Attention: Mr. Kyle Kazda

Subject: Phase I - Environmental Site Assessment Update 267 O'Connor Street Ottawa, Ontario Geotechnical Engineering Environmental Engineering Hydrogeology Materials Testing Building Science Rural Development Design Retaining Wall Design Noise and Vibration Studies

Dear Sir,

Further to your request, Paterson Group (Paterson) conducted a Phase I - Environmental Site Assessment (ESA) Update for the aforementioned property. This report updates a Phase I ESA entitled "Phase I-Environmental Site Assessment Update, 267 O'Connor Street, Ottawa, Ontario," prepared by Paterson Group, dated August 17, 2020.

This update report is intended to meet the requirements for an updated Phase I ESA, as per the MECP O.Reg 153/04, as amended. This report is to be read in conjunction with the 2020 update and original 2014 reports.

### **Site Information**

The Phase I ESA Property is located on the southeast corner of the O'Connor Street and MacLaren Street intersection, in the City of Ottawa, Ontario, and is situated in a municipal urban setting of mixed commercial, residential, and institutional land uses. The site is currently used as a medical professional building and associated parking areas.

The Phase I ESA Property is shown on Drawing PE4914-1R – Site Plan.

### **Records Review**

### Phase I ESA Study Area Determination

A radius of approximately 250 m was determined to be appropriate as a Phase I Study Area for this assessment. Properties outside the 250 m radius are not considered to have the potential to impact the Phase I Property, based on their separation distance.

### **First Developed Use Determination**

Based on aerial photographs and the documentation reviewed, the subject property (or a portion of it) was developed for residential purposes as early as 1890. For the purposes of this report, the first developed use of the subject site is considered to be residential, in 1890.

### Environment Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically. The Phase I Property was not listed in the NPRI database. No records of pollutant release were listed in the database for properties located within the Phase I Study Area.

### **Areas of Natural Significance**

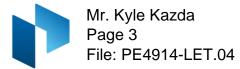

A search of natural significance and features within the Phase I Study Area was conducted on the website of the Ontario Ministry of Natural Resources (MNR). The search did not reveal any areas of natural significance within the Phase I Study Area.

### **PCB** Inventory

A search of the provincial PCB waste storage sites was conducted. The properties addressed 225 Metcalfe Street (248m N) and 255 Metcalfe Street (157m E) were listed as PCB waste storage sites. Based on their separation distance and inferred down gradient orientation with respect to the Phase I Property, the PCB storage sites are considered to represent potentially contaminating activities that do not result in areas of potential environmental concern (APECs) on the Phase I Property.

### Ministry of the Environment, Conservation and Parks (MECP) Instruments

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the Phase I Property. A response from the MECP indicated that no records were found within the study area.

### **MECP Submissions**

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the Phase I Property. A response from the MECP indicated that no records were found within the study area.

### **MECP Incident Reports**

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the site or adjacent properties. One (1) incident report was identified for the Phase I Property and it pertains to a waste generator exemption. Due to the nature of this record, it is not considered to pose a potential environmental concern to the Phase I Property.

### **MECP Waste Management Records**

A request was submitted to the MECP FOI office for information with respect to waste management records. Five (5) records relating to five (5) different tenants of the building indicated the creation of pathological wastes (one tenant was also recorded to produce miscellaneous inorganic chemical waste). All wastes are reported to be disposed of off-site. These waste generators are not considered to pose a concern to the subject site

### **MECP Coal Gasification Plant Inventory**

The Ontario Ministry of Environment document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I Study Area.

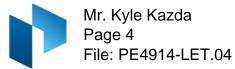

### **MECP Brownfields Environmental Site Registry**

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment for the site, neighbouring properties, and the general area of the site. One RSC was identified on the adjacent property to the south addressed 330 Gilmour Street. Based on the information contained in the RSC filing, no new environmental concerns were identified.

### **MECP Waste Disposal Site Inventory**

The Ontario Ministry of Environment document titled "Waste Disposal Site Inventory in Ontario, 1991" was reviewed as part of the historical research.

This document includes all recorded active and closed waste disposal sites, industrial manufactured gas plants and coal tar distillation plants in the Province of Ontario. There are no former waste disposal sites located within 250 m of the Phase I Study Area.

### **Technical Standards and Safety Authority (TSSA)**

The TSSA, Fuels Safety Branch in Toronto, was contacted electronically to inquire about current and former underground storage tanks, spills and incidents for the site and neighbouring properties. A response from the TSSA indicated that no records were listed in the TSSA registry for the selected properties. A copy of the TSSA response has been appended to this report.

### City of Ottawa Landfill Document

The document entitled "Old Landfill Management Strategy, Phase I – Identification of Sites, City of Ottawa", was reviewed. There are no closed landfill sites within the vicinity of the Phase I study area.

### City of Ottawa Historical Land Use Inventory (HLUI)

A requisition form was sent to the City of Ottawa to request information from the City's Historical Land Use Inventory database for the Phase I Property. A response from the City was received and reviewed as part of the Phase I ESA Update.

The response indicated that the Phase I Property was occupied by various medical offices and laboratories between 1960 and 2016. The response also indicated that a printing facility occupied the Phase I Property in 2005. The former presence of a printing facility is considered to pose a potential environmental concern to the Phase I Property.

Other potentially contaminating activities were identified within the Phase I Study Area, however, they were deemed not to pose a potential environmental concern on the Phase I Property due to their distance away or their cross or down-gradient orientation to the Phase I Property.

A copy of the HLUI response has been appended to this report.

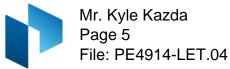

### **Previous Engineering Reports**

The following reports were reviewed prior to conducting this assessment:

□ 'Asbestos Survey, Commercial Building, 267 O'Connor Street, Ottawa, Ontario", prepared by Paterson Group. Dated July 13, 2009.

Paterson completed an asbestos survey on the subject building in July of 2009. Based on the analytical testing, the ceiling stipple observed in the hallways, and the pipe elbow insulation observed in the rooftop mechanical room were identified as asbestos containing materials (ACMs).

It was recommended that any removal, disturbance, or encapsulation of the ACMs be done in accordance with the procedures that are outlined in Ontario Regulation 278/05. It was also recommended that any significant work pertaining to the removal, disturbance or encapsulation of asbestos containing material be conducted by a contractor

specialized in the handling of ACMs and that the ACMs are inspected on an annual basis to confirm their condition.

 'Phase I Environmental Site Assessment, Commercial Property, 267 O'Connor Street, Ottawa, Ontario", prepared by Paterson Group; dated March 19, 2014.

Based on the previously completed assessment, several potentially contaminating activities (PCAs) were considered to result in Areas of Potential Environmental Concern (APEC) on the Phase I Property. The following APECs were considered to exist on the Phase I Property:

- Existing Above Ground Storage Tank An above ground storage tank was identified in the basement mechanical room of the office building.
- □ Fill Material of Unknown Quality Fill Material of Unknown Quality was identified during previous subsurface investigations on the Phase I Property.
- Former Portrait Studio A former portrait studio was present in the northeast corner of the Phase I Property.

No other PCAs considered to represent APECs on the Phase I ESA property were identified during the Phase I ESA.

"Phase II Environmental Site Assessment, Commercial Property, 267 O'Connor Street, Ottawa, Ontario", prepared by Paterson Group; dated April 8, 2014.

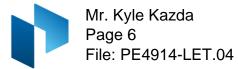

Paterson drilled three boreholes, two of which were instrumented with groundwater monitoring wells. Clay fill material containing barium and vanadium exceedances was identified in the northeastern portion of the Phase I Property. All of the analyzed groundwater parameters were in compliance with the selected site standard.

It was recommended that the identified contaminated fill be remediated in conjunction with the redevelopment of the property.

□ 'Phase I Environmental Site Assessment Update, 267 O'Connor Street, Ottawa, Ontario", prepared by Paterson Group. Dated August 17, 2020.

Paterson completed a Phase I ESA Update in August 2020. Several PCAs were identified within the Phase I Study Area. Four on-site PCAs were considered to result in APECs on the Phase I Property.

- □ APEC1 Existing AST
- □ APEC2 Former Portrait Studio
- APEC3 Fill Material of Unknown Quality
- □ APEC4 Existing Transformer.

A Phase II ESA was recommended at the time of the 2020 update to further assess the identified APECs on the Phase I Property.

Phase II Environmental Site Assessment Update, 267 O'Connor Street, Ottawa, Ontario", prepared by Paterson Group. Dated August 19, 2020.

Paterson completed a Phase II ESA Update in August of 2020, following the recommendation of further assessing APECs in the 2020 Phase I Update.

The assessment involved the completion of a monitoring well within the basement of the subject building to assess the potential for impacts resulting from an existing above ground storage tank and transformer.

All of the analysed soil and groundwater parameters were non-detect and therefore in compliance with the selected MECP Table 3 standards.

It was recommended that a confirmation sampling program be completed to further delineate the extent of the vanadium and barium impacted fill material. It was also recommended that a remediation program be completed.

Following the completion of the remediation, an RSC was also deemed necessary for the Phase I Property in support of residential re-development.

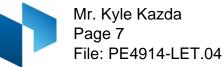

### Environmental Risk Information Service (ERIS) Report

Paterson acquired/reviewed an ERIS database report as part of the assessment.

66 records were documented for the Phase I Property and pertain to Scott's Manufacturing, Ontario Waste Generator (O.Reg 347 Waste Generator) records, and ERIS Historical Search records.

The Scott's Manufacturing records are associated with the former use of the Phase I Property as a former portrait studio and medical equipment and supplies manufacturing as part of a clinical laboratory. As mentioned in the previously completed Phase I ESA, the presence of the former portrait studio on the Phase I Property is considered to represent a PCA that results in an APEC on the Phase I Property.

The O.Reg 347 Waste Generator records are associated with the various medical practices that have operated out of the subject building since it was constructed. The waste classes primarily pertained to pathological wastes. Based on the nature of the operations as well as the associated waste classes, the identified wastes generated on the Phase I Property are not considered to represent an environmental concern.

320 records were documented for properties situated in the Phase I Study Area and pertain to borehole, Certificates of Approval, Environmental Compliance Approvals, ERIS historical searches, O.Reg 347 Waste Generator records, TSSA Historical Incidents, Fuel Oil Spills and Leaks, National PCB Inventory, Pesticide Register Scott's Manufacturing Directory, Ontario Spills, Variances for Abandonment of Underground Storage Tanks and Water Well Information System records.

Paterson identified the following PCAs within the Phase I Study Area following a review of the ERIS report.

The property addressed 270 McLaren Street (42 m E) had previously been listed as a paper bag and coated and treated paper, station product and plastic bag manufacturer.

One hydraulic oil spill of unknown quantity was documented for the property addressed 283 McLaren Street (71 m E). A spill record was also documented for the property addressed 300 Gilmour Street (130m E) and pertained to an unknown volume of furnace oil having leaked from an underground storage tank.

The property addressed 236 Metcalfe Street (153m N) had previously been occupied by a printer/publisher.

The properties addressed 225 Metcalfe Street (248m E) and 255 Metcalfe Street (157m E) were listed in the national/provincial PCB registry. As previously discussed, these properties are not considered to result in APECs on the Phase I Property.

The properties addressed 300 Cooper Street (206m N), 309 Cooper Street (238 NW) and 396 Cooper Street (248m W) were previously occupied by printers/publishers.

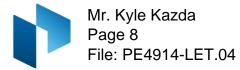

One furnace oil spill of 180L was documented for the property 366 Waverley Street (224m S).

The property addressed 273 Bank Street (237m W) had previously been occupied by a digital printer.

One 15L transformer oil spill record was documented for the property addressed 375 Cooper Street (249m NW).

Based on their separation distances and/or their cross/down gradient orientation with respect to the Phase I Property, the above mentioned PCAs are not considered to result in APECs on the Phase I Property.

A copy of the ERIS database report has been appended to this report.

### **Aerial Photographs**

The latest aerial photograph reviewed for the 2020 Phase I ESA Update was from 2017. A review of the 2022 aerial photograph was completed as part of this assessment.

### <u>2022</u>

No significant changes are apparent with respect to the Phase I Property or neighbouring properties since the 2017 aerial photograph.

No PCAs were identified through a review of the 2022 aerial photograph. A copy of the 2022 aerial photograph has been appended to this report.

### **Topographic Maps**

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. Regionally, the topographic maps indicate the Phase I Property is approximately 70 m above sea level and regional topography in the general area of the Phase I Property slopes downward to the north/northeast in the general direction of the Rideau Canal.

An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

### **Physiographic Maps**

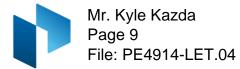

A Physiographic Map was reviewed from the Natural Resources Canada – The Atlas of Canada website. According to this physiographic map, the site is located in the St. Lawrence Lowlands. According to the mapping description provided: "The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets." Mapping shows the Phase I Property as situated in an area of limestone plains.

### **Geological Maps**

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock in the area of the site is reported to consist of interbedded shale, limestone and dolostone of the Georgian Bay Formation. Overburden soils consist of clay and offshore marine sediment with a drift thickness of greater than 20m.

Based on a review of the previously completed subsurface investigations on the Phase I Property, the site stratigraphy generally consists of sand fill material overlying silty clay.

The groundwater table was intercepted at depths ranging from 3.66 to 5.46 m below the ground surface and bedrock was not encountered during the subsurface investigations.

### Water Well Records

A search of the MECP's web site for all drilled well records within 250 m of the Phase I Property was conducted. No well records were documented for the Phase I Property or properties within the Phase I Study Area.

### Interviews

Mr. Kyle Kazda, a representative of the current property owner, was interviewed as part of this Phase I ESA Update. Mr. Kazda informed Paterson that the subject building is currently occupied by several commercial tenants consisting primarily of private clinics, medical offices, and counselling services.

Mr. Kazda was unaware of any environmental concerns on the Phase I Property or in the immediate vicinity.

### Site Reconnaissance

A site reconnaissance visit was conducted by a representative of the environmental division at Paterson Group Inc. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site visit.

### **Buildings and Structures**

The Phase I Property is currently occupied by a six-storey commercial building situated in the northwestern portion of the property, that is heated via a natural gas fired boiler located in the basement of the subject building.

### **Site Features**

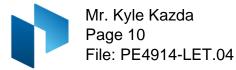

The areas immediately east and south of the subject building consist of an asphaltic concrete parking lot.

Site and roof drainage occurs primarily through sheet flow to catch basins located along O'Connor Street, as well as catch basins located within the paved portions of the Phase I Property.

The Phase I Property is relatively flat and at grade with O'Connor Street and the regional topography slopes gently downward to the north/northeast, in the general direction of the Rideau Canal. Groundwater within the Phase I Study Area is expected to flow towards the north/northeast.

As previously discussed, no new well records were identified on the Phase I Property or within the Phase I Study Area.

The Phase I Property is shown on Drawing PE4914-1R - Site Plan.

### **Other Potential Environmental Concerns**

No signs of stressed vegetation or unidentified substances were observed on the Phase I Property at the time of this assessment.

### Interior Assessment

A general description of the interior of the subject building is as follows:

- The floors consist of carpet, vinyl floor tiles and concrete (basement);
- The walls consist of drywall and plaster and parging;
- The ceilings consist of suspended ceiling tiles and exposed steel and concrete decking ;
- Lighting throughout the building is provided by fluorescent and/or incandescent light fixtures.

### Potentially Hazardous Building Products

### □ Asbestos-Containing Materials (ACMs)

ACMs were identified in the previously completed asbestos survey by Paterson in 2009. The asbestos survey should be read in conjunction with the current assessment.

### Lead-Based Paints

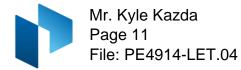

Based on the age of the subject building (circa 1955), lead-based paints are potentially present on any of the original painted surfaces.

### **D** Polychlorinated Biphenyls (PCBs) and Transformer Oil

One transformer was identified in the basement of the subject building at the time of the site visit. As highlighted in the previously completed Phase I ESAs, the transformer is considered to result in an APEC on the Phase I Property.

### Urea Formaldehyde Foam Insulation (UFFI)

At the time of the site inspection, UFFI was not observed inside the subject building, however, wall cavities were not exposed to allow for the inspection of insulation type.

### **Other Potential Environmental Concerns**

### □ Interior Fuel and Chemical Storage

At the time of the site inspection, an existing AST and associated vent and fill pipes were identified in the basement. Due to the tank location (in a concrete bunker), no observations were able to be made regarding the tank size, age, and condition. The presence of the AST in the subject building is considered to result in an APEC on the Phase I Property.

Chemicals observed in the building were limited to paints and household-type chemicals and are not considered to pose a concern to the subject property.

### Ozone Depleting Substances (ODSs)

Potential sources of ODSs observed on-site include fire extinguishers and refrigerators and commercial grade freezers. These appliances appeared to be in good condition at the time of the site inspection and should be regularly serviced by a licensed contractor.

### □ Wastewater Discharges

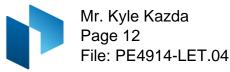

Wastewater from the subject building (wash water and sewage) is discharged into the City of Ottawa sanitary sewer system, whereas roof drainage is discharged via surface run-off towards catch basins located along adjacent streets, as well as within the paved portion of the property, which drain into the City of Ottawa storm water sewer system.

### **Neighbouring Properties**

An inspection of the neighbouring properties was conducted from publicly accessible roadways at the time of the site inspection. Land use adjacent to the subject site was as follows:

- □ North MacLaren Street followed by residential dwellings and a restaurant;
- South Gilmour Street followed by a vacant institutional building;
- East Commercial office space followed by an apartment building;
- □ West O'Connor Street followed by an apartment building.

Land use within the Phase I Study Area primarily consists of residential dwellings and commercial office space.

Multiple PCAs were identified with respect to the current use of the surrounding lands. Due to their distance away or their cross or down-gradient orientations, these properties are not considered to pose a potential environmental concern on the Phase I Property. The surrounding land use within the Phase I Study Area is presented on Drawing PE4914-2R – Surrounding Land Use Plan, appended to this report.

### **Review and Evaluation of Information**

### Potentially Contaminating Activities and Areas of Potential Environmental Concern

Four PCAs that are considered to result in APECs were identified on the Phase I Property. The locations of the APECs are shown on Drawing PE4914-1R-Site Plan.

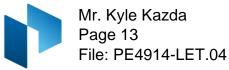

Table 1 - Area	as of Potentia	I Environmental Co	oncern		
Area of Potential Environmental Concern	Location of Area of Potential Environmental Concern with respect to Phase I Property	Potentially Contaminating Activity	Location of PCA (on-site or off-site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, Soil, and/or Sediment)
Existing AST	Within basement of the existing building	Item 28: Gasoline and Associated Products Storage in Fixed Tanks	On-site	BTEX, PHCs	Soil, Groundwater
Former Portrait Studio	Northwest corner of Phase I ESA property	Not Applicable	On-site	Metals	Soil, Groundwater
Fill Material of Unknown Quality	Throughout Phase I ESA property	Item 30: Importation of fill material of unknown quality	On-site	Metals	Soil, Groundwater
Transformer	Within basement of the existing building	Item 55: Transformer manufacturing, processing, and use	On-site	BTEX, PHCs, PCBs	Soil, Groundwater

The application of any de-icing substance to the parking area for the purpose of the safety of vehicular or pedestrian traffic would result in conditions that the applicable standard to be deemed not exceeded, therefore The application of any de-icing substance is not considered to result in a PCA or an APEC and no investigation is necessary.

### **Conceptual Site Model**

### Geological and Hydrogeological Setting

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock in the area of the site is reported to consist of interbedded shale, limestone and dolostone of the Georgian Bay Formation. Overburden soils consist of clay and offshore marine sediment with a drift thickness of greater than 20m.

Based on a review of the previously completed subsurface investigations on the Phase I Property, the site stratigraphy generally consists of sand fill material overlying silty clay.

The groundwater table was intercepted at depths ranging from 3.66 to 5.46 m below the ground surface and bedrock was not encountered during the subsurface investigations.

### **Existing Buildings and Structures**

The Phase I Property is currently occupied by a six-storey commercial building situated in the northwestern portion of the property, that is heated via a natural gas fired boiler located in the basement of the subject building.

### Water Bodies and Areas of Natural Significance

No water bodies or areas of natural significance were identified on the Phase I Property or within the Phase I Study Area.

### Water Well Records

A search of the MECP's web site for all drilled well records within 250 m of the Phase I Property was conducted on January 30, 2025. No well records were documented for the Phase I Property or properties within the Phase I Study Area.

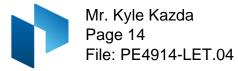

### Neighbouring Land Use

Neighbouring land use in the Phase I Study Area primarily consists of residential dwellings and commercial office space.

### Potentially Contaminating Activities and Areas of Potential Environmental Concerns

Four on-site PCAs were considered to result in APECs on the Phase I Property. No new APECs were identified during the current assessment.

Several off-site PCAs pertaining to historical manufacturers, dry cleaners, PCB storage sites, spills and printers/publishers were identified within the Phase I Study Area. Based on their separation distances and/or their inferred cross/down gradient orientation with respect to the Phase I Property, none of the identified off-site PCAs are considered to result in APECs on the Phase I Property.

### Assessment of Uncertainty and/or Absence of Information

The information available for review as part of the preparation of this Phase I- ESA is considered to be sufficient to conclude that there are four APECs on the Phase I Property. A variety of independent sources were consulted as part of this assessment, and as such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

### Conclusions

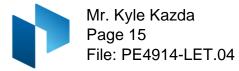

The results of the records review, research, and site inspection indicated that there are no potential environmental concerns regarding the Phase I Property, however, two of the APECs (AST and transformer) remain existing APECs. As a result, it is recommended that the 2020 Phase II ESA be updated with current groundwater data for the location of this APEC.

### **Statement of Limitations**

This Phase I - Environmental Site Assessment Update report has been prepared in general accordance with O.Reg. 153/04, as amended. The conclusions presented herein are based on information gathered from a historical review and field inspection program. The findings of the Phase I ESA Update are based on a review of readily available geological, historical, and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the Phase I Property and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Taggart Realty Management. Permission and notification from Taggart Realty Management, and this firm will be required to release this report to any other party.

We trust that this submission satisfies your current requirements. Should you have any questions, please contact the undersigned.

Dear Adrian Menyhart:

### RE: Freedom of Information and Protection of Privacy Act Request Our File #: A-2014-01263, Your Reference #: PE3223

This letter is in response to your request made pursuant to the *Freedom of Information and Protection of Privacy Act* relating to 267 O'Connor Street, Ottawa.

After a thorough search of the Ministry's Ottawa District Office, Investigations and Enforcement Branch, Environmental Approvals Branch, Environmental Monitoring and Reporting Branch, Sector Compliance Branch and Safe Drinking Water Branch, records were located in response to your request. It is my decision to provide full access to the attached information.

In accordance with Section 57 of the *Freedom of Information and Protection of Privacy Act*, detailed below are our charges:

\$30.00
\$3.00
\$3.00
\$36.00
- \$30.00
\$6.00

You may request a review of my decision by contacting the Information and Privacy Commissioner/Ontario, 2 Bloor Street East, Suite 1400, Toronto, ON M4W 1A8 (800-387-0073 or 416-326-3333). Please note that there is a \$25.00 fee and you only have 30 days from receipt of this letter to request a review.

If you have any questions regarding this matter, please contact Liz Mico at (416) 212-0559 or liz.mico@ontario.ca.

Yours truly, leidi Ritscher OI Manager

October 29, 1986

Kopp Laboratories Limited 1095 Carling Ave./Suite 500 Ottawa, Ont. K1Y 4P6

Attn: Dr. J. Sosa Pres/Dir.

Dear Dr. Sosa:

RE: Acknowledgement of Subject Waste Registration

As prescribed by Section 15(3) of Ontario Regulation 309, this letter acknowledges receipt of your Generator Regis-tration Report(s) dated July 28, 1986 and telephone conversation of October 27/86 with Dr. A. Gawad for the following site:

> 267 O'Connor St./Suite 104 Ottawa, Ont.

The Generator Registration Number assigned to your company at this site is:

### ON0390100

Please note that this Generator Registration Number must be used only in conjunction with the site for which it was issued.

Please ensure that the company name shown on this letter is complete and accurate. This would be the corporate name or, if a partnership or proprietorship, the name of the principal(s). If you intend to carry on business under a separate name or style, this should also be entered. If there is a discrepancy, it is your responsibility to re-register providing us with your complete and accurate company name.

A list of the waste stream(s) covered by this acknowledgement is attached to this letter as Schedule "A".

For off-site disposal of subject wastes, the waste number(s) describing the waste stream(s) in Schedule "A"

.../2

and the Generator Registration Number must be entered on manifest forms for each waste transaction after you have received this generator registration document. A copy of an example manifest form is attached for your information.

For on-site disposal of subject wastes covered by this acknowledgement, including on-site incineration, landfilling and discharges to sanitary sewers, every generator shall retain records for a period of at least two years. These records shall include the generator registration number, waste name(s), waste number(s), quantity and disposition of the waste(s).

For off-site disposal of any registerable solid wastes shown in Schedule "A" (waste classes ending in the letter "N"), manifesting is not required at this time. These wastes can be disposed of at most approved municipal landfilling sites.

The selection of accurate waste classes is the responsibility of each waste generator. This acknowledgement must not be considered as a confirmation of the accuracy of information submitted by you. Based on the information you have provided, the waste class(es) that has (have) been selected appear(s) to be correct. If, due to new information or re-assessment of information submitted, you feel your waste is inappropriately classified, you should apply for a revision to your registration using the Generator Registration Report, Form 2. Should the waste class(es) that you have selected be deemed incorrect by the Ministry, or improper waste disposal occurs at any time, you may be subject to legal action as provided by the Environmental Protection Act and Regulation 309.

Your Generator Registration Report has now been forwarded to the District Office of this Ministry that is closest to your generating site. The District Office will be conducting a post-registration audit and may be contacting you for additional information or may be conducting site visits.

It is important to note that under Section 15(4) of Ontario Regulation 309, a new Generator Registration Report must be submitted to the Ministry within fifteen (15) days for any of the following reasons:

- 1. If the name, address or telephone number of your company or waste generating site changes.
- 2. If the description, the waste class or physical or chemical characteristics of your registered wastes change(s).
- 3. If you generate a hazardous or liquid industrial waste that has not been registered with the Ministry.

.../3

If the quantity of registered wastes or your carrier or receiver changes, automatic re-registration is not required. However, in order to update our file, we may periodically request additional information when we observe or suspect a significant change as compared to the most recent information submitted by you for registration purposes.

Should you have any questions concerning generator registration or manifesting requirements, please contact the Waste Management Branch Reviewer identified below at 965-9668.

Yours truly,

R.A./Breeze

Director Regulation 309, R.R.O., 1980 Environmental Protection Act

### **Samuel Berube**

From:Public Information Services <publicinformationservices@tssa.org>Sent:September 8, 2023 10:51 AMTo:Samuel BerubeSubject:RE: PE4914 - TSSA Request

#### **NO RECORD FOUND IN CURRENT DATABASE**

Hello,

Thank you for your request for confirmation of public information. TSSA has performed a preliminary search of TSSA's current database.

• We confirm that there are no records in our current database of any fuel storage tanks at the subject address(es).

#### Accessing the applications

- 1. Click <u>Release of Public Information</u> TSSA and click "need a copy of a document"
- 2. Select the appropriate application, download it, complete it in full and save it (Note: you will have to upload the application)
- 3. Proceed to page 3 of the application and click the "TSSA Service Prepayment Portal" link under payment options (the link will take you the secure site where you can pay for the request via credit card)

#### Accessing the Service Prepayment Portal

- 1. Select new or existing customer (\*if you are an existing customer, you will need your account number & postal code to access your account)
- 2. Under "Program Area" select **Public Information** and click continue
- 3. Enter application form number (found on the bottom left corner of the application form) and click continue
- 4. Complete the primary contact information section
- 5. Complete the fee section
- 6. Upload your completed application
- 7. Upload supporting documents (if required) and click continue

Once all steps have been successfully completed you will receive your payment receipt via email.

TSSA does not make any representations or warranties with respect to the accuracy or completeness of any records released. The requestor assumes all risk in using or relying on the information provided.

If you have any questions or concerns, please do not hesitate to contact our Public Information Release team at publicinformationservices@tssa.org.

#### Warm regards,

## Kimberly Gage | Public Information Agent

345 Carlingview Drive Toronto, Ontario M9W 6N9 Tel: +1 416-734-3348 | Fax: +1 416-734-3568 | E-Mail: kgage@tssa.org www.tssa.org

<u>Site:</u> Taggart Construction Limited Ottawa ON

File No: Crown Brief No: Court Location: Publication City: Publication Title: Act: Act(s): First Matter: Second Matter: Investigation 1: Investigation 2: Penalty Imposed: Description: Background: URL:	012802	Location: Region: Ministry District: Taggart Construction Limited, Paterson Group Inc. and Robert Passmore have been fined \$5,000 each, totalling \$15,000 plus a victim fine surcharge, after pleading guilty on January 15, 2009 to violations under the Ontario Water Resources Act. Taggart Construction Limited and Paterson Group Inc. were convicted of failing to comply with a Provincial Officer Order by taking more than 50,000 litres of water per day, and Mr. Passmore was convicted of giving false or misleading information to the ministry. The parties were given six months to pay the fine. The Court heard that Taggart Construction Limited was contracted by a developer to install municipal services at a subdivision in Ottawa which required dewatering activities. After being issued a Provincial Officer Order to restrict water taking activities to below 50,000 litres per day until a permit had been obtained, Taggart hired Paterson Group Inc. to submit an application for the permit. Taggart then pumped over 50,000 litres of water based on information provided by Paterson Group employee, Mr. Passmore, that the go ahead to pump had been given when a permit had yet to be issued. In an interview with ministry investigators, Mr. Passmore denied giving Taggart verbal approval to pump in excess of 50,000 litres per day. Taggart Construction Limited, Paterson Group Inc. and Mr. Passmore were charged following an investigation by the Ministry of the Environment's Investigations and Enforcement Branch.

#### Site: **Taggart Construction Limited** Database: Bank Street South Ottawa ON CONV File No: 010503 Location: Region: Crown Brief No: Court Location: Ministry District: **Publication City: Publication Title:** Act: Act(s): First Matter: Second Matter: Investigation 1: Investigation 2: Penalty Imposed: Description: On December 3, 2009, Taggart Construction Limited pleaded guilty to one violation under the Ontario Water Resources Act for failing to comply with a Provincial Officer Order to submit weekly water taking records showing daily water taking volumes. The company was contracted to install municipal services for the Findlay Creek Subdivision located on Bank Street in South Ottawa. A ministry inspection of the construction site in the fall of 2007 revealed concerns with water taking activities and a Provincial Officer Order was issued. One of the requirements of the Order, related to keeping accurate water taking records and submitting them to the ministry, was not complied with. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch and was fined \$5,000 plus victim fine surcharge. The company was given 30 days to pay the fine. Background: URL: Additional Details **Publication Date:** Count: Act: Provincial Officer Order Regulation: Section: Act/Regulation/Section: Provincial Officer Order Date of Offence: Date of Conviction: Date Charged: December 3, 2009 Charge Disposition: fine, victim fine surcharge \$5,000 Fine: Synopsis: Loblaw Companies Limited Site: Database: CONV Ottawa ON File No: 097267 Location: Crown Brief No: Region: Ministry District: Court Location: **Publication Citv: Publication Title:** Act: Act(s): First Matter: Second Matter: Investigation 1: Investigation 2: Penalty Imposed:

On April 19, 2011, Loblaw Companies Limited/Les Compagnies Loblaw Limitee pleaded guilty to one violation under the Environmental Protection Act for causing the discharge of a refrigerant into the air within a building or into the natural environment. The Court heard that the company owns and operates a property in Ottawa. The company uses a refrigeration contractor to install, maintain and service the equipment at this location. During such

279

Description:

work, a release of refrigerant was reported to the ministry. The release was inside a building that was vented via exhaust fans to the natural environment. The refrigerant contains hydrochlorofluorocarbon and is considered an ozone depleting substance. The company was charged following an investigation by the ministry's Investigations and Enforcement Branch. The company was fined \$30,000 plus a victim fine surcharge and was given 30 days to pay the fine.

Database: WDS Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. Note: Databases denoted with " \* " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory: AAGR The MAAP Program maintains a database of abandoned pits and guarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.\* Government Publication Date: Sept 2002\*

Provincial Aggregate Inventory: AGR The Ontario Ministry of Northern Development, Mines, Natural Resources and Forestry (ONDMNRF) maintains this database of pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage. Government Publication Date: Up to Oct 2022

Provincial Abandoned Mine Information System: AMIS The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation. Government Publication Date: 1800-Mar 2022

ANDR The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Anderson's Waste Disposal Sites:

Aboveground Storage Tanks:

Government Publication Date: 1999-Feb 28, 2022

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated. Government Publication Date: May 31, 2014

Borehole: Provincial BORE A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel

Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW. Government Publication Date: 1875-Jul 2018

distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.). Government Publication Date: 1999-Jan 31, 2020

#### **Chemical Register:**

Government Publication Date: 1999-Feb 28, 2023 Private Compressed Natural Gas Stations:

# CNG

#### Private CHM This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the

tetrachloroethylene to the environment from dry cleaning facilities. Government Publication Date: Jan 2004-Dec 2021 Provincial

Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of

Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA).

CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or

Commercial Fuel Oil Tanks:

diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: 1985-Oct 30, 2011\*

Please refer to those individual databases for any information after Oct.31, 2011.

Private ERIS Historical Searches: EHS ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical

Profile" page.

Government Publication Date: 1999-Jun 30, 2023

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed. Government Publication Date: 1992-2001\*

company map; or from submitted a "Report of Work".

regulatory agency under Access to Public Information.

Environmental Activity and Sector Registry:

Government Publication Date: 1886 - Oct 2022

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database. Government Publication Date: Oct 2011- Jun 30, 2023

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment

(AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed

Environmental Registry: Provincial

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Jun 30, 2023

### Environmental Compliance Approval:

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Federal Environmental Effects Monitoring: EEM The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of

Government Publication Date: Oct 2011- Jun 30, 2023

fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This

database provides information on the mill name, geographical location and sub-lethal toxicity data. Government Publication Date: 1992-2007\*

Federal Environmental Issues Inventory System: FIIS

#### of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017. Government Publication Date: Apr 30, 2022

#### Environmental Penalty Annual Report:

List of Expired Fuels Safety Facilities:

#### These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations. Government Publication Date: Jan 1, 2011 - Dec 31, 2022

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Federal Convictions:

FCON Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty. Government Publication Date: 1988-Jun 2007\*

Contaminated Sites on Federal Land: FCS The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Jun 2023

#### Fisheries & Oceans Fuel Tanks:

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation. Government Publication Date: 1964-Sep 2019

#### Federal Identification Registry for Storage Tank Systems (FIRSTS): A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and

Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

#### Fuel Storage Tank:

299

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information. Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Fuel Storage Tank - Historic:

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010\*

#### Ontario Regulation 347 Waste Generators Summary:

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

#### Greenhouse Gas Emissions from Large Facilities:

#### dioxide equivalents (kt CO2 eq). Government Publication Date: 2013-Dec 2019

Provincial **TSSA Historic Incidents:** HINC List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here. Government Publication Date: 2006-June 2009\*

Indian & Northern Affairs Fuel Tanks: The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003\*

#### Fuel Oil Spills and Leaks:

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

#### Landfill Inventory Management Ontario:

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 21, 2022

#### Canadian Mine Locations:

300

MINE This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database. Government Publication Date: 1998-2009\*

#### Mineral Occurrences:

#### In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2023

#### National Analysis of Trends in Emergencies System (NATES):

#### significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released. Government Publication Date: 1974-1994\*

Non-Compliance Reports: NCPL The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on

#### National Environmental Emergencies System (NEES):

#### In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003\*

National PCB Inventory:

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008\*

#### National Pollutant Release Inventory 1993-2020:

#### Government Publication Date: Sep 2020

National Pollutant Release Inventory - Historic: Federal NPRI Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian

Oil and Gas Wells:

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Provincial Ontario Oil and Gas Wells: OOGW In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2021

Inventory of PCB Storage Sites:

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory. Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: ORD This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1989-1996\*

Ontario Regulation 347 Waste Receivers Summary: RFC Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data. Government Publication Date: 1986-1990, 1992-2021

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RST This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and /

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type. Government Publication Date: 1970 - Apr 2023

#### Variances for Abandonment of Underground Storage Tanks:

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

#### Waste Disposal Sites - MOE CA Inventory:

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Jun 30, 2023

#### Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990\*

# Definitions

**Database Descriptions:** This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

**Detail Report**: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

*Elevation:* The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

*Executive Summary:* This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

<u>Map Key:</u> The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

<u>Unplottables:</u> These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Samuel Berube Paterson Group

Sent via email sberube@patersongroup.ca

Dear Mr. Berube,

## Re: Information Request 267 O'Connor Street Ottawa, Ontario ("Subject Property")

### Internal Department Circulation:

The Planning, Infrastructure and Economic Development Department has the following information in response to your request for information regarding the Subject Property:

- Environmental Remediation Unit: The City's Environmental Remediation Unit has environmental records on file pertaining to the subject property noted above either directly on or adjacent to the subject property. To submit requests for information under the Municipal Freedom of Information and Protection of Privacy Act, please visit <u>https://ottawa.ca/en/city-hall/open-transparentandaccountable-government/access-information-and-protectionprivacy/accessinformation</u>
  - Comment: The Environmental Remediation Unit (ERU) has Phase I and II Environmental Site Assessment reports (Paterson, 2014) and Phase I and II ESA Updates (Paterson, 2020) for this property. Please contact <u>ERU-</u> <u>UAE@ottawa.ca</u> to obtain copies of the reports if required.
- Ottawa Public Health Environmental Health: all public inspection results are publicly available on the Ottawa Public Health website: <u>https://www.ottawapublichealth.ca/en/public-health-services/public-healthinspections.aspx</u>
- Sewer Use Program: No records found for this property.
- Solid Waste Services: No records found for this property.

#### **Documents Provided:**

## **HLUI Summary Report and HLUI Map**

The HLUI Summary Report Excel spreadsheet identifies HLUI area, point and line features within 250 metres of the Subject Property, as shown on the provided HLUI Map

PDF. Within 500 metres of the Subject Property, landfills and Environmental Risk Management Area (ERMA) are also identified if applicable.

For more information on how to interpret the HLUI data identified in the attached excel sheet ('ADDRESS – HLUI Summary report.xlsx'), please refer to the <u>Overview and User</u> <u>Guide</u>."

## Additional information may be obtained by contacting:

## **Ontario's Environmental Registry**

The Environmental Registry found at <u>https://ero.ontario.ca/</u> contains "public notices" about environmental matters being proposed by all government ministries covered by the Environmental Bill of Rights. The public notices may contain information about proposed new laws, regulations, policies and programs or about proposals to change or eliminate existing ones. By using keys words i.e. name of proponent/owner and the address one can ascertain if there is any information on the proponent and address under the following categories: Ministry, keywords, notice types, Notice Status, Acts, Instruments and published date (all years).

# The Ontario Land Registry Office

Registration of real property is recorded in the Ontario Land Registry Office through the Land Titles Act or the Registry Act. Documents relating to title and other agreements that may affect your property are available to the public for a fee. It is recommended that a property search at the Land Registry Office be included in any investigation as to the historic use of your property. The City of Ottawa cannot comment on any documents to which it is not a party.
