## 1.0 EXECUTIVE SUMMARY

Golder Associates Ltd. (Golder) was retained by Tartan Land Consultants Inc. c/o Barrett Co-tenancy (Tartan) to conduct a Phase One Environmental Site Assessment (Phase One ESA) of the property located west of Kelly Farm Drive, South of Leitrim Road and west of Fenton Road, in Ottawa, Ontario (herein after referred to as the “Site” or “Phase One Property”).

At the time of the site reconnaissance, conducted on November 11, 2019, the Phase One Property consisted of a 17.7 hectare parcel of undeveloped land with no buildings or structures. It is understood that the Phase One Property is to be subdivided and developed with residential dwellings. The Phase One Property is owned by Tartan.

The Phase One ESA was completed in accordance with O.Reg. 153/04 and included a review of available current and historical information, a site visit, an interview, evaluation of readily available information, and reporting, subject to the limitations outlined in Section 9.0 of this report. The Phase One Property is not considered an enhanced investigation property as defined by O.Reg. 153/04.

Based on the information obtained and reviewed as part of this Phase One ESA, several potentially contaminating activities (PCA) were located within the Phase One Study area, however, none were located on the Phase One Property and none resulted in areas of potential environmental concern (APEC) identified for the Phase One Property. Accordingly, a Phase Two ESA is not required for the submission of a Record of Site Condition (RSC).

Response to Golder’s request for information from the Ministry of the Environment, Conservation and Parks had not been received at the time of report preparation.

## 2.0 INTRODUCTION

### 2.1 Phase One Property Information

Golder Associates Ltd. (Golder) was retained by Tartan Land Consultants Inc. c/o Barrett Co-tenancy (Tartan) to conduct a Phase One Environmental Site Assessment (Phase One ESA) of the following property:

<b>Municipal Address</b>	None
<b>Property Identification Number</b>	Part PIN 04328-4689(LT) (Parcel 1), Part PIN 04328-0205(LT) (Parcel 2)
<b>Legal Description</b>	Part of Lots 16 and 17, Concession 4, Rideau Front Township of Gloucester, now City of Ottawa, Designated as Part 1 and 2 on Plan 4R-28684 and Part 1 of Plan 4R-29409.

The location of the Phase One Property is provided in Figure 1. A plan describing the Phase One Property is provided in Figure 2. A plan of survey for the Phase One Property is provided in Appendix A.

The contact information for the Phase One Property owner is:

Client	Address	Contact Information
Client and Owner: Tartan Land Consultants Inc. c/o Barrett Co-tenancy	233 Metcalfe Street, Ottawa, Ontario K2P 2C2	Mr. Pierre Dufresne Office: (613) 238-2040 Email: pdufresne@tartanland.on.ca

### 3.0 SCOPE OF INVESTIGATION

A Phase One ESA is a preliminary qualitative assessment of the environmental condition of a property, based on a review of current activities and historical information for the Phase One Property and a review of relevant and readily available environmental information for the surrounding properties located within a 250 metre (m) radius of the boundary of the Phase One Property (collectively referred to as the “Phase One Study Area”). The boundary of the Phase One Study Area is presented in Figure 2.

According to Ontario Regulation (O.Reg.) 153/04 *Records of Site Condition*, the objectives of a Phase One ESA are to:

- 1) Develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Site
- 2) Determine the need for a Phase Two Environment Site Assessment (ESA)
- 3) Provide a basis for carrying out a Phase Two ESA
- 4) Provide adequate preliminary information about environmental conditions in the land or water on, in or under the Site for the conduct of a risk assessment following completion of a Phase Two ESA
- 5) Identify and report on evidence of actual and/or potential contamination on the Site from current and historical activities at the Site or from adjacent properties

### 4.0 RECORDS REVIEW

#### 4.1 General

##### 4.1.1 Phase One Study Area Determination

For the purpose of this Phase One ESA, the Phase One Study Area is the area within a 250 m radius of the boundary of the Site. Based on Golder’s review of the historical and current information compiled as part of this Phase One ESA for the area surrounding the Site and observations of neighbouring properties made during the site visit, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Phase One Property was sufficient to achieve the objectives of the Phase One ESA.

##### 4.1.2 First Developed Use Determination

The date of first developed use of the Phase One Property was determined based on review of the chain of title information, aerial photographs, city directories, EcoLog ERIS Report and information provided by the Site representative. Parcel 1 of the Phase One Property was owned by private individuals from 1836 to 1979 at which point, ownership was transferred from Fredrick and Doris Barret to Fred Barret Enterprise Limited and subsequently Barret Farms Enterprise in 2006. Parcel 2 of the Phase One Property was owned by Private individuals from 1853 to 1961 when it was purchased by the Roman Catholic Episcopal Corporation of Ottawa. Based on review of aerial photographs, the site has only ever been used for agricultural purposes, therefore there is no previously developed use of the property.

##### 4.1.3 Insurance Records

Golder asked Opta Information Intelligence (Opta) to provide any fire insurance plans (FIPs), property underwriters’ reports (PURs) and property underwriters’ plans (PUPs) related to the Site and surrounding properties. Golder was informed by Opta that there no records pertaining to the Site. The Opta report is provided in Appendix B

#### 4.1.4 Chain of Title

Chain of title information for the Phase One Property was obtained from EcoLog ERIS. The Chain of title information is provided in Appendix B. Previous owners of the Phase One Property have included:

**Table 1: Chain of Title PIN 04328-4689(LT) (Parcel 1)**

Owner's Name	Dates of Ownership
Crown	Prior to April 8, 1836
Thomas Hunter	April 8, 1836 to May 8, 1852
David Cowan	May 8, 1852 to April 3, 1857
William Cowan	April 3, 1857 to December 22, 1880
David Cowan	December 22, 1880 to November 22, 1889
George W. Bennett	November 22, 1889 to February 14, 1910
Fredrick W. Barrett	February 14, 1910 to August 7, 1943
Fredrick Barrett and Doris Barrett	August 7, 1943 to October 10, 1979
Fred Barrett Enterprises Ltd.	October 10, 1979 to December 4, 2006
John Lear Johnston, John David Barrett, Fredrick William Barrett and George Thomas Barrett as Barrett Farm Enterprises	December 4, 2006 to April 27, 2012
Findlay Creek Properties North, Tartan Homes (North Leitrim) Inc. and Tartan Land (North Leitrim) Inc.	Since April 4, 2012

**Table 2: Chain of Title PIN 04328-0205(LT) (Parcel 2)**

Owner's Name	Dates of Ownership
Crown	Prior to October 26, 1846
Canada Company	October 29, 1846 to June 30, 1853
John Lennox	June 30, 1853 to October 17, 1853
Peter Tomkins	October 17, 1853 to October 3, 1856
Henry Cowan	October 3, 1856 to March 14, 1903
Henry B. Cowan	March 14, 1903 to February 22, 1909
Kenneth Hope	February 22, 1909 to February 25, 1936
H. Murray Hope	February 25, 1936 to December 22, 1961
The Roman Catholic Episcopal Corporation of Ottawa	December 22, 1961 to November 5, 1986
Robert Somody, in trust	November 5, 1986 to August 31, 1988
Corporation of the City of Gloucester (City of Ottawa since October 25, 2018)	Since August 31, 1988

### 4.1.5 City Directories

A review of historical city directories for the years 1961, 1971, 1976, 1981, 1987, 1992, 1996, 2001, 2006 and 2011 was completed by Environmental Risk Information Services (ERIS) for the Phase One Property and surrounding properties (within 250 m) along Leitrim Road, Fenton Road, Kelly Farm Drive and Southclark Place. The city directories are provided in Appendix B. Relevant findings from the city directory listings are presented below.

#### *Phase One Property*

- As the Phase One Property was not registered with a municipal address there was no record in the city directories.

#### *Surrounding Area*

- **2683 Fenton Road** (with 2623 Fenton Road and 4548 Southclark Place) was listed as Pryor Metals Ltd. in the 1996, 2001, 2006 and 2011 city directories
- **2790 Fenton Road** was listed as Millimeter Engineering Works Inc in the 1992, 1996, and 2001 city directories, and CMP Engineering in the 2001 city directory
- **2793 Fenton Road** was listed as Hovey Industries Inc. in the 1996, 2001, 2006 and 2011 city directories
- **2794 Fenton Road** was listed as Blackline Systems Corp in the 2011 city directory and as Aic Construction Ltd. and Applied Insulation Co in the 1992 and 1996 city directories
- **4521 Southclark Place** was listed as Elite Limousine in the 2011 city directory, Reno Master and Ashton Green Ltd. in the 2006 city directory, Synergy Models & Prototypes in the 2001 city directory, Adams Industrial Rentals & Leasing and Hawley Signs & Graphics Ltd. in the 1996 city directory and Davanced Analysis & Design, MacNeil Thomas Contracting Ltd, R&C L C Services Inc. and Hawley Signs and Graphics Ltd. in the 1992 city directory
- **4531 Southclark Place** was listed as Canadian Association of Nordic Skin Instructors and/or Canadian Ski Patrol System in the 1992, 1996, 2001, 2006 and 2011 city directories
- **4535 Southclark Place** was listed as Curb Tech Interprises Ltd. in the 2001 city directory and Aliment Delisle Ltd. in the 1992 city directories
- **4543 Southclark Place** was listed as Reliable Plating & Surface Finishing and Ritesco Enterprises in the 1992, 1996, 2001, 2006 and 2011 city directories, McCormick Construction in the 2006 and 2011 city directories, Axle Automotive in the 1996 city directory and Southclark Auto Service in the 1992 city directory
- **4549 Southclark Place** was listed as Crawford Ltd. in the 1992, 1996 and 2011 city directories, Graduate Construction Reg'd in the 1996, 2001, 2006 and 2011 city directories, Boss Electric and Spray Tech 2000 in the 2001, 2006 and 2011 city directories, Battmenn Services and Ovarco in the 1996 and 2001 city directories and Fridgen Fenestration Ltd. in the 1992 city directory

### 4.1.6 Environmental Reports

The following environmental reports (ordered from oldest to most recent) related to the Site were provided to Golder. Golder consulted these reports to develop an understanding of the environmental conditions at the Site and surrounding properties.

- “Phase I Environmental Site Assessment 4570 Bank Street, Ottawa, Ontario”, project number 11-1121-0198(2000), prepared by Golder for Tartan Land Corporation and Barrett Farms Enterprises Partnership, dated September 2011 (“2011 Phase I ESA”)
- “Groundwater and Soil Sampling, 4570 Bank Street, Ottawa Ontario”, project number 11-1121-0189(3000), prepared by Golder for Tartan Land Corporation and Barret Farms Enterprises Partnership, dated October 5, 2011 (“2011 Groundwater and Soil Sampling”)
- “Preliminary Geotechnical Investigation Proposed Development Leitrim Road and Bank Street, Ottawa, Ontario”, project number 11-1121-0189(1000), prepared by Golder for Tartan Land Corporation and Barret Farms Enterprises Partnership, dated January 2012 (“2012 Geotechnical Investigation”)

While technical peer reviews of the reports were not completed, noteworthy findings from these reports are summarized in the following sections.

### 2011 Phase I ESA

- The 2011 Phase I ESA was completed on the full Barret Farm subdivision which extends from the eastern limit of the Phase One Property to Bank Street to the east (approximately 1.1 km to the east); and west of the site to Fenton Road.
- The 2011 Phase I ESA identified several issues of potential environmental concern related to the Phase One ESA Property.
  - The Gloucester Landfill was located approximately 1.5 km west of the Site, west of Albion Road). Given the relatively close proximity of the former landfill to the Site and that the former landfill is located hydraulically cross- to up-gradient with respect to the Site (inferred groundwater flow to the north/north east), the former landfill was identified as an issue of potential environmental concern.
  - Manufacturing facilities and a private fuel outlet (underground storage tank – UST reportedly present at 4549 Southclark Place were identified on adjacent lands west (cross- to up-gradient of the Site). Industrial land use west of the Site was identified as an issue of potential environmental concern to the Site.

### 2011 Groundwater and Soil Sampling

- In 2011, a soil and groundwater sampling program was completed to assess soil and groundwater quality associated with the issues of potential environmental concern identified in the 2011 Phase I ESA.
- Golder sampled groundwater at monitoring well BH/MW11-1 installed as part of the geotechnical investigation (west of the Phase One Property near the south east corner of Leitrim Road and Fenton Road) for petroleum hydrocarbon fractions F1-F4 (PHC F1-F4), volatile organic compounds (VOC), 1,4 dioxane, polycyclic aromatic hydrocarbons (PAH) and metals to assess for impacts related for the former Gloucester Landfill and the industrial developments west of the Site.
- Borehole/monitoring well BH/MW4 was advanced in the west of the Site near 4549 Southclark Place to assess to assess for potential impacts related to the presence of an underground storage tank at 4549 Southclark Place and potential impacts related to the former Gloucester Landfill. Worst-case soil and a groundwater sample were submitted for laboratory analysis of PHC F1-F4, VOC, PAH and metals.

- Soil and groundwater results were compared to the Soil, Groundwater and Sediment Standards for Use Under Part XV.1 of the Environmental Protection Act Table 3: Full Depth Generic Site Condition Standards in a Non-Potable Ground Water Condition, Residential/Parkland/Institutional Property Use, and coarse textured soil (Table 3 Standards).
- All soil and groundwater concentrations were below the Table 3 Standards for all standards analyzed with the exception of chloroform in groundwater at BH/MW4. At this location, potable water was required for bedrock coring and the presence of chloroform is attributed to municipal water chlorination.

## 2012 Geotechnical Investigation

- Three of the boreholes advanced during the 2012 Geotechnical Investigation were located on or near to the Phase One Property BH11-1, BH11-2 and BH11-8.
- Historical boreholes from previous investigations were also included in the 2012 Geotechnical Investigation. Borehole BH-4 from a historical investigation is within the Phase One Property.
- The stratigraphy reported in these borehole logs consisted of silt or clayey silt overlying silty sand till (at 1.37 to 3.26 metres below ground surface (mbgs)) at BH11-1 and BH11-2. These boreholes were terminated upon auger refusal (inferred bedrock interface) at 2.59 to 3.44 m bgs.
- At BH11-8, the overburden silt was underlain by dolomitic limestone bedrock at 1.88 m bgs. The upper 0.2 metres of the bedrock was reported to be highly weathered and the borehole was terminated at 6 m bgs.
- Borehole BH4 encountered sandy silt from surface to 2.19 m bgs, the depth at which the borehole was terminated due to auger refusal (inferred bedrock).

## 4.2 Environmental Source Information

Golder contracted EcoLog Environmental Risk Information Services Ltd. (EcoLog ERIS) to conduct a search of environmental sources, including federal, provincial and private sector databases, for information on the Phase One Property and Phase One Study Area. The EcoLog ERIS report is provided in Appendix C. The search included the following databases:

Anderson's Waste Disposal Sites; Certificates of Approval; Environmental Registry; TSSA Commercial Fuel Oil Tanks; Coal Gasification Plants; TSSA Fuel Storage Tanks; National Defence & Canadian Forces Fuel Storage Tanks, Spills, and Waste Disposal Sites; National PCB Inventory; National Pollutant Release Inventory; Ontario Inventory of PCB Storage Sites; Ontario Regulation 347 Waste Receivers Summary; Record of Site Condition; Retail Fuel Storage Tanks; Private and Retail Fuel Storage Tanks; Ontario Spills; Anderson's Storage Tanks; Waste Disposal Sites – MOE CA Inventory; Waste Disposal Sites – MOE 1991 Historical Approval Inventory; Water Well Information Systems, Databases; Boreholes; and the Ontario Regulation 347 Waste Generators Summary.

No noteworthy records were reported for the Phase One Property.

The EcoLog ERIS report included the following noteworthy listings within the Phase One Study Area:

- 2793 and 2794 Fenton Road were listed as Hovey Industries in the Scott's Manufacturing database (SCT) as fabricated metal part manufacturing and in the O.Reg. 347 Waste Generator's database (GEN) as generators of various organic and inorganic wastes.
- 4521 Southclark Place was listed as Airtite Pneumatics & Controls in the SCT database as machine manufacturing and in the GEN database as Synergy Model's and Prototypes Inc. (machine manufacturing) and generators of various organic wastes.

- 4543 Southclark Place was listed as 122558 Canada Ltd. and Reliable Plating Ltd. in the GEN database and generators of various inorganic wastes. Reliable Plating was listed in the SCT database as coating, engraving, heat treating and allied activities. Axle Automotive was also listed in the GEN database at 4543 Southclark Place as generators of petroleum distillates.
- 4548 Southclark Place is listed under 2623 Fenton Road as Pryor Metals Limited (Pryor). Pryor has certificates of approval for discharge to air and sewage works. Pryor is listed in the GEN database as generators of various organic and inorganic wastes. Pryor is also listed in the SCT database as sheet metal work and other fabricated metal products.
- 4549 Southclark Place is listed as TP Crawford Limited under the Fuel Storage Tank – Historic (FSTH) database as having a 9000 litre single-wall steel underground storage tank (UST) installed at the Site in 1976. TP Crawford Limited was listed under the GEN database as a generator of various organic wastes. TP Crawford Limited was also listed in the SCT database as manufacturing ornamental or architectural metal.

#### 4.2.1 Ministry of the Environment

The local district office of the Ministry of the Environment Parks and Conservation (MECP) was contacted to determine if the MOECC has maintained a file with respect to the Phase One Property. Specifically, the MOECC was asked to respond in writing to the following questions:

- Has the MOECC ever issued any approvals, permits or licences?
- Has the MOECC ever issued any control orders or violation notices?

At the time of preparation of this report, the MOECC had not issued a response to Golder.

#### 4.2.2 Technical Standards and Safety Authority, Fuel Safety Division Records

The Technical Standards and Safety Authority (TSSA) maintains records related to registered underground storage tanks (USTs) for petroleum-related products. The TSSA was contacted to establish the status of the Phase One Property and to identify outstanding instructions, incident reports, fuel oil spills or contamination records. On November 8, 2019, TSSA reported via e-mail that there were no records on file pertaining to the Phase One Property. A copy of this communication is provided in Appendix D.

### 4.3 Physical Setting Sources

#### 4.3.1 Aerial Imagery

Aerial imagery for the Phase One Property and the surrounding area was reviewed by Golder. Information obtained from the review of the aerial photographs is summarized in the following table.

	Site	Surrounding Property Direction			
		North	East	South	West
1945 1:15,000 and 1:17,000	The Site is vacant land which appears to be used for agricultural purposes in its majority.	Leitrim Road followed by agricultural lands and scattered farmhouses	Vacant land which appears to be used for agricultural purposes	Agricultural land.	Agricultural lands with scattered farmhouses.

	Site	Surrounding Property Direction			
		North	East	South	West
1956 1:10,000	As per 1945	As per 1945	As per 1945	As per 1945	As per 1945 with the addition of more houses along Leitrim Road further to the west.
1965 City of Ottawa eMap	As per 1945	As per 1945	New homestead present east of the site south of Leitrim Road. No other changes east of the Site	As per 1945	Agricultural lands and scattered farmhouses.
1976 City of Ottawa eMap	As per 1945	As per 1945	As per 1965	As per 1945	Industrial park, not all lots developed
1986 1:15,000	Southern portion of the Site appears to no longer be used for agricultural purposes	As per 1945	As per 1965	As per 1945	Further development of industrial park
1994 1:10,000	As per 1986	As per 1945	As Per 1945	As per 1945.	As per 1986
2002 City of Ottawa eMap	Southern portion of the Site is overgrown and appears forested	As per 1945	As per 1945	As per 1945	As per 1994
2005 City of Ottawa eMap	As per 2002	As per 1945	As per 1945	As per 1945	As per 1994
2008 City of Ottawa eMap	As per 2002	As per 1945	As per 1945	As per 1945	As per 1994
2011 City of Ottawa eMap	As per 2002	As per 1945	As per 1945	Development of subdivision south east of the Site	As per 1994
2017 City of Ottawa eMap	As per 2002	As per 1945	As per 1945	Further development of subdivision south of the Site	As per 1994

Based on the aerial photographs, the Phase One Property appears to have included agricultural fields going back to at least 1945. The surrounding properties primarily included agricultural fields and associated structures. In the 1970s, an industrial park was developed west of the Site. There was no indication that the fill was imported to the Phase One Property.

### 4.3.2 Topography, Hydrology and Geology

Topic	Conditions	Comment / Source
<b>Topography of Site and Surrounding Area</b>	<p>The topography of the Site and surrounding areas was generally flat. The wooded southern portion of the property was hummocky with some standing water ponded in low lying areas.</p> <p>Some fill has been placed on the eastern portion of the Site, associated with the future subdivision development. Some fill was placed south of the site, or the southern portion of the Site associated with development of the off-site stormwater management pond. The source of the fill was related excavation of the stormwater management pond.</p>	Site and surrounding area observations
<b>Overburden Soils</b>	Nearshore sediments, fine to medium grained sands. The 2012 Geotechnical investigation reported that the surficial geology at the site consisted of sandy silt to clayey silt overburden.	Bélanger, 2008.
<b>Type of Bedrock</b>	<p>March Formation: Interbedded quartz sandstone, sandy dolostone and dolostone</p> <p>Consistent with the available mapping, the 2012 Geotechnical investigation reported the presence of dolomitic limestone within the Phase One Property</p>	Bélanger, 2001.
<b>Depth to Bedrock</b>	1.9 to 3.4 m bgs	2012 Geotechnical and Groundwater Investigation
<b>Inferred Near Surface Groundwater Flow</b>	Groundwater is inferred to flow south to Findlay creek located approximately 750 metres south of the Site.	South Nation Conservation Authority GIS mapping tool
<b>Site Grade Relative to the Adjoining Properties</b>	The Site appears to follow the topography of the area and is at grade with respect to properties located adjacent to the Site, with the exception of a decrease to the south of the property where a large stormwater retention pond has recently been constructed	Site observations
<b>Depth to Groundwater</b>	2.0 to 3.5 m bgs	2012 Geotechnical and Groundwater Investigation

The following records were reviewed to identify topographic, geologic and hydrogeological conditions at the Site. Additional information on Site features, as observed at the time of the Site visit, is provided in Section 6.

### 4.3.3 Fill Materials

Topic	Conditions	Comment / Source
<b>Fill Materials</b>	Approximately 0.5 metres of fill material had been placed on the eastern portion of the property. The fill material was sourced from on the Phase One property.	Site observations, Site representative

#### 4.3.4 Water Bodies and Areas of Natural Significance

Topic	Conditions	Comment / Source
<b>Nearest Open Water Body</b>	An unnamed tributary to Findley creek located on the east side of the Site.	2011 Phase I ESA
<b>Areas of Natural Significance (ANSI)</b>	None identified within the Phase One Study Area.  Leitrim Wetlands, a provincially significant wetland, is located approximately 750 metres south of the site and the Lester Road Wetland Complex, a provincially significant wetland is located approximately 450 metres north and west of the site	South Nation Conservation Authority GIS mapping tool

#### 4.3.5 Well Records

Topic	Conditions	Comment / Source
<b>Water Wells on Site (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling date, use)</b>	None reported by the Site Representative or observed. Two water wells were listed on Site in the EcoLog ERIS Report, however based on the depth to bedrock which exceeded that observed in the geotechnical assessment by several metres, it is inferred that these wells were mapped incorrectly.	EcoLog ERIS Report and Site observations
<b>Water Wells on the Neighbouring Properties (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table, drilling rate, use)</b>	EcoLog ERIS reported approximately 20 wells within the Phase One Study Area. The wells were reportedly domestic or industrial water supply with only one well constructed for monitoring purposes.  All water wells were screened within the limestone bedrock which was encountered between 0.9 and 7.9 m bgs	EcoLog ERIS Report

#### 4.4 Site Operating Records

At the time of the Site visit, the Phase One Property was undeveloped. No Site operating records were provided to Golder for review.

Topic	Title of the information or document	Information Relevant to the Phase One ESA
<b>Regulatory Permits and Records</b>	Not available	None
<b>Materials Safety Data Sheets (MSDS)</b>	None	None
<b>Underground utility drawings</b>	None	None

## 5.0 INTERVIEWS

Mr. John Barret of Barrett Farms Enterprises Partnership (hereinafter referred to as the “Site Representative”), responded to a detailed environmental questionnaire on November 12, 2019. Pursuant to the requirements O.Reg. 153/04, the Site Representative was the former owner of the Phase One Property and was a 3<sup>rd</sup> generation farmer of the Phase One Property.

Relevant information obtained during the interview and site visit is provided in the Section 6.0.

## 6.0 SITE RECONNAISSANCE

### 6.1 General Requirements

Ms. Laura Jones, P.Eng. (Environmental Engineer) of Golder visited the Phase One Property for two hours on November 11 at 1:30 pm. Ms. Jones has an M.A.Sc. (Civil Engineering) from the University of Waterloo and has 12 years of consulting experience. The site visit consisted of a walk-around of accessible portions of the Phase One Property along with a cursory inspection of surrounding properties from the Phase One Property and publicly accessible areas. The weather conditions were overcast, and the temperature was approximately -4°C. The Phase One Property was undeveloped and used for agricultural purposes (harvested crop production) at the time of the site visit. A portion of the Phase One Property was forested.

Photographs of relevant features noted during the site visit are provided in Appendix E.

## 6.2 Specific Observations at Phase One Property

The specific observations made during the Site visit are presented in the following sections.

Topic	Observations	Source
<b><u>Structures</u></b> <b>Number and Age of Buildings on the Site</b>	No buildings or structures were present at the Site.	Site observations
<b>General Descriptions of Each Building (including improvements)</b>	No buildings or structures were present at the Site.	Site observations
<b>Building Areas</b>	No buildings or structures were present at the Site.	Site observations
<b>Number of Floors (include all levels, whether above or below ground)</b>	No buildings or structures were present at the Site.	Site observations
<b>Number, Age, and Depth of Levels Below Ground Level</b>	No buildings or structures were present at the Site.	Site observations
<b>Number and Details of all Aboveground Storage Tanks (ASTs)</b>	No ASTs were observed or reported on the Phase One Property.	Site observations and Site Representative
<b>Number and Details of all Underground Storage Tanks (USTs)</b>	No USTs were observed or reported on the Phase One Property.	Site observations and Site Representative
<b><u>Underground Utilities</u></b> <b>Potable and Non-Potable Water Sources</b>	No active water source is reportedly available at the Site.	Site Representative
<b>Utility Lines Present (i.e. Electrical, Natural Gas, other)</b>	No utility drawings are available for the Site.	Site Representative
<b>Sanitary/Process Wastewater Receptor</b>	No sanitary or process wastewater is generated on-Site.	Site observations
<b>Sanitary Sewer Connection</b>	No sanitary sewer connection is available at the Site.	Site observations, Site representative
<b>Septic Systems</b>	None identified.	Site observations, Site representative
<b>Storm Water Flow</b>	Infiltration, runoff to swale located east of the site and drains to a stormwater retention pond south of the Site	Site observations
<b>Storm Sewer Connection</b>	No storm sewer connection is available at the Site.	Site observations, Site representative
<b><u>Interior of Structures</u></b> <b>Entry and Exit Points for Site Buildings</b>	No buildings or structures were present at the Site.	Site observations

Topic	Observations	Source
<b>Existing and Former Heating System(s) (include fuel type / source)</b>	As no buildings or structures were present at the Site there were no existing heating systems observed or reported.	Site observations, Site representative
<b>Existing and Former Cooling System(s) (include fuel type / source)</b>	As no buildings or structures were present at the Site there were no existing cooling systems observed or reported.	Site observations, Site representative
<b>Drains, Pits, and Sumps (include current use, if any, and former use)</b>	As no buildings or structures were present at the Site there were no drains, pits, or sumps observed or reported.	Site observations, Site representative
<b>Unidentified Substances</b>	None identified.	Site observations
<b>Floor Stains or Corrosion Located near a Potential Discharge Location</b>	None identified.	Site observations
<b>Miscellaneous Exterior Location of any Current and Former Wells</b>	None identified.	Site observations
<b>Ground Cover (i.e. grass, gravel, soil, or pavement, etc.)</b>	The majority of the Phase One Property was covered with vegetation.  The wooded portion of the Phase One Property had some ponded water in low lying areas	Site observations
<b>Current or Former Railway Lines or Spurs</b>	None observed or reported.	Site observations.
<b>Presence of Stained Soil, Vegetation, or Pavement</b>	None observed.	Site observations
<b>Presence of Stressed Vegetation</b>	None observed.	Site observations
<b>Areas Where Fill and/or Debris Materials Appear to Have Been Placed</b>	Fill has been deposited on the eastern portion of the Site. The fill was reportedly sourced from other areas of the Site.	Site observations, Site representative
<b>Potentially Contaminating Activity</b>	None identified.	Site observations
<b>Unidentified Substances</b>	None identified.	Site observations

### 6.2.1 Enhanced Investigation Property

The Site is not considered to be an enhanced investigation property; however, the investigation was conducted in a manner consistent with the requirements for enhanced investigation properties as described in subsection 13(3) of O.Reg. 153/04. Relevant information is reported in the following table:

Topic	Observations	Source
<b>Operations at the property, including processing or manufacturing</b>	The Site is used solely of agricultural crop production. The eastern portion of the Site, early stages of future residential development were underway, specifically related to construction of a swale east of the Phase One Property boundary. No processing or manufacturing processes were observed or reported.	Site observations and interview
<b>Hazardous materials used or stored at the Phase one property</b>	None observed or reported.	Site observations and interview
<b>Products manufactured at the Phase one property;</b>	None observed or reported.	Site observations and interview
<b>By-products and wastes at the Phase one property</b>	None observed or reported.	Site observations and interview
<b>Raw materials handling and storage locations at the Phase one property</b>	None observed or reported.	Site observations and interview
<b>Location and contents of drums, totes and bins at the Phase one property</b>	None observed or reported.	Site observations and interview
<b>The location, installation date, source of incoming liquid and effluent discharge location for all oil-water separators</b>	None observed or reported.	Site observations and interview
<b>All vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas</b>	None observed or reported.	Site observations and interview
<b>Details of all spills including the dates, locations, materials involved, and volumes of material spilled;</b>	None observed or reported.	Site observations and interview
<b>Details of liquid discharge points such as water and French drains, including their locations</b>	None observed or reported.	Site observations and interview
<b>Details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks</b>	None observed or reported.	Site observations and interview

### 6.3 Surrounding Land Use

During the Site visit, a visual reconnaissance of the outdoor operations in the Phase One Study Area was carried out from the Site and publicly accessible areas.

The surrounding properties include residential and agricultural land uses, as illustrated in Figure 2.

**North (upgradient):** The area north of the Phase One Property was vacant agricultural (crop production) and forested land

**East (cross-gradient):** recently constructed swale, municipal roadway followed by initial stages of a new residential subdivision

**West (cross gradient):** vacant agricultural land (crop production) followed by an industrial subdivision.

**South (downgradient):** stormwater detention pond followed by residential subdivision

### 6.4 Written Description of Investigation

At the time of the Site reconnaissance, conducted on November 11, 2019, the Site consisted of an approximate 43.7 acre (17.7 hectare) parcel of undeveloped land. No buildings or structures were noted on the Phase One Property. The surrounding properties within the Phase One Study Area included residential and agricultural land uses.

There were no findings from the Site and area reconnaissance that indicate a PCA on-Site. Several PCAs were identified in the off-site industrial subdivision to the west of the Site.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Current and Past Uses of the Site

The following summarizes the current and past uses of the Phase One Property:

**Table 3: PIN 04328-4689(LT) (Parcel 1)**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to April 8, 1836	Crown	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
April 8, 1836 to May 8, 1852	Thomas Hunter	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
May 8, 1852 to April 3, 1857	David Cowan	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
April 3, 1857 to December 22, 1880	William Cowan	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
December 22, 1880 to November 22, 1889	David Cowan	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
November 22, 1889 to February 14, 1910	George W. Bennett	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
February 14, 1910 to August 7, 1943	Fredrick W. Barrett	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
August 7, 1943 to October 10, 1979	Fredrick Barrett and Doris Barrett	Undeveloped	Agricultural or other Use	The 1945, 1956, 1965 and 1976 aerial photographs indicates the Parcel 1 of the Phase One Property comprised primarily agricultural fields
October 10, 1979 to December 4, 2006	Fred Barrett Enterprises Ltd.	Undeveloped	Agricultural or other Use	The 1986, 1994, 2002 and 2005 aerial photographs indicates that Parcel 1 of the Phase One Property comprised primarily agricultural fields
December 4, 2006 to April 27, 2012	John Lear Johnston, John David Barrett, Fredrick William Barrett and George Thomas Barrett as Barrett Farm Enterprises	Undeveloped	Agricultural or other Use	The 2008 and 2011 aerial photographs indicate that Parcel 1 of the Phase One Property comprised primarily agricultural fields
Since April 4, 2012	Findlay Creek Properties North, Tartan Homes (North Leitrim) Inc. and Tartan Land (North Leitrim) Inc.	Undeveloped	Agricultural or other Use	The 2017 aerial photograph indicates that Parcel 1 of the Phase One Property comprised primarily agricultural fields

**Table 4: PIN 04328-0205(LT) (Parcel 2)**

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Prior to October 26, 1846	Crown	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
October 29, 1846 to June 30, 1853	Canada Company	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
June 30, 1853 to October 17, 1853	John Lennox	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
October 17, 1853 to October 3, 1856	Peter Tomkins	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
October 3, 1856 to March 14, 1903	Henry Cowan	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
March 14, 1903 to February 22, 1909	Henry B. Cowan	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
February 22, 1909 to February 25, 1936	Kenneth Hope	Undeveloped	Agricultural or other Use	No aerial photograph coverage available for prior to 1945.
February 25, 1936 to December 22, 1961	H. Murray Hope	Undeveloped	Agricultural or other Use	The 1945 and 1956 aerial photographs indicate the Parcel 2 of the Phase One Property comprised primarily agricultural fields
December 22, 1961 to November 5, 1986	The Roman Catholic Episcopal Corporation of Ottawa	Undeveloped	Agricultural or other Use	The 1965, 1976 aerial photographs indicates that Parcel 2 of the Phase One Property comprised primarily agricultural fields Parcel 2 appears to be vacant in the 1986 aerial photograph
November 5, 1986 to August 31, 1988	Robert Somody, in trust	Undeveloped	Agricultural or other Use	The 1986 aerial photograph indicates that Parcel 2 of the Phase One Property comprised vacant land

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, Etc.
Since August 31, 1988	Corporation of the City of Gloucester (City of Ottawa since October 25, 2018)	Undeveloped	Agricultural or other Use	The 1994, 2002, 2005, 2008, 2011, 2017 aerial photographs indicates that Parcel 2 of the Phase One Property comprised overgrown vacant land

The Phase One Property was previously used for agricultural purposes since prior to 1945 to the present. The Phase One Property is currently vacant with no buildings or structures.

## 7.2 Potentially Contaminating Activity

Any PCA on the Phase One Property or in the Phase One Study Area may require the identification of an area of potential environmental concern (APEC) and trigger the need for a Phase Two ESA to support the filing of a Record of Site Condition. The following PCAs were identified in the Phase One Study Area. None were on the Phase One Property:

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
Phase One Study Area (excluding the Phase One Property)	<i>#27 Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles– Axle Automotive was a tenant at 4543 Southclark Place, 120 metres west of the Site</i>	EcoLog ERIS report	The nature of impacts associated with this PCA typically do not migrate through groundwater and are not anticipated to impact the Phase One Property which is located cross-gradient of the PCA.
	<i>#28 Gasoline and Associated Products Storage in Fixed Tanks – A former 9000 L Gasoline UST was located 100 m west of the Phase One Property (4549 Southclark Place).</i>	EcoLog ERIS report	This PCA was previously investigated in the 2011 Groundwater and Soil Sampling memo which included an off-site well located west of the Phase One Property. No impacts were previously identified related to this PCA. Based on the historical results and the inferred direction of groundwater flow, this PCA is not anticipated to impact the Phase One Property.

Location	Potentially Contaminating Activity	Information Source	Rationale for Potential Contribution of the PCA to an APEC
	<i>#33 – Metal treatment, coating, plating and finishing.</i> Metal Plating operations were identified at 4543 Southclark Place (Reliable Plating) located 120 metres west of the Site.	EcoLog ERIS report, city directories.	Although not specifically identified in the 2011 Phase I ESA, any potential impacts related to plating would have been captured by groundwater sampling previously completed at BH/MW4. Based on the distance from the Site, the previous groundwater results and the inferred cross-gradient location, this PCA is not anticipated to impact the Phase One Property
	<i>#34 – Metal Fabrication.</i> Several Sheet metal fabricators and machine shops were located within the Phase One Study area between 100 and 250 metres west of the Site.	EcoLog ERIS report	The nature of impacts associated with this PCA typically do not migrate through groundwater and are not anticipated to impact the Phase One Property which is located cross-gradient of the PCA.
	<i>#55 – Transformer manufacturing, processing and use.</i> Several pole- and pad-mounted transformers were located within the Phase One Study Area, at least 170 metres west of the Site	Site Observations	The nature of impacts associated with this PCA typically do not migrate through groundwater and are not anticipated to impact the Phase One Property which is located cross-gradient of the PCA.

### 7.3 Areas of Potential Environmental Concern

No APECs were identified at the Phase One Property.

### 7.4 Conceptual Site Model

The following key Site features (as required by O.Reg. 153/04) are presented in Figures 1, 2, 3, and 4:

- Existing buildings and structures;
- Water bodies and areas of natural significance located in the Phase One Study Area;
- Drinking water wells on the Phase One Property;
- Roads (including names) within the Phase One Study Area;
- Uses of properties adjacent to the Phase One Property; and,
- Location of identified PCAs in the Phase One Study Area (including any storage tanks).

The following describes the Phase One ESA CSM for the Site based on the information obtained and reviewed as part of this Phase One ESA:

- The Site is 43.7 acres (17.7 hectares) in area. No buildings were present;
- No water bodies or areas of natural significance were identified on or within 30 m of the Phase One Property;
- Potable water in the vicinity of the Site is provided by the City of Ottawa and from potable water wells. No potable water wells were identified on the Phase One Property;
- At the time of the Phase One ESA, the Site was undeveloped and used for agricultural crop production. Historically, the Site has been used solely for agricultural purposes going back to at least 1945. There is no indication that the Phase One Property was used for an industrial use or any of the following commercial uses: vehicle garage, bulk liquid dispensing facility, or dry cleaning facility;
- At the time of the Phase One ESA, the neighbouring properties within the Phase One Study Area consisted of residential, agricultural and industrial land uses;

No PCAs were identified on the Phase One Property. PCAs identified within the Phase One Study area do not result in an APEC to the Site.

- No underground utilities are known to be present at the Phase One Property;
- Soil at the Site consists primarily of sandy silt to clayey silt;
- Local groundwater is anticipated to flow in southerly direction towards Findley Creek (located approximately 750 m south of the Site).

#### **7.4.1 Uncertainty and Absence of Information**

Responses to Golder's requests for information from the MECP was not available at the time of writing this report.

There were no material deviations to the Phase One ESA requirements set out in O.Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

## **8.0 CONCLUSIONS**

### **8.1 Need for a Phase Two ESA**

Based on the information obtained and reviewed as part of this Phase One ESA, no APECs were identified in association with the Site. Accordingly, a Phase Two ESA is not required to support the submission of a RSC for the Site.

### **8.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone**

As indicated above, no APECs were identified in association with the Site. There are no indications that the Phase One Property was not used for an industrial use or any of the following commercial uses: vehicle garage, bulk liquid dispensing facility, or dry cleaning facility. Accordingly, the Phase One Property is suitable for any of the property uses listed in subsection 1(2) of the regulation.

## 10.0 LIMITATIONS AND USE OF REPORT

This report (the “Report”) was prepared for the exclusive use of Tartan Land Consultants Inc. c/o Barrett Co-tenancy (“Tartan”) for the express purpose of providing advice with respect to the environmental condition of the Site. In evaluating the Site, Golder Associates Ltd. (“Golder”) has relied in good faith on information provided by others as noted in the Report. We have assumed that the information provided is factual and accurate. We accept no responsibility for any deficiency, misstatement or inaccuracy contained in this Report as a result of omissions, misinterpretations or fraudulent acts of persons interviewed or contacted, or incomplete or inaccurate historical information from the various agencies. Any use which a third party makes of this Report, or any reliance on or decisions to be made based on it, is the sole responsibility of such third party. If a third party requires reliance on this Report, prior written authorization from Golder is required. Golder disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of Golder’s assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within Golder’s proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. Golder did not perform a complete assessment of all possible conditions or circumstances that may exist at the site referenced in the Report. Conditions may therefore exist which were not detected given the limited nature of the assessment Golder was retained to undertake with respect to the Site and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the Report. Golder’s opinions are based upon information available to Golder as of the date of the Site visit. It is understood that the services provided for in the scope of work allowed Golder to form no more than an opinion of the actual conditions at the Site at the time of the site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Site or its surroundings. Asbestos and mould surveys were not performed. If a service is not expressly indicated, do not assume it has been provided.

The results of an assessment of this nature should in no way be construed as a warranty that the Site is free from any and all contamination from past or current practices.

## 11.0 CLOSURE

The Qualified Person confirms that the Phase One ESA was conducted and/or supervised by the Qualified Person and that all findings and conclusions of the Phase One ESA are included in the report.

We trust that the information presented in this report meets your current requirements. Should you have any questions or concerns, please do not hesitate to contact the undersigned.

## Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

## Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

## Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

## Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

## Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary: Summary By Data Source

## **AUWR - Automobile Wrecking & Supplies**

A search of the AUWR database, dated 1999-Jul 31, 2019 has found that there are 1 AUWR site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
AXLE AUTOMOTIVE	2757 FENTON RD GLOUCESTER ON K1T 3T8	249.8	<a href="#"><u>55</u></a>

## **BORE - Borehole**

A search of the BORE database, dated 1875-Jul 2018 has found that there are 2 BORE site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
	ON	16.7	<a href="#"><u>8</u></a>
	ON	205.5	<a href="#"><u>44</u></a>

## **CA - Certificates of Approval**

A search of the CA database, dated 1985-Oct 30, 2011\* has found that there are 3 CA site(s) within approximately 0.25 kilometers of the project property.

<b><u>Site</u></b>	<b><u>Address</u></b>	<b><u>Distance (m)</u></b>	<b><u>Map Key</u></b>
Pryor Metals Limited	2623 Fenton Road Ottawa ON	235.2	<a href="#"><u>50</u></a>

**Description:**

**Location:**  
**Region:**  
**Ministry District:**

On June 24, 2010, Findlay Creek Properties Ltd. pleaded guilty to a violation under the Ontario Water Resources Act for the illegal deposit of silt into Findlay Creek. The Court heard that the company is developing a residential housing subdivision in Ottawa know as Findlay Creek Village. A drainage channel flowed across the western portion of the housing development and into Findlay Creek at the time of the event. In order to prepare the land for development, it was necessary for the company to re-route the drainage channel. Sedimentation ponds were used to control the sediment discharge, however, the re-routing caused a section of the bank immediately downstream from the discharge outlet to erode, which created the potential to impair the water quality and fish habitat. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$60,000 plus a victim fine surcharge and given 60 days to pay the fine.

**Agencies Notified:** PWGSC SIT-ND/RPT-4 Environment Team  
**Releasing Auth:**  
**Spill Source:** Personal Vehicle  
**Spill Location:** CFS Leitrim, East end of parking lot (beside gymnasium)  
**Spill Cause:** overflow/leak from vehicle  
**Potential Env Impacts:** soil contamination  
**Potential Human Impacts:** N/A  
**Actions Taken:** All employees at the station were contacted to determine the owner of the vehicle. The owner was requested to immediately remove the vehicle from the property for repairs. Spill pads were placed on the spilled material, and later collected for disposal in plastic bags.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Sep 2019**

### **Abandoned Mine Information System:**

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Jul 31, 2019**

### **Borehole:**

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\*****Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2017****Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2017****Chemical Register:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jul 31, 2019****Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 - Aug 2019****Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\*****Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2019****Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994-Oct 31, 2019****Drill Hole Database:**

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2018**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011-Oct 31, 2019**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994-Oct 31, 2019**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011-Oct 31, 2019**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Jul 31, 2019**

**Environmental Issues Inventory System:**

Federal [EIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial [EMHE](#)

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial [EPAR](#)

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2018**

**List of Expired Fuels Safety Facilities:**

Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2017**

**Federal Convictions:**

Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

**Government Publication Date: Jun 2000-Aug 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal FED TANKS

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fisheries & Oceans Fuel Tanks:**

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2018**

**Fuel Storage Tank:**

Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2017**

**Fuel Storage Tank - Historic:**

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Jul 31, 2019**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2017**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2017**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Jan 2019**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date:** Dec 31, 2017

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date:** Up to May 2001\*

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date:** Mar 1999-Apr 2018

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date:** 2001-Apr 2007\*

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date:** 2008-Jun 30, 2019

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date:** 1920-Feb 2003\*

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date:** 1974-2003\*

**National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date:** 1988-2008\*

**National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date:** 1993-May 2017

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Aug 31, 2019**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jun 2019**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994-Oct 31, 2019**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial

[PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: 1988-Oct 2019**

**Pipeline Incidents:**

Provincial

[PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2017**

**Private and Retail Fuel Storage Tanks:**

Provincial

[PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial

[PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994-Oct 31, 2019**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-2016**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental clean-up orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2019**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Jul 31, 2019**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

**Government Publication Date: 1988-Feb 2019**

**Wastewater Discharger Registration Database:**

Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2017**

**Anderson's Storage Tanks:**

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970-Aug 2018**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2017**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011-Oct 31, 2019**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Feb 28, 2019**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**APPENDIX D**

# Freedom of Information Requests

---

**From:** Public Information Services <publicinformationsservices@tssa.org>  
**Sent:** November 8, 2019 1:40 PM  
**To:** Noble, Jaime  
**Subject:** RE: 19133497 (1000) TSSA Database Search

**EXTERNAL EMAIL**

**No Records Found**

Thank you for your request for confirmation of public information.

- We confirm that there are **no fuel storage tanks records** in our database at the subject address(es).

For a further search in our archives please complete our release of public information form found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid\\_=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392) and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

**Connie Hill | Public Information Agent**

**Subject:** 19133497 (1000) TSSA Database Search

Good Afternoon,

May you please perform a TSSA database record search for any underground storage tanks, registered fuel tanks, outstanding instructions, incident reports, fuel oil spills or contaminations records for the following locations. We found additional information that lead us to this address:

- Lot 16, concession 4, Geographic Township of Gloucester, City of Ottawa, Ontario

Jaime
