

Phase One Environmental Site Assessment

811 Gladstone Avenue
Ottawa, Ontario

Ottawa Community Housing Corporation

GHD | 179 Colonnade Road Unit 400 Ottawa, Ontario K2E 7J4 Canada
11140575 | E1 | Report No 2 | August 25, 2017

Executive Summary

GHD (Consultant) was retained by Ottawa Community Housing Corporation (OCHC or Client) represented by Mr. Barron Meyerhoffer, to complete a Phase One Environmental Site Assessment (Phase One ESA) in general accordance with the O. Reg. 153/04 Phase One ESA format for the institutional property located at 811 Gladstone Avenue in Ottawa, Ontario (Site or Phase One Property).

The Phase One ESA is being conducted for environmental due diligence as part of the local municipal planning department requirement associated with redevelopment of the Site. The intended future use of the Site is the construction of a six-storey residential building with associated parking areas and access roads. The Phase One Property is currently used for residential purposes and therefore will not require a Record of Site Condition (RSC), required for a change in land use to more sensitive land uses.

According to the historical research, the earliest developed use of the site is estimated to be 1889 based on ownership details from the land title search, and listings from the City directories. The Site was occupied for residential and institutional purposes until the 1960s when the Site was redeveloped with the three present day residential building complex. The immediate neighbouring properties were developed since at least the 1920s for residential, institutional and commercial land uses.

Based on the historical research and known information of the general area of the Site, there was one on-Site potentially contaminating activity (PCA); the suspected historical placement of fill material during redevelopment of the Site with the present day residential buildings. This PCA is considered to represent an area of potential environmental concern (APEC) for the Site (central portion of the Site).

Twenty-five PCAs were identified on neighbouring properties in the Phase One Study Area as part of this assessment. Of the identified off-Site PCAs, four are considered to represent APECs for the subject Site. The two automotive garages located at 414 and 388 Booth Street, a former paving company located at 394 Booth Street, and a former dry cleaners located at 263 Rochester are considered to represent APECs for the Site.

Following the completion of the Phase One ESA for the subject Property, it is our opinion that a Phase Two Environmental Site Assessment is required for the Site.

1. Introduction

GHD (Consultant) was retained by Ottawa Community Housing Corporation (OCHC or Client), represented by Mr. Barron Meyerhoffer, to complete a Phase One Environmental Site Assessment (Phase One ESA) in general accordance with the O. Reg. 153/04 Phase One ESA format for the residential property located at 811 Gladstone Avenue in Ottawa, Ontario (Site or Phase One Property).

The Property is located at Civic No. 811 Gladstone Avenue in Ottawa, Ontario (Site or Property) and is approximately 4725 m² (0.47 hectares) in area. The Site has Latitude and Longitude coordinates of 45° 24' 21" N, 75° 42' 34" W and UTM coordinates of zone 18T, 444481 m E, 5028279 m N). The Site has a municipal zoning designation of R4A "Residential Fourth Density Zone" for the north portion of the property and TM "Traditional Main Street Zone" for the south portion of the Site.

The Site is legally described as Lots 263 to 265, 271, 272 and Part of Lots 262, 266, 267, 270 and 273, on the North Side of Gladstone Avenue on registered plan 16, in the City of Ottawa in the Province of Ontario. The property identification numbers associated with the Site are 041080285 and 041080289.

The subject Property has been owned and/or operated as residential, commercial and institutional purposes since at least 1889 and was most recently observed to be used for residential purposes.

The area is serviced by municipal water and sewer services and is considered to be in a non-potable area. Electrical and natural gas services are available from private utility companies.

The Site is currently owned by Ottawa Community Housing. GHD understands that the Client will be demolishing the existing buildings at the Site and constructing a six-storey residential building with no basement associated surface and parking areas and access roads. The Client is represented by Mr. Barron Meyerhoffer. Ottawa Community Housing Corporation (OCHC) has a corporate address of 39 Auriga Drive, Ottawa, Ontario, K2E 7Y8.

2. Scope of Investigation

The scope of the investigation was detailed in the proposal dated June 23, 2017 (Ref: 11103730Meyerhoffer-10). The project was approved by Mr. Barron Meyerhoffer. The Phase One ESA is being conducted for environmental due diligence as part of the local municipal planning department requirement associated with redevelopment of the Site.

This Phase One ESA was conducted following the guidelines set out in Ontario Regulation 153/04, as amended 2011 (O. Reg. 153/04), Records of Site Condition, Part XV.1 of the Environmental Protection Act.

The general objectives of this Phase One ESA were:

- To develop a preliminary determination of the likelihood that one or more contaminants have affected any land or water on, in or under the Phase One study area.
- To determine the need for a Phase Two Environmental Site Assessment.
- To provide a basis for carrying out any Phase Two Environmental Site Assessment.

This Phase One ESA included the following components:

- Historical records review
- Interviews
- Site reconnaissance
- An evaluation of the information gathered from the records review, interviews and site reconnaissance.

3. Records Review

3.1 General

3.1.1 Phase One Study Area Determination

The Site is located within an urban area, which is predominantly residential use, with some commercial and institutional uses. The Site is located within the West Centertown borough of the City of Ottawa, Ontario. The Site is immediately surrounded by residential properties to the north, south and west and by an institutional property to the east. The historical records and use as well as present operations of properties located within 250 m of the subject land were considered from an environmental perspective for the purposes of this report. Based upon our review of the records and data collected during this mandate, properties located outside of the Phase One Study Area (250 m radius from property boundaries) were not considered to have the potential to have impacted the subject land. A plan of survey, showing the boundaries of the Phase One Property, is included in Appendix A.

3.1.2 First Developed Use Determination

A land title search indicated that the Site was owned between individuals from at least 1855 to 1918 and individuals or institutions from 1918 to 1964 and the current property ownership from 1964 to present. Ottawa Community Housing were identified as an owner of the land in 2007.

Based on the information reviewed at the time of this Phase One ESA, the first development on the Site is considered to have occurred in 1889 and was for residential use.

3.1.3 Fire Insurance Plans

Fire insurance plans (FIP) assist in the identification of historical land use and commonly indicate building layouts, detached structures, Site improvements, facility operations, names of tenants, the

existence and location of boiler rooms, aboveground and underground storage tanks and adjoining property uses.

Volume 4, Sheets 118, 119-1, 128-1, and 128-3, of the July 1956 City of Ottawa FIPs cover the Site and the immediately adjacent properties and were reviewed as part of this assessment. The Site was developed for residential and institutional purposes. On-Site development is a residential complex that includes five dwellings fronting on Gladstone Avenue, four dwellings fronting on Balsam Street and four dwellings and a church fronting on Rochester Street. There are also various private garages near the central portion of the Site. The immediately adjacent properties have been developed for residential and/or commercial purposes.

Three properties with potentially contaminating activities (PCAs) were identified in the review of the FIPs; these PCAs are summarized as follows:

- 414 Booth Street, immediately adjacent to the east of the Site, was identified as a former automotive garage and service station with the associated underground storage tanks.
- 388 Booth Street, approximately 40 m northeast of the Site, was identified as a former automotive service garage.
- 225 Preston Street, approximately 140 m west of the Site, was identified as a former automotive service garage and gasoline service station with two associated underground storage tanks.

The aforementioned PCAs are summarized in Section 7.2.2 of this report. Given their locations and orientations with respect to the Site, two of these historical operations (automotive service garages at 414 and 388 Booth Street) were considered to represent areas of potential environmental concern (APECs) for the Site, and are summarized in Section 7.3 of this report.

3.1.4 Chain of Title

A request for an environmental chain of title search was submitted to Read Abstract Limited on behalf of GHD. The Chain of title indicated that the Phase One Property is legally described as Lots 265, 263, 264, 271, 272 and Part of Lots 262, 266, 270, and 273 on Plan 16 in the City of Ottawa. The results of the Title search and deviations in ownership of the Site are summarized in Table 4.1 below. A complete summary of the results of the search are included in Appendix B.

Table 4.1 Summary of Chain of Title

Lot	Year	Property Ownership
Portions and Site Under Separate Ownership		
Part Lot 262	1889 to 1910	Private Individual Ownership
Lot 264	1910 to 1918	Bank of Ottawa
	1918 to 1964	Ruthenian Greek Catholic Episcopal Corp of Canada
	1964	City of Ottawa
Lot 263	1896 to 1910	Private Individual Ownership
	1910 to 1918	Bank of Ottawa
	1918 to 1922	Ruthenian Greek Catholic Episcopal Corp of Canada
	1922 to 1960	Private Individual Ownership

Table 4.1 Summary of Chain of Title

Lot	Year	Property Ownership
	1964	City of Ottawa
Lot 265	1891 to 1964	Private Individual Ownership
Part Lot 266	1964	City of Ottawa
Lot 270	1892 to 1964	Private Individual Ownership
	1964	City of Ottawa
Lot 271	1890 to 1965	Private Individual Ownership
	1965	City of Ottawa
Lot 272	1912 to 1922	Private Individual Ownership
	1922	Ruthenian Greek Catholic Episcopal Corp of Canada
	1922 to 1951	Private Individual Ownership
	1951 to 1952	United Pentecostal Church
	1952 to 1964	Private Individual Ownership
	1964	City of Ottawa
Part Lot 273	1889 to 1964	Private Individual Ownership
	1964	City of Ottawa
Entire Site		
	1968 to 2006	Canada Mortgage and Housing Corporation
	2006 to 2007	Ontario Housing Corporation
	2007 to present	Ottawa Community Housing

The Phase One Property changed ownership between individuals from at least 1889 to between 1910 and 1964 depending on Lot, and Corporations to present. The current registered owner of the Site is Ottawa Community Housing. There was no evidence suggesting potentially contaminating activities or areas of potential environmental concern with the subject Site identified through the review of the title of Site ownership.

3.1.5 Environmental Reports

No previous environmental studies for the Property were reported to have been undertaken. No previous reports were identified or provided to GHD by the Client.

3.2 Environmental Source Information

The following environmental source information was reviewed as part of this assessment.

National Pollutant Release Inventory (Online), Environment Canada

The database titled National Pollutant Release Inventory (NPRI) provides the results and data with respect to releases of pollutants into the natural environment as a result of industrial processes. Data is collected and updated online annually. A search of the NPRI was conducted through a subcontracted Ecolog Environmental ERIS search. The Site is not listed in the NPRI for any of the recorded years (1993-2014). No properties within 250 m of the Site are listed in the NPRI. A copy of the Ecolog ERIS Database Summary is included in Appendix C.

National PCB Inventory

The National Inventory of PCB Storage Sites, January 1993 contains information on PCB Storage Sites in the Province of Ontario, which is collected under Ontario Regulation 362/90 by the district and regional offices of the MOECC. The document is an inventory of known private and provincially-operated PCB storage sites as of January 1993. The document does not include Federal PCB storage sites, which are under Environment Canada jurisdiction. The Site was not listed in the Ontario Inventory of PCB Storage Sites report. No properties within 250 m of the Site were identified in the Ontario Inventory of PCB Storage Sites report. The PCB search was confirmed by the results of the subcontracted Ecolog Environmental ERIS search.

Environmental Approvals, Certificates, and Instruments

Requests were submitted to the Ministry of Environment and Climate Change (MOECC) under the Freedom of Information and Protection of Privacy Act relating to the Site. The requested information included environmental approvals, certificates and instruments maintained by the Ministry for the Site or for properties that may directly influence the environmental condition of the Site. The MOECC responses dated July 25, 2017, to the inquiries indicated that no records were located responsive to the request. A copy of the MOECC FOI response is included in Appendix D. The MOECC FOI search was confirmed by the results of the subcontracted Ecolog Environmental ERIS search.

Inventory of Coal Gasification Plant Waste Sites in Ontario, April 1987

The report titled Inventory of Coal Gasification Plant Waste Sites in Ontario, April 1987 provides an inventory and preliminary assessment of the potential environmental impacts of 41 known manufactured gas plant waste sites in the Province of Ontario as of April 1987. Industrial facilities that utilized coal carbonization for manufacturing of gas, coke, ammonia, and other products were address in this study. The Site was not listed in the Inventory of Coal Gasification Plant Waste Sites. There were no Coal Gasification Plant Waste Sites identified within 2 km of the Site.

Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, November 1988

The report titled Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario, November 1988 provides the results of an inventory and preliminary assessment of potential environmental impacts of 44 known industrial sites in Ontario which produced or used coal tar and related tars, as of November 1988. This report was prepared to continue the inventory and assessment process started by the Inventory of Coal Gasification Plant Waste Sites in Ontario, April 1987. The Site was not listed in the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars. There is a Coal Tar Producer/User approximately 350 m south of the Site at the Dominion of Canada Fuel Testing Laboratories located at 552/562 Booth Street. Given the significant distance from the Site, this property is not considered to represent APECs for the Site.

Ministry Environmental Incident Records

Requests were submitted to the Ministry of Environment and Climate Change (MOECC) under the Freedom of Information and Protection of Privacy Act relating to the Site. The requested information included environmental incidents, orders, offences, spills, discharges of contaminants, or

inspections maintained by the Ministry for the Site or for properties that may directly influence the environmental condition of the Site. The MOECC response dated July 25, 2017, to the inquiries indicated that no records were located responsive to the request. The MOECC FOI search was confirmed by the results of the subcontracted Ecolog Environmental ERIS search.

A search for records of environmental incidents, orders, offences, spills, discharges of contaminants, or inspections maintained by the Ministry of the Environment for the Site or for properties that may directly influence the environmental condition of the Site was also conducted through the subcontracted Ecolog Environmental ERIS search. Five spills were reported for properties within 250 m of the Site, with details summarized below:

- A spill of 113 L of furnace oil was reported at 457 Booth Street in 1996. Environmental impact to soil was confirmed.
- A spill of 10 L of liquid waste was reported at the intersection of Gladstone Street and Rochester Street in 2010. The spill, which entered a catch basin, was confirmed to have an environmental impact to surface water.
- A spill of an unknown quantity of furnace oil was reported at 112 Lebreton Street in 2002. Environmental impact to soil was considered possible.
- A spill of 800 L of furnace oil was reported at 20 Willow Street in 1992. The spill was a result of a corroded oil tank. Environmental impact to soil was confirmed.
- A spill of an unknown quantity of hydrocarbon and lead contaminated water was reported at 241 Preston Street in 2006. Environmental impact to groundwater was considered possible.

Several of the aforementioned spills are associated with PCAs, however given their distances from the Site and cross or down-gradient orientations, these spills are not considered to represent APECs for the Site.

Waste Management Records - Ontario Regulation 347 Waste Receivers and Generators

Requests were submitted to the Ministry of Environment and Climate Change (MOECC) under the Freedom of Information and Protection of Privacy Act relating to the Site. The requested information included records of waste generators and receivers under O. Reg. 347 maintained by the Ministry for the Site or for properties that may directly influence the environmental condition of the Site. The MOECC responses dated July 25, 2017, to the inquiries indicated that no records were located responsive to the request.

A search for records of waste generators and receivers under O. Reg. 347 maintained by the Ministry of the Environment was also conducted through the subcontracted Ecolog Environmental ERIS search. The Site is not listed in the Ontario Regulation 347 Waste Receivers and Generators. Nine records of waste generators were identified for nine properties within the Phase One study area in the Ecolog ERIS search. Several of these waste generators are considered to be associated with potentially contaminating activities (PCAs) and are summarized in Section 7.2.2 of this report. Given their locations and orientations with respect to the Site, these waste generators were not considered to represent areas of potential environmental concern (APECs) for the Site.

Environmental Reports Submitted to the MOECC

Requests were submitted to the Ministry of Environment and Climate Change (MOECC) under the Freedom of Information and Protection of Privacy Act relating to the Site. The requested information included environmental reports submitted to the MOECC. The MOECC responses dated July 25, 2017, to the inquiries indicated that no records were located responsive to the request. The MOECC FOI search was confirmed by the results of the subcontracted Ecolog Environmental ERIS search.

Technical Standards and Safety Authority (TSSA) Database

A request was submitted by GHD to the Technical Standards and Safety Authority (TSSA) to search their databases for any records of fuel storage tanks, spills, incidents or, infractions at the Site and immediately adjacent properties. An email response was received from the TSSA on July 26, 2017, indicating that there were no records in their database indicating the presence of storage tanks at the Site or immediately adjacent properties. A copy of the TSSA correspondence is included in Appendix D.

MOECC Notices, Instruments and Records of Site Condition

The Ministry of the Environment (MOECC) Brownfields Environmental Site Registry (ESR) was consulted for historical certificates and instrument compliance records and records of site condition (RSCs). The Site was not listed in the Brownfields ESR. No properties within 250 m were listed in the Brownfields ESR.

One record of site condition identified within the 250 m Phase One study area, at municipal addresses 347-357 Booth Street, approximately 140 m northeast of the Site, was listed in the Brownfields ESR and was confirmed by the Ecolog ERIS search.

Areas of Natural Significance

The Ministry of Natural Resources (MNR) Geographical Information System (GIS) mapping software was consulted by GHD to investigate areas of natural significance in the Phase One Study Area. No areas of natural significance were identified within 250 m of the Site.

MOE Waste Disposal Site Inventory, June 1991

The MOE Waste Disposal Site Inventory June 1991 contains a list, prepared by the MOE, of all known active and closed waste disposal sites in the Province of Ontario as of October 31, 1990. This document is a "working document", subject to continual revisions and updating. The document contains an active site inventory, a closed site inventory, a closed municipal coal gasification plant site inventory, and an inventory of industrial sites producing and using coal tars and related tars in Ontario. There were no active or closed waste disposal sites listed within a 500 m radius of the Site listed in the MOE Waste Disposal Site Inventory, June 1991.

City Directories

City directories list occupant(s) at a site address for a specific year, and infer land use with respect to occupant history. GHD consulted National Archives Canada located in Ottawa, Ontario, for any publicly available historical city directories for intermittent years between 1891 and 2011. The Civic

addresses of the Site are 811 - 829 Gladstone Avenue, 275 - 289 Rochester Street, and 22 - 38 Balsam Street.

According to the information obtained from the reviewed city directories, the Subject addresses were first listed in 1895 for residential and commercial purposes, including a barbershop, liquor store, shoe retailer and a grocery store. Subsequent directories were listed for residential, commercial, and institutional purposes. None of the operations listed in the City Directory for the Subject addresses are considered potentially contaminating activities (PCAs).

The adjacent neighbouring properties were first listed for residential occupancy since at least 1896 and in subsequent directories were listed for residential, commercial or industrial purposes. The following operations, which are considered potentially contaminating activities (PCAs), were identified within 250 m in the City directories:

Table 4.2 Summary of Off-Site PCAs Identified in City Directory Research

Listing	Location	Years Listed	APEC (Y/N)
Chinese Laundry	204 Rochester Street	1916	N
Chinese Laundry	263 Rochester Street	1916	Y
Greg's Valet Service Cleaners	201 Rochester Street	1966	N
Angelo Lorelli Service Centre / Esso (Imperial Oil)	779 Gladstone Avenue	1976 - 2011	N
AutoPro Collision / Benoit Autobody	773 Gladstone Avenue	1990 - 2000	N
Preston Street Garage	241 Preston Street	1995 - 2011	N
Petro Canada Service Station	241 Preston Street	1966 - 1986	N
Esso Home Comfort	215 Preston Street	1976	N
Hall Fuels Ltd.	215 Preston Street	1965	N
Malmberg Auto Services Ltd.	225 Preston Street	1946 - 1966	N
Holliday Auto Centre Ottawa Ltd.	54 Louisa Street	1986 - 2011	N
J McConnell Automotive	66 Lebreton Street	1990	N
Duncan Roy Transport CE	93 Lebreton Street	1946 - 1966	N
Ontario Ministry of Health Ambulance Service Garage	71 Lebreton Street	1970 - 1980	N
MB Auto Body Shop	167 Lebreton Street	1986 - 2011	N
Esso Home Heating Service	174 Lebreton Street	1966	N
Paris Auto Sales	436 Arlington Avenue	1976 - 1986	N
Booth Street Autobody	347 Booth Street	1986 - 2011	N
Department of National Defense Garage	414 Booth Street	1946	Y
Booth Street Service Station	388 Booth Street	1930 - 1960	Y

The aforementioned listings are considered to be associated with Potentially Contaminating Activities (PCAs) and are summarized in Section 7.2.2 of this report. Three of these historical operations are considered to represent areas of potential environmental concern (APECs) for the Site and are summarized in Section 7.3 of this report.

Mapping and Assessment of Former Industrial Sites, City of Ottawa

The report titled Mapping and Assessment of Former Industrial Sites, City of Ottawa, July 1988 provides the results of an inventory and preliminary assessment of 177 known former industrial sites in the City of Ottawa, as of July 1988. The Site is not listed in the Mapping and Assessment of Former Industrial Sites, City of Ottawa, July 1988. One former industrial site was identified within 250 m of the Site. A former tannery was identified at Civic No. 187 Preston Street, approximately 235 m west-northwest of the Site from 1890 to 1905. Given its distance and orientation with respect to the Site, this former industrial site is not suspected to have impacted the subject property.

Summary of City of Ottawa Historic Land Use Inventory (HLUI)

A Request was made to the City of Ottawa to review their Historic Land Use Inventory (HLUI). The response to the HLUI inquiry was received from the City of Ottawa on August 8, 2017. The search response indicated that there was one activity (of potential environmental concern) associated with the Site. The Site, identified as "Contracting Prettie's", located at 22 Balsam Street, was identified with a facility type of "Residential Building and Development". Given the use of the Site, is not considered to represent a PCA or an APEC for the Site.

The response indicated that sixteen activities were associated within 50 m of the Site, including two automotive garages located at 414 Booth Street, and 388 Booth Street, a paving company located at 394 Booth Street, a dry cleaners located at 267 Rochester Street, and a medicine manufacturer located at 253 Preston Street. The activities indicated in the HLUI, which are considered PCAs and located in the Phase One Study Area, are discussed further in Section 7.2.2 of this report. Based on the distances, four of the operations, indicated in the HLUI, are considered to represent areas of potential environmental concern (APECs) for the Site and are summarized in Section 7.3 of this report. A Copy of the HLUI response from the City of Ottawa is contained in Appendix D.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs are reviewed to generally document development of the Site and properties in the vicinity of the Site. They identify potential waste disposal areas, storage activities, land filling, and other potential adverse environmental concerns on Site and in the immediate vicinity of the Site. Aerial photographs of the Site and surrounding area were obtained for intermittent years between 1928 and 2014 at the National Air Photograph Library located in Ottawa, Ontario and from the City of Ottawa geoOttawa website. Comments for each photograph are presented in the following table. Copies of selected aerial photographs are presented in Appendix E.

Table 4.3 Aerial Photographs

Year	Site	Neighbouring Properties
1928	The Subject Site is developed for residential and commercial purposes.	Surrounding properties have been developed for residential purposes.
1958	The northwest portion of the Site has been redeveloped with a long rectangular building.	Minor residential redevelopment can be observed at the surrounding properties.

Table 4.3 Aerial Photographs

Year	Site	Neighbouring Properties
1965	The majority of the residential dwellings on the south portion of the Site and in the northeast portion of the Site have been demolished.	Neighbouring properties to the southeast and southwest have been demolished. Trans Canada Highway to the south has been expanded.
1976	The Site has been redeveloped with what appears to be the present day residential buildings in their approximate current orientation.	Two streets to the southwest of the Site have been removed and developed for residential purposes. Neighbouring properties to the east have been redeveloped for residential purposes.
1991	The Site is essentially unchanged from 1976.	Neighbouring properties to the west have been developed with their present day multi-level residential buildings.
2005	The Site is essentially unchanged from 1991.	Neighbouring properties are essentially unchanged from 1991.
2014	The Site is essentially unchanged from 2014.	Neighbouring properties are essentially unchanged from 2005.

Aerial photographs indicated the subject Site had been developed to its current residential configuration in the period between 1965 and 1976. Redevelopment of the Site in the 1960s and 1970s has the potential to have involved placement of unknown quality fill material at the Site for grading and/or backfilling former building foundations. The importation of fill material of unknown quality is a potentially contaminating activity and is considered to represent an area of potential environmental concern for the Site.

Neighbouring properties surrounding the Site were developed for what appeared to be mainly rural residential purposes with some for commercial and institutional purposes since at least 1928.

No potential waste disposal areas or storage activities were identified on Site or in the immediate vicinity of the Site. It should be noted that the scale of the aerial photographs did not permit an accurate interpretation of detailed features of the Site or the adjacent properties.

3.3.2 Topography, Hydrology, Geology

A Topographic map was reviewed from the Ontario Ministry of Natural Resources and Forestry, and is provided in Figure 1. The mapping shows the topography in the Phase One Study Area sloping down to the west-southwest. The nearest surface water body indicated on the mapping is the Ottawa River, located approximately 1 km north of the site; Dow's Lake was also observed approximately 1 km south of the Site. No areas of potential environmental concern were identified during the topographic mapping review.

According to the information obtained from the Geological Survey of Canada map 1425A titled Surficial Materials and Terrain features Ottawa-Hull the natural soil conditions in the region appear to consist of "Pre-Champlain Sea Deposits consisting of glacial deposits of till; heterogeneous mixture of material ranging from clay to large boulders, generally sandy, grades downwards into unmodified till; surface is generally modified by wave or river action and the topography is flat to hummocky". The thickness of overburden is expected to be approximately 1 m and the bedrock in the general area of the Site is expected to be limestone.

According to records from the water well information system and borehole databases, as presented in the results of the subcontracted Ecolog Environmental ERIS search, the overburden soil in the vicinity of the Site consist of a mixture of sand and gravel type soils. The overburden soil was reportedly underlain by limestone bedrock at an approximate depth of 1.0 m below ground surface.

3.3.3 Fill Materials

The Site has surface cover of landscape/grass vegetation and paved asphalt parking surfaces. The Site is approximately level with Gladstone Avenue to the south and the surrounding neighbouring properties to the north, east and west. Based on the aerial photographs, there is evidence to indicate that historical placement of fill material was done during the construction of existing buildings on the Site. The locations of the former building foundation footprints and areas requiring surficial grading, where fill material would have been placed, are considered areas of potential environmental concern (APECs) for the Site and are summarized in Section 7.3 of this report.

3.3.4 Water Bodies and Areas of Natural Significance

No natural surface water bodies were identified on the Site or within the Phase One Study Area. The nearest natural surface body is the Ottawa River, which is located approximately 1 km to the North of the Site. There are no areas of natural significance within 250 m of the Site.

3.3.5 Well Records

A request was submitted to Ecolog ERIS to search for records of water wells registered with the MOECC. Thirteen water wells were registered with the MOECC for properties approximately within 250 m of the Site, respectively. Eleven of the registered wells indicated are associated with monitoring and observation wells. The remaining water wells indicated do not specify use. Given that the Site is located in an urban area within the City of Ottawa and that municipally treated water is available, it is not suspected that there are any active potable water wells within the Phase One study area. A copy of the MOECC well record search is present within the Ecolog ERIS database summary.

3.4 Site Operating Records

There were no Site operating records available for review following the specific request to the existing owner. Considering the length of time the Site has been occupied for residential use, it was not expected that such information exists.

4. Interviews

Mr. Wayne Richards, a Site representative of the current owner (OCHC) of the Site, was interviewed by telephone following the Site visit. Mr. Richards stated that he had been familiar with the Site for approximately 25 years. Mr. Richards stated that the Site had always been used for residential purposes since its re-development in the 1960's. Mr. Richards stated that the buildings are heated by natural gas fueled boilers, which provide heat to radiant baseboard heaters throughout the building units. Mr. Richards stated that the Site has been heated by natural gas

since his involvement with the property. Mr. Richards was not aware of any storage tanks, current or former, or spills at the Site. Mr. Richards stated that the only chemicals stored at the Site were domestic grade cleaning chemicals and were stored in the janitorial room in the subject building.

5. Site Reconnaissance

5.1 General Requirements

GHD conducted a Site visit of the Property on July 25, 2017 between 2:30 pm and 4:30 pm. The visit was conducted by Mr. Luke Lopers, P. Eng., who has ten years' experience of conducting Phase One ESAs and is a Qualified Person for environmental site assessments under O. Reg. 153/04. Weather conditions were sunny with an approximate temperature of 25°C.

Site photographs were taken at the time of the Site Visits and are presented in Appendix F. Photographs 1 through 6 depict the exterior of the Phase One Property and the subject buildings. Photograph 4 depicts the location of the existing monitoring well installed on the property. Photograph 7 depicts the former dry cleaners adjacent to the North of the Site. Photographs 8 through 13 depict the general interior conditions of the existing buildings on the Site. Photographs 14 through 16 depict the general condition and layout of the mechanical rooms of the existing buildings on Site.

5.2 Specific Observations at Phase One Property

5.2.1 On-Site Structures and Improvements

Above Ground Structures

Three residential buildings civically addressed as 811 - 829 Gladstone Avenue, 275 - 289 Rochester Street, and 22 - 38 Balsam Street occupied the Site at the time of Site Visit. Four of the subject addresses were vacant, and residents occupied the remainder at the time of the Site assessment. It was reported that the buildings were constructed in the 1960s. The buildings were two storey slab-on-grade structures with concrete foundations. The buildings civically addressed as 811 - 829 Gladstone Avenue and 22 - 34 Balsam had accessible mechanical rooms with basements constructed of concrete block walls. The exterior of the Site building was finished with brick, vinyl siding, metal framed windows, and wood doors. The client reported that there is a flat roof below the current sloped and shingled roof. This could not be verified due to access at the time of the Site visit.

Below Ground Structures

There were no below ground structures observed at the time of the Site Visit, nor were any expected to be present on the Site.

5.2.2 Tanks

Above Ground Storage Tanks (ASTs)

The presence of current ASTs was not observed by GHD at the time of the Site Visit.

Based on the period of first development (late 1800's) and redevelopment (1960's) of the Site, it is suspected that there may have been historical ASTs or other fuel material (coal, wood, etc.) present at the Site, however, no records were available regarding their presence or location at the subject property.

Underground Ground Storage Tanks (USTs)

GHD observed operating natural gas fire boilers located in the basements of the mechanical rooms in the buildings civically addressed as 22 - 34 Balsam (mechanical room #1) and 811 - 829 Gladstone Avenue (mechanical room #2). It was suspected that the boiler located in mechanical room #1 also supplies the adjacent building civically addressed as 275 - 289 Rochester based on the direction of gas lines; this was later confirmed by the Client.

Based on the period of first development (late 1800's) and redevelopment (1960's) of the Site, it is suspected that there may have been historical USTs present at the Site, however, no records were available regarding their presence or location at the subject property.

5.2.3 Water Sources

Municipal water and sewer services are supplied by underground service trenches on the east portion of the Site leading to Booth Street. No present day or historical water supply wells were observed or reported to exist on-Site during the Site Visit.

5.2.4 Utility Corridors

Natural gas is supplied to the Site buildings from underground service trenches leading from Gladstone Avenue to the south of the Site, and Balsam Street to the north of the Site. Communications and electrical services connections are from hydro poles to the central portion of the Site.

5.2.5 Building Features

Exit and Entry Points

The Site buildings were observed to have two exterior entry/exit points for each residence, including a main entrance and a back door exiting into the backyard. The location of these entry/exit points are shown on Figure 2: Site Plan.

5.2.6 Heating Systems

The Site buildings civically addressed as 22 - 34 Balsam and 811 - 829 Gladstone Avenue were equipped with natural gas fired boilers at the time of the Site Visit. It was suspected that the boiler located in the building civically addressed as 22 - 34 Balsam also supplies the adjacent building civically addressed as 275 - 289 Rochester based on the direction of gas lines. No other heating systems were observed at the Site. No former heating systems were reported by the Site representatives.

Cooling Systems

Individual window mounted air conditioning units were present in multiple residences at the time of the Site visit. It was not suspected that any other cooling systems existed for the buildings.

5.2.7 Drains, Pits, and Sumps

One floor drain and one sump pit were located in the basement level of each mechanical room located in buildings civically addressed as 22 - 34 Balsam and 811 - 829 Gladstone Avenue. Access to the sumps was not available at the time of the Site Visit.

5.2.8 Unidentified Substances

There were no visually obvious unidentified substances observed during the Site inspection.

5.2.9 Interior Stains or Spills

There was no evidence of staining or spills observed during the interior assessment portion of the Site Visit.

5.2.10 Site Features

Wells

One monitoring well was observed during the Site Visit at the Southeast corner of Balsam Street and Rochester Street as shown on Figure 2: Site Plan. The Client was not aware of existing monitoring well. Details of the well were unknown at the time of this assessment.

Sewage Works

Sewage is discharged to the City of Ottawa sanitary sewer system through underground piping. Location of piping could not be determined at time of this investigation. There was no evidence of current or former septic systems on the Property at the time of inspection.

Ground Surface

The ground surface in the undeveloped areas of the Site consisted of grass, vegetation, and trees in the front and back yards. Asphaltic parking areas was present in the central, shared area of the Site, with access to the north from Balsam Street.

Railway Lines

There were no railway lines on the subject Site or within a 250 m radius of the Phase One Property at the time of the Site Visit.

5.3 Environmental Site Observations

5.3.1 Staining

No staining of the surface soil or vegetated areas was observed at the time of the Site Visit.

5.3.2 Stressed Vegetation

No distressed vegetation, abnormal odours or visual evidence of contamination, suggesting the presence of chemical or petroleum spills or releases, were noted at the time of the Site Visit.

5.3.3 Areas of Fill or Grading

The Site is flat and generally at grade with the neighbouring properties to the north, south, east and west. No fill materials or grading was noted during the Site inspection.

5.4 Potentially Contaminating Activities

Potentially Contaminating Activities (PCAs) are listed in Ontario Regulation 153/04 Schedule D Table 2. There were no PCAs observed at the Site at the time of inspection.

5.4.1 Unidentified Substances

Unidentified substances were not observed at the Site during the Site Visit.

5.4.2 Enhanced Investigation Property

According to Ontario Regulation 153/04 Schedule D 32(1)b, the Site is not classified as an 'Enhanced Property' for the purposes of this Phase One Study.

5.4.3 Phase One Study Area (properties within 250 m)

At the time of the Site Visit, the properties adjacent to the Site were visually examined for evidence of potentially contaminating activities (PCAs) and areas of potential environmental concern (APECs) that may adversely impact the Site. The Site Visit was conducted from public rights-of-way without physically accessing adjoining properties. For the purpose of this study, Gladstone Avenue is considered to be the east-west axis. At the time of Site Visit the area within 250 m of the Site is occupied by the following facilities or features:

- North | Balsam Street followed by residential dwellings at Civic No. 263 Rochester Street, residential dwellings at Civic Nos. 27,23,17, and 13 Balsam Street, and residential dwellings at Civic No. 390 Booth Street, followed by residential dwellings, then Willow Street, followed by residential dwellings.
- East | An institutional building at Civic Nos. 404 - 414 Booth Street, followed by Booth Street followed by an institutional building at Civic No. 391 Booth Street, followed by residential and commercial buildings, followed by Lebreton Street and further residential and commercial buildings.
- South | Gladstone Avenue followed by residential dwellings.
- West | Rochester Street followed by residential apartment buildings, followed by the Preston Street Garage at Civic No. 241 Preston Street, followed by Preston Street, followed by commercial buildings.

The Site and surrounding properties are located in a predominantly residential (Site) sector of the City of Ottawa, with some institutional, and commercial. Two PCAs were identified at neighbouring properties in the Phase One Study Area at the time of the Site Visit. The PCAs observed included:

- An automotive service garage was observed at 779 Gladstone Avenue, approximately 200 m east of the Site.
- An automotive service garage was observed at 241 Preston Street, approximately 165 m west of the Site.

The land use and PCAs identified in the Phase One Study area are presented in Figure 3: Surrounding Land Use. The off-Site PCAs and are summarized in Section 7.2.2 of this report.

6. Review and Evaluation of Information

6.1 Current and Past Uses (Site)

Current and past land uses of the Site are summarized in Table 7.1.

Table 7.1 Summary of Current and Past Use

Year	Name of Owner	Description of Property Use (Property Use)	Other Observations from Aerial Photos, Fire Insurance Plans (etc.)
1889 to 1910 (1965 for certain lots)	Individuals	Residential Use	Site developed for residential purposes (Title search, city directories)
1910 to 1918	Bank of Ottawa	Residential Use	
1918 to 1964	Ruthenian Greek Catholic Episcopal Corp of Canada	Residential and Institutional Use	Site developed for Residential and Institutional purposes. (Title search, city directories, aerial photographs, fire insurance plans)
1964 to 1968	City of Ottawa	Residential and Institutional Use	Multiple buildings on the Site have been demolished, some residential and institutional use observed. (Aerial Photographs, City Directories, Title Search)
1968 to 2006	Canada Mortgage and Housing Corporation	Residential Use	The Site has been developed with what appears to be the present day residential buildings in their approximate current orientation. (Aerial Photographs, City Directories, Title Search, Site Visit)
2006 to 2007	Ontario Housing Corporation	Residential Use	
2007 to present	Ottawa Community Housing	Residential Use	

6.2 Potentially Contaminating Activities

6.2.1 Summary of On-Site Potentially Contaminating Activities

One Potentially Contaminating Activity (PCA) was suspected to have occurred historically at the Site and was identified during the Phase One ESA. The suspected historical placement of fill material that was done during the construction of existing buildings at the Site is a considered PCA under O. Reg. 153/04. A summary of the identified PCA and its location on the Site is presented in Table 7.2 below. The location of the PCA is shown on Figure 2: Site Plan and Figure 3: Surrounding Land Use.

Table 7.2 Summary of On-Site Potentially Contaminating Activities (PCAs)

Plan Reference Number	Potentially Contaminating Activity	Location
1	Item 30: Importation of Fill material of unknown quality.	Central portion of the site

6.2.2 Summary of Off-site Potentially Contaminating Activities (Phase One Study Area)

Twenty-five potentially contaminating activities (PCAs) were identified at neighbouring properties within the Phase One Study Area as part of this assessment. A summary of the off-Site PCA's identified in the Phase One Study Area and their location with respect to the Site are presented in Table 7.3 below. The locations of these PCAs are shown on Figure 3: Surrounding Land Use Plan.

Table 7.3 Summary of Off-Site Potentially Contaminating Activities (PCAs)

Plan Reference Number	Potentially Contaminating Activity	Location
2	Item 52: Storage, maintenance, fuelling and repair of equipment, vehicles and material used to maintain transportation systems.	414 Booth Street, adjacent to the east
3	Item 5: Asphalt and Bitumen Manufacturing	394 Booth Street, 25 m northeast
4	Item 52: Storage, maintenance, fuelling and repair of equipment, vehicles and material used to maintain transportation systems.	388 Booth Street, 40 m northeast
5	Item 37: Operation of Dry Cleaning Equipment (where chemicals are used)	263 Rochester Street , 20 m north
6	Item 37: Operation of Dry Cleaning Equipment (where chemicals are used)	204 Rochester, 180 m northwest

6.3 Areas of Potential Environmental Concern

Based on the historical research and known information of the general area of the Site, there was one on-Site potentially contaminating activity (PCA); the suspected historical placement of fill material during redevelopment of the Site with the present day residential buildings. This PCA is considered to represent an area of potential environmental concern (APEC) for the Site (central portion of the Site).

APECs on the Site resulting from activities at neighbouring properties are interpreted based on nature of the activity, distance and orientation with respect to the Site and known or interpreted environmental factors. Based on these considerations, the qualified person determines which off-Site PCAs result in APECs. GHD has determined that four of the PCAs identified on neighbouring properties in the Phase One Study area are considered to represent APECs for the Site. The two automotive garages located at 414 (PCA#2) and 388 Booth Street (PCA#4), a former paving company located at 394 Booth Street (PCA#3), and a former dry cleaners located at 263 Rochester (PCA#5) are considered to represent APECs for the Site.

Off-Site PCAs identified in this study which were not considered to represent APECs for the Site were located at significant distances and/or down- or cross-gradient orientations to the Site and are not expected to have impacted the subject Property.

6.4 Phase One Conceptual Site Model

Three plans are provided in this report to depict the conceptual Site model. Figure 1: Site Location Map shows the location of the Site within the City of Ottawa. Figure 2: Site Plan, shows the current configuration of the Site. Figure 3: Surrounding Land Use shows the uses of the neighbouring properties in the Phase One Study Area. The Site is immediately surrounded by residential, commercial and institutional properties.

The Property is located at a property commonly referred to as Civic No. 811 Gladstone Avenue in Ottawa, Ontario (Site or Property) and is approximately 4725 m² (0.47 hectares) in area. The Property is currently occupied by three residential buildings, civically addressed as 811 - 829 Gladstone Avenue, 275 - 289 Rochester Street, and 22 - 38 Balsam Street. The Site has been used for residential, commercial, and institutional purposes since the first developed use of the Property in approximately 1889.

No water bodies, areas of natural significance or drinking water wells are present at the Site. The nearest surface water body indicated on the mapping is the Ottawa River, located approximately 1 km north of the site; Dow's Lake was also observed approximately 1 km south of the Site; the location of these water bodies are indicated in the Conceptual Site Model. The topography of the Site is generally flat and level with respect to adjacent properties. The soil conditions in the vicinity of the Site are expected to consist of glacial till type soil over limestone bedrock at 1.0 to 2.0 m below grade (mbg) and a water table, if present to be near 2.0 to 3.0 m below grade

The historical records and use and present operations of properties located within 250 m of the subject land were considered from an environmental perspective for the purposes of this report. Properties located outside of the Phase One Study Area (250 m radius) were not considered to have had the potential to have impacted the subject land. Based on the historical research and known information of the general area of the Site, there was one on-Site potentially contaminating activity (PCA); the suspected historical placement of fill material during redevelopment of the Site with the present day residential buildings. This PCA is considered to represent an area of potential environmental concern (APEC) for the Site (central portion of the Site).

Twenty-five PCAs were identified at surrounding properties in the Phase One Study Area as part of this assessment. Four of the identified off-Site PCAs are considered to represent APECs for the subject Site. The two automotive garages located at 414 and 388 Booth Street, a former paving company located at 394 Booth Street, and a former dry cleaners located at 263 Rochester are considered to represent APECs for the Site.

The Phase One Study area is serviced by municipal water and sewer services and is in a non-potable area within the City of Ottawa. Electrical and natural gas services are available from private utility companies. Given the location of underground services on the Site and the locations of the PCAs at the Site and neighbouring properties, the presence of underground services are not considered to have the potential to have contributed to contaminant distribution on the subject land.

7. Conclusions

7.1 Whether Phase Two Environmental Site Assessment Required Before Record of Site Condition Submitted

This Phase One ESA identified the presence of one on-Site Potentially Contaminating Activity (PCA); the suspected historical placement of fill material during redevelopment of the Site with the present day residential buildings. These PCAs are considered to represent an area of potential environmental concern (APEC) for the Site (central portion of the Site).

The 25 PCAs were identified at surrounding properties in the Phase One Study Area as part of this assessment. Four of the identified off-Site PCAs are considered to represent APECs for the subject Site. The two automotive garages located at 414 and 388 Booth Street, a former paving company located at 394 Booth Street, and a former dry cleaners located at 263 Rochester are considered to represent APECs for the Site.

Following the completion of the Phase One ESA for the subject Property, it is our opinion that a Phase Two Environmental Site Assessment is required for the Site.

7.2 Record of Site Condition Based on Phase One Environmental Site Assessment Alone

Given that it is our opinion that a Phase Two Environmental Site Assessment is required for the Site, a record of site condition (RSC) cannot be filed for the Site based on this Phase One ESA alone.

It should be noted that the previous land use of the Site is residential and that the proposed future use of the Site will include residential land use. Any redevelopment of the Site under this proposed land use will not involve changing land use to a less stringent use and will not require a Record of Site Condition under Ontario Regulation 153/04.

7.3 QP Confirmation

The findings and conclusions of the Phase One Environmental Site Assessment are founded on the accuracy and reliability of the information obtained from all parties, unless contradicted by visual Site observations or written documentation.

The conclusions are presented based upon the readily available public information within the time frame of this mandate by trained professionals, following a prescribed and recognised assessment procedure.

This report is not intended to address, or provide comment on the presence, or absence of organic growth organisms commonly referred to as mould, through statements, inferences, or omissions.

The report is prepared for the use of the Client and his named representatives in making an informed financial and business decision regarding environmental liabilities that may be associated with the Site. The use of this report for any other purpose is at the Client's own risk.

The Client must understand that changing circumstances in the physical or regulatory environment, the administration and use of the Site, as well as changes in any substances stored, used, or disposed of at the Site, could significantly alter the conclusions and information contained in this report. Therefore, it is important that the Client periodically re-evaluates the Site and reviews developments or operations, which may potentially impact the Site.

The Qualified Person for this study is Mr. Luke Lopers, P. Eng. Mr. Lopers has been a Professional Engineer, registered in Ontario since 2012 and has been working on environmental site assessments since 2006 and has been a project manager and peer reviewer for many Phase One ESAs and Phase Two ESAs as well as previously filed RSCs.

04108-0285

LAST REGISTERED OWNER: OTTAWA COMMUNITY HOUSING
CORPORATION / LA SOCIETE DE LOGEMENT
COMMUNAUTAIRE D'OTTAWA

CHAIN OF TITLE:

Patent dated February 27, 1855

To James Rochester

Plan 13 registered February 4, 1858

By James Rochester

Plan 16 registered March 23, 1861 (A subdivision of Block 126, Plan 13)

By C. F. Preston

(There are no deeds registered on Plan 16 prior to this, and no abstract pages for Block 126, Plan 13)

Part Lot 262

Deed CR31165 registered October 1, 1889

From William Jackman to Adolphe Larise

Deed CR59899 registered February 12, 1901
From Adolphe Larise to Moise Plouffe

Deed CR101097 registered December 20, 1910
From Moise Ploufee, trading as Plouffe and Company to Bank of Ottawa

Deed CR144265 registered December 28, 1918
From Bank of Ottawa to The Ruthenian Greek Catholic Episcopal Corp of Canada

Deed CR487585 registered December 15, 1964
From The Ruthenian Greek Catholic Episcopal Corp of Canada to The Corporation of the City of Ottawa

Lot 263

Deed CR45706 registered February 8, 1896
From Moise Plouffe to Lina Plouffe

Deed CR59558 registered December 18, 1900
From Lina Plouffe to Moise Plouffe

Deed CR101097 registered December 20, 1910
From Moise Ploufee, trading as Plouffe and Company to Bank of Ottawa

Deed CR144265 registered December 28, 1918
From Bank of Ottawa to The Ruthenian Greek Catholic Episcopal Corp of Canada

Deed CR162822 registered April 20, 1922
From The Ruthenian Greek Catholic Episcopal Corp of Canada to Alexander Nesralah

Deed CR253801 registered July 20, 1945
From estate of Alexander Nesralah to Sadie Nesralah

Deed CR367830 registered January 16, 1958
From Sadie Nesralah to Philip and Romeo Nesralah

Deed CR404606 registered April 28, 1960
From Romeo Nesralah to Samuel Nesralah

Deed CR404607 registered April 28, 1960
From Philip Nesralah to Samuel Nesralah

Deed CR487585 registered December 15, 1964
From The Ruthenian Greek Catholic Episcopal Corp of Canada to The Corporation of the City of Ottawa

Deed CR519288 registered December 6, 1966
From Philip Samuel and Romeo Nesralah to The Corporation of the City of Ottawa

Lot 264

Deed CR29774 registered March 1, 1889
From Sarah Foraler to Michael Rock

Deed CR36611 registered March 2, 1892
From Michael Rock to Ida Blair

Deed CR77595 registered May 15, 1906
From Ida Blair to Moise Plouffe

Deed CR101097 registered December 20, 1910
From Moise Ploufee, trading as Plouffe and Company to Bank of Ottawa

Deed CR144265 registered December 28, 1918
From Bank of Ottawa to The Ruthenian Greek Catholic Episcopal Corp of Canada

Deed CR487585 registered December 15, 1964
From The Ruthenian Greek Catholic Episcopal Corp of Canada to The Corporation of the City of Ottawa

Lot 265 and Part Lot 266

Deed CR34951 registered June 5, 1891
From Alexander Gunn to May Kennedy

Deed CR41753 registered June 20, 1894
From May Kennedy to Theopile Ladouceur

Deed CR43144 registered February 20, 1895
From Theopile Ladouceur to Michael Rock

Deed CR44679 registered September 5, 1895
From Michael Rock to Frank Proctor

Deed Registered October 18, 1908
From Frank Proctor to Jacob Holmstead

Deed LT1779 registered October 24, 1911
From Jacob Holmstead to William Drummond Hogg

Deed LT2407 registered October 4, 1912
From William Drummond Hogg to Charles Kert

Deed LT2838 registered May 2, 1913
From Charles Kert to Samuel Desmond

Deed LT3056 registered August 15, 1913
From Samuel Desmond to Koeurg F.

Power of Sale LT3225 registered December 24, 1913 (under Mortgage LT2408)
From William Drummond Hogg to John Allan James

(The entries made in this time frame are not legible. There appears to be one more deed entered)

Expropriation LT60405 registered February 28, 1964
From Lazarus Soloman Greenberg to The Corporation of the City of Ottawa

Lot 270

Deed CR37805 registered October 7, 1892
From Maria Brown to Alphonse Villeneuve

Deed CR51293 registered April 13, 1895
From Alphonse Villeneuve to Cyrille Goulet

Deed CR125224 registered April 24, 1914
From estate of Cyrille Goulet to Sophranie Goulet

Deed 279261 registered September 21, 1949
From Joseph Goulet to James Landry

Deed CR485655 registered November 2, 1964
From James Landry to The Corporation of the City of Ottawa

Lot 271

Deed CR32239 registered April 8, 1890
From Samuel Mulligan to Agnes Mulligan

Deed CR32240 registered April 8, 1890
From Agnes Mulligan to Andrew Mulligan

Deed CR40440 registered December 4, 1893
From Alex Mulligan to Andrew Mulligan

Deed CR57531 registered May 25, 1900
From Andrew Mulligan to Alex Mulligan

Deed CR91021 registered June 29, 1909
From Andrew Mulligan to Joseph Dumouchelle

Deed CR212846 registered August 20, 1934
From Rachel Dumouchelle to Cyprien Dumouchelle

Deed CR225986 registered October 5, 1908
From Cyprien Dumouchelle to Eugene Robert

Deed CR249803 registered November 17, 1944
From Eugene Robert to Mari Desrochers

Deed CR316037 registered November 5, 1953
From Mathilda Mulligan to Wilfred Mulligan

Deed CR338981 registered October 18, 1955
From estate of Marie Desrochers to Donat Desrochers

Deed CR338982 registered October 18, 1955
From Donat Desrochers to Lucien and Irene Desrochers

Deed CR489013 registered January 25, 1965
From Wilfred Mulligan to The Corporation of the City of Ottawa

Deed CR489500 registered February 5, 1965
From Lucien and Irene Desrochers to The Corporation of the City of Ottawa

Lot 272

Deed CR111477 registered April 11, 1912
From Nelson Blais to Elias Joseph

Deed CR112507 registered May 8, 1912
From Wilson Blais to Cyrille Goulet

Deed CR125224 registered April 24, 1914
From estate of Cyrille Goulet to Sophranie Goulet

Deed CR155794 registered January 4, 1922
From Elias Joseph to Joseph Abraham

Deed CR162821 registered April 20, 1922
From Bank of Ottawa to The Ruthenian Greek Catholic Episcopal Corp of Canada

Deed CR162823 registered April 20, 1922

From The Ruthenian Greek Catholic Episcopal Corp of Canada to Alexander Nesralah

Deed CR253801 registered July 20 ,1945
From estate of Alexander Nesralah to Sadie Nesralah

Deed CR268580 registered December 12, 1947
From Elias Joseph to Allan and Mary Edgelay

Deed CR279948 registered October 18, 1949
From Joseph Goulet to Peter Yakubowski

Deed CR288407 registered January 30, 1951
From Allan and Mary Edgelay to Emmanuel Tabernacle of the United Pentecostal Church

Deed CR299589 registered April 7, 1952
From Joseph Abraham to Alexander and Almeza Ayoub

Deed CR302033 registered July 21, 1952
From Emmanuel Tabernacle of the United Pentecostal Church to George Monsour

Deed CR335946 registered July 27, 1955
From George Monsour to Antoniiio Zacconi

Deed CR366575 registered December 2, 1957
From Antonio Zacconi to Mario Colonnese

Deed CR367830 registered January 16, 1958
From Sadie Nesralah to Philip and Romeo Nesralah

Deed CR404606 registered April 28, 1960
From Romeo Nesralah to Samuel Nesralah

Deed CR404607 registered April 28, 1960
From Philip Nesralah to Samuel Nesralah

Deed CR485397 registered October 28, 1964
From Almaza Ayoub to The Corporation of the City of Ottawa

Deed CR486716 registered November 27, 1964
From Peter Yakubowski to The Corporation of the City of Ottawa

Deed CR505097 registered January 19, 1966
From Mario Colonnese to The Corporation of the City of Ottawa

Deed CR519288 registered December 6, 1966

From Philip Samuel and Romeo Nesralah to The Corporation of the City of Ottawa

Part Lot 273

Deed CR31333 registered October 20, 1889
From Robert Hector to Charles Martineau

Deed CR34743 registered may 7, 1891
From Charles Martineau to Cyrille Goulet

Deed CR125224 registered April 24, 1914
From estate of Cyrille Goulet to Sophranie Goulet

Deed CR279948 registered October 18, 1949
From Joseph Goulet to Peter Yakubowski

Deed CR486716 registered November 27, 1964
From Peter Yakubowski to The Corporation of the City of Ottawa

ALL

Deed CR539221/LT69314 registered March 5, 1968
From The Corporation of the City of Ottawa to Central Mortgage and Housing Corporation

Name Change OC656391 registered November 1, 2006
From Central Mortgage and Housing Corporation to Canada Mortgage and Housing Corporation

Deed OC656485 registered November 21, 2006
From Canada Mortgage and Housing Corporation to Ontario Housing Corporation

Deed OC680045 registered January 19, 2007
From Ontario housing Corporation to Ottawa Community Housing Corporation/La Societe De Logement Communautaire D'Ottawa

Name Change OC744008 registered July 13, 2007
From Ontario housing Corporation to Ontario Mortgage and Housing Corporation

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2016

Abandoned Mine Information System:

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Nov 2016

Anderson's Waste Disposal Sites:

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999 - Oct 2016

Borehole:

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval:

Provincial

[CA](#)

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Commercial Fuel Oil Tanks:

Provincial [CFOT](#)

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private [CHEM](#)

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999 - Oct 2016

Compressed Natural Gas Stations:

Private [CNG](#)

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 31, 2012

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial [COAL](#)

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial [CONV](#)

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-May 2017

Certificates of Property Use:

Provincial [CPU](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jun 2017

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886-Aug 2015

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Mar 2017

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jun2017

Environmental Compliance Approval:

Provincial **ECA**

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Mar 2017

Environmental Effects Monitoring:

Federal **EEM**

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private **EHS**

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Aug 2016

Environmental Issues Inventory System:

Federal **EIIS**

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

List of TSSA Expired Facilities:

Provincial **EXP**

List of facilities with removed tanks which were once registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Mar 2017

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sept 2003

Fuel Storage Tank:

Provincial **FST**

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial **FSTH**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial **GEN**

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Sep 2016

Greenhouse Gas Emissions from Large Facilities:

Federal **GHG**

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2015

TSSA Historic Incidents:

Provincial **HINC**

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal **IAFT**

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

TSSA Incidents:

Provincial **INC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

Government Publication Date: Feb 28, 2017

Landfill Inventory Management Ontario:

Provincial **LIMO**

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Dec 31, 2013

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2017

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2014

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Aug 2010

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008 - Dec 2016

National Energy Board Wells:

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-2014

Oil and Gas Wells:

Private

OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 2017

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Oct 2016

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jun 2017

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Oct 2016

TSSA Pipeline Incidents:

Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jun 2017

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2013

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2017

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999 - Oct 2016

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Feb 2017

Wastewater Discharger Registration Database:

Provincial **SRDS**

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-2014

Anderson's Storage Tanks:

Private **TANK**

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal **TCFT**

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Jan 2015

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial **VAR**

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial **WDS**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: 1970-Mar 2017

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial **WDSH**

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial **WWIS**

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Jun 30, 2016

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Sent via email [luke.lopers@GHD.com]

Dear Mr. Lopers,

**Re: Information Request
811 Gladstone Avenue, Ottawa, Ontario (“Subject Property”)**

Internal Department Circulation

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- The City’s Environmental Remediation Unit (ERU) notes that they have an existing relationship with Ottawa Community Housing Corporation. Please contact the ERU directly to obtain environmental records for 811 Gladstone Avenue:

Rich Barker, Advisor, Environmental Remediation
City of Ottawa
Environmental Remediation & Leasing Unit
Corporate Real Estate Office
Richard.Barker@ottawa.ca | 613.580.2424, ext. 12567

Search of Historical Land Use Inventory

This acknowledges receipt of the signed Disclaimer regarding your request for information from the City’s Historical Land Use Inventory (HLUI 2005) database for the Subject Property.

A search of the HLUI database revealed the following information:

- There is one activity associated with the Subject Property: Activity Number 3730.

*Shaping our future together
Ensemble, formons notre avenir*

City of Ottawa
Planning, Infrastructure and Economic
Development Department

110 Laurier Avenue West, 4th Floor
Ottawa, ON K1P 1J1
Tel: (613) 580-2424 ext. 21690
Fax: (613) 560-6006
www.ottawa.ca

Ville d'Ottawa
Services de la planification, de l'infrastructure et
du développement économique

110, avenue Laurier Ouest, 4e étage
Ottawa (Ontario) K1P 1J1
Tél.: (613) 580-2424 ext. 21690
Télé.: (613) 560-6006
www.ottawa.ca

The HLUI database was also searched for activity associated with properties located within 50m of the Subject Property. The search revealed the following:

- There are 16 activities associated with properties located within 50m of the Subject Property: Activity Numbers 2254, 2635, 11612, 1255, 2634, 7924, 1959, 5550, 5570, 636, 15064, 3151, 9322, 7239, 3043, and 7354.

Please note that Activity Numbers 11612, 2635, 15064, 1959, 5550, 5570, and 1255 have a PIN Certainty of "2". This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the Subject Property. All database entries with a PIN Certainty of "2" require independent verification as to their precise location.

A site map has been included to show the location of the Subject Property as well as the location of all the activities noted above, including the HLUI database's location of the Activity Numbers with a PIN Certainty of "2".

Additional information may be obtained by contacting:

Ontario's Environmental Registry

The Environmental Registry found at <http://www.ebr.gov.on.ca/ERS-WEB-External/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House
161 Elgin Street 4th Floor
Ottawa ON K2P 2K1
Tel: (613) 239-1230
Fax: (613) 239-1422

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of

information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact Ellen Potts at 613-580-2424 ext. 21690 or HLUI@ottawa.ca

Sincerely,

Ellen Potts

Dear Luke Lopers:

RE: ***Freedom of Information and Protection of Privacy Act Request***
Our File # A-2017-05052, Your Reference 11140575-E1

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 811 Gladstone Ave, Ottawa.

After a thorough search through the files of the Ministry's Ottawa District Office, Investigations and Enforcement Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, no records were located responsive to your request. To provide you with this response and in accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, the fee owed is \$30.00 for 1 hour of search time @ \$30.00 per hour. **We have applied the \$30.00 for this request from your initial payment.**

To conduct a search through the files of the Environmental Approvals Branch requires an additional 8 hours. If you would like us to search for Environmental Compliance Approvals/Certificates of Approval at the Environmental Approvals Branch (EAB), please forward to me at the above address payment by money order or cheque (made payable to the "Minister of Finance (FOI)") or by credit card in the amount of \$240.00. **As EAB may have filed approval records by the proponent of the approval (current/former property owner/tenants of the property) rather than the site address, you will be required to provide all current/former property owner/tenant names for the search years you requested in your application when submitting payment for this search.** Please note that there is no guarantee any records will be located responsive to your request. Credit card forms are available on the Ministry's website <http://www.ontario.ca/environment-and-energy/freedom-information-request-form-credit-card-form>. Please note, a request for records must usually be answered within 30 calendar days, however Section 27 allows for time extensions under certain circumstances. If you choose to have the search conducted at the Environmental Approvals Branch, the time for answering your request will be extended for an additional 30 days.

When remitting payment please quote our file number or attach a copy of this letter.

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Michael Kolaric at 416-327-3036.

Yours truly,

Janet Dadufalza
FOI Manager

Hello Ryan,

Thank you for your inquiry.

We have no record in our database of any fuel storage tanks at the subject address (addresses).

For a further search in our archives please submit your request in writing to Public Information Services via e-mail (publicinformationsservices@tssa.org) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Thank you and have a great day,
Sherees
