## **EXECUTIVE SUMMARY**

### **Assessment**

Paterson Group was retained by Claridge Homes to conduct a Phase I-Environmental Site Assessment (ESA) for the properties addressed 84 & 100 Gloucester Street, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and 250m Phase I Study Area, and to identify any environmental concerns with the potential to have impacted the subject land.

Based on city directories, aerial photographs and fire insurance plans the Phase I Property was first developed for residential purposes sometime prior to 1878. The portion of the Phase I Property addressed 84 Gloucester Street was primarily occupied by residential dwellings until the late 1970s (with the exception of a commercial printer, Lo-Mor Printers Ltd., from 1959 to mid-1970) when the buildings were demolished and the existing parking lot was developed. The portion of the Phase I Property addressed 100 Gloucester Street was occupied by residential dwellings until the early 1960s when the existing multi-storey commercial building was developed (primarily used as an office building). A commercial printer (E A S Illustrations Commercial Printing) was listed for the 100 Gloucester Street portion of the Phase I Property from 1973 to 1984.

A total of three historic on-site PCAs were identified on the Phase I Property. Two former printers were identified as historical PCAs on the Phase I Property (one addressed 84 Gloucester Street and one addressed 100 Gloucester Street). The presence of fill material of unknown quality was considered to be identified across the entire Phase I Property. The three historic on-site identified PCAs result in three APECs on the Phase I Property.

Based on available historical information, adjacent and surrounding properties within the Phase I Study Area have been used for a combination of residential, institutional, and commercial properties. The historical use of the property addressed 114 Gloucester Street (present day 12 Gloucester Street), approximately 20 m west of the Phase I Property, as a possible dry cleaner is a PCA that represents an APEC on the Phase I Property. The historical use of the remaining surrounding properties within the Phase I Study Area are not considered to represent APECs on the Phase I Property.

Following the historical research, a site visit was conducted. The portion of the Phase I Property addressed 100 Gloucester Street is currently occupied by a six-storey office building with ground floor commercial businesses (coffee shop, commercial kitchen and

fingerprinting). The building is constructed with a poured concrete foundation and is finished with brick and a flat tar-and-gravel style roof. The southwest portion of the Phase I Property (100 Gloucester Street) is occupied by an in-ground swimming pool (reportedly used by the residential apartment complex adjacent to the south and southwest of the Phase I Property). A small toll booth is present on the northeast corner of the Phase I Property (84 Gloucester Street). The remainder of the Phase I Property consists of primarily an asphaltic concrete parking lot. The application of road salt on the asphaltic concrete parking areas of the Phase I Property was identified as a PCA that results in an APEC on the Phase I Property. In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for the aforementioned APEC.

The current uses of the adjacent and surrounding properties within the Phase I Study Area include a combination of residential and commercial uses. No existing off-site PCAs that result in APECs on the Phase I Property were identified within the Phase I Study Area at the time of the site visit.

## Recommendations

Based on the results of the historical research, personal interviews, and sit inspection indicated the presence of historical potentially activities and existing potential environmental concerns at the Phase I Property. Based on the results of this Phase I-ESA, **in our opinion that a Phase II - Environmental Site Assessment is required for the Phase I Property.**

Based on the age of the subject building (circa 1961) potentially asbestos containing materials (ACMs) observed include vinyl floor tiles, drywall joint compound and decorative ceiling plaster. Lead-based paints may also be present on original or older painted surfaces beneath more recent coats of paint. An asbestos survey was completed on the 100 Gloucester Street building by Greenough Environmental Consulting Inc. Reference should be made to this report for further information regarding asbestos containing materials on the Phase I Property.

Prior to any renovation or demolition activities, a designated substance survey (DSS) must be conducted for the existing building, in accordance with Ontario Regulation 490/09 under the Occupational Health and Safety Act.

## 1.0 INTRODUCTION

At the request of Claridge Homes, Paterson Group (Paterson) conducted a Phase I-Environmental Site Assessment (Phase I-ESA) for the properties addressed 84 & 100 Gloucester Street, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and properties within the Phase I Study Area to identify any potentially contaminating activities (PCAs) that would result in areas of potential environmental concern (APECs) on the subject land.

Paterson was engaged to conduct this Phase I-ESA by Mr. Vincent Dénommé with Claridge Homes. Mr. Dénommé can be reached by telephone at (613)-233-6030.

This report has been prepared specifically and solely for the above noted project which is described herein. It contains all our findings and results of the environmental conditions at this site.

This Phase I-ESA report has been prepared in general accordance with Ontario Regulation (O.Reg.) 153/04, as amended, under the Environmental Protection Act, and complies with the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I-ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

---

## 2.0 PHASE I PROPERTY INFORMATION

Address:	84 & 100 Gloucester Street, Ottawa, Ontario
Legal Description:	Lots 44, 45 and 46, Registered Plan 2996, in the City of Ottawa.
Location:	The Phase I Property is located on the south side of Gloucester Street, approximately 50m east of O'Connor Street in the City of Ottawa, Ontario. For the purposes of this report, Gloucester Street is assuming to run east-west. Refer to Figure 1 - Key Plan in the Figures section following the text.
Property Identification Number:	04115-0151 and 04115-0152.
Latitude and Longitude:	45° 25' 07.9" N, 75° 41' 44.7" W
<b>Site Description:</b>	
Configuration:	Rectangular
Area:	1800 m <sup>2</sup> (approximate)
Zoning:	R5B – Residential Fifth Density Zone
Current Use:	The portion of the Phase I Property addressed 100 Gloucester Street is occupied by a six-storey commercial office building. An asphalt parking lot is located adjacent to the east of the commercial building and an in-ground pool is present adjacent to the south of the commercial building. The portion of the Phase I Property addressed 84 Gloucester Street is occupied by a parking lot.
Services:	The Phase I Property is situated in a municipally serviced area.

---

## 3.0 SCOPE OF INVESTIGATION

The scope of work for this Phase I – Environmental Site Assessment was as follows:

- Determine the historical activities on the subject site and study area by conducting a review of readily available records, reports, photographs, plans, mapping, databases, and regulatory agencies;
- Investigate the existing conditions present at the subject site and study area by conducting site reconnaissance;
- Conduct interviews with persons knowledgeable of current and historic operations on the subject properties, and if warranted, neighbouring properties;
- Present the results of our findings in a comprehensive report in general accordance with the requirements of O.Reg. 153/04, as amended, under the Environmental Protection Act, and in compliance with the requirements of CSA Z768-01 (reaffirmed 2016);
- Provide a preliminary environmental site evaluation based on our findings;
- Provide preliminary remediation recommendations and further investigative work if contamination is suspected or encountered.

---

## **4.0 RECORDS REVIEW**

### **4.1 General**

#### **Phase I-ESA Study Area Determination**

A radius of approximately 250m was determined to be appropriate as a Phase I Study Area for this assignment. Properties outside the 250m radius are not considered to have impacted the subject land, based on their significant distance from the Phase I Property.

#### **First Developed Use Determination**

Based on the historical information available for review and for the purposes of this report, the Phase I Property is considered to have been first developed for residential purposes sometime prior to 1878.

#### **Fire Insurance Plans**

Fire Insurance Plans (FIPs) from 1878, 1888, 1912, 1949, and 1956 were reviewed as part of the Phase I ESA.

The FIPs for 1878 depict the Phase I Property with six residential dwellings (addressed 84, 92, 94, 96, 102 and 104 Gloucester Street). Surrounding properties consist primarily of residential use with some commercial and institutional (schools and churches).

The FIPs for 1888 depict a seventh residential dwelling on the Phase I Property (addressed 86 Gloucester Street). Further residential development has occurred on the surrounding properties within the Phase I Study Area.

The 1912 and 1949 FIPs depict the Phase I Property and surrounding properties with no significant changes from the 1888 FIPs.

The 1956 FIPs depict the Phase I Property in the same configuration as the previous FIPs, however, the building addressed 86 Gloucester Street (part of present day 84 Gloucester Street) is denoted as a commercial printer.

A commercial printer is depicted at 234 Laurier Avenue West, approximately 40 m north of the Phase I Property. A retail fuel outlet with three underground storage tanks (USTs) is depicted at 133 O'Connor Street (part of present day 234 Laurier Avenue West), approximately 60 m northwest of the Phase I Property. A second retail fuel outlet with three underground tanks is depicted at the property addressed 156 O'Connor Street (present day 154 O'Connor Street), approximately 60 m west of the Phase I Property. Due to the separation distance and down/cross-gradient orientation with respect to the Phase I Property, the former uses of these properties are not considered to represent an environmental concern to the Phase I Property.

Potentially contaminating activities identified from a review of the FIPs are listed in Table 1.

<b>Table 1 - Potentially Contaminating Activities FIPs Review Summary</b>					
<b>Listing</b>	<b>Address</b>	<b>Approx. Distance from Phase I Property</b>	<b>Years Listed</b>	<b>Potentially Contaminating Activity</b>	<b>Represents an Area of Potential Environmental Concern (Y/N)</b>

Ottawa Hydro Electric Sub Station	82-92 Slater Street (part of present day 84 Slater St)	180 m NE	1956	"Item 18: Electricity Generation, Transformation and Power Stations"	N
Automotive Service Garage (One UST)	79 O'Connor Street (part of present day 151 Slater Street)	205 m N	1956	"Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems"	N

**Table 1 cont. - Potentially Contaminating Activities  
 FIPs Review Summary**

Listing	Address	Approx. Distance from Phase I Property	Years Listed	Potentially Contaminating Activity	Represents an Area of Potential Environmental Concern (Y/N)
Gasoline Service Station	196 Elgin Street (present day 180 Elgin Street)	205 m SE	1956	<i>"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"</i>	N
Gasoline Service Station	170 Elgin Street (part of present day 160 Elgin Street)	230 m E	1956	<i>"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"</i>	N

The presence of the on-site historical commercial printer addressed 86 Gloucester Street is a PCA that is considered to represent an area of potential environmental concern (APEC) on the Phase I Property.

The historical use of the remaining properties within the Phase I Study Area noted in Table 1 are not considered to represent APECs on the Phase I Property based on their separation distances and/or cross- or down-gradient orientations with respect to the Phase I Property.

### City of Ottawa Street Directories

City directories for the Phase I Property and neighbouring properties in the Phase I Study Area were reviewed in approximate ten (10) year intervals, between 1880 and 2011.

The directories indicate that the portion of the Phase I Property addressed 84 Gloucester Street was occupied by residential dwellings from the late 1880s to the late 1970s, with a commercial printer (Lo-Mor Printers Ltd.) occupying the portion of the Phase I Property formerly addressed 86 Gloucester Street from 1959 to the mid 1970s. The portion of the Phase I Property addressed 100 Gloucester Street was occupied by residential dwellings from the late 1880s to the early 1960s when the existing multi-storey commercial building was developed (primarily an office building). A commercial printer (E A S Illustrations Commercial Printing) was listed for the Phase I Property from 1973 to 1984.

Neighbouring properties in the Phase I Study Area were historically listed as residential dwellings, institutional as well as commercial uses.

Potentially contaminating activities identified from a review of the City Directories are listed in Table 2.

<b>Table 2 - Potentially Contaminating Activities City Directories Review Summary</b>					
<b>Listing</b>	<b>Address</b>	<b>Approx. Distance from Phase I Property</b>	<b>Years Listed</b>	<b>Potentially Contaminating Activity</b>	<b>Represents an Area of Potential Environmenta I Concern (Y/N)</b>
Lo-Mor Printers Ltd.	86 Gloucester Street (part of present day 84 Gloucester Street)	On-Site	1973, 1961, 1959	"Item NA: Former on-site commercial printer"	Y
EAS Illustrations Commercial Printing	100 Gloucester Street	On-Site	1984, 1980, 1973	"Item NA: Former on-site commercial printer"	Y
Kent Hand Laundry	114 Gloucester Street (present day 112 Gloucester Street)	20 m W	1992, 1967	"Item 37: Operation of Dry Cleaning Equipment"	Y

<b>Table 2 cont. - Potentially Contaminating Activities City Directories Review Summary</b>					
<b>Listing</b>	<b>Address</b>	<b>Approx. Distance from Phase I Property</b>	<b>Years Listed</b>	<b>Potentially Contaminating Activity</b>	<b>Represents an Area of Potential Environmenta I Concern (Y/N)</b>
Dick's Garage	15 Gloucester Street (part of present day 31 Gloucester Street)	200 m NE	1959	"Item 52: Storage, Maintenance, Fuelling and Repair of Equipment, Vehicles, and Material Used to Maintain Transportation Systems"	N
Supertest Petroleum Corp Ltd.; Finnegan Service Station	79-83 O'Connor Street (part of present day 151 Slater Street)	205 m N	1960, 1940; 1960, 1950	"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"	N
Lynch Bernard J. Service Station; Hiscox & Ferguson Service Station;	196 Elgin Street (present day 180 Elgin Street)	205 m SE	1971, 1966; 1955, 1941	"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"	N
Elgin Service Station; Champlain Oil Products Ltd. Service Station; La Grave Service Station	170 Elgin Street (part of present day 160 Elgin Street)	230 m E	1961, 1955; 1955, 1950; 1950	"Item 28: Gasoline and Associated Products Storage in Fixed Tanks"	N
Dye and Durhan Co. Ltd.	77 Metcalfe Street	240 m NE	1981/1982	"Item NA: Former off-site commercial printer"	N
Paragon Cleaners; Lee Sign Laundry	77 Metcalfe Street	240 m NE	1981/1982; 1931	"Item 37: Operation of Dry Cleaning Equipment"	N

The historical presence of two former commercial printers on the Phase I Property are considered to represent two APECs on the Phase I Property. The historical use of the property addressed 114 Gloucester Street (present day 12 Gloucester Street), approximately 20 m west of the Phase I Property, as a possible dry cleaner is a PCA that represents an APEC on the Phase I Property. The historical use of the remaining surrounding properties within the Phase I Study Area noted in Table 2 are not considered to represent APECs on the Phase I Property based on their separation distances and/or cross- or down-gradient orientations with respect to the Phase I Property.

The locations of the aforementioned PCAs, are depicted on Drawing PE5571-2 - Surrounding Land Use Plan.

### **Chain of Title**

Given the information from the records reviewed as part of this Phase I ESA, it was determined that the a title search back to the date of the first developed use would not contribute to obtaining information about the environmental condition of the Phase I Property. Therefore, a chain of title search was not completed as part of this assessment.

### **Previous Environmental Reports**

"Phase I – Environmental Site Assessment, 100 Gloucester Street, Ottawa, Ontario", prepared by Pinchin Environmental Ltd., dated April 28, 2011.

In April 2011, Pinchin Environmental Ltd. completed a Phase I Environmental Site Assessment for the Phase I Property. The report states that several Property Underwriters' Reports (PURs) were obtained as part of the assessment. The PURs generally indicated that the subject building had been heated by natural-gas fired forced air units, with the exception of the 1982 and 1988 PURs that reported the use of oil-fired forced air units. The site representative at the time of the site visit was unaware of the presence of any former aboveground storage tanks (ASTs) or underground storage tanks (USTs), in addition, no evidence of former ASTs or USTs was observed by Pinchin at the time of the site visit. The report did not identify any environmental concerns with the potential to impact the Phase I Property. An asbestos survey was recommended to assess the subject building for potential asbestos containing material.

"Phase I Environmental Site Assessment Update, 100 Gloucester Street, Ottawa, Ontario", prepared by Pinchin Environmental Ltd., dated August, 2013.

In August 2013, Pinchin Environmental Ltd. completed a Phase I Environmental Site Assessment Update for the Phase I Property. The update report concluded that no new information had been identified and an asbestos survey was still recommended to be conducted on the subject building.

"2018 Reassessment of Asbestos-Containing Materials, 100 Gloucester Street, Ottawa, Ontario:", prepared by Greenough Environmental Consulting Inc., dated August 10, 2018.

In August 2018, an asbestos building materials report was completed for the subject building by Greenough Environmental Consulting Inc. The report indicated that materials determined to be asbestos-containing were based on a previous designated substance survey conducted by GEC in 2013. The report identified asbestos-containing wall materials (damaged drywall joint compound) on each floor of the subject building. These Asbestos Containing Materials (ACMs) were recommended to be repaired following the appropriate measures and that the Asbestos Management Program for the subject building be updated to reflect the abatement of these ACMs.

### **Plan of Survey**

A topographic plan of survey for the Phase I Property, prepared by Annis, O'Sullivan Vollebakk Limited, dated December 15, 2021, was reviewed as part of the Phase I ESA. The plan shows the Phase I Property in its current configuration. A copy of the topographic plan of survey is provided in Appendix 1.

## **4.2 Environmental Source Information**

### **Environment Canada**

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on February 3, 2022. No records were found in the NPRI database for properties within the Phase I Study Area.

## **PCB Inventory**

A search of provincial PCB waste storage sites was conducted. Three PCB sites were located within the Phase I Study Area. An Ottawa Hydro PCB site was identified approximately 180 m to the northeast of the Phase I Property, a Bell Canada PCB site was identified approximately 220 m northeast of the Phase I Property and a Taggart Corp PCB site was identified approximately 220 m southeast of the Phase I Property. Based on the separation distance these PCB sites are considered PCAs that do not represent an environmental concern on the Phase I Property.

## **Areas of Natural Significance**

A search for areas of natural significance and features within the Phase I Study Area was conducted on the website of the Ontario Ministry of Natural Resources (MNR) on February 3, 2022. The search did not reveal any areas of natural significance within the Phase I Study Area.

## **Ministry of the Environment, Conservation and Parks Freedom of Information Request**

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the properties. At the time of issuing this report, a response had not been received from the MECP, a delay in response is expected due to the COVID-19 pandemic. A copy of the response will be forwarded to the client if it contains any pertinent information.

## **MECP Instruments**

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site. At the time of issuing this report, a response had not been received from the MECP, a delay in response is expected due to the COVID-19 pandemic. A copy of the response will be forwarded to the client if it contains any pertinent information.

## **MECP Waste Management Records**

A request was submitted to the MECP FOI office for information with respect to waste management records. At the time of issuing this report, a response had not been received from the MECP, a delay in response is expected due to the COVID-19 pandemic. A copy of the response will be forwarded to the client if it contains any pertinent information.

---

## **MECP Submissions**

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the Phase I Property. At the time of issuing this report, a response had not been received from the MECP, a delay in response is expected due to the COVID-19 pandemic. A copy of the response will be forwarded to the client if it contains any pertinent information.

## **MECP Incident Reports**

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants, inspections maintained by the MECP the for Phase I Property or neighbouring properties. At the time of issuing this report, a response had not been received from the MECP, a delay in response is expected due to the COVID-19 pandemic. A copy of the response will be forwarded to the client if it contains any pertinent information.

## **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry (ESR) was conducted as part of this assessment for the site, neighbouring properties and the general area of the site. No records of site condition (RSCs) have been filed for the Phase I Property.

An RSC was identified for 70 Gloucester Street (adjacent to the east of the Phase I Property) from May, 2019 and identified three APECs on the subject site. Impacted fill material was identified on the subject site and an environmental remediation program was conducted from July 2017 through November 2017. Impacted fill material was removed to the boundaries of the RSC property, all final confirmatory base samples were in compliance with the MECP Table 3 Standards. Groundwater from beneath the 70 Gloucester Street property was analyzed for metals and VOCs and determined to comply with MECP Table 3 Standards.

Information contained in the 70 Gloucester Street RSC contributed to the determination that fill material of unknown quality was identified as a PCA that results in an APEC on the Phase I Property.

Another RSC was identified for 89 and 91 Nepean Street (adjacent to the southeast of the Phase I Property) from August, 2019 and identified two APECs on the subject site. Impacted fill material was identified throughout the subject site, as a result, an environmental remediation program was conducted at the 89 and 91 Nepean Street properties from July 2017 through November 2017. Impacted fill material was removed to the boundaries of the RSC property, all final confirmatory base samples were in compliance with the MECP Table 3 Standards. Groundwater from beneath the 89 and 91 Nepean Street properties was analyzed for metals and determined to comply with MECP Table 3 Standards.

Information contained in the 89 and 91 Nepean Street RSC contributed to the determination that fill material of unknown quality was identified as a PCA that results in an APEC on the Phase I Property.

An RSC was identified for 170 Metcalfe Street (35 m southeast of the Phase I Property) from April 2019. The RSC identified three APECs (fill material of unknown quality, transformer room and aboveground fuel storage tank) on the 170 Metcalfe Street property, none of which are indicative of a concern to the Phase I Property.

An RSCs was identified for the property addressed 287 Lisgar Street (approximately 115 m southwest) from July 2019, however, due to the significant separation distance from the Phase I Property, information contained in the RSC files is not considered to have the potential to impact the Phase I Property.

### **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research. This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no former waste disposal sites located within the Phase I Study Area.

### **Environmental Risk Information Service (ERIS) Report**

An Environmental Risk Information Services (ERIS) report for the Phase I Property and surrounding lands was acquired and reviewed as part of this assessment. It should be noted that the ERIS report includes information that would normally be obtained through the MECP FOI, MECP well records search as well as several other records (i.e. incident reports, waste generators, etc.). The complete ERIS report has been included in Appendix 1. The ERIS search did not identify any records for the Phase I Property.

A total of 598 records (137 of which are historical ERIS searches) from various databases were identified for properties within the 250m radius of the Phase I Property.

The ERIS report identified 12 various fuel storage tank related records (delisted fuel tanks, [historic] fuel storage tanks, private and retail fuel storage tanks) for properties within the Phase I Study Area. The fuel storage tank records pertain to the property addressed 154 O'Connor Street, 60 m west of the Phase I Property and its function as a former retail fuel outlet. The fuel storage tank records list three double wall liquid fuel USTs installed in 1980, each with a capacity of 22,700 L. The records state that two of the tanks expired in March 2012 and the third expired in May 2013. The presence of these records contributes to the determination that the 154 O'Connor Street property represents a PCA. However, due to the separation distance and cross gradient orientation of the 154 O'Connor Street property with respect to the Phase I Property, it is not considered to represent an environmental concern on the Phase I Property.

The ERIS report identified a total of 35 TSSA historic incident, pipeline incidents and Ontario spill records within the Phase I Study Area. The records pertain primarily to minimal oil, natural gas or grease spills/leaks contained within a small perimeter of the spill area. Several of the documented spills area associated with PCAs identified within the Phase I Study Area. Based on information contained in the ERIS report, the relative separation distance and cross/down-gradient orientation with respect to the Phase I Property, these PCAs are not considered to represent APECs on the Phase I Property.

The ERIS report identified 44 Scott's Manufacturing Directory records for properties within the Phase I Study Area. Various Scott's Manufacturing Directory records pertain to properties within the Phase I Study that represent PCAs. The nearest record of note pertains to the property addressed 220 Laurier Avenue, approximately 50 m north of the Phase I Property and its historic function as a commercial printer. Several of the documented Scott's Manufacturing Directory records are associated with PCAs identified within the Phase I Study Area. Based on information contained in the ERIS report, the relative separation distance and cross/down-gradient orientation with respect to the Phase I Property, these PCAs are not considered to represent APECs on the Phase I Property.

The ERIS report identified 242 waste generator records for properties within the Phase I Study Area, all of which are dated between 1986 and 2021. Several waste generator records are associated with properties addressed 300 Laurier Avenue (60 m northwest), 160 Elgin Street (80 m east) and 130 Slater Street (140 m north) and their respective functions as an existing Government of Canada building, existing Bell Canada building and an existing printers. The waste classes documented include inorganic laboratory chemicals, waste compressed gases, aliphatic solvents, petroleum distillates, etc. The waste generator records are associated with PCAs identified within the Phase I Study Area, however, due to their respective separation distances and/or cross/down-gradient orientation with respect to the Phase I Property these PCAs are not considered to represent APECs.

The ERIS report identified 20 well records (and 11 borehole records), all of which were dated between 1933 and 2019. The nearest records pertain to monitoring wells installed in 2018 on the property addressed 170 Metcalfe Street, approximately 35 m southeast of the Phase I Property. The records are in relation to the RSC filing for the 170 Metcalfe Street property and are not considered to be indicative of any specific environmental concerns that have not already been identified. Remaining records correspond to properties a minimum of 60 m away from the Phase I Property and are not considered to be representative of a potential environmental concern to the Phase I Property. The subsurface profile in the area of the Phase I Property generally consists of sand underlain by clay and shale bedrock.

The ERIS report identified 45 certificates of approval, environmental compliance approval and environmental registry records for properties within the Phase I Study Area. The records are limited to sewer, water and air works and are not considered to pose an environmental risk to the Phase I Property.

The remaining records identified in the ERIS report contain no pertinent information and are not considered to be representative of potential environmental concerns to the Phase I Property.

### **City of Ottawa Landfill Document**

The document prepared by Golder Associates entitled “Old Landfill Management Strategy, Phase I - Identification of Sites, City of Ottawa”, was reviewed. No former landfills were identified within the Phase I Study Area.

## **Former Industrial Sites**

The report entitled “Mapping and Assessment of Former Industrial Sites, City of Ottawa” prepared by Intera Technologies Limited was also reviewed. Three records of former commercial printers were identified within the Phase I Study Area for the properties addressed 230 Laurier Avenue West (operated from 1936 to 1965), 175 Nepean Street (operated from 1928 to 1965) and 118 Slater Street (operated from 1945 to 1965). As previously discussed, due to the respective separation distance and cross/down-gradient orientation of these properties with respect to the Phase I Property, these former industrial sites are considered PCAs that do not result in APECs on the Phase I Property.

## **City of Ottawa Historical Land Use Inventory (HLUI)**

A requisition form was sent to the City of Ottawa on March 15, 2022 to request information from the City’s Historical Land Use Inventory (HLUI) database for the Phase I Property. The HLUI report identified four records for the Phase I Property, three of which pertain to the former commercial printers and one to a general contractor. The records for the former printers contribute to the determination that the former printers represent two (separate) APECs on the Phase I Property. The record for the general contractor is dated 2017 and based on available information, it is our opinion that this record is in reference strictly to the office of the general contractor and is not considered to be of concern to the Phase I Property.

The HLUI report identified a total of 550 records for surrounding properties within the Phase I Study Area, the majority of which have been identified through sources reviewed during the historical research portion of the Phase I ESA or are not considered to be of concern based on the listed description. Not previously identified, were two 1966 UST records for the property addressed 70 Gloucester Street, adjacent to the east of the Phase I Property. Based on Paterson’s involvement of the remediation on 70 Gloucester Street, we can say that these records do not represent an environmental concern as no USTs or signs of UST related contamination were identified during the excavation of 70 Gloucester Street.

Based on a review of the HLUI, no new APECs in addition to those previously identified through other historical records, were identified on the Phase I Property.

## Technical Standards and Safety Authority (TSSA)

The TSSA, Fuels Safety Branch in Toronto, was contacted electronically on January 6, 2022 to inquire about current and former underground/aboveground storage tanks, spills, and incidents for the subject and neighbouring properties. The TSSA search did not return any records for the Phase I Property or neighbouring property. For further information regarding the TSSA records for properties within the Phase I Study Area please refer to the ERIS section of this Phase I ESA.

A copy of the correspondence with the TSSA and the properties of interest is included in the Appendix.

## 4.3 Physical Setting Sources

### Aerial Photographs

Historical air photos from the National Air Photo Library were reviewed in approximate ten (10) year intervals. Based on the review, the following observations have been made:

- 1928 The portion of the Phase I Property addressed 84 Gloucester Street is occupied by three residential dwellings and the 100 Gloucester Street portion of the Phase I Property is occupied by four residential dwellings. The surrounding lands are occupied by residential buildings. Gloucester Street is present at this time.
- 1958 (City of Ottawa Website) An outbuilding has been developed on the southeast corner of the Phase I Property. No significant changes are apparent with respect to the neighbouring properties.
- 1965 (City of Ottawa Website) The portion of the Phase I Property addressed 84 Gloucester Street has been redeveloped with two buildings and the portion of the Phase I Property addressed 100 Gloucester Street has been redeveloped with the existing multi-storey commercial building and swimming pool, the remainder of the Phase I Property appears to be used as a parking lot. A portion of the property adjacent to the east of the Phase I Property has been demolished and is used as a parking lot. The property adjacent to the south and southwest of the Phase I Property has been redeveloped as part of the existing residential apartment building. The property opposite Gloucester Street has been demolished and the existing parking lot has been developed. A retail fuel outlet is present approximately 60 m northwest of the Phase I Property. A second retail fuel outlet is present approximately 60 m west of the Phase I Property.

- 1976 (City of Ottawa Website) (Poor Quality) No significant changes are apparent with respect to the Phase I Property or the neighbouring properties.
- 1991 (City of Ottawa Website) The two buildings on the Phase I Property have been demolished and the existing parking is present. A small toll booth is present on the northeast corner of the Phase I Property. An existing high-rise building has been developed opposite Gloucester Street, approximately 10 m north of the Phase I Property, as a result, the retail fuel outlet approximately 60 m northwest of the Phase I Property has been demolished.
- 2002 (City of Ottawa Website) No significant changes are apparent with respect to the Phase I Property. The property adjacent to the southeast of the Phase I Property has been demolished and remains vacant.
- 2011 (City of Ottawa Website) No significant changes are apparent with respect to the Phase I Property. A temporary commercial office structure has been developed on the property adjacent to the south of the Phase I Property. The retail fuel outlet approximately 60 m west of the Phase I Property has been decommissioned and the property is used for commercial purposes.
- 2019 (City of Ottawa Website) No significant changes are apparent with respect to the Phase I Property. The properties adjacent to the east, south and southeast of the Phase I Property are under construction as part of a multi-storey building.

Copies of selected aerial photographs reviewed are included in Appendix 1.

### **Physiographic Maps**

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website. According to this physiographic map, the site is located in the St. Lawrence Lowlands. According to the mapping description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.” The Phase I Property is located in the Central St. Lawrence Lowland, which is generally less than 150 m above sea level.

## **Topographic Maps**

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. The topographic maps indicate that the regional topography in the general area of the Phase I Property slopes down gently to the north, towards the Ottawa River. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

## **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock in the area of the site consists of shale of the Billings Formation. Based on the maps, the surficial geology consists of offshore marine sediments (erosional terraces) with an overburden thickness ranging from 10 to 15m.

## **Water Well Records**

A well record search was conducted on March 10, 2022 for all drilled wells within the Phase I Study Area. No potable well records were identified for the Phase I Property.

A total of 26 monitoring well records were identified within the Phase I Study Area. Three monitoring well records, dated June 19, 2018 were identified for the property addressed 170 Metcalfe Street, approximately 35 m southeast of the Phase I Property. These monitoring well records are assumed to be present as part of the RSC filing that was done for the 170 Metcalfe Street property. Several monitoring well records were identified for the 154 O'Connor Street property, approximately 60 m west of the Phase I Property. The presence of these monitoring well records is assumed to be in relation to the historic function of the 154 O'Connor Street property as a retail fuel outlet. All remaining well records correspond to properties a minimum of 65 m from the Phase I Property and are not considered to be representative of a potential environmental concern to the Phase I Property.

Based on the monitoring well records, the general stratigraphy in the area of the Phase I Property consists of sand underlain by clay and shale bedrock. Bedrock was reportedly encountered at depths ranging from approximately 4.3 to 11.3 m below grade. Static water levels were not recorded on the well records. A copy of the well records has been included in Appendix 2.

## **5.0 INTERVIEWS**

### **Property Owner Representative**

Mr. Vincent Dénoimé, with Claridge Homes, was interviewed as part of this assessment. Mr. Dénoimé stated that to his knowledge the building on the 100 Gloucester Street portion of the Phase I Property has always been used for commercial purposes. Mr. Dénoimé was not aware of any environmental concerns on the Phase I Property or surrounding lands.

## **6.0 SITE RECONNAISSANCE**

### **6.1 General Requirements**

A site visit was conducted on January 27, 2022, by Mr. Jeremy Camposarcone with the Environmental Department of Paterson Group. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were assessed at the time of the site visit from publicly accessible areas.

### **6.2 Specific Observations at the Phase I Property**

#### **Buildings and Structures**

The Phase I Property is occupied by a six-storey office building with ground floor commercial businesses (coffee shop, commercial kitchen and fingerprinting). The building is constructed with a poured concrete foundation and is finished with brick and a flat tar-and-gravel style roof. The subject building is currently heated via natural gas fired furnaces. A small wood framed, toll booth is present on the northeast corner of the Phase I Property, constructed with vinyl siding and sloped shingled roof. No other buildings or permanent structures are present on the Phase I Property.

A depiction of the Phase I Property is shown on Drawing PE5571-1 – Site Plan, in the Appendix.

#### **Subsurface Structures and Utilities**

The Phase I Property is situated in a municipally serviced area. Underground utility services on the subject land include natural gas, electricity, cable and water services. Services enter the Phase I Property from Gloucester Street.

## Site Features

The northwest portion of the Phase I Property (100 Gloucester Street) is occupied by the aforementioned multi-storey commercial building. The southwest portion of the Phase I Property is occupied by an in-ground swimming pool (reportedly used by the residential apartment complex adjacent to the south and southwest of the Phase I Property). A small toll booth is present on the northeast corner of the Phase I Property (84 Gloucester Street). The remainder of the Phase I Property consists of primarily an asphaltic concrete parking lot.

The Phase I Property topography is generally flat, and the regional topography slopes gently downwards to the north, towards the Ottawa River. Water drainage on the Phase I Property occurs primarily by infiltration and surface runoff into catch basins along Gloucester Street. No surficial staining or indications of potential sub-surface contamination was observed during the exterior assessment of the Phase I Property. Groundwater within the Phase I Study Area is generally expected to flow towards the north.

With the exception of buried services discussed above, no other underground structures, drains, pits or sumps were observed on the exterior of the Phase I Property during the site visit. No monitoring wells or potable wells were observed onsite, nor are any expected to be present, as the site is located in a municipally serviced area.

No signs of stressed vegetation, surficial staining or evidence of fill material were noted on the Phase I Property. Site features are presented on Drawing PE5571-1 – Site Plan, provided in the Figures section following the text.

## Potential Environmental Concerns

### Fuels and Chemical Storage

No underground or aboveground storage tanks or signs thereof were noted on the exterior of the Phase I Property.

### Waste Management

Waste materials generated on-site include non-hazardous domestic waste and recyclable waste. These materials are stored along the exterior of the commercial building and are collected by a licensed contractor on a regular basis. No concerns were identified with respect to waste management practices at the Phase I Property.

#### **Fill Material**

No evidence of fill placement was observed at the time of the site visit. However, based on there having been former residential dwellings present throughout the Phase I Property that were demolished circa 1965 (100 Gloucester Street) and circa 1991 (84 Gloucester Street), it is our opinion that fill material of unknown quality may have been used during regrading of the Phase I Property. The potential presence of fill material of unknown quality on the central and east portions of the Phase I Property is considered to represent a PCA that results in an APEC on the Phase I Property.

#### **Polychlorinated Biphenyls (PCBs) and Transformer Oil**

A pole mounted transformer was identified adjacent to the north of the Phase I Property at the time of the site visit. The transformer was noted to be in good condition with no signs of staining observed. The presence of this transformer is not considered to represent an environmental concern to the Phase I Property.

### **Interior Assessment**

Based on the historical research, the subject building was constructed circa 1961. The basement and first two floors of the subject building are heated via natural gas fired furnaces located in the basement and the top four floors of the subject building are heated via natural gas fired furnaces located on the top floor. It is our understanding that natural gas has been the only heating source for the subject building since its construction (contrary to what was listed in the 1982 and 1988 PURs).

A general description of the interior of the 100 Gloucester Street building finishes are as follows:

- Floors consist of terrazzo, ceramic tile, carpet, laminate and poured concrete;
- Walls consist of concrete block, drywall and drywall joint compound;
- Ceilings consist of suspended ceiling tiles, drywall, stipple plaster and concrete;
- Lighting throughout the building is provided by fluorescent and incandescent fixtures.

Building materials were generally observed to be in good condition at the time of the site visit.

---

## Potentially Hazardous Building Products

### **Asbestos-Containing Materials (ACMs)**

As previously discussed, an asbestos survey was completed on the 100 Gloucester Street building by Greenough Environmental Consulting Inc. Reference should be made to this report for further information regarding asbestos containing materials on the Phase I Property.

### **Lead-Based Paints (LBPs)**

Based on the age of the subject building (circa 1961), LBPs may be present within the structure on original or older painted surfaces. Painted surfaces were generally observed to be in good condition at the time of the site inspection, and do not pose an immediate concern.

### **Polychlorinated Biphenyls (PCBs) and Transformer Oil**

Based on the age of the subject building (circa 1961), PCBs may be present within original and older electrical equipment, such as transformers, particularly within the City of Ottawa hydro-vault identified in the basement of the subject building, access to the hydro-vault was not made available at the time of the site visit.

### **Urea Formaldehyde Foam Insulation (UFFI)**

No signs of UFFI were noted at the time of the site visit, although wall and ceiling cavities were not inspected.

## Other Potential Environmental Concerns

### **Fuel and Chemical Storage**

No fuels or chemicals, with the exception of cleaning products and paints, were observed on the interior the subject site at the time of the site visit. These chemicals were in their original containers and were properly stored on shelves, and as such, do not pose an environmental concern.

### **Wastewater Discharge**

Wastewater typically generated on site, including wash water and sewage, is discharged to the municipal sewer system. A floor drain in the basement furnace room was inspected and observed to contain visually clean water. No odours or staining were noted at the time of the site visit. No sump pits were observed within the building at the time of the site visit

### **Ozone Depleting Substances (ODSs)**

Potential sources of ODSs observed on-site include refrigerators, air conditioning equipment and fire extinguishers. These appliances were noted to be in good condition at the time of the site inspection and should be regularly serviced by a licensed contractor on a regular basis.

### **Neighbouring Properties**

An inspection of the neighbouring properties was conducted from publicly accessible areas at the time of the site visits. Land use adjacent to the Phase I Property was as follows:

- North – Gloucester Street, followed by a parking lot and commercial office buildings;
- South- High-rise apartment building, followed by Nepean Street;
- East – High-rise apartment building, followed by commercial and Metcalfe Street;
- West: Residential apartment and commercial buildings, followed by O'Connor Street.

Land use within the Phase I Study is a mixture of residential and commercial land use. The current uses of the adjacent properties were not considered to pose an environmental concern to the Phase I Property. Current land use and PCAs identified in the Phase I Study Area are presented on Drawing PE5571-2 – Surrounding Land Use Plan.

## 7.0 REVIEW AND EVALUATION OF INFORMATION

### 7.1 Current and Past Uses

Based on city directories, aerial photographs and fire insurance plans, the Phase I Property was first developed for residential purposes sometime prior to 1878. The portion of the Phase I Property addressed 84 Gloucester Street was primarily occupied by residential dwellings until the late 1970s (with the exception of a commercial printer, Lo-Mor Printers Ltd., from 1959 to mid-1970) when the buildings were demolished and the existing parking lot was developed. The portion of the Phase I Property addressed 100 Gloucester Street was occupied by residential dwellings until the early 1960s when the existing multi-storey commercial building was developed (primarily used as an office building). A commercial printer (E A S Illustrations Commercial Printing) was listed for the 100 Gloucester Street portion of the Phase I Property from 1973 to 1984.

#### **Potentially Contaminating Activities (PCAs) and Areas of Potential Environmental Concern (APECs)**

Based on the findings of the Phase I ESA, the following on and off-site PCAs (as listed in Column A, Table 2 of O.Reg.153/04) were considered to result in areas of potential environmental concern (APECs) on the Phase I Property:

- PCA NA – Commercial Printer – this PCA is associated with the former commercial printers reported to have been present on the Phase I Property at 86 Gloucester Street (part of 84 Gloucester Street parcel) and 100 Gloucester Street (APECs 1 and 2).
- PCA 30 – Importation of Fill Material of Unknown Quality – this PCA is associated with potential presence of fill material of unknown quality identified on the central and east portions of Phase I Property (APEC 3)
- PCA 37 – Operation of Dry Cleaning Equipment (where chemicals are used) – this PCA is associated with the former possible off-site dry cleaners reported to have been present at 114 Gloucester Street (present day 112 Gloucester Street), approximately 20 m west of the Phase I Property (APEC 5).

Based on the findings of the Phase I ESA, it is considered likely that road salt was applied to the surface of the parking lot on the Phase I Property for the safety of vehicular and pedestrian traffic under conditions of ice and/or snow. Although not defined as a specific PCA under Column A of Table 2 of O.Reg. 153/04, the use of salt for safety purposes is considered to result in an APEC on the Phase I Property (APEC 4).

According to Section 49.1 of O.Reg. 153/04, if an applicable site condition standard is exceeded at a property solely because of the following reason, the applicable site condition standard is deemed not to be exceeded for the purpose of Part XV.1 of the Act: “The qualified person has determined, based on a phase one environmental site assessment or a phase two environmental site assessment, that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both.”

In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for APEC 4.

The remaining 31 off-site PCAs (existing or historical) identified within the Phase I Study Area are not considered to result in APECs on the Phase I Property due to their respective separation distance and/or cross/down-gradient orientations with respect to the Phase I Property.

All APECs are outlined on Drawing PE5571-1 – Site Plan, while all PCAs identified within the Phase I Study Area are presented on Drawing PE5571-2 – Surrounding Land Use Plan in the Figures section of this report, following the text.

### **Contaminants of Potential Concern**

Based on the past uses of the Phase I Property and the potentially contaminating activities, the following Contaminants of Potential Concern (CPCs) have been identified:

- Volatile Organic Compounds (VOCs)
- Metals (including arsenic (As), antimony (Sb) and selenium (Se))
- Polycyclic Aromatic Hydrocarbons (PAHs)

In accordance with Section 49.1 of O.Reg.153/04, as amended, electrical conductivity (EC) and sodium adsorption ratio (SAR) are not considered to be CPCs.

## **7.2 Conceptual Site Model**

### **Geological and Hydrogeological Setting**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on the information from NRCAN, bedrock in the area of the site consists of shale of the Billings Formation. Based on the maps, the surficial geology consists of offshore marine sediments (erosional terraces) with an overburden thickness ranging from 10 to 15m.

The regional topography in the general area of the Phase I Property slopes down gently to the north, towards the Ottawa River. Groundwater within the Phase I Study Area is generally expected to flow towards the north.

### **Fill Placement**

No evidence of fill placement was observed at the time of the site visit. However, based on there having been former residential dwellings present throughout the Phase I Property that were demolished circa 1965 (100 Gloucester Street) and circa 1991 (84 Gloucester Street), it is our opinion that fill material of unknown quality would have been used during regrading of the Phase I Property. The potential presence of fill material of unknown quality on the central and east portions of Phase I Property is considered to represent a PCA that results in an APEC on the Phase I Property.

### **Water Bodies and Areas of Natural Significance**

No areas of natural significance or water bodies were identified on the Phase I Property or within the Phase I Study Area.

### **Drinking Water Wells**

There are no potable water wells on the Phase I Property or within the Phase I Study Area.

---

## **Monitoring Wells**

A total of 26 monitoring well records were identified within the Phase I Study Area. Three monitoring well records, dated June 19, 2018 were identified for the property addressed 170 Metcalfe Street, approximately 35 m southeast of the Phase I Property. These monitoring well records are assumed to be present as part of the RSC filing that was done for the 170 Metcalfe Street property. Several monitoring well records were identified for the 154 O'Connor Street property, approximately 60 m west of the Phase I Property. The presence of these monitoring well records is assumed to be in relation to the historic function of the 154 O'Connor Street property as a retail fuel outlet. All remaining well records correspond to properties a minimum of 65 m from the Phase I Property and are not considered to be representative of a potential environmental concern to the Phase I Property.

Based on the monitoring well records, the general stratigraphy in the area of the Phase I Property consists of sand underlain by clay and shale bedrock. Bedrock was reportedly encountered at depths ranging from approximately 4.3 to 11.3 m below grade. Static water levels were not recorded on the well records. A copy of the well records has been included in Appendix 2.

## **Existing Buildings and Structures**

The Phase I Property is occupied by a six storey office building with ground floor commercial businesses (coffee shop, commercial kitchen and fingerprinting). The building is constructed with a poured concrete foundation and is finished with brick and a flat tar-and-gravel style roof. The subject building is currently heated via natural gas fired furnaces. It is our opinion that natural gas has been the only heating source for the subject building since its construction (contrary to what was listed in the 1982 and 1988 PURs). A small wood framed, toll booth is present on the northeast corner of the Phase I Property, constructed with vinyl siding and sloped shingled roof.

No other buildings or permanent structures are present on the Phase I Property.

## **Subsurface Structures and Utilities**

The Phase I Property is situated in a municipally serviced area. Underground utility services on the subject land include natural gas, electricity, cable and water services. Services enter the Phase I Property from Gloucester Street.

No potable wells or private sewage systems were observed on the Phase I Property at the time of the site visit. No other subsurface structures were identified at the time of the site visit.

## Neighbouring Land Use

Neighbouring land use within the Phase I Study consists of a mixture of residential, and commercial land use. Current land use and PCAs identified in the Phase I Study Area are presented on Drawing PE5571-2 – Surrounding Land Use Plan.

## Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of this report, four on-site and one off-site PCA are considered to result in five APECs on the Phase I Property. The PCAs, APEC and associated contaminants of potential concern (CPCs) are summarized in Table 3.

<b>Table 3 - Areas of Potential Environmental Concern</b>					
<b>Area of Potential Environmental Concern</b>	<b>Location of Area of Potential Environmental Concern with respect to Phase I Property</b>	<b>Potentially Contaminating Activity</b>	<b>Location of PCA (on-site or off-site)</b>	<b>Contaminants of Potential Concern</b>	<b>Media Potentially Impacted (Groundwater, Soil, and/or Sediment)</b>
APEC 1 Former Printers	East portion of the Phase I Property (former 86 Gloucester Street)	<i>"Item NA – Commercial Printers"</i>	On-site	VOCs	Soil Groundwater
APEC 2 Former Printers	Northwest portion of the Phase I Property (100 Gloucester Street)	<i>"Item NA – Commercial Printers"</i>	On-site	VOCs	Soil Groundwater
APEC 3 Fill Material of Unknown Quality	Throughout the Phase I Property	<i>"Item 30 – Importation of Fill Material of Unknown Quality"</i>	On-site	Metals As, Sb, Se PAHs	Soil
APEC 41 Application of Road Salt	Central and east portions of the Phase I Property (84 & 100 Gloucester Street)	<i>"Item NA: Application of road salt for the safety of vehicular or pedestrian traffic under conditions of snow or ice"</i>	On-site	Electrical Conductivity (EC)  Sodium Adsorption Ratio (SAR)	Soil
1 – In accordance with Section 49.1 of O.Reg. 153/04 standards are deemed to be met if an applicable site condition standard is exceeded at a property solely because the qualified person has determined that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. The exemption outlined in Section 49.1 is being relied up with respect to the RSC property.					

<b>Table 3 cont. - Areas of Potential Environmental Concern</b>					
<b>Area of Potential Environmental Concern</b>	<b>Location of Area of Potential Environmental Concern with respect to Phase I Property</b>	<b>Potentially Contaminating Activity</b>	<b>Location of PCA (on-site or off-site)</b>	<b>Contaminants of Potential Concern</b>	<b>Media Potentially Impacted (Groundwater, Soil, and/or Sediment)</b>
<b>APEC 5 Possible Former Dry Cleaner</b>	<b>West portion of the Phase I Property (100 Gloucester Street)</b>	<b>"Item 37: Operation of Dry Cleaning Equipment"</b>	<b>Off-site</b>	<b>VOCs</b>	<b>Soil Groundwater</b>
1 – In accordance with Section 49.1 of O.Reg. 153/04 standards are deemed to be met if an applicable site condition standard is exceeded at a property solely because the qualified person has determined that a substance has been applied to surfaces for the safety of vehicular or pedestrian traffic under conditions of snow or ice or both. The exemption outlined in Section 49.1 is being relied up with respect to the RSC property.					

### **Contaminants of Potential Concern**

As per section 7.1 and Table 3, contaminants of potential concern (CPCs) in the soil/groundwater beneath the Phase I Property include the following:

- Volatile Organic Compounds (VOCs)
- Metals (including arsenic (As), antimony (Sb) and selenium (Se))
- Polycyclic Aromatic Hydrocarbons (PAHs)

In accordance with Section 49.1 of O.Reg.153/04, as amended, electrical conductivity (EC) and sodium adsorption ratio (SAR) are not considered to be CPCs.

### **Assessment of Uncertainty and/or Absence of Information**

The information available for review as part of the preparation of this Phase I- ESA is considered to be sufficient to conclude that there are historical on-site and off-site PCAs that have resulted in APECs on the Phase I Property. Additional off-site PCAs identified within the study area are not considered to represent APECs on the Phase I Property based on their separation distances and/or orientations relative to the subject land.

---

A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

## **8.0 CONCLUSIONS**

### **8.1 Assessment**

Paterson Group was retained by Claridge Homes to conduct a Phase I-Environmental Site Assessment (ESA) for the properties addressed 84 & 100 Gloucester Street, in the City of Ottawa, Ontario. The purpose of this Phase I-ESA was to research the past and current use of the Phase I Property and 250m Phase I Study Area, and to identify any environmental concerns with the potential to have impacted the subject land.

Based on city directories, aerial photographs and fire insurance plans the Phase I Property was first developed for residential purposes sometime prior to 1878. The portion of the Phase I Property addressed 84 Gloucester Street was primarily occupied by residential dwellings until the late 1970s (with the exception of a commercial printer, Lo-Mor Printers Ltd., from 1959 to mid-1970) when the buildings were demolished and the existing parking lot was developed. The portion of the Phase I Property addressed 100 Gloucester Street was occupied by residential dwellings until the early 1960s when the existing multi-storey commercial building was developed (primarily used as an office building). A commercial printer (E A S Illustrations Commercial Printing) was listed for the 100 Gloucester Street portion of the Phase I Property from 1973 to 1984.

A total of three historic on-site PCAs were identified on the Phase I Property. Two former printers were identified as historical PCAs on the Phase I Property (one addressed 84 Gloucester Street and one addressed 100 Gloucester Street). The presence of fill material of unknown quality was considered to be identified across the entire Phase I Property. The three historic on-site identified PCAs result in three APECs on the Phase I Property.

Based on available historical information, adjacent and surrounding properties within the Phase I Study Area have been used for a combination of residential, institutional, and commercial properties. The historical use of the property addressed 114 Gloucester Street (present day 12 Gloucester Street), approximately 20 m west of the Phase I Property, as a possible dry cleaner is a PCA that represents an APEC on the Phase I Property. The historical use of the remaining surrounding properties within the Phase I Study Area are not considered to represent APECs on the Phase I Property.

Following the historical research, a site visit was conducted. The portion of the Phase I Property addressed 100 Gloucester Street is currently occupied by a six-storey office building with ground floor commercial businesses (coffee shop, commercial kitchen and fingerprinting). The building is constructed with a poured concrete foundation and is finished with brick and a flat tar-and-gravel style roof. The southwest portion of the Phase I Property (100 Gloucester Street) is occupied by an in-ground swimming pool (reportedly used by the residential apartment complex adjacent to the south and southwest of the Phase I Property). A small toll booth is present on the northeast corner of the Phase I Property (84 Gloucester Street). The remainder of the Phase I Property consists of primarily an asphaltic concrete parking lot. The application of road salt on the asphaltic concrete parking areas of the Phase I Property was identified as a PCA that results in an APEC on the Phase I Property. In accordance with Section 49.1 of O.Reg. 153/04, any EC and SAR concentrations on the RSC Property that exceed the MECP Table 3 standards for a residential/institutional land use are deemed not to be exceeded for the purpose of Part XV.1 of the Act. This exemption is being relied on for the aforementioned APEC.

The current uses of the adjacent and surrounding properties within the Phase I Study Area include a combination of residential and commercial uses. No existing off-site PCAs that result in APECs on the Phase I Property were identified within the Phase I Study Area at the time of the site visit.

## 8.2 Recommendations

Based on the results of the historical research, personal interviews, and sit inspection indicated the presence of historical potentially activities and existing potential environmental concerns at the Phase I Property. Based on the results of this Phase I-ESA, **in our opinion that a Phase II - Environmental Site Assessment is required for the Phase I Property.**

Based on the age of the subject building (circa 1961) potentially asbestos containing materials (ACMs) observed include vinyl floor tiles, drywall joint compound and decorative ceiling plaster. Lead-based paints may also be present on original or older painted surfaces beneath more recent coats of paint. An asbestos survey was completed on the 100 Gloucester Street building by Greenough Environmental Consulting Inc. Reference should be made to this report for further information regarding asbestos containing materials on the Phase I Property.

---

Prior to any renovation or demolition activities, a designated substance survey (DSS) must be conducted for the existing building, in accordance with Ontario Regulation 490/09 under the Occupational Health and Safety Act.

## 9.0 STATEMENT OF LIMITATIONS

This Phase I - Environmental Site Assessment report has been prepared in general accordance with O.Reg. 153/04, as amended, and meets the requirements of CSA Z768-01 (reaffirmed 2016). The conclusions presented herein are based on information gathered from a limited historical review and field inspection program. The findings of the Phase I - ESA are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as, local, provincial and federal agencies and was limited within the scope-of-work, time and budget of the project herein.

Should any conditions be encountered at the subject site and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Claridge Homes. Permission and notification from Claridge Homes and Paterson will be required to release this report to any other party.

ELEVATION NOTES

- 1. Elevations shown are geodetic and are referred to the CGVD28 geodetic datum. 2. It is the responsibility of the user of this information to verify that the job benchmark has not been altered or disturbed and that its relative elevation and description agrees with the information shown on this drawing.

UTILITY NOTES

- 1. This drawing cannot be accepted as acknowledging all of the utilities and it will be the responsibility of the user to contact the respective utility authorities for confirmation. 2. Only visible surface utilities were located. 3. A field location of underground plant by the pertinent utility authority is mandatory before any work involving breaking ground, probing, excavating, etc. 4. Invert data, and underground lines without surface hardware visible, were derived from City of Ottawa Engineering Sheets E-12-04 and E-12-05.

**2. Request Parameters**

<b>Municipal Address</b> (Municipal address mandatory for cities, towns or regions)		
Unit Number <b>84&amp;100</b>	Street Name <b>Gloucester Street</b>	PO Box
Lot Number <b>Part of Lot D</b>	Concession <b>C</b>	Geographic Township <b>Nepean</b>
City/Town/Village <b>Ottawa</b>	Province <b>Ontario</b>	Postal Code <b>K1M 1Z4</b>

**Present Property**

1. Owner <b>Claridge Homes</b>	Date of Ownership (yyyy/mm/dd)
Tenant (if applicable)	

**Previous Property**

1. Owner	Date of Ownership (yyyy/mm/dd)
Tenant (if applicable)	

### 3. Search Parameters

Search Parameters	Specify Year(s) Requested
Environmental concerns (General correspondence, occurrence reports, abatement)	All
Orders	All
Spills	All
Investigations/prosecutions ► Owner and tenant information must be provided	All
Waste Generator number/classes	All

Files older than 2 years may require \$60.00 retrieval cost. There is no guarantee that records responsive to your request will be located.

### 4. Environmental Compliance Approvals/Certificates of Approval

Environmental Compliance Approvals/Certificates of Approval	SD	Specify Year(s) Requested
air - emissions	<input checked="" type="checkbox"/>	1986- Present
renewable energy	<input checked="" type="checkbox"/>	1986- Present
water - mains, treatment, ground level, standpipes & elevated storage, pumping stations (local & booster)	<input checked="" type="checkbox"/>	1986- Present
sewage - sanitary, storm, treatment, stormwater, leachate & leachate treatment & sewage pump stations	<input checked="" type="checkbox"/>	1986- Present
waste water - industrial discharge	<input checked="" type="checkbox"/>	1986- Present
waste sites - disposal, landfill sites, transfer stations, processing sites, incinerator sites	<input checked="" type="checkbox"/>	1986- Present
waste systems - haulers: sewage, non-hazardous & hazardous waste, mobile waste processing units, PCB destruction	<input checked="" type="checkbox"/>	1986- Present

Proponent information must be provided and Environmental Compliance Approval/Certificate of Approval number(s) (if known). 1985 and prior records are searched manually. Search fees in excess of \$300.00 may be incurred, depending on the types and years to be searched. Specify Approval number(s) (if known). If supporting documents are also required, mark SD box and specify type e.g. maps, plans, reports, etc.

Paterson Group

*Sent via email [jcamporacone@patersongroup.ca]*

Dear Jeremy,

**Re: Information Request  
84-100 Gloucester Street, Ottawa, Ontario (“Subject Property”)**

**Internal Department Circulation:**

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- **Environment and Health Protection:** The City’s Environment and Health Protection Branch has found the following information pertaining to the subject property:
  - **Contain premises with outstanding non-critical public health-related infractions**

**Documents Provided:**

**HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

**Additional information may be obtained by contacting:**

**Ontario’s Environmental Registry**

The Environmental Registry found at <https://ero.ontario.ca/> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using key words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

## **The Ontario Land Registry Office**

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.

Court House  
161 Elgin Street 4th Floor  
Ottawa ON K2P 2K1  
Tel: (613) 239-1230  
Fax: (613) 239-1422

**Please note, as per the HLUI Disclaimer, that the information contained in the HLUI database has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that the records used as sources of information may be flawed. For instance, changes in municipal addresses over time may introduce error. Accordingly, all information from the HLUI database is provided on an “as is” basis with no representation or warranty by the City with respect to the information’s accuracy or exhaustiveness in responding to the request.**

**Furthermore, the HLUI database and the results of this search in no way confirm the presence or absence of contamination or pollution of any kind. This information is provided on the assumption that it will not be relied upon by any person for any purpose whatsoever. The City of Ottawa denies all liability to any persons attempting to rely on any information provided from the HLUI database.**

**Please note that in responding to your request, the City of Ottawa does not guarantee or comment on the environmental condition of the Subject Property. You may wish to contact the Ontario Ministry of Environment and Climate Change for additional information.**

If you have any further questions or comments, please contact [HLUI@ottawa.ca](mailto:HLUI@ottawa.ca).

Sincerely,

Amya Martinov

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

**Investigation 1:**  
**Investigation 2:**  
**Penalty Imposed:**  
**Description:** On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007

**Location:**  
**Region:**  
**Ministry District:**

revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine.

## Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

### **Abandoned Aggregate Inventory:**

Provincial

[AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\*

**Government Publication Date: Sept 2002\***

### **Aggregate Inventory:**

Provincial

[AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

**Government Publication Date: Up to Nov 2021**

### **Abandoned Mine Information System:**

Provincial

[AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

**Government Publication Date: 1800-Oct 2018**

### **Anderson's Waste Disposal Sites:**

Private

[ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1860s-Present**

### **Aboveground Storage Tanks:**

Provincial

[AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

**Government Publication Date: May 31, 2014**

### **Automobile Wrecking & Supplies:**

Private

[AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

**Government Publication Date: 1999-Sep 30, 2021**

### **Borehole:**

Provincial

[BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

**Government Publication Date: 1875-Jul 2018**

**Certificates of Approval:**

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

**Government Publication Date: 1985-Oct 30, 2011\***

**Dry Cleaning Facilities:**

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

**Government Publication Date: Jan 2004-Dec 2019**

**Commercial Fuel Oil Tanks:**

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Chemical Manufacturers and Distributors:**

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

**Government Publication Date: 1999-Jan 31, 2020**

**Chemical Register:**

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

**Government Publication Date: 1999-Sep 30, 2021**

**Compressed Natural Gas Stations:**

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

**Government Publication Date: Dec 2012 -Nov 2021**

**Inventory of Coal Gasification Plants and Coal Tar Sites:**

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.\*

**Government Publication Date: Apr 1987 and Nov 1988\***

**Compliance and Convictions:**

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

**Government Publication Date: 1989-Jul 2021**

**Certificates of Property Use:**

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

**Government Publication Date: 1994 - Jan 31, 2022**

**Drill Hole Database:**

Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

**Government Publication Date: 1886 - Sep 2020**

**Delisted Fuel Tanks:**

Provincial [DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

**Government Publication Date: May 31, 2021**

**Environmental Activity and Sector Registry:**

Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

**Government Publication Date: Oct 2011- Jan 31, 2021**

**Environmental Registry:**

Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

**Government Publication Date: 1994 - Jan 31, 2022**

**Environmental Compliance Approval:**

Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

**Government Publication Date: Oct 2011- Jan 31, 2021**

**Environmental Effects Monitoring:**

Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

**Government Publication Date: 1992-2007\***

**ERIS Historical Searches:**

Private [EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

**Government Publication Date: 1999-Nov 30, 2021**

**Environmental Issues Inventory System:**

Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

**Government Publication Date: 1992-2001\***

**Emergency Management Historical Event:**

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

**Government Publication Date: Dec 31, 2016**

**Environmental Penalty Annual Report:**

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land / water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

**Government Publication Date: Jan 1, 2011 - Dec 31, 2020**

**List of Expired Fuels Safety Facilities:**

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2020**

**Federal Convictions:**

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

**Government Publication Date: 1988-Jun 2007\***

**Contaminated Sites on Federal Land:**

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

**Government Publication Date: Jun 2000-Nov 2021**

**Fisheries & Oceans Fuel Tanks:**

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1964-Sep 2019**

**Federal Identification Registry for Storage Tank Systems (FIRSTS):**

Federal **FRST**

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

**Government Publication Date: May 31, 2018**

**Fuel Storage Tank:**

Provincial **FST**

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Fuel Storage Tank - Historic:**

Provincial

[FSTH](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

**Government Publication Date: Pre-Jan 2010\***

**Ontario Regulation 347 Waste Generators Summary:**

Provincial

[GEN](#)

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

**Government Publication Date: 1986-Nov 30, 2021**

**Greenhouse Gas Emissions from Large Facilities:**

Federal

[GHG](#)

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

**Government Publication Date: 2013-Dec 2019**

**TSSA Historic Incidents:**

Provincial

[HINC](#)

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

**Government Publication Date: 2006-June 2009\***

**Indian & Northern Affairs Fuel Tanks:**

Federal

[IAFT](#)

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

**Government Publication Date: 1950-Aug 2003\***

**Fuel Oil Spills and Leaks:**

Provincial

[INC](#)

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Landfill Inventory Management Ontario:**

Provincial

[LIMO](#)

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

**Government Publication Date: Feb 28, 2019**

**Canadian Mine Locations:**

Private

[MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

**Government Publication Date: 1998-2009\***

**Mineral Occurrences:**

Provincial

[MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

**Government Publication Date: 1846-Dec 2020**

**National Analysis of Trends in Emergencies System (NATES):**

Federal

[NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

**Government Publication Date: 1974-1994\***

**Non-Compliance Reports:**

Provincial

[NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

**Government Publication Date: Dec 31, 2020**

**National Defense & Canadian Forces Fuel Tanks:**

Federal

[NDFT](#)

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

**Government Publication Date: Up to May 2001\***

**National Defense & Canadian Forces Spills:**

Federal

[NDSP](#)

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

**Government Publication Date: Mar 1999-Apr 2018**

**National Defence & Canadian Forces Waste Disposal Sites:**

Federal

[NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

**Government Publication Date: 2001-Apr 2007\***

**National Energy Board Pipeline Incidents:**

Federal

[NEBI](#)

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

**Government Publication Date: 2008-Jun 30, 2021**

**National Energy Board Wells:**

Federal

[NEBP](#)

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

**Government Publication Date: 1920-Feb 2003\***

**National Environmental Emergencies System (NEES):**

Federal

**NEES**

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

**Government Publication Date: 1974-2003\***

**National PCB Inventory:**

Federal

**NPCB**

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

**Government Publication Date: 1988-2008\***

**National Pollutant Release Inventory:**

Federal

**NPRI**

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

**Government Publication Date: 1993-May 2017**

**Oil and Gas Wells:**

Private

**OGWE**

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at [www.nickles.com](http://www.nickles.com).

**Government Publication Date: 1988-Nov 30, 2021**

**Ontario Oil and Gas Wells:**

Provincial

**OOGW**

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

**Government Publication Date: 1800-Jan 2021**

**Inventory of PCB Storage Sites:**

Provincial

**OPCB**

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

**Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**

**Orders:**

Provincial

**ORD**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

**Government Publication Date: 1994 - Jan 31, 2022**

**Canadian Pulp and Paper:**

Private

**PAP**

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

**Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014**

**Parks Canada Fuel Storage Tanks:**

Federal

**PCFT**

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

**Government Publication Date: 1920-Jan 2005\***

**Pesticide Register:**

Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

**Government Publication Date: Oct 2011- Jan 31, 2021**

**Pipeline Incidents:**

Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Private and Retail Fuel Storage Tanks:**

Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

**Government Publication Date: 1989-1996\***

**Permit to Take Water:**

Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

**Government Publication Date: 1994 - Jan 31, 2022**

**Ontario Regulation 347 Waste Receivers Summary:**

Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

**Government Publication Date: 1986-1990, 1992-2019**

**Record of Site Condition:**

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

**Government Publication Date: 1997-Sept 2001, Oct 2004-Jan 2022**

**Retail Fuel Storage Tanks:**

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

**Government Publication Date: 1999-Sep 30, 2021**

**Scott's Manufacturing Directory:**

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

**Government Publication Date: 1992-Mar 2011\***

**Ontario Spills:**

Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests.

**Government Publication Date: 1988-Sep 2020; Feb 2021-Mar 2021**

**Wastewater Discharger Registration Database:**

Provincial [SRDS](#)

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

**Government Publication Date: 1990-Dec 31, 2019**

**Anderson's Storage Tanks:**

Private [TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

**Government Publication Date: 1915-1953\***

**Transport Canada Fuel Storage Tanks:**

Federal [TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

**Government Publication Date: 1970 - Dec 2020**

**Variations for Abandonment of Underground Storage Tanks:**

Provincial [VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

**Government Publication Date: May 31, 2021**

**Waste Disposal Sites - MOE CA Inventory:**

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

**Government Publication Date: Oct 2011- Jan 31, 2021**

**Waste Disposal Sites - MOE 1991 Historical Approval Inventory:**

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30th, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

**Government Publication Date: Up to Oct 1990\***

**Water Well Information System:**

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

**Government Publication Date: Sep 30, 2021**

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report:** This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

**Distance:** The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

**Direction:** The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

**Elevation:** The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

**Executive Summary:** This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

**Map Key:** The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

**Unplottables:** These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

**Master Well Owner's and Land Owner's Information**

Overburden and Bedrock Materials/Abandonment Sealing Record (see instructions on the back of this form). Table with columns: General Colour, Most Common Material, Other Materials, General Description, Depth (m/ft) From, To. Includes entries for Gravel, Sand, Fill, Clay, etc.

Annular Space. Table with columns: Depth Set at (m/ft) From, To, Type of Sealant Used (Material and Type), Volume Placed (m³/ft³). Includes entries for Concrete (Flushmount), Bentonite, Sand.

Method of Construction and Well Use. Includes checkboxes for Cable Tool, Rotary, Boring, Air percussion, Diamond, Jetting, Driving, Digging, Public, Commercial, Not used, Domestic, Municipal, Dewatering, Livestock, Test Hole, Monitoring, Irrigation, Cooling & Air Conditioning, Industrial, and Other.

Construction Record - Casing. Table with columns: Inside Diameter (cm/in), Open Hole OR Material, Wall Thickness (cm/in), Depth (m/ft) From, To, Status of Well. Includes entries for PVC, 368, 0, 457.

Construction Record - Screen. Table with columns: Outside Diameter (cm/in), Material, Slot No., Depth (m/ft) From, To, Status of Well. Includes entries for PVC, 10, 457, 762.

Water Details and Hole Diameter. Includes fields for Water found at Depth, Kind of Water, and Hole Diameter (Depth, Diameter).

Well Contractor and Well Technician Information. Includes Business Name of Well Contractor (Strata Drilling Group), Well Contractor's Licence No., Business Address (105 Shields Court), Municipality (Markham), Province (ON), Postal Code (L3R 9V2), Business E-mail Address (wrecords@strata-soil.com).

Well owner's information package delivered (Yes/No), Date Package Delivered, Date Work Completed, Well Technician's Licence No., Signature of Technician and/or Contractor, Date Submitted.

Results of Well Yield Testing. Table with columns: Draw Down (Time, Water Level), Recovery (Time, Water Level). Includes entries for Pump intake set at, Pumping rate, Duration of pumping, Final water level end of pumping, If flowing give rate, Recommended pump depth, Recommended pump rate, Well production, Disinfected?

Map of Well Location. Includes text: Please provide a map below following instructions on the back. See MAP. Ministry Use Only Audit No. 212304 FEB 13 2018 Received.

**From:** Public Information Services <publicinformationsservices@tssa.org>  
**Sent:** January 6, 2022 8:30 PM  
**To:** Jeremy Camposarcone  
**Subject:** RE: Records Search Request - PE5571

**Follow Up Flag:** Follow up  
**Flag Status:** Flagged

**Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.**

### NO RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at [https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?\\_mid\\_=392](https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392) and email the completed form to [publicinformationsservices@tssa.org](mailto:publicinformationsservices@tssa.org) along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Sherees

Good afternoon,

Could you please complete a search of your records for **underground/aboveground storage tanks, historical spills, or other incidents/infractions** for the following addresses in Ottawa, Ontario:

Gloucester Street: 84, 100, 112, 110, 70, 99;

O'Connor Street: 171;

Nepean Street: 91, 89;

Laurier Avenue West: 234.

Best regards,

Jeremy Camposarcone, B.Eng

## **QUALIFICATIONS OF ASSESSORS**

# PATERSON GROUP

solution oriented engineering

## **Jeremy Camposarcone, B.Eng. Junior Environmental Engineer**

Jeremy joined Paterson Group in 2020 as part of the Environmental Group. Jeremy received his Bachelor of Engineering in Environmental Engineering from Carleton University in 2019. Jeremy completed his studies while researching water treatment processes for the wastewater effluent of a hydrothermal carbonization reactor. His responsibilities as a field engineer have brought him to various projects throughout the Ottawa-Valley. In his time with Paterson, Jeremy has been involved with residential and commercial development within Ottawa and the surrounding area. His scope of work consists of environmental investigation and reporting, field inspection, field testing, quality control and quality assurance.

---

## **PROFESSIONAL EXPERIENCE**

2019 to present, **Junior Environmental Engineer, Paterson Group, Ottawa, Ontario**

- Conduct Phase I and Phase II - Environmental Site Assessments (ESAs), Soil and Groundwater Remediation Programs and the preparation of Records of Site Condition
- Manage excavation contractors to ensure soil quality control; daily reporting to project manager
- Present analytical test results, interpretations, assessments, recommendation and/or conclusion in a final technical report
- Oversee geotechnical investigations for test pitting on numerous proposed utility installations, residential and commercial developments.
- Conduct laboratory testing program of soils and water for detail recommendations
- Problem solving to complete analysis required
- Adapt to unforeseen on-site challenges and provide first-hand insights to help collaborate toward a solution
- Oversee large-scale remediation projects and monitor material being excavated
- Monitor and sample multiple groundwater wells with a high degree of precision regarding the quality and parameters of the sample
- On-site settlement plate surveying of future residential developments

# PATERSON GROUP

solution oriented engineering

## Karyn Munch, P.Eng., QP<sub>ESA</sub> Senior Environmental Engineer

Karyn received her Bachelor's of Applied Science from Carleton University in 2002 in Environmental Engineering. Upon graduation Karyn began working as a consultant for Dessau Soprin Inc. After one year of working for Dessau, Karyn joined the Paterson Group in the Environmental Division. Karyn has worked for Paterson for 19 years and has accrued extensive field and office experience. Karyn's experience working in the field ranges from Phase I site reviews, Phase II investigations, Remediation site inspections and designated substance surveys. Through her eight years of field experience, Karyn has obtained invaluable knowledge on contractor relationships, budgets, time management, consultant/owner relation, quality data and information, and working with a variety of different personnel and situations. Since 2012, Karyn has moved into a more senior role by becoming a qualified person for environmental assessments, overseeing small to large scale environmental projects, which include, Phase I and II reports, Record of Site Conditions and Brownfield Applications. Karyn has assisted with Mark D'Arcy in the development of young staff and continuous improvement of Paterson internal systems.

### EDUCATION

B.Eng. 2002, Environmental Engineering,  
Carleton University, Ottawa, ON

### LICENCE/PROSSFEIONAL AFFILIATIONS

Ontario Society of Professional Engineers

Ottawa Geotechnical Group

### YEARS OF EXPERIENCE

With Paterson: 19

With other firms: 2

### OFFICE LOCATION

9 Auriga Drive, Ottawa, Ontario, K2E 7T9

### SELECT LIST OF PROJECTS

- 1000 Wellington Street West, Ottawa ON, Phase I ESA, Phase II ESA, Phase III ESA, Environmental Soil Remediation and filing of a Record of Site Condition (RSC) in the MECP Environmental Site Registry (Project Manager)

## PROFESSIONAL EXPERIENCE

June 2011 to present, **Senior Environmental Engineer, Paterson Group, Ottawa, Ontario**

- Provide on-site environmental expertise for various soil and groundwater remediation projects including but not limited to the following: 222 Beechwood Remediation, 1000 Wellington Street West Remediation, 409 MacKay Street and Rideau Centre Expansion.
- Oversee Phase I and Phase II Investigations in accordance with CSA standards and O.Reg 153/04 on a variety of residential and commercial developments.
- Responsible for filing Records of Site Condition with the MOECC Environmental Site Registry.
- Preparation of submissions to the City of Ottawa's Brownfields Redevelopment Program.
- Problem solving to help advance or maintain project schedules.
- Complete environmental reports with recommendations for environmental concerns.
- Liaising with contractors, consultants and government officials.
- Provide cost estimates for environment field programs and construction costs.
- Review RFI's, submittals, monthly progress reports and other various construction related work.

June 2009 to June 2010, **Environmental Officer, Department of Indian and Northern Affairs (INAC), Ottawa, Ontario**

- Provided guidance and support regarding various aspects of the Contaminated Sites Management Plan (CSMP) and the Canadian Accelerated Action Plan (CEAP), to regional INAC offices.
- Reported to Federal Contaminated Sites Action Plan (FCSAP) Secretariat on monthly and quarterly CSMP progress.
- Completion of various reporting requirements including Privy Council Office (PCO) requests regarding accelerated remediation projects, Annual Reference Level Updating, Internal Quarterly Reports and First Nation Land Management (FNLM) Class 3 Remediation Projects
- Composition and revision of Three-Year CSMP and the Contaminated Sites Program Renewal.
- Management of various databases including ESSIMS (internal to INAC), IDEA (Environment Canada) and CIDM (electronic filing system) and Federal Contaminated Sites Inventory (FCSI).
- Interacted on a regular basis with other federal departments, other INAC sectors, regional INAC offices and senior management.
- Participated in Aquatic Sites Working Group (ASWG), Contaminated Sites Management Working Group (CSMWG) and Environmental Learning Regime workshops/workgroups.

January 2003 to June 2009, **Environmental Engineer, Paterson Group, Ottawa, Ontario**

- Experience in coordination and management of a variety of environmental projects. Typical projects include Phase I-Environmental Site Assessments (ESAs), Phase II and III-Environmental Site Characterizations, Soil and Groundwater Remediation Programs, Designated Substance Surveys and the preparation of Records of Site Condition.
- Coordination of contractors and field staff while directly reporting to senior management and client throughout the project to ensure completion on schedule and within budget.
- Experience in collaborating with provincial and municipal bodies as well as sub-consultants, contractors and clients.
- Extensive field experience including the management of drilling and excavation contractors, inspection of aboveground and underground fuel storage tanks, soil classification, soil and groundwater sampling, collection of hazardous building materials and designated substances.
- Responsible for the application of environmental, hydrogeological and geotechnical principles and practices in the identification and delineation of soil and groundwater contamination plumes and ensuring compliance with federal, provincial and/or municipal legal and regulatory requirements.
- Present analytical test results, interpretations, assessments, recommendations and/or conclusions in a final technical report.

August 2002 to December 2002, **Junior Engineer, Dessau Soprin Inc., Ottawa, Ontario**

- Responsible for supervision of weight-scale and record keeping for soil management practices.
- Managed excavation contractors to ensure soil quality control; daily reporting to project manager.
