A large, curved green graphic element sweeps across the middle of the page. Below it, a blue-tinted background image shows various engineering tools: a calculator, a compass, a pencil, and a ruler, all resting on a technical drawing or blueprint. Faint, larger versions of the company logo and name are visible in the background.

**Phase One
Environmental Site Assessment
950 Terry Fox Drive
Ottawa, Ontario**

Submitted to:

SPB Developments Inc.

**Phase One
Environmental Site Assessment
950 Terry Fox Drive
Ottawa, Ontario**

September 11, 2014
Project: 14-346

EXECUTIVE SUMMARY

Houle Chevrier Engineering Ltd. (HCEL) was retained by SPB Developments Inc. to carry out a Phase One Environmental Site Assessment (ESA) for the properties located at 950 Terry Fox Drive and the southeast portion of the adjacent property located at 820 Terry Fox Drive in Ottawa, Ontario (hereafter collectively referred to as “the subject property”).

The primary objective of this Phase One ESA was to identify any former or current potentially contaminating activities at the subject property and its vicinity to determine if they create any areas of potential environmental concern on the subject property. This Phase One ESA was carried out in accordance with Ontario Regulation 153/04 made under the Environmental Protection Act and meets the requirements of Part VII (Sections 23 to 31) and Schedule D of the regulation.

Section 1.0 of this report provides a brief description of the site and Section 2.0 of this report provides the scope of investigation. Section 3.0 presents the findings of the records review. Section 4.0 presents the results of the interviews conducted. Section 5.0 presents the findings of the site reconnaissance. Section 6.0 provides a review and evaluation of information gathered. Section 7.0 presents the conclusions and recommendations of the study. Section 8.0 outlines the limitation of liability and Section 9.0 lists the references used.

No potentially contaminating activities were determined to create an area of potential environmental concern (APEC) on the subject property. Based on the available information, it is our opinion that a Phase Two Environmental Site Assessment is not required for the subject property.

1.0 INTRODUCTION

1.1 Phase One Property Information

Houle Chevrier Engineering Ltd. (HCEL) was retained by SPB Developments Inc. to carry out a Phase One Environmental Site Assessment (ESA) for the properties located at 950 Terry Fox Drive and the southeast portion of the adjacent property located at 820 Terry Fox Drive in Ottawa, Ontario (hereafter collectively referred to as “the subject property”).

The legal description for 950 Terry Fox Drive (parcel A) is Part of Lot 30, Concession 11, Geographic Township of Goulbourn, City of Ottawa, being the remainder of Instrument Number N765044, part of PIN 04450-1281. The southeastern portion of 820 Terry Fox Drive (parcel B) is also included in this Phase One ESA, as these lands will be purchased in the near future. The legal description for this parcel of land is Part of Lot 30, Concession 11, Geographic Township of Goulbourn, City of Ottawa, being part of parts 1 & 2 on Plan 5R-2933, part of PIN 04450-0188. The general location of the subject property is illustrated on the Key Plan, Figure 1.

The subject property is presently owned by SPB Developments Inc, formerly known as 3558584 Canada Inc. Parcel B is presently owned by the Mississippi Valley Conservation Authority. The contact for the subject property is Mr. Pierre Bernier at 613-836-8079.

2.0 SCOPE OF INVESTIGATION

The primary objective of this Phase One ESA was to identify any former or current potentially contaminating activities at the subject property and its vicinity to determine if they create any areas of potential environmental concern on the subject property.

This Phase One ESA was carried out in accordance with Ontario Regulation 153/04 made under the Ontario Environmental Protection Act and meets the requirements of Part VII (Sections 23 to 31) and Schedule D of the regulation. The scope of the investigation includes a records review, interviews, a site reconnaissance, an evaluation of the information gathered and reporting. The Phase One ESA report will document and demonstrate how the objectives of the Phase One ESA were achieved and whether further investigation is required.

3.0 RECORDS REVIEW

3.1 General

3.1.1 Phase One Study Area Determination

Parcel A, located at 950 Terry Fox Drive in Ottawa, Ontario, has an area of approximately 14.3 hectares (35.4 acres). Parcel B, located at the southeast of 820 Terry Fox Drive, has an area of approximately 0.9 hectares (2.2 acres). The subject property, which includes both parcels of land, has always been vacant agricultural land that has never been developed. Land use in the study area was historically agricultural until residential development began to the north and east between 1974 and 1984. Based on this information, a Phase One ESA study area of 250 metres surrounding the subject property is deemed sufficient for the purpose of this Phase One ESA. The location of the subject property and the extent of the Phase One ESA study area are provided on the Study Area Plan, Figure 2.

No land use outside the 250 metres study area has been identified as a considerable environmental concern to warrant inclusion in the study area.

3.1.2 First Developed Use Determination

Based on a review of the historical information, the subject property has never been developed.

3.1.3 Fire Insurance Plans / Insurance Reports

Based on our knowledge of the area, no fire insurance plans are available for the subject property or the study area because development in the area has only occurred recently.

3.1.4 Chain of Title

A chain of title search for the subject property was provided by Wentzell Titles of Kemptville, Ontario and is included in Appendix A. The legal description for 950 Terry Fox Drive (Parcel A) is Part of Lot 30, Concession 11, Geographic Township of Goulbourn, City of Ottawa, being the remainder of Instrument Number N765044, part of PIN 04450-1281. The legal description for Parcel B, the land to be purchased, is Part of Lot 30, Concession 11, Geographic Township of Goulbourn, City of Ottawa, being part of parts 1 & 2 on Plan 5R-2933, part of PIN 04450-0188. The highlights of the chain of title search are described below:

- Both parcels of land were first purchased by Benjamin Bail from the Crown in 1828;
- Parcel A was purchased by 3558584 Canada Inc. in 1998, which later changed its name to SPB Developments Inc.;
- Parcel B was expropriated by the Minister of Natural Resources, now the Mississippi Valley Conservation authority, in 1977.

3.1.5 Environmental Reports

3.1.5.1 Phase I Environmental Site Assessment

A Phase I Environmental Site Assessment was previously conducted for the subject property. The report entitled “Phase I Environmental Site Assessment, West Part of Lot 30, Concession 11, Ottawa, Ontario” was completed by Houle Chevrier Engineering Ltd. in February 2010. The relevant highlights from the ESA are as follows:

- Both properties were vacant at the time the report was written;
- Drainage for the subject property is through runoff to a storm water management pond to the north;
- One (1) minor spill of furnace oil and one historical spill of mineral oil were identified within 250 metres of the subject site;
- A former Canadian Pacific right-of-way and a hydro substation are located south of the subject site;
- No actual or potential issues of environmental concern were identified on the subject site. No further investigation (i.e. Phase II Environmental Site Assessment) was recommended at the time the report was written.

3.2 Environmental Source Information

3.2.1 Ecolog ERIS Database Report

HCEL contacted Ecolog Environmental Risk Information Services Ltd. (Ecolog Eris) to conduct a search of over fifty (50) public and private information databases for the subject property and the area within 250 metres of the subject property. The complete Ecolog Eris report, including a list of databases searched, is provided in Appendix B. All listings were reviewed and the following entries were identified as relevant:

Address / Location	Distance from Subject Site	Company / Name	Database	Description
7 Connelly Place	40 metres north (No precise location available)	-	TSSA Historic Incidents	<ul style="list-style-type: none">• Incident involving natural gas pipeline strike at private dwelling;• Incident occurred in 2007.
59 Connelly Place	40 metres north (No precise location available)	-	TSSA Historic Incidents	<ul style="list-style-type: none">• Incident involving release of natural gas at private dwelling;• Incident occurred in 2008.

Address / Location	Distance from Subject Site	Company / Name	Database	Description
69 Connelly Place	40 metres north (No precise location available)	-	TSSA Incidents	<ul style="list-style-type: none"> Release of carbon monoxide reported at residential dwelling.
Castle Glen Crescent and Castlefrank Road	105 metres northeast	614738 Ontario Inc.	Certificate of Approval	<ul style="list-style-type: none"> Certificate of approval for municipal sewage and municipal water issued in 1999.
8 Castle Glen Crescent	170 metres northeast	-	TSSA Historic Incidents	<ul style="list-style-type: none"> Incident involving release of natural gas at private dwelling; Incident occurred in 2009.
		Enbridge Gas Distribution Inc.	Ontario Spills	<ul style="list-style-type: none"> Natural gas meter leak; Incident occurred in 2009.
Castlefrank Road and Connelly Road	200 metres northeast	614738 Ontario Inc.	Certificate of Approval	<ul style="list-style-type: none"> Certificate of approval for municipal sewage issued in 1999.
Intersection of Castlefrank Road and Glamorgan Drive	250 metres northeast	City of Ottawa	Certificate of Approval	<ul style="list-style-type: none"> Certificate of approval for municipal and private sewage works issued in 2003.
Storm sewer at Castlefrank Road and Glamorgan Drive	250 metres northeast	-	Ontario Spills	<ul style="list-style-type: none"> Unknown source of furnace/fuel oil in storm sewer; Environmental impact listed as possible; Incident occurred in 2002;
Terry Fox Drive (No precise location provided)	-	Van's Industrial and Specialty Coatings	Ontario Spills	<ul style="list-style-type: none"> Spill of 40 litres of diesel fuel to road, ditch, and sewer; Environmental impact listed as not anticipated; Incident occurred in 2005.

Address / Location	Distance from Subject Site	Company / Name	Database	Description
Just off Castlefrank Road (No precise location provided)	-	Waste Management of Canada Corporation	Ontario Spills	<ul style="list-style-type: none"> Spill of 30 litres of hydraulic oil to road from truck; Environmental impact listed as not anticipated; Incident occurred in 2013.
Terry Fox Drive Pad Transformer (No precise location provided)	-	Kanata Hydro	Ontario Spills	<ul style="list-style-type: none"> Spill of 150 litres of mineral oil (No PCBs) to ground as a result of a cooling system leak; Incident occurred in 1988.

3.2.2 City Directories

A review of the city directories from 1964 to 2011 was completed for the subject property (950 Terry Fox Drive and 820 Terry Fox Drive), and several adjacent properties including 5431 Fernbank Road, 560 and 570 Hazeldean Road, and 105 Tapadero Avenue. A copy of the City Directory records is provided in Appendix C. The only listing in the city directory search was 560 Hazeldean Road, which was listed as the Kevin Haime Golf Centre in 2006/2007 and 2011. No potentially contaminating activities were apparent from the review of city directories.

3.2.3 Technical Standards and Safety Authority

The Technical Standards and Safety Authority (TSSA) was contacted on August 21, 2014, to request available records regarding the subject property (820 and 950 Terry Fox Drive), and for the adjacent properties located at 570 Hazeldean Road, 5431 Fernbank Road, 1039 Terry Fox Drive, and 1 Connelly Place. The response from the TSSA indicated that there are no available records for the subject property or any of the above-listed properties. It should be noted that the Fuels Safety Division of the TSSA did not register private fuel underground or above ground storage tanks prior to January of 1990 or furnace oil tanks prior to May 1, 2002.

A copy of the search request and the response from the TSSA are provided in Appendix D.

3.2.4 City of Ottawa – Freedom of Information Request

The City of Ottawa was contacted on August 19, 2014, to provide information from the Planning, Transit and the Environment Departments and from the Historical Land Use Inventory (HLUI). A response from the City of Ottawa has not been received at the time this report was written. Upon receipt of the report, the information will be reviewed and if any conclusions to this report

are altered, SPB Developments Inc. will be notified. A copy of the request for information can be found in Appendix E.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Selected aerial photographs were examined as part of this Phase One ESA. Copies of the aerial photographs are provided in Appendix F.

Aerial photographs were obtained at approximately fifteen (15) year intervals and were selected based on suitable scales for analysis and coverage area. The earliest aerial photograph obtained was from 1934. Observations made with respect to the selected aerial photographs are discussed below:

Plate Number	Date	Photograph Number	Observations
F1	1934	A4698_28	<ul style="list-style-type: none"> The subject property is vacant agricultural land; Surrounding land use is predominantly agricultural land; The Carp River is visible to the north of the subject property. A wooded area is visible along the east portion of the site.
F2	1945	A9557_39	<ul style="list-style-type: none"> The Canadian Pacific Railway (CPR) right of way is visible south of the subject property.
F3	1960	A17264_106	<ul style="list-style-type: none"> No significant changes compared to the 1945 aerial photograph.
F4	1974	A23927_41	<ul style="list-style-type: none"> Areas of disturbed soil are visible to the north of the subject property on the opposite side of the Carp River.
F5	1984	A26472_18	<ul style="list-style-type: none"> The railway line no longer exists and the right of way has been converted to a recreational pathway; A residential subdivision has been constructed to the north and northeast of the subject property on the opposite side of the Carp River; A stormwater management pond is visible directly to the north of the subject property.

Plate Number	Date	Photograph Number	Observations
F6	2011	geoOttawa	<ul style="list-style-type: none"> The wooded area to the east of the subject property is no longer visible; The residential development to the north of the subject property has expanded; What is presently known as Terry Fox Drive has been constructed; The stormwater management pond has increased in size.

Based on the review of selected historical aerial photographs, the subject property has never been developed. Land use in the study area was historically agricultural until between 1974 and 1984 when residential development began to the north of the subject property. A railway right of way was visible to the southeast of the subject property starting in the 1945 aerial photograph and was later removed and converted into a recreational pathway.

3.3.2 Topography, Hydrology and Geology

A topographic map based on Ontario Basic Mapping is provided on the Topographic Map, Figure 3. The subject property has a relatively flat topography and is at an elevation of approximately 96 metres above sea level. Surrounding topography generally slopes gradually downwards towards the Carp River, which is located to the north of the subject property.

Surficial and bedrock geology maps of the Ottawa area indicate that the overburden in the vicinity of the subject property generally consists of offshore marine sediments (sand and silt) with a thickness ranging from 15 to 25 metres. The bedrock is mapped as interbedded Paleozoic limestone and dolostone of the Gull River Formation.

Groundwater flow often reflects topographic features and typically flows toward nearby lakes, rivers and wetland areas. Based on the topography of the area, it is expected that the local shallow groundwater flow is towards the north.

3.3.3 Fill Materials

No fill material was observed on the subject property. Piles of fill material were observed on the property located to the southwest of the subject property. This fill material was placed sometime after 2011 as no disturbed areas of soil were observed in the 2011 aerial photograph.

3.3.4 Water Bodies and Areas of Natural Significance

No provincially significant wetlands (PSWs) or areas of natural and scientific interest (ANSIs) were identified on the subject property or within the study area. A map created using the Mississippi Valley Conservation Authority map data indicated that one (1) watercourse was

located on the subject property, and that two (2) watercourses are located in close proximity to the subject property. Several creeks and wetland areas were observed on the subject property during the site reconnaissance. A copy of the map from the MVCA is provided in Appendix G.

3.3.5 Well Records

A copy of the Ministry of Environment (MOE) Well Records for a 750-metre radius from the centre of the subject property is provided in Appendix H. Nine (9) wells were identified within this search radius. The locations of the adjacent water wells, based on the UTM coordinates provided in the water well records, have been plotted on Figure 3 following the text of this report. The average depth to the water table based on the static water levels available from the MOE well records is 5.3 metres below ground surface.

The MOE well records indicate that the stratigraphy of the overburden in the area generally consists of a layer of clay or sand. Only three (3) of the wells were advanced to a depth where bedrock was encountered. These wells encountered limestone bedrock at an average depth of 6.7 metres below ground surface.

3.3.6 Site Operating Records

No site operating records were available for the subject property as it has never been developed.

4.0 INTERVIEWS

An interview was carried out with a person familiar with the subject property. Details of the interview are summarized in the following sections.

4.1 Interview with Property Owner

An interview was carried out by telephone with Mr. Pierre Bernier, Owner and CEO of Metric Homes, on September 8, 2014. Mr. Bernier was identified as an interview candidate because he has been involved with the subject property since 1982, and has owned the property since approximately 1993. The following relevant information concerning potentially contaminating activities and areas of potential environmental concern were noted:

- Mr. Bernier indicated that the site has always been vacant and has never been developed;
- No materials, soil, or other products were ever stored on the subject property;
- Mr. Bernier indicated that natural gas, hydro, water and sewer services are available in the area. The City of Ottawa has constructed sanitary sewer connections along the southeastern portion of the subject property;
- He is not aware of any potentially contaminating activities that have taken place on the subject property.

4.2 Assessment and Evaluation of Interview

The information provided in the interview is consistent with other information sources in that the subject property has always been vacant undeveloped land.

5.0 SITE RECONNAISSANCE

5.1 General Requirements

A site reconnaissance was carried out on September 8, 2014 from 10:00 am to 11:30 am. The weather at the time of the site reconnaissance was clear with a temperature of approximately 21 degrees Celsius.

The primary assessor for this Phase One Environmental Site Assessment, Samantha Sabo, has completed the Associated Environmental Site Assessors of Canada (AESAC) Phase I Environmental Site Assessment Training Course. She possesses a formal education, which includes a Bachelor of Science with a major in Environmental Science and a Master of Environment in Environmental Assessment. This formal education has provided her with the knowledge and expertise with which to identify sources of environmental concern and evaluate their potential to cause environmental contamination. In addition, Samantha has successfully completed Workplace Hazardous Materials Information System (WHMIS) training.

The Phase One ESA was carried out under the supervision of Mr. Craig Houle, M.Eng., P.Eng., a registered Professional Engineer in the Province of Ontario to ensure that the Phase One ESA has been carried out to meet the objectives and requirements of Ontario Regulation 153/04. Mr. Houle is a registered Qualified Person to conduct environmental site assessments and file Record of Site Condition applications.

5.1.1 Site Photographs

Photographs of the subject property were taken during the course of the site reconnaissance to document the general condition of the subject property and any areas of potential environmental concern. The relevant photographs are presented in Appendix I. A discussion of the photographs is provided in the following table:

Plate Number	Compass Orientation	Description
I1	Northwest	View of the subject property from the Trans-Canada trail located to the southeast. The subject property is heavily treed and vegetated.
I2	East	View of the subject property from a berm located to the southwest of the subject property.
I3	West	View of the drainage ditch along the northeastern portion of the subject property.

5.2 Specific Observations at Phase One Property

5.2.1 Onsite Structures

No structures were observed on the subject property.

5.2.2 Observations

The following observations were made for the subject property:

- The subject property consists of vacant undeveloped land that is heavily vegetated with trees, shrubs, flowers, and other vegetation;
- A drainage ditch is located along the northeastern portion of the subject property;
- Several wetland areas were observed across the subject property. It is not known whether these areas are permanently wet or whether they are ephemeral wetlands;
- No distressed vegetation was observed at the time of the site reconnaissance;
- No evidence of storage tanks, spills, or other potentially contaminating activities were observed on the subject property.

5.2.3 Site Services

Sanitary sewer manholes were observed along the southeastern edge of the subject property. No other services are present on the subject property.

5.3 Specific Observations within the Study Area

5.3.1 Services

Overhead hydro poles were observed to the northeast of the subject property as well as along the Trans-Canada Trail located to the southeast of the subject property. A drainage ditch was observed along Terry Fox Drive on the southwestern side. Residential homes in the area are heated by natural gas. Sewers are present in the study area.

5.3.2 Water Bodies and Areas of Natural Significance

Several streams and wetland areas were observed on the subject property. It is not known whether these streams or wetlands are permanent or ephemeral in nature. A stormwater management pond was observed to the north of the subject property. No areas of natural significance were observed on the subject property.

5.3.3 Surrounding Properties

The following general observations were made for the properties surrounding the subject property:

- Residential homes were observed to the northwest, north, and northeast. Construction of new residential homes was observed to the southeast of the subject property;

- Agricultural land is located to the southwest of the subject property;
- Piles of fill material were observed on 570 Hazeldean Road, the property located adjacent to the southeast of the subject property.

5.4 Enhanced Investigation Property

The Phase One ESA property is not an enhanced investigation property, since the available information indicates that the subject property has never been used as a commercial garage, gasoline outlet or dry cleaning facility.

5.5 Written Description of Investigation

The site reconnaissance was carried out on September 8, 2014, by Ms. Samantha Sabo, B.Sc., M.Env. of Houle Chevrier Engineering Ltd. The site reconnaissance was carried out to determine if there were environmental concerns with the subject property and/or surrounding property uses.

A detailed written description of the investigation and the results of the site reconnaissance investigation are provided in Sections 5.1 to 5.4.

No potentially contaminating activities were identified on the subject property during the site reconnaissance.

The following potentially contaminating activity was identified in the study area during the site reconnaissance:

- Piles of fill material located at 570 Hazeldean Road.

6.0 REVIEW AND EVALUATION OF INFORMATION

6.1 Current and Past Uses

Current and past uses of the subject property are documented in the following table:

Year	Owner	Description of Property Use	Observations
1828 to 1936	Benjamin Bail and others	Unknown (Likely Agricultural)	No aerial photographs prior to 1936 were available for review.
1936 to present	John Wall and others Parcel A: SPB Developments Inc. (current owner) Parcel B: Mississippi Valley Conservation Authority (current owner)	Agricultural (Vacant)	According to the chain of title, city directory search, and aerial photographs the property was never developed.

6.2 Potentially Contaminating Activities

Potentially contaminating activities within the Phase One ESA study area and the likelihood for creating an area of potential environmental concern (APEC) on the subject property are as follows:

PCA and Location	Description	Likelihood of Creating APEC	Rationale
Former railway located to the southeast of the subject property	A railway was observed to the southeast of the subject property in the aerial photographs. The railway was later removed and replaced by a recreational pathway.	Low	Based on: <ul style="list-style-type: none">The potential impacts from railway use being limited to the right of way, which is not located on the subject property;The conversion of the railway and right of way to a recreational pathway, which likely involved the removal of railway spurs and other materials.
Fill material piles at 570 Hazeldean Road	Piles of fill material were observed to the southwest of the subject property.	Low	Based on the fill material not being located on the subject property.

PCA and Location	Description	Likelihood of Creating APEC	Rationale
Natural gas pipeline strike at 7, 59 and 69 Connelly Place	Incidents involving a natural gas pipeline strike at private dwellings.	Low	Based on release of natural gas to air.
Natural gas leak at 8 Castle Glen Crescent	Leak of natural gas at a private dwelling.	Low	Based on release of natural gas to air.
Spill at the Corner of Castlefrank Road and Glamorgan Drive	Unknown source of furnace / fuel oil observed in storm sewer in 2002.	Low	Based on distance from subject property (250 metres northeast).
Spill on Terry Fox Drive (No precise location)	Spill of 40 litres of diesel fuel to road, ditch, and sewer in 2005.	Unknown	No information on the location of the spill was provided.
Spill on Castlefrank Road (No precise location)	Spill of 30 litres of hydraulic oil to road from truck in 2013.	Unknown	No information on the location of the spill was provided.
Terry Fox Drive Pad Transformer (No precise location)	Spill of 150 litres of mineral oil (no PCBs) to ground as a result of a cooling system leak in 1988.	Unknown	No information on the location of the spill was provided.

6.3 Areas of Potential Environmental Concern

No areas of potential environmental concern on the subject property were identified.

The available information was reviewed in a comprehensive manner starting with available historical information, followed by the results of the site reconnaissance and finally the results of the interviews. These three components were evaluated using our professional experience, judgment and available documentation including guidelines to determine potentially contaminating activities. Available historical records were cross-referenced with other records to verify their accuracy. The observations from the site reconnaissance and information provided through the interview validated the available historical records for the subject property, and vice versa. The potentially contaminating activities were then reassessed using our professional experience and judgment in order to identify the areas of potential environmental concern on the subject property. In combination, the factual review of available historical records and application of professional judgment have led to a thorough analysis that is sufficient for the purposes of the Phase One ESA.

6.3.1 Discussion of Uncertainty

There is uncertainty associated with the location of the spills described in the Ecolog ERIS report. No detailed spills reports were available to assess the potential impacts to the site.

6.4 Phase One Conceptual Site Model

The required details of the Phase One Conceptual Site Model are presented on Figure 2 and Figure 3 as noted in the following table:

Conceptual Model Detail	Figure
Existing Buildings and Structures	Study Area Plan, Figure 2
Water Bodies	Topographic Map, Figure 3
Areas of Natural Significance	Not Present within the Phase One Study Area
Drinking Water Wells	Topographic Map, Figure 3
Roads	Study Area Plan, Figure 2
Adjacent Property Use	Study Area Plan, Figure 2
Potentially Contaminating Activities	Study Area Plan, Figure 2
Areas of Potential Environmental Concern	Not Present within the Phase One Study Area

6.4.1 Underground Utilities

There is potential for underground utilities to affect contaminant transport on or to the subject property, if contaminants are present. Sewer and water lines have been installed along the southeastern portion of the site.

6.4.2 Geological and Hydrogeological Information

Surficial and bedrock geology maps of the Ottawa area indicate that the overburden in the vicinity of the subject property generally consists of offshore marine sediments (sand and silt) with a thickness ranging from 15 to 25 metres. The bedrock is mapped as interbedded Paleozoic limestone and dolostone of the Gull River Formation.

Groundwater flow often reflects topographic features and typically flows toward nearby lakes, rivers and wetland areas. Based on the topography of the area, it is expected that the local shallow groundwater flow is towards the north.

6.4.3 Discussion of Uncertainty

There is uncertainty associated with the permanence of the wetland areas located on the subject property. This could affect the transport of contaminants across the site, however; no areas of potential environmental concern were identified on the subject property.

7.0 CONCLUSIONS AND RECOMMENDATIONS

The available information was reviewed in a comprehensive manner starting with available historical information, followed by the results of the site reconnaissance and interviews. These three components were evaluated using our professional experience, judgment and available documentation including guidelines to determine potentially contaminating activities. Using site-specific geological and hydrogeological information, we determined the likelihood of contamination on the subject property due to the potentially contaminating activities in order to establish areas of potential environmental concern. The identification of areas of potential environmental concern was guided by our professional experience and judgment. This analysis constitutes a comprehensive review of the available information and factual data that is sufficient for the purposes of the Phase One ESA.

No potentially contaminating activities were determined to create an area of potential environmental concern (APEC) on the subject property. Based on the available information, it is our opinion that a Phase Two Environmental Site Assessment is not required for the subject property.

The Phase One Environmental Site Assessment has been carried out by the qualified personnel and reviewed by the undersigned. This Phase One ESA was carried out in accordance with Ontario Regulation 153/04 made under the Environmental Protection Act and meets the requirements of Part VII (Sections 23 to 31) and Schedule D of the regulation.

We trust this report provides sufficient information for your present purposes. If you have any questions concerning this report, please do not hesitate to contact our office.

Samantha Sabo, B.Sc., M.Env.
Environmental Scientist

Craig Houle, M.Eng., P.Eng.
Principal

8.0 LIMITATION OF LIABILITY

The results of this Phase One ESA should in no way be construed as a warranty that the subject property is free from any and all contaminants other than those noted in this report, nor that all compliance issues have been addressed.

This report was prepared for the exclusive use of SPB Developments Inc. and is based on data and information collected during the Phase One ESA of the property conducted by Houle Chevrier Engineering Ltd. This report may not be relied upon by any other person or entity without the express written consent of Houle Chevrier Engineering Ltd. and SPB Developments Inc. In evaluating this site, Houle Chevrier Engineering Ltd. has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others.

The assessment of environmental conditions and possible site hazards presented has been made using the available historical and technical data collected and provided by others. The conclusions provided herein represent the best judgment of Houle Chevrier Engineering Ltd. based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the Phase One ESA is sufficient to identify existing and/or potential environmental liabilities that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the subject property was carried out as part of this assessment. The Phase One ESA does not include a program of intrusive observation/testing. These activities would be carried out as part of a Phase Two ESA. This environmental assessment included only a cursory overview of the neighbouring land uses from public right of ways and from the subject property and does not constitute a complete assessment of the adjacent sites.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review on environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by EcoLog Environmental Risk Information Services Ltd ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, EcoLog ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of EcoLog ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by EcoLog ERIS Ltd. Copyright in data used in the Service or Report(s) (the "Data") is owned by EcoLog ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of EcoLog ERIS.

Appendix: Database Descriptions

*Ecolog Environmental Risk Information Services Ltd can search the following databases. The extent of Historical information varies with each database and current information is determined by what is publicly available to Ecolog ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of all abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

*Government Publication Date: Sept 2002**

Aggregate Inventory:

Provincial [AGR](#)

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Aug 2012

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Jan 2014

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of all known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 2001-Jun 2010

Borehole:Provincial **BORE**

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Aug 2011

Certificates of Approval:Provincial **CA**

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

*Government Publication Date: 1985-Oct 30, 2011**

Commercial Fuel Oil Tanks:Provincial **CFOT**

Since May 2002, Ontario developed a new act where it became mandatory for fuel oil tanks to be registered with Technical Standards & Safety Authority (TSSA). This data would include all commercial underground fuel oil tanks in Ontario with fields such as location, registration number, tank material, age of tank and tank size.

Government Publication Date: 1948-Apr 2013

Chemical Register:Private **CHEM**

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1992, 1999-Jun 2010

Inventory of Coal Gasification Plants and Coal Tar Sites:Provincial **COAL**

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

*Government Publication Date: Apr 1987 and Nov 1988**

Compliance and Convictions:Provincial **CONV**

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Feb 2014

Certificates of Property Use:Provincial **CPU**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994-Jul 2014

Drill Hole Database:Provincial [DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886-Jan 2014

Environmental Activity and Sector Registry:Provincial [EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 31 2011-Jul 2014

Environmental Registry:Provincial [EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994-Jul 2014

Environmental Compliance Approval:Provincial [ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For CofA's prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 31, 2011-Feb 2014

Environmental Effects Monitoring:Federal [EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

*Government Publication Date: 1992-2007**

ERIS Historical Searches:Private [EHS](#)

EcoLog ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 2013

Environmental Issues Inventory System:Federal [EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

*Government Publication Date: 1992-2001**

List of TSSA Expired Facilities:Provincial [EXP](#)

This is a list of all expired facilities that fall under the TSSA (TSSA Act & Safety Regulations), including the six regulations that exist under the Fuels Safety Division. It will include facilities such as private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc. These tanks have been removed and automatically fall under the expired facilities inventory held by TSSA.

Government Publication Date: Current to May 2013

Federal Convictions:Federal [FCON](#)

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

*Government Publication Date: 1988-Jun 2007**

Contaminated Sites on Federal Land:Federal [FCS](#)

The Federal Contaminated Sites Inventory includes information on all known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government.

Government Publication Date: June 2000-Jul 2014

Fisheries & Oceans Fuel Tanks:Federal [FOFT](#)

Fisheries & Oceans Canada maintains an inventory of all aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sept 2003

Fuel Storage Tank:Provincial [FST](#)

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

Government Publication Date: 2010-May 2013

Fuel Storage Tank - Historic:Provincial [FSTH](#)

The Technical Standards & Safety Authority (TSSA), under the Technical Standards & Safety Act of 2000 maintains a database of registered private and retail fuel storage tanks in Ontario with fields such as location, tank status, license date, tank type, tank capacity, fuel type, installation year and facility type.

*Government Publication Date: Pre-Jan 2010**

Ontario Regulation 347 Waste Generators Summary:

Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

*Government Publication Date: 1986-Apr 2014***TSSA Historic Incidents:**

Provincial HINC

This database will cover all incidences recorded by TSSA with their older system, before they moved to their new management system. TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. The TSSA works to protect the public, the environment and property from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from pipelines, diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

*Government Publication Date: 2006-June 2009***Indian & Northern Affairs Fuel Tanks:**

Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of all aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

*Government Publication Date: 1950-Aug 2003****TSSA Incidents:**

Provincial INC

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Includes incidents from fuel-related hazards such as spills, fires and explosions. This database will include spills and leaks from diesel, fuel oil, gasoline, natural gas, propane and hydrogen recorded by the TSSA.

*Government Publication Date: June 2009-Apr 2013***Landfill Inventory Management Ontario:**

Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the ministry compiles new and updated information. The inventory will include small and large landfills. Additionally, each year the ministry will request operators of the larger landfills complete a landfill data collection form that will be used to update LIMO and will include the following information from the previous operating year. This will include additional information such as estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills will include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: 2012

Canadian Mine Locations:Private [MINE](#)

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009

Mineral Occurrences:Provincial [MNR](#)

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the planimetric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Apr 2013

National Analysis of Trends in Emergencies System (NATES):Federal [NATE](#)

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

*Government Publication Date: 1974-1994**

Non-Compliance Reports:Provincial [NCPL](#)

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: 1994-2012

National Defence & Canadian Forces Fuel Tanks:Federal [NDFT](#)

The Department of National Defence and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

*Government Publication Date: Up to May 2001**

National Defence & Canadian Forces Spills:Federal [NDSP](#)

The Department of National Defence and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Aug 2010

National Defence & Canadian Forces Waste Disposal Sites:Federal [NDWD](#)

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

*Government Publication Date: 2001-Apr 2007**

National Environmental Emergencies System (NEES):Federal [NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for all previous Environment Canada spill datasets. NEES is composed of the historic datasets 'or Trends' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

*Government Publication Date: 1974-2003****National PCB Inventory:**Federal [NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. All federal out-of-service PCB containing equipment and all PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

*Government Publication Date: 1988-2008****National Pollutant Release Inventory:**Federal [NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

*Government Publication Date: 1993-2011***Oil and Gas Wells:**Private [OGW](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

*Government Publication Date: 1988-Jun 2014***Ontario Oil and Gas Wells:**Provincial [OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, well cap date, licence no., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

*Government Publication Date: 1800-2013***Inventory of PCB Storage Sites:**Provincial [OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004

Orders:Provincial **ORD**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Jul 2014

Canadian Pulp and Paper:Private **PAP**

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009

Parks Canada Fuel Storage Tanks:Federal **PCFT**

Canadian Heritage maintains an inventory of all known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

*Government Publication Date: 1920-Jan 2005**

Pesticide Register:Provincial **PES**

The Ontario Ministry of Environment maintains a database of all manufacturers and vendors of registered pesticides.

Government Publication Date: 1988-Jun 2013

TSSA Pipeline Incidents:Provincial **PINC**

TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. This database will include spills, strike and leaks from recorded by the TSSA.

Government Publication Date: June 2009-Mar 2012

Private and Retail Fuel Storage Tanks:Provincial **PRT**

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

*Government Publication Date: 1989-1996**

Permit to Take Water:Provincial **PTTW**

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994-Jul 2014

Ontario Regulation 347 Waste Receivers Summary:Provincial **REC**

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-2012

Record of Site Condition:

Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.

RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Jun 2014

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Jun 2010

Scott's Manufacturing Directory:

Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011

Ontario Spills:

Provincial SPL

This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Feb 2014

Wastewater Discharger Registration Database:

Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-2011

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

*Government Publication Date: 1915-1953**

Transport Canada Fuel Storage Tanks:

Federal TCFT

With the provinces of BC, MB, NB, NF, ON, PE, and QC; Transport Canada currently owns and operates 90 fuel storage tanks. Our inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970-Mar 2007

TSSA Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

The TSSA, Under the Liquid Fuels Handling Code and the Fuel Oil Code, all underground storage tanks must be removed within two years of disuse. If removal of a tank is not feasible, you may apply to seek a variance from this code requirement. This is a list of all variances granted for abandoned tanks.

Waste Disposal Sites - MOE CA Inventory:

Provincial [WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: 1970-Feb 2014

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial [WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: 1955-Mar 2014

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries". All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and were included as reference.

Technical Standards and Safety Authority Search Results

Subject: Re: Search for USTs - Project 14-346

From: Public Information Services <publicinformationsservices@tssa.org>

Date: 21/08/2014 12:56 PM

To: Samantha Sabo <ssabo@hceng.ca>

Hi Samantha:

Thank you for your inquiry.

We have no record in our database of any fuel storage tanks at the subject address (addresses).

For a further search in our archives please submit your request in writing to Public Information Services via e-mail (publicinformationsservices@tssa.org) or through mail along with a fee of \$56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard) or with a Cheque made payable to TSSA.

Thank you and have a great day!

Prem

Good afternoon,

Could you please perform a search of the following address for USTs?

820, 950 and 1039 Terry Fox Drive

570 Hazeldean Road

5431 Fernbank Road

1 Connelly Place

All addresses are located in Ottawa (Kanata), Ontario

Thank you for your assistance!

Best regards,

Samantha

APPENDIX E

City of Ottawa Freedom of Information Request

DISCLAIMER

For use with HLUI Database

CITY OF OTTAWA ("the City") is the owner of the HISTORICAL LAND USE INVENTORY ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Houle Chevrier Engineering Ltd. ("the Requester") does so only under the following conditions and understanding:

1. This is a free service offered by the City.
2. The information which is contained in the HLUI has been compiled from publicly available records and other sources of information. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided "as is".
3. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information to be provided by the City to the Requester is provided on the assumption that no person shall rely on it without undertaking independent verification of it for any purpose whatsoever and all liability to any such person is denied.
4. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
5. Copyright is reserved to the City.
6. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
7. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.
8. All information collected under this request and all records provided in response to this request are subject to the provisions of the *Municipal Freedom of Information and Protection of Privacy Act*, R.S.O. 1990, c. M56, as amended.

Re: Consent to Disclose Information
950 Terry Fox Drive
Ottawa, Ontario

Dear Sir,

We have been retained to carry out a Phase One Environmental Site Assessment (ESA) for the property located at 950 Terry Fox Drive in Ottawa, Ontario.

We are requesting consent from the owner of the subject property for the City of Ottawa to disclose information for the purpose of the Phase One Environmental Site Assessment. This will authorize the City of Ottawa to release any relevant information about the property to the requester.

To provide consent, please sign and date the following section and e-mail or fax to: Houle Chevrier Engineering, Attn. Samantha Sabo, e-mail: ssabo@hceng.ca, fax: 613-836-9731.
