**Phase One  
Environmental Site Assessment**

725 Somerset Street West  
Ottawa, Ontario

Prepared for:

1303263 BC ULC.  
725 Somerset Street West  
Ottawa, Ontario  
K1R 6P7

Attention: Alessandro Argentina

## EXECUTIVE SUMMARY

1303263 BC ULC. has retained LRL Associates Ltd. (LRL) to complete a Phase One Environmental Site Assessment (ESA) on the property located at 725 Somerset Street West, Ottawa, Ontario (herein referred to as the “Site”). The Site is currently developed with a multi-tenant commercial building and asphalt parking lot set within a commercial area of Ottawa, Ontario. The existing developments on the Site are estimated to have been constructed in the 1980’s. The assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and the adjacent lands. A historical review of the Site was conducted, as well as contact with relevant regulatory agencies, a walk-through Site inspection of the property and interviews with those knowledgeable of the Site. It is our understanding that this Phase One Environmental Site Assessment is required for the above referenced property in support of a Site Plan Application with the City of Ottawa, to support the creation of 9-storey mixed use building, including 100 residential units.

The subject Site and neighbouring lands are serviced by municipal water supply and wastewater system. The area can be considered to be Table 3 Industrial, Commercial and Community (ICC) Use in a Non-Potable Ground Water Condition, although, based on available geological information collected, bedrock is estimated range between approximately 0.6 m and 5.1 m below grade, therefore the Site is likely considered a shallow-soils property. Unless confirmed otherwise, the better suited site condition standard for the Site is the Table 7: Generic Site Condition Standards for Shallow Soils in a Non-Potable Ground Water Condition, ICC.

The Site is a rectangular shape, with a total area of approximately 1,000 m<sup>2</sup> or 0.25 acres. The Site is currently occupied by a multi-tenant commercial building, including office space, restaurant, and retail and has been used for commercial purposes since at least the late 1920’s. The Site is accessible by the way of Empress Avenue, west of the Site, and Somerset Street West borders the southern perimeter of the property.

Based on available interactive mapping systems, including The Atlas of Canada – Toporama, the groundwater flow direction is interpreted to be to the north/north easterly towards the Ottawa River, located approximately 1.1 km north of the Site.

Based on the results of the Phase One Environmental Site Assessment the following areas of potential environmental concern were identified:

APEC	Location	Comments	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entirety of Site	<b>PCA Other:</b> Use of formaldehyde and other associated chemicals. Related to the former funeral parlor operations and likely storage of chemicals.	Metals, VOCs, formaldehyde.	Soil and groundwater
APEC 2	Entirety of Site	<b>PCA 30:</b> Importation of Fill Material of Unknown Quality. To address the likely presence of fill of unknown origin.	VOC, PHC, Metals, Inorganics.	Soil
APEC 3	Southwest corner of the Site	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.  <b>PCA 52:</b> Storage, maintenance, fuelling and repair of equipment, vehicles and materials used to maintain transportation systems.  To address possible impacts associated with the historical neighbouring automotive garage and fuel handling facility.	VOC, PHC, Metals and PAH.	Soil and Groundwater
APEC 4	Southern portion of the Site	<b>PCA Other:</b> Waste Generators. To address the records retrieved of light fuel and pigments/coatings/paints up-gradient of the Site.	VOC, PHC, and Metals.	Soil and Groundwater
APEC 5	Western portion of the Site	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks. To address the records of the former boiler system in the basement of the property to the west of the Site.	PAH, VOC and PHC.	Soil and Groundwater
APEC 6	Southern portion of the Site	<b>PCA Other:</b> Spills. To address the records of spills retrieved up-gradient of the Site.	VOC, PHC, Metals and PAH	Soil and Groundwater

Notes: PEC – Potential Environmental Concern  
 PHC – Petroleum Hydrocarbons  
 PAH – Polycyclic Aromatic Hydrocarbons

## 1 INTRODUCTION

1303263 BC ULC. has retained LRL Associates Ltd. (LRL) to complete a Phase One Environmental Site Assessment (ESA) on the property located at 725 Somerset Street West, Ottawa, Ontario (herein referred to as the "Site"). The Site is currently developed with a multi-tenant commercial building and asphalt parking lot set within a commercial area of Ottawa, Ontario. The existing developments on the Site are estimated to have been constructed in the 1980's.

The assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and the adjacent lands. A historical review of the Site was conducted, as well as contact with relevant regulatory agencies, a walk-through Site inspection of the property and interviews with those knowledgeable of the Site. It is our understanding that this Phase One Environmental Site Assessment is required for the above referenced property in support of a Site Plan Application with the City of Ottawa, to support the creation of 9-storey mixed use building, including 100 residential units.

The subject Site and neighbouring lands are serviced by municipal water supply and wastewater system. The area can be considered to be Table 3 Industrial, Commercial and Community (ICC) Use in a Non-Potable Ground Water Condition, although, based on available geological information collected, bedrock is estimated range between approximately 0.6 m and 5.1 m below grade, therefore the Site is likely considered a shallow-soils property. Unless confirmed otherwise, the better suited site condition standard for the Site is the Table 7: Generic Site Condition Standards for Shallow Soils in a Non-Potable Ground Water Condition, ICC.

The Site is a rectangular shape, with a total area of approximately 1,000 m<sup>2</sup> or 0.25 acres. The Site is currently occupied by a multi-tenant commercial building, including office space, restaurant, and retail and has been used for commercial purposes since at least the late 1920's. The Site is accessible by the way of Empress Avenue, west of the Site, and Somerset Street West borders the southern perimeter of the property.

Based on available interactive mapping systems, including *The Atlas of Canada – Toporama*, the groundwater flow direction is interpreted to be to the north/north easterly towards the Ottawa River, located approximately 1.1 km north of the Site.

## 1.1 Phase One Property Information

The Phase One Property Information is summarized below in the following **Table 1** and **Table 2**:

**Table 1: Phase One Property Information – Authorized and Regulation**

Parameters	Information
<b>Work Authorization</b>	The formal authorization to proceed with the Phase One ESA was received by LRL on April 13, 2023.
<b>Purpose of Phase One ESA</b>	<p>A Phase One ESA is required for the above referenced property in support of a Site Plan Application with the City of Ottawa, to support the created of a 9-storey mixed-use building, including 100 residential units at the above-mentioned address.</p> <p>This assessment was conducted to identify potential environmental concerns or liabilities related to the past and present operations conducted on the property and adjacent lands. The Phase One ESA identifies the existing environmental conditions and potential environmental liabilities associated with the subject property, focusing on the possible presence of contamination on the property. It includes a review of available information (historical data and aerial photographs) and a visual Site inspection to assess potential evidence of past or present activities conducted on the property itself and on adjacent properties that could be potentially contaminating activities (PCA).</p> <p>Potential contamination represents the uncontrolled release of foreign substances within the natural environment. Such an event can result in air, soil and groundwater contamination that may represent environmental liabilities towards the Site and perhaps towards adjacent properties. The ESA evaluates in a consistent manner, within the time constraints imposed for this report, whether such events have occurred at this Site. This level of work is a method of risk reduction and does not eliminate risk for the client.</p>
<b>Record of Site Condition</b>	A Record of Site Condition (RSC) is required as part of the proposed land re-development activities. The RSC will be filled at a later date to support occupancy of the proposed development.
<b>Regulation/Guideline used for Phase One ESA</b>	<ul style="list-style-type: none"> <li>• Canadian Standards Association (CSA) Phase One Environmental Site Assessment, Z768 01 (R2016);</li> <li>• Guidance on Sampling and Analytical Methods for Use at Contaminated Sites in Ontario, Ontario Ministry of the Environment and Energy, December 1996; and</li> <li>• Ontario Regulation (O. Reg.) 153/04, as amended.</li> </ul>
<b>Sampling and Testing</b>	As part of a Phase One ESA, in-situ sampling, measuring, testing or analysing the conditions and characteristics of soil, groundwater, or building materials (if applicable), across the subject Phase One ESA Site is not included. These activities would be completed as part of a Phase Two ESA or a designated substance and hazardous material survey, if required.
<b>Reliance of Report</b>	This report is intended for the sole use of Upstay Canada Inc. and their authorized agents. LRL Associates Ltd. will not be responsible for any use of the information contained within this report by any third party.

**Table 2: Phase One Property Information**

<b>Parameters</b>	<b>Information</b>
<b>Location/Address</b>	725 Somerset Street West, Ottawa, Ontario The location of the Site is presented in the included <b>Figure 1</b> .
<b>Property Identification Number (PIN)</b>	PIN#: 04111-0143 (LT)
<b>Legal Description</b>	Parts 1 & 2 e/s Empress Ave Plan 11285, Part Reserve Plan 11285
<b>Dimensions</b>	725 Somerset Street West: Irregular shape, being approximately 25 m wide (east-west) by approximately 30 m (north-south). The general Site configuration is shown on the Site Plan in <b>Figure 2</b> . For the purposes of this report Somerset Street West will be inferred as running in an east-west direction.
<b>Area</b>	Approximately 1,000 m <sup>2</sup> or 0.25 acres.
<b>Frontage / Access to Phase One ESA Property</b>	Somerset Street West along the southern extent and Empress Avenue along the western extent.
<b>Occupancy</b>	Commercial.
<b>Current Land Use</b>	Commercial. The Phase One ESA property has been used for commercial purposes since at least the late 1920's. Present operations or tenants include retail space, office space and a restaurant.
<b>Proposed Land Use</b>	Residential & Commercial. More specifically, a 9-storey mixed use building, including 100 residential units.
<b>Zoning</b>	Residential First Density Zone (R1)
<b>Phase One ESA Property Owner</b>	1303263 B.C. Unlimited Liability Company. The current property owners have owned the Phase One ESA property since May 2021.
<b>Phase One ESA Property Contact</b>	Alessandro Argentina, Co-owner of Site

LRL Associates Ltd. was retained by the proposed property developer owner to complete the Phase One ESA.

## 2 SCOPE OF INVESTIGATION

The Phase One ESA scope of the investigation is generally summarized in the following **Table 3**:

**Table 3: Phase One ESA Scope of Investigation**

Parameter	Information
Regulation/Guideline used as part of the Phase One ESA	<p>The Phase One ESA was carried out in general accordance with the following regulations and guidelines:</p> <ul style="list-style-type: none"> <li>• Canadian Standards Association (CSA) Phase One Environmental Site Assessment, Z768 01 (R2016);</li> <li>• Protocol for Analytical Methods Used in the Assessment of Properties under Part XV.1 of the Environmental Protection Act and Excess Soil Quality, Ministry of the Environment, Conservation and Parks, March 9, 2004 (PIBS 4696), amended as of July 1, 2011 and as of February 19, 2021; and</li> <li>• Parts I through VI of Schedule D of O. Reg. 153/04, as amended, made under the Environmental Protection Act (R.S.O. 1990, Chapter E.19).</li> </ul>
Records Review	<p>The Phase One ESA study area included a minimum radius from the Site boundaries of 300 m. Extending the study area beyond that of 250 m radius was dependent on the Record of Site Condition being required for this Phase One ESA.</p> <p>The records which were reviewed and interpreted as part of the assessment, for the Phase One ESA property, and the Phase One ESA study area, included: Chain of Title Search; Fire Insurance Plans; Aerial Photographs including historical and current imagery; Topographical, Physiography, and Geological Maps; Previous Investigation reports for the Phase One ESA property, including Phase One ESAs, Phase Two ESA, or Geotechnical Reports; Well Head Protection Areas, Areas of Natural and Scientific Interest (ANSI) as maintained by the Ontario Ministry of Natural Resources; Water Well Information Systems; Permits to Take Water; Waste Disposal sites; Waste Generators &amp; Receiver Information (Ontario Regulation 347); Private &amp; Retail Fuel Storage Tanks (TSSA); Coal Gasification Plants and Coal Tar and Related Tar Industries, Certificates of Approval; Environmental Compliance Reports; Orders; Spills; Notices; Offences or Inspection Reports by the Ontario Ministry of the Environment, Conservation and Parks (MECP); Inventory of PCB Storage Sites; RSC on adjoining property; Certificates of Property Use; National Pollution Release Inventory (NPRI); National PCB Inventory; and all other available illustrated atlases, land registry records and government records.</p> <p>A Freedom of Information (FOI) request was made to the MECP, as well as to the City of Ottawa, for a record search in relation to reportable spills, orders, and convictions associated with the Phase One Property.</p> <p>A Historical Land Use Inventory (HLUI) request was made to the City of Ottawa as part of this Phase One ESA.</p> <p>EcoLog Environmental Risk Information Service (ERIS) was obtained to complete searches in all available environmental databases, including but not limited to the following:</p> <ul style="list-style-type: none"> <li>• National Pollutant Release Inventory (NPRI); PCB information;</li> <li>• Environmental Approvals, permits and certificates;</li> </ul>

	<ul style="list-style-type: none"> <li>• Inventory of coal gas plants; Records concerning environmental incidents;</li> <li>• Waste management records including Ontario Regulation 347 Waste Generators;</li> <li>• Fuel storage tanks information including Technical Standards and Safety Authority (TSSA) database;</li> <li>• Landfill information; and</li> <li>• Records of Site Condition</li> </ul>
Interview	Interviewing current and previous owners and/or tenants and local and provincial authorities who have knowledge of the Phase One ESA property.
Site Reconnaissance	<p>The Site reconnaissance consisted of a walk-through of the Phase One Property including a visual inspection of the current land use for the purpose of validating the current and past land uses of Phase One Property that will be identified by the historical searches.</p> <p>The observations of the Phase One ESA property, and those of the Phase One Study Area, were used to further identify the potential presence of staining, or distressed vegetation which may be indication of a possible environmental concern.</p>
Records and Observations Evaluation	The information gathered from the records review, interview, and Site reconnaissance were reviewed and evaluated for any Potentially Contaminating Activities (PCAs) and any Areas of Potential Environmental Concerns (APECs).
Reporting	Preparation of a Phase One ESA Report, that includes and summarizes the findings of the assessment and records evaluation and provides recommendations for further investigation (if necessary).

This report will present the results of the ESA carried out between April 17, 2023, and May 16, 2023.

### 3 RECORDS REVIEW

#### 3.1.1 First Developed Use Determination

First developed use is defined by O. Reg. 153/04 Section 22 (1) as the first property use after 1875 that resulted in a building or structure or the first potentially contaminating activity, whichever is earlier. The first development use was established from a review of available Aerial Photographs (Section 3.6.1 for further detail); City Directory (Section 3.2 for further detail) in addition to observations made at the time the Site Reconnaissance.

725 Somerset Street West has been developed since at least the early 1920's (at least 1922) for commercial and residential purposes.

Records retrieved, and as outlined in later sections within this report, confirm residential use.

#### 3.1.2 Fire Insurance Plans

Fire Insurance Plans (FIP) mapped streets and buildings of urban Canada in great detail and illustrate building construction, occupancy and potential fire hazards. They also provide detailed information regarding storage tanks, transformers, boilers and electrical rooms. The original plans

were produced between 1875 and 1923 and continued to be produced and updated until production ceased in 1974. A copy of the Fire Insurance Plans is included in **Appendix A**.

<b>Year:</b>	1912
<b>Description of area covered:</b>	Extending from between north of Christie "Street" and south of Gladstone Avenue, west to Arthur "Street" and east to Bronson Avenue. Does not encompass the subject Site, or adjacent lands.
<b>Lot &amp; address number:</b>	Not applicable.
<b>Description of Features in the Phase One Property:</b>	Not applicable. The plan does not include the corresponding Phase One Property. The area depicted in the insurance plan includes primarily high-density residential development and institutional (public school).
<b>Relevant information regarding potentially contaminating activity and area of potential environmental concern:</b>	No potential environmental concerns were identified.

<b>Year:</b>	1922
<b>Description of area covered:</b>	From Wellington Street to the north, Booth Street to the west, Percy Street to the east, and Gladstone Street to the south.
<b>Lot &amp; address number:</b>	The Site is identified as 126 Victoria Street (now Empress Street).
<b>Description of Features in the Phase I Property:</b>	At the time of this survey, the subject property is developed with a suspected commercial development, which encompasses the majority of the eastern and southern portion of the Site. The adjacent properties are developed with inferred residential and select commercial developments including a pharmacy. A fire station is reported to the northeast, and the St. Jean Baptist School is located immediately west of the Site, following Victoria Street, and the St. Jean Baptist Church to the northwest.
<b>Relevant information regarding potentially contaminating activity and area of potential environmental concern:</b>	The neighbouring St. Jean Baptist School is noted to have a boiler. The source of power for the boiler is un-identified, however they are commonly fired by petroleum-based products, which presents a possible risk for environmental concern to the Site based on it's general up-gradient location, and presents a potentially contaminating activity (PCA) across the western portion of the Site.

<b>Year:</b>	1948
<b>Description of area covered:</b>	From Laurier/Albert Street to the north, Booth Street to the west, Percy Street to the east, and south of Arlington Street to the south.
<b>Lot &amp; address number:</b>	733 Somerset Street West, and 126 Empress Avenue
<b>Description of Features in the Phase I Property:</b>	<p>At the time of this survey, a comparable development footprint as that identified in the 1922 FIP is present. The building is a 1.5 to 2.5 storey structure occupied by a funeral parlor.</p> <p>Generally, the adjacent properties appear comparable to that noted in the 1922, with the St. Jean Baptist School to the west and previously identified boiler.</p> <p>Down-gradient of the property, approximately 50 m north of the Site is the Producers Dairy Ltd., including two (2) garage structures and an underground storage tank.</p> <p>St. Lukes Church is located south of the Site, following Somerset Street West.</p>
<b>Relevant information regarding potentially contaminating activity and area of potential environmental concern:</b>	<p>The Site use as a funeral parlor represents a PCA across the entirety of the Site. Furthermore, as previously mentioned, the boiler system to the west of the Site at St. Jean Baptist School presents a potential environmental concern, and a PCA across the western portion of the Site. Although the Producers Dairy Ltd., including two (2) garage structures and an underground storage tank north of the Site is not a potential environmental concern due to it's down-gradient location from the Site.</p>

<b>Year:</b>	1963
<b>Description of area covered:</b>	From Albert Street to the north, Booth Street to the west, Cambridge Street to the east, and Willow Street to the south.
<b>Lot &amp; address number:</b>	733 Somerset Street West, and 126 Empress Avenue.
<b>Description of Features in the Phase I Property:</b>	<p>At the time of this survey, a comparable development footprint as that identified in the 1922 and 1948 FIP is present. The building is a 1.5 to 2.5 storey structure equipped with an ambulance shed, as well as the previously mentioned funeral parlor.</p> <p>Generally, the adjacent properties appear comparable to that noted in the 1922 and 1948, with the St. Jean Baptist School to the west and previously identified boiler.</p> <p>Producers Dairy Ltd., including two (2) garage structures and an underground storage tank, remains down-gradient of the Site, as mentioned in the 1948 FIP summary.</p> <p>A gasoline service station, equipped with two (2) underground storage tanks at the northern portion of the property, and a building with indication of 'oiling &amp; greasy', is located at 770 Somerset Street West, immediately up-gradient of the Site, following Somerset Street West.</p> <p>A parish hall and St. Lukes Church is located south of the Site, following Somerset Street West.</p>
<b>Relevant information regarding potentially contaminating activity and area of potential environmental concern:</b>	<p>The Site use as a funeral parlor represents a PCA across the entirety of the Site. Furthermore, as previously mentioned, the boiler system to the west of the Site at St. Jean Baptist School presents a potential environmental concern, and a PCA across the western portion of the Site. Although the Producers Dairy Ltd., including two (2) garage structures and an underground storage tank north of the Site is not a potential environmental concern due to it's down-gradient location from the Site, the gasoline service station identified to the south (up-gradient), and corresponding installations and activities presents a potential environmental concern, and a PCA at the Site along the southwestern extent.</p>

**Table 4: PCA’s Identified in the Fire Insurance Plans**

Location (distance and direction from Site)	PCA	Year of Appearance in FIPs
On-Site	PCA Other: Use of formaldehyde and other associated chemicals	1948 & 1963
Approximately 15 m West of Site – 755 Somerset Street West	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.	1922, 1948 & 1963
Approximately 30 m Southwest of the Site – 770 Somerset Street West	PCA 28: Gasoline and Associated Products Storage in Fixed Tanks  PCA 52: Storage, maintenance, fuelling and repair of equipment, vehicles and materials used to maintain transportation systems	1963

**3.1.3 Property Underwriters’ Report**

Property Underwriters Site Plans and Reports provide detailed information on a site-specific basis and include descriptions of building construction, heating sources, production processes, and the presence of chemicals or materials which may be stored on Site. They also indicate the presence of environmental hazards such as electrical rooms, transformers, boilers, and storage tanks. A copy of the Property Underwriters’ Report is included in **Appendix A**.

The inspection report was prepared in 2006 for 1394827 Ontario Ltd. for the subject property, 725 Somerset Street West, Ottawa. Information considered pertinent for the Phase One assessment included herein is outlined as follows:

- The Site is a two-storey development occupied by commercial tenants which include an Opticians retail outlet (Laurier Optical) on the ground floor, and a travel agency office on the second floor. Historically, the ground floor included a bank (financial institution);
- The Site is owned by 1394827 Ontario Ltd., and 759767 Ontario Ltd., and have owned the Site since approximately 1980;
- The building present on the Site was estimated to have been constructed in 1980 and has a total footprint area of 278 square meters; and
- No boiler systems, or heating fuel tanks were identified in the report.

Based on the details outlined in the Property Underwriters’ Report, no potential environmental concerns were identified, with the exception to the likely presence of fill of unknown origin inferred to be associated with the presence and demolition of historical structures present on the Site prior to 1980, as presented in the Fire Insurance Plans reviewed.

A second Property Underwriters’ Report was retrieved, dated 2007 for Kowloon Foods, at 725 Somerset Street West in Ottawa. The Insured are identified as 1394827 Ontario Ltd., and

Kowloon Foods. No additional information, with respect to that presented in the 2006 report, as described above, were retrieved. No further potential environmental concerns were identified.

### 3.2 Chain of Title

Land Titles contain legal title information concerning property ownership, transfer details, and any encumbrances such as mortgages or easements. Each time a new transaction occurs, property records are updated as soon as the instrument is registered. Schedule D of O. Reg. 153/04, as amended, specifies that the Chain of Title search should include all titles to date, dating back to Crown land. As this Phase One ESA is not required for an RSC, the Chain of Title search was completed back to Crown land.

The search of the Service Ontario Land Registry Office was completed by ERIS on May 16, 2023. A copy of the Chain of Title is included in **Appendix B**, and a summary of the pertinent information retrieved is summarized below in **Table 4**.

**Table 4: Chain of Title**

Property	Date	Party From	Party To
725 Somerset Street West PIN#: 04111-0143 (LT)	25/02/1809	Crown	Robert Randall
	20/12/1820	Sheriff Stewart	John Lebreton
	16/09/1853	John Lebreton – Estate	John Woodill
	22/10/1853	John Woodill	James Small
	08/09/1870	James Small	Elizabeth Taylor
	20/09/1871	Elizabeth Ross (Taylor)	Levi Crannell
	19/06/1875	Levi Crannell	John Hill
	29/12/1882	John Hill	Robert Shirley
	06/03/1885	Robert Shirley	Phillomena Dupuis
	06/04/1896	Phillomena Dupuis	Clara Dupuis
	25/06/1910	Clara Walters (Dupuis)	Edmund Bourque
	27/08/1924	Edmund Bourque	The Gauthier Company Limited
	30/04/1956	Clara Walters (Dupuis)	La Caisse Populaire St. Jean-Baptiste D'Ottawa Limitee
	12/09/1956	The Corporation of the City of Ottawa	La Caisse Populaire St. Jean-Baptiste D'Ottawa Limitee
	04/04/1968	The Gauthier Company Limited	La Caisse Populaire St. Jean-Baptiste D'Ottawa Limitee
	28/03/2006	La Caisse Populaire St. Jean-Baptiste D'Ottawa Limitee	La Caisse Populaire Vision Inc.
	28/03/2006	La Caisse Populaire Vision Inc.	1394827 Ontario Limited
	14/07/2006	1394827 Ontario Limited	City of Ottawa
	14/07/2006	City of Ottawa	1394827 Ontario Limited
	21/05/2021	1394827 Ontario Limited	1303263 B.C. Unlimited Liability Company

### 3.3 Environmental Reports

No previous reports were provided to LRL prior to the completion of this Phase One ESA.

### 3.4 City Directories

City directories have been produced for most urban and some rural areas since the late 1800s. These directories are often archived in research and municipal libraries. The directories are generally not comprehensive and may contain gaps in time periods. Where available, city directories were reviewed in a minimum five-year increment to determine historical property use of the subject and adjoining properties. The City Directories search was completed by ERIS and included a search of the Vernon's Ottawa and Area, Ontario City Directory.

A copy of the City directory is included in **Appendix C**, and a summary of the findings is included below in **Table 5**:

**Table 5: City Directories**

Location	Details
<b>Years Searched:</b>	1920 – 2021
<b>Historical Property Uses:</b>	
<b>Subject Site:</b>	<b>725 Somerset Street West:</b> ADDRESS NOT LISTED (1920-1950); ST JOHN OLIVER, CONFY (1926); ST JOHN OLIVER BOOKS (1931); RES (1 TENANT) (1931-1936); WALTERS VLARA MRS. CONFY (1936); SEGUIN COLETTE CONFY (1941); RESIDENTIAL (1 TENANT) (1941-1990); WHITE & VICTOR CO (1956); CAISSE POPULAIRE (1961); CAISSE POPULAIRE ST-JEAN BAPTISTE D'OTTAWA (1966-1996/97); TIN-BO TRAVEL SERVICE LTD (1996-2006/07); CAISSES POPULAIRES DE L'ONTARIO REGION D'OTTAWA (2006-(2006/07); CAISSE POPULAIRE STJEANBPTST (2012); OPTICAL LAURIER (2012); TIN-BO TRAVEL SVC LTD (2012).
<b>Adjacent Land:</b>	<p><b>721 Somerset Street West:</b> OTTAWA BOYS CLUB (1936-1956); BUKOWINIAN GREEK CHURCH (1971-1987); CHRIST THE SAVIOUR ORTHODOX CHURCH (2006-(2006/07); CHRIST SAVIOUR ORTHODOX (2012); HOLY TRINITY BUKOWINIAN (2012); HOLY TRINITY CATHEDRAL (2012-2017); CHRIST SAVIOUR ORTHODOX CHURCH (2017).</p> <p><b>755 Somerset Street West:</b> DALHOUSIE RECREATION CENTER (1987); DOCTORS' OFFICES (1992); DALHOUSIE COMMUNITY CENTER (1992-2001/02); NANNY GOAT HILL NURSERY SCHOOL (1992-2012); NANNY GOAT HILL NURSERY (1996-2006/07); THE DOOR YOUTH CENTRE (1996-2006/07); DALHOUSIE HOUSING CO-OPERATIVE (1996-2012); WOMEN'S PLACE (2001-2006/07); CITY OF OTTAWA (2012); DALHOUSIE COMMUNITY CTR (2012); DOOR YOUTH CTR (2012); FEMMES PLACES AUX-CTR D'INFO (2012).</p> <p><b>760 Sommerset Street West:</b> SUNOCO CO SERVICE STATION (1931); SUN OIL CO LTD. SERV. STN. (1936); ST. LUKES CHURCH (1946-1950); ST. LUKE'S ANGLICAN CHURCH (1956-1976); CANTERBURY HOUSE (1981-(1981/82); SAINT LUKE'S ANGLICAN PARISH HALL &amp; CHURCH (1981-(1981/82); CHINESE ANGLICAN CHURCH (1987-2006/07); DOMICILE CONSTRUCTION DEVELOPMENT INC (1992); ST LUKE'S CHURCH (2001-(2001/02); ST PETER'S (2001-(2001/02); MILLENIUM LEARNING CENTRE (2006-(2006/07); ST LUKES ANGLICAN CHURCH (2006-(2006/07); ST PETER'S CHINESE ANGLICAN CHURCH (2006-(2006/07); MILLENIUM LEARNING CTR (2012); ST LUKE'S ANGLICAN CHURCH (2012); ST PETER'S CHINESE ANGLICAN (2012).</p>

**752 Somerset Street West:** DENTAL OFFICE (1931); CAPITOL DRIVING SCHOOL LTD (1966); PETER'S SCHOOL OF DRIVING (1966); TARTE'S DONALD SAFEWAY DRIVING SCHOOL (1966); SOMERSET WEST COMMUNITY HEALTH CENTRE (1992); CANDY HEAVEN (1996-(1996/97)); GOLDEN MILE HOLIDAYS INC (1996-(1996/97)); LYAN PHARMACY (2001-2012); SHOYO (2001-2012); GRACIOUS LIGHT CHRISTIAN CENTRE INC (2006-(2006/07)); LAURIER OPTICAL (2006-(2006/07)); GRACIOUS LIGHT CHRISTIAN CTR (2012); TRI OPTICAL (2012).

**118 Empress Avenue:** L'INSTITUT JEANNE D'ARC (1987); SOEURS DE L'INSTITUT JEANNE D'ARC (1992-2001/02); INUIT COMMUNITY CENTER (2006-(2006/07)); NUNAVUT LITERACY COUNCIL (2006-2012); INUIT COMMUNITY CTR (2012).

**96 Empress Avenue:** DOMINICAN COLLEGE & MONASTERY (1966); ST JEAN BAPTISTE RC CHURCH (1966-1976); LES FRERES PRECHEURS COLLEGE DOMINICAIN (1981-(1981/82)); DOMINION FATHERS OF OTTAWA (1987-2006); CONVENT (1992); DOMINION COLLEGE OF PHILOSOPHY & THEOLOGY (1992-1996/97); ST-JEAN-BAPTISTE (1992-2001); PAROISSES CATHOLIQUES ROMAINES OTTAWA (1992-2006); RECTORY & CONVENT (2001); COLLEGE DOMINICAIN DE PHILOSOPHIE ET DE THÉOLOGIE (2006); SAINT JEAN BAPTISTE CATHOLIC (2012); DOMINICAN COLLEGE-PHILOSOPHY (2012-2017); PAROISSE ST-JEAN BAPTISTE (2012-2017); PERES DOMINICAINS D'OTTAWA (2012-2021); COLLEGE UNIVERSITAIRE DOMINICAIN (2017); STE-GENEVIEVE EGLISE (2017); OMI LACOMBE CANADA INC (2017-2021); CATHOLIC HEALTH ALLIANCE-CND (2021); DOMINICAN UNIVERSITY COLLEGE (2021).

**Relevant information regarding potentially contaminating activity and areas of potential environmental concern**

Although the activities identified on the Site throughout the available periods documented by the City Directories do not indicate a potential environmental concern, it is known that the Site operated as a funeral home historically. Records dated back to 1926 (ST JOHN OLIVER, CONFY) provide further confirmation that the Site was developed prior to the current building being constructed in 1980. The presence of the former development on the Site is a potential environmental concern as the removal or demolition of structures can result in buried debris, or importation of the fill of unknown origin (PCA 30: Importation of Fill Material of Unknown Quality).

The previously listed SUNOCO CO SERVICE STATION (1931); SUN OIL CO LTD. SERV. STN. (1936) at 760 Sommerset Street West, approximately 30 m up-gradient of the Site, presents a potential environmental concern (PCA 28: Gasoline and Associated Products Storage in Fixed Tanks), and PCA at the southwestern extent of the Site.

### 3.5 Environmental Source Information

As part of the Phase One ESA, a search was completed of available Federal, Provincial and Private Databases. The search covered the Phase One ESA Site, as well as the Phase One Study Area. The information was obtained through the following search providers:

- EcoLog ERIS search provider;
- MECP Water Well Registry;
- MECP Freedom of Information (FOI) Request;
- City of Ottawa FOI, Historical Land Use Inventory (HLUI) Requests and other available related documents; and
- Technical Standards and Safety Authority (TSSA).

A summary of the records retrieved, pertaining to the Phase One ESA Study Area, interpreted from the ERIS reports received are summarized below in **Table 6**. A copy of the report provided is included in **Appendix C**.

**Table 6: Summary of ERIS Search Records**

Database Searched	Records Retrieved		Description of data, analysis and findings relevant to the Phase One ESA
	Phase One Property	Phase One Study Area	
National Pollutant Release Inventory	0	0	No records were found within a 300 m radius from the Site.
Certificate of Approvals (CofA)	0	16	<p>Sixteen (16) records were found, with six (6) of the sixteen (16) records being at an equal or higher elevation than the subject Site:</p> <ul style="list-style-type: none"> <li>• One (1) record was approximately 100 m northwest (down-gradient) of the Site in 1998, located at 100 Empress Avenue, as Des Jardins Cooperative which was approved for municipal sewage.</li> <li>• One (1) record was approximately 145 m east (trans-gradient) of the Site in 1992, located at the Cambridge Street and Somerset Street intersection as R.M of Ottawa-Carleton which was approved for municipal water.</li> <li>• Two (2) records were approximately 225 m northeast (down/ trans-gradient) of the Site in 1994, located at the Somerset Street and Bronson Avenue as Ottawa City which was approved for municipal sewage and municipal water.</li> <li>• Two (2) records were approximately 285 m north of the Site (down-gradient) in 1993, located at the 60 Cambridge Street North as</li> </ul>

			<p>Saint-Vincent Hospital which was approved for industrial Air and Municipal Sewage.</p> <p>The remaining records of CofAs retrieved do not represent any potential environmental concerns to the Site due to the type of operations and activities described.</p>
Commercial Fuel Oil Tanks (CFOT)	0	0	No records were found within a 300 m radius from the Site.
Pesticide Register (PES)	0	0	No records were found within a 300 m radius from the Site.
Permit to Take Water (PTTW)	0	1	One (1) record was found within 300 m of the Phase One Property. The record was noted as being down-gradient from the Phase One Property.
Environmental Activity and Sector Registry (EASR)	0	3	<p>Three (3) records were found within a 300 m radius from the Site. One (1) of the records were noted to be at an equal to higher elevation to the Phase One Site.</p> <p>One (1) record was approximately 285 north of the Site (down-gradient) in 2019, located at 60 Cambridge Street North, as Bruyere Continuing Care Inc which was an EASR for Air Emissions. It does not present a potential environmental concern due to its downgradient location of the Site.</p>
List of Expired Fuels Safety Facilities (EXP)	0	0	No records were found within a 300 m radius from the Site.
Ontario Regulation 347 Waste Generators Summary	0	43	<p>Forty-three (43) records were found, with one (1) of the records being located on the Phase One Property.</p> <p>The record retrieved for the Site was issued to Kone Inc. in 2011. No details related to the type of waste generated was provided. At this time the Site was occupied by an optical solutions retailer and a financial institution, therefore the likely waste type and quantities are inferred to be negligible, and not of concern for potential environmental risk.</p> <p>Thirty (30) waste generators were down- or trans-gradient with potential impact to the Phase One Property; and they were as follows:</p>

			<ul style="list-style-type: none"> <li>• Four (4) records at 708 Somerset Street, Ottawa, ON as Somerset Drugs, 90 m east (trans-gradient) of the Site.</li> <li>• One (1) record at 132 Cambridge Street, Ottawa, ON as Hydro Ottawa Limited, 125 m northeast of the Site (down-gradient).</li> <li>• One (1) record at 676 Somerset Street West, Ottawa, ON as Terrapex Environmental Ltd., 195 m east (trans-gradient) of the Site.</li> <li>• Twenty (20) records at 60 Cambridge Street North, Ottawa, ON, 180 m north (down-gradient) of the Site as Saint-Vincent Hospital, SCO Health Service and Bruyere Continuing Care Inc.</li> <li>• Two (2) records were retrieved for the property located at 104 Arthur Street. Tierney Stauffer is listed as a waste generator of light fuel in 2009 and in 2010. It is located approximately 75 m south of the Site (up-gradient).</li> <li>• One record was retrieved for Vans Pressure Cleaning at 43 Eccles Street, approximately 150 m southwest of the Site (up-gradient). They are registered as a generator of wastes from the use of pigments, coatings and paints as of November 2011.</li> <li>• Somerset West Community Health Centre, located at 55 Eccles Street, approximately 175 m southwest of the Site (up-gradient) has eleven (11) records retrieved. They include the generation of pharmaceuticals and pathological wastes from between 2011 through to as of October 2022. Due to the type of waste produced, it does not present a potential environmental concern to the Site.</li> <li>• Cornerstone Housing for Women Foundation, located at 314 Booth Street, approximately 230 m southwest of the Site (trans-gradient), is registered as a waste generator of Other Specified Inorganics, PCBs and Waste Oils and Lubricants.</li> </ul>
Record of Site Condition (RSC)	0	2	Two (2) records were found within a 300 m radius of the Site. One (1) being for the property located at Lebreton Street North, and the second being for 314 Booth Street.

Retail Fuel Storage Tanks (RST)	0	1	One (1) record was found within a 300 m radius of the Site. The record was for Bronson & Somerset Self Serve, located at 676 Somerset Street West, Ottawa, ON, approximately 160 m east (trans-gradient) of the Site. The facility is identified as a Service Stations – Gasoline, Oil & Natural Gas, with no additional details. It does not present a potential environmental concern to the Site based on it's trans-gradient location.
Environmental Registry (EBR)	0	1	One (1) record was found within a 300 m radius of the Site. 8069565 Canada Inc. is listed to have an Instrument Decision notice date of July 23, 2018. The EBR is for an ECA for sewage at 160 Cambridge Street North, approximately 160 m southeast (trans-gradient) of the Site. It does not present a potential environmental concern to the Site based on it's trans-gradient location.
ERIS Historical Searches (EHS)	3	47	Forty-seven (47) records were retrieved, three (3) of which were found to be on the Phase One Site. These records retrieved are likely from previous Environmental Site Assessments completed on the neighbouring properties.
Water Well Information System (WWIS)	0	36	<p>Thirty-six (36) records were found. Of which, the following were indicated as monitoring, observation or test holes, which could be an indication of a possible contamination source or contaminating activity, although the record of such a well cannot be considered as a definite concern, but more a rationale to investigate further into the past or present uses through a Phase One ESA as included herein:</p> <ul style="list-style-type: none"> <li>• 770 Somerset Street West, located approximately 70 m southwest (up-gradient) registered nine (9) wells in December 2012, and one (1) in December 2013;</li> <li>• 787 Somerset Street, located approximately 170 m west of the Site (trans-gradient) registered one (1) well in May 2019;</li> <li>• 676 Somerset Street West, approximately 220 m west (trans-gradient) of the Site registered five (5) wells in July 2013;</li> <li>• 104 Arthur Street, approximately 70 m southeast of the Site (up-gradient) registered two (2) wells in 2010;</li> </ul>

			<ul style="list-style-type: none"> <li>• 13 Lebreton Street, located approximately 55 m south of the Site (up-gradient) registered three (3) wells in December 2013;</li> <li>• 55 Eccles Street, located approximately 155 m southwest of the Site (trans-gradient) registered one (1) well in June 2013;</li> <li>• 310 Bronson Avenue, approximately 180 m east of the Site (trans-gradient) registered one (1) well in Jan 2015;</li> <li>• 49 Lorne Avenue, approximately 220 m north of the Site (down-gradient) registered one (1) well in August 2019;</li> <li>• 66 Lebreton Street, located approximately 230 m south of the Site (up-gradient) registered two (2) wells in April 2021 and one (1) in April 2016;</li> <li>• At the intersection of Christie Street and Bronson Avenue, approximately 280 m southeast (trans-gradient) of the Site, has one (1) well registered in May 2020; and</li> <li>• 43 Empress Avenue, located approximately 180 m north of the Site (down-gradient) registered one (1) well in August 2019.</li> </ul>
Environmental Condition Reports	--	--	Not included in Phase One ESA ERIS searches.
Areas of Natural Significance	--	--	Not included in Phase One ESA ERIS searches.
Fuel Oil Spills and Leaks (INC)	--	4	<p>Four records were retrieved within 300 m of the Site, which are summarized as follows:</p> <ul style="list-style-type: none"> <li>• A leak of approximately 190 L of an unspecified material occurred at 104 Arthur Street, approximately 170 m southeast (trans-gradient) of the Site. The date of the occurrence was not specified;</li> <li>• In January 2011, a propane release occurred at 22 Bell Street North from a residential heating unit. Due to the type of product released, it does not present a potential concern to the Site;</li> <li>• In September 2012, a fuel oil leak occurred at 675 Somerset Street West, approximately 190 m east of the Site (trans-gradient). No further details are available, although is not a risk for potential environmental concern due to its location trans-gradient of the Site; and</li> <li>• A Fuel Storage incident occurred at 91 Cambridge Street North, approximately 180 m northeast (down-gradient) of the Site which</li> </ul>

			<p>resulted in a pipeline hit from a hand shovel. The date of the incident is not identified.</p>
TSSA Pipeline Incidences (PINC)	0	12	<p>Twelve (12) records were found within a 300 m radius of the Site. All of which were for a natural gas pipeline break or related incident, with one exception as mentioned below. The remaining releases of natural gas are not a concern to the environmental conditions of the Site due to the matrix of the product released and general attributes.</p> <p>A fire occurred at the property located at 801-821 Somerset Street West, approximately 200 m west of the Site (trans-gradient) which resulted in an incident/near-miss occurrence to the pipeline. The cause of the fire was reported as being under investigation, and the date of the incident is not specified. Although the possible natural gas release is not a concern as rationalised above, the fire occurrence can be a cause for concern. However due to the trans-gradient location, it is not considered a potential environmental concern.</p>
Fuel Storage Tanks (FST)	0	8	<p>Eight (8) records were retrieved within 300 m of the Site. They are generally summarized as follows:</p> <ul style="list-style-type: none"> <li>• Five (5) records were listed for 676 Somerset Street West, approximately 190 m east (trans-gradient) of the Site. The tanks were registered to 1460932 Ontario Ltd., O/A Radek Szybowski, and Suncor Energy Products Partnership; and</li> <li>• Three (3) records were retrieved for Fulline Automotive Inc., at 770 Somerset Street West, approximately 30 m southwest (up-gradient) of the Site following Somerset Street.</li> </ul> <p>Although the trans-gradient location of the corresponding tanks at 676 Somerset Street West renders the installations as not presenting a potential environmental concern to the Site, those of 770 Somerset Steet West do present a risk for potential environmental concern.</p>
Fuel Storage Tank – Historic (FSTH)	0	0	<p>No records were found within a 300 m radius from the Site.</p>

Ontario Spills	0	23	<p>Twenty-three (23) records were found of spill within the search area. The majority of the records retrieved were for incidents located down-gradient of the Site, or were for a material that would not present a risk for environmental concern to the Site (i.e. propane or natural gas releases). The remaining records retrieved are summarized as follows:</p> <ul style="list-style-type: none"> <li>• One (1) record was listed approximately 65 m west of the Site (trans-gradient) located at 755 Empress Avenue (“likely Somerset Street West”), Ottawa, ON as an underground tank leak of furnace fuel by the City of Ottawa;</li> <li>• In September 2009, Francis Fuels reported a spill at 104 Arthur Street, approximately 75 m south of the Site (up-gradient). The spill was the result of a leaky oil tank which released between 2 and 3 gallons of fuel (furnace oil);</li> <li>• In October 1989, a private residence located at 110 Arthur Street, approximately 95 m south (up-gradient) incurred a spill of a furnace oil into the basement. Environmental Impacts were reported as not anticipated;</li> <li>• One (1) record was listed approximately 120 m northeast of the Site (trans to down-gradient) located at 41 Arthur Street, Ottawa, ON as a transformer cooling system leak by Hydro Ottawa;</li> <li>• Canadian Waste Services, reported a spill of waste paint to the road at the intersection of Lorne Street and Summerset Street, approximately 100 m west (trans-gradient of the Site);</li> <li>• One (1) record was listed at 696 Somerset Street West, as a diesel spill by an unlisted source. There appears to be an error in the reporting of this spill, where the address is well beyond the 300 m search radius although the search provided indicated that is approximately 150 m east of the Site (trans-gradient);</li> <li>• One (1) record was listed approximately 195 m southeast of the Site (trans-gradient) located at 676 Somerset Street West, Ottawa, ON as a gasoline spill from hose while fuelling by Petro-Canada;</li> <li>• One (1) record was listed approximately 225 northeast of the Site (trans- to down-gradient) located at the Bronson Avenue and Somerset</li> </ul>
----------------	---	----	--

			<p>Street West intersection, as a transmission fluid leak by O.C. Transpo;</p> <ul style="list-style-type: none"> <li>• First Fuels reported an incident at 307 Booth Street in March 1988. A release of between 1 and 2 litres of furnace oil was spilt to the ground. This address was not retrievable, however Booth Street is generally west of the Site, therefore it is most likely trans-gradient of the Site;</li> <li>• In 2021, a released of approximately 50 L of hydraulic oil occurred at 300 Booth Street, approximately 200 m west of the Site (trans-gradient);</li> <li>• In 1994, a transformer cooling system leak occurred at 1 Spruce Street, approximately 200 m west of the Site (trans-gradient);</li> <li>• In December 1993, an incident occurred at 2 Elm Street West, approximately 200 m west (trans-gradient) of the Site. No further details were provided regarding the incident other than it was released to water; and</li> <li>• In May 2018, an incident occurred at 6 Elm Street West, approximately 200 m west (trans-gradient) of the Site, where the illegal dumping of paint occurred.</li> </ul>
TSSA Historical Incidents (HINC)	0	7	Seven (7) records were found within a 300 m radius of the Site. The records retrieved are not a concern to the environmental conditions of the Site due to the matrix of the product released and general attributes.
Private and Retail Fuel Storage Tanks (PRT)	0	3	<p>Three (3) records were found within a 300 m radius of the Site. They include the following:</p> <ul style="list-style-type: none"> <li>• Two (2) records were listed approximately 195 m east of the Site (trans-gradient) located at 676 Somerset Street West. The tanks were registered to Petro Canada; and</li> <li>• One (1) record for Sunys Petroleum Inc., a retail outlet located at 770 Somerset Street West, approximately 30m southwest (up-gradient) of the Site in 1995.</li> </ul>
Scott's Manufacturing Directories (SCT)	0	4	<p>Four (4) records were found within a 300 m radius of the Site. They generally include the following:</p> <ul style="list-style-type: none"> <li>• One (1) record was retrieved for listed Cyan Solutions Ltd. located at 58 Arthur Street, approximately 45 m northeast of the Site (down-gradient);</li> </ul>

			<ul style="list-style-type: none"> <li>• One (1) record was found for St. Joseph Media Ottawa Group, at 43 Eccles Street, approximately 145 m southwest (trans-gradient) of the Site, is registered as a periodical publisher established in August 1958; and</li> <li>• Two (2) records were retrieved for Canadian Veterinarian Medical located at 339 Booth Street, approximately 250 m southwest (trans-gradient) of the Site. This facility established in 1960 and is listed as a periodical publishers.</li> </ul>
--	--	--	---

### 3.5.1 City of Ottawa

#### 3.5.1.1 City of Ottawa Freedom of Information Request

The City of Ottawa was contacted on April 23, 2023 to obtain available information for the Site. Under the Freedom of Information Act, a freedom of Information Request was made to the City of Ottawa. A formal response has been received and reviewed by LRL. The City of Ottawa noted that they do not have any documents that meet the description of our request. A copy of the City of Ottawa response is included in **Appendix D**.

#### 3.5.1.2 City of Ottawa Historical Land Use Inventory (HLUI)

The City of Ottawa was contacted on April 26<sup>th</sup>, 2022 to obtain available information for the Site and surrounding areas through their Historical Land Use Inventory (HLUI). At the time of this report a response from the City is still pending. When the HLUI request is returned, it will be forwarded to the client for appending to this report.

#### 3.5.1.3 1988 Intera Report

Prior to the 2001 amalgamation, the City did not have a consolidated database of environmental concerns for City properties and typically referred all inquiries to the *1988 Mapping and Assessment of Former Industrial Sites, City of Ottawa*, prepared by Intera Technologies Ltd. (1988 Intera Report). This report describes an inventory and assessment study of former industrial sites in the former (prior to the 2001 amalgamation) City of Ottawa from 1850 to 1984 that likely produced or handle hazardous wastes and materials. LRL reviewed a physical copy of the 1988 Intera Report. There are no records of former industrial sites within a 300 m radius of the Site.

#### 3.5.1.4 City of Ottawa Old Landfill Management Strategy Document, 2004

A report entitled *Old Landfill Management Strategy Phase 1 – Identification of Sites City of Ottawa, Ontario*, was prepared by Golder Associates for the City of Ottawa in 2004. This report identified old landfill site for potential environmental consideration within the boundary of the amalgamated City of Ottawa. LRL reviewed this report as part of the Phase I ESA desktop assessment for the Site and found no landfills present within 300 m of the Site.

### 3.5.2 Ontario Ministry of Environment Conservation, and Parks Freedom of Information Act

The Ontario Ministry of the Environment, Conservation, and Parks (MECP) was contacted under the Freedom of Information Act (FOI) to obtain available information for the Site regarding:

- Certificates of Approvals or any permits relating to air emissions (including noise), water taking and discharging, waste disposal sites, septic systems, pesticides storage or other similar instruments;
- Incidents, orders, offences, spills, discharges of contaminants or inspections;
- Waste management records, including current and historical waste storage locations and waste generator and waste receiver information; and

Reports submitted to the MECP related to the environmental conditions of the property. Under the Freedom of Information Act, a freedom of Information Request was made to the MECP, however no formal response has been received to date. A formal response has not yet been received but is expected and will be reviewed by LRL. If the response details any issues of potential environmental concern with respect to the site, a copy will be forwarded to the client so that it can be appended to this report.

### 3.5.3 Inventory of Coal Tar Industrial Sites in Ontario

The MECP has created an inventory of all known and historical coal gasification plants. It identifies industrial sites that produced and continue to produce or use coal tar or other related tars. The program was discontinued in 1988. A search of the databased revealed no records within a 300 m radius from the Site.

### 3.5.4 Technical Standards and Safety Authority

Fuel storage at commercial and industrial facilities is regulated by the Technical Standards and Safety Authority (TSSA). Records of aboveground storage tanks are maintained for bulk storage facilities only. Underground storage tanks are required to be registered with the TSSA. There are no requirements to register private underground and aboveground fuel oil storage tanks for heating or waste oil. Records of registered and licensed tanks have been maintained since 1990.

TSSA was contacted on April 23, 2023 regarding available information concerning the presence of petroleum storage tanks, fuel spill records, accidents or fuel-related incidents which may be registered on the Site or surrounding properties. The Public Information Agent has indicated that no records were found for Site or the surrounding properties.

### 3.5.5 Ministry of Environment, Conservation, and Parks Water Well Records

The MECP well records database provides information of locations and characteristics of water wells throughout Canada in accordance with Ontario Regulation 903. Information of the stratigraphy, depth of bedrock and approximate depth of water table is also provided. A search of the water well record database was completed on April 21, 2023. Records of sixteen (16) wells were identified within a 250 m radius of the Site. Each of the wells identified are located on neighbouring properties, and the details of representative wells are summarized below.

The results are summarized in the following summary table, **Table 8**, and a copy of the available records retrieved are included in **Appendix E**.

**Table 8: Summary of Well Records Retrieved**

Well Identification	Details
7204297	A monitoring well located approximately 200 m east of the Site, was installed in 2013. The subsurface conditions encountered include gravel extending to 1.22 m followed by limestone to 5.49 m bgs where the well was terminated. Depth at which water was not included in the records.
7339402	A monitoring well approximately 80 m north of the Site, was installed in 2019. The subsurface conditions encountered include sand and gravel extending to 2.1 m bgs, limestone to 4.9 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7339401	A monitoring well located 100 m northeast of the Site, was installed in 2019. The subsurface conditions encountered include sand extending to 0.9 m bgs, followed by grey limestone to 3.4 m bgs, where the well was terminated. Depth at which water was found was not included in the records.
7337667	A monitoring well located 140 m west of the Site, was installed in 2019. The subsurface conditions encountered include brown sand to 0.9 m bgs, followed by fill to 4.3 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7203874	A monitoring well located 140 m south of the Site was installed in 2013. The subsurface conditions encountered include silty sand to 1.9 m bgs, followed by grey limestone to 7.7 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7261920	A monitoring well located 240 m south of the Site was installed in 2016. The subsurface conditions encountered include sand and gravel to 1.5 m bgs, followed by grey limestone to 4.9 m where the well was terminated. Depth at which water was found was not included in the records.
7261916	A monitoring well located 230 m south of the Site was installed in 2016. The subsurface conditions encountered include brown sand to 1.2 m bgs, followed by grey silt to 2.1 m bgs, followed by grey limestone to 4.9 m bgs where the well was terminated. Depth at which water was found was not included in the records.
72113482	A monitoring well located 85 m southwest of the Site was installed in 2013. The subsurface conditions encountered include brown sand to 3.9 m bgs, followed by grey sand to 5.18 m bgs, followed by grey limestone to 12.2 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7213480	A monitoring well located 75 m southwest of the Site was installed in 2013. The subsurface conditions encountered include brown sand to 2.4 m bgs, followed by brown sand to 3.4 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7192754	A monitoring well located 70 m southwest of the Site was installed in 2012. The subsurface conditions encountered include brown sand to 3.1 m bgs where the well was terminated. Depth at which water was found was not included in the records.

72113481	A monitoring well located 70 m southwest of the Site was installed in 2013. The subsurface conditions encountered include brown sand to 2.4 m bgs, followed by grey limestone to 6.1 m bgs where the well as terminated. Depth at which water was found was not included in the records.
7213479	A monitoring well located 70 m south of the Site was installed in 2013. The subsurface conditions encountered include brown sand to 1.8 m bgs, followed by grey limestone to 6.1 m bgs where the well was terminated. Depth at which water was found was not included in the records.
7192751	A monitoring well located 65 m south of the Site was installed in 2012. The subsurface conditions encountered include brown sand to 4 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7192752	A monitoring well located 65 m south of the Site was installed in 2012. The subsurface conditions encountered include brown sand to 2.7 m bgs followed by brown sandy clay to 4.1 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7192749	A monitoring well located 60 m south of the Site was installed in 2012. The subsurface conditions encountered include brown sand to 2.7 m bgs followed by brown sandy clay to 3.9 m bgs where the well was terminated. Depth at which water was found was not included in the reports.
7192755	A monitoring well located 50 m south of the Site was installed in 2012. The subsurface conditions encountered include sand to 3.8 m bgs where the well was terminated. Depth at which water was found was not included in the reports.

The results are summarized in the following summary table, **Table 8**, and a copy of the available records retrieved are included in **Appendix E**.

**Table 8: Summary of Well Records Retrieved**

**3.6 Physical Setting Sources**

The Site is located at approximately 80 m above mean sea level (amsl) and is generally flat land. The topography of the Site and general area is presented in the topographic map included in **Appendix F**.

**3.6.1 Aerial Photographs**

Aerial photographs were obtained from GeoOttawa and the National Air Photo Library through a search provider. Review of the photographs was completed to develop a general history of the development of the Site and surrounding properties. Aerial photographs may be at a scale that limits a detailed review of the Site and surrounding properties.

Copies of select aerial photographs are included in **Appendix G**, and a summary is included in **Table 9**.

**Table 9: Summary of Aerial Photographs**

Year	Phase One Property (Site)	Phase One Study Area (Surrounding Area)
1928 (AP1)	The Site is developed with a building.	Commercial and residential development is observed in the Phase One study area.
1958 (AP4)	The Site appeared similar to 1928.	No significant changes were observed to the Phase One study area from the observation made in 1928.
1965 (AP5)	The Site appeared similar to 1958.	No significant changes were observed to the Phase One study area from the observation made in 1958.
1976 (AP6)	The Site appeared similar to 1965.	No significant changes were observed to the Phase One study area from the observation made in 1965.
1991 (AP7)	The Site appeared similar to 1976.	No significant changes were observed to the Phase One study area from the observation made in 1976.
1999 (AP8)	The Site appeared similar to 1976.	No significant changes were observed to the Phase One study area from the observation made in 1991.
2008 (AP9)	The Site appeared similar to 1999.	No significant changes were observed to the Phase One study area from the observation made in 1999.
2017 (AP10)	The Site appeared similar to 2008.	No significant changes were observed to the Phase One study area from the observation made in 2008.
2021 (AP11)	The Site appeared similar to 2017.	No significant changes were observed to the Phase One study area from the observation made in 2017.

### 3.6.2 Topography, Hydrology & Geology

An Ontario Base Map was retrieved by ERIS for the Phase One Subject Area, and surrounding properties. A copy of the map is included in **Appendix H**. Furthermore, the City of Ottawa interactive mapping system, geoOttawa, provides additional topographic information such as contours.

Geological maps were reviewed to obtain information on regional geology, surficial soils and bedrock. These maps included the following:

- Harrison, J.E., 1976, Generalized Bedrock Geology, Ottawa-Hull, Ontario and Quebec, Geological Survey of Canada, Map 1508A, Scale 1:125,000; and
- St-Onge, D.A., (compilation), 2009, Surficial Geology, Lower Ottawa Valley, Ontario-Quebec, Geological Survey of Canada, Map 2140A, Scale 1:125,000.

A summary of Topographical, Physiographical, Hydrogeological and Geological Conditions are summarized on **Table 10**.

**Table 10: Summary of Topographical, Physiographical, Hydrogeological and Geological Conditions**

Parameter	Source	Description
Topography	Ontario Base Map (included in Appendix H), geoOttawa	The Site is generally flat. The Site has an approximate elevation of 81 m amsl.
Physiography	Not Applicable	A review of the Physiography of the Phase One ESA property, and Subject Area was not included as part of this ESA.
Hydrology	Toporama – The Atlas of Canada	The inferred groundwater flow direction is north toward the Ottawa River.  No further details were retrieved pertaining to groundwater levels below grade.
Geology	Geological Survey of Canada mapping, as referenced above at the beginning of this Section.	Generalized surficial geology: Glacial Deposits: till; heterogeneous mixture of material ranging from clay to large boulders, generally sandy, grades downwards into unmodified till.  Generalized bedrock geology: Ottawa Formation: limestone with some shaly partings: some sandstone in basal part.  According to available MECP water well records, bedrock is found to be between approximate 0.6 and 5.1 m below grade.

### 3.6.3 Fill Material

Based on our review of available historical information, it has been revealed that the Phase One property was undeveloped or agricultural land prior to the development in the early 1920's (at least 1922). The Site was developed prior to the current building being constructed in 1980. The presence of the former development on the Site is a potential environmental concern as the removal or demolition of structures can result in buried debris, or importation of the fill of unknown origin (PCA 30: Importation of Fill Material of Unknown Quality).

### 3.6.4 Water Bodies, and Areas of Natural Significance

O. Reg. 153/04 identifies an Areas of Natural Significance through the following data bases and criteria:

- The Site is not part of a provincial park or conservation area;
- The Site is not within any Areas of Natural and Scientific Interest (ANSI) identified by the Ministry of Natural Resources (MNR) as having provincial significance;
- The Site does not include any area identified as Provincial Significance Wetland (PSW) by MNR
- The Site does not include any area designated as environmental significant in municipal official plans;

- The Site does not include any area designated as an escarpment natural area by Niagara Escarpment Plan;
- The Site does not include any area which is a habitat of endangered species;
- The Site does not include any Oak Ridges Moraine Conservation area; and,
- The Site does not include any area designated as a wilderness area.

Based on the Rideau River natural significance, the Phase One ESA property is considered to be within an Area of Natural Significance as seen in the Ontario Base Map included in **Appendix H**.

### 3.7 Site Operating Records

Site operating records have not been provided in associated with this report.

A summary of the interview conducted as part of this Phase One ESA is included in the following **Table 11**.

**Table 11: Summary of Interview**

Parameter	Information
Interviewee	Alessandro Argentina, Co-Owner of 1303263 BC ULC
Interviewer	Devin Clouthier, Environmental Technician
Interview Type	Over email
Interview Date	May 3, 2023
Interview Details/Pertinent Information	<ul style="list-style-type: none"> <li>• Ms. Argentina has knowledge of the Site from the past two (2) years.</li> <li>• Ms. Argentina indicated that the Site been used for its current commercial use for the past two (2) years.</li> <li>• Ms. Argentina indicated that the Site is currently used for restaurant, grocery and office space and that the building was constructed in the 1980's. The building on Site is serviced by municipal water, sanitary services and is heated by natural gas.</li> <li>• Ms. Argentina indicated that other buildings were formerly located on the Site in the southwest, southeast and northwest corners of the Site and was constructed in the 1950's.</li> <li>• Ms. Argentina indicated that to the best of her knowledge, the Site has never had underground storage tank and is not aware of any previously stained soil.</li> <li>• Ms. Argentina indicated that there have not been interior renovations that she is aware of.</li> </ul>
Evaluation	Based on the interview, it is found that the information retrieved corresponded to that obtained from the records reviewed with no inconsistencies or deviations encountered.

#### 4 SITE RECONNAISSANCE

A summary of the Site reconnaissance conducted as part of this Phase One ESA is included in the following **Table 12**.

**Table 12: Summary of the Site Reconnaissance**

Parameter	Information
<b>Date</b>	May 16 <sup>th</sup> , 2023
<b>Time</b>	10:30 am – 11:30 am
<b>Weather Conditions</b>	Cloudy, 15°C
<b>Site Activity</b>	Commercial.
<b>Person conducting Site visit</b>	Abdul Kader, Environmental Technician
<b>Limitations to Site visit</b>	None.
<b>Site Reconnaissance Details</b>	<p>The following observations were made of the Phase One ESA Property, 725 Somerset Street West, in Ottawa, Ontario:</p> <ul style="list-style-type: none"> <li>• The Site is developed with a two-storey, multi-unit commercial structure, occupied by retail space, restaurant and office space.</li> <li>• The majority of the Site is encompassed by the commercial development, however, the northern and western extents are developed with asphalt parking and circulation area.</li> <li>• The exterior finish of the building on the Site is brick.</li> <li>• The Site is generally flat with a slight slope to the west and to the south, comparable to the general local properties.</li> <li>• The building includes a full basement which is unfinished and primarily used for storage.</li> <li>• Other than minor amounts of cleaning supplies, no storage of solvents, adhesives, petroleum-based fuel or other potentially contaminating chemicals and products were observed.</li> </ul>
<b>Utilities</b>	<p>Potable water is available through Municipal drinking water supply.</p> <p>The Site is connected to municipal sanitary service infrastructure.</p> <p>Natural gas infrastructure is available, and services the Site.</p>
<b>Site Visit Photographs</b>	Photographs from the Site visit are included in <b>Appendix I</b> .

#### 4.1 Specific Observations of the Phase One ESA property

The specific observations encountered at the Phase One ESA property are summarized in the following **Table 13**.

**Table 13: Specific Observations of the Phase One ESA property**

Parameters	Information
Property Dimensions	Irregular shape, being approximately 25 m wide (east-west) by approximately 30 m (north-south).
Current Occupants/ Tenants	Shiraz Market (retail), and Seasons Pizza (restaurant).
Structures/ Improvements	The Site contains a multi-tenant commercial building estimated to have been constructed in 1980. An asphalt parking and circulation area generally surrounds the building to the north and the west.
Sewage Works	The building on Site is connected to municipal sanitary service infrastructure.
Landscaped & Vegetated Areas	There is a grassed area along the north and northwest boundary of the Site.
Pavement, Roads & Driveways:	An asphalt parking and circulation area generally surrounds the building to the north and the west with access from Empress Avenue to the west.
Topography	Generally flat with a gentle slope south/southwest.
Surface Drainage	None observed.
Drainage Improvements	None observed.
Receives Drainage from Adjacent Lands:	None observed but possible from the north.
Watercourses, Ditches or Standing Water:	None observed.
Aboveground storage tanks (ASTs)	None observed.
Underground storage tanks (USTs)	None observed.
Fill Ports, Vent Pipes	None observed.
Storage Containers	None observed.
Hazardous Materials	None observed.
Unidentified Substances	None observed.
Odours	None observed.
Air Emissions	An exhaust from the restaurant kitchen is present along the rear of the building.
Wells	None observed. The wells identified within the vicinity of the Site are summarized in greater detail in Section 3.5.5.

Sewage Disposal	The building on Site is connected to municipal sanitary service infrastructure.
Pits and Lagoons, Wastewater or Solid Waste	None observed. Domestic waste is generated on the Phase One ESA property, which is disposed of through waste management pick up services.
Stained Material and Stressed Vegetation	None observed.
Fill or previous fill activities	None observed, however is likely that fill material has been brought to the Site in support of the development activities for grading, and parking structure.
Earth Moving Activities	None observed.
Railway Lines	None observed.
Other	None observed.
Potential Contaminating Activities (PCA)	None observed.
Unidentified Substances	None observed.

## 4.2 Adjacent Land Use

The current land uses of the adjoining properties were observed from the property limits and publicly accessible locations to assess potential impacts to the Site that may arise from off-Site operations. The properties surrounding the subject Site are as follows:

- North:** Residential followed by Institutional (Place of Worship)
- South:** Somerset Street West followed by Commercial (Retail), Residential, and Institutional (Place of Worship)
- East:** Institutional (Place of Worship)
- West:** Empress Avenue followed by Residential

## 4.3 Special Attention Items

Eleven chemical contaminants have been identified under the Occupational Health and Safety Act (OHSA) and regulations have been set in place to prohibit, regulate restrict, limit or control workers exposure to these substances. Other hazardous materials not included in the OHSA but under the Environmental Protection Act were also observed. The observations presented herein do not constitute a designated substance/hazardous material survey but are rather for information purposes only.

### 4.3.1 Designated Substances

#### **Asbestos Containing Material (ACM)**

Since the late 1970's the manufacture and use of asbestos containing building materials started to decrease. It is commonly presumed that buildings constructed prior to 1980 are more likely to contain both friable and non-friable forms of asbestos. General buildings constructed up to the mid 1980's are more likely to contain non-friable asbestos (flooring, joint compound).

Due to the estimated construction date of the buildings (1980) the presence of ACM is possible. ACM may be present inside of concealed spaces such as ceiling and walls.

#### **Lead**

Lead may be present in a variety of building materials including paint and water distributions pipes, however, lead based paints (LBP) are considered the most significant hazard. According to published information by Health Canada concerning LBP, buildings constructed before 1980 may contain lead-based interior and exterior paints.

Due to the estimated construction date of the buildings (1980) the presence of lead-based piping and paints are possible.

#### **Mercury**

Minor amounts of mercury are commonly found in a variety of building material including mercury vapour lamps, fluorescent light tubing and thermostats and other electrically control switches.

Mercury containing materials were not observed.

#### **Others**

No other designated substances were identified (i.e. arsenic, ethylene oxide, vinyl chloride, benzene, coke oven emissions, acrylonitrile or isocyanates).

#### 4.3.2 Other Hazardous Building Materials/Items

<p><b>Microbial Contamination and Mould:</b> Areas of possible sources of mould (i.e. water damage, poor housekeeping, poor ventilation) were identified at the Site. Mould or water damage were not observed during the Site visit.</p>
<p><b>Ozone-Depleting Substances (ODS):</b> ODS such as chlorofluorocarbons (CFC) and hydrochlorofluorocarbon (HCFC) are typically found in refrigeration equipment, air conditioners, aerosols, cleaning solvents and fire extinguishers. Federal regulations required the elimination of production and import of CFC and a freeze on the production and import of HCFC by January 1, 1996. The regulations govern only the production and import therefore these materials are still used as long as a supply is in place. Refrigeration units are present which possibly contains ODS.</p>
<p><b>Polychlorinated Biphenyls (PCB):</b> The Federal Chlorobiphenyls Regulation, SOR/91-152 prohibits PCBs from being used in products, equipment, machinery, electrical transformers and capacitors which were manufactured or imported into the country after July 1, 1980. However, older equipment in use after this date may still contain PCBs if the equipment fluid has not been replaced. PCB-containing equipment can also include fluorescent, mercury, and sodium vapour light ballasts. Due to the estimated construction date of the buildings (1980), the presence of PCBs is possible.</p>
<p><b>Urea Formaldehyde Foam Insulation (UFFI):</b> UFFI was widely used as an insulating material until December 1980 when a ban was enacted under the Hazardous Products Act. UFFI was commonly injected through walls by drilling injections holes in roof structures, ceilings and overhangs. No UFFI were noted in the buildings inspected. Due to the construction date of the buildings (1980), the presence of UFFI is possible.</p>
<p><b>Radon:</b> Radon gas is a product of the decay series of uranium that is commonly found in geological units that contain black shale, sandstone or granite. Radon can percolate up through the soil where it may accumulate in basement of buildings with cracks or joints in the foundation. Because the existence of radon is dependent upon geological factors, it is more a regional concern than site specific.</p>
<p><b>Electric and Magnetic Fields:</b> Electromagnetic fields are generally associated with high frequency power lines. No high voltage power lines were noted within 250 m of the Site.</p>
<p><b>Noise and Vibration:</b> Noise and vibration are typical of an urban environment (i.e. traffic).</p>
<p><b>Methane:</b> Methane gas is a colourless and odourless gas commonly formed by the decomposition of organic material. The Site is not close to any active or closed waste disposal sites, marshes, swamps or peat deposits therefore methane is not a concern.</p>
<p><b>Others:</b> Silica may be present within cement-based products encountered, such as the cement floor and walls, in addition to exterior parking and general circulation infrastructure (i.e. curbing). No other designated substances were identified (i.e. arsenic, ethylene oxide, vinyl chloride, benzene, coke oven emissions, acrylonitrile or isocyanates).</p>

## 5 REVIEW AND EVALUATION OF INFORMATION

### 5.1 Enhanced Investigation Property

As defined in O. Reg. 153/04, as amended, an Enhanced Investigation Property “*means a property that is being used or has been used, in whole or in part, in a manner described in clause 32 (1) (b) to which subsection 32 (2) does not apply*”. Those property include the following:

- Industrial use which involves assembling, fabricating, manufacturing, processing, producing, storing, warehousing, or distributing goods or raw materials;
- a garage;
- bulk liquid dispensing facility; or
- dry-cleaning operation.

Based on the records retrieved and reviewed as part of this assessment, the Phase One ESA Property was, at one point, not used for the above mentioned uses, therefore the Site is not considered an enhance investigation property.

### 5.2 Phase One ESA – Investigation Details

LRL completed a Site reconnaissance of the subject property, as outlined above in Section 0. The Site reconnaissance included a detailed walkthrough of the Phase One ESA Property, to allow for a review of its current condition, as well as to evaluate the likely impacts from past uses and neighbouring properties. No limitations were encountered during the Site reconnaissance, and the site was fully accessible. The Site reconnaissance included the following:

- A thorough walkthrough of the Phase One Property, with a focus on:
  - The presence of structures or other features of construction;
  - The surface cover type and areas of fill, or debris;
  - Areas of staining, stressed vegetation or anomalous condition;
  - Presence of unidentifiable substances; and
  - The presence, or former evidence, of underground/ buried features or structures, including storage tanks and utility corridors;
- A perimeter walk-around, noting the condition and general characteristics of the Phase One Property limits;
- Visually observations of the neighbouring lands from the Phase One Property extents, to locate and document the following:
  - Potentially contaminating activities;
  - Water bodies; and
  - Possible storage tanks and areas of natural significance.

A summary of the observations encountered are included in **Figure 2**.

### 5.3 Phase One ESA Site Reconnaissance Findings

Based on the findings of the Site Reconnaissance, no PCAs were identified.

## 6 REVIEW AND EVALUATION OF INFORMATION

### 6.1 Current and Past Uses

Below is a summary of the current and past uses of 725 Somerset Street West, Ottawa, Ontario. **Table 14** represents the current and past uses for 725 Somerset Street West.

**Table 14: 725 Somerset Street West – Current and Past Uses**

Year	Name of Owner	Description of Property Use	Property Use	Source of Information
Up to 1809	Crown	Unknown	Unknown	Land Title Search
1809 - 1820	Robert Randall	Unknown	Unknown	Land Title Search
1820	Sheriff Stewart	Unknown	Unknown	Land Title Search
1820 - 1853	John Lebreton – Estate	Unknown	Unknown	Land Title Search
1853 - 1870	John Woodill	Unknown	Unknown	Land Title Search
1870 - 1871	James Small	Unknown	Unknown	Land Title Search
1871 - 1875	Elizabeth Ross (Taylor)	Unknown	Unknown	Land Title Search
1875 - 1882	Levi Crannell	Unknown	Unknown	Land Title Search
1882 - 1885	John Hill	Unknown	Unknown	Land Title Search
1885 - 1896	Robert Shirley	Unknown	Unknown	Land Title Search
1896 - 1910	Phillomena Dupuis	Unknown	Unknown	Land Title Search
1910 -1924	Clara Walters (Dupuis)	Unknown	Unknown	Land Title Search
1924	Edmund Bourque	Unknown	Unknown	Land Title Search
1924 - 1956	The Gauthier Company Limited	Mixed Use - Commercial and Residential	St. John Oliver Confectionary (1926); St. John Oliver Books (1931); Residential tenant (1931-1936, and 1941 - 1956); Walters Confectionary (1936); Seguin Colette Confectionary (1941), Funeral Parlor (at least 1948 – 1956).	Land Title Search, City Directories, Fire Insurance Plans

1956 - 1968	La Caisse Populaire St. Jean-Baptiste D'Ottawa Limitee /The Corporation of the City of Ottawa/ The Gauthier Company Limited	Mixed Use – Commercial, Institutional and Residential	Residential tenant between 1956 – 1968; funeral parlor until 1963; and financial institution between 1961 – 1968.	Land Title Search, City Directories, Fire Insurance Plans
1968 - 2006	La Caisse Populaire St. Jean-Baptiste D'Ottawa Limitee	Mixed Use – Commercial, Institutional and Residential	Residential tenant between 1968 – 1990; travel services office space between 1996 – 2006; and financial institution.	Land Title Search, City Directories, Fire Insurance Plans
2006	La Caisse Populaire Vision Inc.	Commercial and Institutional	Financial institution and travel services office space	Land Title Search, City Directories, Fire Insurance Plans
2006 - 2021	1394827 Ontario Limited.	Commercial and Institutional	Financial institution, travel services office space and retail (optical equipment services).	Land Title Search, City Directories, Fire Insurance Plans
2021 - Present	1303263 B.C. Unlimited Liability Company	Commercial	Office space and restaurants.	Land Title Search, City Directories, Fire Insurance Plans

## 6.2 Potential Contaminating Activity (PCA) & Areas of Potential Environmental Concern (APEC)

A potentially contaminating activity is a use or activity set out in Table 2 of Schedule D of the O. Reg. 153/04. These activities are summarized in the Table included in **Appendix J**.

The activities on the Site from at least the early to mid 1920's to present have been mixed use, including residential, commercial (office space, retail, restaurants and a funeral parlor upto the 1960's) and institutional (final institution). Furthermore, the activities on adjacent lands within 250 m from at least the early 1920's to present have been mainly residential and institutional (place of worship or school) with commercial (retail including automotive repair and fuel handling/dispensing). Based on the records reviewed as part of this assessment, the following.

Based on the results of the Phase One Environmental Site Assessment the following areas of potential environmental concern were identified and are presented in **Figure 3**:

**Table 15: Potential Contaminating Activity (PCA) & Areas of Potential Environmental Concern (APEC)**

No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
1	<b>PCA Other: Use of formaldehyde and other associated chemicals.</b>	On-Site	0	FIPs	Operated as a funeral parlor in at least 1948 through 1963	Entire Property	Potential impact on soil and groundwater
2	<b>PCA 30: Importation of Fill Material of Unknown Quality.</b>	On-Site	0	City Directories and FIPs	Records dated back to 1926 provide confirmation that the Site was developed prior to the current building being constructed in 1980.	Entire Property	Potential soil impacts
3	<b>PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.</b>	775 Somerset Street West	15 m West	FIPs	Boiler system in school facility from between at least the early 1920's through early 1960's.	Western portion of the Site	Potential impact on soil and groundwater – possible for up-gradient configuration
4	<b>PCA 28: Gasoline and Associated Products Storage in Fixed Tanks</b>	760/770 Somerset Street West	30 m Southwest	FIPs, City Directories and Ecolog ERIS	Equipped with underground storage tanks, and	South-western portion of the Site	Potential impact on soil and groundwater – up-gradient of Site
5	<b>PCA 52: Storage, maintenance, fuelling and repair of equipment, vehicles and materials used to maintain transportation systems</b>	770 Somerset Street West	30 m Southwest	FIPs	Petroleum handling garage/services.	South-western portion of the Site	Potential impact on soil and groundwater – Up-gradient of Site

No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
6	<b>PCA Other: Waste Generators</b>	104 Arthur Street	75 m south of the Site	Ecolog ERIS	Tierney Stauffer is listed as a waste generator of light fuel in 2009 and in 2010.	Southern portion of the Site	Potential impact on soil and groundwater – up-gradient of Site
7	<b>PCA Other: Waste Generators</b>	43 Eccles Street	150 Southwest	Ecolog ERIS	Vans Pressure Cleaning registered as a generator of wastes from the use of pigments, coatings and paints as of November 2011.	Southern portion of Site	Potential impacts on soil and groundwater – up-gradient of Site
8	<b>PCA Other: Spill</b>	104 Arthur Street	75 m South	Ecolog ERIS	Leaky oil tank which released between 2 and 3 gallons of fuel (furnace oil).	Southern portion of the Site	Potential impacts on soil and groundwater – up-gradient of Site
9	<b>PCA Other - Spill</b>	110 Arthur Street	95 m South	Ecolog ERIS	Spill of a furnace oil into the basement in October 1989.	Southern portion of the Site	Potential impacts on soil and groundwater – up-gradient of Site

### 6.3 Areas of Potential Environmental Concern

Based on the PCAs noted in Section 6.2 above, the following APECs on the subject Site were identified and are presented in **Figure 4**:

**Table 16: Areas of Potential Environmental Concern (APEC)**

APEC	Location	Comments	Contaminants of Potential Concern	Media Potentially Impacted
APEC 1	Entirety of Site	<b>PCA Other:</b> Use of formaldehyde and other associated chemicals.  Related to the former funeral parlor operations and likely storage of chemicals.	Metals, VOCs, formaldehyde.	Soil and groundwater
APEC 2	Entirety of Site	<b>PCA 30:</b> Importation of Fill Material of Unknown Quality.  To address the likely presence of fill of unknown origin.	VOC, PHC, Metals, Inorganics.	Soil
APEC 3	Southwest corner of the Site	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.  <b>PCA 52:</b> Storage, maintenance, fuelling and repair of equipment, vehicles and materials used to maintain transportation systems.  To address possible impacts associated with the historical neighbouring automotive garage and fuel handling facility.	VOC, PHC, Metals and PAH.	Soil and Groundwater
APEC 4	Southern portion of the Site	<b>PCA Other:</b> Waste Generators.  To address the records retrieved of light fuel and pigments/coatings/paints up-gradient of the Site.	VOC, PHC, and Metals.	Soil and Groundwater
APEC 5	Western portion of the Site	<b>PCA 28:</b> Gasoline and Associated Products Storage in Fixed Tanks.  To address the records of the former boiler system in the basement of the property to the west of the Site.	PAH, VOC and PHC.	Soil and Groundwater
APEC 6	Southern portion of the Site	<b>PCA Other:</b> Spills.  To address the records of spills retrieved up-gradient of the Site.	VOC, PHC, Metals and PAH	Soil and Groundwater

Notes: PEC – Potential Environmental Concern  
 PHC – Petroleum Hydrocarbons  
 PAH – Polycyclic Aromatic Hydrocarbons

1 - Area of Potential Environmental Concern (APEC) means the area on, in, or under a Phase One Property where one or more contaminants are potentially present, as determined through the Phase One ESA, including through:

- (a) Identification of past or present uses on, in, or under the Phase One Property, and
- (b) Identification of potentially contaminating activity.

2 - Potentially Contaminating Activity means a use or activity set out in Column A of Table 2 of Schedule D that is occurring or has occurred in a Phase One Study Area

3 - When completing this column, identify all contaminants of potential concern using the Method Groups as identified in the "Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act, March 9, 2004, amended as of July 1, 2011,

4 - When submitting a record of site condition for filing, a copy of this table must be attached.

#### **6.4 PCA Exclusion Rationale**

As part of this Phase One ESA, additional PCAs were encountered in the vicinity of the Site, through the records retrieved. However, select PCAs encountered, have been excluded as an actual PCA to the Phase One ESA Property. Exclusion of a PCA is often related to the location of the in relation to the Phase One Property, the direction of groundwater flow, and the results from previous environmental reports pertaining to the Phase One Property (if any). The records excluded are summarized above in previous sections, in addition to the general rational for their respective exclusion.

#### **6.5 Uncertainties or Absence of Information**

The City of Ottawa was contacted on April 26th, 2022 to obtain available information for the Site and surrounding areas through their Historical Land Use Inventory (HLUI). At the time of this report a response from the City is still pending. When the HLUI request is returned, it will be forwarded to the client for appending to this report.

Under the Freedom of Information Act, a freedom of Information Request was made to the MECP, however nor formal response has been received to date. A formal response has not yet been received but is expected and will be reviewed by LRL. If the response details any issues of potential environmental concern with respect to the site, a copy will be forwarded to the client so that it can be appended to this report.

Based on the body of information acquired, it is considered that the absence of this information should not likely affect the final conclusion of the Phase One ESA. LRL will review the responses from the outstanding regulatory requests upon their receipt. Should the response affect the findings of this Phase One ESA, it will be forwarded to the client. There were no material deviations to the Phase One ESA requirements set out in O. Reg. 153/04 that would cause uncertainty or absence of information that would affect the validity of the Phase One Conceptual Site Model or the findings of this Phase One ESA.

#### **6.6 Phase One Conceptual Site Model**

##### **6.6.1 Conceptual Sire Model Drawing**

The location of the Site is shown in the attached **Figure 1** and the current layout of the Site is shown in the attached **Figure 2**. PCAs and APECs are shown in the included **Figure 3**, and **Figure 4**, respectively.

### 6.6.2 Description and Assessment

The PCAs identified on the Phase One Property, as well as those identified within the Phase One Study Area were recognised through the records review, interview, and Site reconnaissance. A total of twenty-four (24) PCAs were identified. They are further summarized below in **Table 17** as follows:

**Table 17: Summary of Conceptual Site Model – PCAs**

No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
1	<b>PCA Other: Use of formaldehyde and other associated chemicals.</b>	On-Site	0	FIPs	Operated as a funeral parlor in at least 1948 through 1963	Entire Property	Potential impact on soil and groundwater
2	<b>PCA 30: Importation of Fill Material of Unknown Quality).</b>	On-Site	0	City Directories and FIPs	Records dated back to 1926 provide confirmation that the Site was developed prior to the current building being constructed in 1980.	Entire Property	Potential soil impacts
3	<b>PCA 28: Gasoline and Associated Products Storage in Fixed Tanks.</b>	775 Somerset Street West	15 m West	FIPs	Boiler system in school facility from between at least the early 1920's through early 1960's.	Western portion of the Site	Potential impact on soil and groundwater – possible for up-gradient configuration
4	<b>PCA 28: Gasoline and Associated Products Storage in Fixed Tanks</b>	760/770 Somerset Street West	30 m Southwest	FIPs, City Directories and Ecolog ERIS	Equipped with underground storage tanks, and	South-western portion of the Site	Potential impact on soil and groundwater – up-gradient of Site
5	<b>PCA 52: Storage, maintenance, fuelling and repair of equipment, vehicles and materials used</b>	770 Somerset Street West	30 m Southwest	FIPs	Petroleum handling garage/services.	South-western portion of the Site	Potential impact on soil and groundwater – Up-gradient of Site

No.	O. Reg 153/04 Schedule D PCA	Direction from Phase One Property	Approximate Distance from Phase One Property (m)	Source Information	Remarks	APEC	Rationale
	to maintain transportation systems						
6	PCA Other: Waste Generators	104 Arthur Street	75 m south of the Site	Ecolog ERIS	Tierney Stauffer is listed as a waste generator of light fuel in 2009 and in 2010.	Southern portion of the Site	Potential impact on soil and groundwater – up- gradient of Site
7	PCA Other: Waste Generators	43 Eccles Street	150 Southwest	Ecolog ERIS	Vans Pressure Cleaning registered as a generator of wastes from the use of pigments, coatings and paints as of November 2011.	Southern portion of Site	Potential impacts on soil and groundwater – up- gradient of Site
8	PCA Other: Spill	104 Arthur Street	75 m South	Ecolog ERIS	Leaky oil tank which released between 2 and 3 gallons of fuel (furnace oil).	Southern portion of the Site	Potential impacts on soil and groundwater – up- gradient of Site
9	PCA Other - Spill	110 Arthur Street	95 m South	Ecolog ERIS	Spill of a furnace oil into the basement in October 1989.	Southern portion of the Site	Potential impacts on soil and groundwater – up- gradient of Site

### 6.6.3 Contaminants of Potential Concern

The contaminants of potential concern, related to the identified PCAs, are as follows:

- Petroleum Hydrocarbons (PHCs);
- Volatile Organic Compounds (VOCs);
- Polycyclic Aromatic Hydrocarbons (PAHs); ,
- Metals, metal hydrides, EC, SAR, and pH; and
- Formaldehyde (groundwater only based on it's chemical attributes).

### 6.6.4 Potential for Underground Utilities to Influence the Transportation and Distribution of Contaminates

As described above in Section 0, the underground utilities present on the Phase One ESA Site include Municipal Water Supply Lines and Sanitary Sewer Line, Hydro Ottawa Infrastructure, Natural Gas Lines. All of these lines are found throughout the Site.

### 6.6.5 Available Regional or Site-Specific Geological or Hydrogeological Information

The Phase One ESA Site is found to have generalized surficial geology consisting of glacial Deposits: till; heterogeneous mixture of material ranging from clay to large boulders, generally sandy, grades downwards into unmodified till. Generalized bedrock geology is found to be the Ottawa Formation which includes limestone with some shaly partings: some sandstone in basal part..

According to available MECP water well records, bedrock is found to be between approximate 0.6 and 5.1 m below grade.

Based on available interactive mapping systems, including The Atlas of Canada – Toporama, the groundwater flow direction is interpreted to be to the north/north easterly towards the Ottawa River, located approximately 1.1 km north of the Site.

## 7 CONCLUSIONS

The Conceptual Site Model shows nine (9) PCAs on and surrounding the property which have been based on consideration to groundwater flow direction, and general attributes of the corresponding records or products identified. The PCAs that affect the Phase One Property are shown in Red in **Figure 3**, and PCAs which are down gradient or cross gradient are shown in green, include two (2) onsite PCAs namely **PCA Other** for use of formaldehyde and other associated chemicals, and **PCA 30** Importation of Fill Material of Unknown Quality. The remaining PCAs are related to historical events, incidents or general operations. Seven (7) off-site PCAs include **PCA 28**, **PCA 52** and **PCA Other** for both Waste Generators and Spills. Each of the PCA's are contributors to the generated six (6) onsite Areas of Potential Environmental Concern (APECs).

**APEC 1** was generated due to the presence of PCA Other for the former funeral parlor operations and likely storage of chemicals. Based on the fire insurance plans reviewed.

**APEC 2** was generated due to the presence of PCA 30 the likely presence of fill of unknown origin on the Site. Based on the fire insurance plans.

**APEC 3** was generated due to the presence of PCA 28 for Gasoline and Associated Products Storage in Fixed Tanks, related to automotive garage and fuel handling facility historical south of the Site. Based on the fire insurance products.

APEC 4 was generated due to the records retrieved of light fuel and pigments/coatings/paints up-gradient of the Site. Based on the findings reported through the Ecolog ERIS report.

**APEC 5** was generated due to the presence of PCA 52 related to the storage, maintenance, fuelling and repair of equipment, vehicles and materials used to maintain transportation systems related to automotive garage and fuel handling facility historical south of the Site. Based on the fire insurance products.

**APEC 6** was generated due to the former presence of former boiler system in the basement of the property to the west of the Site. Based on fire insurance plans.

The general extents of the APECs are shown in **Figure 4**.

## **8 LIMITATIONS AND USE OF REPORT**

The results of this Phase One ESA should not be considered a warranty that the subject property is any free from and all contaminants from former and current practices, other than those noted in this report, nor that all compliance issues have been addressed.

The findings contained in this report are based on data and information collected during the Phase One ESA of the subject property conducted by LRL Associates Ltd. The conclusions and recommendations are based solely on-Site conditions encountered at the time of our inspection on May 16, 2023, supplemented by historical information and data obtained as described in this report. No assurance is made regarding changes in conditions subsequent to the time of this investigation. If additional information is discovered or obtained, LRL Associates Ltd. should be requested to re-evaluate the conclusions presented in this report and to provide amendments as required.

In evaluating the subject property, LRL Associates Ltd. has relied in good faith on information provided by individuals as noted in this report. We assume that the information provided is factual and accurate. We accept no responsibility for any deficiencies, misstatements or inaccuracies contained in this report as a result of omissions, misinterpretation or fraudulent acts of the persons contacted.

This report is intended for the sole use of 1303263 BC ULC. and their authorized agents. LRL Associates Ltd. will not be responsible for any use of the information contained within this report by any third party.

In addition, LRL Associates Ltd. will not be responsible for the real or perceived decrease in the property value, its saleability or ability to gain financing, through the reporting of information.

Yours truly,  
LRL Associates Ltd.

Jessica Arthurs  
Environmental Engineering Manager

RE: CITY DIRECTORY RESEARCH  
725 Somerset Street West  
Ottawa, ON K1R 6P7

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

**Search Criteria:**

1-165 of Arthur Street  
1-75 of Bell Street North  
230-320 of Booth Street  
240-350 of Bronson Avenue  
60-220 of Cambridge Street North  
55-60 of Christie Street  
1-55 of Eccles Street  
1-10 of Elm Street  
40-120 of Empress Avenue  
1-75 of Lebreton Street North  
45-60 of Lorne Avenue  
20-30 of Perkins Street  
105-120 of Primrose Avenue  
20-100 of Primrose Avenue East  
660-815 of Somerset Street West  
725 of Somerset Street West  
1-15 of Spruce Street  
60-140 of Upper Lorne Place

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

# Executive Summary

## Property Information:

**Project Property:** *Phase I ESA (220463)  
725 Somerset Street West Ottawa ON K1R 6P7*

**Project No:** 220463

## **Coordinates:**

**Latitude:** 45.4106514  
**Longitude:** -75.7083936  
**UTM Northing:** 5,028,814.26  
**UTM Easting:** 444,568.02  
**UTM Zone:** 18T

**Elevation:** 263 FT  
80.19 M

## Order Information:

**Order No:** 23041700402  
**Date Requested:** April 17, 2023  
**Requested by:** LRL Associates Ltd.

**Description:**

**Location:**  
**Region:**  
**Ministry District:**

The City of Ottawa and its contractor were fined \$120,000 for failing to comply with a permit to take water and discharging sediment into Stillwater Creek, a tributary of the Ottawa River. 'Polluters should be aware that the ministry's Investigations and Enforcement Branch will vigorously pursue charges when our environmental laws are broken', said Environment Minister Jim Bradley. In 2010, the city awarded a contract for a water main installation along several streets in Ottawa to Colautti Construction Ltd. 'a local company that specializes in the construction of sewer and water lines. For dewatering required by construction, a permit to take water was issued to the City that required a number of conditions including turbidity testing. Following reports in August 2010 of possible impairments to Stillwater Creek as a result of drilling work, a ministry investigation found the company was responsible for a discharge of sediment into Stillwater Creek. Although there was no evidence of any actual impact to fish in Stillwater Creek as a result of the sediment discharge on that day, sediment discharges can adversely affect fish and benthic organisms. The City was also found to have not been conducting the required turbidity testing. The City of Ottawa and Colautti Construction Ltd. were fined a total of \$120,000 plus victim fine surcharges of \$30,000 and were given sixty days to pay the fines.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Oct 2022**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Mar 2022**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Feb 28, 2022**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2021**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Feb 28, 2023**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Sep 2022**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Feb 2023**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Feb 28, 2023**

**Drill Hole Database:**

Provincial

DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Oct 2022****Delisted Fuel Tanks:**

Provincial

DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: Feb 28, 2022****Environmental Activity and Sector Registry:**

Provincial

EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Feb 28, 2023****Environmental Registry:**

Provincial

EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Feb 28, 2023****Environmental Compliance Approval:**

Provincial

ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Feb 28, 2023****Environmental Effects Monitoring:**

Federal

EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\*****ERIS Historical Searches:**

Private

EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Dec 31, 2022****Environmental Issues Inventory System:**

Federal

EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Apr 30, 2022**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2021**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Mar 2023**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Oct 31, 2022**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Mar 21, 2022**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Feb 2023**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2021**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2022**

**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Aug 2021**

**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Feb 28, 2023**

**Canadian Pulp and Paper:**

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Feb 28, 2023**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2020**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Mar 2023**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Feb 28, 2023**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Mar 2021; May 2021-Oct 2021**

**Wastewater Discharger Registration Database:**

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

**Government Publication Date: 1990-Dec 31, 2020**

**Anderson's Storage Tanks:**

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Apr 2020**

**Variances for Abandonment of Underground Storage Tanks:**

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: Feb 28, 2022**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Feb 28, 2023**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Jun 30 2022**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**APPENDIX D**  
**City of Ottawa Freedom of  
Information Response**

File Number: A-2023-00249

May 1, 2023

By email: [dclouthier@lrl.ca](mailto:dclouthier@lrl.ca)

Devin Clouthier  
LRL Associates Ltd.  
5430 Canotek Road  
Ottawa, Ontario K1J 9G2

Dear Devin Clouthier:

**Re: Access to Information Request**

This letter is in response to your request made under the *Municipal Freedom of Information and Protection of Privacy Act*, (the Act), which was received on April 17, 2023. Your application under the Act specifically requested documents pertaining to:

“The request pertains to the parcel of land located at 725 Somerset Street West, Ottawa. The information of concern for this request pertains to records of un-controlled dumping, violations of municipal by laws relating to spills and environmental impacts. By-Law. Jan 1 1960 to April 17 2023.”

Based upon an extensive review of our records, it has been concluded that the City of Ottawa does not have any documents that meet the description of your request.

Should you have any questions concerning your request, please contact **Kevin Godby** at 613-580-2424, extension **15548** or [kevin.godby@ottawa.ca](mailto:kevin.godby@ottawa.ca).

Sincerely,

*Leslie Hicks*

Leslie Hicks  
Program Manager, Access to Information and Privacy Office  
Office of the City Clerk

**City of Ottawa**  
110 Laurier Avenue West  
Ottawa, ON K1P 1J1  
Tel.: 613-580-2400  
[www.ottawa.ca](http://www.ottawa.ca)

**Ville d'Ottawa**  
110, avenue Laurier Ouest  
Ottawa (ON) K1P 1J1  
Tél.: 613-580-2400  
[www.ottawa.ca](http://www.ottawa.ca)

Please note that you have 30 days from the date of this decision letter to file an appeal. Please refer to the website of the Information Privacy and Commissioner at <https://www.ipc.on.ca/> for up to date information on their operations. The Commissioner's office has indicated that its operations were adjusted during the COVID-19 emergency. However, they note that the suspension order issued by the Ontario government under the Emergency Management and Civil Protection Act that 'froze' statutory time limits effective March 16, 2020 ended on September 14. This means that as of September 14, 2020, the time limits for initiating complaints or appeals to the IPC that are set out in Ontario's access, health privacy, and child and family services laws resumed as normal.

You may ask for a review of this decision by writing to: Registrar, Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, Ontario, M4W 1A8, Telephone: 416-326-3333 or toll free 1-800-387-0073.

If you decide to request a review of this decision, please provide the Commissioner's office with the following:

- The file number listed at the beginning of the letter
- A copy of the decision letter
- A copy of the original request for information you sent to the institution
- The reasons why you believe the records exist (*if the decision was that no records exist*)

In addition, you must send an appeal fee to the Commissioner's office. If your request was for your personal information, the appeal fee is \$10.00. The appeal fee for all other requests for information is \$25.00. Please include the fee with your letter of appeal. Appeal fees should be in the form of either a cheque or money order, payable to the "Minister of Finance".

**Site Visit Photographs**

## SITE VISIT PHOTOGRAPHS

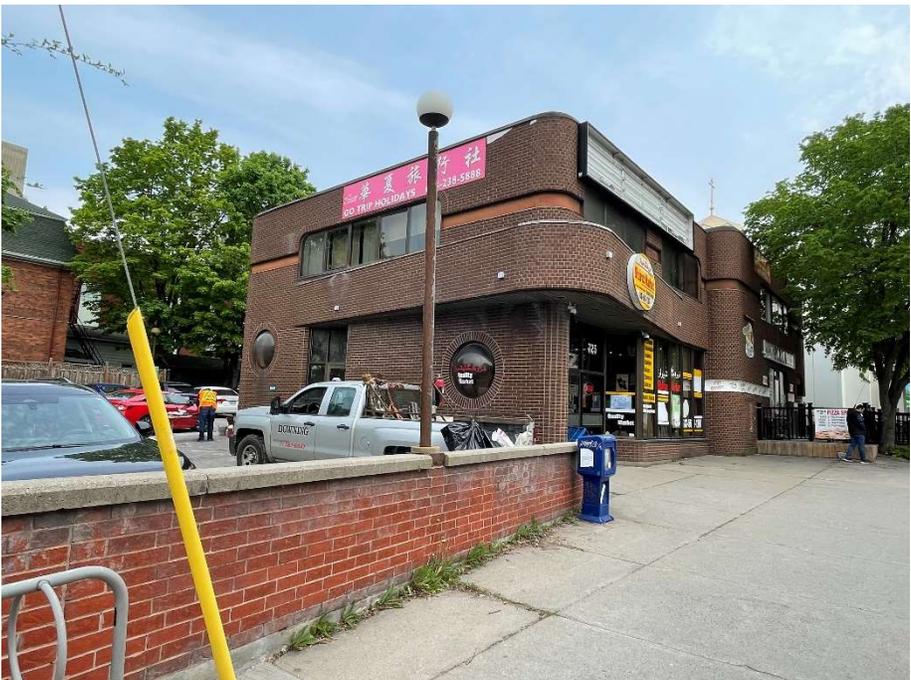

Our File Ref.: 220463

Client: 1303263 BC ULC.

Project: Phase One ESA

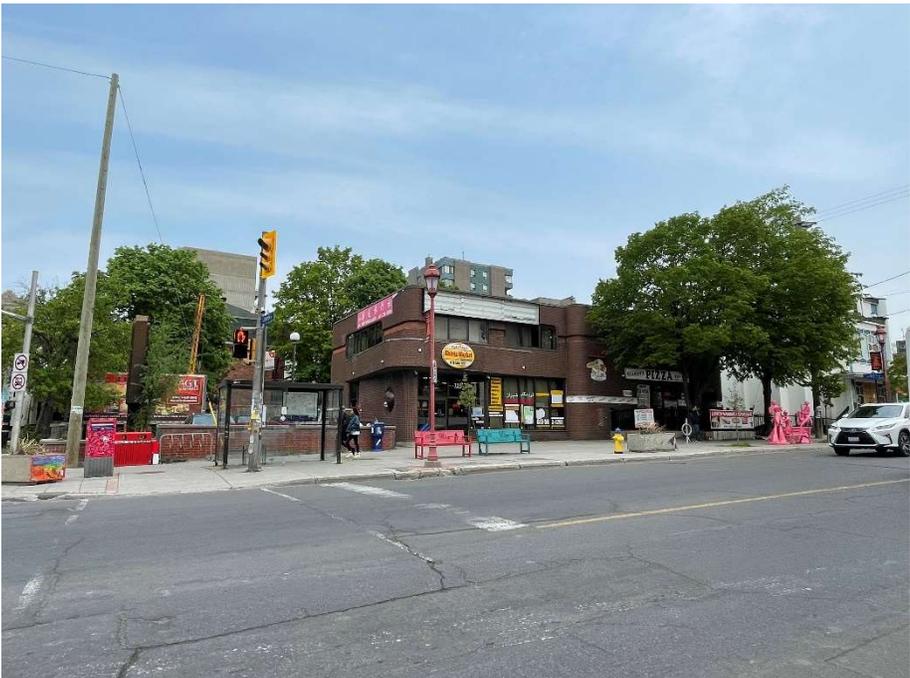

Site Location: 725 Somerset Street West, Ottawa, ONT

Photograph No. 1	
Date: 5/16/2023	
Description  General Site Conditions, western face of existing building on the property.	

Photograph No. 2	
Date: 5/16/2023	
Description  Along southern perimeter of the Site, from west facing east.	

Photograph No. 3	
Date: 5/16/2023	
Description  From south of Somerset Street West facing north towards the southern face of the existing development on the Site.	

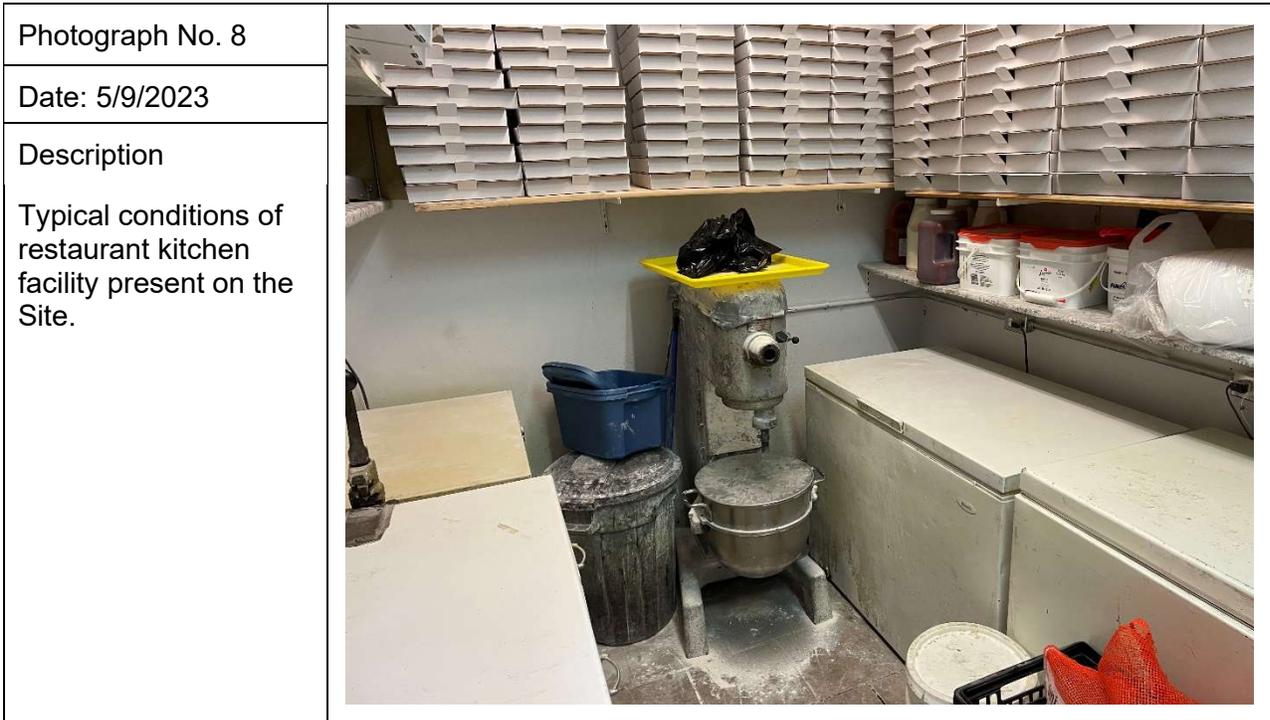

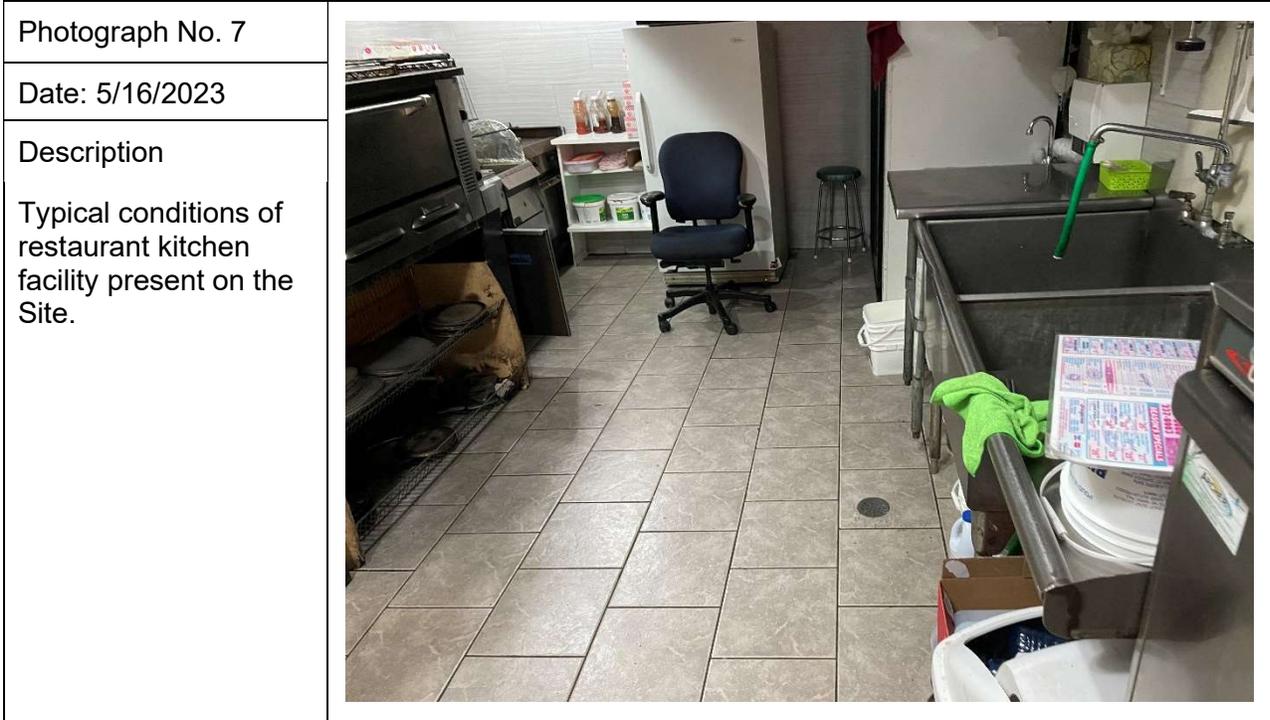

Photograph No. 4	
Date: 5/16/2023	
Description  Somerset Street West facing north towards the south-western portion of the Site.	

Photograph No. 5	
Date: 5/16/2023	
Description Roof top of existing development structure on the Site.	

Photograph No. 6	
Date: 5/16/2023	
Description General interior conditions of retailer within the development on the Site.	

Photograph No. 9	
Date: 5/16/2023	
Description  Typical conditions of restaurant kitchen facility present on the Site.	

Photograph No. 10	
Date: 5/16/2023	
Description  Electrical panelling located in the basement of the development on the Site.	

## **APPENDIX J**

**Table 2 of Schedule D of O. Reg. 153/04**

**Ontario Regulation 153/04 – Schedule D**  
**Summary of Potentially Contaminating Activities & Areas of Potential Environmental Concern**

Acid and Alkali Manufacturing, Processing and Bulk Storage	Explosives and Firing Range	Petroleum-derived Gas Refining, Manufacturing, Processing and Bulk Storage
Adhesives and Resins Manufacturing, Processing and Bulk Storage	Fertilizer Manufacturing, Processing and Bulk Storage	Pharmaceutical Manufacturing and Processing
Airstrips and Hangars Operation	Fire Retardant Manufacturing, Processing and Bulk Storage	Plastics (including Fibreglass) Manufacturing and Processing
Antifreeze and De-icing Manufacturing and Bulk Storage	Fire Training	Port Activities, including Operation and Maintenance of Wharves and Docks
Asphalt and Bitumen Manufacturing	Flocculants Manufacturing, Processing and Bulk Storage	Pulp, Paper and Paperboard Manufacturing and Processing
Battery Manufacturing, Recycling and Bulk Storage	Foam and Expanded Foam Manufacturing and Processing	Rail Yards, Tracks and Spurs
Boat Manufacturing	Garages and Maintenance and Repair of Railcars, Marine Vehicles and Aviation Vehicles	Rubber Manufacturing and Processing
Chemical Manufacturing, Processing and Bulk Storage	Gasoline and Associated Products Storage in Fixed Tanks	Salt Manufacturing, Processing and Bulk Storage
Coal Gasification	Glass Manufacturing	Salvage Yard, including automobile wrecking
Commercial Autobody Shops	Importation of Fill Material of Unknown Quality	Soap and Detergent Manufacturing, Processing and Bulk Storage
Commercial Trucking and Container Terminals	Ink Manufacturing, Processing and Bulk Storage	Solvent Manufacturing, Processing and Bulk Storage
Concrete, Cement and Lime Manufacturing	Iron and Steel Manufacturing and Processing	Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
Cosmetics Manufacturing, Processing and Bulk Storage	Metal Treatment, Coating, Plating and Finishing	Tannery
Crude Oil Refining, Processing and Bulk Storage	Metal Fabrication	Textile Manufacturing and Processing
Discharge of Brine related to oil and gas production	Mining, Smelting and Refining; Ore Processing; Tailings Storage	Transformer Manufacturing, Processing and Use
Drum and Barrel and Tank Reconditioning and Recycling	Oil Production	Treatment of Sewage equal to or greater than 10,000 litres per day
Dye Manufacturing, Processing and Bulk Storage	Operation of Dry Cleaning Equipment (where chemicals are used)	Vehicles and Associated Parts Manufacturing
Electricity Generation, Transformation and Power Stations	Ordnance Use	Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste, other than use of biosoils as soil conditioners
Electronic and Computer Equipment Manufacturing	Paints Manufacturing, Processing and Bulk Storage	Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
Explosives and Ammunition Manufacturing, Production and Bulk Storage	Pesticides (including Herbicides, Fungicides and Anti-Fouling Agents) Manufacturing, Processing, Bulk Storage and Large-Scale Applications
