## EXECUTIVE SUMMARY

### Assessment

Paterson Group was retained by IBI Group to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for Blocks 1 and 2 of the Tunney's Pasture government office complex, in the City of Ottawa, Ontario. The objective of this Phase I ESA was to research the past and current use of the site (Phase I Property) and 250 m study area (Phase I Study Area) and to identify any environmental concerns with the potential to have impacted the subject property.

According to the historical research, the Phase I Property has never been formally developed with any buildings or structures, though it has been utilized as an asphalt-covered vehicular parking lot since at least the early 1970's. The Phase I Property has remained largely unchanged since this time.

The surrounding lands within the Phase I Study Area have largely been developed for residential and commercial office purposes. Some off-site potentially contaminating activities were identified within the Phase I Study area, however, due to their separation distances as well as their down-gradient orientation with respect to the anticipated groundwater flow to the north, these activities are not considered to pose an environmental concern to the Phase I Property.

Presently, the Phase I Property is currently vacant of any buildings, though it is largely occupied by the aforementioned asphalt-covered vehicular parking lot with underlying services. Two areas of potential environmental concern (APECs) were identified on the Phase I Property:

- APEC 1:** The presence of sub-grade fill material of unknown quality beneath the entirety of the site is considered to represent an APEC with respect to the Phase I Property. The contaminants of potential concern associated with this APEC include petroleum hydrocarbons, benzene, toluene, ethylbenzene, and xylenes, polycyclic aromatic hydrocarbons, and metals.
- APEC 2:** The use of road salt throughout the parking lot for de-icing purposes during snow and ice conditions is considered to represent an APEC with respect to the Phase I Property. The contaminants of potential concern associated with this APEC include electrical conductivity and sodium adsorption ratio.

The surrounding lands largely consist of residential dwellings to the south and west, as well as a government office complex to the north and east. The present day use of the neighbouring properties are not considered to pose an environmental concern to the Phase I Property.

---

## Recommendations

Based on the findings of this assessment, it is our opinion that **a Phase II – Environmental Site Assessment will be required for the Phase I Property.**

The preliminary scope of work proposed for the Phase II ESA consists of the placement of three boreholes across the Phase I Property, all of which will be instrumented with groundwater monitoring wells. The boreholes will be strategically placed for coverage of all identified APECs on the Phase I Property, though the final locations have not yet been established. Proposed analytical testing for both soil and groundwater samples will include petroleum hydrocarbons, benzene, toluene, ethylbenzene, xylenes, metals, polycyclic aromatic hydrocarbons, electrical conductivity, and sodium adsorption ratio.

## 1.0 INTRODUCTION

At the request of IBI Group, Paterson Group (Paterson) conducted a Phase I – Environmental Site Assessment (Phase I ESA) for Blocks 1 and 2 of the Tunney's Pasture government office complex, in the City of Ottawa, Ontario, (Phase I Property). The objective of this Phase I ESA has been to research the past and current use of the Phase I Property, as well as the neighbouring properties within a 250 m study area (Phase I Study Area), to identify any potentially contaminating activities (PCAs) that would result in areas of potential environmental concern (APECs) on the Phase I Property.

Paterson was engaged to conduct this Phase I ESA by IBI Group, who's office can be reached by telephone at 1-416-596-1930.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all of our findings and results of the environmental conditions at this site.

This Phase I ESA report has been prepared under the supervision of a Qualified Person, in general accordance with Ontario Regulation (O. Reg.) 153/04, as amended under the Environmental Protection Act, and CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information, as well as a cursory review made at the time of the field assessment. The historical research relies upon information supplied by others, such as local, provincial, and federal agencies, and was limited within the scope-of-work, time, and budget of the project herein.

---

## 2.0 PHASE I PROPERTY INFORMATION

Address: Part of 101 Goldenrod Driveway and 251 Sir Frederick Banting Driveway, Blocks 1 & 2, Tunney's Pasture, Ottawa, Ontario.

Location: The Phase I Property is situated on the west side of Sir Frederick Banting Driveway, approximately 20 m north of Scott Street, in the City of Ottawa, Ontario. Refer to Figure 1 – Key Plan, as well as Drawing PE6034-1 – Site Plan, appended to this report.

Latitude and Longitude: 45° 24' 12" N, 75° 44' 28" W.

### **Site Description:**

Configuration: Irregular.

Area: 2.9 hectares (approximately).

Zoning: MC – Mixed-Use Centre Zone.

Current Use: The Phase I Property is vacant of any buildings or structures, and is currently utilized as an asphalt-covered vehicular parking lot.

Services: The Phase I Property is located within a municipally serviced area.

### **3.0 SCOPE OF INVESTIGATION**

The scope of work for this Phase I ESA is described as follows:

- ☐ Determine the historical activities occurring on the Phase I Property and in the Phase I Study Area by conducting a review of readily available records, reports, photographs, plans, mapping information, databases, and regulatory agencies;
- ☐ Investigate the existing conditions present on the Phase I Property and in the Phase I Study Area by conducting site reconnaissance;
- ☐ Conduct interviews with persons knowledgeable of current and historic operations on the Phase I Property and, if warranted, the neighbouring properties;
- ☐ Present the results of our findings in a comprehensive report in general accordance with the requirements O. Reg. 153/04, as amended under the Environmental Protection Act, and in compliance with the requirements of CSA Z768-01 (reaffirmed 2022);
- ☐ Provide a preliminary environmental site evaluation based on our findings;
- ☐ Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I ESA Study Area Determination**

A radius of 250 m was deemed appropriate for defining the study area for this assignment, herein referred to as the Phase I Study Area. Properties located outside of the Phase I Study Area are not considered to have had the potential to impact the Phase I Property, based on their significant separation distances.

#### **First Developed Use Determination**

Based on a review of available historical information, the Phase I Property has never been formally developed with any buildings or structures, though it has been utilized as an asphalt-covered vehicular parking lot since at least the early 1970's.

#### **Fire Insurance Plans**

Fire insurance plans (FIPs), dated from 1925 and 1956, were reviewed at Library and Archives Canada for the general area of the Phase I Property as part of this assessment. These plans contain mapping information regarding the historical property uses within the general area of the Phase I Property.

- |      |                                                                                                                                                                                                                                                                                                                       |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1925 | The Phase I Property appears to be vacant at this time, while the neighbouring lands consist primarily of residential properties. A railway line can be seen immediately adjacent to the south of the Phase I Property.                                                                                               |
| 1956 | No significant changes are apparent with respect to the Phase I Property since the time of the previous FIP publication. The adjacent lands to the east appear to be undergoing development with the existing government office complex, while the neighbouring lands to the south and west remain largely unchanged. |

Potentially contaminating activities identified in the Phase I Study Area are depicted on Drawing PE6034-2 – Surrounding Land Use Plan, in the Figures section of this report.

## **City of Ottawa Street Directories**

City of Ottawa street directories, were reviewed in approximate ten year intervals between 1940 and 2011 for the general area of the Phase I Property as part of this assessment.

According to the directories, the Phase I Property was listed as part of the Tunney's Pasture government office complex from the 1950's to the present day.

The lands to the south and west were predominantly listed as residential properties. A review of these directories did not identify any potentially contaminating activities associated with any properties situated within the Phase I Study Area.

## **Plan of Survey**

A survey plan of the Phase I Property was not provided for review as part of this assessment.

## **4.2 Environmental Source Information**

### **National Pollutant Release Inventory**

A search of the National Pollutant Release Inventory (NPRI) database was conducted as part of this assessment. This federally managed database provides various reports and tracking information relating to the release of solid, liquid, or gaseous pollutants from industrial facilities into the natural environment.

A search of this database did not identify any pollutant release records listed for the Phase I Property, or any properties situated within the Phase I Study Area. Some pollutant release records were identified for the Tunney's Pasture central heating and cooling plant, located approximately 275 m to the east at 50 Chardon Driveway. According to the database, several records of airborne discharges of sulphur dioxide, nitrogen oxide, and particulate matter (PM10 and PM2.5) were reported between 2002 and 2011. Based on the nature of airborne discharges, as well as their significant separation distances, these pollutant releases are not considered to present an environmental concern to the Phase I Property.

---

## **Ontario PCB Waste Storage Site Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Ontario Inventory of PCB Storage Sites, April 1995*" was reviewed as part of this assessment. This document identifies all recorded active and closed PCB waste storage sites situated in the Province of Ontario.

A review of this document did not identify any former PCB waste storage sites situated within the Phase I Study Area.

## **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Waste Disposal Site Inventory in Ontario, 1991*" was reviewed as part of this assessment. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants, and coal tar distillation plants situated in the Province of Ontario.

A review of this document did not identify any former waste disposal sites situated on the Phase I Property or within the Phase I Study Area.

## **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment, Conservation and Parks document entitled, "*Municipal Coal Gasification Plant Site Inventory, 1991*" was reviewed as part of this assessment. This document provides a reference to the locations of former plants with respect to the Phase I Property.

A review of this document did not identify any former coal gasification plants located on the Phase I Property or within the Phase I Study Area.

## **MECP Waste Management Records**

A request was submitted to the MECP Freedom of Information office for information with respect to waste management records for the Phase I Property.

The response from the MECP indicated that no relevant records were identified pertaining to the Phase I Property.

## **MECP Submissions**

A request was submitted to the MECP Freedom of Information office for information with respect to reports related to environmental conditions for the Phase I Property.

The response from the MECP indicated that no relevant records were identified pertaining to the Phase I Property.

## **MECP Incident Reports**

A request was submitted to the MECP Freedom of Information office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, or inspections maintained by the MECP for the Phase I Property or any of the neighbouring properties.

The response from the MECP indicated that no relevant records were identified pertaining to the Phase I Property. Some incident records were returned for the neighbouring parcel to the east, addressed 101 Goldenrod Driveway. These records document a few low volume (<10 L) fuel spills from leaking vehicles and a generator. In all instances, the spills were cleaned up immediately using absorbent granules. Due to the low volumes of fuel spilled, as well as the separation distances, these spill incidents are not considered to pose an environmental concern to the Phase I Property.

## **MECP Instruments**

A request was submitted to the MECP Freedom of Information office for information with respect to certificates of approval, permits to take water, certificates of property use, or any other similar MECP issued instruments for the Phase I Property.

The response from the MECP indicated that no relevant records were identified pertaining to the Phase I Property.

## **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment. This database contains publicly available information on Records of Site Condition (RSCs) filed in the Province of Ontario between 2004 and 2022.

A review of the registry did not identify any RSCs filed for the Phase I Property, or for any properties situated within the Phase I Study Area.

### **Technical Standards and Safety Authority (TSSA)**

The TSSA Fuels Safety Branch in Toronto was contacted electronically on March 14, 2023, as part of this assessment, to inquire about current and former fuel storage tanks, spills, and historical incidents for the Phase I Property as well as the neighbouring properties within the Phase I Study Area.

The response from the TSSA indicated that no records were identified associated with the Phase I Property or any properties situated within the Phase I Study Area.

A copy of the correspondence with the TSSA is included in Appendix 2.

### **OMNRF Areas of Natural and Scientific Interest (ANSI)**

A search for ANSI sites situated within the Phase I Study Area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website as part of this assessment.

A review of the available mapping information did not identify any ANSI sites situated on the Phase I Property or within the Phase I Study Area.

### **City of Ottawa Old Landfill Sites**

The document prepared by Golder Associates entitled, "*Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa*", was reviewed as part of this assessment. This document identifies the details and locations of all recorded active and closed landfill sites situated in the City of Ottawa.

A review of this document did not identify any active or closed landfill sites situated on the Phase I Property or within the Phase I Study Area.

### **City of Ottawa Historical Land Use Inventory (HLUI) Database**

As part of this assessment, a requisition form was submitted to the City of Ottawa to request information from the City's Historical Land Use Inventory (HLUI) database for any environmental records pertaining to the Phase I Property as well as any properties situated within the Phase I Study Area.

The response from the City indicated that no relevant records were identified pertaining to the Phase I Property.

A copy of the submission request has been included in Appendix 2.

### **ERIS Database Report**

A database report, prepared by ERIS (Environmental Risk Information Services Ltd.), dated July 5, 2022, was acquired and reviewed as part of this assessment. This report provides a compilation of various provincial and federal environmental related records pertaining to any properties situated within the Phase I Study Area.

It should be noted that this ERIS report encompasses the entirety of the Tunney's Pasture complex as well as the surrounding lands within a 250 m radius.

The complete ERIS report has been included in Appendix 2.

#### **❑ On-Site Records:**

The ERIS report identified 178 records pertaining to the Tunney's Pasture government office complex, though it should be noted that none of them were identified as pertaining specifically to the Phase I Property as described in this report.

The majority of these records describe various classes of waste products generated throughout the surrounding Tunney's Pasture government office complex. Based on the low quantities generated, as well as their physical separation distances, the generation of these waste products are not considered to pose an environmental concern to the Phase I Property.

A number of these records describe various spill events recorded throughout the surrounding Tunney's Pasture government office complex. A review of these records determined that these spills pertained primarily to airborne releases of various refrigerant chemicals, or pertained to minor quantities (<10 L) of oil related products spilled directly onto a ground surface which were instantly contained and cleaned up. As a result, these records are not considered to pose an environmental concern to the Phase I Property.

#### **❑ Off-Site Records:**

The ERIS report identified 308 records associated with the properties situated within the Phase I Study Area.

Based on the nature of their activity, their significant separation distances, and/or their down-gradient or cross-gradient orientations with respect to the known groundwater flow to the north, none of the off-site records are considered to pose an environmental concern to the Phase I Property.

### **Previous Engineering Reports**

Numerous engineering investigations and assessments have been previously carried out for the various parcels comprising the Tunney's Pasture complex. A review was carried out of the reports done for the immediately adjacent parcels to the Phase I Property, with a brief summary provided below:

#### *DND Data Centre*

- *"Phase I Environmental Site Assessment – DND Data Centre (Building 16), Tunney's Pasture, Ottawa, Ontario"* prepared by DST Consulting Engineers, dated March 1997.

According to the historical research, the subject site was historically used for agricultural purposes until first developed with the existing commercial office building sometime in the 1960's. The use of the subject site had not changed significantly since the time of construction and no environmental concerns were identified with regards to its use or the use of the neighbouring properties.

#### *Personal Records Centre*

- *"Phase I Environmental Site Assessment – Personal Records Centre (Building 18), Tunney's Pasture, Ottawa, Ontario"* prepared by Robert Halsall & Associated Limited, dated April 1996.

According to the historical research, the subject site was historically used for agricultural purposes until first developed with the existing commercial office building sometime in the 1950's. The use of the subject site had not changed significantly since the time of construction. Some minor fuel staining was observed on the exterior asphalt loading ramp, on the southwest corner of the building. It was recommended that a limited subsurface investigation be carried out to verify the quality of the sub-grade soils in the vicinity of the staining.

Due to its separation distance, this fuel staining is not considered to pose an environmental concern to the Phase I Property.

*Sir Frederick G. Banting Research Centre*

- *“Phase I Environmental Site Assessment – Sir Frederick G. Banting Research Centre (Building 22), Tunney’s Pasture, Ottawa, Ontario” prepared by Robinson Consultants, dated March 2000.*

According to the historical research, the subject site was historically used for agricultural purposes until first developed with the existing commercial office building sometime in the 1970's. In 1997, an underground fuel storage tank was reportedly removed from the site, at which time contaminated soil was identified and assessed. The report prepared on the soil characteristics suggested that some contamination was concentrated at the bottom of the excavation and within the bedrock, thus infiltrating the groundwater table. It was recommended that additional investigation be carried out to confirm the presence or absence of any additional contamination. Based on its separation distance, as well as its inferred down-gradient orientation with respect to the anticipated groundwater flow to the north, this former underground fuel tank is not considered to pose an environmental concern to the Phase I Property.

- *“Groundwater Monitoring Program Report – Sir Frederick G. Banting Research Centre (Building 22), Tunney’s Pasture, Ottawa, Ontario” prepared by EXP Services Inc., dated January 2017.*

A round of groundwater monitoring and testing was carried out for a suite of interior and exterior wells installed at the Banting Building (located immediately north of the present Phase I Property). The investigation was carried out to assess the groundwater conditions resulting from the presence of a former underground fuel storage tank, a former underground solvent storage tank, the handling of chemicals at the loading docks, and the potential discharge of contaminants into the sewer system.

Based on the findings of the groundwater assessment, the concentrations of some metals and inorganic compounds in two of the exterior wells were found to exceed the federal guidelines appropriate for the site. The results did show a trending decrease since a previous assessment was carried out in 2015, and none of the exceedances were deemed to pose a significant health or ecological concern, given their location within the bedrock aquifer. It was recommended that additional delineation work be carried out by way of installing additional monitoring wells on the site. Based on its down-gradient orientation with respect to the anticipated groundwater flow to the north, these minor exceedances are not considered to pose an environmental concern to the Phase I Property.

### Site-Wide Investigation

- *"Phase One Environmental Site Assessment – Tunney's Pasture Complex, Ottawa, Ontario"* prepared by Stantec Consulting Ltd., dated January 30, 2020.

In 2020, Stantec conducted a Phase I ESA for the entirety of the Tunney's Pasture complex, including the current Phase I Property. According to the historical research, the Phase I Property has never been formally developed with any buildings or structures, though it has been utilized as an asphalt-covered vehicular parking lot since at least the early 1970's. The Phase I Property has remained largely unchanged since this time.

Stantec identified fill material as an on-site APEC for the Phase I Property, and recommended that a Phase II ESA be conducted to assess the soil quality throughout the property.

## **4.3 Physical Setting Sources**

Historical aerial photographs of the Phase I Study Area were obtained from the National Air Photo Library and reviewed in approximate ten year intervals, beginning with the earliest available photograph. Based on a review of these photographs, the following observations have been made:

- |      |                                                                                                                                                                                                                                                                             |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1928 | The Phase I Property, as well as the neighbouring lands to the north and east appear to be vacant at this time. The neighbouring lands to the east, south, and west appear to be used primarily for residential purposes. A railway line can be seen adjacent to the south. |
| 1945 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous aerial photograph.                                                                                                                         |
| 1953 | No significant changes are apparent with respect to the Phase I Property since the time of the previous photograph. The neighbouring lands further to the east appear to be undergoing development with the existing government office complex.                             |
| 1965 | No significant changes are apparent with respect to the Phase I Property since the time of the previous photograph. An office building and asphalt-covered parking lot can be seen to the east.                                                                             |

|      |                                                                                                                                                                                                                                                                 |
|------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1976 | The majority of the Phase I Property appears to be converted into an asphalt covered vehicular parking lot at this time. Soil disturbance and fill piles can be seen in the southernmost portion of the site. An office building can also be seen to the north. |
| 1984 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous aerial photograph.                                                                                                             |
| 1991 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous aerial photograph.                                                                                                             |
| 2002 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous aerial photograph.                                                                                                             |
| 2011 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous photograph.                                                                                                                    |
| 2021 | No significant changes are apparent with respect to the Phase I Property or the surrounding lands since the time of the previous aerial photograph. The Phase I Property and the surrounding lands appear as they exist today.                                  |

Copies of the aerial photographs selected for review are included in Appendix 1.

### **Geological Maps**

Geological mapping information for the Phase I Property was obtained from The Geological Survey of Canada – Urban Geology of the National Capital Area and reviewed as part of this assessment.

Based on the available mapping information, the bedrock beneath the Phase I Property generally consists of interbedded limestone and dolomite of the Gull River Formation. The surficial geology consists largely of Paleozoic bedrock, with an overburden ranging from approximately 0 m to 2 m in thickness.

## Topographic Maps

A topographic map of the Phase I Property was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as part of this assessment.

The topographic map indicates that the general elevation of the Phase I Property is approximately 65 m above sea level, while the regional topography within the greater area is depicted as sloping downwards to the northwest, in the general direction of the Ottawa River.

An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

## Water Bodies

No water bodies are present on the Phase I Property.

The nearest named water body with respect to the Phase I Property is the Ottawa River, located approximately 575 m to the northwest.

## Physiographic Maps

A physiographic map was obtained from the Natural Resources Canada – The Atlas of Canada website and reviewed as a part of this assessment. According to the publication and available mapping information, the Phase I Property is situated within the St. Lawrence Lowlands. According to the description provided: “...*the lowlands are plain-like areas that were affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.*” The Phase I Property is specifically located within the Central St. Lawrence Lowland area, which is rarely more than 150 m above sea level.

## MECP Water Well Records

A search of the MECPs website for all drilled well records within a 250 m radius of the Phase I Property was conducted as part of this assessment. The search identified three well records within the Phase I Study Area. These records pertain to wells installed between 1949 and 2007 and used for either domestic household or groundwater observation purposes. Based on the availability of municipal services, no viable drinking water wells are anticipated to be present within the Phase I Study Area.

According to the well records, the overburden stratigraphy in the vicinity of the Phase I Property generally consists of brown silty sand and gravel over top of brown silt. Bedrock, consisting of limestone, was generally encountered at an average depth of 3.5 m below ground surface. The aforementioned well records have been included in Appendix 2.

---

## 5.0 INTERVIEWS

### Property Owner Representative

Ms. Catriona Moggach, a representative from IBI Group was contacted via email to respond to questioning about the environmental history of the Phase I Property.

Ms. Moggach stated that the Phase I Property has never been formally developed, other than the conversion to an asphalt-covered vehicular parking lot sometime in the 1970's. The Phase I Property has not undergone any significant changes since that time period.

Ms. Moggach was unaware of any potential environmental concerns associated with the historical and current use of the Phase I Property.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

A site inspection was conducted for the Phase I Property on March 16, 2023, between 12:00 PM and 1:00 PM. Weather conditions were overcast, with a temperature of approximately 4 °C. Mr. Nick Sullivan, from the Environmental Department of Paterson Group, conducted the inspection.

In addition to the Phase I Property, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site inspection.

### **6.2 Specific Observations at the Phase I Property**

#### **Site Description**

The Phase I Property currently consists of a paved asphaltic concrete parking lot, with some mature trees and landscaped areas to the west and south, respectively.

The site topography is relatively flat, while the regional topography appears to slope down towards the northwest, in the general direction the Ottawa River. The Phase I Property is generally considered to be at grade with respect to the surrounding properties, with the exception of a grassy hill in the southern portion of the site.

Water drainage on the Phase I Property occurs primarily via surface run-off towards catch basins present within the parking lot and on the adjacent streets, as well as via infiltration within the landscaped areas.

No ponded water, stressed vegetation, surficial staining, or any other indications of potential sub-surface contamination were observed on the Phase I Property at time of the site inspection.

A depiction of the Phase I Property is illustrated on Drawing PE6034-1 – Site Plan, in the Figures section of this report.

#### **Buildings and Structures**

At the time of the site inspection, no buildings or structures were present on the Phase I Property.

## Potential Environmental Concerns

### ☐ Fuels and Chemical Storage

At the time of the site inspection, no chemical storage areas, above ground fuel storage tanks (ASTs), or evidence indicating the presence of any underground fuel storage tanks (USTs) were observed on the exterior of the Phase I Property.

### ☐ Hazardous Materials and Unidentified Substances

At the time of the site inspection, no hazardous materials, unidentified substances, spills, surficial staining, abnormal odours, stressed vegetation, or any other indications of potential sub-surface contamination were observed on the exterior of the Phase I Property.

### ☐ Polychlorinated Biphenyls (PCBs) and Transformer Oil

At the time of the site inspection, no electrical transformers or any other potential sources of PCBs or transformer oil were identified on the exterior of the Phase I Property.

### ☐ Waste Management

At the time of the site inspection, no waste products are currently being generated on the Phase I Property.

## Neighbouring Properties

At the time of the site inspection, a survey of the neighbouring properties was conducted from publicly accessible roadways.

Land use adjacent to the Phase I Property was observed as follows:

- North:* A government office building (Sir Frederick B. Banting Building), followed by an asphalt parking lot.
- East:* Sir Frederick Banting Driveway, followed by an asphalt-covered parking lot and a government office building.
- South:* The O-Train Confederation Line LRT, followed by Scott Street and residential dwellings.

*West:* Residential dwellings, a mosque, and a community centre, followed by Northwestern Avenue and more residential dwellings.

No environmental concerns were identified with respect to the current use of the adjacent properties.

The neighbouring land use within the Phase I Study Area is depicted on Drawing PE6034-2 – Surrounding Land Use Plan, in the Figures section of this report.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Land Use History

Based on a review of available historical information, the land use history of the Phase I Property is summarized below in Table 1.

| <b>Table 1</b><br><b>Land Use History – Tunney's Pasture Road Network, Ottawa, Ontario</b> |                           |                       |                                                                                                                                                                                                                                       |
|--------------------------------------------------------------------------------------------|---------------------------|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Time Period                                                                                | Land Use                  | Description           | Observations                                                                                                                                                                                                                          |
| Prior to 1928                                                                              | Agricultural or Other Use | Vacant Land           | No historical information available prior to this time period.<br><br>Land use is assumed to be vacant.                                                                                                                               |
| 1928-1970's                                                                                | Agricultural or Other Use | Vacant Land           | Aerial photographs from the 1920's to the 1960's depict the Phase I Property as vacant land during this time period.                                                                                                                  |
| 1970's-Present                                                                             | Commercial Use            | Vehicular Parking Lot | Aerial photographs from the 1970s to the present day, as well as previous engineering reports and a site inspection, confirm the presence of an asphalt-covered vehicular parking lot occupying the majority of the Phase I Property. |

### Potentially Contaminating Activities (PCAs)

Based on the findings of the Phase I ESA, two potentially contaminating activities (PCAs), resulting in areas of potential environmental concern (APECs), were identified on the Phase I Property.

As per Table 2 – Column A of O. Reg. 153/04, as amended, the PCAs resulting in APECs on the Phase I Property are described as follows:

- ☐ Item 30: Importation of Fill Material of Unknown Quality; associated with the potential presence of poor quality fill material used for grading purposes, located throughout the Phase I Property (APEC 1)
- ☐ Item N/A: Application of Road Salt for De-icing Purposes During Snow and Ice Conditions; associated with the use of road salt throughout the asphalt-covered parking lot occupying the northern and central portions of the Phase I Property (APEC 2).

Other off-site PCAs were identified within the Phase I Study Area, which are described as follows:

- ☐ Item 8: Chemical Manufacturing, Processing and Bulk Storage; associated with the presence of an existing chemical waste generator and hazardous materials storage facility within the government office building adjacent to the north of the Phase I Property.
- ☐ Item 46: Rail Yards, Tracks, and Spurs; associated with the presence of a former railway line adjacent to the south of the Phase I Property.

Based on their separation distances, as well as their down-gradient orientation with respect to the anticipated groundwater flow to the north, these activities are not considered to pose an environmental concern to the Phase I Property.

### Areas of Potential Environmental Concern (APECs)

The areas of potential environmental concern identified in this Phase I ESA are summarized below in Table 2:

| <b>Table 2<br/>Areas of Potential Environmental Concern</b> |                                                   |                                                                                                  |                                              |                                                                  |                                                                        |
|-------------------------------------------------------------|---------------------------------------------------|--------------------------------------------------------------------------------------------------|----------------------------------------------|------------------------------------------------------------------|------------------------------------------------------------------------|
| <b>Area of Potential Environmental Concern</b>              | <b>Location of APEC on Phase I Property</b>       | <b>Potentially Contaminating Activity (Table 2 – O. Reg. 153/04)</b>                             | <b>Location of PCA (On-Site or Off-Site)</b> | <b>Contaminants of Potential Concern</b>                         | <b>Media Potentially Impacted (Groundwater, Soil, and/or Sediment)</b> |
| <b>APEC 1</b><br><br>Fill Material of Unknown Quality       | Entirety of Phase I Property                      | <i>"Item 30: Importation of Fill Material of Unknown Quality"</i>                                | On-Site                                      | PHCs (F <sub>1</sub> -F <sub>4</sub> )<br>BTEX<br>PAHs<br>Metals | Soil and/or groundwater                                                |
| <b>APEC 2</b><br><br>Application of Road Salt               | Northern and Central Portions of Phase I Property | <i>"Item N/A: Application of Road Salt for De-Icing Purposes During Snow and Ice Conditions"</i> | On-Site                                      | EC<br>SAR                                                        | Soil and/or groundwater                                                |

### Contaminants of Potential Concern (CPCs)

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- ☐ Petroleum Hydrocarbons, fractions 1 – 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- ☐ Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX);

- ☐ Polycyclic Aromatic Hydrocarbons (PAHs);
- ☐ Metals;
- ☐ Electrical Conductivity (EC);
- ☐ Sodium Adsorption Ratio (SAR).

These CPCs have the potential to be present in the soil matrix and/or groundwater beneath the Phase Property.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

Based on the available mapping information, the bedrock beneath the Phase I Property generally consists of interbedded limestone and dolomite of the Gull River Formation. The surficial geology consists largely of Paleozoic bedrock, with an overburden ranging from approximately 0 m to 2 m in thickness.

Groundwater is anticipated to be encountered within the bedrock and flow in a northerly direction towards the Ottawa River.

### **Water Bodies and Areas of Natural and Scientific Interest**

No water bodies or areas of natural and scientific interest are present on the Phase I Property or within the Phase I Study Area.

The nearest named water body with respect to the Phase I Property is the Ottawa River, located approximately 575 m to the northwest.

### **Drinking Water Wells**

Based on the availability of municipal services, no potable drinking water wells are anticipated to remain in use within the Phase I Study Area.

### **Existing Buildings and Structures**

No buildings or structures currently exist on the Phase I Property.

### **Current and Future Property Use**

The Phase I Property is currently occupied by an asphalt-covered vehicular parking lot, with some landscaped areas.

It is our understanding that the Phase I Property may be redeveloped for residential purposes in the future. Due to a change in land use to a more sensitive type (commercial to residential), a record of site condition (RSC) will need to be filed with the MECP.

### **Neighbouring Land Use**

The surrounding lands within the Phase I Study Area consist largely of commercial and residential properties. Current land use is depicted on Drawing PE6034-2 – Surrounding Land Use Plan, in the Figures section of this report.

### **Potentially Contaminating Activities and Areas of Potential Environmental Concern**

As per Section 7.1 of the Phase I ESA report, two potentially contaminating activities (PCAs), resulting in areas of potential environmental concern (APECs), were identified on the Phase I Property. These APECs include:

- ☐ The presence of fill material of unknown quality, located beneath the entirety of the Phase I Property (APEC 1);
- ☐ The use of road salt for de-icing purposes during snow and ice conditions, located within the asphalt-covered parking lot occupying the northern and central portions of the Phase I Property (APEC 2).

Other off-site PCAs were identified within the Phase I Study Area but were deemed not to be of any environmental concern to the Phase I Property based on their separation distances, their inferred down-gradient or cross-gradient orientation with respect to the known groundwater flow to the north, or the results of the previous subsurface investigation carried out for the property.

### **Contaminants of Potential Concern**

The contaminants of potential concern (CPCs) associated with the aforementioned APECs are considered to be:

- ☐ Petroleum Hydrocarbons, fractions 1 – 4 (PHCs F<sub>1</sub>-F<sub>4</sub>);
- ☐ Benzene, Toluene, Ethylbenzene, and Xylenes (BTEX);
- ☐ Polycyclic Aromatic Hydrocarbons (PAHs);
- ☐ Metals;

- ☐ Electrical Conductivity (EC);
- ☐ Sodium Adsorption Ratio (SAR).

These CPCs have the potential to be present in the soil matrix and/or the groundwater situated beneath the Phase I Property.

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I ESA is considered to be sufficient to conclude that there are PCAs or APECs associated with the Phase I Property.

The presence of any PCAs was confirmed by a variety of independent sources, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## 8.0 CONCLUSIONS

### 8.1 Assessment

Paterson Group was retained by IBI Group to conduct a Phase I – Environmental Site Assessment (Phase I ESA) for Blocks 1 and 2 of the Tunney's Pasture government office complex, in the City of Ottawa, Ontario. The objective of this Phase I ESA was to research the past and current use of the site (Phase I Property) and 250 m study area (Phase I Study Area) and to identify any environmental concerns with the potential to have impacted the subject property.

According to the historical research, the Phase I Property has never been formally developed with any buildings or structures, though it has been utilized as an asphalt-covered vehicular parking lot since at least the early 1970's. The Phase I Property has remained largely unchanged since this time.

The surrounding lands within the Phase I Study Area have largely been developed for residential and commercial office purposes. Some off-site potentially contaminating activities were identified within the Phase I Study area, however, due to their separation distances as well as their down-gradient orientation with respect to the anticipated groundwater flow to the north, these activities are not considered to pose an environmental concern to the Phase I Property.

Presently, the Phase I Property is currently vacant of any buildings, though it is largely occupied by the aforementioned asphalt-covered vehicular parking lot with underlying services. Two areas of potential environmental concern (APECs) were identified on the Phase I Property:

**APEC 1:** The presence of sub-grade fill material of unknown quality beneath the entirety of the site is considered to represent an APEC with respect to the Phase I Property. The contaminants of potential concern associated with this APEC include petroleum hydrocarbons, benzene, toluene, ethylbenzene, and xylenes, polycyclic aromatic hydrocarbons, and metals.

**APEC 2:** The use of road salt throughout the parking lot for de-icing purposes during snow and ice conditions is considered to represent an APEC with respect to the Phase I Property. The contaminants of potential concern associated with this APEC include electrical conductivity and sodium adsorption ratio.

The surrounding lands largely consist of residential dwellings to the south and west, as well as a government office complex to the north and east. The present day use of the neighbouring properties are not considered to pose an environmental concern to the Phase I Property.

## **8.2 Recommendations**

Based on the findings of this assessment, it is our opinion that **a Phase II – Environmental Site Assessment will be required for the Phase I Property.**

The preliminary scope of work proposed for the Phase II ESA consists of the placement of three boreholes across the Phase I Property, all of which will be instrumented with groundwater monitoring wells. The boreholes will be strategically placed for coverage of all identified APECs on the Phase I Property, though the final locations have not yet been established. Proposed analytical testing for both soil and groundwater samples will include petroleum hydrocarbons, benzene, toluene, ethylbenzene, xylenes, metals, polycyclic aromatic hydrocarbons, electrical conductivity, and sodium adsorption ratio.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I – Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (reaffirmed 2022). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I ESA are based on a review of readily available geological, historical, and regulatory information as well as a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the Phase I Property and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of IBI Group and the Government of Canada. Permission and notification from the above noted parties and Paterson Group will be required prior to the release of this report to any other party.

Dear Nick Sullivan:

**RE: MECP FOI A-2022-05347, Your Reference #: PE5791 – Decision Letter**

This letter is further to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 101 Goldenrod Driveway, Ottawa.

After a thorough search through the files of the ministry's Ottawa District Office, Environmental Assessment and Permissions Division (EAPD), Environmental Monitoring and Reporting Branch (EMRB), Environmental Investigations and Enforcement Branch (EIEB) and Safe Drinking Water Branch (SDW), records were located in response to your request. The final decision has been made to provide full access to the requested information and a copy of the record is attached.

You may request a review of my decision within 30 days from the date of this letter by contacting the Information and Privacy Commissioner/Ontario at <http://www.ipc.on.ca>. Please note there may be a fee associated with submitting the appeal.

If you have any questions, please contact Amina Shah at 437-339-1251 or [amina.shah@ontario.ca](mailto:amina.shah@ontario.ca).

Yours truly,

A handwritten signature in black ink that reads "A. Shah".

## Site(s)

### Site Details

Brookfield GIS<UNOFFICIAL>  
Address: Lot: , Part: , 101 Goldenrod Driveway, Ottawa, City,  
District Office: Ottawa

### Incident Summary:

Brookfield GIS: 3L diesel to asphalt, cleaned

### Initial Incident Description (as reported):

Created: Julian Aristizabal (Spills Action Centre) - 2016/09/24 10:18:42 AM

Caller reports that at 06:30 a transport truck (unknown) was on site and had a leak of about 3L of diesel to the asphalt from the tank. No waterways impacted. Spill was found and fully cleaned up within the hour of occurrence.

Copy emailed to EPS as it is a federal facility

### SAC Action Class:

Land Spills

### Non-Standard Procedure:

No

### Incident Description:

Last update: Kyle Straberger (Ottawa District Office) - 2016/09/26 11:34 AM

September 26, 2016 - EO Straberger

Report of approx. 3L of diesel from a tank was reported to the ministry's Spills Action Centre. Spill was reported to not have impacted any waterways and cleaned.

No further MOECC action required at this time. Recommend File Closed.

### Incident Description Continuation:

### Incident Update:

### Was there an MOE field response?

No

### Were there samples collected / analyzed at any time?

No

### Known or Suspected Health / Environmental Consequence at the Time of Incident

### Health / Environmental Consequence:

0 - No Impact

### Has a Water Body been impacted?

No

### Receiving Environment:

Land

### Incident Summary:

DND 5 L of diesel to grnd

### Initial Incident Description (as reported):

Created: Julianne Dominski (Spills Action Centre) - 2018/09/23 09:21:23 AM

Caller to SAC(jd) reports a spill of approx 5 L of diesel fuel to the asphalt. They were able to contain it with absorbent and kitty litter. The spill was from a fuel truck to a rental generator. The spill occurred at the connection point (caller would consider it on the generator side). The spill has been stopped. There was a defective fuel gauge. Clean up has been completed.

Emailed report to TSSA and EC

### SAC Action Class:

Land Spills

### Non-Standard Procedure:

No

### Incident Description:

Last update: Thandeka Ponalo (Ottawa District Office) - 2018/09/25 09:08 AM

SPA Rideau Valley

IPZ 2, score is 8.1

HVA Yes, score is 6

Spill of 5 L to Federal property. Spill cleaned up. Recommend no further action. Recommend IR be closed.

Dear Nick Sullivan:

**RE: MECP FOI A-2022-05349, Your Reference #: PE5791 – Decision Letter**

This letter is further to your request made pursuant to the Freedom of Information and Protection of Privacy Act (the Act) relating to 251 Sir Frederick Banting Driveway, Ottawa.

After a thorough search through the files of the ministry's Ottawa District Office, Environmental Assessment and Permissions Division, Environmental Monitoring and Reporting Branch, Sector Enforcement Branch (formerly Environmental Investigations and Enforcement Branch and Sector Compliance Branch) and Safe Drinking Water Branch, records were located in response to your request. The final decision has been made to provide partial access to the requested information and a copy of the releasable portion of the record is attached.

Records or information that are not relevant to the request (e.g., records that are blank, outside of the date range or do not relate directly to the subject matter) have been removed and marked "Not Responsive" or 'N/R'.

To provide you with this response and in accordance with Section 57 of the Act, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment.**

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions, please contact Sylwia Rynkiewicz at 437-995-1618 or [sylwia.rynkiewicz@ontario.ca](mailto:sylwia.rynkiewicz@ontario.ca).

Yours truly,

A handwritten signature in black ink, appearing to read 'Sylwia', written in a cursive style.

for

Ryan Gunn  
Manager (A), Access and Privacy Office

GeoReference: Map Datum: , Zone: 18, Method: , UTM Easting: 442342, UTM Northing: 5028619, UTM  
Location Description: ,

### Incident Summary:

Brooke Claxton Building: 1-2 L motor oil on pavement

### Initial Incident Description (as reported):

Created: Akiko Date (Spills Action Centre) - 2016/08/06 12:15:17 PM

Caller reports that a contractor, Gal Power, was doing annual maintenance on the generator for the building. They were at the north entrance of the Brooke Claxton building and had a pail of motor oil (Kendal; Super-D XA) in the truck bed, when it tipped and spilled. About 1-2 L of it dripped off the truck and on to the pavement lot. They used absorbent to contain and collect it. Gal Power will remove the absorbent and do some more sanding/sweeping to clean the pavement. No offsite impact.

Caller notes that it is a federal building. Copy sent to EPS

SPIMT: IPZ2 = 8.1

### SAC Action Class:

Land Spills

### Non-Standard Procedure:

No

### Incident Description:

Last update: Angela Cappello (Ottawa District Office) - 2016/09/06 09:52 AM

#### Location Information

**Site Details**

Office Building - Loading Dock <UNOFFICIAL>  
Address: Lot: , Part: , 70 Colombine Driveway, Ottawa, City, K1A 0K9  
District Office: Ottawa

**Incident Summary:**

Brookefield: 1 L hydraulic fluid to concrete, cntd & clng

**Initial Incident Description (as reported):**

Created: Fatima Jabeen (Spills Action Centre) - 2016/04/14 01:59:14 PM

Caller (Brad Wilson, Brookefield) reporting -

A dock leveller had a hydraulic fluid line break open. It spilled out about a litre of hydraulic oil to the concrete surface. The spill was just underneath the leveller. The manufacturer details of the fluid are unknown. The spill has been contained with absorbent pads. The spill is not migrating and there are no impacts (and also no potential for impacts in case of precipitation), to any cbs on-site.

The work order for clean-up has been initiated with the other tenant on-site, for a private contractor to respond to the clean-up.

SAC to be updated when clean-up is complete.

14:22 SAC (fj) to MOECC, Ottawa: Brad Eckert, Do briefed on incident details.

18:51 SAC (jc2) to Brookfield (Brad). Left voicemail regarding cleanup update status and for a callback.

**SAC Action Class:**

Land Spills

**Non-Standard Procedure:**

No

**Incident Description:**

Last update: Jena Leavoy (Ottawa District Office) - 2019/02/05 02:39 PM

**SPIMT Result:****Location Information**

Assessment Roll Number: 06140736013050100000  
MPAC Street Address: 251 SIR FREDERICK BANTING DR, CITY OF OTTAWA

**Source Water Protection Details for Location**

Source Protection Area: Rideau Valley  
Intake Protection Zone: 2; score is 8.1  
Surface Water policies (external link to policy database)  
Wellhead Protection Area: No  
WHPA E (GUDI): No  
Issue Contributing Area: No  
Significant Groundwater Recharge Area: No  
Highly Vulnerable Aquifer: Yes; score is 6  
Event Based Area: No

To see if any land activities are restricted, check the policies in the source protection plan (link to external website).  
Information is current as of: 2016-02-08

JL - spill cleaned up. NFA required. Recommend IR be closed.

**Incident Description Continuation:**

**Incident Update:**

Chris Mutton (Spills Action Centre) - 2016/04/15 created; 2016/04/15 last update :

08:50 Brad Wilson to SAC(cm2): giving an update about the clean up. DrainAll will be on site in a couple of hours (~10:00-11:00) for clean up. They first must implement all the safety procedures in raising, shutting off, and locking the hydraulic apparatus, as the spill has gone underneath.

DrainAll will inform us when the spill has been cleaned.

Neil Brown

613-739-1070 (Office)

Kimberley McElcheran (Spills Action Centre) - 2016/04/15 created; 2016/04/15 last update :

16:45 - Brad (original caller) to SACKm - Brad updating SAC that the clean-up is complete. Caller stated that Drain-All collected 15 kg of solid non-hazardous material into a drum, and took it off-site.

Caller stated he will update the Ottawa DO as well.

**Sent:** June 29, 2022 4:17 PM  
**To:** Nick Sullivan  
**Subject:** RE: Records Search Request (PE5791)

**Please refrain from sending documents to head office. The Public Information (PI) team works remotely, mailing in applications will lengthen the overall processing time.**

### **NO RECORD FOUND IN CURRENT DATABASE**

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

- We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

This is not a confirmation that there are no records in the archives. For a further search in our archives, please submit an application for release of public information (PI Form) through TSSA's new Service Prepayment Portal. The associated fee must be paid via credit card (Visa or MasterCard) through a secure site.

Please follow the steps below to access the new application(s) and Service Prepayment Portal:

1. Click Release of Public Information - TSSA and click "need a copy of a document";
2. Select the appropriate application, download it and complete it in full; and
3. Proceed to page 3 of the application and click the link TSSA Service Prepayment Portal under payment options (the link will take you the secure site to pay for the release via credit card).

Accessing the Service Prepayment Portal:

1. Select new or existing customer (\*if you are an existing customer, you will need your account # & postal code to access your account);
2. Select the program area: AD (Amusement Devices), BPV (Boilers and Pressure Vessels), ED (Elevating Devices), FS (Fuels Services), OE (Operating Engineers) or SKI (Ski Lifts) and click continue;
3. Enter the application form number (obtained from bottom left corner of application form) and click continue; When selecting the application form number from the drop-down menu, please make sure you select the application that begins with "PI" (i.e. PI-FS, PI-BPV etc.);
4. Complete the primary contact information section;
5. Complete the fees section;
6. Upload your completed application; and
7. Upload supporting documents (if required) and click continue.

Once all steps have been successfully completed, you will receive your receipt via email.

Questions? Please contact TSSA's Public Information Release team at [publicinformationservices@tssa.org](mailto:publicinformationservices@tssa.org).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind Regards,  
Sherees

**Subject:** Records Search Request (PE5791)

**[CAUTION]:** This email originated outside the organisation.

Please do not click links or open attachments unless you recognise the source of this email and know the content is safe.

Good day,

Could you please complete a search of your records for **underground/aboveground storage tanks, historical spills, or other incidents/infractions** for the following addresses in Ottawa, Ontario:

Parkdale Avenue: 120.

Goldenrod Driveway: 101, 203.

Sir Frederick Banting Driveway: 251.

Scott Street: 1530, 1546, 1560, 1565;

Sir John A. MacDonald Parkway: 351.

Thank you,

Nick Sullivan, B.Sc.

Dear Nick,

**Re: Information Request**

101 & 203 Golden Driveway, 120 Parkdale Ave & 251 Sir Frederick Banting  
Driveway **Ottawa, Ontario ("Subject Property")**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environmental Remediation Unit:** The City's Environmental Remediation Unit has environmental records on file pertaining to the subject property noted above either directly on or adjacent to the subject property. To submit requests for information under the Municipal Freedom of Information and Protection of Privacy Act, please visit <https://ottawa.ca/en/city-hall/open-transparent-andaccountable-government/access-information-and-protection-privacy/accessinformation>
  - **Comment:** The Environmental Remediation Unit (ERU) has historical drawings showing the location of underground fuel storage tanks identified at this property in the Historical Land Use Inventory (HLUI). The drawings were submitted as part of permit applications for the City of Ottawa Flammable Liquids Storage Bylaw. Please contact [ERU-UAE@ottawa.ca](mailto:ERU-UAE@ottawa.ca) to obtain a copy of the drawings
- **Ottawa Public Health - Environmental Health:** all public inspection results are publicly available on the Ottawa Public Health website: <https://www.ottawapublichealth.ca/en/public-health-services/public-health-inspections.aspx>
- **Sewer Use Program:** The City's Sewer Use Program has found the following information pertaining to the subject property: Violations of environmental statutes, regulations or bylaws, other environmental records.

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('ADDRESS – HLUI Summary report.xlsx'), please refer to the [Overview and User Guide](#)."

**Additional information may be obtained by contacting:**

**Ontario's Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

**The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Ottawa Public Health**

Ottawa Public Health inspects many different types of establishments. To view inspection results, please visit the Ottawa Public Health website: [Public Health Inspections - Ottawa Public Health](#)

Please note that Ottawa Public Health is not the lead agency on land use contamination in the City of Ottawa – contact the Ministry of Environment Conservation and Parks (MECP) for further information.

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

**Adwoa Achireko**

## Environmental Risk Management Area (ERMA)

Site ID: 1

### 3 HAMILTON AVENUE N – HONEYWELL SITE

---

Outlined in bright purple on HLUI Map

There is known groundwater contamination in this area associated with a former Honeywell manufacturing facility located at 3 Hamilton Avenue N. Concentrations of volatile organic compounds (VOCs) have been found in groundwater at various on- and off-Site locations which exceed the provincial standards. Special consideration should be given for projects involving management of groundwater (i.e. contact w/ groundwater, pumping and/or dewatering).

For more information please contact the City's Environmental Remediation Unit (ERU) at [ERU-UAE@ottawa.ca](mailto:ERU-UAE@ottawa.ca)

#### Substance Release Report

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels  
**Grouping:** Total Air  
**Trans Code:** ASta  
**Chem:** PM10 - Particulate Matter <= 10 Microns  
**Chem (fr):** PM10 - Matière particulaire <= 10 microns  
**Quantity:** 2.043  
**Unit:** tonnes  
**Basis of Estimate Cd:** E2  
**Basis of Estimate Desc:** E2- Published Emission Factors - In use from 2003 and onward

**Category Type ID:** 1  
**Category Type Desc:** Stack / Point  
**Category Type Desc (fr):** Rejets de cheminée ou ponctuels  
**Grouping:** Total Air  
**Trans Code:** ASta  
**Chem:** PM2.5 - Particulate Matter <= 2.5 Microns  
**Chem (fr):** PM2,5 - Matière particulaire <= 2,5 microns  
**Quantity:** 1.017  
**Unit:** tonnes  
**Basis of Estimate Cd:** E2  
**Basis of Estimate Desc:** E2- Published Emission Factors - In use from 2003 and onward

## Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.*

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Nov 2021**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Apr 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Mar 2022**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - May 31, 2022**

**Drill Hole Database:**

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022**

**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

**Government Publication Date: Oct 2011- Apr 30, 2022**

**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - May 31, 2022**

**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Apr 30, 2022**

**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Mar 31, 2022**

**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2021**

**List of Expired Fuels Safety Facilities:**

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Apr 2022**

**Fisheries & Oceans Fuel Tanks:**

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Feb 28, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO<sub>2</sub> eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2022**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2020**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\*****National PCB Inventory:**

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\*****National Pollutant Release Inventory:**

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017****Oil and Gas Wells:**

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-May 31, 2022****Ontario Oil and Gas Wells:**

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021****Inventory of PCB Storage Sites:**

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013****Orders:**

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - May 31, 2022****Canadian Pulp and Paper:**

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014****Parks Canada Fuel Storage Tanks:**

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date:** Oct 2011- Apr 30, 2022

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date:** Feb 28, 2021

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date:** 1989-1996\*

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date:** 1994 - May 31, 2022

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date:** 1986-1990, 1992-2019

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date:** 1997-Sept 2001, Oct 2004-May 2022

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date:** 1999-Sep 30, 2021

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date:** 1992-Mar 2011\*

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date:** 1988-Sep 2020; Dec 2020-Mar 2021

**Wastewater Discharger Registration Database:**

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Apr 30, 2022**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Sep 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

# **APPENDIX 3**

## **QUALIFICATIONS OF ASSESSORS**

# PATERSON GROUP

solution oriented engineering

## Nick Sullivan, B.Sc. Junior Environmental Technical Specialist

Nick joined Paterson Group in September 2018 as part of the Environmental Department. Nick received his Honours Bachelor of Science Degree from McMaster University in 2016, specializing in Earth & Environmental Science. Following graduation, Nick received a post-graduate certificate from Niagara College in 2017, specializing in Environmental Management & Assessment. Since joining Paterson Group in 2018, Nick has worked on numerous residential and commercial development projects, predominantly within the National Capital Region as well as various locations within Southeastern Ontario. His scope of work consists of conducting phase I & II environmental site assessments, field inspections, contaminated soil and groundwater field sampling, supervising the remediation of contaminated sites, as well as performing designated substance surveys and radon gas assessments.

### EDUCATION

Honours Bachelor of Science in Earth & Environmental Science, 2016  
McMaster University  
Hamilton, ON

Post-Graduate Certificate in Environmental Management & Assessment, 2017  
Niagara College  
Niagara-on-the-Lake, ON

### YEARS OF EXPERIENCE

With Paterson: 4

### OFFICE LOCATION

9 Auriga Drive, Ottawa, Ontario, K2E 7T9

### SELECT LIST OF PROJECTS

- Caivan Communities: The Ridge, Ottawa, ON (Site Remediation Coordinator & Supervisor).
- Residential High-Rise Development: 851 Richmond Road, Ottawa, ON (Site Remediation Coordinator & Supervisor)
- National Capital Business Park: 4055 & 4120 Russell Road, Ottawa, ON (Phase I & II Environmental Site Assessment)
- Residential High-Rise Development: 125 Hickory Street, Ottawa, ON (Phase I & II Environmental Site Assessment)
- Low-Rise Residential Development: 101 Pinhey Street, Ottawa, ON (Site Remediation Coordinator & Supervisor)
- High-Rise Residential Development: 2070 Scott Street, Ottawa, ON (Phase I & II Environmental Site Assessment)
- Mixed-Use Development: 875 Montreal Road, Ottawa, ON (Phase I & II Environmental Site Assessment)
- Kanata West Business Park, Ottawa, ON (Phase I Environmental Site Assessment)

---

## PROFESSIONAL EXPERIENCE

September 2018 to present, **Junior Environmental Technical Specialist, Paterson Group, Ottawa, Ontario**

- Conducting Phase I and Phase II Environmental Site Assessments in accordance with CSA standards and O.Reg. 153/04.
- Responsible for the application of environmental, hydrogeological, and/or geotechnical principles and practices in the identification and delineation of soil and groundwater contamination plumes while ensuring compliance with federal, provincial, and/or municipal legal and regulatory requirements.
- Presenting analytical test results, interpretations, assessments, recommendations and/or conclusions in a final technical report.
- Field experience in the supervision of drilling and excavation contractors, inspection of aboveground and underground fuel storage tanks, soil and rock classification, soil and groundwater field sampling, as well as the collection of hazardous building materials and designated substances.
- Certified as a C-NRPP Radon Measurement Professional, with experience conducting interior radon gas assessments of residential buildings.
- Coordination and on-site supervision of soil and groundwater remediation activities for contaminated sites.
- Liaising with clients, contractors, consultants, and government officials.
- Coordination of contractors and field staff while directly reporting to senior management and client to ensure completion of project on schedule and within budget.

## Adrian Menyhart P.Eng, ing., QP<sub>esa</sub>

Adrian received his Bachelor of Engineering from Carleton University in 2011, with a specialization in environmental engineering, and joined Paterson Group shortly after graduation. Over the next seven years, Adrian gained significant experience in all aspects of environmental engineering beginning with field work and later, with reporting and project management. In 2018, Adrian joined the National Research Council as an environmental officer, working in the field of polyfluoroalkyl substances (PFAS) at the National Fire Laboratory. Following the National Research Council, Adrian returned to consulting at WSP Canada Inc. At WSP, Adrian assisted the Ottawa environmental group as a project manager, managing large and small federal environmental projects such as the investigations for the proposed Alexandra interprovincial bridge. Finally, after two years away, Adrian returned to Paterson Group as a senior project manager within the environmental department.

Over the course of his career, Adrian has become well versed with environmental site assessments and remediation programs, in both Ontario and Quebec, designated substance surveys, mould assessments and indoor air quality assessments. Adrian has filed multiple Records of Site Condition with the Ontario Ministry of the Environment, Conservation and Parks. Fluently bilingual, Adrian holds engineering licenses in both Ontario and Quebec, as well as being a Qualified Person in the Province of Ontario.

### EDUCATION

B.Eng. 2011, Environmental Engineering, Carleton University, Ottawa, ON

### LICENCE/ PROFESSIONAL AFFILIATIONS

Ordre des Ingénieurs du Québec  
Professional Engineers of Ontario  
Ottawa Geotechnical Group

### YEARS OF EXPERIENCE 10 years

WSP Canada Inc.  
2019-2020

National Research Council  
2018-2019

Paterson Group  
2011 – 2018

### OFFICE LOCATION

Paterson's Ottawa Office

### SELECT LIST OF PROJECTS

- Alexandra Bridge Replacement, Phase II ESA, Ottawa/Gatineau – provided oversight of the Phase I and Phase II program for the bridge replacement program.
- National Fire Laboratory, PFAS investigation – Provided technical support for the National Research Council, with respect to the ongoing PFAS investigation.
- Ottawa Arts Gallery Expansion, Ottawa, ON (remediation supervisor) – Provided guidance in the segregation of soils on the site, managing contaminated and clean materials, providing daily correspondence with the client. Successfully filed a Record of Site Condition for the property.
- Ottawa Heart Institute Construction, Ottawa, ON (project manager) – Conducted air sampling for parameters such as particulate matter, lead, mould and asbestos
- Conducted and managed numerous designated substance surveys and asbestos surveys throughout Ontario and Quebec, for private and federal clients, collecting representative samples of potential asbestos containing materials and preparing comprehensive reports.
- Conducted and managed numerous air sampling programs, collecting samples for environmental parameters such as asbestos, lead and mould, and preparing reports.
- Conducted and managed Phase I and II Environmental Site Assessments across Ontario and Quebec

**PROFESSIONAL EXPERIENCE**

November 2020 to Present, **Environmental Engineer, Paterson Group Inc.**, Ottawa, Ontario

- Coordination, preparation and management of Phase I and Phase II Environmental Site Assessment.
- Coordination, preparation and managed Designated Substance Surveys and indoor air quality assessments.
- Preparation of soil and groundwater remediation plans.
- Filing records of site condition with the Ontario Ministry of the Environment, Conservation and Parks.
- Implementation of Excess Soil Regulations, Ontario.

March 2019 to 2020, **Environmental Engineer, WSP Canada Inc.**, Ottawa, Ontario

- Coordinated, prepared Phase I and Phase II Environmental Site Assessments for Federal and private clients.
- Coordinated, prepared and managed Designated Substance Surveys for various Federal and private clients, in both English and French.
- Managed all projects from preparation of proposals, to final invoicing.

September 2018 to 2019, **Environmental Officer, National Research Council**, Ottawa, Ontario

- Oversaw on-going PFAS investigation program at the National Fire Laboratory in Almonte, Ontario, being carried out by NRC consultants.
- Reviewed and commented on deliverables prepared by consultants, while coordinating with internal legal, communications, and presidential departments within the NRC.
- Corresponded with area residents surrounding the Laboratory.
- Coordinated potable water supply program.

September 2011 to 2018, **Environmental Engineer, Paterson Group Inc.**, Ottawa, Ontario

- Prepare, revise and submit all documentation and reports for the successful filing of Records of Site Condition with the Ministry of the Environment and Climate Change
- Provide on-site environmental expertise for remediation projects including Ottawa Arts Gallery, Rideau Centre Expansion and Tall Ships Landing, among various small scale remediation project within the greater Ottawa area.
- Coordinate field programs and prepare reports for Phase I and II projects across Ontario and Quebec.
- Oversee environmental investigations for drilling and test pitting on numerous proposed utility installations, residential and commercial developments.
- Conduct designated substance surveys in Ontario and Quebec.
- Coordinate air sampling programs for various environmental parameters, comparing results with regulatory standards and other guidelines.
- Problem solving to help advance or maintain project schedules.
- Complete environmental reports with recommendations for environmental concerns.
- Liaising with contractors, consultants and government officials.
- Provide cost estimates for environment field programs and construction costs.

June to September from 2009 to 2011, **Inspector, Canadian Food Inspection Agency**, Ottawa, Ontario

- Conducted the trapping program for the Emerald Ash Borer across Eastern Ontario.
- Assisted in the preparation and training of other inspectors for the trapping program.
- Conducted inspections for restricted wood products at various campgrounds.
- Assisted other inspectors in inspecting shipments of wood products from other countries, in certain cases, seizing and disposing of items.
- Compiling data and preparing reports.
