

PHASE ONE ENVIRONMENTAL SITE ASSESSMENT

6310 HAZELDEAN ROAD, STITTSVILLE, ON

Project No.: CP-18-0052

Prepared for:

Marco Recine
6310 Hazeldean Road
Ottawa, ON
K2S 1B9

Prepared by:

McIntosh Perry Consulting Engineers Ltd.
115 Walgreen Road, RR3
Carp, ON K0A 1L0

August 17, 2018

MCINTOSH PERRY

McIntosh Perry Consulting Engineers Ltd. (McIntosh Perry) was retained by BBS Construction on behalf of Marco Recine to conduct a Phase One Environmental Site Assessment (ESA) for the properties located at 6310 Hazeldean Road Stittsville, Ontario (“the Site”). The Site is bounded to the northwest by Hazeldean Road, to the northeast by 1174 Carp Road, to the southwest by Hazeldean Road and vacant land and southeast by vacant land followed by residential properties. The Site currently consists of three 1-storey buildings with open land surrounding the buildings. The Site is currently used as the offices and storage yard of Techo-Bloc pre-cast concrete block products.

It is understood that this Phase One ESA is being completed as a component of the City of Ottawa site plan submission process, in support of an application to construct a two-storey office building with an associated outdoor parking lot to the north.

The Phase One ESA has been prepared in general accordance with the requirements of Ontario Regulation (O.Reg.) 153/04 as amended. The report is also in general compliance with “Phase I Environmental Site Assessment”, Canadian Standards Association (CSA) standard CSA Z768-01, reaffirmed 2016.

Based on a review of aerial photographs, historical information, and interviews, the Site was developed to its current configuration prior to 1976.

Two PCAs were identified at, on, or under the Site.

- 6310 Hazeldean Road
 - Above ground storage tank
- 6310 Hazeldean Road
 - Former automotive Garage

Three off-site PCAs were identified in the Phase One ESA Study Area.

- 6250 Hazeldean Road
 - RV Dealership
- 1174 Carp Road
 - Retail fuel outlet
- 1189 Carp Road
 - Oil Changers automotive garage
 - Commercial self-serve car wash

The above noted on-site PCAs are considered to result in an APEC for the Site. Due to the limited information available for the previous use of the Site and presence of an automotive garage, it is possible that the operations have had impacts to the soil and groundwater in the vicinity of the garage and fuel storage tank.

The above noted Off-site PCA are areas of environmental concern that have the possibility of impacting on-site soil and groundwater conditions.

Based on the presence of on-site PCAs resulting in APECs, ***a Phase Two ESA is recommended at this time*** to assess whether the historical presence of the RV service garage and aboveground fuel storage tank have impacted soil and groundwater quality at the Site.

1.0 INTRODUCTION

McIntosh Perry Consulting Engineers Ltd. (McIntosh Perry) was retained by BBS Construction (Ontario) Inc. on behalf of Marco Recine to conduct a Phase One Environmental Site Assessment (ESA) for the properties located at 6310 and 6320 Hazeldean Road Stittsville, Ontario (“the Site”). The Site is bounded to the northwest by Hazeldean Road, to the northeast by 1174 Carp Road, to the southwest by Hazeldean Road and vacant land and southeast by vacant land followed by residential properties. The Site currently consists of three 1-storey buildings with open land surrounding the buildings. The Site is currently used as the offices and storage yard of Techo-Bloc pre-cast concrete block products.

It is understood that this Phase One ESA is being completed as a component of the City of Ottawa site plan submission process, in support of an application to construct a retail plaza with associated parking.

The Site location is shown on Figure 1 (Site Location). The Site layout and features, including on-site land use, are shown on Figure 2 (Site Layout).

The intended future use of the Site will be three one-storey buildings with associated parking.

1.1 Phase One Property Information

The Site consists of three land parcels, 6310, 6320 and a section with no address on Hazeldean Road. For the purposes of this investigation, 6310 Hazeldean Road is given as the address for the entire Site. The site is occupied by three (3) one-storey buildings (two modular buildings and one permanent building with a concrete block foundation). The rest of the property is open land used as storage.

Site zoning is AM9 (Arterial Mainstreet Zone, Subzone 9) as described under section 185-186 of the City of Ottawa Zoning by-laws, which allows for the intended future use of the property.

The total area of the Site is approximately 1.6 hectares (ha).

1.1.1 Property Identification

The legal description of the Site is as follows;

- Parts 1, 2, 3, 4, 5, 6, and 7, Registered Plan 4R-19395 (PIN 04753-0270, 04753-0271, and 04753-0272)

1.1.2 Property Ownership and Contact Details

McIntosh Perry was retained to complete this Phase One ESA by Mr. Frits Bosman of BBS Construction (Ontario) Ltd. Mr. Bosman can be contacted at (613) 226-8830. Mr. Marco Recine, property owner, can be contacted at hazeldeandev@outlook.com.

1.1.3 Current and Proposed Future Uses

- The site is occupied by three 1-storey buildings, (two modular buildings and one permanent building with a concrete block foundation). The rest of the property is open land used for storage.

The intended future use of the Site will be a three-building retail plaza with associated paved parking areas.

1.2 Surrounding Land Use

Land use in the vicinity of the Site is predominantly residential and commercial.

2.0 SCOPE OF INVESTIGATION

A Phase One ESA is a preliminary environmental screening tool designed to provide a qualitative assessment of the environmental condition of a site, based on a desktop review of available documentation pertaining to the site and observations made during a site visit. Sampling and chemical analysis of soils, groundwater, and/or other materials/substances are beyond the scope of work for a Phase One ESA.

The Phase One ESA has been prepared in general accordance with the requirements of the following legislation:

- Ontario Regulation (O.Reg.) 153/04 - Records of Site Condition (as amended).

The report is also in general compliance with:

- "Phase One Environmental Site Assessment", Canadian Standards Association (CSA) standard CSA Z768-01, Reaffirmed 2016.

A designated substances survey was not completed as part of the current investigation.

The subject property is not an 'Enhanced Investigation Property' as defined in O.Reg. 153/04 (as amended).

3.0 RECORDS REVIEW

3.1 General

3.1.1 Phase One Study Area Determination

The Phase One Study Area includes the following properties:

- The Site
- All properties within approximately 250m of the Site boundary (Phase One ESA Study Area)

The Phase One ESA Study Area, including surrounding land uses, is shown on Figure 2 (Study Area) and Figure 3 (Surrounding Land Use).

3.1.2 First Developed Use Determination

The Site is currently occupied by three 1-storey buildings. Based on a review of aerial photographs and historical information, the Site appears to have been developed to its current use and general configuration prior to 1976 (i.e. three 1-storey buildings).

3.1.3 Fire Insurance Plans

The Catalogue of Canadian Fire Insurance Plans (FIPs) was not searched as part of this Phase One ESA. It is our understanding that Fire Insurance Plans are not available for the area of the Site.

3.1.4 Chain of Title

A Chain of Title search was not conducted as part of this report.

3.1.5 Reports by Others

A Phase I ESA report was completed by Water and Earth Science Associated Ltd. in February 2008 and concluded that there is 'no actual evidence of contamination of the subject property'. The report notes that the former use of the Site was an RV dealership between 1992 and 2008, which may potentially result in generation of fuel, oil and grease, anti-freeze, and/or windshield washer fluid waste. However, the report mentions that the only way to determine these impacts is with a subsurface investigation.

3.1.6 City Directories

The City Directory was searched as part of this Phase One ESA, results are from 1957 to 2011. The directory lists 6310 Hazeldean Road as "Address Not Listed" between 1957 and 1996. 6310 Hazeldean Road is listed as "Foran RV's LTD" from 1996 to 2007 after which it is listed as a Techno-Bloc Ottawa.

Based on review of the City Directories, the commercial business listed are considered to represent a PCA for the Site.

3.2 Environmental Source Information

McIntosh Perry completed a records review to obtain information about the Site pertaining to items of actual and/or potential environmental concern.

3.2.1 Databases Searched

McIntosh Perry obtained information contained in the databases listed below from EcoLog ERIS of Toronto, Ontario. Details about the sources of information and the years included for each database, as well as the pertinent information obtained from these databases are included in the EcoLog ERIS report, provided as Appendix A.

Federal Government Databases:

- Environmental Effects Monitoring
- Environmental Issues Inventory System
- Federal Convictions
- Contaminated Sites on Federal Land
- Fisheries & Oceans Fuel Tanks
- Indian and Northern Affairs Fuel Tanks
- National Analysis of Trends in Emergencies System (NATES)
- National Defence & Canadian Forces Fuel Tanks
- National Defence & Canadian Forces Spills
- National Defence & Canadian Forces Waste Disposal Sites
- National Environmental Emergencies System (NEES)
- National PCB Inventory
- National Pollutant Release Inventory
- Parks Canada Fuel Storage Tanks
- Transport Canada Fuel Storage Tanks

Provincial Government Databases:

- Abandoned Aggregate Inventory
- Aggregate Inventory
- Abandoned Mines Information System
- Certificates of Approval
- Coal Gasification Plants
- Compliance and Convictions
- Drill Holes
- Environmental Registry
- Ontario Regulation 347 Waste Generators Summary
- Mineral Occurrences
- Non-Compliance Reports

- Ontario Oil and Gas Wells
- Ontario Inventory of PCB Storage Sites
- Ministry Orders
- Occurrence Reporting Information System
- Pesticide Register
- Private Fuel Storage Tanks
- Ontario Regulation 347 Waste Receivers Summary
- Record of Site Condition
- Wastewater Discharger Registration Database
- Waste Disposal Sites – MOE CA Inventory
- Waste Disposal Sites – MOE 1991 Historical Approval Inventory
- Water Well Information System

Private Databases:

- Anderson's Waste Disposal Sites
- Automobile Wrecking and Supplies
- Commercial Fuel Oil Tanks
- Chemical Register
- ERIS Historical Searches
- Canadian Mine Locations
- Oil and Gas Wells
- Canadian Pulp and Paper
- Retail Fuel Storage Tanks
- Scott's Manufacturing Directory
- Anderson's Storage Tanks

3.2.2 *Database Findings Relevant to the Phase One ESA*

The databases searched by EcoLog ERIS contained the following information pertaining to the Site:

- Twenty-Five (25) borehole records
- Three (3) Certificate of Approval records
- Two (2) Environmental Compliance Approval records
- Three (3) ERIS Historical Searches records
- Seven (7) Water Well Information System records

Relevant information from the EcoLog ERIS report is summarized as follows:

Boreholes

No boreholes were listed on the subject property. Twenty-five boreholes were recorded within 250 m of the subject property. Borehole records are summarized in the Table below:

Table 1: Borehole Records

Borehole ID	Location relative to site	Completion Depth (m bgs)	Depth to Bedrock (m bgs)	Static Water Level (m)
808675	50.47 m west southwest	0.8	-	-
808674	60.4 m west	1.5	-	-
808673	65.2 m west	1.5	-	-
808671	65.7 m north	0.3	-	-
808670	72.6 m north	1.5	-	-
808672	73.9 m west	0.8	-	-
808669	80.0 m north	1.5	-	-
808668	89.2 m north northwest	0.9	-	-
609557	101.0 m north	-	6.1	-
609551	105.5 m south southwest	23.2	2.7	-
808667	161.3 m north northeast	0.9	-	-
808666	163.5 m north northeast	1.5	-	-
808665	164.4 m north northeast	1.5	-	-
808664	166.9 m north northeast	1.5	-	-
808663	167.8 m north northeast	1.5	-	-
808662	174.1 m north	0.9	-	-
808195	202.9 m north northeast	1.5	-	-
808194	205.0 m north northeast	1.5	-	-
808193	207.0 m north northeast	0.1	-	-
808200	216.4 m north northeast	1.5	-	-
808199	218.4 m north northeast	1.5	-	-
808192	223.8 m north northeast	0.3	-	-
808191	230.6 m north northeast	1.5	-	-
808190	231.9 m north northeast	1.5	-	-
808206	249.3 m northeast	0.1	-	-

Locations of the boreholes can be found in the Ecolog ERIS report in Appendix A.

Certificates of Approval

Three Certificates of Approval records were found within 250m of the subject site. No records were found for the subject property. The records include the following

- Three records were listed under R.M. of Ottawa-Carleton, located at Hazeldean/Carp Road
 - One record was listed under R.M. Of Ottawa-Carleton for a Cancelled Municipal Sewage Certificate in November 1994 (Certificate # 3-0673-94-)

- One record was listed under the City of Ottawa for Municipal Water Certificate in August 1994 (Certificate # 7-0673-94-007)
- One record was listed under the City of Ottawa for a Municipal and Private Sewage Works Certificate in September 2005 (Certificate # 6863-6FHQVH)

All located records can be found in Appendix B. Locations of the Certificate of Approval can be found in the Ecolog ERIS report in Appendix A.

Environmental Compliance Approvals

Two Environmental Compliance Approval records were found within 250m of the subject site. No records were found for the subject property. Environmental Compliance Approval records are summarized in the Table below:

Table 2: Environmental Compliance Approval Records

Certificate Number (Status)	Company	Location	Approval Type	Approval Date
7773-8EMKSV (Approved)	City of Ottawa	6303 Hazeldean Road	Municipal and Private Sewage Works	2011-03-31
6863-6FHQVH (Revoked/Replaced)	City of Ottawa	Hazeldean and Carp Road	Municipal and Private Sewage Works	2005-09-19

All located copies of above records can be found in Appendix B. Locations of the Environmental Compliance Approval can be found in the Ecolog ERIS report in Appendix A.

Historical ERIS Searches

Three ERIS Historical searches were listed within 250 m of the subject property. One ERIS Historical searches record was found for the subject property. The searches are summarized in the Table below:

Table 3: ERIS Historical Searches

Report Type	Location	Date
Complete Report	6310 Hazeldean Road	18-Jan-2008
Standard Select Report	Concession 12, Part lot 22, Parts 27 and 32	03-Jul-2014
Standard Report	6315 Hazeldean Road and 1140 Carp Road	30-September-2013

Locations of the ERIS Historical Searches records can be found in the Ecolog ERIS report in Appendix A.

Water Well Information System

Seven Water Well Information records found within 250m of the subject property. No records were found for the subject property. The Table below summarize the details of each well.

Table 4: Water Well Information System Records

Well ID	Completion Material	Depth to Bedrock (m bgs)	Bedrock Type	Well Depth (m bgs)	Well Use	Static Water Level (m bgs)	Clear/Cloudy	Water Type
1509719	Bedrock	2.13	Limestone	22.3	Commercial Water Supply	0.6	Clear	Fresh
1509711	Bedrock	2.7	Limestone	23.2	Domestic	1.5	Clear	Fresh
1514019	Bedrock	4.6	Limestone	168.3	Commercial Water Supply	2.4	Clear	Sulphur
1514020	Bedrock	4.6	Limestone	121.9	Abandoned Supply	-	-	-
1502947	Bedrock	9.1	Limestone	15.2	Water Supply	6.1	Clear	Fresh
1510035	Bedrock	2.7	Limestone	45.7	Domestic Water Supply	1.8	Clear	Fresh
1502950	Bedrock	13.7	Limestone	27.4	Domestic Water Supply	11.0	Clear	Fresh

Locations of the Water Well Information records can be found in the Ecolog ERIS report in Appendix A.

3.2.3 MECP Freedom of Information and Index Review Requests

In order to identify any previous environmental reports concerning the Site, an MECP freedom of information (FOI) request and index review request was submitted for the Site on July 31, 2018. At time of writing MPCE has received no official response from MECP, responses take between one to two months to receive.

A copy of the MECP correspondence is provided in Appendix C.

3.2.4 TSSA Information Request

An FOI request was also submitted to the Technical Standards and Safety Authority (TSSA). The TSSA request returned no records of fuel tanks on the subject property.

A copy of the TSSA correspondence is provided in Appendix C.

4.0 PHYSICAL SETTING

4.1 Aerial Photographs and Satellite Images

Table 8 describes observations about current and historical land use for the Site and surrounding properties that were noted during review of aerial photographs of the area taken between 1928 and 2017, included in Appendix D. Current land uses are included on Figure 4.

Table 5: Current and Historical Land Use from Aerial Photographs and Satellite Images

Date	Source	Observations
1932	National Air Photo Library	The Site consists of open vacant land that has not yet been developed. The surrounding area consists of farm land.
1945	National Air Photo Library (A.9558-41)	The Site remains relatively unchanged.
1967	National Air Photo Library (A20309-83)	The Site remains relatively unchanged. Hazeldean Road appears in its present-day configuration. Electrical transmission lines have been constructed to the north of the Site.
1978	National Air Photo Library (A31198-180)	The Site has been cleared and two buildings have been constructed. The lot to the east of the Site (1174 Carp Road) has been developed and buildings are present. Further residential development has occurred in surrounding areas.
1991	GeoOttawa	The Site remains relatively unchanged. Increased residential development is present in the surrounding area.
2002	GeoOttawa	Additional vehicle and/or materials storage is visible on the southern and eastern portion of the Site. Farmland across from the site has started to be developed into a residential area. Surrounding residential areas have expanded.
2007	GeoOttawa	One of the major site buildings appears to have been moved westward, or a new building has been constructed in the central portion of the Site. The Site appears to have changed ownership and use, and now appears to be storing building products.
2011	GeoOttawa	The Site remains relatively unchanged. A large building and a residential area have been constructed directly across from the site on the other side of Hazeldean Road. Surrounding residential areas have expanded.
2017	GeoOttawa	The Site remains relatively unchanged.

Based on the aerial photos no PCAs were identified on-site or in the surrounding area.

4.2 Topography

Elevation at the Site is approximately 120 m above sea level (m asl). The topography is generally flat (see Figure 4).

4.3 Hydrology

The Site occurs within the Mississippi River watershed. Feedmill Creek, a tributary of the Carp River, is approximately 530 m southeast of the Site.

4.4 Geology

4.4.1 *Surficial Geology*

Geological maps of the area classify the overburden at the Site as glacial till, stone-poor, with sandy silt to silty sand texture. (OGS, 2018).

4.4.2 *Bedrock Geology*

Geological maps of the area classify the bedrock at the Site as predominantly limestone, dolostone, shale, arkose and sandstone of the Ottawa Group (OGS, 2018).

4.5 Hydrogeology

Based on a review of site geology and topography, groundwater is likely to flow northward toward Feedmill Creek which feeds into the Carp River.

4.6 Fill Materials

The Site visit and analysis of the aerial photos indicate the historical placement and/or grading of fill material at the site.

4.7 Water Bodies and Areas of Natural Significance

The closest permanent waterbody is the Feedmill Creek (located 0.54 km northwest of the Site at its closest point).

When completing a Phase One ESA, considerations are made for the following MNRF-maintained areas of natural significance:

- Areas of Natural and Scientific Interest (ANSIs);
- Provincially Significant Wetlands (PSWs); and,
- Wildlife Management Areas (WMAs).

No areas of natural significance were observed within the Study Area.

4.8 Well Records

McIntosh Perry performed a well record search utilizing the EcoLog ERIS Water Well Information System (WWIS) data (based on MOECC GIS data). Seven well records were returned from this search, details of the record are located in the Section 3.2.2.

5.0 INTERVIEWS

McIntosh Perry personnel conducted an interview with Michael Uberti and Marco Recine, owners of the property, to obtain information about the subject property pertaining to items of actual and/or potential environmental concern. Information collected during this interview was used to corroborate data from other sources, and is presented in Appendix E.

The information obtained from the interview is summarized as follows:

Potential Environmental Concerns	Interview Comments
Accidents/Spills	No Knowledge
Previous Use of Site	RV Dealership with garage
Adjacent Properties	Vacant, RV Dealership
Fuel Handling/Storage	Diesel fuel for forklift, above ground tank on concrete pad, propane tank
Maintenance/Operational Areas	No, gas heater in garage
Hazardous Materials Storage	Efflorescence remover
Salt Storage	Sodium chloride bags (in flakes) for dust suppression
Fuel Storage Tanks	Previous AST, propane tank
Odours	No Odours
Potable Water	Yes – Well to the garage
Septic and Wastewater Discharges	Septic field behind office
Pesticides	No Knowledge
Mould	No Knowledge
Heating and Cooling Systems	Gas heater, portable unit in office
Major Mechanical Equipment	Forklift – Stored in garage
Waste Oils, Solvents, Batteries	No Knowledge
PCBs	No Knowledge
Asbestos	No Knowledge
Lead Paint	No Knowledge
ODS	No Knowledge
Electromagnetic Radiation	Microwave
UFFI	No Knowledge
Mercury	Possible – thermostats used
Radon Gas	No Knowledge
Soil and Groundwater Conditions	No Knowledge
Wells	One water well
Waste Disposal and Recycling	On call garbage bin
Fill Material	Gravel to fill potholes
Floor Drains/OWS (Discharge Locations)	Not sure – possible basin, filled in with gravel
Other	No

Note that statements made by those interviewed were not made categorically and are limited to personal knowledge of, and experience with, the subject property. The significance of environmental concerns that have been identified by other methods was not reduced based on the interview statements.

Based on interview results during the site visit on August 1, 2018, two on-site PCAs were identified. A former RV service garage and a former above ground diesel storage tank.

6.0 SITE RECONNAISSANCE

The objectives of the site reconnaissance were as follows:

- To identify potential environmental concerns associated with current and past uses of the Site;
- To identify Potentially Contaminating Activities (PCAs) on, in, or under the Site;
- To identify, as practical, current and past uses, activities, and PCAs in the vicinity of the Site; and
- To identify details of potential contaminant pathways on, in, or under the Site and potential environmental concerns and contaminants of potential concern.

McIntosh Perry had open and ready access to all exterior areas of the Site during the site visit.

6.1 General Requirements

McIntosh Perry conducted the Site reconnaissance on August 1, 2018 (from approximately 9:55am to 11:00am). Bradley Sutherland of McIntosh Perry inspected the entirety of the property, and observed other properties in the Study Area from publicly accessible locations.

6.1.1 Qualifications of the Assessors

Field assessment for this report was undertaken by Bradley Sutherland, B.Sc. of McIntosh Perry. Bradley has successfully completed numerous Phase One ESAs for various clients in Ontario. Reporting was completed by Bradley Sutherland, B.Sc., Stefan Holik and Daniel Arnott, P.Eng. Daniel is an Ontario licensed Professional Engineer and a Qualified Person (QP) under O.Reg. 153/04, as amended, and has completed numerous Phase One and Two ESAs across Ontario. Stefan Holik is an environmental technician with extensive knowledge of Phase One reports.

McIntosh Perry is licensed to practice engineering and geoscience in the Province of Ontario. McIntosh Perry holds Certificates of Authorization with the Professional Engineers of Ontario (PEO) and the Association of Professional Geoscientists of Ontario (APGO) and is a full member of the Consulting Engineers of Ontario (CEO).

6.1.2 Weather Conditions at Time of Inspection

Weather conditions at the time of the Site visit was overcast and approximately 27 degrees Celsius.

6.1.3 Property Occupancy/Use Status at Time of Inspection

The Site currently consists of three lots, addressed as 6310, 6320 and a section with no address on Hazeldean Road.

- The site is occupied by three 1-storey buildings (two modular buildings and one permanent building with a concrete block foundation). The rest of the property is open land used as storage.

Land use in the vicinity is shown on Figure 4.

6.1.4 Site Photographs

Photographs of the Site are included in Appendix F. A brief description is included with each photograph, including location and orientation where applicable.

6.2 Description of Investigations

The Phase One component of the current investigation is a preliminary environmental screening that aims to provide a qualitative assessment of the environmental condition of the site based on a review of available information pertaining to the Site, observations made during a Site visit, and information from interviews with people who have knowledge of the Site and its history.

The Phase One portion of the current investigation includes the following components:

- A review of available background information;
- Interviews with person(s) knowledgeable about the site;
- Site reconnaissance; and
- Freedom of information requests (Ministry of the Environment, Conservation and Parks (MECP) and the Technical Standards and Safety Authority (TSSA))

6.2.1 Phase One Property

The Site consists of three land parcels, addressed as 6310, 6320 and a section with no address on Hazeldean Road. The Site consists of three one-storey buildings. Directly behind the three parcels is open land followed by a treed area. The Site is zoned AM9, which is Arterial Mainstreet Zone as described under section 185-186 of the City of Ottawa Zoning by-laws.

The Zoning allows for the intended future use of the property.

6.2.2 Phase One Study Area

The Study Area consists primarily of residential and commercial properties.

6.3 Specific Observations at the Phase One Property

6.3.1 Structures and Other Improvements

The Site is currently occupied by three one-story commercial buildings and associated parking areas. The area around the buildings is used for concrete patio stone storage.

6.3.2 Below Ground Structures

No below ground structures were observed at the Site.

6.3.3 Storage Tanks

One former diesel above ground storage tank and one current propane above ground storage tank.

6.3.4 Hazardous Materials

Large quantity of efflorescence remover chemical.

6.3.5 Potable and Non-Potable Water Sources

Buildings are serviced by a well.

6.3.6 Underground Service Trenches

No underground service trenches were observed at the site.

6.3.7 Exit and Entry Points

All exit and entry points to the Site were inspected. No concerns were identified.

6.3.8 Existing and Former Heating Systems

The garage has a propane heater and the office has baseboard electrical heaters.

6.3.9 Cooling Systems

A portable window A/C unit was observed in the office building.

6.3.10 Drains, Pits, and Sumps

A floor drain was observed in the permanent building (former garage). The drain was observed to be filled with gravel. The discharge location of the drain is unknown.

6.3.11 Unidentified Substances

None observed.

6.3.12 Stains and/or Corrosion Near Drains, Pits, and Sumps

None observed.

6.3.13 Well Details

One well was observed at the Site.

6.3.14 Details of Sewage Works

A septic field was observed behind the buildings.

6.3.15 Ground Surface Details

Ground surface was primarily fine grained gravel with small areas of vegetation. No issues were identified with ground surface.

6.3.16 Current and Former Railway Lines

The site inspection did not indicate the presence of current or former rail lines at the Site or on adjacent properties.

6.3.17 Staining to Soil, Vegetation, or Pavement

Some staining on the gravel was observed with no apparent odour.

6.3.18 Stressed Vegetation

No stressed vegetation was observed.

6.3.19 Fill and Debris

Gravel to fill pot holes was observed during the site visit.

6.3.20 Mould

No mould-like substances were observed.

6.3.21 Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs)

No PCAs were observed during the site visit on August 1, 2018.

6.4 Surrounding Properties

Surrounding land use in the vicinity of the Site generally consisted of the following:

- North – Hazeldean Road, Carp Road, residential and commercial
- East – Residential
- South – Residential
- West – Hazeldean Road, commercial and residential

Two off-site PCA were observed during McIntosh Perry's site visit on August 1, 2018.

- 6250 Hazeldean Road – Petro Canada – Retail Fuel Outlet
- 1174 Carp Road – Open Roads RV – RV Dealership

The potential of these PCAs resulting in APECs for the Site is considered in Section 7.2.

7.0 REVIEW AND EVALUATION OF INFORMATION

The following sections provide a review, and evaluation and an interpretation of the information from the records review, interviews and site reconnaissance.

7.1 Current and Past Uses of Phase One Property

The following table summarizes the land use history of the subject Site:

Table 6: Current and Past Uses of the Phase One ESA Property

Year	Name of Owner	Description of Property Use	Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
Prior to 1932	Not identified	Address not listed	Vacant	No Information
1932-1978	Not identified	Agricultural	Vacant	Earliest air photo (1932) shows the Site as vacant farm land
1978-1996	Not identified	Commercial	Unknown	Air photo from 1978 shows the Site developed to approximate current conditions.
1996-2007	Foran R V's Ltd	Commercial RV sales	Commercial	City Directories show the Site listed as commercial
2007-present	Techo-Bloc	Commercial concrete block sales and storage	Commercial	City Directories and site visit show the Site as commercial

7.2 Potentially Contaminating Activities

Two PCAs were identified at, on, or under the Site.

- 6310 Hazeldean Road
 - Above ground storage tank
 - Former RV service garage

Three off-site PCAs were identified in the Phase One ESA Study Area.

- 6250 Hazeldean Road
 - RV Dealership

- 1174 Carp Road
 - retail fuel outlet
- 1189 Carp Road
 - Oil Changers automotive garage
 - Commercial self-serve car wash

The above listed items are referenced on Figure 5.

7.3 Areas of Potential Environmental Concern (APEC)

The above noted on-site PCAs are considered to result in an APEC for the Site. Due to the limited information available for the previous use of the Site and presence of an automotive garage, it is possible that the operations have had impacts to the soil and groundwater in the vicinity of the garage and fuel storage tank.

The above noted Off-site PCA are areas of environmental concern that have the possibility of impacting on-site soil and groundwater conditions.

7.4 Phase One Conceptual Site Model

The Phase One Conceptual Site Model is based on information presented in the following Figures:

- Figure 2 shows structures and features on-site and those on properties immediately surrounding the Site.
- Figure 3 shows all other buildings and structures in the Phase One ESA study area
- Figure 4 shows drainage features in the local area.
- Figure 3 shows the names of all roads in the Phase One ESA study area.
- Figure 3 shows land use of properties adjacent to the subject property.
- Figure 5 shows areas where potentially contaminating activities (PCAs) have occurred and areas of potential environmental concern (APEC).

No areas of natural significance are present in the Phase One ESA study area.

Available topographic, surface drainage and hydrogeological information suggests that the direction of shallow groundwater flow is northward toward Feedmill Creek and from there to the Carp and Ottawa Rivers.

8.0 CONCLUSIONS

Two PCAs were identified at, on, or under the Site.

- 6310 Hazeldean Road
 - Above ground storage tank
 - Former RV service garage

Three off-site PCAs were identified in the Phase One ESA Study Area.

- 6250 Hazeldean Road
 - RV Dealership
- 1174 Carp Road
 - Retail fuel outlet
- 1189 Carp Road
 - Oil Changers automotive garage
 - Commercial self-serve car wash

The above noted on-site PCAs are considered to result in an APEC for the Site. Due to the limited information available for the previous use of the Site and presence of an automotive garage, it is possible that the operations have had impacts to the soil and groundwater in the vicinity of the garage and fuel storage tank.

The above noted Off-site PCA are areas of environmental concern that have the possibility of impacting on-site soil and groundwater conditions.

8.1 Is a Phase Two ESA Required?

Based on the presence of on-site PCAs resulting in APECs, ***a Phase Two ESA is recommended at this time*** to assess whether the historical presence of the RV service garage and aboveground fuel storage tank have impacted soil and groundwater quality at the Site.

9.0 LIMITATIONS

This report has been prepared, and the work referred to in this report has been undertaken by, McIntosh Perry Consulting Engineers Ltd. for Marco Recine and BBS Construction (Ontario) Ltd. It is intended for the sole and exclusive use of Marco Recine and BBS Construction. The report may not be relied upon by any other person or entity without the express written consent of McIntosh Perry Consulting Engineers Ltd. (in the form of a Reliance Letter).

Any use which a third party makes of this report, or any reliance on decisions made based on it, without a Reliance Letter are the responsibility of such third parties. McIntosh Perry Consulting Engineers Ltd. accepts no responsibility for damages, if any, suffered by any third party as a result of decisions made or actions based on this report.

Some of the information presented in this report was provided through maps, air photographs, and environmental reports. While attempts were made, whenever possible, to obtain a minimum of two confirmatory sources of information, McIntosh Perry Consulting Engineers Ltd., has, in certain instances, been required to assume that the information provided is accurate.

The conclusions presented represent the best professional judgment of the assessor based on current environmental standards and on the site conditions observed during the site inspection on August 01, 2018. External areas of the properties were observed from the yard of 6310 Hazeldean Road and other publically accessible locations. Due to the nature of the investigation and the limited data available, the assessor cannot warrant against undiscovered environmental liabilities.

Should additional information become available, McIntosh Perry Consulting Engineers Ltd. requests that this information be brought to our attention so that we may re-assess the conclusions presented herein.

Phase One Environmental Site Assessment
6310 Hazeldean Road, Stittsville, ON

CP-18-0052

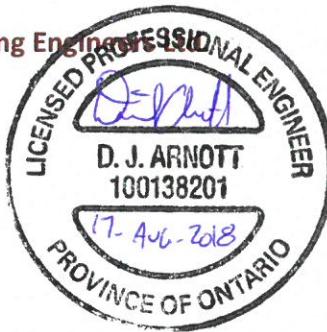

We trust that this information is satisfactory for your present requirements. Should you have any questions or require additional information, please do not hesitate to contact the undersigned.

Respectfully submitted,

McIntosh Perry Consulting Engineers

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. Note: Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial

AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

*Government Publication Date: Sept 2002**

Aggregate Inventory:

Provincial

AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2017

Abandoned Mine Information System:

Provincial

AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Nov 2016

Anderson's Waste Disposal Sites:

Private

ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private

AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Jan 31, 2018

Borehole:

Provincial

BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2014

Certificates of Approval:

Provincial

CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

*Government Publication Date: 1985-Oct 30, 2011**

Commercial Fuel Oil Tanks:

Provincial

CFOT

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: Feb 28, 2017

Chemical Register:

Private

CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2018

Compressed Natural Gas Stations:

Private

CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 31, 2012

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial

COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

*Government Publication Date: Apr 1987 and Nov 1988**

Compliance and Convictions:

Provincial

CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Nov 2017

Certificates of Property Use:

Provincial

CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Apr 30, 2018

Drill Hole Database:

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886-Nov 30, 2017

Dry Cleaning Facilities:

Federal

DRYCLEANERS

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2016

Environmental Activity and Sector Registry:

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Jun 30, 2018

Environmental Registry:

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Apr 30, 2018

Environmental Compliance Approval:

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Jun 30, 2018

Environmental Effects Monitoring:

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Feb 28, 2018

Environmental Issues Inventory System:

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

List of TSSA Expired Facilities:

Provincial

EXP

List of facilities with removed tanks which were once registered with the Fuels Safety Program of the Technical Standards and Safety Authority (TSSA). Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. Tanks which have been removed automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Feb 28, 2017

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: Jun 2000-May 2018

Fisheries & Oceans Fuel Tanks:

Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2017

Fuel Storage Tank:

Provincial FST

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: Feb 28, 2017

Fuel Storage Tank - Historic:

Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

*Government Publication Date: Pre-Jan 2010**

Ontario Regulation 347 Waste Generators Summary:

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-December 31, 2017

Greenhouse Gas Emissions from Large Facilities:

Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2016

TSSA Historic Incidents:

Provincial HINC

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

*Government Publication Date: 2006-June 2009**

Indian & Northern Affairs Fuel Tanks:

Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

*Government Publication Date: 1950-Aug 2003**

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

*Government Publication Date: 2001-Apr 2007**

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Mar 31, 2018

National Energy Board Wells:

Federal

NEBW

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

*Government Publication Date: 1920-Feb 2003**

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

*Government Publication Date: 1974-2003**

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

*Government Publication Date: 1988-2008**

National Pollutant Release Inventory:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGW

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-April 30, 2018

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Oct 2017

Inventory of PCB Storage Sites:

Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Apr 30, 2018

Canadian Pulp and Paper:

Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: 1988-Mar 2018

TSSA Pipeline Incidents:

Provincial PINC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: Feb 28, 2017

Private and Retail Fuel Storage Tanks:

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Apr 30, 2018

Ontario Regulation 347 Waste Receivers Summary:

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2016

Record of Site Condition:

Provincial

RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Apr 2018

Retail Fuel Storage Tanks:

Private

RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jan 31, 2018

Scott's Manufacturing Directory:

Private

SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial

SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Feb 2018

Wastewater Discharger Registration Database:

Provincial

SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2016

Anderson's Storage Tanks:

Private

TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Aug 2017

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial

VAR

List of variances granted for abandoned tanks. Under the Technical Standards and Safety Authority (TSSA) Liquid Fuels Handling Code and Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Government Publication Date: Feb 28, 2017

Waste Disposal Sites - MOE CA Inventory:

Provincial

WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Jun 30, 2018

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31, 2017

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

CERTIFICATE OF APPROVAL
MUNICIPAL AND PRIVATE SEWAGE WORKS
NUMBER 6863-6FHQVH
Issue Date: September 19, 2005

City of Ottawa
110 Laurier Avenue West
Ottawa, Ontario
K1P 1J1

Site Location: Hazeldean Road & Carp Road intersection
Ottawa City, Ontario

You have applied in accordance with Section 53 of the Ontario Water Resources Act for approval of:

storm sewers to be reconstructed in the City of Ottawa, on Hazeldean Road and Carp Road intersection, all in accordance with the application from the City of Ottawa, dated August 8, 2005, including final plans and specifications prepared by McCormick Rankin Corporation.

In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, as amended, you may by written notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 101 of the Ontario Water Resources Act, R.S.O. 1990, Chapter 0.40, provides that the Notice requiring the hearing shall state:

1. The portions of the approval or each term or condition in the approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The Certificate of Approval number;
6. The date of the Certificate of Approval;
7. The name of the Director;
8. The municipality within which the works are located;

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*
Environmental Review Tribunal
2300 Yonge St., 12th Floor
P.O. Box 2382
Toronto, Ontario
M4P 1E4

AND

The Director
Section 53, *Ontario Water Resources Act*
Ministry of the Environment
2 St. Clair Avenue West, Floor 12A
Toronto, Ontario
M4V 1L5

* Further information on the Environmental Review Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 314-4600, Fax: (416) 314-4506 or www.ert.gov.on.ca

The above noted sewage works are approved under Section 53 of the Ontario Water Resources Act.

Dear Sir/Madam,

We have been authorized to perform a Phase I Environmental Site Assessment (ESA) for the above-noted properties located in Ottawa, Ontario. As part of the ESA we are required to review past environmental occurrences on the subject property. In order to perform this part of the research, we would like to enquire as to whether or not your office has any record of Orders, Approvals or other documentation pertaining to this property.

Thank you in advance for all of your assistance with this request.

If you have any further questions or require further clarification, please do not hesitate to contact the undersigned.

Subject: RE: Environmental (Phase 1 ESA) Information Request (No Record Found)

Good afternoon Daniel. Thank you for your request for confirmation of public information.

We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationservices@tssa.org or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Jan
