PCAs.

Table 7-2 Summary of PCAs

POTENTIALLY CONTAMINATING ACTIVITY	OBSERVATIONS
30. Importation of Fill Material of Unknown Quality	On-Property – Fill of unknown origin covering the whole Phase 1 Property confirmed by Genivar in December 2011 to be approximately 1 m thick. Also reported to be mercury and lead impacted by Genivar in December 2011 so fill across the whole Phase 1 Property considered as APEC #1

POTENTIALLY CONTAMINATING ACTIVITY	OBSERVATIONS
28. Gasoline and Associated Products Storage in Fixed Tanks	On-Property – Record reviews indicate historical heating of structures on the Phase 1 Property with furnace oil so fixed tanks are assumed to be present for all former buildings before delivery of furnace oil by pipeline along Cambridge Street South was replaced by natural gas and/or electrical heating systems. Since the exact location of these historical facilities is not known APEC #3 has been expanded to include the entire Phase 1 Property. In addition, the December 2011 groundwater analytical results from the Genivar report indicated petroleum hydrocarbon impacts in the F3 and F4 fractions at FG-1 and FG-3.
28. Gasoline and Associated Products Storage in Fixed Tanks	P1SA – Records review identified a gasoline station with USTs, pump island and associated piping adjacent north of the Phase 1 Property – up-gradient on fractured bedrock so moderate to high potential for an adverse environmental impact so western end of the Phase 1 Property is considered as APEC #3
28. Gasoline and Associated Products Storage in Fixed Tanks	P1SA – Records review identified two properties to the west of the Phase 1 Property – cross gradient and more that 100 m distant on fractured bedrock with low potential for creating an adverse environmental impact so not considered as an APEC
37. Operation of Dry Cleaning Equipment (where chemicals are used)	P1SA – Adjacent to southeast corner of the Phase 1 Property was a historic dry cleaning business – adjacent on fractured bedrock so moderate potential for creating an adverse environmental impact to the east end of the Phase 1 Property is considered to be APEC #4
55. Transformer Manufacturing, Processing and Use	P1SA – Northeast of the Phase 1 Property (intersection of Bronson Avenue and Glebe Avenue) – up-gradient on fractured bedrock but heavy oils with or without PCBs adsorb to soils and bedrock and not mobile in groundwater so at 90 m distant has a low potential for creating an adverse environmental impact so not considered an APEC.
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	On-Property – Western end of the Phase 1 Property for historical wood treating. APEC #2
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	P1SA – Adjacent to the southwest corner of the Phase 1 Property.-down-gradient on fractured bedrock so low potential for adverse environmental impact and already addressed by APEC #2
Other – Seasonal de-icing activities	P1SA – Historical seasonal de-icing of Cambridge Street South, Carling Avenue and Bronson Avenue is anticipated to have an adverse environmental impact on the groundwater quality (i.e., sodium and chloride) in the fractured bedrock across the entire Phase 1 Property. However, due to road safety exemption any sodium and chloride impacted groundwater in the fractured bedrock could potentially be exempt and not considered an APEC.
Other - Spills	P1SA – Records review identified small quantity spills of transformer oil and gasoline into sewer at the intersection of Carling Avenue and Bronson Avenue which are up-gradient of the former service station situated adjacent to the Phase 1 Property so any potential adverse environmental impacts will be assessed as part of APEC #3.

7.3 AREAS OF POTENTIAL ENVIRONMENTAL CONCERN

The table of areas of potential environmental concern (APECs) presented in a form as approved by the Director is provided below in **Table 7-4**. This table was prepared in accordance with *clause 16(2)(a), Schedule D, O. Reg. 153/04*.

7.4 PHASE 1 CONCEPTUAL SITE MODEL

As part of the Phase 1 ESA, a Conceptual Site Model was developed for the Phase 1 Property comprised of two properties with the municipal addresses of 774 Bronson Avenue and 557 Cambridge Street South in Ottawa, Ontario.

7.4.1 FIGURES

A Phase 1 Conceptual Site Model is presented as **Figure 7** and it includes the following information for the Phase 1 Property and P1SA:

- Any existing buildings and structures,
- Water bodies located in whole, or in part, on the P1SA,
- Areas of natural significance located in whole, or in part, on the P1SA,
- Drinking water wells at the Phase 1 Property,
- Roads, including names, within the P1SA,
- Uses of properties adjacent to the Phase 1 Property,
- Areas where any PCAs have occurred, including location of any tanks (USTs and/or ASTs),
- APECs identified on the Phase 1 Property are presented on **Figure 8**.

7.4.2 POTENTIALLY CONTAMINATING ACTIVITY

Selected PCAs identified within the P1SA and all PCAs adjacent to and on the Phase 1 Property are shown on **Figure 7**. Those PCAs which were identified as contributing to an APEC on the Phase 1 Property are shown on **Figure 7** in red, while PCAs which are not considered to be contributing to an APEC are shown in black. **Table 7-3** below summarises the PCAs that have been determined to contribute to APECs on the Phase 1 Property.

Table 7-3 Summary of PCAs Contributing to an On-Site APECs

POTENTIALLY CONTAMINATING ACTIVITY	OBSERVATIONS
30. Importation of Fill Material of Unknown Quality	<u>On-Property</u> – Fill of unknown origin on site. APEC #1
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	<u>On-Property</u> – Western portion of Site for historical wood treating. APEC #2
28. Gasoline and Associated Products Storage in Fixed Tanks	<u>On-Property</u> – Records review identified historical fuel oil used for heating of former building. PHCs in the F3 and F4 ranges detected in groundwater. Since location of these former tanks is not known the whole Phase 1 Property should be considered as APEC #3 <u>P1SA</u> – Records review identified historical fuel oil used for heating on was a gasoline station with USTs, pump island and associated piping contributes to APEC #3 on the east end of the Phase 1 Property
37. Operation of Dry Cleaning Equipment (where chemicals are used)	<u>P1SA</u> – Adjacent historic dry cleaning business. –southeast corner of the Phase 1 Property. APEC #4

7.4.3 POTENTIAL ENVIRONMENTAL CONCERN AND POTENTIAL CONTAMINANT OF CONCERN

A summary of the APECs and the associated potential contaminants of concern (PCOCs) are presented in **Table 7-4** below:

Table 7-4 Summary of APECs and PCOCs

ENVIRONMENTAL CONCERN	LOCATION	AREA OF CONCERN	CONTAMINANTS OF CONCERN	MEDIA	RISK LEVEL
Fill material APEC #1	On-Property	Whole Property.	BTEX, PHCs, PAHs, M&I	Soil	High - lead and mercury impacts already detected in fill material plus fill from the historical development and recent building demolition.
Historic wood treating APEC #2	On-Property	West end	M&I, As, Cr (VI) Hg, PAHs	GW & Soil	Moderate-fractured bedrock with large hydraulic conductivity.
Historic gasoline station with USTs and associated equipment APEC #3	Off-Property On-Property	Eastern end Whole Property	BTEX, PHCs, PAHs, M&I	GW & Soil	High – PHC impacts already detected in fractured bedrock with large hydraulic conductivity
Dry cleaning operations APEC #4	Off-Property	Southeast portion	BTEX, PHCs, VOCs, PAHs	GW & Soil	Moderate to high-fractured bedrock with large hydraulic conductivity

Notes:

BTEX – Benzene, Toluene, Ethylbenzene, and Xylenes
 GW – Groundwater
 PHCs – Petroleum Hydrocarbons
 VOCs – Volatile Organic Compounds
 PAHs - Polycyclic Aromatic Hydrocarbons
 M&I – Metals and Inorganics
 As – Arsenic
 Hg – Mercury
 Cr(VI) – Chromium (hexavalent)

7.4.4 IMPACT OF UNDERGROUND UTILITIES

Underground utilities have the potential to affect contaminant distribution and transport. Underground utilities on adjacent properties may also affect local migration of contaminants in the subsurface.

7.4.5 GEOLOGICAL AND HYDROGEOLOGICAL INFORMATION

Surficial geology in the vicinity of the Phase 1 Property is anticipated to be limestone bedrock of the Verulam Formation.

The inferred shallow groundwater flow direction is anticipated to be southwesterly.

7.4.6 UNCERTAINTY AND ABSENCE OF INFORMATION

During the records review, WSP relied on information obtained from municipal, provincial, and independent sources as referenced in this report. Although the information was assessed for consistency, verification of the accuracy or the completeness of this third party information was not completed.

WSP made all reasonable inquiries to obtain reasonably accessible information for this assessment as required by *O. Reg. 153/04 Schedule D Table 1: Mandatory Requirements for Phase One Environmental Site Assessment Reports*. All responses to information requests were received prior to completion on this report, except for the MOECC freedom of information (FOI). If MOECC records are obtained that are environmentally significant in terms of this ESA, an addendum will be forwarded to the Client. The evaluation provided in this report reflects our best judgment in light of the information available at the time of report preparation.

8 CONCLUSIONS

A Phase 1 ESA was conducted for the Phase 1 Property comprised of two adjacent properties with municipal addresses of 774 Bronson Avenue and 557 Cambridge Street South in Ottawa, Ontario. The objective of the assessment was to determine any real or potential environmental liabilities associated with the Phase 1 Property through the completion of a historical records review, site reconnaissance and interviews. The results of this Phase 1 ESA are documented in this report and reflect site conditions observed at the time of the site reconnaissance.

Based on information obtained as part of the Phase 1 ESA records search, site reconnaissance and interview process, the following findings are presented:

- The inferred shallow groundwater flow direction is southwesterly.
- The Phase 1 Property is currently empty except for two unoccupied office trailers located adjacent to the Bronson Avenue. These two adjacent trailers appeared to have been used as a model home sales office (approximately 65 m²) and a construction office (approximately 16 m²).
- Surficial geology is absent in the vicinity of the Phase 1 Property with limestone bedrock of the Verulam Formation anticipated at surface.
- The Phase 1 Property was first developed prior to 1928 with residential use on 744 Bronson Avenue portion. Various commercial businesses including a contractor business with lumber storage have existed on the Cambridge Street South portion.

Several potentially contaminating activities (PCAs) were identified on-Property and within the Phase 1 Study Area (P1SA). Those activities that were deemed to be contributing to an area of potential environmental concern (APEC) for the Phase 1 Property are summarized below:

POTENTIALLY CONTAMINATING ACTIVITY	OBSERVATIONS
30. Importation of Fill Material of Unknown Quality	<u>On-Property</u> – Fill of unknown origin on site. APEC #1
59. Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	<u>On-Property</u> – Western portion of Site for historical wood treating. APEC #2
28. Gasoline and Associated Products Storage in Fixed Tanks	<u>On-Property</u> – Records review identified historical fuel oil used for heating of former building. PHCs in the F3 and F4 ranges detected in groundwater. Since location of these former tanks is not known the whole Phase 1 Property should be considered as APEC #3 <u>P1SA</u> – Records review identified historical fuel oil used for heating on was a gasoline station with USTs, pump island and associated piping contributes to APEC #3 on the east end of the Phase 1 Property
37. Operation of Dry Cleaning Equipment (where chemicals are used)	<u>P1SA</u> – Adjacent historic dry cleaning business. –southeast corner of the Phase 1 Property. APEC #4

The following areas of potential environmental concern and associated contaminants of concern were identified on the Site:

ENVIRONMENTAL CONCERN	LOCATION	AREA OF CONCERN	CONTAMINANTS OF CONCERN	MEDIA	RISK LEVEL
Fill material APEC #1	On-Property	Whole Property.	BTEX, PHCs, PAHs, M&I	Soil	High - lead and mercury impacts already detected in fill material plus fill from the historical development and recent building demolition.
Historic wood treating APEC #2	On-Property	West end	M&I, As, Cr (VI) Hg, PAHs	GW & Soil	Moderate-fractured bedrock with large hydraulic conductivity.
Historic gasoline station with USTs and associated equipment APEC #3	Off-Property On-Property	Eastern end Whole Property	BTEX, PHCs, PAHs, M&I	GW & Soil	High – PHC impacts already detected in fractured bedrock with large hydraulic conductivity
Dry cleaning operations APEC #4	Off-Property	Southeast portion	BTEX, PHCs, VOCs, PAHs	GW & Soil	Moderate to high-fractured bedrock with large hydraulic conductivity

Notes:

BTEX – Benzene, Toluene, Ethylbenzene, and Xylenes
 GW – Groundwater
 PHCs – Petroleum Hydrocarbons
 VOCs – Volatile Organic Compounds
 PAHs - Polycyclic Aromatic Hydrocarbons
 M&I – Metals and Inorganics
 As – Arsenic
 Hg – Mercury
 Cr (VI) – Chromium (hexavalent)

8.1 WHETHER PHASE 2 ENVIRONMENTAL SITE ASSESSMENT REQUIRED

We recommend that a Phase 2 ESA be completed to investigate the areas of potential environmental concern, chemicals of concern and potentially impacted media identified in this report. A record of site condition (RSC) cannot be filed based upon this Phase 1 ESA alone.

8.2 QUALIFIER

This assignment is limited to a data assessment, site inspection, and preliminary analysis of potential areas of contamination. During this assessment, WSP has relied on information obtained from sources as referenced in this report. Verification of the accuracy or completeness of this third-party information was not completed.

Site characterization was limited to the direct observation of visible and accessible locations. Subsurface investigations, sampling, and laboratory analyses were not completed as part of this assessment.

This Phase 1 ESA was prepared for Textbook Student Suites solely for their exclusive use in the evaluation of 774 Bronson Avenue and 557 Cambridge Street South, Ottawa, Ontario. It is understood that site

conditions, environmental or otherwise, are not static and that this report documents site conditions at the time of the assessment.

The conclusions provided in this report reflect our best judgment in light of the information available at the time of report preparation. Any use, which a third party makes of this report, or any reliance on or any decisions to be made based on it, is the responsibility of such third parties. WSP accepts no responsibility for damages, if any, suffered by any third party because of decisions made or actions based on this report. If site conditions are observed to be different from those reported, please contact us.

8.3 QUALIFICATIONS OF THE ASSESSOR

The Phase 1 ESA record review was completed by Ms. Lisa Gardiner Environmental Scientist. Lisa is a Project Lead at WSP with over 12 years of experience in environmental site assessments. She has conducted numerous Phase 1 Environmental Site Assessments for industrial, commercial and residential properties and is trained in various hazardous materials and identification of environmental customs. Her previous clients include various Ontario municipalities, provincial ministries, federal departments, housing authorities, school boards, and community colleges. Her work meets the requirements of CSA Standard Z768-01, which involves identifying, defining and quantifying potential environmental liabilities to satisfy due diligence obligations. Past work also has included completion of several Phase 2 Environmental Site Assessments (CSA Z769-00), field sampling and completion of numerous reporting and coordination work for various clients.

The Phase 1 ESA Site visit was completed by Ms. Kathryn Maton, Environmental Technologist. Kathryn has over 6 years of experience in environmental site assessments. She has conducted numerous Phase I and II Environmental Site Assessments for industrial, commercial and residential properties. Kathryn worked on a yearlong remediation project with various provincial government authorities, contractors and stake holders in preparation for an RSC (15+ million dollars). Her work meets the requirements of CSA Standard Z768-01, which involves identifying, defining and quantifying potential environmental liabilities to satisfy due diligence obligations.

This report was prepared under the supervision of Philip Romeril, P. Eng. Mr. Romeril is a Senior Environmental Engineer with WSP (formerly SPL) and has a Bachelor of Science Degree in Engineering Geology and a Master of Science Degree in Civil Engineering both from Queen's University. He has been a recognized Professional Engineer in Ontario since 1988. Philip has conducted and managed geo-environmental and hydrogeological investigations including Phase One and Two ESAs in Ontario, Manitoba, Alberta, Northwest Territories, and the Alaskan and Canadian Beaufort Seas.

8.4 SIGNATURES

WSP carried out this Phase One ESA and confirms the findings and conclusions presented in this report.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review on environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by EcoLog Environmental Risk Information Services Ltd ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, EcoLog ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of EcoLog ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by EcoLog ERIS Ltd. Copyright in data used in the Service or Report(s) (the "Data") is owned by EcoLog ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of EcoLog ERIS.

Executive Summary

Property Information:

Project Property: 744 Bronson Ave
774 Bronson Ave Ottawa ON K1S4G4

Description:

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

Appendix: Database Descriptions

Ecolog Environmental Risk Information Services Ltd can search the following databases. The extent of Historical information varies with each database and current information is determined by what is publicly available to Ecolog ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of all abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

*Government Publication Date: Sept 2002**

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Mar 2015

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Jan 2014

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of all known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 2001-Jul 2014

Borehole:Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval:Provincial [CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

*Government Publication Date: 1985-Oct 30, 2011**

Commercial Fuel Oil Tanks:Provincial [CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: 1948-2014

Chemical Register:Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1992, 1999-Jul 2014

Inventory of Coal Gasification Plants and Coal Tar Sites:Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

*Government Publication Date: Apr 1987 and Nov 1988**

Compliance and Convictions:Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Feb 2014

Certificates of Property Use:Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Sep 2015

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886-Jun 2014

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 31 2011-Oct 2015

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Sep 2015

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 31, 2011-Jun 2015

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

*Government Publication Date: 1992-2007**

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 2014

Environmental Issues Inventory System:

Federal EIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

*Government Publication Date: 1992-2001**

Emergency Management Historical Event:

Provincial EMHE

The Emergency Management Historical Event data class will store the locations of historical occurrences of emergency events. Events captured will include those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance.

Government Publication Date: May 31, 2014

List of TSSA Expired Facilities:

Provincial EXP

This is a list of all expired facilities that fall under the TSSA (TSSA Act & Safety Regulations), including the six regulations that exist under the Fuels Safety Division. It will include facilities such as private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. These tanks have been removed and automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Current to Nov 2014

Federal Convictions:

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

*Government Publication Date: 1988-Jun 2007**

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites Inventory includes information on all known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: June 2000-Jul 2015

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of all aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sept 2003

Fuel Storage Tank:

Provincial FST

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: 2010-Nov 2014

Fuel Storage Tank - Historic:

Provincial FSTH

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

*Government Publication Date: Pre-Jan 2010**

Ontario Regulation 347 Waste Generators Summary:

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-May 2015

TSSA Historic Incidents:

Provincial HINC

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

*Government Publication Date: 2006-June 2009**

Indian & Northern Affairs Fuel Tanks:

Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of all aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

*Government Publication Date: 1950-Aug 2003**

TSSA Incidents:

Provincial INC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: June 2009-2014

Landfill Inventory Management Ontario:

Provincial [LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: 2012

Canadian Mine Locations:

Private [MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

*Government Publication Date: 1998-2009**

Mineral Occurrences:

Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Apr 2013

National Analysis of Trends in Emergencies System (NATES):

Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

*Government Publication Date: 1974-1994**

Non-Compliance Reports:

Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: 1994-2012

National Defence & Canadian Forces Fuel Tanks:

Federal [NDFT](#)

The Department of National Defence and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

*Government Publication Date: Up to May 2001**

National Defence & Canadian Forces Spills:

Federal NDSP

The Department of National Defence and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Aug 2010

National Defence & Canadian Forces Waste Disposal Sites:

Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

*Government Publication Date: 2001-Apr 2007**

National Environmental Emergencies System (NEES):

Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for all previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

*Government Publication Date: 1974-2003**

National PCB Inventory:

Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. All federal out-of-service PCB containing equipment and all PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

*Government Publication Date: 1988-2008**

National Pollutant Release Inventory:

Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-2013

Oil and Gas Wells:

Private OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Sep 2015

Ontario Oil and Gas Wells:

Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Inventory of PCB Storage Sites:

Provincial [OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial [ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Sep 2015

Canadian Pulp and Paper:

Private [PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009

Parks Canada Fuel Storage Tanks:

Federal [PCFT](#)

Canadian Heritage maintains an inventory of all known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial [PES](#)

The Ontario Ministry of Environment maintains a database of all manufacturers and vendors of registered pesticides.

Government Publication Date: 1988-Jun 2013

TSSA Pipeline Incidents:

Provincial [PINC](#)

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: June 2009-2014

Private and Retail Fuel Storage Tanks:

Provincial [PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial [PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Sep 2015

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2013

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2015

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jul 2014

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

*Government Publication Date: 1992-Mar 2011**

Ontario Spills:

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Feb 2014

Wastewater Discharger Registration Database:

Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-2011

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Mar 2007

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

The TSSA, Under the Liquid Fuels Handling Code and the Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, you may apply to seek a variance from this code requirement. This is a list of all variances granted for abandoned tanks.

Government Publication Date: Current to Nov 2014

Waste Disposal Sites - MOE CA Inventory:

Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: 1970-Jun 2015

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: 1955-Mar 2014

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries". All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

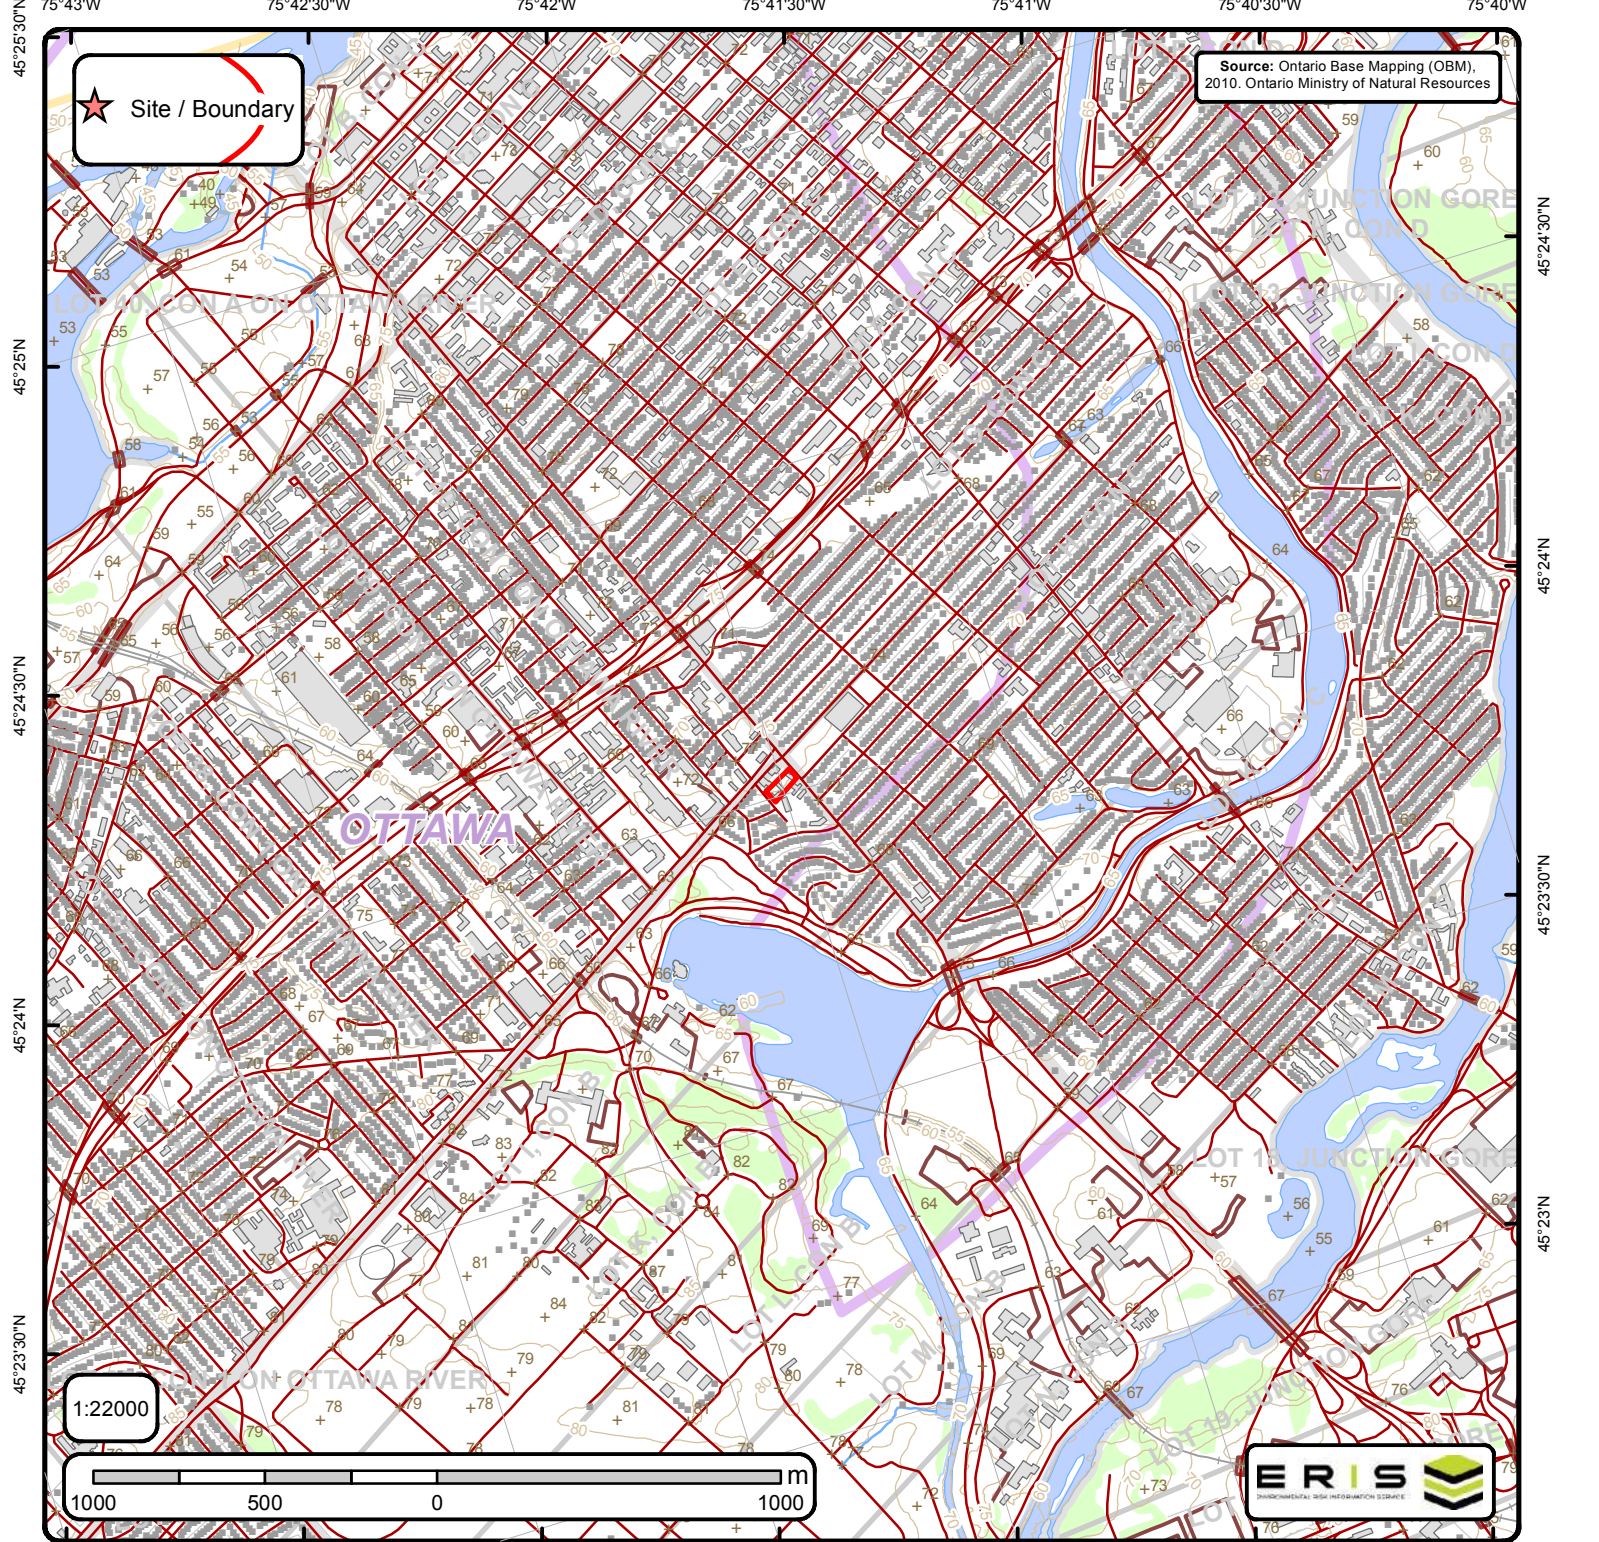

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

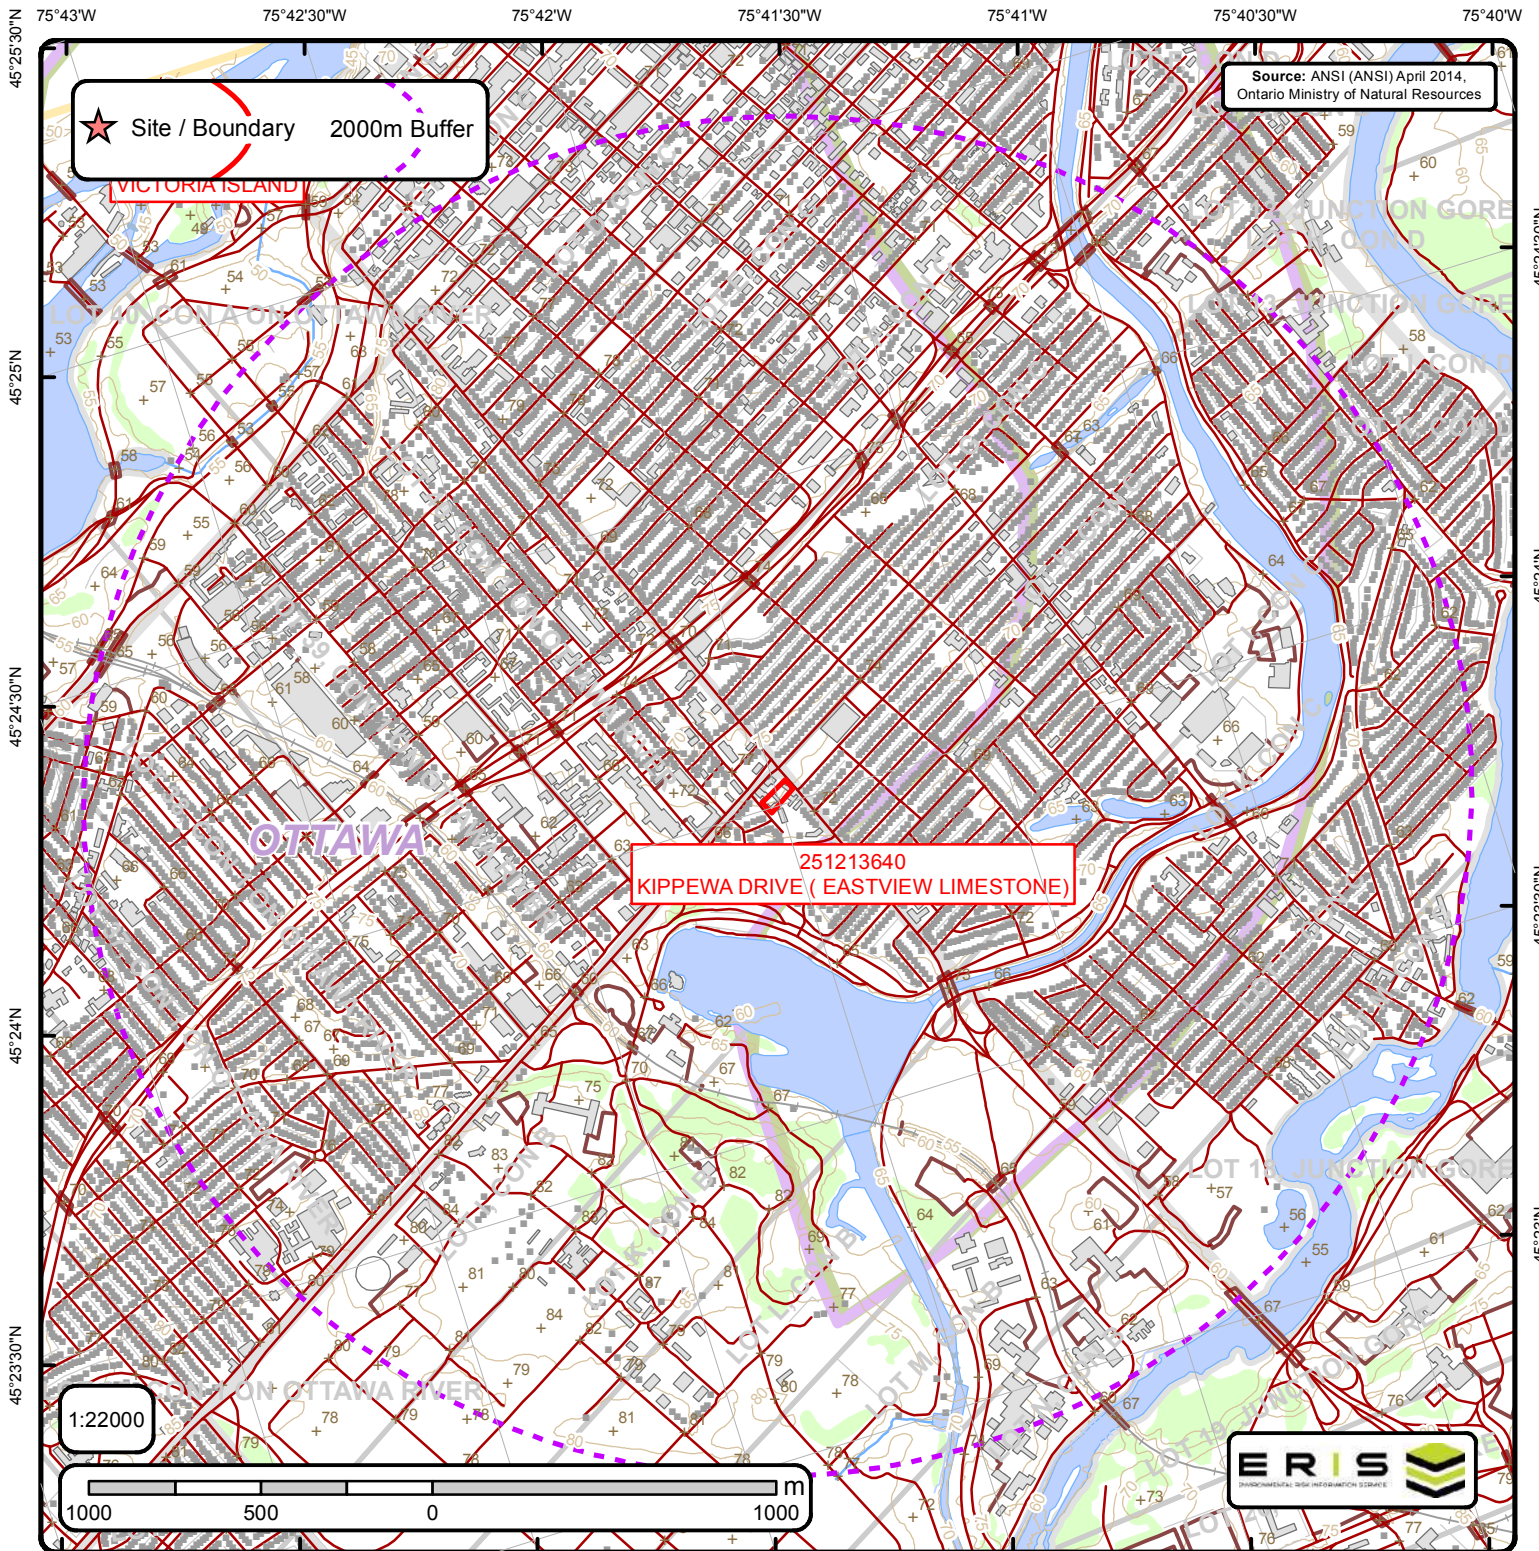

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and were included as reference.

Ontario Base Mapping (OBM) Data

ID: 24362 | **Unit Name:** Bedrock |
Deposit Type Code: Pa | **Deposit Age:** Paleozoic | **Map Number:** of3103 | **Map Name:** Ottawa | **Source Map Scale:** 1:50 000 |
Primary Material: Paleozoic Bedrock | **Primary Material Modifier:** | **Secondary Material:** | **Primary General:** | **Primary General Modifier:** | **Veneer:** clay, silt, sand, gravel, diamicton | **Episode:** | **Sub Episode:** | **Phase:** | **Stratus Modifier:** Surface |
Provenance: | **Carbon Content:** | **Formation:** | **Permeability:** Variable | **Material Description:** Limestone, dolomite, sandstone, and locally shale; relatively flat lying; mainly occurring as bare, tabular outcrops; includes areas thinly veneered by unconsolidated Quaternary sediments up to 1 m (3 ft) thick.

ID: 25356 | **Unit Name:** Offshore marine deposits |
Deposit Type Code: 3a | **Deposit Age:** Quaternary (Champlain Sea) | **Map Number:** of3103 | **Map Name:** Ottawa | **Source Map Scale:** 1:50 000 | **Primary Material:** clay, silt | **Primary Material Modifier:** | **Secondary Material:** | **Primary General:** glaciomarine | **Primary General Modifier:** foreshore/basinal | **Veneer:** silt, sand | **Episode:** Wisconsin | **Sub Episode:** Michigan | **Phase:** | **Stratus Modifier:** Surface | **Provenance:** | **Carbon Content:** | **Formation:** | **Permeability:** Low | **Material Description:** Clay and silt underlying erosional terraces; upper part of marine deposits removed to variable depths by fluvial erosion so in places clay is uniform blue-grey; unit includes lenses, bars and channel fills to sand and pockets of nonmarine silt that were

ID: 26669 | **Unit Name:** Till |
Deposit Type Code: 1a | **Deposit Age:** Quaternary | **Map Number:** of3103 | **Map Name:** Ottawa | **Source Map Scale:** 1:50 000 |
Primary Material: diamicton | **Primary Material Modifier:** sandy silt to silty sand | **Secondary Material:** | **Primary General:** glacial | **Primary General Modifier:** | **Veneer:** | **Episode:** Wisconsin | **Sub Episode:** Michigan | **Phase:** | **Stratus Modifier:** Surface |
Provenance: N-NE | **Carbon Content:** | **Formation:** Undifferentiated silty-sandy till on Paleozoic terrain | **Permeability:** Low-Medium |
Material Description: Sandy and silty compact diamicton, grey at depth but brown where oxidized; calcareous where derived from sedimentary rocks and not leached; consists dominantly of lodgment till. In areas that lie below marine limit (198 m a.s.l.) it is overlain by a disc

ID: 26727 | **Unit Name:** Till |
Deposit Type Code: 1a | **Deposit Age:** Quaternary | **Map Number:** of3103 | **Map Name:** Ottawa | **Source Map Scale:** 1:50 000 |

ID - ID applied to the Unit

Unit Name - Name of deposit

Deposit Type Code - The geological unit number taken from the original map legend.

Deposit Age - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

Map Number - Original map series number, eg., 'M2402' or 'P1973'. Each sgu_point feature is tagged to its original map.

Map Name - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

Source Map Scale - The scale at which the original map was captured, e.g., '1:50 000'

Primary Material - This attribute provides the user with information regarding the most prevalent material present within a given area.

Primary Material Modifier - This attribute provides the user with a more refined description of the lithological classification of the primary material.

Secondary Material - This attribute provides the user with information regarding subordinate materials present within a given area.

Primary General - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

Primary General Modifier - This attribute provides the user with a refined interpretation of the primary genetic modifier.

Veneer - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Phase - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

Stratus Modifier - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

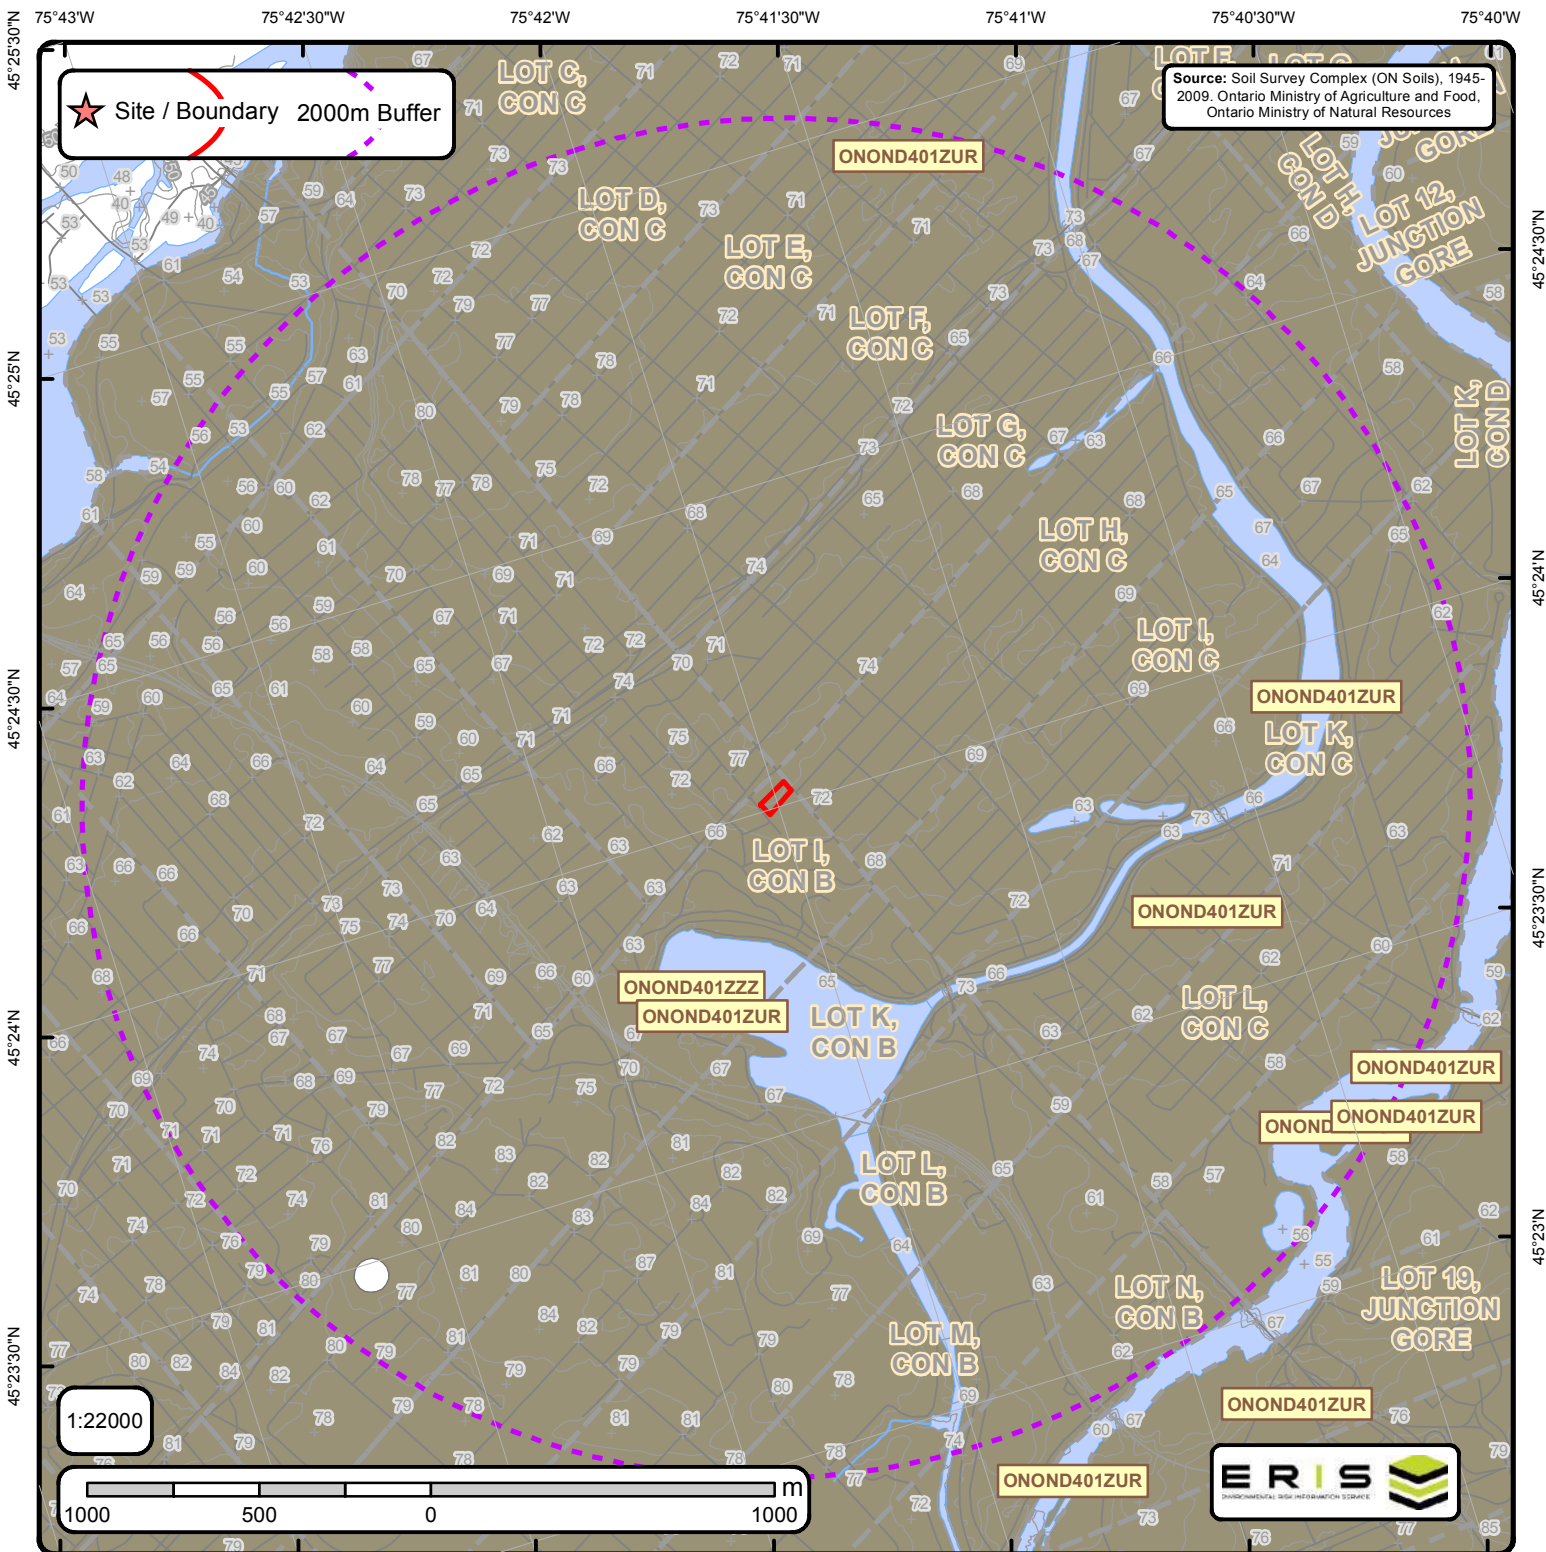

Provenance - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

Carbon Content - This attribute provides the user with information regarding the carbonate content of till.

Formation - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

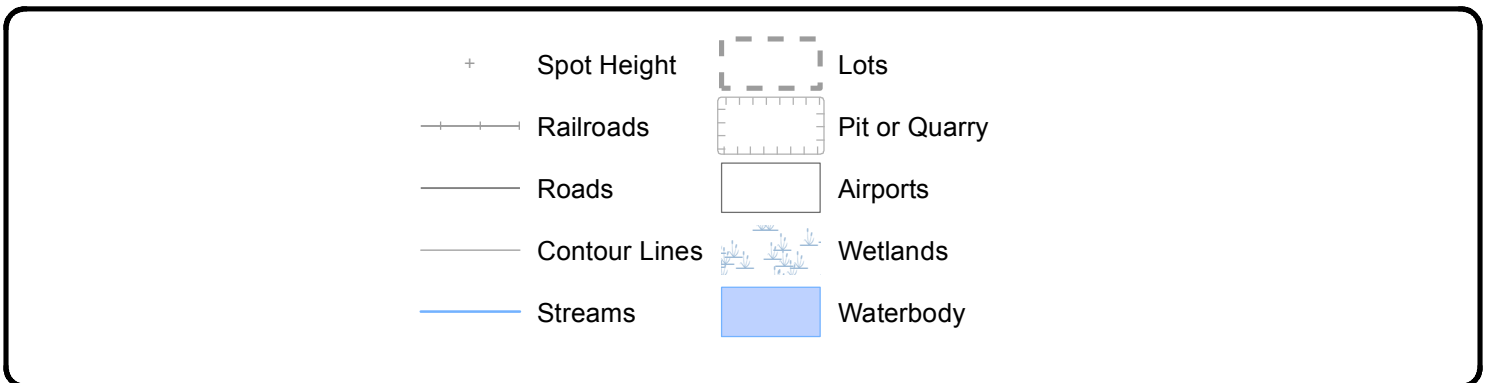

Permeability - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

Material Description - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.

Soils Report Metadata

Soil Survey Complex (ON Soils)

ONTARIO MINISTRY OF AGRICULTURE AND FOOD
 MINISTRY OF NATURAL RESOURCES
 1945-2009

Map Unit - The SOIL MAPUNIT is the basic element of an applied soil classification resulting from detailed soil surveys. Soil Map unit is comprised of one or more soil survey polygons. The MAPUNIT field was generated for each polygon by appending the PROVINCE and NSDB-ID codes with the MAP UNIT symbol that identified that polygon on the original printed soil map. The MAPUNIT usually encodes meaningful information about the soil type and topography; the same information which is found in the Component table. Within any one survey, a group of polygons with similar properties may be coded with the same MAPUNIT.

Soil Type - Identifies a specific soil profile.

Percent - Proportion of the area of the Soil Map Unit occupied by a specific soil component, expressed as a percent. For any particular SOIL MAPUNIT, the sum of the individual. Soil Map Unit Component Area values must be equal to 100%.

Code - Three letter CANSIS code for identifying soils. **Name** - Textual identifier of the soil. **Symbol** - Soil symbol as found in the soil Mapunit.

Survey - Name describing the geographic location where the Soil Survey was completed. Typically the name denotes an administrative boundary of an Upper Tier municipality that occurred at the time of the Soil Survey.

Slope - Predominant slope of the landscape expressed as a percent (%). Slope steepness is often referred to by Class.

Class	Range (%)	Terminology
A	0.0 - 0.5	Level
B	0.5 - 2	Nearly level
C	2.0 - 5	Very gentle slopes
D	5.0 - 9	Gentle slopes
E	9.0 - 15	Moderate slopes
F	15 - 30	Strong slopes
G	30 - 45	Very strong slopes
H	45 - 70	Extreme slopes
I	70 - 100	Steep slopes
J	> 100	Very steep slopes

Stoniness - Occurrence of surface stoniness

Code	Description
-	Not Applicable
0	Non-stony
1	Slightly stony
2	Moderately stony
3	Very stony
4	Exceedingly stony
5	Excessively stony

Drainage - Indicates classification of how well the soil drains.

Code	Description
-	Not Applicable
VR	Very Rapidly
R	Rapidly
W	Well
MW	Moderately Well
I	Imperfectly
P	Poorly
VP	Very Poorly

Texture - Describes the soil texture of the A Horizon in the soil profile.

Code	Description
S	coarse sand and loamy sand
SL	moderately coarse sandy loam
L	medium - moderately fine loam
SIL	silt loam
CL	clay loam
SIC	silty clay
C	clay
O	organic

CLI - Classification of soil and land physical and climatic capability for the production of common field crops as part of the Canada Land Inventory (CLI).

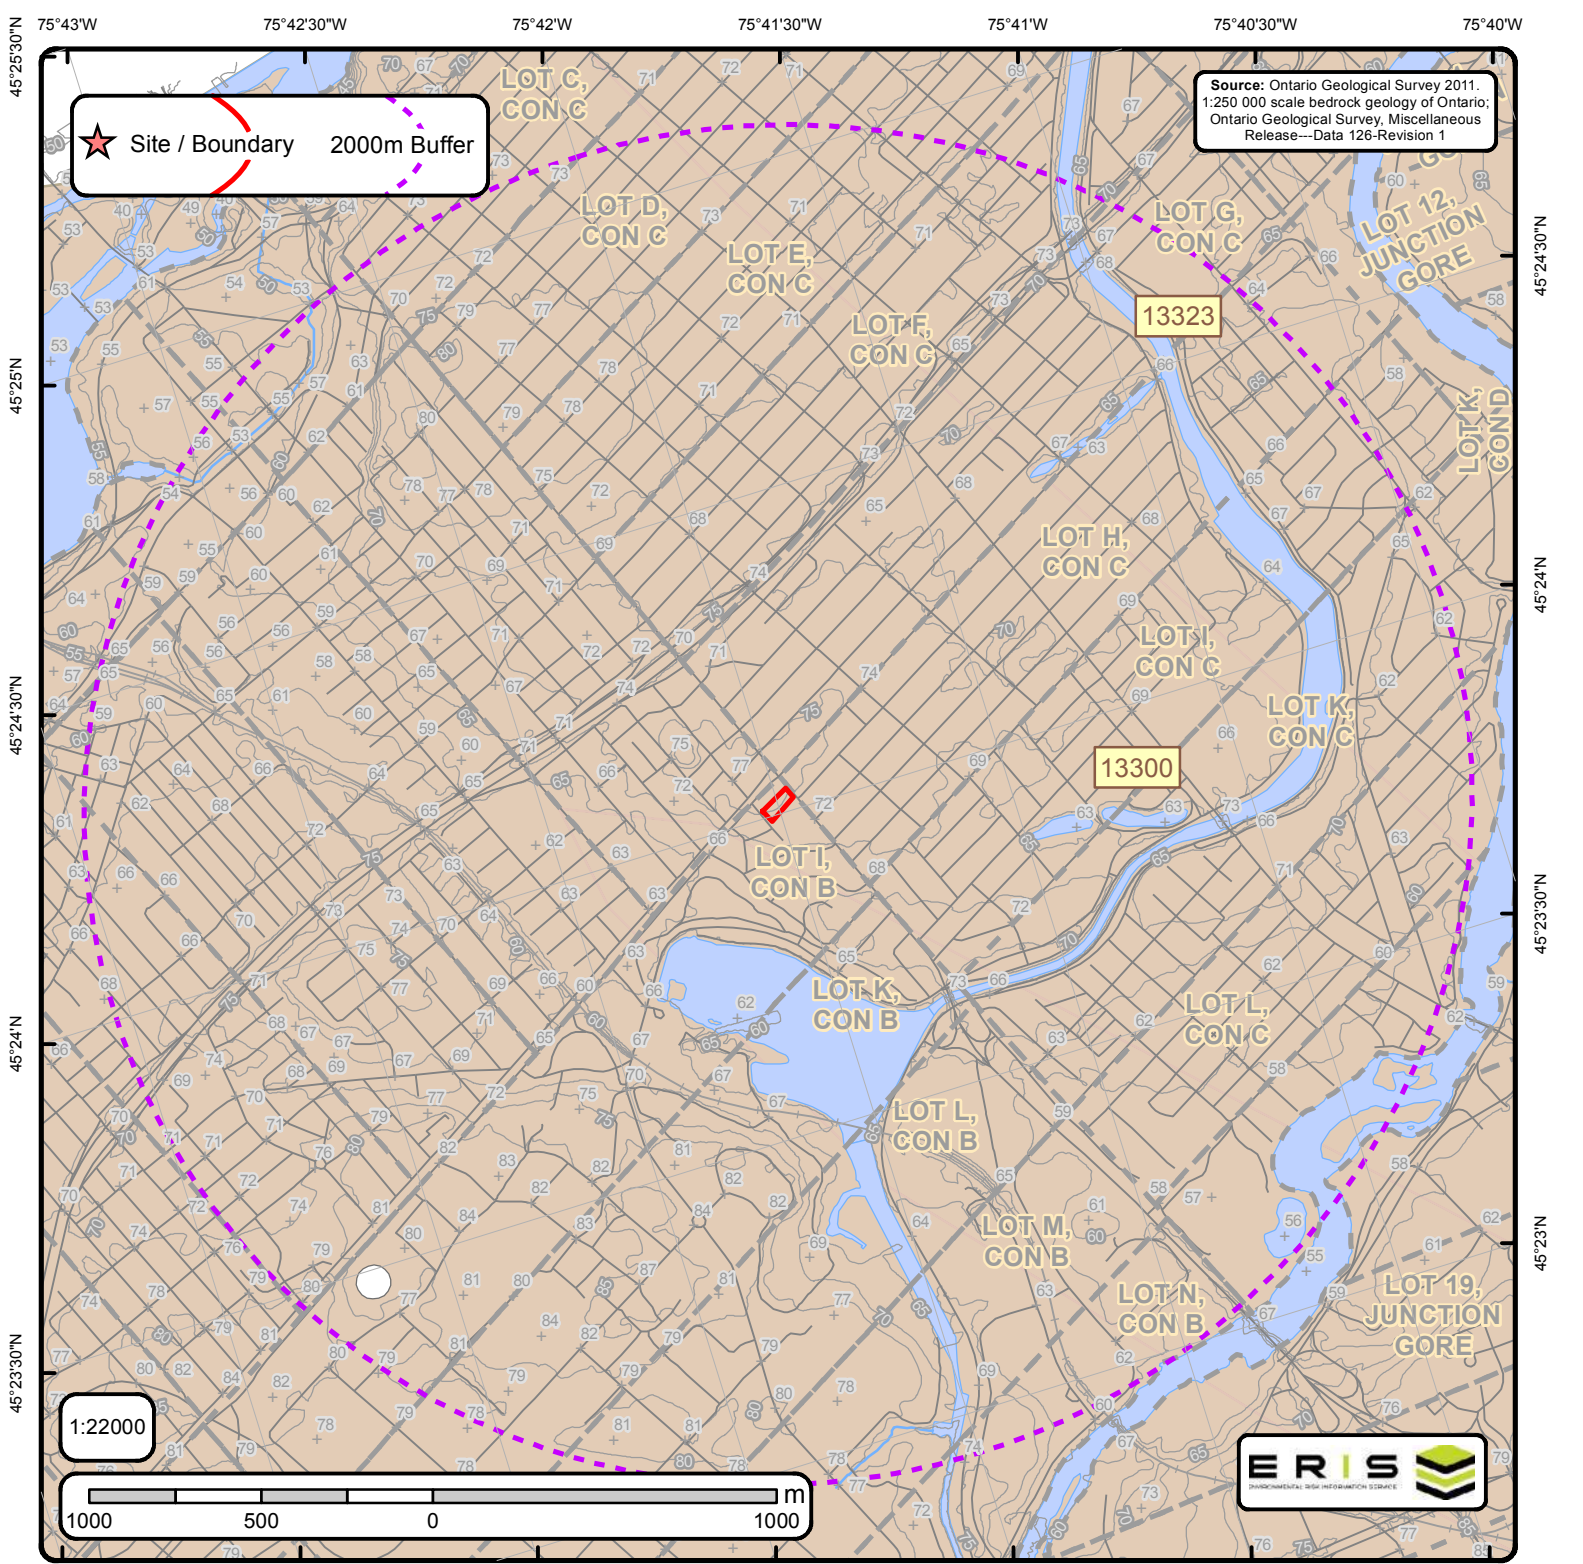

- Class 1 No significant limitations in use for Crops
- Class 2 moderate limitations on use for crops
- Class 3 moderately severe limitations on use for crops.
- Class 4 Severe limitations on use for crops.
- Class 5 Very severe limitations preclude annual cultivation; improvements feasible.
- Class 6 Natural grazing only; no improvements feasible.
- Class 7 No capability for agriculture.

CLI1 and CLI2 - First and Second CLI (Canada Land Inventory) Limitation Subclass

- Subclass C Land subject to crop heat unit regimes of under 2300 (i.e. adverse Climate)
- Subclass D Adverse soil structure (i.e. Depth of rooting zone is restricted)
- Subclass E Loss of soil profile from Erosion
- Subclass F Low inherent soil Fertility
- Subclass I Subject to occasional flooding (Inundation) from adjacent streams or waterbodies
- Subclass M Low inherent Moisture holding capacity
- Subclass P Presence of surface stones > 15 cm diameter.
- Subclass R Presence of consolidated bedrock within one metre of the soil surface
- Subclass S Presence of a combination of the Subclasses F and M, or, the presence of a combination of the Subclasses P and R (i.e. adverse soil characteristics)
- Subclass T Presence of adverse Topography

Hydro - Hydrological Soil Groups classify soils into 4 groups (A,B,C,and D) according to water run-off and infiltration rates.

- A Soils that have a low runoff potential and high infiltration rate, as the soils typically are sands and gravel.
- B Soils with moderate infiltration rates when completely wetted. Soils are sandy loam soils with moderately fine to moderately coarse textures.
- C Soils with slow infiltration rates when thoroughly wetted and these soils typically are silty-loam soils with an impeding layer or soils with moderately fine to fine texture.
- D Soils have a high runoff potential and very slow infiltration rate when thoroughly wetted. Soils include clay soils with high swelling potential, soils in a permanent high water table and shallow soils over nearly impervious material.

Ontario Geological Survey 2011. 1:250 000 scale bedrock geology of Ontario; Ontario Geological Survey, Miscellaneous Release-Data 126
Revision1

ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - Unit ID **Unit Name** - Generalized geological unit classification

Type (All) - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

Type (Primary) - The primary geological unit number or code for the primary rock type in an individual polygon

Type (Secondary) - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

Type (Tertiary) - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

Rock Type (Primary) - Rock type or sub-unit description

Status (Primary) - The Stratigraphic unit. Divided into:

- Supergroup (two or more groups and lone formations)
- Group (two or more formations)
- Formation (primary unit of lithostratigraphy)
- Member (named lithologic subdivision of a formation)
- Bed (named distinctive layer in a member or formation)

Super Eon (Primary) - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

PRECAMBRIAN (0.542 Ga to <3.85 Ga)

Eon (Primary) - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

- ARCHEAN (2.5 Ga to <3.85 Ga)
- PROTEROZOIC (0.542 Ga to 2.50 Ga)
- PHANEROZOIC (Present to 542.0 Ma)

Era (Primary) - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

- | | |
|---|--|
| MESOARCHEAN (2.8 Ga to 3.2 Ga) | MESOPROTEROZOIC (1.0 Ga to 1.6 Ga) |
| NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga) | EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga) |
| NEOARCHEAN (2.5 Ga to 2.8 Ga) | NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga) |
| PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga) | PALEOZOIC (251.0 Ma to 542.0 Ma) |
| MESO-TO PALEOPROTEROZOIC (1.0 Ga to 2.5 Ga) | MESOZOIC (65.5 Ma to 251.0 Ma) |

Period (Primary) - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

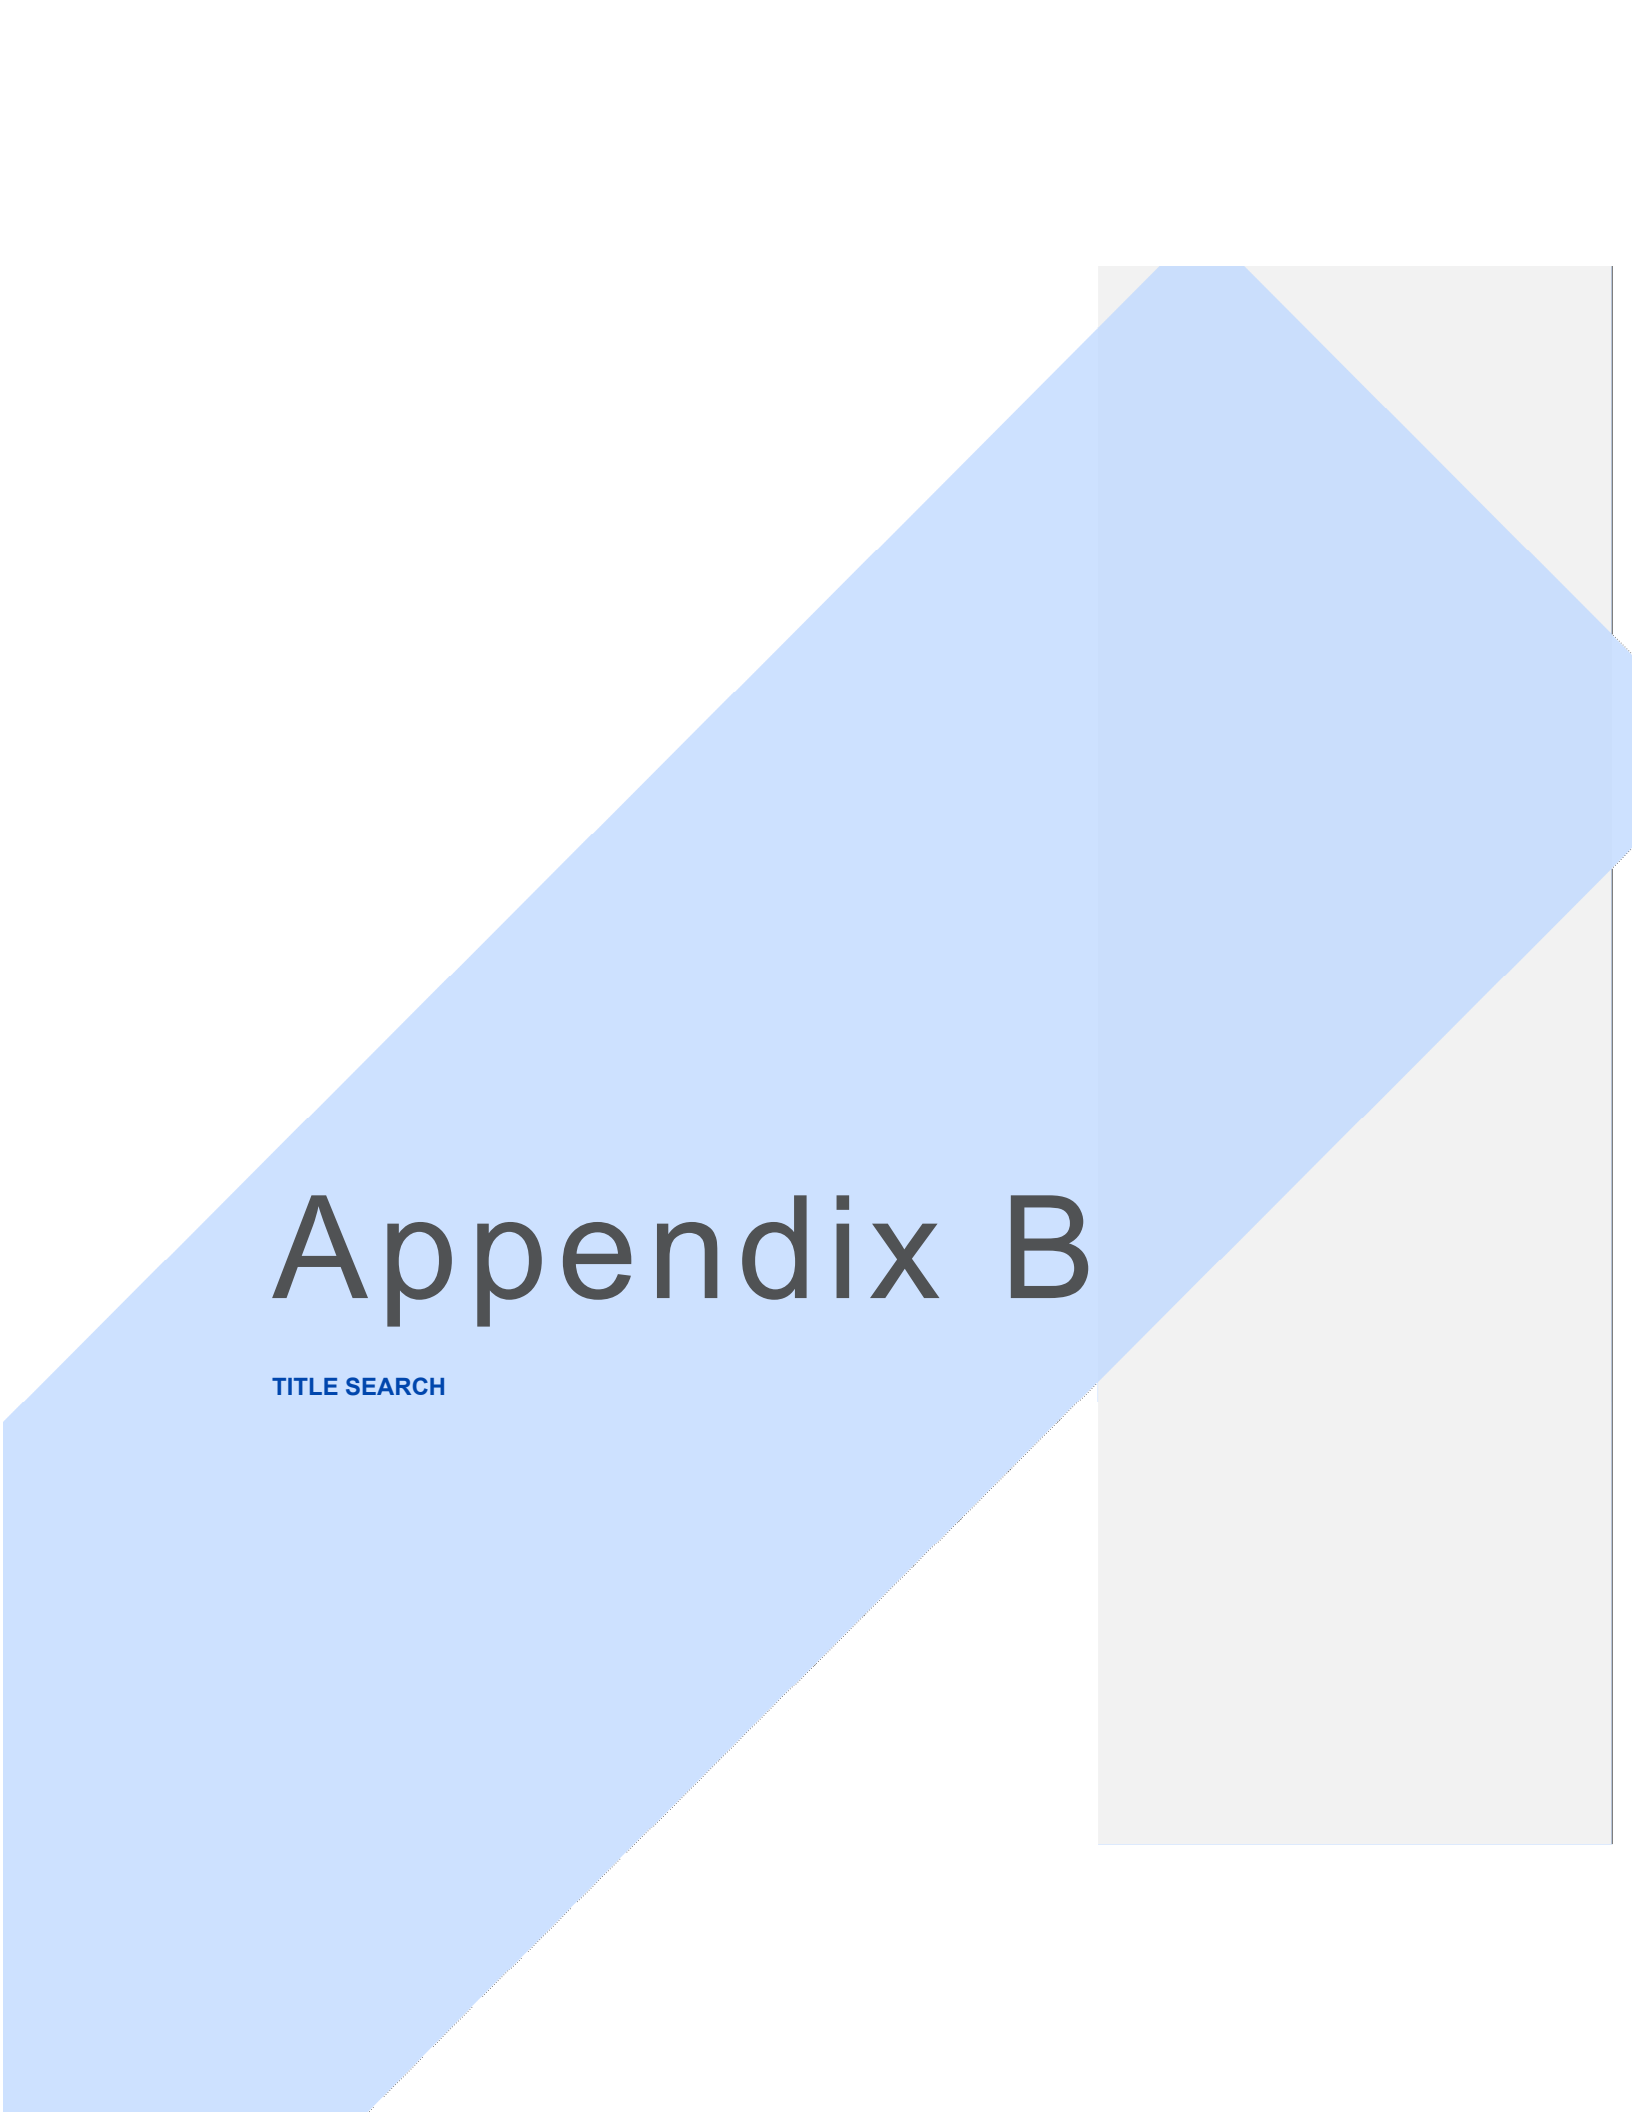

- CAMBRIAN (488.3 Ma to 542.0 Ma)
- ORDOVICIAN (443.7 Ma to 488.3 Ma)
- SILURIAN (416.0 Ma to 443.7 Ma)
- DEVONIAN (359.2 Ma to 416.0 Ma)
- MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)
- JURASSIC (145.5 Ma to 199.6 Ma)
- CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)

Epoch (Primary) - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

- | | |
|----------------------------------|--------------------------------------|
| LOWER ORDOVICIAN | UPPER SILURIAN |
| MIDDLE ORDOVICIAN | LOWER DEVONIAN |
| UPPER ORDOVICIAN | MIDDLE DEVONIAN |
| MIDDLE AND LOWER SILURIAN | UPPER DEVONIAN |
| UPPER SILURIAN TO LOWER DEVONIAN | LOWER CRETACEOUS AND MIDDLE JURASSIC |

Province (Primary) - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

- SUPERIOR
- SOUTHERN
- SUPERIOR
- GRENVILLE

The graphic features a large, light blue diagonal shape on the left side of the page. On the right side, there is a light gray rectangular area. The text 'Appendix B' is centered in the blue area, and 'TITLE SEARCH' is positioned below it.

Subject: RE: Records Search

Hi Lisa,

Thank you for your inquiry.

We have no record in our database of any fuel storage tanks at the subject address (addresses).

For a further search in our archives please submit your request in writing to Public Information Services via e-mail (publicinformationservices@tssa.org) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Thank you and have a great day!

Regards,

Sarah

Subject: Records Search

Hello,

Could you please search for any records for the properties located at [774 Bronson Avenue](#) and [557 Cambridge Street South](#) in Ottawa, Ontario. The property is vacant.

Thank-you,

Lisa

Mature Neighbourhoods Overlay
Zone sous-jacente du caractère des anciens quartiers

AM - Arterial Mainstreet Zone (Sec. 185-186)

Purpose of the Zone			
<i>The purpose of the AM – Arterial Mainstreet Zone is to:</i>			
	(1)	<i>accommodate a broad range of uses including retail, service commercial, offices, residential and institutional uses in mixed-use buildings or side by side in separate buildings in areas designated Arterial Mainstreet in the Official Plan; and</i>	
	(2)	<i>impose development standards that will promote intensification while ensuring that they are compatible with the surrounding uses.</i>	
185.	In the AM Zone:		
Permitted Non-Residential Uses			
	(1)	The following non-residential uses are permitted subject to:	
		(a)	the provisions of subsections 185(3) to (5), and
		(b)	amusement park being located within a building;
			amusement centre amusement park animal care establishment animal hospital artist studio automobile dealership automobile rental establishment automobile service station bank bank machine

bar
 broadcasting studio
 car wash
 catering establishment
 cinema
 community centre
 community garden, *see Part 3, Section 82*
 community health and resource centre
 convenience store
 day care
 diplomatic mission, *see Part 3, Section 88*
 drive-through facility
 emergency service
 funeral home
 gas bar
 hotel
 instructional facility
 library
 medical facility
 municipal service centre
 museum
 nightclub
 office
 park
 parking garage
 personal service business
 place of assembly
 place of worship
 post office
 production studio
 recreational and athletic facility
 research and development centre
 residential care facility (By-law 2011-273)
 restaurant
 retail food store
 retail store
 school
 service and repair shop
 small batch brewery, *see Part 3, Section 89*
 sports arena
 technology industry
 theatre
 training center

Permitted Residential Uses

(2) The following residential uses are permitted:

apartment dwelling, low rise
apartment dwelling, mid-high rise (Subject to By-law 2014-292)
 bed and breakfast, *see Part 5, Section 121*
converted dwelling, see Part 5, Section 122 (Subject to By-law 2014-189)
 dwelling unit
 group home, *see Part 5, Section 126*
 home-based business, *see Part 5, Section 127*
 home-based day care, *see Part 5, Section 129*
planned unit development, see Part 5, Section 131

retirement home
retirement home, converted, see Part 5, Section 122
rooming house
rooming house, converted, see Part 5, Section 122
rooming unit
stacked dwelling, see Part 5, Section 138 (By-law 2010-307)
townhouse dwelling, see Part 5, Section 138 (By-law 2012-334) (By-law 2010-307)

Zone Provisions

(3) The zone provisions are set out in Table 185 below.

TABLE 185 - AM ZONE PROVISIONS

I ZONING MECHANISMS		II PROVISIONS	
(a) Minimum lot area		No minimum	
(b) Minimum lot width		No minimum	
(c) Front yard and corner side yard	(i) non-residential or mixed-use buildings	Minimum	No minimum
	(ii) residential use building	Minimum	3 m
(d) Minimum interior side yard	(i) abutting a residential zone	7.5 m	
	(ii) all other cases	No minimum	
(e) Minimum rear yard	(i) abutting a street	3 m	
	(ii) rear lot line abutting a residential zone	7.5 m	
	(iii) for a residential use building	7.5 m	
	(iv) all other cases	No minimum	

(f) Maximum building height	(i) in any area up to and including 20 metres from a property line abutting a R1, R2 or R3 residential zone (By-law 2011-124)	11 m
	(ii) in any area up to and including 20 metres from a property line abutting a R4 zone (By-law 2011-124)	15 m
	(iii) in any area over 20 metres and up to and including 30 metres from a property line abutting a R1, R2, R3 or R4 zone (By-law 2011-124)	20 metres, or as shown on the zoning map
	(iv) more than 30 metres from a property line abutting a R1 – R4 zone	25 metres, or as shown on the zoning map (Subject to By-law 2015-45)
	(v) in all other cases	25 metres, or as shown on the zoning map (Subject to By-law 2015-45)

**(g) Maximum floor space index
(Subject to By-law 2015-45)**

(i) if 80% or more of the required parking is provided below grade

3.5

(ii) in all other cases

2, unless otherwise shown

(h) Minimum width of landscaped area

(i) abutting a residential zone

3 m

(ii) in all other cases

No minimum, except that where a yard is provided and not used for required driveways, aisles, parking, loading spaces or outdoor commercial patio, the whole yard must be landscaped

(i) Minimum width of landscaped area around a parking lot

see Section 110 – Landscaping Provisions for Parking Lots

	(4)	Outdoor storage is permitted subject to:		
		(a)	being located in an interior side yard or rear yard;	

	(b)	being completely enclosed and screened from a public street, and from residential or institutional zone; and
	(c)	the provisions of subsection 185(4) (b) above does not apply to automobile dealership .
(5)		For other applicable provisions, see Part 2 – General Provisions, Part 3 – Special Use provisions, and Part 4 – Parking and Loading Provisions.
(6)		<i>(Introduced by By-law 2014-292)</i>
AM Subzones		
186.	In the AM Zone, the following subzones apply:	
AM1 Subzone		
(1)	In the AM1 Subzone:	
(a)	no greater than 50% of the maximum permitted floor space index may be used for the non-residential uses; and (By-law 2012-91)	
(b)	the provisions of subsection 186(1)(a) above do not apply to community centre, community health and resource centre, day care and library .	
AM2 Subzone		
(2)	In the AM2 Subzone:	
(a)	the following uses are prohibited:	
	amusement centre amusement park bar cinema funeral home museum nightclub recreational and athletic facility sports arena theatre	

AM3 Subzone- St. Joseph Boulevard Subzone			
	(3)	In the AM3 Subzone:	
		(a)	the following uses are prohibited:
			automobile dealership automobile rental establishment car wash gas bar
		(b)	the provisions of subsection 185(3) do not apply and the provisions of Table 186A below apply.

TABLE 186A - AM3 SUBZONE PROVISIONS

	I ZONING MECHANISMS	II PROVISIONS
(i) Minimum lot width	1. lot without direct vehicular access to St. Joseph Blvd	18 m
	2. lot with direct access to St. Joseph Blvd	24 m
(ii) Maximum front yard and corner side yard setbacks	1. non-residential or mixed use buildings	4 m
	2. residential use building	6 m
(iii) Maximum floor space index	1. for lots having a lot depth of 40 metres or less	1.5
	2. for lots having a lot depth greater than 40 metres	3
	3. for gateway sites with an average lot depth greater than 60 metres	3.5
(iv) Minimum building heights		

	1. for all gateway sites within 4 m of a lot line abutting a street		9 m
(v) Maximum building heights (By-law 2015-190)	1. for lots with a lot depth of 40 metres or less		13 m
	2. for lots with a lot depth greater than 40 metres	(i) within 20 metres from a residential zone	13 m
		(ii) beyond 20 metres from a residential zone	19 m
	3. for gateway sites with an average lot depth greater than 60 metres	(a) within 20 metres or less of a lot line abutting a residential zone	13 m
		(b) between 20 metres and 30 metres of a lot line abutting a residential zone	19 m
(c) beyond 30 metres of a lot line abutting a residential zone		25 m	
(vi) Minimum rear yard setback		7.5 metres	

		(c)	<p>For the purpose of this section, a gateway site is any corner lot or any development that incorporates one or more lots and includes a corner lot and is developed under one Site Plan, located abutting the following street intersections:</p>		
			(i)	St. Joseph Boulevard and Youville Drive;	
			(ii)	St. Joseph Boulevard and Jeanne d'Arc Boulevard;	
			(iii)	St. Joseph Boulevard and Orleans Boulevard; and	
			(iv)	St. Joseph Boulevard and Place d'Orleans Drive.	

		(d)	Where a lot fronts on three streets, the provisions of Table 186A (ii)1. do not apply and a 4 metre yard setback must be provided for only two of the three streets, one of which must be St-Joseph Boulevard.
		(e)	Where a gateway site fronts on three streets, the provisions of Table 186A (ii)1. do not apply and a maximum 4 metre yard setback must be provided from St-Joseph Boulevard and the other gateway street.
		(f)	For a gateway site, a minimum of:
		(i)	75% of the width of the corner site measured at the building setback and along St. Joseph Boulevard; and
		(ii)	50% of the width of the corner site measured at the building setback and along the other street;
			must be occupied by a building face.
		(g)	For all buildings facing St. Joseph Boulevard:
		(i)	a minimum of 50% of the width of a lot, measured at the building setback, must be occupied by a building face, unless Section 186 (3) (f) applies; and
		(ii)	a minimum of 50% of the length of the ground floor elevation must consist of openings such as windows and customer entrances.
AM4 Subzone			
	(4)	<i>In the AM4 Subzone:</i>	
		(a)	<i>only 50% of the permitted floor space index may be used for the non-residential uses;</i>
		(b)	<i>the provisions of subsection 186(4)(a) above do not apply to community centre, community health and resource centre, day care and library; and</i>
		(c)	<i>the following uses are prohibited:</i>
			<i>amusement centre amusement park automobile dealership</i>

			<p><i>automobile rental establishment</i> <i>automobile service station</i> <i>bar</i> <i>car wash</i> <i>catering establishment</i> <i>cinema</i> <i>funeral home</i> <i>gas bar</i> <i>hotel</i> <i>museum</i> <i>nightclub</i> <i>office</i> <i>recreational and athletic facility</i> <i>retail food store</i> <i>sports arena</i> <i>theatre (OMB Order #PL080959 issued March 18, 2010) (Subject to By-law 2015-45)</i></p>
AM5 Subzone			
	(5)	In the AM5 Subzone:	
		(a)	the following uses only are permitted:
			<p>apartment dwelling, low rise <i>apartment dwelling, mid-high rise (Subject to By-law 2014-292)</i> broadcasting studio community garden <i>converted dwelling, see Part 5, Section 122 (Subject to By-law 2014-189)</i> <i>diplomatic mission, see Part 3, Section 88</i> <i>drive-through facility (OMB Order #PL080959 issued March 18, 2010)</i> dwelling unit emergency service <i>home-based business, see Part 5, Section 127</i> <i>home-based day care, see Part 5, Section 129</i> hotel medical facility museum office <i>planned unit development, see Part 5, Section 131</i> production studio research and development centre <i>stacked dwelling, see Part 5, Section 138 (By-law 2010-307)</i> technology industry training centre</p>
		(b)	the following uses are also permitted subject to:
		(i)	being in the same building or on the same lot as a use or uses listed in subsection 186(5)(a) above; and

		(ii)	the cumulative gross floor area not exceeding the total gross floor area of the use or uses listed in subsection 186(5)(a) above;
			artist studio bank bank machine bar car wash cinema convenience store day care instructional facility library municipal service centre nightclub parking garage parking lot personal service business place of assembly place of worship post office recreational and athletic facility restaurant (OMB Order #PL080959 issued March 18, 2010) retail food store retail store service and repair shop theatre
		(c)	car wash, including the required queuing spaces, must be totally enclosed in a building occupied by a permitted use listed in subsection 186(5)(a);
		(d)	the provisions of subsection 185(4) do not apply and storage must be completely enclosed within a building;
		(e)	the provisions of Section 101 – <i>Minimum Parking Space Rates</i> , apply but the minimum rate is the maximum amount of parking permitted; and
		(f)	where excess parking results from a change of use, the excess parking may be retained.
AM6 Subzone- Montreal Road Subzone			
	(6)	<i>In the AM6 Subzone:</i>	
		(a)	<i>the following uses only are permitted:</i>
			<i>convenience store</i> <i>day care</i> <i>drive-through facility</i>

			<p><i>dwelling units</i> <i>emergency service</i> <i>gas bar</i> <i>library</i> <i>medical facility</i> <i>municipal service centre</i> <i>office</i> <i>parking lot</i> <i>personal service business</i> <i>place of worship</i> <i>restaurant</i> <i>retail store</i> <i>school</i></p>
		(b)	<i>Dwelling units are permitted only above the ground floor. (Subject to By-law 2015-45)</i>
AM7 Subzone- Hazeldean Road Subzone			
	(7)	In the AM7 Subzone:	
		(a)	the following uses are prohibited:
			<p>automobile dealership automobile rental establishment automobile service station gas bar rooming house stacked dwelling, see Part 5, Section 138 (By-law 2010-307) townhouse dwelling, see Part 5, Section 138 (By-law 2012-334) (By-law 2010-307)</p>
		(b)	the minimum lot area is 600 square metres; the minimum lot width is 18 metres; the minimum rear yard setback is 10 metres and the maximum permitted lot coverage is 50%.
		(c)	the maximum permitted building height is 11 metres within 20 metres of a residential zone, and 15 metres in all other cases.
		(d)	a minimum of,
		(i)	50% of the lot width within 3 metres of the front lot line, must be occupied by building walls if the lot is less than 90 metres wide.
		(ii)	30% of the lot width within 3 metres of the front lot line, must be occupied by building walls if the lot is 90 metres in width or wider.
		(e)	

			if there are high voltage power lines present near the front lot line then the front yard setback requirement is 5 metres instead of 3 metres.
		(f)	when an outdoor commercial patio is located in a front yard, then the front yard setback requirement is 6 metres instead of 3 metres.
		(g)	in the case of a phased development where all phases are shown on a site plan approved pursuant to Section 41 of the Planning Act, each phase itself does not have to comply with subsection (d) above, provided that those requirements are satisfied upon the completion of all phases of development.
		(h)	a landscaped buffer of 10 metres is required along a property line abutting a residential zone, and a landscaped buffer of 5 metres is required along a rear lot line abutting a non-residential zone.
		(i)	outdoor storage accessory to the use on the lot,
		(i)	is prohibited in a front yard, and
		(ii)	Is permitted in all other yards provided it is concealed from view from abutting streets and non-commercial zones, and provided it does not cover more than 20% of the lot area.
		(j)	the lot line abutting Hazeldean Road is considered to be the front lot line.
		(k)	the minimum number of parking spaces required for a shopping centre may be reduced by the number of on-street parking spaces that are located within 12 metres of the lot on which a shopping centre is located.

AM8 Subzone – Bank Street Subzone

	(8)	<i>In the AM8 Subzone:</i>	
		(a)	<i>no greater than 50% of the maximum permitted floor space index may be used for permitted non-residential uses,</i>
		(b)	<i>the provisions of subsection 186(1)(a) above do not apply to community centre, community health and resource centre, day care and library,</i>
		(c)	<i>the following maximum building heights apply:</i>
		(i)	<i>in any area up to and including 20 metres from a property line abutting a R1, R2 or R3 residential zone: 11 m</i>

			(ii)	<i>in any area up to and including 20 metres from a property line abutting a R4 zone: 15 m</i>
			(iii)	<i>in any area over 20 metres and up to and including 30 metres from a property line abutting a R1, R2, R3 or R4 zone: 20 metres</i>
			(iv)	<i>more than 30 metres from a property line abutting a R1, R2, R3 or R4 zone: 50 metres,</i>
			(v)	<i>in all other cases: 50 metres</i>
		(d)		<i>for non-residential and mixed-use buildings, no minimum front yard setback applies and the maximum front yard setback along Bank Street is 3.0 metres,</i>
		(e)		<i>for non-residential and mixed-use buildings, where overhead hydro wires and hydro poles exist, the maximum front yard setback along Bank Street is 5.0 metres,</i>
		(f)		<i>where the building height is greater than 4 storeys the second, third or fourth storey must be stepped back a further 2.5 metres from the front wall of the storey below,</i>
		(g)		<i>at least 70% of the lot width measured at the building setback along Bank Street must be occupied by one or more building walls, and in the case of a phased development where all phases are shown on a site plan approved pursuant to Section 41 of the Planning Act, each phase itself does not have to comply with this clause, provided that those requirements are satisfied upon the completion of all phases of development.</i>
		(h)		<i>in a case of gas bars and where the floor area of buildings that existed on March 28, 2012 is increased up to an amount equal to 25% of the floor area that existed on that day clauses (d) and (g) above do not apply,</i>
		(i)		<i>in the case of lots with a Bank Street frontage of 35 metres or less, clause (g) above does not apply,</i>
		(j)		<i>despite Schedule 1 the minimum number of parking spaces required will be calculated using the requirements of column III, Area B of Table 101,</i>
		(k)		<i>despite any requirements to the contrary, parking for a use required on one lot, may be located on another lot, but must be in the same city block, or on a lot on the opposite side of the public street on which the use requiring the parking is located. (By-law 2012-91) (Subject to By-law 2014-292) (Subject to By-law 2015-192)</i>

AM9 Subzone			
	(9)	In the AM9 Subzone:	
		(a)	the minimum rear yard setback for a non-residential or mixed-use building is 10 metres.
		(b)	the maximum permitted building height is 11 metres within 20 metres of a residential zone, and 15 metres in all other cases.
		(c)	a minimum of:
		(i)	50% of the lot width within 3 metres of the front lot line, must be occupied by building walls if the lot is less than 90 metres wide.
		(ii)	30% of the lot width within 3 metres of the front lot line, must be occupied by building walls if the lot is 90 metres in width or wider.
		(d)	Clause (c) does not apply to a lot containing only an automobile dealership, automobile rental establishment, automobile service station, or gas bar, but a maximum front yard setback of 3 metres shall apply to any building containing these uses.
		(e)	Despite (c) and (d), in the case of high voltage power lines present near the front lot line the distance of 3 metres set out within (c)(i) and (c)(ii) and the maximum front yard setback in (d) is increased to 5 metres with respect to that portion of the building wall affected by the high voltage power lines.
		(f)	In the case of a phased development where all phases are shown on a site plan approved pursuant to Section 41 of the Planning Act, each phase itself does not have to comply with subsection (c) above, provided that those requirements are satisfied upon the completion of all phases of development.
		(g)	For a lot containing a non-residential or mixed use building, the minimum required width of a landscaped area along a lot line is:
		(i)	where abutting a residential zone: 10 metres and an opaque screen with a minimum height of 1.5 metres must be provided between the residential zone and landscaped area;
		(ii)	where it is the rear lot line and it abuts a non-residential zone: 5 m
		(iii)	in all other cases: no minimum, except that where a yard is provided and not used for required driveways, aisles, parking, loading spaces or outdoor commercial patio, the whole yard must be landscaped.
		(h)	outdoor storage accessory to the use on the lot,
		(i)	is prohibited in a front yard, and
		(ii)	

			Is permitted in all other yards provided it is concealed from view from abutting streets and non-commercial zones, and provided it does not cover more than 20% of the lot area.
		(i)	the lot line abutting Hazeldean Road is considered to be the front lot line
		(j)	the minimum number of parking spaces required for a shopping centre may be reduced by the number of on-street parking spaces that are located within 12 metres of the lot on which a shopping centre is located. (By-law 2014-27)
