EXECUTIVE SUMMARY

Assessment

Paterson Group was retained by Claridge Homes to conduct a Phase I-Environmental Site Assessment (ESA) for the properties addressed 2502 & 2510 St. Laurent Boulevard, 1890, 1900 & 1920 Walkley Road, 2425 Don Reid Drive and 2990 & 3000 Conroy Road, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and 250m Phase I Study Area, and to identify any environmental concerns with the potential to have impacted the subject land.

According to the historical research, various portions of the Phase I Property (2510 St. Laurent Boulevard, 2425 Don Reid Drive, 1900 Walkley Road and 3000 Conroy Road) were first developed circa 1990 for commercial/office purposes and remained as such until 2006/2007 when the on-site buildings were demolished. The Phase I Property has remained vacant since that time. It should be noted that the 2510 St. Laurent Boulevard portion of the Phase I Property was listed as a commercial printer from 1992 to 2005 and the 3000 Conroy property was listed as a medical facility in 1990.

A total of seven on-site historical PCAs were identified on the Phase I Property. A former printer was identified as a historical PCA on the portion of the Phase I Property addressed 2510 St. Laurent Boulevard and a former medical facility was identified on the portion of the Phase I Property addressed 3000 Conroy Road. The presence of fill material of unknown quality was considered to be identified across the entire Phase I Property. Four separate areas where road salt was historically applied were identified as four separate PCAs for the application of road salt (2510 St. Laurent Boulevard, 2425 Don Reid Drive to 1900 Walkley Road and 3000 Conroy Road). The eight on-site identified PCAs result in eight APECs on the Phase I Property. In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for the aforementioned APEC.

Based on available historical information neighbouring properties within the Phase I Study Area were developed with a combination of residential dwellings (Walkley Road as early as 1930) and commercial (primarily office space) use. Various off-site historical PCAs were identified within the Phase I Study Area but are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientations relative to the Phase I Property.

Following the historical research, a site visit was conducted. No buildings or permanent structures are present on the Phase I Property. A concrete sign with an Ottawa Business Park name plate is present on the northwest portion of the Phase I Property. The northeast portion of the Phase I Property is occupied by an asphaltic concrete access lane (part of the parking lot that is used by the adjacent business to the northwest). The remainder of the Phase I Property consists of primarily of vacant/treed land, with various gravel patches (in the footprint of the former buildings) and a few asphaltic concrete access lanes along the perimeter. The application of road salt on the in-use asphaltic concrete access lane present on the northeast portion of the Phase I Property (1990 Walkley Road 2990 Conroy Road) was identified as a PCA that results in an APEC on the Phase I Property. In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for the aforementioned APEC.

The current uses of the adjacent and neighbouring properties within the Phase I Study Area include a combination of residential and commercial uses. The presence of a retail fuel outlet at 1970 Walkley Road is a PCA that represents an APEC on the Phase I Property.

Recommendations

Based on the findings of the Phase I ESA, it is **our opinion that a Phase II-Environmental Site Assessment is required for the Phase I Property.**

1.0 INTRODUCTION

At the request of Claridge Homes, Paterson Group (Paterson) conducted a Phase I-Environmental Site Assessment (Phase I-ESA) for the properties addressed 2502 & 2510 St. Laurent Boulevard, 1890, 1900 & 1920 Walkley Road, 2425 Don Reid Drive and 2990 & 3000 Conroy Road, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and properties within the Phase I Study Area to identify any potentially contaminating activities (PCAs) that would result in areas of potential environmental concern (APECs) on the subject land.

Paterson was engaged to conduct this Phase I-ESA by Mr. Vincent Denomme with Claridge Homes. Their head office is located at 210 Gladstone Avenue, Ottawa, Ontario.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared in general accordance with Ontario Regulation (O.Reg.) 153/04, as amended, under the Environmental Protection Act, and complies with the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

2.0 PHASE I PROPERTY INFORMATION

Address: 2502 & 2510 St. Laurent Boulevard, 1890, 1900 & 1920 Walkley Road, 2425 Don Reid Drive and 2990 & 3000 Conroy Road, Ottawa, Ontario

Legal Description: Part of Lot 1 and Lot A, Concession 4, in the City of Ottawa.

Location: The Phase I Property is located on the southeast quadrant of the Walkley Road and Don Reid Drive intersection, in the City of Ottawa, Ontario. For the purposes of this report, Walkley Road is assuming to run east-west. Refer to Figure 1 - Key Plan in the Figures section following the text.

Latitude and Longitude: 45° 22' 53" N, 75° 37' 51" W

Site Description:

Configuration: Irregular

Area: 5.61 ha (approximate)

Zoning: GM – General Mixed-Use Zone

Current Use: The Phase I Property is primarily vacant land with a paved roadway along the northeast property boundary.

Services: The Phase I Property is situated in a municipally serviced area.

3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject properties, and if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of O.Reg. 153/04, as amended, under the Environmental Protection Act, and in compliance with the requirements of CSA Z768-01 (reaffirmed 2016);
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

4.0 RECORDS REVIEW

4.1 General

Phase I-ESA Study Area Determination

A radius of approximately 250m was determined to be appropriate as a Phase I Study Area for this assignment. Properties outside the 250m radius are not considered to have impacted the subject land, based on their significant distance from the site.

First Developed Use Determination

Based on the historical information available for review and for the purposes of this report, the Phase I Property is considered to have been first developed for commercial/office purposes circa 1990.

Fire Insurance Plans

Fire Insurance Plans (FIPs) are not available for the Phase I Property or properties within the Phase I Study Area.

City of Ottawa Street Directories

City directories for the Phase I Property and neighbouring properties in the Phase I Study Area were reviewed in approximate ten (10) year intervals, between 1930 and 2011.

The portions of Phase I Property addressed 3000 Conroy Road and 1900 Walkley Road were first listed in 1990 as a medical facility (Cyber Medix Health Services) and a radio station (CFMO & CFRA), respectively. The portion of the Phase I Property addressed 2425 Don Reid Drive was first listed in 1990 as office space for various businesses. The portion of the Phase I Property addressed 2510 St. Laurent Boulevard was first listed as a printer (The Runge Press Ltd.) in 1992 and a second printer (Lowe-Martin Company Inc.) was listed in 1993. The listings for the various parcels of the Phase I Property remained the same until 2006/2007, at which point no more parcels were listed and the site was vacant (as all on-site buildings had been demolished). The remaining portions of the Phase I Property were not listed (as they were never developed).

Neighbouring properties in the Phase I Study Area were historically listed as residential dwellings (Walkley Road as early as 1930) and commercial (primarily office space) use.

Potentially contaminating activities (PCAs) identified from a review of the City Directories are listed in Table 1.

Table 1 - Potentially Contaminating Activities - City Directories Review					
Listing	Address	Approx. Distance from Phase I Property	Years Listed	Potentially Contaminating Activity	Represents an Area of Potential Environmental Concern (Y/N)
The Runge Press Ltd.	2510 St. Laurent Boulevard	On-Site	1992	Former Printers	Y
Lowe Martin Company Inc.	2510 St. Laurent Boulevard	On-Site	1993, 2005	Former Printers	Y
Cyber Medix Health Services	3000 Conroy Road	On-Site	1990	Former Medical Facility	Y
On The Run Esso	1970 Walkley Road	30 m N	2006/2007, 2011	Existing Retail Fuel Outlet	Y

The historical use of the portion of the Phase I Property addressed 2510 St. Laurent Boulevard as a commercial printer and the portion of the Phase I Property addressed 3000 Conroy Road as a medical facility are PCAs that represent areas of potential environmental concern (APECs) on the Phase I Property. The existing retail fuel outlet at 1970 Walkley Road, approximately 30 m north of the Phase I Property is a PCA that results in an APEC on the Phase I Property.

The locations of the aforementioned PCAs are depicted on Drawing PE5607-2 - Surrounding Land Use Plan.

Chain of Title

Given the available information, it was determined that the results of a chain of title search would not contribute to the environmental assessment for the Phase I Property. Therefore, a chain of title search was not completed as part of this assessment.

Previous Environmental Reports

- “Phase I Environmental Site Assessment, 2425 Don Reid Drive, Ottawa, Ontario”, prepared by ADAMAS Environmental Inc., dated May, 1995.

A Phase I ESA was conducted on the portion of the Phase I Property addressed 2425 Don Reid Drive in May of 1995. At the time of the assessment the property consisted of a one-storey office/warehouse building and was occupied by the Canadian Association of Fire Chiefs and Geo Bolton Electrical Work. The Canadian Association of Fire Chiefs used

the building exclusively for office space, whereas Geo Bolton Electrical Work utilized both the warehouse and office space. The warehouse was used for the storage of a variety of electrical type equipment and supplies. The Phase I ESA did not identify any environmental concerns with regard to the Phase I Property or the surrounding lands.

- “*Borehole Investigation for Proposed Retail, 2510 St. Laurent Boulevard, Ottawa, Ontario*”, prepared by Toronto Inspection Ltd., dated May 2, 2003.

A borehole investigation was conducted on the portion of the Phase I Property addressed 2510 St. Laurent Boulevard in March of 2003. The investigation consisted of four boreholes drilled in the pavement area to the north and east of the existing building. Monitoring wells were installed in the two boreholes present on the southeast portion of the 2510 St. Laurent Boulevard property. Groundwater samples were submitted for analysis of total petroleum hydrocarbons (TPHs) and volatile organic compounds (VOCs). Test results were compared to and comply with the Ministry of the Environment Table B for Non-Potable Groundwater Standards. However, trichloroethene (trichloroethylene) close to the detection limit, was present in the groundwater samples. The trichloroethene concentration recorded in the groundwater sample from BH 301 (furthest south) would be in excess of the current MECP Table 3 Residential Standard.

- “*Borehole Investigation, 3000 Conroy Road, Ottawa, Ontario*”, prepared by Toronto Inspection Ltd., dated June 17, 2003.

A borehole investigation was conducted on the portion of the Phase I Property addressed 3000 Conroy Road in May of 2003. The investigation consisted of five boreholes drilled to the west and south of the former building. Soil samples were submitted for analysis of metals, total petroleum hydrocarbons (TPHs) and volatile organic compounds (VOCs). Test results complied with the Ministry of the Environment Table B Commercial Land Use criteria. However, The cobalt and vanadium concentrations recorded in the soil samples submitted from BH1 (0.8 mbgs) and BH3 (0.8 mbgs) would be in excess of the current MECP Table 3 Residential Standards. These exceedances would however be considered to be naturally occurring elevated levels in Champlain Sea Clay deposits within the Ottawa region.

- “Geotechnical *Investigation, Proposed Commercial Development, Walkley Road, Ottawa, Ontario*”, prepared by Toronto Inspection Ltd., dated December 22, 2004.

A summary of the previous borehole investigations conducted on the Phase I Property was prepared in December 2004. The investigation lists a total of 27 boreholes drilled throughout the Phase I Property ranging in depth from 3.7 to 14.3 meters below ground surface. The general stratigraphy reported in the associated borehole logs consists of topsoil or pavement, followed by fill material (in various areas) consisting of sand, silt and/or clay with scattered topsoil and occasionally wood pieces, underlain by silty clay. Bedrock was not confirmed in any of the boreholes. Static water levels were not recorded on the well records. The locations of the former boreholes are depicted on Drawing PE5607-1 - Site Plan.

4.2 Environmental Source Information

Environment Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on February 1, 2022. No records were found in the NPRI database for properties within the Phase I Study Area.

PCB Inventory

A search of provincial PCB waste storage sites was conducted as part of this assessment. No PCB waste storage sites were identified on the Phase I Property. One record was identified for the property addressed 2455 St. Laurent Boulevard, approximately 130 m southeast of the Phase I Property. The record lists “Warner’s” as the occupant and was listed in 1995 as having up to 80 kg of capacitors with high level PCBs (>1000 ppm). Based on its separation distance and cross-gradient orientation with respect to the Phase I Property, this PCB site is not considered to have had the potential to impact the Phase I Property.

Areas of Natural Significance

A search for areas of natural significance and features within the Phase I Study Area was conducted on the website of the Ontario Ministry of Natural Resources (OMNR) on February 4, 2022. The search did not reveal any areas of natural significance within the Phase I Study Area.

Ministry of the Environment, Conservation and Parks Freedom of Information Request

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the properties. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Instruments

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Waste Management Records

A request was submitted to the MECP FOI office for information with respect to waste management records. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Submissions

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the Phase I Property. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Incident Reports

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, inspections maintained by the MECP for Phase I Property or neighbouring properties. At the time of issuing this report, a response had not been received from the MECP. A copy of the response will be forwarded to the client if it contains any pertinent information.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted as part of this assessment for the site, neighbouring properties and the

general area of the site. No records of site condition (RSCs) have been filed for the Phase I Property or the properties within the Phase I Study Area.

MECP Waste Disposal Site Inventory

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no former waste disposal sites located within the Phase I Study Area.

Technical Standards and Safety Authority (TSSA)

The TSSA, Fuels Safety Branch in Toronto, was contacted electronically on February 4, 2022 to inquire about current and former underground/aboveground storage tanks, spills, and incidents for the subject and neighbouring properties. No TSSA records were reported for the Phase I Property. Various records were identified for the property addressed 1970 Walkley Road (30 m north) pertaining to a self serve retail fuel outlet, active liquid fuel tanks, a cylinder exchange and an expired (split serve) private fuel outlet. These records contribute to the determination that the 1970 Walkley Road property facility is a PCA that represents an APEC on the Phase I Property.

City of Ottawa Landfill Document

The document prepared by Golder Associates entitled "Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa", was reviewed. No former landfills were identified within the Phase I Study Area.

Former Industrial Sites

The report entitled "Mapping and Assessment of Former Industrial Sites, City of Ottawa" by Intera Technologies Limited was also reviewed. The Intera report did not identify any former industrial sites within the Phase I Study Area.

City of Ottawa Historical Land Use Inventory (HLUI)

A request for a search of the City of Ottawa's Historical Land Use Inventory (HLUI) database was submitted to the City of Ottawa. A response had not been received at the time of issuing this report. A copy of the search results will be forwarded to the client upon receipt. A copy of the HLUI request form is provided in Appendix 2.

Environmental Risk Information Service (ERIS) Report

An Environmental Risk Information Services (ERIS) report for the Phase I Property and surrounding lands was acquired and reviewed as part of this assessment. It should be noted that the ERIS report includes information that would normally be obtained through the MECP FOI, MECP well records search as well as several other records (i.e., incident reports, waste generators, etc.). The complete ERIS report has been included in Appendix 1. The ERIS search identified 21 records for the Phase I Property.

The ERIS report identified 15 waste generator records (dated from 1990 to 2006) for the Phase I Property, all of which pertain to the properties addressed 2510 St. Laurent Boulevard or 3000 Conroy Road and their historic function as a printers and medical facility, respectively. The records that pertain to the 2510 St. Laurent Boulevard property list various waste classes (waste oils and lubricants, aliphatic solvents, photoprocessing wastes, etc.) and contribute to the determination that the historic use of the 2510 St. Laurent Boulevard property represents an APEC on the Phase I Property. The records that pertain to the 3000 Conroy Road property list pathological wastes and organic laboratory chemicals as waste generators and contribute to the determination that the historic use of the 3000 Conroy Road property represents an APEC on the Phase I Property. One additional waste generator record was identified for the portion of the Phase I Property addressed 2425 Don Reid Drive, no pertinent information is contained in the record and it is our opinion that this record does not represent a potential environmental concern on the Phase I Property.

The ERIS report identified three Scott's Manufacturing Directory records for the portion of the Phase I Property addressed 2510 St. Laurent Boulevard which pertain to its historic function as a commercial printer. The presence of these records contributes to determination that the historic use of the 2510 St. Laurent Boulevard property represents an APEC on the Phase I Property.

The ERIS report identified one certificate of approval, one environmental compliance approval and one environmental registry record for the portion of the Phase I Study Property addressed 2510 St. Laurent Boulevard. The records are limited to air works and are not considered to pose an environmental risk to the Phase I Property.

A total of 202 records (including 35 historical ERIS searches) from various databases were identified in the ERIS search within the 250 m radius of the Phase I Property.

The ERIS report identified nine various fuel storage tank related records for the property addressed 1970 Walkley Road, approximately 30 m north of the Phase I Property. The record pertains to the function of the 1970 Walkley Road property as a (existing) retail fuel outlet. The records list four double wall liquid fuel USTs installed in 2000, that were active as of February 2006. These records contribute to the determination that the 1970 Walkley Road property is a PCA that represents an APEC on the Phase I Property.

The ERIS report identified two National Pollutant Release Inventory (NPRI) records for properties within the Phase I Study Area. A record for the property addressed 2465 St. Laurent Boulevard, approximately 130 m southeast of the Phase I Property, was identified for JDS Uniphase Corporation and their function as a semiconductor and other electronic component manufacturing business. The second NPRI record pertains to the property addressed 2020 Walkley Road, approximately 60 m east of the Phase I Property, once again for JDS Uniphase Inc. the presence of records are considered to represent PCAs. However, due to their respective separation distances and/or cross-gradient orientation with respect to the Phase I Property, these PCAs are not considered to represent APECs.

The ERIS report identified 16 Scott's Manufacturing Directory records for the properties within the Phase I Study Area. The closest of which correspond to the properties addressed 2520 St. Laurent Boulevard, adjacent to the southwest of the Phase I Property, 2525 St. Laurent Boulevard, approximately 20 m south of the Phase I Property and 2430 Don Reid Drive, approximately 20 m west of the Phase I Property. Based on information contained in these records and observations made at the time of the site visit, it is our opinion that these properties act solely as the office space for the businesses associated with these records and do not represent an environmental concern to the Phase I Property.

A record was identified for the property addressed 2410 Don Reid Drive, approximately 20 m west of the Phase I Property for Swish Maintenance Limited. The record identifies the 2410 Don Reid Property as a chemical distributor (cleaning products). Although the 2410 Don Reid Drive property is located 20 m west of the Phase I Property, the likely location of the stored chemical material is closer to 55 m west of the Phase I Property (based on aerial photographs). Therefore, the presence of this Scott's Manufacturing Directory Record is considered a PCA that does not result in an APEC on the Phase I property. The remaining Scott's Manufacturing Directory records are associated with PCAs identified within the Phase I Study Area, however, due to their respective separation distances (minimum of 60 m) and cross/down-gradient orientation with

respect to the Phase I Property these PCAs are not considered to represent APECs.

The ERIS report identified 9 Ontario Spills within the Phase I Study Area. The nearest record of note pertains to a gasoline spill to a catch basin at Walkley Road and Don Reid Drive, approximately 10 m northwest of the Phase I Property. The remaining spill records consist primarily of minimal oil and gas leaks occurring at properties a minimum of 20 m from the Phase I Property. Based on their respective separation distances and/or cross/down-gradient orientation with respect to the Phase I Property and the nature of these spills, they are not considered to represent an environmental risk to the Phase I Property.

The ERIS report identified 100 waste generator records for properties within the Phase I Study Area. Several waste generator records are associated with properties addressed 2515 St. Laurent Boulevard (20 m south), 1970 Walkley Road (30 m north), 2935 Conroy Road (60 m east) as a former clothing warehouse, existing retail fuel outlet, electrical equipment and component manufacturer, respectfully. The waste classes documented include light fuels, inorganic pathological wastes, waste oils and lubricants, oil skimmings and solvents, etc. These records contribute to the determination that the 1970 Walkley Road property is a PCA that represents an APEC on the Phase I Property. The remaining waste generator records are either not considered to represent a PCA based on their listed description or are associated with PCAs identified within the Phase I Study Area, however, due to their respective separation distances and cross/down-gradient orientation with respect to the Phase I Property these PCAs are not considered to represent APECs.

The ERIS report identified 23 certificates of approval, environmental compliance approval and environmental registry records for properties within the Phase I Study Area. The records are limited to sewer, water and air works and are not considered to pose an environmental risk to the Phase I Property.

4.3 Physical Setting Sources

Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals. Based on the review, the following observations have been made:

1965 (City of Ottawa) The Phase I Property is a vacant agricultural field. Surrounding properties are also vacant fields, with the exception of

residential dwellings to the north. Walkley Road and Conroy Road are present at this time.

- 1976 (City of Ottawa) No significant changes are apparent with respect to the Phase I Property. Commercial development has occurred to the east of the Phase I Property.
- 1993 The Phase I Property has been developed with four assumed commercial buildings. A commercial building has been developed adjacent to the southwest of the Phase I Property. Further commercial development has occurred surrounding the Phase I Property. St. Laurent Boulevard and Don Reid Drive are present at this time.
- 2002 (City of Ottawa) No significant changes are apparent with respect to the Phase I Property. Two commercial buildings have been developed on the properties adjacent to the northeast of the Phase I Property. A retail fuel outlet has been developed approximately 30 m north of the Phase I Property.
- 2007 (City of Ottawa) All buildings on the Phase I Property have been demolished and the property remains vacant. No significant changes are apparent with respect to the neighbouring properties.
- 2019 (City of Ottawa) No significant changes are apparent with respect to the Phase I Property or the neighbouring properties. Commercial development has begun on the property adjacent to the southeast of the Phase I Property.

Copies of selected aerial photographs reviewed are included in Appendix 1.

Physiographic Maps

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website. According to this physiographic map, the site is located in the St. Lawrence Lowlands. According to the mapping description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.” The Phase I Property is located in the Central St. Lawrence Lowland, which is generally less than 150 m above sea level.

Topographic Maps

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. The topographic maps indicate that the regional topography in the general area of the Phase I Property slopes down towards the east. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Geological Maps

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock in the area of the site consists of shale of the Carlsbad Formation. Based on the maps, the surficial geology consists of offshore marine sediments with an overburden thickness ranging from 5 to 15 m.

Water Well Records

A well record search was conducted on February 4, 2022, for all drilled wells within the Phase I Study Area. No potable well records were identified for the Phase I Property or properties within the Phase I Study Area.

5.0 INTERVIEWS

Personal Interviews

Mr. Vincent Denomme with Claridge Homes was interviewed via e-mail correspondence as part of this assessment. Mr. Denomme indicated that the former buildings on the Phase I Property were used for office/commercial purposes. Mr. Denomme stated that he is unaware of any environmental concerns with regard to the Phase I Property.

6.0 SITE RECONNAISSANCE

6.1 General Requirements

A site visit was conducted on February 7, 2022, by Mr. Jeremy Camposarcone with the Environmental Department of Paterson Group. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were assessed at the time of the site visit from publicly accessible areas.

6.2 Specific Observations at the Phase I Property

Buildings and Structures

No buildings or permanent structures are present on the Phase I Property.

Subsurface Structures and Utilities

The Phase I Property is situated in a municipally serviced area. Based on the Phase I Property being snow covered at the time of the site inspection, a full analysis of surface conditions could not be completed.

Site Features

A concrete sign with an ‘Ottawa Business Park’ name plate is present on the northwest portion of the Phase I Property. The northeast portion of the Phase I Property is occupied by an asphaltic concrete roadway (part of the parking lot that is used by the adjacent business to the northeast). The remainder of the Phase I Property consists primarily of vacant/treed land, with various gravel patches (in the footprints of the former buildings) and a few asphaltic concrete access lanes along the perimeter. At the time of the site visit, no visual or olfactory evidence of contamination were noted.

Site drainage typically occurs through infiltration and sheet flow to catch basins located along adjacent roadways and parking areas. The Phase I Property is relatively flat and at grade with the adjacent roadways, whereas the regional topography slopes down to the east. Groundwater within the Phase I Study Area is generally expected to flow towards the east.

No underground structures, drains, pits or sumps were observed on the exterior of the Phase I Property during the site visit. No potable wells were observed onsite, nor are any expected to be present, as the site is located in a municipally serviced area. Although no monitoring wells were observed at the time of the site visit, it is possible that some existing wells may still remain on the Phase I Property from previous investigations.

No signs of stressed vegetation, surficial staining or evidence of fill material were noted on the Phase I Property. It should be noted that certain portions of the Phase I Property were snow covered at the time of the site visit. Based on the Phase I Property being snow covered at the time of the site inspection, a full analysis of surface conditions could not be completed. Site features identified at the time of the site visit are presented on Drawing PE5607-1 – Site Plan, provided in the Figures section following the text.

Potential Environmental Concerns

Fuels and Chemical Storage

No underground or aboveground storage tanks or signs thereof were noted on the exterior of the Phase I Property.

Waste Management

No waste materials are currently generated on the Phase I Property.

Fill Material

No evidence of fill material was observed on the exterior of the Phase I Property at the time of the site visit. Based on the Phase I Property being snow covered at the time of the site inspection, a full analysis of surface conditions could not be completed.

Polychlorinated Biphenyls (PCBs) and Transformer Oil

No concerns with respect to PCBs or transformer oil were identified on the Phase I Property at the time of the site visit.

Neighbouring Properties

An inspection of the neighbouring properties was conducted from publicly accessible areas at the time of the site visits. Land use adjacent to the Phase I Property was as follows:

- North – Commercial buildings (retail, including a retail fuel outlet) and Walkley Road, followed by vacant land;
- South- Commercial (office and retail) buildings and St. Laurent Boulevard followed by commercial buildings (retail and office);
- East – Commercial (office and retail, including a retail fuel outlet) buildings, and Conroy Road, followed by commercial buildings (retail and office);
- West: A commercial (retail) building and Don Reid Drive, followed by and commercial buildings.

Land use within the Phase I Study is a mixture of residential, commercial and vacant land. Potentially contaminating activities identified during the site visit include the retail fuel outlet addressed 1970 Walkley Road, approximately 30 m north of the Phase I Property. The presence of this retail fuel outlet is a PCA that represents an APEC on the Phase I Property. Current land use and PCAs identified in the Phase I Study Area are presented on Drawing PE5607-2 – Surrounding Land Use Plan.

7.0 REVIEW AND EVALUATION OF INFORMATION

7.1 Current and Past Uses

Based on city directories, aerial photographs and personal interviews, various portions of the Phase I Property (2510 St. Laurent Boulevard, 2425 Don Reid Drive, 1900 Walkley Road and 3000 Conroy Road) were first developed circa 1990 for commercial/office purposes and remained as such until 2006/2007 when the on-site buildings were demolished. The Phase I Property has remained vacant since that time. It should be noted that the 2510 St. Laurent Boulevard property was listed as a commercial printer from 1992 to 2005 and the 3000 Conroy property was listed as a medical facility in 1990.

Potentially Contaminating Activities (PCAs)

A total of eight on-site PCAs were identified on the Phase I Property. A former printer was identified as a historical PCA on the portion of the Phase I Property addressed 2510 St. Laurent Boulevard and a former medical facility was identified on the portion of the Phase I Property addressed 3000 Conroy Road. The presence of fill material of unknown quality was considered to be identified across the entire Phase I Property. Four separate areas where road salt was historically applied were identified as four separate PCAs for the application of road salt (2510 St. Laurent Boulevard, 2425 Don Reid Drive to 1900 Walkley Road and 3000 Conroy Road). An in-use asphaltic concrete access lane is present on the northeast portion of the Phase I Property and was identified as a PCA for the application of road salt (1990 Walkley Road 2990 Conroy Road). The eight on-site identified PCAs result in eight APECs on the Phase I Property.

One off-site PCA was identified on the property addressed 1970 Walkley Road, approximately 30 m north of the Phase I Property as an existing retail fuel outlet that results in an APEC on the Phase I Property. The remaining six off-site PCAs are not considered to result in APECs on the Phase I Property due to their respective separation distances and/or cross/down gradient orientations within respect to the Phase I Property.

Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs)

Based on the findings of the Phase I ESA, the following on and off-site PCAs (as listed in Column A, Table 2 of O.Reg.153/04) were considered to result in areas of potential environmental concern (APECs) on the Phase I Property:

- PCA NA – Commercial Printer – this PCA is associated with the former commercial printers reported to have been present on the Phase I Property at 2510 St. Laurent Boulevard (APEC 1).
- PCA 42 – Pharmaceutical Manufacturing and Processing – this PCA is associated with the former medical facility reported to have been present on the Phase I Property at 3000 Conroy Road (APEC 2).
- PCA 30 – Importation of Fill Material of Unknown Quality – this PCA is associated with potential presence of fill material of unknown quality identified throughout the Phase I Property (APEC 3)
- PCA 28 – Gasoline and Associated Products Storage in Fixed Tanks – this PCA is associated with the existing off-site retail fuel outlet present at 1970 Walkley Road, approximately 30 m north of the Phase I Property (APEC 9).

Based on the findings of the Phase I ESA, it is considered likely that road salt was historically applied to the surface of the former on-site parking lots and access lanes as well as the existing access lane on the northeast portion of the Phase I Property for the safety of vehicular and pedestrian traffic under conditions of ice and/or snow. Although not defined as a specific PCA under Column A of Table 2 of O.Reg. 153/04, the use of salt for safety purposes is considered to result in an APEC on the Phase I Property (APECs 4, 5, 6, 7 and 8).

According to Section 49.1 of O.Reg. 153/04, if an applicable site condition standard is exceeded at a property solely because of the following reason, the applicable site condition standard is deemed not to be exceeded for the purpose of Part XV.1 of the Act: “The qualified person has determined, based on a phase one environmental site assessment or a phase two environmental site assessment, that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both.”

In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for APECs 4, 5, 6, 7 and 8.

The remaining seven off-site PCAs (existing or historical) identified within the Phase I Study Area are not considered to result in APECs on the Phase I Property due to their respective separation distance and/or cross/down-gradient orientations with respect to the Phase I Property.

All APECs are outlined on Drawing PE5607-1 – Site Plan, while all PCAs identified within the Phase I Study Area are presented on Drawing PE5607-2 – Surrounding Land Use Plan in the Figures section of this report, following the text.

Contaminants of Potential Concern

Based on the past uses of the Phase I Property and the potentially contaminating activities, the following Contaminants of Potential Concern (CPCs) have been identified:

- Petroleum Hydrocarbons Fractions 1 through 4 (PHCs F₁-F₄)
- Benzene, Toluene, Ethylbenzene, Xylene (BTEX)
- Volatile Organic Compounds (VOCs)
- Metals (including arsenic (As), antimony (Sb) and selenium (Se))
- Mercury (Hg)
- Hexavalent Chromium (Cr_{VI})
- Polycyclic Aromatic Hydrocarbons (PAHs)

In accordance with Section 49.1 of O.Reg.153/04, as amended, electrical conductivity (EC) and sodium adsorption ratio (SAR) are not considered to be CPCs.

7.2 Conceptual Site Model

Geological and Hydrogeological Setting

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock in the area of the site consists of shale of the Carlsbad Formation. Based on the maps, the surficial geology consists of offshore marine sediments with an overburden thickness ranging from 5 to 15 m.

The regional topography in the general area of the Phase I Property slopes down towards the east. Groundwater within the Phase I Study Area is generally expected to flow towards the east.

Fill Placement

No evidence of fill placement was observed at the time of the site visit. Based on various portions of the Phase I Property being snow covered at the time of the site

visit, a full analysis of surface conditions could not be completed. Although no fill material was observed at the time of the site visit, it is considered likely that fill material is present on the Phase I Property in the footprints of the former on-site buildings.

Water Bodies and Areas of Natural Significance

No areas of natural significance or water bodies were identified on the Phase I Property or within the Phase I Study Area.

Drinking Water Wells

There are no potable water wells on the Phase I Property or within the Phase I Study Area.

Monitoring Wells

A well record search was conducted on February 4, 2022, for all drilled wells within the Phase I Study Area. No potable well records were identified for the Phase I Property or properties within the Phase I Study Area. Although no monitoring wells were observed at the time of the site visit, it is possible that some existing wells may still remain on the Phase I Property from previous investigations.

Based on the borehole logs from the previous investigations conducted in the area of the Phase I Property, general stratigraphy consists of topsoil or pavement, followed by fill material (in various areas) underlain by silty clay. Bedrock was not confirmed in any of the boreholes. Static water levels were not recorded on the well records.

Existing Buildings and Structures

No buildings or permanent structures are present on the Phase I Property.

Subsurface Structures and Utilities

The Phase I Property is situated in a municipally serviced area. Based on the Phase I Property being snow covered at the time of the site inspection, a full analysis of surface conditions could not be completed.

Neighbouring Land Use

Land use within the Phase I Study is a mixture of residential, commercial and vacant land. Potentially contaminating activities identified during the site visit include the retail fuel outlet addressed 1970 Walkley Road, approximately 30 m north of the Phase I Property. The presence of this retail fuel outlet is a PCA that

represents an APEC on the Phase I Property. Current land use and PCAs identified in the Phase I Study Area are presented on Drawing PE5607-2 – Surrounding Land Use Plan.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of this report, eight on-site and one off-site PCA are considered to result in nine APECs on the Phase I Property. The PCAs, APEC and associated contaminants of potential concern (CPCs) are summarized in Table 3.

Table 2 - Areas of Potential Environmental Concern					
Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern with respect to Phase I Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
APEC 1 Former Printers	South portion of the Phase I Property (2510 St. Laurent Boulevard)	<i>"Item NA – Commercial Printers"</i>	On-site	VOCs PHCs	Soil Groundwater
APEC 2 Former Medical Facility	East portion of the Phase I Property (3000 Conroy Road)	<i>"Item 42: Pharmaceutical Manufacturing and Processing"</i>	On-site	Metals As, Sb, Se Hg, CrVI PHCs	Soil Groundwater
APEC 3 Fill Material of Unknown Quality	Throughout the Phase I Property	<i>"Item 30 – Importation of Fill Material of Unknown Quality"</i>	On-site	Metals As, Sb, Se Hg, CrVI PAHs	Soil
APEC 4 ¹ Application of Road Salt	South portion of the Phase I Property (2510 St. Laurent Boulevard)	<i>"Item NA: Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice"</i>	On-site	Electrical Conductivity (EC) Sodium Adsorption Ratio (SAR)	Soil
APEC 5 ¹ Application of Road Salt	West portion of the Phase I Property (2425 Don Reid Drive)	<i>"Item NA: Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice"</i>	On-site	EC SAR	Soil

Table 2 - Areas of Potential Environmental Concern					
Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern with respect to Phase I Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
APEC 6 ¹ Application of Road Salt	Northwest portion of the Phase I Property (1900 Walkley Road)	<i>"Item NA: Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice"</i>	On-site	EC SAR	Soil
APEC 7 ¹ Application of Road Salt	East portion of the Phase I Property (3000 Conroy Road)	<i>"Item NA: Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice"</i>	On-site	EC SAR	Soil
APEC 8 ¹ Application of Road Salt	Northeast portion of the Phase I Property (1920 Walkley Road and 2990 Conroy Road)	<i>"Item NA: Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice"</i>	On-site	EC SAR	Soil
APEC 9 Retail Fuel Outlet	Northeast portion of the Phase I Property (1920 Walkley Road and 2990 Conroy Road)	<i>"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"</i>	Off-site	BTEX PHCs	Soil Groundwater
<p>1 – In accordance with Section 49.1 of O.Reg. 153/04 standards are deemed to be met if an applicable site condition standard is exceeded at a property solely because the qualified person has determined that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. The exemption outlined in Section 49.1 is being relied up with respect to the Phase I Property.</p>					

Contaminants of Potential Concern

As per section 7.1 and Table 2, contaminants of potential concern (CPCs) in the soil/groundwater beneath the Phase I Property include the following:

- Petroleum Hydrocarbons Fractions 1 through 4 (PHCs F₁-F₄)

- Benzene, Toluene, Ethylbenzene, Xylene (BTEX)
- Volatile Organic Compounds (VOCs)
- Metals (including arsenic (As), antimony (Sb) and selenium (Se))
- Mercury (Hg)
- Hexavalent Chromium (Cr_{VI})
- Polycyclic Aromatic Hydrocarbons (PAHs)

In accordance with Section 49.1 of O.Reg.153/04, as amended, electrical conductivity (EC) and sodium adsorption ratio (SAR) are not considered to be CPCs.

Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I- ESA is considered to be sufficient to conclude that there are historical on-site and an existing off-site PCA that have resulted in APECs on the Phase I Property. Additional off-site PCAs identified within the study area are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientations relative to the subject land.

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

8.0 CONCLUSIONS

Assessment

Paterson Group was retained by Claridge Homes to conduct a Phase I-Environmental Site Assessment (ESA) for the properties addressed 2502 & 2510 St. Laurent Boulevard, 1890, 1900 & 1920 Walkley Road, 2425 Don Reid Drive and 2990 & 3000 Conroy Road, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and 250m Phase I Study Area, and to identify any environmental concerns with the potential to have impacted the subject land.

According to the historical research, various portions of the Phase I Property (2510 St. Laurent Boulevard, 2425 Don Reid Drive, 1900 Walkley Road and 3000 Conroy Road) were first developed circa 1990 for commercial/office purposes and remained as such until 2006/2007 when the on-site buildings were demolished. The Phase I Property has remained vacant since that time. It should be noted that the 2510 St. Laurent Boulevard portion of the Phase I Property was listed as a commercial printer from 1992 to 2005 and the 3000 Conroy property was listed as a medical facility in 1990.

A total of seven on-site historical PCAs were identified on the Phase I Property. A former printer was identified as a historical PCA on the portion of the Phase I Property addressed 2510 St. Laurent Boulevard and a former medical facility was identified on the portion of the Phase I Property addressed 3000 Conroy Road. The presence of fill material of unknown quality was considered to be identified across the entire Phase I Property. Four separate areas where road salt was historically applied were identified as four separate PCAs for the application of road salt (2510 St. Laurent Boulevard, 2425 Don Reid Drive to 1900 Walkley Road and 3000 Conroy Road). The eight on-site identified PCAs result in eight APECs on the Phase I Property. In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for the aforementioned APEC.

Based on available historical information neighbouring properties within the Phase I Study Area were developed with a combination of residential dwellings (Walkley Road as early as 1930) and commercial (primarily office space) use. Various off-site historical PCAs were identified within the Phase I Study Area but are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientations relative to the Phase I Property.

Following the historical research, a site visit was conducted. No buildings or permanent structures are present on the Phase I Property. A concrete sign with an Ottawa Business Park name plate is present on the northwest portion of the Phase I Property. The northeast portion of the Phase I Property is occupied by an asphaltic concrete access lane (part of the parking lot that is used by the adjacent business to the northwest). The remainder of the Phase I Property consists of primarily of vacant/treed land, with various gravel patches (in the footprint of the former buildings) and a few asphaltic concrete access lanes along the perimeter. The application of road salt on the in-use asphaltic concrete access lane present on the northeast portion of the Phase I Property (1990 Walkley Road 2990 Conroy Road) was identified as a PCA that results in an APEC on the Phase I Property. In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for the aforementioned APEC.

The current uses of the adjacent and neighbouring properties within the Phase I Study Area include a combination of residential and commercial uses. The presence of a retail fuel outlet at 1970 Walkley Road is a PCA that represents an APEC on the Phase I Property.

Recommendations

Based on the findings of the Phase I ESA, it is **our opinion that a Phase II-Environmental Site Assessment is required for the Phase I Property.**

9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Claridge Homes. Permission and notification from Claridge Homes and Paterson will be required to release this report to any other party.

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are records in our database of fuel storage tanks at the subject addresses:

INSTANCE NUMBER	ADDRESS	CITY	PROVINCE	POSTAL CODE	STATUS	FACILITY/DEVICE
10310889	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	EXPIRED	FS GASOLINE STATION
11617300	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	ACTIVE	FS LIQUID FUEL TANK
11617313	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	ACTIVE	FS LIQUID FUEL TANK
11617324	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	ACTIVE	FS LIQUID FUEL TANK
11617349	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	ACTIVE	FS LIQUID FUEL TANK
29883815	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	ACTIVE	FS CYLINDER EXCHANGE
39049866	1970 WALKLEY RD	OTTAWA	ON	K1H 1W1	ACTIVE	FS GASOLINE STATION

For a further search in our archives please complete our release of public information form found at <https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?mid=392> and email the completed form to publicinformationsservices@tssa.org along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Sherrees

Subject: Confirmation of Receipt of Application and Instructions for Payment of Applicable Fees

Dear Sir/Madam,

Thank you for submitting your application for **2510 St. Laurent Blvd.** It has been received by planning staff and I will be your File Lead.

Your file application number is **D06-03-22-0034**. You will need your file application number to submit your payment of **\$132** for the planning application fee associated with your file.

This can be done in one of two ways as described below.

Inquiries regarding confirmation of funds receipted are to be directed to me as the File Lead.

Payments

Payments, ensuring the payer's name and address are indicated on the cheque, can be made by either:

1. Making an appointment at a Client Service Centres to pay in person
 - [Ben Franklin Place, 101 Centrepointe Drive](#)
 - [Kanata, 580 Terry Fox Drive](#)
 - [Orleans, 255 Centrum Boulevard](#)

or

2. Sending in the payment by regular mail ensuring the below details are on the envelope

Your Company Name:

Application Number:

Client Service Centre

101 Centrepointe Drive

Ottawa, Ontario K2G 5K7

Please note that Electronic Funds Transfers (EFT's) and Wire Transfers remain unaccepted forms of payment. In addition, the above instructions do not apply to building permit applications. Further information on building permit applications can be found [here](#).

Thank you,

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Project Description:		Approval is sought for the fibreoptic cable facility exhaust system. The application includes one 1000 kw diesel generator for emergency backup, exhausting through 0.356m diameter stack, 1m above roof, 8.2 above grade. The generator is housed within the building and has a muffler cap. The application also includes two production exhaust vents discharging equal masses per unit time (g/s) of solvents used in fibreoptic production. One vent is capable of exhausting 4.96 m3/s, the other 6.04 m3/s. They operate simultaneously, both fans exhaust through a false wall and then up through a 3m X 1m exhaust vent located on the roof. Hours of operation are 24 hours/day, 7 days/week.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Nov 2021

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Sep 30, 2021

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2019

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Sep 30, 2021

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2021

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Dec 31, 2021

Drill Hole Database:

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks:

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021

Environmental Activity and Sector Registry:

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Dec 31, 2021

Environmental Registry:

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Dec 31, 2021

Environmental Compliance Approval:

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Dec 31, 2021

Environmental Effects Monitoring:

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2021

Environmental Issues Inventory System:

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2020

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Nov 2021

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank:

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Fuel Storage Tank - Historic:

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Nov 30, 2021

Greenhouse Gas Emissions from Large Facilities:

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents:

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario:

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations:

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES):

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks:

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Nov 30, 2021

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jan 2021

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Dec 31, 2021

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Dec 31, 2021

Pipeline Incidents:

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Dec 31, 2021

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2019

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Dec 2021

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Sep 30, 2021

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Sep 2020

Wastewater Discharger Registration Database:

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks:

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variations for Abandonment of Underground Storage Tanks:

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Dec 31, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Sep 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX 3

QUALIFICATIONS OF ASSESSORS

Jeremy N Camposarcone, EIT Junior Environmental Engineer

Jeremy joined Paterson Group in 2020 as part of the Environmental Group. Jeremy received his Bachelor of Engineering in Environmental Engineering from Carleton University in 2019. Jeremy completed his studies while researching water treatment processes for the wastewater effluent of a hydrothermal carbonization reactor. His responsibilities as a field engineer have brought him to various projects throughout the Ottawa-Valley. In his time with Paterson, Jeremy has been involved with residential and commercial development within Ottawa and the surrounding area. His scope of work consists of environmental investigation and reporting, field inspection, field testing, quality control and quality assurance.

EDUCATION

Bachelor of Engineering in
Environmental Engineering, 2019
Carleton University
Ottawa, Ontario

LICENCE/ PROFESSIONAL AFFILIATIONS

PEO Engineer in Training

YEARS OF EXPERIENCE

With Paterson: 2

OFFICE LOCATION

154 Colonnade Road South,
Nepean, Ontario, K2E 7J5

SELECT LIST OF PROJECTS

- PSPC, Confederation Heights Redevelopment, Ottawa, ON - Phase I and II ESA program for site redevelopment.
- Travelodge Hotel, Carling Avenue, Ottawa, ON – Remediation Program, Phase I and II ESA, Underground Storage Tank Pull and Remediation (Site Remediation Coordinator & Supervisor)
- Caivan Residential Development, Navan, ON - Large-Scale Remediation, Groundwater Monitoring, Phase I and II ESA, Remedial Action Plan (Site Remediation Coordinator & Supervisor)
- Rideau Centre Expansion, Ottawa, ON – Phase I and II ESA, Soil Remediation Program
- Ottawa Trainyards, Ottawa, ON - Large-Scale Remediation, Phase I and II ESA (Site Remediation Coordinator & Supervisor)
- Major Building, Downtown Ottawa, ON – Phase I and II ESA

PROFESSIONAL EXPERIENCE

2019 to present, **Junior Environmental Engineer, Paterson Group, Ottawa, Ontario**

- Conduct Phase I and Phase II - Environmental Site Assessments (ESAs), Soil and Groundwater Remediation Programs and the preparation of Records of Site Condition
- Manage excavation contractors to ensure soil quality control; daily reporting to project manager
- Present analytical test results, interpretations, assessments, recommendation and/or conclusion in a final technical report
- Oversee geotechnical investigations for test pitting on numerous proposed utility installations, residential and commercial developments.
- Conduct laboratory testing program of soils and water for detail recommendations
- Problem solving to complete analysis required
- Adapt to unforeseen on-site challenges and provide first-hand insights to help collaborate toward a solution
- Oversee large-scale remediation projects and monitor material being excavated
- Monitor and sample multiple groundwater wells with a high degree of precision regarding the quality and parameters of the sample
- On-site settlement plate surveying of future residential developments

Mark S. D'Arcy, P.Eng., QP^{ESA} Senior Environmental/Geotechnical Engineer

After receiving his Bachelors of Applied Science from Queen's University in 1991 in Geological Engineering, Mark joined Paterson Group Inc. During the first 10 years of Mark's career, he was heavily involved in all aspects of field work, including drilling boreholes, excavating test pits, conducting phase I site inspections, environmental sampling and analysis and inspection of environmental remediations. During Mark's field experience, he gained invaluable field and office experience, which would prepare Mark to become the Environmental Division Manager. Mark's field experience ranges from Phase I Environmental Site Assessments (ESAs) to on-site soil and groundwater remediations, as well as, environmental/geotechnical borehole investigations. Mark's field experience has provided extensive knowledge of subsurface conditions, contractor relations and project management. These skills would provide Mark with the ability to understand a variety of situations, which has lead Paterson to an extremely successful Environmental Department. Mark became the Environmental Manager in 2006, which consisted of two engineers and two field technicians. Mark has been an integral part in growing the Environmental Division, which now consists of nine engineers and three field technicians. Mark is the Senior Project Manager for a wide variety of environmental projects within the Eastern Ontario area including Phase I ESAs, Phase II ESAs, remediations for filing Records of Site Condition in the Ontario Ministry of the Environment and Climate Change (MOECC) Environmental Site Registry, Brownfield Applications and Landfill Monitoring Programs. As the Senior Project Manager, Mark is responsible for directing project personnel, final report review and overall project success. Mark has proven leadership and ability to manage small to large scale projects within the allotted time and budget.
