Dear Ms. Čaleta

Re: Roadway Traffic Noise Memo
Adelaide Expansion – Preston Square, Ottawa
GWE File No.: 16-037

Gradient Wind Engineering Inc. (Gradient Wind) was retained by Sakto Corporation to undertake a roadway traffic noise study of a proposed residential high-rise development at Preston Square in Ottawa, Ontario. The report for this assessment is titled 'Roadway Traffic Noise Assessment' and is dated February 10, 2018. This letter is to address updated site plan drawings, dated December 2, 2018. Upon review of the latest drawings, Gradient Wind has concluded that changes to the site plan are minor and bear no significance to the conclusions and recommendations of Gradient Wind's prior assessment report. As such, no further analysis or reporting is required.

Should you have any questions, or wish to discuss our findings further, please call us (613) 836-0934 or contact us by e-mail at joshua.foster@gradientwind.com. In the interim, we thank you for the opportunity to be of service.

Sincerely,

Gradient Wind Engineering Inc.

Joshua Foster, P.Eng
Principal
GWE16-037 – Traffic Noise Memo
