

Part 5 - Overlay Provisions

Section 501 - Flood Plain Overlay

Amendments are proposed to implement revised flood plain mapping received from the Conservation Authorities. These changes are part of an ongoing multi-year program of updates to the flood plain mapping to ensure it is accurate. The current and proposed boundaries of the flood plain overlay are available for comparison on the draft Zoning Map. Draft 1 of the Zoning Map included the majority of proposed updates to the flood plain mapping. In Draft 2 of the Zoning Map, the flood plain mapping was revised in the following areas: Bear Brook (small area south east of Canaan Road and Russell Road intersection), Carp River between Fitzroy Harbour and Kanata, Main Castor River east of Russell, South Castor River at the southeast corner of City boundary between Gregoire Road and 9th Line Road (Lough Drain), Ottawa River (small area around Marshal Bay Lane). In Draft 1 of the Zoning Map, the flood plain mapping was revised in the following areas: Bear Brook, Bilberry, Carp River, Cody Creek, Constance Bay tributary 3, Feedmill Creek, Findlay Creek, Flowing Creek, Harwood Creek, Jock River, KIng's Creek, Kizell Drain Watt's Creek, Main Castor River, McKinnons Creek, Mississppi River, Mosquito Creek, Mud Creek, Nichols Creek, North Castor River, Rideau River, Savage Drain, Shaws Creek, Shirleys Book, Smith Drain, South Castor River, South Indian River, Van Gaal Drain, Watt's Creek.

Section 502 - Mineral Aggregate Separation Overlay

The depth of the Mineral Aggregate Separation Overlays was modified in Draft 2 to implement policies for Mineral Aggregates in Section 5.6.3.1 of the Official Plan. The buffer around Sand and Gravel Resource Areas was increased from 150 metres to 300 metres and the depth of the buffer around Bedrock Resource Areas was increased from 210 metres to 500 metres.

Section 503 - Airport Influence Area Overlay

The overlay has been modified to be the same as the extent of the Airport Zoning Regulations shown on Official Plan Schedule C14
