HLUI Response ERIS Report

Appendix 3 Qualifications of Assessors

#### **EXECUTIVE SUMMARY**

#### **Assessment**

Paterson Group was retained by Urban Capital Property Group to conduct a Phase I-Environmental Site Assessment (ESA) for the property located at 394 - 404 Bank Street, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the Phase I Property was initially developed prior 1890 for residential purposes, followed by paint shop addressed 396 and 404 Bank Street from 1901 to 1960s. Sometime in the mid1950s, the subject site was redeveloped with the present-day building, which was used for retail stores until the late 1990s. Since the early 2000s, the subject land has been used as commercial office space, readdressed 294-404 Bank Street. Based on the historical development and use of the site two (2) on-site potentially contaminating activities (PCAs) – former paint shops and fill material of unknown quality are identified and considered to represent areas of potential environmental concern (APECs) on the Phase I Property.

The historical use of the surrounding lands consisted of several potentially contaminating activities (PCAs), however, based on orientation and/or separation distances in combination with information contained within our files, primarily regarding 350 Bank Street (former retail fuel outlet), these off-site PCAs are not considered to represent APECs on the Phase I Property, with the exception of the former automotive repair garage immediately south of the Phase I Property. The former use of the adjacent property (automotive repair garage), addressed 406<sup>1/2</sup> Bank Street (now 19 Florence Street) represents an APEC on the Phase I Property.

Following the historical research, site visits were conducted. The Phase I Property is currently occupied by a two-storey commercial building used as offices. Neighbouring land use in the Phase I Study Area consists of residential and commercial (retailers and restaurants). No PCAs were noted with the current use of the Phase I Property or the Study Area.

Based on our findings, three (3) PCAs were identified to result in APECs on the Phase I Property: a former on-site paint and oil stores formerly addressed 396-404 Bank Street (now 394 – 404 Bank Street), fill material of unknown quality at 393 – 404 Bank Street, and a former off-site automotive service garage (greasing/oiling) located immediately south of the Phase I Property at 406½ Bank Street (now 19 Florence Street).

These PCAs were identified and considered to represent APECs on the Phase I Property.

## Recommendations

Based on our findings of the assessment, it is our opinion that a Phase II-Environmental Site Assessment is required for the subject property.

Based on the age of the subject building, potentially asbestos containing materials (ACMs) maybe present, including the vinyl floor tiles, drywall joint compound, suspended ceiling tiles, plaster walls, ceiling stipple and plaster finishes. Lead-based paints may also be present on painted surfaces.

It is our understanding that the subject buildings will be demolished in conjunction with future redevelopment. Prior to any demolition activities, a designated substance survey (DSS) must be conducted for the existing structure, in accordance with Ontario Regulation 490/09 under the Occupational Health and Safety Act.

## 1.0 INTRODUCTION

At the request of Urban Capital Property Group, Paterson Group (Paterson) conducted a Phase I-Environmental Site Assessment (Phase I-ESA) for the property located at 394 to 404 Bank Street, in the City of Ottawa, Ontario, herein referred to as the Phase I Property. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and properties within the Phase I Study Area to identify any potentially contaminating activities that would result in areas of potential environmental concern on the Phase I Property.

Paterson was engaged to conduct this Phase I-ESA by Mr. Eric Malka from Urban Capital Property Group. The head office is located at 17 Nelson Street, Toronto, Ontario. Mr. Malka can be reached by telephone at (416) 304-1755.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all of our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared in general accordance with Ontario Regulation (O.Reg.) 153/04, as amended, under the Environmental Protection Act, and also complies with the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

## 2.0 PHASE I PROPERTY INFORMATION

Address: 394 - 404 Bank Street, Ottawa, Ontario

Legal Description: Lot 20, Plan 15558, Bank Street West, in the City of

Ottawa.

Location: The site is located on the west side of Bank Street

between James Street and Florence Street, in the City of Ottawa, Ontario. Refer to Figure 1 - Key Plan in the

Figures section following the text.

PIN: 04119-0140

Latitude and Longitude: 45° 24' 47.07" N, 75° 41' 40.91" W

**Site Description:** 

Configuration: Rectangular

Area: 531 m<sup>2</sup> (approximately)

Zoning: TM – Traditional Mainstreet, Mixed-use Zone

Current Use: The Phase I Property is occupied by 2-storey

commercial office building. The western portion of the site is used for vehicular parking associated with the

subject building.

Services: The Phase I Property is situated in a municipally

serviced area.

## 3.0 SCOPE OF INVESTIGATION

e scope of work for this Phase I – Environmental Site Assessment was as lows:
Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
Conduct interviews with persons knowledgeable of current and historic operations on the subject properties, and if warranted, neighbouring properties;
Present the results of our findings in a comprehensive report in general accordance with the requirements of O.Reg. 269/11 amending O.Reg. 153/04 made under the Environmental Protection Act and in compliance with the requirements of CSA Z768-01;
Provide a preliminary environmental site evaluation based on our findings;
Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

## 4.0 RECORDS REVIEW

## 4.1 General

## **Phase I-ESA Study Area Determination**

A radius of approximately 250 m was determined to be appropriate as a Phase I Study Area for this assignment. Properties outside the 250 m radius are not considered to have impacted the subject land, based on their significant distance from the site.

## **First Developed Use Determination**

Based on 1888 Fire Insurance Plan (FIP), the Phase I Property was initially developed with two commercial buildings labeled as paint stores, while the City Directories listed a private individual in 1890/1891. For the purpose of this assessment, the first developed use of the Phase I Property was taken to be commercial in 1888.

#### **Fire Insurance Plans**

The 1888, 1912, 1925 and 1956 Fire Insurance Plans (FIPs) for the Phase I Property and properties within the Phase I Study Area were review as part of this assessment.

The 1888 FIPs depict two (2) commercial buildings on the Phase I Property, addressed 404 and 406 Bank Street. Both buildings are occupied by a paint store. The 1925 depict the same paint shop depicted in the earlier FIP at 404 Bank Street and an unlabelled commercial building at 404<sup>1/2</sup> Bank Street, which was formerly 406 Bank Street. The 1956 FIP depicts what appears to be the present-day commercial building, housing two (2) paint shops.

Based on the FIPs, the neighbouring lands consisted of commercial businesses along Bank Street and residential along streets that transect with Bank Street. Several potentially contaminating activities (PCAs) were identified within the Phase I Study Area. These historical PCAs are listed in Table 1.

	Table 1. Potentially Contaminating Activities Fire Insurance Plans Review Summary			
Address	Year of FIP	Approximate Distance / Orientation from Site		
Bank Street				
390	1925, 1956	Gasoline Service Station (2 USTs)	19 m N	
390	1956	Automotive service garage	19 m N	
404	1901, 1925, 1956	Paints	On-site	
4061/2	1925, 1956	Automotive repair garage (1UST)	Immediately south	
370	1901	Printing Office	65 m N	
374	1901	Printing Office	73 m N	
370	1925	Photos	68 m N	
376-378	1925, 1956	Electrical Works	63 m N	
384	1925	Glass Works	60 m N	
448	1925, 1956	Gasoline Service Station (4 USTs)	168 m S	
455	1925, 1956	Gasoline Service Station (3 USTs)	175 m S	
464	464 1925, 1956 Dealership & Automotive Garage 213 m S		213 m S	
Gladstone Av	enue			
433	1956	Gasoline Service Station (2 USTs)	162 m SW	
430	1956	Progressive Printers	170 m SW	
Gilmour Stree	et			
384	1925, 1956	Garage & Repairs	92 m NE	
James Street				
9	1925	Garage & Repairs	25 m NW	
24-26	1925	Battery Charging	45 m SW	
Florence Stre	et			
7-11	1925, 1956	Garage & Repairs (1 UST)	25 m S	

Based on the separation distances and/or downgradient orientation with respect to the Phase I Property, in addition to the underlying clay deposit, the off-site PCAs, with the exception of an automotive repair garage to the immediate south (406 <sup>1/2</sup> Bank Street) are not considered to represent areas of potential environmental concern (APECs).

Two (2) on-site PCAs were identified as former paint and/or oil stores that are considered to represent areas of potential environmental concern (APECs) on the Phase I Property.

Three (3) PCAs in the immediate area of the Phase I Property were identify: a retail fuel outlet (RFO) and automotive service garage were identified at 390 Bank Street (formerly 394-396 Bank Street) and an automotive repair garage located at 406<sup>1/2</sup> Bank Street. Based on previous environmental investigations conducted at 390 Bank Street, the former RFO and the former automotive repair garage are not considered APECs on the Phase I Property, as they have been addressed and a record of site condition (RSC) was issued in 20011.

The historical automotive garage at 406<sup>1/2</sup> Bank Street, however represent an APEC on the Phase I Property. PCAs that represent APECs on the Phase I Property are shown on Drawing PE4650-2 – Site Plan.

Historical PCAs identified in the FIPs reviewed are shown on Drawing PE4650-3-Surrounding Land Use Plan.

## **City of Ottawa Street Directories**

City directories were reviewed in approximately ten (10) year intervals back to the 1891.

The Phase I Property currently addressed 396-404 Bank Street (formerly 404 and 406 Bank Street) was listed under a private individual from 1890 to 1908. From 1908 to 2009, several commercial retail businesses and offices were listed under 396-404 Bank Street. Listed businesses that were considered PCAs are listed in Table 2.

Surrounding lands consisted primarily of commercial along Bank Street and residential on the adjacent side streets. Based on the directories reviewed, PCAs identified within the study area are presented in Table 2.

	Table 2. Potentially Contaminating Activities City Directories Review Summary				
Address	ress Years Listed Listed Activity				
Bank Street					
390	1922-1970	Various Retail fuel outlets	19 m N		
390	1934-1958	Various automotive repair garages	19 m N		
404	1919-1929	Stewart Paints	On-site		
448	1922-1960	Retail fuel outlet	168 m S		
455	1922-1960	Retail fuel outlet	175 m S		
464	1922-1960	Automotive Garage 213 m S			
Gladstone Ave	enue				
433	1950-1960	Retail fuel outlet	162 m SW		
James Street					
9	1925	Garage & Repairs	25 m NW		
7-11	1930-1960	Automotive Garage	25 m S		

As previously discussed, the historical RFO and garage at 390 Bank Street are not considered PCAs that do not represent APECs on the on the Phase I Property. Other off-site PCAs identified within the Phase I Study Area are not considered to represent APECs, based on the separation distances and/or orientation with respect to the Phase I Property.

Historical PCAs identified in the city directories review are shown on Drawing PE4650-4- Surrounding Land Use Plan.

#### **Chain of Title**

Paterson verified the current land title for the Phase I Property with Read Abstracts Limited. The chain of title was received and reviewed for the Phase I Property (Lot 20 of Plan 15558).

#### 394 - 404 Bank Street

According to the title search, 394-404 Bank Street was first registered by James MacLaren on July 10, 1877. The deed was transferred over the years to various private individuals until 1883, when the property was acquired by Freehold Association of Ottawa. The ownership of the property was then transferred from Freehold Association of Ottawa to various private individuals until 1959, when

Corbert Investments Limited acquired the land. In 1972, the property deed was acquired by McRae Holdings Limited who and subsequently transferred the land deed to S. Saddler Limited, in trust, followed by the Muccitto family in 2001. Doyle Bank St. Holding Inc. purchased the property in 2011, followed by an acquisition of the property by Urban Capital (James Street) Inc. in January of 2020.

No other PCAs were identified on the Phase I Property during the title search reviews for the Phase I Property.

## **Previous Environmental Reports**

"Phase I & II Environmental Site Assessment, 394-404 Bank Street, Ottawa, Ontario," prepared by Levac Robichaud Leclerc Associates Ltd. (LRL Associates), dated January 11, 2011.

Based on the findings of the Phase I & II ESA conducted by LRL Associates, the former presence of a gasoline service station to the north and an automotive repair garage immediately south mandated a Phase II ESA.

Two (2) boreholes were placed along the northern and southern property boundaries. One borehole (along the south boundary) was completed as a monitoring well (MW-2). Five (5) soil samples were submitted and analyzed for benzene, toluene, ethylbenzene, xylenes (BTEX), petroleum hydrocarbon (PHC), fractions F1-F4 and/or metals. Based on the analytical results, all BTEX and PHC concentrations complied with the MECP Table 3 Residential Standards. Cobalt and vanadium concentrations in BH2 exceeded the selected MECP Standards. These values however, are considered to be naturally occurring levels in clay. One groundwater sample was submitted and analyzed for BTEX, PHC and metals. All BTEX and PHC parameter concentrations complied with the MECP Table 3 Standards. The mercury concentration was marginally in excess of the selected standards (0.3ug/L). It is our opinion that the well had not been properly established and/or the water was not filtered and sediment in the sample resulted in this exceedance.

Based on the findings of the Phase I & II ESA, LRL Associates did not recommend any further work. A designated substance survey (DSS) was recommended for the subject building.

#### **Proposed Site Plan**

A survey plan was not provided at the time of the assessment.

## 4.2 Environmental Source Information

#### **Environment Canada**

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on January 28, 2020. No records were found in the NPRI database for properties within the Phase I Study Area.

## **PCB Inventory**

A search of national PCB waste storage sites was conducted. No PCB waste storage sites are located within the Phase I Study Area.

## **Areas of Natural Significance**

A search for areas of natural significance and features within the Phase I study area was conducted on the website of the Ontario Ministry of Natural Resources (MNR) on January 28, 2020. The search did not reveal any areas of natural significance within the Phase I Study Area.

## Ministry of the Environment, Conservation and Parks (MECP) Submissions

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the Phase I Property as apart of this assessment. Based on the MECP FOI response, there were no records responsive to our request regarding the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

#### **MECP Instruments**

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments as apart of this assessment. Based on the MECP FOI response, there were no records responsive to our request regarding the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Waste Management Records**

A request was submitted to the MECP FOI office for information with respect to waste management records as apart of this assessment. Based on the MECP FOI response, there were no records responsive to our request regarding the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Incident Reports**

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP as apart of this assessment. Based on the MECP FOI response, there were no records responsive to our request regarding the Phase I Property. A copy of the MECP FOI response is provided in Appendix 2.

## **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted as part of this assessment for the site, neighbouring properties and the general area of the site. No RSC has been filed for the Phase I Property. An RSC was filed for 390 Bank Street in April 2011. Based on the ESR, an underground storage tank decommissioning program as well as a Phase I & II ESA were conducted on the property, immediately north of the Phase I Property. The maximum reported concentrations remaining on-site were in compliance with the current MECP Table 3 Residential Standards. No remediation was required for the RSC Property. It is not expected that the operations that occurred at 390 Bank Street had impacted the Phase I Property.

Four (4) RSCs were identified for the following properties within the Phase I Study Area, 330 Gilmour Street, 340 McLeod Street, 453 Bank Street and 435 Gladstone Avenue. Based on the separation distances of these RSC properties with respect to the Phase I Property, in combination with the information in the ESR, these properties are not considered to represent APECs on the Phase I Property.

## **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no former waste disposal sites located within 250 m of the Phase I Study Area.

## **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I Study Area.

## **Environmental Risk Information Services (ERIS) Report**

An ERIS (Environmental Risk Information Service) Report was obtained for the Phase I Property and properties within the study area.

According to the ERIS report, no records were identified for 394-404 Bank Street. No potential environmental concerns or new information regarding the Phase I Property was identified in the ERIS report.

The ERIS search identified several off-site waste generators, incidents/reported spills. The majority of these reported concerns were located more than 120 m away from the Phase I Property and are not considered to generate APECs on the Phase I Property.

Five (5) reported spills were identified at: 417 Bank Street (62 m northeast), 379 Waverly Street (67 m northeast), 378 Bank Street (88m northwest), 366-800 Bank Street (98 m north) and 38 James Street (105 m southwest), of which, 2 of the spills were leaks from furnace oil tanks at private residents, while other spills were related natural gas leaks. Based on the separation distance and/or down/cross-gradient, these oil spills are not considered to result in APECs on the Phase I Property.

A waste generator, C.C.B Electrical Works Ltd. located at 378 Bank Street (88m northeast) was identified as producing petroleum distillates and motor oil waste. Based on cross-gradient orientation with respect to the subject land, the former activity associated with 378 Bank Street is not considered to generate an APEC. No new PCAs that would generate APECs on the Phase I Property were identified in the ERIS report. A copy of the report is included in Appendix 2.

## **Technical Standards and Safety Authority (TSSA)**

An ERIS search was conducted in lieu of contacting the TSSA, Fuels Safety Branch in Toronto to inquire about current and former underground storage tanks, spills and incidents for the site and neighbouring properties. No records are listed in the TSSA registry for the subject site or the adjacent properties. A copy of the ERIS Report is included in Appendix 2.

#### Former Industrial Sites

The report titled "Mapping and Assessment of Former Industrial Sites, City of Ottawa" prepared by Intera Technologies Limited was reviewed.

The aforementioned report indicated the presence of one former industrial site within the study area: Site #39 (Printing, Publishing and Allied Industries) located

at 430 Gladstone Avenue, approximately 200 m SW of the subject land. This industrial site is not considered to have the potential to impact the Phase I Property based on sufficient separation distance.

## **City of Ottawa Landfill Document**

The document entitled "Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa", was reviewed. No former landfill sites were identified in within the Phase I Study Area.

## City of Ottawa Historical Land Use Inventory (HLUI)

A search request for the City of Ottawa's Historical Land Use Inventory (HLUI 2005) database was requested as part of this assessment. According to the City of Ottawa's HLUI, one activity associated with 390 Bank Street was identified as John's Service Station (388 Bank Street), which had operated on-site from 1960 to 1970. Based on our review of the City's HLUI results, two (2) additional activities were identified on the Phase I Property. The nature of these activities were paint shops (Activity ID 10330 and 2258)/ PCAs that are considered to represent APECs on the Phase I Property.

The City's inventory revealed that there are 141 activities associated with properties within the Phase I Study Area. The majority of these activities were located 100m or more away from the Phase I Property. Activities that were considered PCAs and identified within 100m of the Phase I Property are summarized in Table 3.

Table 3: Potentially Contaminating Activities HLUI Review Summary				
Activity ID	ctivity ID Address Listed Activity		Years Listed	Approximate Distance / Orientation from Site
7770	388 Bank Street	Service Station (RFO)	1960-1970	19 m N
10330	394 Bank Street	Peter Stewart Paints	1920	On-site
13129	394-396 Bank Street	Automotive repair & service shops	1930-1956	19 m N
2558	404 Bank Street	Commercial Paints	1960	On-site
8262	7 Florence Street	Automotive repair garage	1930-1960	Immediately south
13994	382 Bank Street	Commercial Printing	1970-1994	24m N
10588	376 Bank Street	Petroleum products (wholesale) – Ottawa Gas	1960	58m N

	Table 3: Potentially Contaminating Activities HLUI Review Summary					
Activity ID	Address	ess Listed Activity		Approximate Distance / Orientation from Site		
11907	374 Bank Street	Rochester Lithograph Co.	1910, 1958-1965	50m N		
3555	384 Bank Street	Glass and architectural metal products	1930	20m N		
3814	384 Bank Street	Commercial Printing	1900-2005	20m N		
8423	380 Bank Street	Heating equipment industry	1910	40m N		
13685	383 Bank Street	Machine shop	1958-1961	30 m NE		
2896	381 Bank Street	Petroleum products wholesale	1940	40m NE		
14464	429 Bank Street	Weiner's cleaners & dyers	1940-1956	76m SE		
12915, 8902	24 Florence Street	Skerce's garage	1940-1950	49m SW		
7889	384 Gilmour Street	Knight Auto Garage	1940-1956	84m N		
14310	9 James Street	Automotive repair garage	1948	20m N		
8871	487 Lewis Street	HVAC industry	1949	48m NE		

One off-site PCA, an automotive service garage (Activity ID 8262) was previously identified in the FIPs and directories. No new APECs were identified during the HLUI review. A copy of the HLUI response is provided in Appendix 2.

## 4.3 Physical Setting Sources

## **Aerial Photographs**

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals. Based on the review, the following observations have been made:

1928	The subject site appears to be occupied by two buildings, fronting Bank Street. Neighbouring properties have been developed for what appear to be commercial and residential purposes.
1950	Based on the scale and quality of this photograph, it is difficult to distinguish any significant changes to the subject site and neighbouring lands.
1958	(GeoOttawa) The subject site appears to have been redeveloped

with the present-day commercial building.

Report: PE4650-2 February 14, 2020

1969	No significant changes are apparent on the subject site. The properties to the northwest of the site have been developed with what appear to be residential apartment buildings. The properties to the west of the site have been cleared and are used as a parking lot. No other significant changes were made to the neighbouring properties. A retail fuel outlet can be seen on the southwest corner of Bank Street and James Street.
1978	The subject site remains unchanged from the previous photograph. The retail fuel outlet appears to have been removed, however the pump island/apron remains on-site. No other significant changes were made to the subject site or neighbouring properties.
1992	No other significant changes were made to the subject site or neighbouring properties.
2002	No significant changes were made to the subject site or neighbouring properties.
2017	The subject site and neighbouring lands appear unchanged from the previous photograph.

Laser copies of selected aerial photographs reviewed are included in Appendix 1.

## **Physiographic Maps**

The Ontario Geological Survey publication 'The Physiography of Southern Ontario, Third Edition' was reviewed as a part of this assessment. According to the publication, the site is situated within the Ottawa Clay Plain physiographic region.

## **Topographic Maps**

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. The topographic maps indicate that the regional topography in the general area of the site slopes down in a south/southeasterly direction. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

## **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock in the area consists of shale of the Billings Formation. The surficial

geology in the area of the site consists of alluvial sediments (fluvial terraces, sand and silt) with a drift thickness ranging from 10 to 25 m.

#### **Water Well Records**

A well record search was conducted on January 21, 2020 for all drilled wells within 250 m of the subject site. The search returned twenty-two (22) well records of which, nineteen (19) were monitoring wells and three (3) were abandoned wells.

The majority of these records were wells located 150 m or more away from the subject site. Based on the separation distance, the monitoring wells are not considered an environmental concern to the subject land.

Several monitoring wells were located within the immediate vicinity of the Phase I Property: five (5) located on Bank Street immediately north of James Street (366-382 Bank Street), two (2) on the adjacent property to the south (406 Bank Street) and one at 21 James Street, approximately 25 north of the subject land. The monitoring wells were drilled to depths ranging from 4.5 to 5.8 m below the ground surface. The stratigraphy in the immediate area of the Phase I Property consisted of sand and/or gravel, overlying a sandy silt/silty sand with some clay. No other information was provided in the well records. A copy of the well records has been included in Appendix 2.

#### **Areas of Natural Significance and Water Bodies**

No areas of natural significance or bodies of water were identified in the Phase I Study Area.

## 5.0 INTERVIEWS

#### **Property Owner Representatives**

Mr. Ron Wheatley, the current tenant of 394-404 Bank Street was interviewed on February 3, 2020, were interviewed during the site visits. Mr. Wheatley, who have been tenants in the buildings for more than 20 years, is not aware of any potential environmental concerns regarding the Phase I Property.

## 6.0 SITE RECONNAISSANCE

## 6.1 General Requirements

The site visits were conducted on February 3, 2020. Ms. Mandy Witteman from the Environmental Department of Paterson conducted the site assessments. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site visit.

## 6.2 Specific Observations at the Phase I Property

## **Buildings and Structures**

The Phase I Property addressed 394 – 404 Bank Street is occupied by a twostorey commercial office building with a basement level. The subject building was constructed circa 1956 with the present-day commercial building, with an exterior finish in concrete and flat style roof. The building is occupied by the Doyle Financial Group Inc.

#### Site Features

The subject building fronts Bank Street, occupying half of the lot, while the western portion of the site is an asphalt paved parking lot. Site topography is generally flat, while the regional topography slopes gently down in a southerly direction.

Site drainage consists primarily of sheet drainage in the paved areas which drain to catch basins along Bank Street and James Street.

The Phase I Property is situated in a municipally serviced area. Underground utility services on the property include natural gas, water and sewer services which enter the site from Bank Street.

No evidence of current or former railway or spur lines was observed on the subject property at the time of the site visit. No areas of stained pavement, stressed vegetation or unidentified substances were observed on-site at this time.

#### Interior Assessment

A general description of the interior of 394-404 Bank Street is as follows:
 Floor finishes consisted of a combination of poured concrete, ceramic tiles, vinyl tiles, terrazzo and carpet.
 Wall finishes consisted of concrete block, lathe and plaster and drywall.
 Ceilings were finished with suspended ceiling tiles, and steel decking and drywall.
 Lighting throughout the building is provided by fluorescent fixtures.
 Based on the age of the building (circa 1956) potentially asbestos containing

Based on the age of the building (circa 1956) potentially asbestos containing materials (ACMs) may be present in the subject building, including the vinyl floor tiles, drywall joint compound, suspended ceiling tiles, hard plaster walls and ceiling stipple. In general, all of the potential ACMs were in good condition. Lead-based paints may also be present on painted surfaces.

## **Fuel and Chemical Storage**

Both buildings are heated by natural gas fired equipment. No above ground storage tanks (ASTs), fuels or chemicals were observed in the subject buildings. No potential environmental concerns were identified in the interior of the subject buildings at the time of the assessment.

#### **Wastewater Discharge and Waste Management**

One floor drain in 394 Bank Street was noted and currently in use. The liquid discharged from the subject buildings included wash water and sewage from the buildings. The subject property discharges into the City of Ottawa sewer system. No sumps were observed in either buildings.

Waste generated at 394-404 Bank Street consisted of office waste (mostly paper). Waste was stored at the rear (west side) of the buildings. No concerns were noted regarding waste generation and/or storage on the Phase I Property.

## **Neighbouring Properties**

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection. Land use adjacent to the subject site is as follows:

North:	James Feed Pub (vacant), followed by James Street;
South:	Vacant land, followed by Florence Street;
East:	Bank Street, followed by a restaurant, Waverly Street and a retail store; and
West:	Commercial office buildings, followed by residences.

Land use within the Phase I Study Area (250 m radius) is primarily used for residential and commercial purposes with some institutional land use. No existing off-site PCAs were identified at the time of the site visit. Surrounding land use is shown on Drawing PE4650-4 – Surrounding Land Use Plan.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

## 7.1 Land Use History

The following tables indicate the current and past uses of the Phase I Property, as well as associated potentially contaminating activities dating back to the first developed use of the site based on the Chain of Title, Fire Insurance Plans, and aerial photographs.

Table 4: Land Use History – 394-404 Bank Street

2011-2020	Urban Capital (James Street) Inc.	Commercial	Retail store and office	Based on personal interview with former property owner and site visit.

## **Potentially Contaminating Activities**

Based on the historical review, historical potentially contaminating activities (PCAs) were identified on-site and off-site, resulting in areas of potential environmental concern (APECs) on the Phase I Property. As per Column A of Table 2 of the O.Reg. 153/04, as amended, the following on-and off-site PCAs that generate APECs on the Phase I Property are:

- □ PCA 39 "Paints Manufacturing, Processing and Bulk Storage," associated with a historical paint and oil store located on the Phase I Property (394 and 404 Bank Street); and
- □ PCA 30 "Importation of Fill Material of Unknown Quality" associated with the redevelopment of the Phase I Property in the mid 1950s; and

404 Bank Street; and

**Contaminants of Potential Concern** 

potential concern (CPCs) are:

	PCA 52 – "Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems," associated with a historical automotive service garage on the neighbouring property to the south at 406 Bank Street, now 19 Florence Street.			
separa	emaining off-site PCAs were not considered to result in APECs based on their ation distances and/or orientations (down or cross-gradient) with respect to bject land in combination of the underlying impermeable clay layer.			
	ff-site PCAs within the Phase I Study Area are identified in green on Drawing 50-4– Surrounding Land Use Plan.			
Areas of Potential Environmental Concern				
The a	The aforementioned historical PCAs have resulted in the following APECs:			

APEC 1: Resulting from former on-site paint and oil/varnish store at 396 and

APEC 2: Resulting from fill material of unknown quality, associated with the

APEC 3: Resulting from the former off-site automotive service garage

redevelopment of the site (394-404 Bank Street) in the 1950s; and

(greasing/oiling) located immediately south of the Phase I Property.

Based on the APECs identified on the Phase I Property, the contaminants of

Benzene, ethylbenzene, toluene and xylenes (BTEX);

Metals plus Mercury (Hg), and Hexavalent Chromium (CrVI)

Petroleum hydrocarbons (PHCs, Fractions F<sub>1</sub>-F<sub>4</sub>);

Volatile organic compounds (VOCs); and

## 7.2 Conceptual Site Model

## **Geological and Hydrogeological Setting**

According to the Geological Survey of Canada website, the bedrock in the area of the Phase I Property is reported to consist of shale of the Billings Formation. The overburden is reported to consist of alluvial sediments (sand and silt) of depths ranging from 10 to 25 m over the entire site.

According to the Geological Survey of Canada website, the bedrock in the area of the Phase I Property is reported to consist of shale of the Billings Formation. The overburden is reported to consist of alluvial sediments (sand and silt) of depths ranging from 10 to 25 m over the entire site.

#### Fill Placement

Based on the findings of the LRL Associates (January 2011), some impacted may be present on-site. It is expected that that fill material associated with the demolition of the former buildings and/or redevelopment of the Phase I Property in the 1950s may be present on-site.

## Water Bodies and Areas of Natural Significance

No areas of natural significance or water bodies were identified on the Phase I Property or within a 250 m search radius.

## **Drinking Water Wells**

There are no potable water wells on the Phase I Property.

#### **Existing Buildings and Structures**

The present-day commercial building addressed 394- 404 Bank Street was constructed circa 1956. The subject building is a two-storey building with basement level (poured concrete). The exterior is finished in concrete with a flat style roof. The building has been used primarily for retail until the late 1990s followed by commercial office space. The building is heated with natural gas-fired equipment. No other buildings or structures are present on the Phase I Property.

#### **Subsurface Structures and Utilities**

The Phase I Property is situated in a municipally serviced area. Underground utility services on the subject land include natural gas, electricity, municipal water and

sewer services. Theses services enter the Phase I Property from the west side of the site from James Street.

## **Neighbouring Land Use**

Neighbouring land use in the Phase I Study Area consists of residential and commercial (offices, cafes, and retailers) properties.

## Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of this report, two (2) PCAs are considered to result APECs on the Phase I Property.

These APECs are summarized in Table 5, along with their respective locations and contaminants of potential concern (CPCs) on the Phase I Property.

Table 5: Potentially Contaminating Activities and						
Areas of Potential Environmental Concern						
Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern	Potentially Contaminating Activity	Location of PCA (on-site or off- site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)	
APEC 1: Resulting from former on-site paint and oil store	Eastern half of the Phase I Property	PCA 39 – Paints Manufacturing, Processing and Bulk Storage	On-site	VOCs  Metals (Mercury CrVI)	Soil, Groundwater Soil	
APEC 3: Resulting from fill material of unknown quality	Western portion of the Phase I Property	PCA 30 – Importation of Fill Material of Unknown Quality	On-site	Metals (Mercury CrVI)	Soil	
APEC 2: Resulting from former off-site automotive repair garage	Southern portion of the Phase I Property	PCA 52 – Storage, maintenance, fuelling and repairing of equipment, vehicles, and materials used to maintain transportation systems	Off-site	BTEX PHCs	Soil, Groundwater	

As previously discussed in Section 7.1 and shown on Drawing PE4650-4-Surrouding Land Use Plan. The remaining off-site PCAs have either been addressed in a previous Phase I & II ESA (390 Bank Street) or determined to be significantly far enough away from the Phase I Property, and as such, are not considered to represent APECs on the Phase I Property.

#### **Contaminants of Potential Concern**

As per the APECs identified in Section 7.1, the contaminants of potential concern (CPCs) in soil and/or groundwater include:

Benzene, ethylbenzene, toluene and xylenes (BTEX);
Petroleum hydrocarbons (PHCs, Fractions F <sub>1</sub> -F <sub>4</sub> );
Volatile organic compounds (VOCs); and
Metals including Mercury and Hexavalent Chromium

The CPCs are expected to be present in the soil and/or groundwater of the Phase I Property.

## Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I- ESA is considered to be sufficient to conclude that there are historical on-site and off-site PCAs that have resulted in APECs on the Phase I Property.

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## 8.0 CONCLUSIONS

#### 8.1 Assessment

Paterson Group was retained by Urban Capital Property Group to conduct a Phase I-Environmental Site Assessment (ESA) for the property located at 394 - 404 Bank Street, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the subject site and the Phase I Study Area and to identify any environmental concerns with the potential to have impacted the Phase I Property.

According to the historical research, the Phase I Property was initially developed prior 1890 for residential purposes, followed by paint shop addressed 396 and 404 Bank Street from 1901 to 1960s. Sometime in the mid1950s, the subject site was redeveloped with the present-day building, which was used for retail stores until the late 1990s. Since the early 2000s, the subject land has been used as commercial office space, readdressed 294-404 Bank Street. Based on the historical development and use of the site two (2) on-site potentially contaminating activities (PCAs) – former paint shops and fill material of unknown quality are identified and considered to represent areas of potential environmental concern (APECs) on the Phase I Property.

The historical use of the surrounding lands consisted of several potentially contaminating activities (PCAs), however, based on orientation and/or separation distances in combination with information contained within our files, primarily regarding 350 Bank Street (former retail fuel outlet), these off-site PCAs are not considered to represent APECs on the Phase I Property, with the exception of the former automotive repair garage immediately south of the Phase I Property. The former use of the adjacent property (automotive repair garage), addressed 406<sup>1/2</sup> Bank Street (now 19 Florence Street) represents an APEC on the Phase I Property.

Following the historical research, site visits were conducted. The Phase I Property is currently occupied by a two-storey commercial building used as offices. Neighbouring land use in the Phase I Study Area consists of residential and commercial (retailers and restaurants). No PCAs were noted with the current use of the Phase I Property or the Study Area.

Based on our findings, three (3) PCAs were identified to result in APECs on the Phase I Property: a former on-site paint and oil stores formerly addressed 396-404 Bank Street (now 394 – 404 Bank Street), fill material of unknown quality at 393 – 404 Bank Street, and a former off-site automotive service garage (greasing/oiling) located immediately south of the Phase I Property at 406½ Bank Street (now 19 Florence Street).

These PCAs were identified and considered to represent APECs on the Phase I Property.

## 8.2 Recommendations

Based on our findings of the assessment, it is our opinion that a Phase II-Environmental Site Assessment is required for the subject property.

Based on the age of the subject building, potentially asbestos containing materials (ACMs) maybe present, including the vinyl floor tiles, drywall joint compound, suspended ceiling tiles, plaster walls, ceiling stipple and plaster finishes. Lead-based paints may also be present on painted surfaces.

It is our understanding that the subject buildings will be demolished in conjunction with future redevelopment. Prior to any demolition activities, a designated substance survey (DSS) must be conducted for the existing structure, in accordance with Ontario Regulation 490/09 under the Occupational Health and Safety Act.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01. The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Urban Capital Property Group. Permission and notification from Urban Capital Property Group and Paterson will be required to release this report to any other party.

Sent via email [mwitteman@patersongroup.ca]

Dear Ms. Witteman,

Re: Information Request

390 Bank Street, Ottawa, Ontario ("Subject Property")

#### **Internal Department Circulation**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

 No information was returned on the Subject Property from Departmental circulation.

#### **Search of Historical Land Use Inventory**

This acknowledges receipt of the signed Disclaimer regarding your request for information from the City's Historical Land Use Inventory (HLUI 2005) database for the Subject Property.

A search of the HLUI database revealed the following information:

• There is one activity associated with the Subject Property: Activity Number 7770.

The HLUI database was also searched for activity associated with properties located within 250m of the Subject Property. The search revealed the following:

There are 141 activities associated with properties located within 250m of the Subject Property: Activity Numbers 4781, 8747, 12352, 12835, 2210, 9969, 10850, 15007, 9806, 10850, 15007, 3803, 9013, 13969, 8671, 6776, 2783, 3894, 4682, 5717, 384, 13847, 1375, 13939, 10436, 4690, 1053, 2210, 6656, 792,

Shaping our future together
Ensemble, formons notre avenir

Please note that Activity Numbers 7770, 4781, 2210, 10850, 9013, 13939, 10436, 4690, 2210, 13685, 10166, 9788, 5808, 12915, 9506, 3461, 4692, 3321, 5129, 7459, 1017, 6966, 9836, 2924, 14467 have a PIN Certainty of "2". This identifier acknowledges that there is some uncertainty about the exact location of the land use activity and that the activity may or may not have been located on the Subject Property. All database entries with a PIN Certainty of "2" require independent verification as to their precise location.

A site map has been included to show the location of the Subject Property as well as the location of all the activities noted above, including the HLUI database's location of the Activity Numbers with a PIN Certainty of "2".

Additional information may be obtained by contacting:

#### **Ontario's Environmental Registry**

The Environmental Registry found http://www.ebr.gov.on.ca/ERS-WEBat "public notices" about External/ contains environmental matters being government ministries covered by the Environmental Bill of proposed by all Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the Ministry, keywords, notice types, Notice Status, Acts, following categories: Instruments and published date (all years).

#### The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House 161 Elgin Street 4th Floor Ottawa ON K2P 2K1 Tel: (613) 239-1230 Fax: (613) 239-1422

Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.

Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.

Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.

If you have any further questions or comments, please contact Eric Steele at 613-580-2424 ext. 21690 or HLUI@ottawa.ca

Sincerely,

Eric Steele

#### Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Ministry District: Court Location: **Publication City:** 

**Publication Title:** Act: Act(s): First Matter: Second Matter: Investigation 1: Investigation 2: Penalty Imposed: Description:

Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and

Order No: 20200205812

Enforcement Branch.

Investigation 2: Penalty Imposed: Description:

On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the

Act: Act(s): First Matter: Second Matter: Investigation 1: Investigation 2: Penalty Imposed: Description:

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or

Ministry District:

into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to

# Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

#### Abandoned Aggregate Inventory:

Provincial

AGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

Government Publication Date: Sept 2002\*

Aggregate Inventory:

Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2019

#### Abandoned Mine Information System:

Provincial

**AMIS** 

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

#### Anderson's Waste Disposal Sites:

Private

**ANDR** 

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

# Aboveground Storage Tanks:

Provincial

AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

# **Automobile Wrecking & Supplies:**

Private

**AUWR** 

Order No: 20200205812

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jul 31, 2019

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011\*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2017

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or

diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

<u>Chemical Register:</u> Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jul 31, 2019

#### **Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 - Nov 2019

### Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

Order No: 20200205812

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

Government Publication Date: Apr 1987 and Nov 1988\*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2019

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Dec 31, 2019

<u>Drill Hole Database:</u>

Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2019

### Environmental Activity and Sector Registry:

**EASR** 

Provincial

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011-Dec 31, 2019

Provincial **Environmental Registry: EBR** 

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Dec 31, 2019

# **Environmental Compliance Approval:**

Provincial **FCA** 

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Dec 31, 2019

#### **Environmental Effects Monitoring:**

Federal **EEM** 

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007\*

Private ERIS Historical Searches: **EHS** 

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Oct 31, 2019

### **Environmental Issues Inventory System:**

Federal

FIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001\*

### Emergency Management Historical Event:

Provincial

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

# **Environmental Penalty Annual Report:**

Provincial

**EPAR** 

Order No: 20200205812

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2018

#### List of Expired Fuels Safety Facilities:

Provincial

XP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007

#### Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-Nov 2019

# Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

**FED TANKS** 

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

# Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2018

Fuel Storage Tank:

Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

# Fuel Storage Tank - Historic:

Provincial

**FSTH** 

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010\*

# Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Order No: 20200205812

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2019

#### **Greenhouse Gas Emissions from Large Facilities:**

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2017

TSSA Historic Incidents:

Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009\*

#### Indian & Northern Affairs Fuel Tanks:

ederal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003\*

Fuel Oil Spills and Leaks:

Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

### **Landfill Inventory Management Ontario:**

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009\*

Mineral Occurrences:

Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Jan 2019

# National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

Order No: 20200205812

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994\*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2018

# National Defense & Canadian Forces Fuel Tanks:

Federal

**NDFT** 

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001\*

#### National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

# National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007\*

#### National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Dec 31, 2019

# National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003\*

# National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends 'which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003\*

National PCB Inventory:

Federal

**NPCB** 

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008\*

# National Pollutant Release Inventory:

Federal

NPRI

Order No: 20200205812

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Aug 31, 2019

Ontario Oil and Gas Wells:

Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jun 2019

### **Inventory of PCB Storage Sites:**

Provincial

**OPCB** 

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Dec 31, 2019

<u>Canadian Pulp and Paper:</u> Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

# Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005\*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Dec 2019

Provincial PINC Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

# Private and Retail Fuel Storage Tanks:

Provincial

PRT

Order No: 20200205812

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996\*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Dec 31, 2019

#### Ontario Regulation 347 Waste Receivers Summary:

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system

Provincial

or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Provincial Record of Site Condition: **RSC** 

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Nov 2019

Private Retail Fuel Storage Tanks: **RST** 

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jul 31, 2019

#### Scott's Manufacturing Directory:

Private

**SCT** 

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011\*

Ontario Spills: Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2019

### Wastewater Discharger Registration Database:

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2017

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953\*

# Transport Canada Fuel Storage Tanks:

Federal

TCFT

Order No: 20200205812

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2018

#### Variances for Abandonment of Underground Storage Tanks:

Provincial

VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2017

#### Waste Disposal Sites - MOE CA Inventory:

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: 2011-Dec 31, 2019

### Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990\*

#### Water Well Information System:

Provincial

**WWIS** 

Order No: 20200205812

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Feb 28, 2019

# **Definitions**

<u>Database Descriptions:</u> This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

<u>Detail Report</u>: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

<u>Distance:</u> The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

<u>Direction</u>: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

<u>Elevation:</u> The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Order No: 20200205812
