patersongroup.ca

Dear Sir,

Further to your request, Paterson Group (Paterson) conducted a Phase I Environmental Site Assessment (ESA) Update for the aforementioned property. This report updates three previous Phase I ESAs prepared for 5993 and 6115 Flewellyn Road and 6070 Fernbank Road prepared in 2020 and 2021. The 2020 and 2021 Phase I ESAs were prepared for the majority of the Phase I Property; however, this update was prepared to address the original Phase I Properties, 5971 Flewellyn, 6141 Flewellyn Road, 6159 Flewellyn Road, 1770 Shea Road and 59 Aridus Crescent. This report is intended to meet the requirements of a Phase I ESA Update, as per the MECP Standard O.Reg. 153/04, as amended, under the Environmental Protection Act. This report is to be read in conjunction with the previous reports.

Site Information

The Phase I Property is predominantly a vacant land with two residential dwellings occupying the southwestern corner of the Phase I Property at 6141 and 6159 Flewellyn Road, one residential dwelling on the southeastern portion of the Phase I Property at 5971 Flewellyn Road, a stormwater management pond, and a hydro transmission corridor are present on the central portion. The Phase I Property is located on the north side of Flewellyn Road, at the southwest corner of the Shea and Flewellyn Roads, in the City of Ottawa, Ontario. The Phase I property is an irregular lot in a RU – Rural Countryside Zone. The property is surrounded by residential and agricultural properties. The Phase I Property is situated in an area where private services (potable water wells and private

septic systems) are relied upon. The configuration of the Phase I Property is shown on Drawing PE5472-3R - Site Plan, which is appended to this report.

Records Review

Phase I ESA Study Area Determination

A radius of approximately 250 m was determined to be appropriate as a Phase I ESA Study Area for this assignment. Properties outside the 250m radius are not considered to have the potential to impact the Phase I Property, based on their separation distance.

First Developed Use Determination

Based on the historical review and interview with the current landowner, the majority of the Phase I Property was used for agricultural purposes. A barn was constructed on-site circa 1989. Three residential dwellings have been occupying the Phase I Property since the late 1980s.

Previous Engineering Reports

- ❑ "Phase I Environmental Site Assessment, 6115 Flewellyn Road" prepared by Paterson Group, dated November 6, 2020.

The 2020 Phase I ESA was conducted for the western portion of the Phase I property addressed 6115 Flewellyn Road. At the time of the original Phase I ESA, the Phase I Property was vacant. The historical search indicated that the Phase I Property was used historically for agricultural purposes. A metal barn, situated on the southern portion of the Phase I property was constructed on-site circa 1989, and otherwise remained undeveloped. The neighbouring lands were also vacant and undeveloped until the early 1990s, when residential development occurred to the north and west of the Phase I property. No off-site potentially contaminating activities (PCAs) were identified within the Phase I ESA Study Area and as such, no areas of potential environmental concern (APECs) have been identified. A site inspection was conducted to assess any existing potential areas of concern. A small metal outbuilding is situated on the southern portion of the site, which is used to store a small tractor. No potential environmental concerns were identified with the use of the Phase I property or adjacent properties. A Phase II ESA was not recommended.

- ❑ "Phase I Environmental Site Assessment, Flewellyn Road, Lot 1715" prepared by Paterson Group, dated December 11, 2020.

A Phase I ESA was conducted in 2020 for the portion addressed 6070 Fernbank Road. At the time of the original Phase I ESA, the Phase I Property was vacant. The Phase I ESA indicated that the Phase I property was used for agricultural purposes with no formal

development or structures occupying the Phase I property. The neighbouring lands remained undeveloped until the early 1990s, when residential development occurred to the north and west of the Phase I property. No off-site potentially contaminating activities (PCAs) were identified within the Phase I ESA Study Area and as such, no areas of potential environmental concern (APECs) have been identified. A site inspection was conducted to assess any existing potential areas of concern. The majority of the Phase I Property was vacant treed land with a small, cleared section along the eastern property line, immediately east of a hydro transmission line. No potential environmental concerns were identified with the use of the Phase I property or adjacent properties. A Phase II ESA was not recommended.

- ❑ “Phase I Environmental Site Assessment, 5993 Flewellyn Road” prepared by Paterson Group, dated October 4, 2021.

A Phase I ESA was conducted in 2021 for the portion addressed 5993 Flewellyn Road. At the time of the original Phase I ESA, the Phase I Property was vacant. The Phase I ESA indicated that the Phase I property was used for agricultural purposes since at least 1975. The neighbouring lands were historically consisted of agricultural or other use (vacant / treed) land, with occasional residential dwellings and farmsteads. More recently, residential dwellings have been constructed north and west of the Phase I property, as well as a stormwater management pond west of the Phase I property. A site inspection was conducted to assess any existing potential areas of concern. The site contained three (3) high voltage hydro towers as part of a hydro corridor, extending north-south through the Phase I property. The site was comprised of brush, cleared vegetation, and agricultural land, with a hydro corridor extending north-south through the Phase I property. Some development generated material (crushed stone, topsoil) was present on the western portion of the Phase I property from adjacent construction activities but was not considered to represent a potential environmental concern to the Phase I property. No potential environmental concerns were identified with the use of the Phase I property or adjacent properties. A Phase II ESA was not recommended.

Environment Canada

A search of the National Pollutant Release Inventory (NPRI) was conducted electronically on May 7, 2026. The Phase I property and adjacent properties were not listed in the NPRI database. No records of pollutant release were listed in the database for properties located within the Phase I study area.

Ministry of the Environment, Conservation and Parks (MECP) Instruments

A request was submitted to the MECP Freedom of Information (FOI) office for information with respect to certificates of approval, permits to take water, certificates of property use or any other similar MECP issued instruments for the site. A response from the MECP

indicated that multiple Environmental compliance approvals, Municipal and Private Sewage Works and approval to take water records were found for the Phase I property. Due to the nature of these records, they are not considered to pose a potential environmental concern to the Phase I Property.

An FOI request was submitted for the properties located at 5971, 6141 and 6159 Flewellyn Road. A response was not received prior to issuance of this letter. Should the response contain pertinent information, it will be forwarded to the client upon receipt.

MECP Submissions

A request was submitted to the MECP FOI office for information with respect to reports related to environmental conditions for the property. A response from the MECP indicated that no records were found for the Phase I property.

An FOI request was submitted for the properties located at 5971, 6141 and 6159 Flewellyn Road. A response was not received prior to issuance of this letter. Should the response contain pertinent information, it will be forwarded to the client upon receipt.

MECP Incident Reports

A request was submitted to the MECP FOI office for information with respect to records concerning environmental incidents, orders, offences, spills, discharges of contaminants or inspections maintained by the MECP for the site or adjacent properties. A response from the MECP indicated that no records were found for the Phase I property.

An FOI request was submitted for the properties located at 5971, 6141 and 6159 Flewellyn Road. A response was not received prior to issuance of this letter. Should the response contain pertinent information, it will be forwarded to the client upon receipt.

MECP Waste Management Records

A request was submitted to the MECP FOI office for information with respect to waste management records. A response from the MECP indicated that no records were found for the Phase I property.

An FOI request was submitted for the properties located at 5971, 6141 and 6159 Flewellyn Road. A response was not received prior to issuance of this letter. Should the response contain pertinent information, it will be forwarded to the client upon receipt.

MECP Coal Gasification Plant Inventory

The Ontario Ministry of Environment document titled "Municipal Coal Gasification Plant Site Inventory, 1991" was reviewed to reference the locations of former plants with respect to the site. No Municipal Coal Gasification Plant Sites are located within the Phase I study area.

An FOI request was submitted for the properties located at 5971, 6141 and 6159 Flewellyn Road. A response was not received prior to issuance of this letter. Should the response contain pertinent information, it will be forwarded to the client upon receipt.

MECP Brownfields Environmental Site Registry

A search of the MECP Brownfields Environmental Site Registry was conducted as part of this assessment for the site, neighbouring properties, and the general area of the site. No Records of Site Condition (RSCs) were filed for the Phase I property or adjacent properties.

Areas of Natural Significance

A search for areas of natural and scientific interest situated within the Phase I study area was conducted electronically via the Ontario Ministry of Natural Resources and Forestry (OMNRF) website. The search did not identify any natural features or areas of natural significance within the Phase I study area.

Technical Standards and Safety Authority (TSSA)

The TSSA, Fuels Safety Branch in Toronto, was contacted electronically on July 5, 2024 and on May 6, 2025 to inquire about current and former underground storage tanks for the site and neighbouring properties. No records are listed in the TSSA registry for the Phase I property or neighbouring properties. The response from the TSSA is appended to this report.

City of Ottawa Landfill Document

The document entitled "Old Landfill Management Strategy, Phase I-Identification of Sites, City of Ottawa", was reviewed. No former landfill sites were identified within the Phase I study area.

City of Ottawa Historical Land Use Inventory (HLUI)

A requisition was sent to the City of Ottawa to request information from the City's Historical Land Use Inventory database for the Phase I property. A response had not been received at the time of issuing this report. A copy of the HLUI search results will be forwarded to the client. A copy of the response has been included in the Appendix.

The HLUI Responses from the 2020 and 2021 were obtained and reviewed as part of the Phase I ESA. The HLUI response letters indicated that no activities were associated with the subject and surrounding properties within 250m.

ERIS Database Report

A database report, prepared by ERIS (Environmental Risk Information Services) Ltd., dated July 4, 2024, was acquired and reviewed as part of this assessment. The complete ERIS reports have been included in the attachments.

❑ *On-Site Records:*

The ERIS report identified thirteen (13) records pertaining to the Phase I Property, four Eris Historical Search, one Permit to Take Water and eight Environmental Compliance Approvals (ECAs) associated with a Municipal and Private Sewer Works for the Phase I Property. Due to the nature of these records, they are not considered to pose a potential environmental concern to the Phase I Property.

❑ *Off-Site Records:*

Forty-three (43) records were identified within the Phase I study area, including borehole records, environmental compliance approvals, ERIS historical searches, and water well records. Environmental compliance approvals were limited to municipal and private sewage works. Well records included domestic water wells and livestock wells associated with nearby residential dwellings and farmsteads from 1959 to 2002, as well as geological / geotechnical monitoring well records from 2012 to 2018 associated with nearby residential development. One spill and pipeline incident were identified at 884 Stallion Crescent, approximately 130m north of the Phase I Property. No potentially contaminating activities were identified in the ERIS reports.

The new parcel is included in the study area in the original ERIS Report, therefore a new ERIS is not required.

Aerial Photographs

The latest aerial images in the 2020 & 2021 Phase I ESAs report were from 2017 and 2019. No significant changes were identified with respect to the Phase I or neighbouring properties since the time of the 2017 and 2019 aerial photographs.

Topographic Maps

Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. Topographic maps were obtained from Natural Resources Canada – The Atlas of Canada website and from the City of Ottawa website. The topographic maps indicate that the regional topography in the general area

of the site is relatively flat and sloping gently downward towards the east. An illustration of the referenced topographic map is presented on Figure 2 – Topographic Map, appended to this report.

Physiographic Maps

A Physiographic Map was reviewed from the Natural Resources Canada - The Atlas of Canada website. According to this physiographic map, the site is located in the St. Lawrence Lowlands. According to the mapping description provided: “The lowlands are plain-like areas that were all affected by the Pleistocene glaciations and are therefore covered by surficial deposits and other features associated with the ice sheets.” The Phase I property is located in the Central St. Lawrence Lowland, “where the land is rarely more than 150 m above sea level, except for the Monteregian Hills, which consist of intrusive igneous rocks”.

Geological Maps

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock in the area of the site consists of interbedded limestone and dolomite of the Gull River Formation and limestone of the Bobcaygeon Formation. Overburden soils are reported as plain till with drift thickness on the order of 0 to 5m over the majority of the Phase I Property. Drift thicknesses up to 10m are reported along the southern portion of the property.

Water Well Records

A search of the MECP website returned 32 well records identified in the Phase I study area, including domestic drinking wells, abandonment records and geotechnical test holes. The majority of the records (30) pertain to domestic drinking wells and livestock wells drilled between 1959 and 2002 for nearby residential dwellings / farmsteads, with some associated abandonment records, as well as two (2) test holes (observation monitoring wells) for geologic assessment purposes.

According to the well records, the stratigraphy in the Phase I study area generally consisted of a shallow sandy till material overlaying grey limestone and shale bedrock. No concerns were identified during the well record review.

Property Owner Representative Interview

Mr. Daniel Rokin, of Caivan Communities, was interviewed as part of this update. Mr. Rokin was unaware of any potential environmental concerns on the subject and neighbouring properties.

The current owner of 5971 Flewellyn Road was interviewed as part of this update. He indicated that the residential dwelling was constructed in 1998 and the residence was

previously heated by an above ground furnace oil storage tank that was located in the basement. He also mentioned that the tank was removed approximately 12 years ago.

Site Reconnaissance

Three site reconnaissance visits were conducted on July 4, 2024, March 26, 2025 and May 1, 2026. Weather conditions were overcast, with temperatures of approximately 30°C, 0°C, and 15°C. Mr. Mohammed Ramadan from the Environmental Department of Paterson Group conducted the site inspections. In addition to the site, the uses of neighbouring properties within the Phase I Study Area were also assessed at the time of the site visit.

Exterior Assessment

The parcels of lands addressed 5993, 6115 Flewellyn Road, 6070 Fernbank Road, 1770 and 1820 Shea Roads are currently vacant undeveloped lands with trees and light vegetation covering the site surface. A stormwater management pond is present on the central portion of the Phase I Property addressed as 59 Aridus Crescent. The Phase I property is transected by a hydro corridor, with three (3) high voltage hydro towers present on the Phase I property. A small, abandoned metal outbuilding is situated on the southwestern portion of the site. The outbuilding was constructed in 1989. Two residential dwellings are present on the southwestern corner of the Phase I Property and addressed 6141 and 6159 Flewellyn Road. One residential dwelling is present on the southeastern corner of the Phase I Property and addressed 5971 Flewellyn Road.

The parcel of land addressed 6141 Flewellyn Road is occupied by a two-storey residential apartment building with a full basement level. The building, constructed circa 1988, has a poured concrete foundation and is finished on the exterior with brick. The roof is sloped and covered with asphaltic shingles and is heated by natural gas furnace located in the basement.

The parcel of land addressed 6159 Flewellyn Road is occupied by a one-storey residential apartment building with a full basement level. The building, constructed circa 1989, has a poured concrete foundation and is finished on the exterior with brick. The roof is sloped and covered with asphaltic shingles and is heated by natural gas furnace located in the basement.

The parcel of land addressed 5971 Flewellyn Road is occupied by a one-storey residential apartment building with a full basement level. The building, constructed circa 1998, has a poured concrete foundation and is finished on the exterior with vinyl siding. The roof is sloped and covered with asphaltic shingles and is heated by propane.

Site topography is relatively flat with the southern portion of the Phase I Property slightly sloping down to the south. Site drainage consists of surficial infiltration and sheet flow to onsite drainage ditches and storm management pond.

No evidence of spills or staining was observed during the site visit. No ASTs or evidence of USTs was observed on the exterior of the Phase I property.

No evidence of railway lines was noted on the Phase I property. No concerns with respect to chemical storage or waste disposal were observed on the Phase I property. There were no unidentified substances observed on the exterior of the Phase I property.

A depiction of the Phase I property is illustrated on Drawing number PE5472-3R – Site Plan, appended to this report.

Interior Assessment

6141 Flewellyn Road

A general description of the interior of the residential building is as follows:

For the residential dwelling located at 6141 Flewellyn Road, the floors consist of a combination of ceramic tiles, hardwood and concrete in the basement. The walls consisted primarily of drywall, ceramic tile and concrete in the basement. The ceilings consist of drywall and decorative plaster. Lighting throughout the building was provided by LED and fluorescent fixtures. The storage sheds were finished by wood and have asphalt shingles roofs.

Potentially Hazardous Building Materials

Based on the age of the residential structure (1988), asbestos containing building materials and lead-based paints are not expected to be present within the building.

Polychlorinated Biphenyls (PCBs)

Based on the age of the residential structure (1988), No sources of PCBs are expected to be present in the subject structure at the time of the site inspection.

Urea Formaldehyde Foam Insulation (UFFI)

Based on the age of the residential structure (1988), UFFI is not expected to be present within the building.

Fuels and Chemical Storage

No aboveground fuel storage tanks or signs of underground fuel storage tanks were observed within the subject building at the time of the site inspection. Chemical products identified in the residential building were observed to be limited to domestically available cleaning products, stored properly in their original containers.

Ozone Depleting Substances (ODSs)

Potential sources of ODSs observed on site include fire extinguishers, refrigerators, and freezers. These appliances and equipment appeared to be in good condition and should be regularly serviced by a licensed contractor.

Wastewater Discharges

Wastewater from the residential building (wash water and sewage) is discharged into a private septic system. Roof drainage is discharged via surface run-off towards drainage ditches located at Flewellyn Road. A sump pit was observed in the basement, the water was observed to be clear with no staining or odour noted. No concerns were identified with respect to wastewater discharge on the subject site.

6159 Flewellyn Road

A general description of the interior of the residential building is as follows:

For the residential dwelling located at 6159 Flewellyn Road, the floors consist of a combination of ceramic tiles, hardwood and concrete in the basement. The walls consisted primarily of drywall, ceramic tile and concrete in the basement. The ceilings consist of drywall and decorative plaster. Lighting throughout the building was provided by LED and fluorescent fixtures.

Potentially Hazardous Building Materials

Based on the age of the residential structure (1989), asbestos containing building materials and lead-based paints are not expected to be present within the building.

Polychlorinated Biphenyls (PCBs)

Based on the age of the residential structure (1998), No sources of PCBs are expected to be present in the subject structure at the time of the site inspection.

Urea Formaldehyde Foam Insulation (UFFI)

Based on the age of the residential structure (1989), UFFI is not expected to be present within the building.

Fuels and Chemical Storage

No aboveground fuel storage tanks or signs of underground fuel storage tanks were observed within the subject building at the time of the site inspection. Chemical products identified in the residential building were observed to be limited to domestically available cleaning products, stored properly in their original containers.

Ozone Depleting Substances (ODSs)

Potential sources of ODSs observed on site include fire extinguishers, refrigerators, and freezers. These appliances and equipment appeared to be in good condition and should be regularly serviced by a licensed contractor.

Wastewater Discharges

Wastewater from the residential building (wash water and sewage) is discharged into a private septic system. Roof drainage is discharged via surface run-off towards drainage ditches located at Flewellyn Road. A sump pit was observed in the basement, the water was observed to be clear with no staining or odour noted. No concerns were identified with respect to wastewater discharge on the subject site.

5971 Flewellyn Road

A general description of the interior of the residential building is as follows:

For the residential dwelling located at 5971 Flewellyn Road, the floors consist of a combination of vinyl and ceramic tiles, hardwood and concrete in the basement. The walls consisted primarily of drywall, ceramic tile and concrete in the basement. The ceilings consist of drywall and plaster. Lighting throughout the building was provided by LED and fluorescent fixtures.

Potentially Hazardous Building Materials

Based on the age of the residential structure (1998), asbestos containing building materials and lead-based paints are not expected to be present within the building.

Polychlorinated Biphenyls (PCBs)

Based on the age of the residential structure (1998), No sources of PCBs are expected to be present in the subject structure at the time of the site inspection.

Urea Formaldehyde Foam Insulation (UFFI)

Based on the age of the residential structure (1998), UFFI is not expected to be present within the building.

Fuels and Chemical Storage

No signs of underground fuel storage tanks were observed within the subject building at the time of the site inspection. The locations of former vent and fill pipes, indicating the presence of a former aboveground storage tank (AST), were observed in the basement of the building. The AST was historically used for furnace oil storage.

No unusual visual or olfactory observations were noted at the former AST location during the site visit. Water within the sump pit was observed to be clear, with no evidence of staining or petroleum-related odours.

Based on these observations, the former aboveground furnace oil storage tank is not considered to represent a potential environmental concern for the subject site. The soil in the vicinity of the former aboveground furnace oil tank will be investigated and managed as part of the excess soil program.

Chemical products identified in the residential building were observed to be limited to domestically available cleaning products, stored properly in their original containers.

Ozone Depleting Substances (ODSs)

Potential sources of ODSs observed on site include fire extinguishers, refrigerators, and freezers. These appliances and equipment appeared to be in good condition and should be regularly serviced by a licensed contractor.

Wastewater Discharges

Wastewater from the residential building (wash water and sewage) is discharged into a private septic system. Roof drainage is discharged via surface run-off towards drainage ditches located at Flewellyn Road. A sump pit was observed in the basement, the water was observed to be clear with no staining or odour noted. No concerns were identified with respect to wastewater discharge on the subject site.

Neighbouring Land Use

Neighbouring land use in the Phase I Study Area is primarily residential. No PCAs were identified within the Phase I Study Area. Current land use within the Phase I Study Area is illustrated on Drawing: PE5472-2R – Surrounding Land Use Plan in the Figures section of this report, following the text.

Review and Evaluation of Information

Land Use History

Based on the historical review and interview with the current landowner, the majority of the Phase I Property was used for agricultural purposes. A barn was constructed on-site circa 1989. Three residential dwellings have occupied the Phase I Property since the late 1980s.

Potentially Contaminating Activities and Areas of Potential Environmental Concern

No potentially contaminating activities (PCAs) were identified within the Phase I ESA Study Area and as such, there are no areas of potential environmental concern (APECs).

A former furnace oil AST was identified to have been present in the basement of 5971 Flewellyn Road. The property owner did not identify any spills, leaks, or issues relating to the tank. Based on a visual inspection of the area of the former AST, the former presence of the AST is not considered to represent an environmental concern.

Contaminants of Potential Concern

No Contaminants of Potential Concern (CPCs) were identified on the Phase I Property.

Conceptual Site Model

Geological and Hydrogeological Setting

The Geological Survey of Canada website on the Urban Geology of the National Capital Area was consulted as part of this assessment. Based on this information, bedrock in the area of the site consists of interbedded limestone and dolomite of the Gull River Formation and limestone of the Bobcaygeon Formation. Overburden soils are reported as plain till with drift thickness on the order of 0 to 5m over the majority of the Phase I Property. Drift thicknesses up to 10m are reported along the southern portion of the property.

Existing Buildings and Structures

The Phase I property contains six (6) high voltage hydro towers (part of a hydro corridor). A small, abandoned metal barn is situated on the southwestern portion of the site.

The parcel of land addressed 6141 Flewellyn Road is occupied by a two-storey residential apartment building with a full basement level. The building, constructed circa 1988, has a poured concrete foundation and is finished on the exterior with brick. The roof is sloped and covered with asphaltic shingles and is heated by natural gas furnace located in the basement.

The parcel of land addressed 6159 Flewellyn Road is occupied by a one-storey residential apartment building with a full basement level. The building, constructed circa 1989, has a poured concrete foundation and is finished on the exterior with brick. The roof is sloped and covered with asphaltic shingles and is heated by natural gas furnace located in the basement.

The parcel of land addressed 5971 Flewellyn Road is occupied by a one-storey residential apartment building with a full basement level. The building, constructed circa 1998, has a poured concrete foundation and is finished on the exterior with vinyl siding. The roof is sloped and covered with asphaltic shingles and is heated by propane.

Water Bodies

The nearest named body of water is Faulkner Municipal Drain. The site is also situated adjacent to a stormwater management pond (west) as part of nearby residential development.

Areas of Natural Significance

No areas of natural significance were identified on the Phase I Property or within the Phase I Study Area.

Drinking Water Wells

Three water wells are present on the Phase I Property on the residential dwellings' properties.

Neighbouring Land Use

Neighbouring land use in the Phase I study area consists of residential properties. Land use is shown on Drawing number PE5472-4R- Surrounding Land Use Plan

Potentially Contaminating Activities and Areas of Potential Environmental Concern

As per Section 7.1 of this report, no APECs were identified on the Phase I property or in the Phase I study area.

Assessment of Uncertainty and/or Absence of Information

The absence of APECs within the Phase I study area was confirmed by a variety of independent sources. As such, the conclusions of this report are not affected by uncertainty which may be present with respect to the individual sources.

Conclusions

Based on the results of this Phase I ESA Update, **it is our opinion, that a Phase II Environmental Site Assessment is not required for the property.**

Statement of Limitations

This Phase I - Environmental Site Assessment Update report has been prepared under the supervision of a Qualified Person in general accordance with the agreed scope-of-work and O.Reg. 153/04. The conclusions presented herein are based on information gathered from a historical review and field inspection program.

The findings of the Phase I ESA Update are based on a review of readily available geological, historical and regulatory information and a cursory review made at the time of the field assessment. The historical research relies on information supplied by others, such as local, provincial, and federal agencies and was limited within the scope-of-work, time, and budget of the project herein.

Should any conditions be encountered at the Phase I Property and/or historical information that differ from our findings, we request that we be notified immediately in order to allow for a reassessment.

This report was prepared for the sole use of Caivan (Stittsville South) Inc. Permission and notification from Caivan (Stittsville South) Inc. and this firm will be required to release this report to any other party.

We trust that this submission satisfies your current requirements. Should you have any questions please contact the undersigned.

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

storm and sanitary sewers to be constructed in the City of Ottawa as follows;

- sanitary sewers on Parade Drive (from Station 10+080 to Station 11+527), Campolina Way (from Station 50+014 to Station 50+625), Falabella Street (from Station 20+059 to Station 20+137), Quarterhorse Street (from Station 30+012 to Station 30+131), Hartsmere Drive (from Station 120+043 to Station 120+150), Lipizzaner Street (from Station 40+022 to Station 40+140), Stallion Crescent (from Station 60+010 to Station 60+511), Pedigree Street (from Station 70+010 to Station 70+129), Manege Street (from Station 80+010 to Station 80+128), Beckett Crescent (from Station 90+010 to Station 90+346), Hickstead Drive (from Station 100+042 to Station 100+570), Cavallo Street (from Station 130+009 to Station 130+151), Davidson Street 11 (from Station 113+906 to Station 114+144); and
- storm sewers on Parade Drive (from Station 10+068 to Station 11+528), Campolina Way (from Station 50+015 to Station 50+624), Falabella Street (from Station 20+060 to Station 20+138), Quarterhorse Street (from Station 30+014 to Station 30+132), Hartsmere Drive (from Station 120+045 to Station 120+152), Lipizzaner Street (from Station 40+021 to Station 40+142), Stallion Crescent (from Station 60+012 to Station 60+509), Pedigree Street (from Station 70+012 to Station 70+130), Manege Street (from Station 80+011 to Station 80+130), Beckett Crescent (from Station 90+012 to Station 90+344), Hickstead Drive (from Station 100+040 to Station 100+513), Cavallo Street (from Station 130+011 to Station 130+153), Block 362 (across Hickstead Drive), and Block 363 (from Station 115+210 to Station 115+258), Block 364 (along southern property line west of Lot 266);

all in accordance with the application from Stittsville South Inc. and 1384341 Ontario Ltd., dated March 3, 2016,

including final plans and specifications prepared by Novatech Engineering Consultants Ltd.

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall state:

1. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The environmental compliance approval number;
6. The date of the environmental compliance approval;
7. The name of the Director, and;
8. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*
Environmental Review Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario
M5G 1E5

AND

The Director appointed for the purposes of
Part II.1 of the Environmental Protection Act
Ministry of the Environment and
Climate Change
135 St. Clair Avenue West, 1st Floor
Toronto, Ontario
M4V 1P5

*** Further information on the Environmental Review Tribunal's requirements for an appeal can be obtained directly from the Tribunal at: Tel: (416) 212-6349, Fax: (416) 326-5370 or www.ert.gov.on.ca**

The above noted activity is approved under s.20.3 of Part II.1 of the Environmental Protection Act.

DATED AT TORONTO this 13th day of October, 2016

Gregory Zimmer, P.Eng.
Director
appointed for the purposes of Part II.1 of the
Environmental Protection Act

AF/

c: District Manager, MOECC Ottawa
M. Rick O'Connor, City Clerk, City of Ottawa

Linda Carkner, Program Manager, City of Ottawa
Bassam Bahia, P. Eng., Novatech Engineering Consultants Ltd.

ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 3415-ADQLJG
Issue Date: September 21, 2016

Stittsville South Inc. and 1384341 Ontario Ltd.
1737 Woodward Drive, 2nd Floor
Ottawa, Ontario
K2C 0P9

Site Location: Stittsville South Area 6 Sanitary Pumping Station
5970 Fernbank Road and part of 5993 Flewellyn Road
City of Ottawa, Ontario

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

Sanitary Pump Station and Forcemain

- one (1) 3000 mm diameter and 8.65 metre deep wet well with provision for three (3) submersible non-clog wastewater pumps, each pump designed for 42 litres/second at a Total Dynamic Head (TDH) of 29 metres, complete with trash basket, pipe rails, level regulation, force air blower unit and appurtenances;
- two (2) pumps will be initially installed with each pump capable of delivering 42 litres/second at a TDH of 29 metres for an initial firm capacity of 42 litres/second;
- the third pump will be added through an amendment to the ECA once development flows approach 42 litres/second to bring the pump station to its ultimate firm capacity of 84 litres/second;
- approximately 870 metres of dual 200 mm diameter HDPE DR13.5 sanitary forcemains originating at the pump station control building and terminating at the existing sanitary sewer on Fernbank Road;
- one (1) 2400 mm x 1800 mm concrete discharge manhole, complete with Swab Catcher, replacing the existing sanitary MH 401 on Fernbank Road. Dual forcemains will discharge to this new manhole;
- pump station control building complete with mechanical and electrical systems, process piping, valves, control panels, SCADA system, odour control system, swab launchers and appurtenances;

- one (1) 170 KW self-enclosed diesel generator (to be registered under Environmental Activity and Sector Registry (EASR)) on a reinforced concrete pad adjustment to the pump station control building complete with diesel fuel tank, valves and controls;
- one (1) 2400 mm x 1800 mm concrete by-pass chamber complete with valves, couplings and appurtenances;

Sanitary Sewers Pump Station

- approximately 4.8 metres of 450 mm diameter sanitary sewer @ 2.55% from Sanitary MH 99 to wet well;
- approximately 18 metres of 200 mm diameter sanitary forcemain HDPE 13.5 from SAN MH 99 to By-pass Chamber;
- approximately 18.7 metres of 600 mm diameter sanitary sewer from SAN MH 99 to SAN MH 97;

Interim Emergency Sanitary Sewer Overflow

approximately 26.6 metres of 250 mm diameter sanitary sewer from sanitary MH 97 to the existing Faulkner Ditch. Elevation of emergency overflow in sanitary MH 97 is 104.27m;

Permanent Emergency Sanitary Sewer Overflow

the permanent Emergency Sanitary Sewer Overflow will discharge to the future Davidson Stormwater Management Facility which is anticipated to be constructed within the next 2-4 years;

- the permanent emergency sanitary sewer overflow will consist of 3 metres of 600 mm diameter sewer from sanitary MH 97 to the future stormwater management facility. The elevation of the emergency overflow in MH 97 is 103.40m;
- provision to adjust the elevation of the permanent emergency sanitary overflow in MH 97 within a range of 102.80m to 103.70m based on the final 100-year water level in the future Davidson Stormwater Management Facility;
- one (1) primary measuring device in MH 97 consisting of a broad crest weir complete with ultrasonic level recorder;
- once permanent emergency sanitary sewer overflow is established, the interim overflow will be abandoned;

including erosion/sedimentation control measures during construction and all other controls and appurtenances essential for the proper operation of the aforementioned Works;

all in accordance with the application from the Stittsville South Inc. and 1384341 Ontario Ltd., dated March 03, 2016, and all other supporting documents, final plans and specifications prepared by Novatech.

For the purpose of this environmental compliance approval, the following definitions apply:

"Approval" means this entire document including the application and any supporting documents listed in any schedules in this Approval;

"BOD5" (also known as TBOD5) means five day biochemical oxygen demand measured in an unfiltered sample and includes carbonaceous and nitrogenous oxygen demand;

"Director" means a person appointed by the Minister pursuant to section 5 of the Environmental Protection Act for the purposes of Part II.1 of the Environmental Protection Act;

"E. Coli" refers to the thermally tolerant forms of Escherichia that can survive at 44.5 degrees Celsius;

"Emergency Situation" means a structural, mechanical or electrical failure that causes a temporary reduction in the capacity of the sanitary sewage pumping station or an unforeseen flow condition that may result in:

- a) danger to the health or safety of any person; or
- b) injury or damage to any property, or serious risk of injury or damage to any property.

"EPA" means the Environmental Protection Act, R.S.O. 1990, c.E.19, as amended;

"Event" in the context the sanitary sewage pumping station located outside a Sewage Treatment Plant, means an action or occurrence, at the sanitary sewage pumping station that causes a Sewage Pumping Station Overflow. An Event ends when there is no recurrence of a Sewage Pumping Station Overflow in the 12-hour period following the last Sewage Pumping Station Overflow. Two Events are separated by at least 12 hours during which there has been no recurrence of a Sewage Pumping Station Overflow;

"Limited Operational Flexibility" (LOF) means the modifications that the Owner is permitted to make to the Works under this Approval;

"Ministry" means the ministry of the government of Ontario responsible for the Environmental Protection Act and the Ontario Water Resources Act and includes all officials, employees or other persons acting on its behalf;

"Notice of Modifications" means the form entitled "Notice of Modifications to Sewage Works" included in Schedule "A";

"Owner" means the Stittsville South Inc. and 1384341 Ontario Ltd., and includes their successors and assignees;

"Professional Engineer" means a person entitled to practise as a Professional Engineer in the Province of Ontario under a licence issued under the Professional Engineers Act;

"Sewage Pumping Station Overflow" means any discharge from a sanitary sewage pumping station located outside a Sewage Treatment Plant that does not undergo any treatment or only receives partial treatment before it is discharged to the environment;

"Substantial Completion" has the same meaning as "substantial performance" in the Construction Lien Act;

"Water Supervisor" means the person appointed as Water Supervisor of the Ottawa office of the Ministry;

"Works" means the sewage works described in the Owner's application(s) and this Approval.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL PROVISIONS

(1) The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the Conditions herein and shall take all reasonable measures to ensure any such person complies with the same.

(2) The designation of the The City of Ottawa as the operating authority of the site on the application for approval of the Works does not relieve the Owner from the responsibility of complying with any and all of the Conditions of this Approval.

(3) Except as otherwise provided by these Conditions, the Owner shall design, build, install, operate and maintain the Works in accordance with the description given in this Approval, and the application for approval of the Works.

(4) Where there is a conflict between a provision of any submitted document referred to in this Approval and the Conditions of this Approval, the Conditions in this Approval shall take precedence, and where there is a conflict between the listed submitted documents, the document bearing the most recent date shall prevail.

(5) Where there is a conflict between the listed submitted documents, and the application, the application shall take precedence unless it is clear that the purpose of the document was to amend the application.

(6) The Conditions of this Approval are severable. If any Condition of this Approval, or the application of any requirement of this Approval to any circumstance, is held invalid or unenforceable, the application of such Condition to other circumstances and the remainder of this Approval shall not be affected thereby.

(7) The issuance of, and compliance with the Conditions of this Approval does not:

- (a) relieve any person of any obligation to comply with any provision of any applicable statute, regulation or other legal requirement, including, but not limited to, the obligation to obtain approval from the local conservation authority necessary to construct or operate the sewage Works;
- or

(b) limit in any way the authority of the Ministry to require certain steps be taken to require the Owner to furnish any further information related to compliance with this Approval.

2. EXPIRY OF APPROVAL

(1) This Approval will cease to apply to those parts of the new Works which have not been constructed within **five (5) years** of the date of this Approval.

3. CHANGE OF OWNER

(1) The Owner shall notify the Director, in writing, of any of the following changes within **thirty (30) days** of the change occurring:

(a) change of Owner;

(b) change of address of the Owner;

(c) change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the Business Names Act, R.S.O. 1990, c. B17 shall be included in the notification to the Director;

(d) change of name of the corporation where the Owner is or at any time becomes a corporation, and a copy of the most current information filed under the Corporations Information Act, R.S.O. 1990, c. C39 shall be included in the notification to the Director.

4. UPON SUBSTANTIAL COMPLETION OF THE SEWAGE PUMPING STATION

(1) Upon Substantial Completion of the sewage pumping station, the Owner shall prepare a statement, certified by a Professional Engineer, that the sewage pumping station was constructed in accordance with this Approval, and shall make the written statement available to the Ministry, upon request.

(2) Within **one (1) year** of Substantial Completion of the sewage pumping station, a set of as-built drawings showing the sewage pumping station "as constructed" shall be prepared. These drawings shall be kept up to date through revisions undertaken from time to time and a copy shall be retained at the sewage pumping station for the operational life of the sewage pumping station.

5. SEWAGE PUMPING STATION OVERFLOW

(1) Any Sewage Pumping Station Overflow is prohibited, except:

(a) in an Emergency Situation;

(b) where the Sewage Pumping Station Overflow is a direct and unavoidable result of a planned maintenance procedure, the Owner notified the Water Supervisor **fifteen (15) days** prior to the Sewage Pumping Station Overflow and the Water Supervisor has given written consent of the

Sewage Pumping Station Overflow; or,

(c) where the Sewage Pumping Station Overflow is planned for research or training purposes, the discharger notified the Water Supervisor **fifteen (15) days** prior to the Sewage Pumping Station Overflow and the Water Supervisor has given written consent of the Sewage Pumping Station Overflow.

(2) The Owner shall forthwith notify the Spills Action Centre (SAC) at 1-800-268-6060 or e-mail at moe.sac.moe@ontario.ca and the Medical Officer of Health of every Sewage Pumping Station Overflow Event. This notice shall include, at a minimum, the following information:

- (a) the date and time at which the Event(s) started,
- (b) duration of the Event(s);
- (c) the location of the Event(s);
- (d) the measured or estimated volume of the Event(s) (unless the Event(s) is/are ongoing); and
- (e) the reason for the Event (s).

(3) The Owner shall submit Sewage Pumping Station Overflow Event Reports to the Ministry's local office on an Annual basis, no later than forty-five (45) days following the end of the calendar year. Event Reports shall be in an electronic format specified by the Ministry. In each Event Report the Owner shall include, at a minimum, the following information on any Event(s) that occurred during the preceding year:

- (a) the date and time at which the Event(s) started,
- (b) duration of the Event(s);
- (c) the location of the Event(s);
- (d) the measured or estimated volume of the Event(s) (unless the Event(s) is/are ongoing); and
- (e) the reason for the Event(s).

(4) The Owner shall use best efforts to collect a representative sample consisting of a minimum of two (2) grab samples of the Sewage Pumping Station Overflow and have it analysed for parameters outlined in Table 1 of Condition 7 (2) using the protocols specified in Condition 7 (3), one at the beginning of the Event and the second approximately near the end of the Event, to best reflect the effluent quality of such Sewage Pumping Station Overflow.

(5) The Owner shall maintain a record of all Sewage Pumping Station Overflow(s), which shall contain, at a minimum, the types of information set out in Condition 5 (2 (a)) to 5 (2 (e)) in respect of each

6. OPERATION AND MAINTENANCE

(1) The Owner shall exercise due diligence in ensuring that, at all times, the Works and the related equipment and appurtenances used to achieve compliance with this Approval are properly operated and maintained. Proper operation and maintenance shall include effective performance, adequate funding, adequate operator staffing and training, including training in all procedures and other requirements of this Approval and the Act and regulations, adequate laboratory facilities, process controls and alarms and the use of process chemicals and other substances used in the Works.

(2) The Owner shall prepare an operations manual within **six (6) months** of Substantial Completion of the sewage pumping station, that includes, but not necessarily limited to, the following information:

- (a) operating procedures for routine operation of the sewage pumping station;
- (b) inspection programs, including frequency of inspection, for the sewage pumping station and the methods or tests employed to detect when maintenance is necessary;
- (c) repair and maintenance programs, including the frequency of repair and maintenance for the sewage pumping station;
- (d) procedures for the inspection and calibration of monitoring equipment;
- (e) a spill prevention control and countermeasures plan, consisting of contingency plans and procedures for dealing with equipment breakdowns, potential spills and any other abnormal situations, including notification of the Water Supervisor; and
- (f) procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.

(3) The Owner shall maintain the operations manual current and retain a copy at the location of the sewage pumping station for the operational life of the sewage pumping station. The Owner shall make the manual available to the Ministry, upon request.

(4) The Owner shall make all manuals, plans, records, data, procedures and supporting documentation available to the Ministry, upon request.

7. MONITORING AND RECORDING

The Owner shall, upon the issuance of this Approval, carry out the following monitoring program:

(1) All samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being

monitored.

(2) Samples shall be collected at the following sampling points, at the frequency specified, by means of the specified sample type and analysed for each parameter listed and all results recorded:

Table 1 - Monitoring during a Sewage Pumping Station Overflow Event (Samples to be collected from the Sewage Pumping Station Overflow sewer near the sewage pumping station)	
Sample Type	Grab
Parameters	BOD5, Total Suspended Solids, Total Phosphorus, E. Coli (E. Coli samples may be limited to overflows occurring between Apr 1 and Oct 31)

(3) The methods and protocols for sampling, analysis and recording shall conform, in order of precedence, to the methods and protocols specified in the following:

(a) the Ministry's Procedure F-10-1, "Procedures for Sampling and Analysis Requirements for Municipal and Private Sewage Treatment Works (Liquid Waste Streams Only), as amended from time to time by more recently published editions;

(b) the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions; and

(c) the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition), as amended from time to time by more recently published editions.

8. REPORTING

(1) **Fifteen (15) days** prior to the date of a planned Sewage Pumping Station Overflow being conducted pursuant to Condition 5 and as soon as possible for an unplanned Sewage Pumping Station Overflow, the Owner shall notify the Water Supervisor in writing of the pending start date, in addition to an assessment of the potential adverse effects on the environment and the duration of the Sewage Pumping Station Overflow.

(2) In addition to the obligations under Part X of the Environmental Protection Act, (which includes contacting the Spills Action Centre (SAC) at 1-800-268-6060 or e-mail at moe.sac.moe@ontario.ca), the Owner shall, within **ten (10) working days** of the occurrence of any reportable spill as defined in Ontario Regulation 675/98, Bypass or loss of any product, by-product, intermediate product, oil, solvent, waste material or any other polluting substance into the environment, (with the exception of a sanitary sewage discharged during an Event), submit a full written report of the occurrence to the Water Supervisor describing the cause and discovery of the spill or loss, clean-up and recovery measures taken, preventative measures to be taken and schedule of implementation.

(3) The Owner shall prepare and submit a report to the Water Supervisor on an annual basis. The reports shall contain the following information:

(a) a copy of all Notice of Modifications submitted to the Water Supervisor as a result of Schedule A, Section 1 (Limited Operational Flexibility) with a status report on the implementation of each modification;

(b) a report summarizing all modifications completed as a result of Schedule A, Section 3.

9. LIMITED OPERATIONAL FLEXIBILITY

(1) The Owner may make modifications to the Works in accordance with the Terms and Conditions of this Approval and subject to the Ministry's "Limited Operational Flexibility Criteria for Modifications to Sewage Works", included under Schedule "A" of this Approval, as amended.

(2) The sewage pumping station works proposed under Limited Operational Flexibility shall adhere to the design guidelines contained within the Ministry's publication "Design Guidelines for Sewage Works 2008", as amended.

(3) The Owner shall ensure at all times, that the sewage pumping station works, related equipment and appurtenances which are installed or used to achieve compliance are operated in accordance with all Terms and Conditions of this Approval.

(4) For greater certainty, the following are not permitted as part of Limited Operational Flexibility:

(a) Modifications to the sewage pumping station works that result in an increase of the Rated Capacity of the sewage pumping station works;

(b) Modifications to the sewage pumping station works that may adversely affect the approved effluent quality criteria or the location of the discharge/outfall;

(c) Modifications to the sewage pumping station works approved under s.9 of the EPA, and

(d) Modifications to the sewage pumping station works pursuant to an order issued by the Ministry.

(5) Implementation of Limited Operational Flexibility is not intended to be used for piecemeal measures that result in major alterations or expansions.

(6) If the implementation of Limited Operational Flexibility requires changes to be made to the Emergency Response, Spill Reporting and Contingency Plan, the Owner shall, as deemed necessary in consultation with the Water Supervisor, provide a revised copy of this plan for approval to the local fire services authority prior to implementing Limited Operational Flexibility.

(7) For greater certainty, any alteration made under the Limited Operational Flexibility may only be carried out after other legal obligations have been complied with including those arising from the Environmental Protection Act, Niagara Escarpment Planning and Development Act, Oak Ridges Moraine Conservation Act, Lake Simcoe Protection Act and Greenbelt Act.

(8) Prior to implementing Limited Operational Flexibility, the Owner shall complete a Notice of Modifications describing any proposed modifications to the sewage pumping station works and submit it to the Water Supervisor.

10. TEMPORARY EROSION AND SEDIMENT CONTROL

(1) The Owner shall install and maintain temporary sediment and erosion control measures during construction and conduct inspections once every **two (2) weeks** and after each significant storm event (a significant storm event is defined as a minimum of 25 mm of rain in any 24 hours period). The inspections and maintenance of the temporary sediment and erosion control measures shall continue until they are no longer required and at which time they shall be removed and all disturbed areas reinstated properly.

(2) The Owner shall maintain records of inspections and maintenance which shall be made available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

11. RECORD KEEPING

The Owner shall retain for a minimum of **five (5) years** from the date of their creation, all records and information related to or resulting from the operation and maintenance activities required by this Approval.

Schedule "A"

Limited Operational Flexibility Criteria for Modifications to Sewage Works

1. The modifications to a sewage pumping station approved under an Environmental Compliance Approval (Approval) that are permitted under the Limited Operational Flexibility (LOF), are outlined below and are subject to the LOF conditions in the Approval, and require the submission of the Notice of Modifications. If there is a conflict between the sewage pumping station works listed below and the Terms and Conditions in the Approval, the Terms and Conditions in the Approval shall take precedence.
 - 1.1 Sewage Pumping Stations
 - a. Adding or replacing equipment where new equipment is located within an existing sewage pumping station site, provided that the facility Rated Capacity is not exceeded and the existing flow process and/or treatment train are maintained, as applicable.
 - 1.2 Pilot Systems
 - a. Installation of pilot systems for new or existing technologies provided that:
 - i. any effluent from the pilot system is discharged to the inlet of the sewage pumping station or hauled off-site for proper disposal,
 - ii. any effluent from the pilot system discharged to the inlet of the sewage pumping station or sewage conveyance system does not significantly alter the composition/concentration of the influent sewage to be treated in the downstream process; and that it does not add any inhibiting substances to the downstream process, and
 - iii. the pilot system's duration does not exceed a maximum of two years; and a report with results is submitted to the Director and Water Supervisor three months after completion of the pilot project.
2. Sewage works that are exempt from section 53 of the OWRA by O. Reg. 525/98 continue to be exempt and are not required to follow the notification process under this Limited Operational Flexibility.
3. Normal or emergency operational modifications, such as repairs, reconstructions, or other improvements that are part of maintenance activities, including cleaning, renovations to existing approved sewage works equipment, provided that the modification is made with Equivalent Equipment, are considered pre-approved.
4. The modifications noted in section (3) above are not required to follow the notification protocols under Limited Operational Flexibility, provided that the number of pieces and description of the equipment as described in the Approval does not change.

Notice of Modification to Sewage Works

RETAIN COPY OF COMPLETED FORM AS PART OF THE ECA AND SEND A COPY TO THE WATER SUPERVISOR (FOR MUNICIPAL) OR DISTRICT MANAGER (FOR NON-MUNICIPAL SYSTEMS)

Part 1 – Environmental Compliance Approval (ECA) with Limited Operational Flexibility

(Insert the ECA's owner, number, issuance date and notice number, which should start with "01" and consecutive numbers thereafter)

ECA Number:	Issuance Date (mm/dd/yy):	Notice number (if applicable):
ECA Owner:		Municipality:

Part 2: Description of the modifications as part of the Limited Operational Flexibility

(Attach a detailed description of the sewage works)

Description shall include:

1. A detail description of the modifications and/or operations to the sewage works (e.g. sewage work component, location, size, equipment type/model, material, process name, etc.)
2. Confirmation that the anticipated environmental effects are negligible.
3. List of updated versions of, or amendments to, all relevant technical documents that are affected by the modifications as applicable, i.e. submission of documentation is not required, but the listing of updated documents is (design brief, drawings, emergency plan, etc.)

Part 3 – Declaration by Professional Engineer

I hereby declare that I have verified the scope and technical aspects of this modification and confirm that the design:

1. Has been prepared or reviewed by a Professional Engineer who is licensed to practice in the Province of Ontario;
2. Conforms with the Limited Operational Flexibility as per the ECA;
3. Has been designed consistent with Ministry's Design Guidelines, adhering to engineering standards, industry's best management practices, and demonstrating ongoing compliance with s.53 of the Ontario Water Resources Act; and other appropriate regulations.

I hereby declare that to the best of my knowledge, information and belief the information contained in this form is complete and accurate.

Name (Print):	PEO License Number:
Signature:	Date (mm/dd/yy):
Name of Employer:	

Part 4 – Declaration by Owner

I hereby declare that:

1. I am authorized by the Owner to complete this Declaration;

2. The Owner consents to the modifications and

3. These modifications to the sewage works are proposed in accordance with the Limited Operational Flexibility as described in the ECA.

4. The Owner has fulfilled all applicable requirements of the Environmental Assessment Act.

I hereby declare that to the best of my knowledge, information and belief the information contained in this form is complete and accurate.

Name of Owner Representative (Print)	Owner representative's title (Print)
Owner Representative's Signature	Date (mm/dd/yy)

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are built and operated in the manner in which they were described for review and upon which approval was granted. This Condition is also included to emphasize the precedence of Conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to approved Works and to ensure that any subsequent Owner of the Works is made aware of the Approval and continue to operate the Works in compliance with it.
4. Condition 4 is included to ensure that the sewage pumping station is constructed in accordance with the Approval and that record drawings of the sewage pumping station "as constructed" are maintained for future reference.
5. Conditions 5 and 7 are included to indicate that Sewage Pumping Station Overflow of untreated and/or partially treated sewage to the environment is prohibited, save in certain limited circumstances where the failure to do so could result in greater injury to the public interest than the Sewage Pumping Station Overflow itself, or where the Sewage Pumping Station Overflow can be limited or otherwise mitigated by handling it in accordance with an approved contingency plan. The notification and documentation requirements allow the Ministry to take action in an informed manner and will ensure the Owner is aware of the extent and frequency of Sewage Pumping Station Overflow Event(s).
6. Condition 6 is included to require that the Works be properly operated, maintained, funded, staffed and equipped such that the environment is protected and deterioration, loss, injury or damage to any person or property is prevented. As well, the inclusion of a comprehensive operations manual for the sewage pumping station governing all significant areas of operation, maintenance and repair is prepared, implemented and kept up-to-date by the Owner and made available to the Ministry. Such a manual is an integral part of the operation of the sewage pumping station. Its compilation and use should assist the Owner in staff training, in proper plant operation and in identifying and planning for contingencies during possible abnormal conditions. The manual will also act as a benchmark for Ministry staff when reviewing the Owner's operation of the Works.

7. Condition 8 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
8. Condition 9 is included to ensure that the Works are operated in accordance with the application and supporting documentation submitted by the Owner, and not in a manner which the Director has not been asked to consider. These Conditions are also included to ensure that a Professional Engineer has reviewed the proposed Modifications and attests that the Modifications are in line with that of Limited Operational Flexibility, and provide assurance that the proposed Modifications comply with the Ministry's requirements stipulated in the Terms and Conditions of this Approval, Ministry policies, guidelines, and industry engineering standards and best management practices.
9. Condition 10 is included as installation, regular inspection and maintenance of the temporary sediment and erosion control measures is required to mitigate the impact on the downstream receiving watercourse during construction, until they are no longer required.
10. Condition 11 is included to require that all records are retained for a sufficient time period to adequately evaluate the long-term operation and maintenance of the Works.

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall state:

1. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

3. The name of the appellant;
4. The address of the appellant;
5. The environmental compliance approval number;
6. The date of the environmental compliance approval;
7. The name of the Director, and;
8. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

The Secretary*
Environmental Review Tribunal
655 Bay Street, Suite 1500
Toronto, Ontario
M5G 1E5

AND

The Director appointed for the purposes of
Part II.1 of the Environmental Protection Act
Ministry of the Environment and
Climate Change

ENVIRONMENTAL COMPLIANCE APPROVAL

NUMBER 4076-B33QM5
Issue Date: August 20, 2018

Davidson Shea Properties Inc.
237 Somerset Street West
Ottawa, Ontario
K2P 0J3

Site Location: Davidson Lands Phase 1
5993 Flewellyn Road
Part of Lot 25, Concession 9
City of Ottawa

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

the establishment of wastewater infrastructure Works located in the City of Ottawa, consisting of the following:

- **storm sewers, sanitary sewers, and ditches** on Eldenwylde Drive (from Station 0+080 to Station 0+610), Block 159 (from Station 0+090 to Station 0+195), Hickstead Way (from Station 0+080 to Station 0+400), Aridus Crescent (from Station 0+253 to Station 0+465), Sendero Way (from Station 0+570 to Station 0+640), Block 162 (from Station 0+085 to Station 0+200), Maygrass Way (from Station 0+095 to Station 0+620), Kayenta Street (from Station 0+095 to Station 0+530), Jardiniere Street (from Station 0+095 to Station 0+745), Block 165 (from Station 0+105 to Station 0+355), Fernbank Road (from Station 113+395 to Station 113+410, from Station 113+479 to Station 113+509, and from Station 113+567 to Station 113+582), Block 165 Ditch (from Station 0+108 to Station 0+265), and a Ditch on the Lands adjacent to Jardiniere Street (from Station 0+435, approximately 24 metres left, extending approximately 190 metres in length to connect to an existing ditch); and

the establishment of stormwater management Works to serve the Davidson Lands Phase 1 Subdivision, located in the City of Ottawa, consisting of the following;

- **one (1) wet pond** for the treatment and disposal of stormwater runoff, to provide Enhanced Level water quality protection and to attenuate post-development peak flows. The proposed wet pond is located west of Shea Road, east of the existing West Wind Development, and south of Fernbank Road. It is completed with one (1) sediment forebay, and will serve a total drainage area of 40.62 hectares (37.55 hectares residential development, 3.07 hectares pond block) and provide an enhanced level (80% TSS) protection. The total depth is 3.25 metres from pond bottom to the invert of the emergency weir. The

permanent pool volume is 9054 cubic metres at an elevation of 101.500. The extended detention volume is 6478 cubic metres at an elevation of 102.100. The total storage volume during the 100-year storm is 32654 cubic metres at an elevation of 103.174. The 100-year pond outflow is 0.605 cubic metres per second, and the 100-year pond level is 103.174 metres. The outlet ditch extending from the stormwater management pond is approximately 135 metres in length; and

- **improvements to the Faulkner Municipal Drain Tributary** (approximately 330 metres) through modification by the realigning, deepening, and vegetating of municipal drain tributary and remediation of the tributary along the west area of the new stormwater management facility;

including erosion/sedimentation control measures during construction and all other controls and appurtenances essential for the proper operation of the aforementioned Works;

all in accordance with the submitted application and supporting documents listed in Schedule "A" forming part of this Approval.

For the purpose of this environmental compliance approval, the following definitions apply:

1. "Approval" means this entire document and any schedules attached to it, and the application;
2. "Director" means a person appointed by the Minister pursuant to section 5 of the EPA for the purposes of Part II.1 of the EPA;
3. "District Manager" means the District Manager of the appropriate local District Office of the Ministry, where the Works are geographically located;
4. "EPA" means the *Environmental Protection Act*, R.S.O. 1990, c.E.19, as amended;
5. "Ministry" means the ministry of the government of Ontario responsible for the EPA and OWRA and includes all officials, employees or other persons acting on its behalf;
6. "Owner" means Davidson Shea Properties Inc., and includes its successors and assignees;
7. "OWRA" means the *Ontario Water Resources Act*, R.S.O. 1990, c. O.40, as amended;
8. "Wet Event" means a rainfall event with a minimum of 15 millimetres of rain in a 24 hour period;
9. "Works" means the sewage Works described in the Owner's application, and this Approval.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and

conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL CONDITIONS

1. The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the conditions herein and shall take all reasonable measures to ensure any such person complies with the same.
2. Except as otherwise provided by these Conditions, the Owner shall design, build, install, operate and maintain the Works in accordance with the description given in this Approval, and the application for approval of the Works.
3. Where there is a conflict between a provision of any document in the schedule referred to in this Approval and the conditions of this Approval, the conditions in this Approval shall take precedence, and where there is a conflict between the documents in the schedule, the document bearing the most recent date shall prevail.
4. Where there is a conflict between the documents listed in Schedule "A" and the application, the application shall take precedence unless it is clear that the purpose of the document was to amend the application.
5. The conditions of this Approval are severable. If any condition of this Approval, or the application of any requirement of this Approval to any circumstance, is held invalid or unenforceable, the application of such condition to other circumstances and the remainder of this Approval shall not be affected thereby.

2. EXPIRY OF APPROVAL

1. This Approval will cease to apply to those parts of the Works which have not been constructed within five (5) years of the date of this Approval.
2. In the event that completion and commissioning of any portion of the Works is anticipated to be delayed beyond the specified expiry period, the Owner shall submit an application of extension to the expiry period, at least twelve (12) months prior to the end of the period. The application for extension shall include the reason(s) for the delay, whether there is any design change(s) and a review of whether the standards applicable at the time of Approval of the Works are still applicable at the time of request for extension, to ensure the ongoing protection of the environment.

3. CHANGE OF OWNER

1. The Owner shall notify the District Manager and the Director, in writing, of any of the following changes within thirty (30) days of the change occurring:

- a. change of Owner;
 - b. change of address of the Owner;
 - c. change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the *Business Names Act*, R.S.O. 1990, c.B17 shall be included in the notification to the District Manager; or
 - d. change of name of the corporation where the Owner is or at any time becomes a corporation, and a copy of the most current information filed under the *Corporations Information Act*, R.S.O. 1990, c. C39 shall be included in the notification to the District Manager.
2. In the event of any change in ownership of the Works, other than a change to a successor municipality, the Owner shall notify in writing the succeeding owner of the existence of this Approval, and a copy of such notice shall be forwarded to the District Manager and the Director.
3. The Owner shall ensure that all communications made pursuant to this condition refer to the number at the top of this Approval.

4. OPERATION AND MAINTENANCE

1. If applicable, any proposed storm sewers or other stormwater conveyance in this Approval can be constructed but not operated until the proposed stormwater management facilities in this Approval or any other Approval that are designed to service the storm sewers or other stormwater conveyance are in operation.
2. The Owner shall make all necessary investigations, take all necessary steps and obtain all necessary approvals so as to ensure that the physical structure, siting and operations of the Works do not constitute a safety or health hazard to the general public.
3. The Owner shall inspect and ensure that the design minimum liquid retention volume is maintained in the Works at all times, except when maintenance is required.
4. The Owner shall undertake an inspection of the condition of the Works, at least once a year, and undertake any necessary cleaning and maintenance to ensure that sediment, debris and excessive decaying vegetation are removed from the Works to prevent the excessive build-up of sediment, oil/grit, debris and/or decaying vegetation, to avoid reduction of the capacity and/or permeability of the Works, as applicable. The Owner shall also regularly inspect and clean out the inlet to and outlet from the Works to ensure that these are not obstructed.
5. The Owner shall construct, operate and maintain the Works with the objective that the effluent from the Works is essentially free of floating and settleable solids and does not

contain oil or any other substance in amounts sufficient to create a visible film, sheen, foam or discoloration on the receiving waters.

6. The Owner shall maintain a logbook to record the results of these inspections and any cleaning and maintenance operations undertaken, and shall keep the logbook at the Owner's administrative office for inspection by the Ministry. The logbook shall include the following:
 - a. the name of the Works; and
 - b. the date and results of each inspection, maintenance and cleaning, including an estimate of the quantity of any materials removed and method of clean-out of the Works.
7. The Owner shall prepare an operations manual prior to the commencement of operation of the Works that includes, but is not necessarily limited to, the following information:
 - a. operating and maintenance procedures for routine operation of the Works;
 - b. inspection programs, including frequency of inspection, for the Works and the methods or tests employed to detect when maintenance is necessary;
 - c. repair and maintenance programs, including the frequency of repair and maintenance for the Works;
 - d. contingency plans and procedures for dealing with potential spills and any other abnormal situations and for notifying the District Manager; and
 - e. procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.
8. The Owner shall maintain the operations manual current and retain a copy at the Owner's administrative office for the operational life of the Works. Upon request, the Owner shall make the manual available to Ministry staff.

5. TEMPORARY EROSION AND SEDIMENT CONTROL

1. The Owner shall install and maintain temporary sediment and erosion control measures during construction and conduct inspections once every two (2) weeks and after each significant storm event (a significant storm event is defined as a minimum of 25 mm of rain in any 24 hours period). The inspections and maintenance of the temporary sediment and erosion control measures shall continue until they are no longer required and at which time they shall be removed and all disturbed areas reinstated properly.
2. The Owner shall maintain records of inspections and maintenance which shall be made

available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

6. MONITORING AND RECORDING

1. The Owner shall, upon commencement of operation of the Works, carry out the following monitoring program:
 - a. All samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.
 - b. Samples shall be collected at the following sampling points, at the frequency specified, by means of the specified sample type and analyzed for each parameter listed and all results recorded, as outlined in Schedule "B".
 - c. The methods and protocols for sampling, analysis and recording shall conform, in order of precedence, to the methods and protocols specified in the following:
 - i. the Ministry's Procedure F-10-1, "Procedures for Sampling and Analysis Requirements for Municipal and Private Sewage Treatment Works (Liquid Waste Streams Only)", as amended from time to time by more recently published editions;
 - ii. the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions; and
 - iii. the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition), as amended from time to time by more recently published editions.

7. REPORTING

1. One (1) week prior to the start-up of the operation of the Works, the Owner shall notify the District Manager (in writing) of the pending start-up date.
2. The Owner shall, upon request, make all reports, manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.
3. The Owner shall prepare a performance report within ninety (90) days following the end of the period being reported upon, and submit the report(s) to the District Manager when requested. The first such report shall cover the first annual period following the commencement of operation of the Works and subsequent reports shall be prepared to

cover successive annual periods following thereafter. The reports shall contain, but shall not be limited to, the following information:

- a. a summary and interpretation of all monitoring data and an overview of the success and adequacy of the Works, including demonstration using the monitoring data that the appropriate level of quality control has been achieved;
- b. a description of any operating problems encountered and corrective actions taken;
- c. a summary of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of the Works, including an estimate of the quantity of any materials removed from the Works;
- d. a summary of the calibration and maintenance carried out on all monitoring equipment;
- e. a summary of any complaints received during the reporting period and any steps taken to address the complaints;
- f. a summary of all spill or abnormal discharge events; and
- g. any other information the District Manager requires from time to time.

8. RECORD KEEPING

1. The Owner shall retain for a minimum of five (5) years from the date of their creation, all records and information related to or resulting from the operation, maintenance and monitoring activities required by this Approval.

Schedule "A"

1. Application for Environmental Compliance Approval, dated April 4, 2018, received on July 16, 2018, submitted by Davidson Shea Properties Inc.;
2. Transfer of Review Letter of Recommendation, dated July 12, 2018 and signed by Charles Warnock, P.Eng., Program Manager, Development Review Process, Suburban Services, City of Ottawa, including the following supporting documents:
 - a. Final Plans and Specifications prepared by IBI Group Inc. and David Schaeffer Engineering Ltd.
 - b. Pipe Data Form - Watermain, Storm Sewer, Sanitary Sewer, and Forcemain Design Supplement to Application for Approval for Waster and Sewage Works.
 - c. Hydraulic Design Sheets, prepared by IBI Group Inc.
 - d. Stormwater Management Report prepared by David Schaeffer Engineering Ltd.
3. Emails dated July 24, 2018 from Kevin Murphy, P.Eng., David Schaeffer Engineering Ltd., and July 30, 2018, from Ed Ireland, IBI Group.

Schedule "B"

Table 1: Effluent Monitoring

(Samples to be collected from the influent and effluent streams of the Davidson Lands Phase 1 Stormwater Management Pond)

Sample Type	Grab
Frequency	Three (3) rainfall <i>Wet Events</i> per year, with two (2) of the events occurring between May and September
Parameters	Total Suspended Solids, Phosphorus and Temperature

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are constructed and operated in the manner in which they were described and upon which approval was granted. This condition is also included to emphasize the precedence of conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to the approved Works and to ensure that subsequent owners of the Works are made aware of the Approval and continue to operate the Works in compliance with it.
4. Condition 4 is included as regular inspection and necessary removal of sediment and excessive decaying vegetation from the Works are required to mitigate the impact of sediment, debris and/or decaying vegetation on the treatment capacity of the Works. The Condition also ensures that adequate storage is maintained in the Works at all times as required by the design. Furthermore, this Condition is included to ensure that the Works are operated and maintained to function as designed.
5. Condition 5 is included as installation, regular inspection and maintenance of the temporary sediment and erosion control measures is required to mitigate the impact on the downstream receiving watercourse during construction until they are no longer required.
6. Condition 6 is included to enable the Owner to evaluate and demonstrate the performance of the Works, on a continual basis, so that the Works are properly operated and maintained at a level which is consistent with the design objectives specified in the Approval and that the Works do not cause any impairment to the receiving watercourse or the environment. }
7. Condition 7 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
8. Condition 8 is included to require that all records are retained for a sufficient time period to adequately evaluate the long-term operation and maintenance of the Works.

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall

state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

Hi,

We have received the transfer of review application from Stittsville South Inc. and 1384341 Ontario Ltd. for sanitary pumping station to be constructed on 5970 Fernbank Road and part of 5993 Flewellyn Road in the City of Ottawa. I have screened through the submission for completeness and I realized the following information is necessary for us to continue working on the file:

1. Operating authority (please provide the operating authority's name, address and phone

number)

2. Site owner authorization (only letter of authorization from 5970 Fernbank Road was submitted, please confirm who is the owner for 5993 Flewellyn Road)

Please send the above required information to me by August 26, 2016.

Thanks,

Janice

ToR – Letter not Required.

Dear Sir/Madam:

**Re: Application for Approval of Municipal and Private Sewage Works
ToR - Sanitary Pump Station for Fernbank Road
Ottawa City
Reference Number 5712-ACUPA5**

We acknowledge receipt of your application for approval dated March 3, 2016 and received on August 12, 2016 for the following:

Approval Type: Municipal and Private Sewage Works

Project Description: The proposal is for a new Environmental Compliance Approval from Stittsville South Inc. and 1384341 Ontario Ltd. for the installation of Sanitary Sewers and Sanitary Pump Station to be constructed on Fernbank Road and Flewellyn Road in the City of Ottawa.

Site Location: 5970 Fernbank Road and part of 5993 Flewellyn Road
Ottawa City, Ontario

The Ministry's reference number for your application is 5712-ACUPA5. Please quote this number in any correspondence or enquiries regarding this application.

We have screened your submission for completeness and find that the following additional information/documentation is necessary for us to process your application:

- 1. Operating Authority**
- 2. Confirm the Site Owner**

Please be advised that should we not receive the above information/documentation or a response with explanations within two weeks of the date of this letter, we will consider your application withdrawn, and close your file accordingly.

Please note that your submission has only been screened with respect to the presence of the supporting documentation normally required for this type of application, and did not include any technical analysis of the documentation, and therefore you may still be requested to provide some additional information during our detailed technical review of the application. In such a case, the Reviewer will contact you and/or your identified Project Technical Information Contact at that time.

Also, please note that a duplicate copy of the application and all supporting information should have been sent to the local District Office of the Ministry. If this has not been done, please do so as soon as possible including the missing information/documentation identified above.

Should you have any questions related to your application, please contact me at the above phone number.

Sincerely,

Yuc Hu
Environmental Assistant

To: Shah, Miten (MOECC)
Subject: ECA Number 3415-ADQLJG or Ref. No. 5712-ACUPA5

Good Afternoon, Miten:

Attached is the section of Forcemain that would be revised. The revised location is a result of some re-lotting done by the developer and the resulting change in location of the roadway. I am attaching the revised drawing No. 113004-PR-FM3 which shows the new FM location. Also marked in red for your information is the old FM location .. The wording of the ECA will not need to be changed. In both cases the forcemain remains in the same location in the road right of way. So my questions are:

1. Will this change really require an application to amend the ECA? I would like to present the following rationale why I think it would not be necessary:
 - a. The wording of the existing ECA would not change, e.g. ""approximately 870 meters of dual 200 mm diameter HDPE DR13.5" does not change.
 - b. The location of the FM still remains with the same spot in the roadway corridor
 - c. The design and hydraulics of the FM does not change
 - d. Final As-Builts will be given to City showing the final location

Please advise. If you still maintain that an amendment application is required would it be an "Administrative Amendment" at a fee of \$200? Would we just reference the existing ECA and not have to submit all of the paperwork again (e.g., design brief, zoning confirmation, etc. etc.)

I look forward to your response.

Thank You.

Greg MacDonald, P. Eng.

Hi Greg,

Further to my voicemail, please note that if you wish to include proposed changes to forcemain, you are required to apply for an amendment of ECA (probably with the City - under Transfer of Review) along with revised drawings and applicable fees.

Should you have any question, please contact me.

Thanks

Subject: Approved ECA for ToR Ref # 5712-ACUPA5

Thank you for forwarding the ECA for the Shea Road Pump Station and Forcemain. I have a question, as follows:

Currently the dual forcemains are located in a future road right of way 1.5 meters behind the curb. If we were to locate the forcemain to behind the curb on the opposite side of the road would this require an amendment to the ECA? The width of the asphalt roadway is 8.5 meters. The profile of the forcemain (e.g. top of forcemain elevation) would remain the same.

Your advise is requested.

Regards,

Greg MacDonald, P. Eng.

The City would prefer to see Condition 5, para (4) revised to remove "one at the beginning of the Event and the second approximately near the end of the Event", so that the paragraph reads:

(4) The Owner shall use best efforts to collect a representative sample consisting of a minimum of two
(2) grab samples of the Sewage Pumping Station Overflow and have it analysed for parameters outlined in Table 1 of Condition 7 (2) using the protocols specified in Condition 7 (3), to best reflect the effluent quality of such Sewage Pumping Station Overflow.

Sent: November-18-16 2:20 PM
To: Shah, Miten (MOECC)
Subject: ECA Number 3415-ADQLJG or Ref. No. 5712-ACUPA5

Good Afternoon, Miten:

Attached is the section of Forcemain that would be revised. The revised location is a result of some re-lotting done by the developer and the resulting change in location of the roadway. I am attaching the revised drawing No. 113004-PR-FM3 which shows the new FM location. **Also marked in red for your information is the old FM location** .. The wording of the ECA will not need to be changed. In both cases the forcemain remains in the same location in the road right of way. So my questions are:

1. Will this change really require an application to amend the ECA? I would like to present the following rationale why I think it would not be necessary:
 - a. The wording of the existing ECA would not change, e.g. ""approximately 870 meters of dual 200 mm diameter HDPE DR13.5"" does not change.
 - b. The location of the FM still remains with the same spot in the roadway corridor
 - c. The design and hydraulics of the FM does not change
 - d. Final As-Builts will be given to City showing the final location

Please advise. If you still maintain that an amendment application is required would it be an "Administrative Amendment" at a fee of \$200? Would we just reference the existing ECA and not have to submit all of the paperwork again (e.g., design brief, zoning confirmation, etc. etc.)

I look forward to your response.

ENVIRONMENTAL COMPLIANCE APPROVALNUMBER 4076-B33QM5
Issue Date: August 20, 2018

Davidson Shea Properties Inc.
237 Somerset Street West
Ottawa, Ontario
K2P 0J3

Site Location: Davidson Lands Phase 1
5993 Flewellyn Road
Part of Lot 25, Concession 9
City of Ottawa

You have applied under section 20.2 of Part II.1 of the Environmental Protection Act, R.S.O. 1990, c. E. 19 (Environmental Protection Act) for approval of:

the establishment of wastewater infrastructure Works located in the City of Ottawa, consisting of the following:

- **storm sewers, sanitary sewers, and ditches** on Eldenwylde Drive (from Station 0+080 to Station 0+610), Block 159 (from Station 0+090 to Station 0+195), Hickstead Way (from Station 0+080 to Station 0+400), Aridus Crescent (from Station 0+253 to Station 0+465), Sendero Way (from Station 0+570 to Station 0+640), Block 162 (from Station 0+085 to Station 0+200), Maygrass Way (from Station 0+095 to Station 0+620), Kayenta Street (from Station 0+095 to Station 0+530), Jardiniere Street (from Station 0+095 to Station 0+745), Block 165 (from Station 0+105 to Station 0+355), Fernbank Road (from Station 113+395 to Station 113+410, from Station 113+479 to Station 113+509, and from Station 113+567 to Station 113+582), Block 165 Ditch (from Station 0+108 to Station 0+265), and a Ditch on the Lands adjacent to Jardiniere Street (from Station 0+435, approximately 24 metres left, extending approximately 190 metres in length to connect to an existing ditch); and

the establishment of stormwater management Works to serve the Davidson Lands Phase 1 Subdivision, located in the City of Ottawa, consisting of the following;

- **one (1) wet pond** for the treatment and disposal of stormwater runoff, to provide Enhanced Level water quality protection and to attenuate post-development peak flows. The proposed wet pond is located west of Shea Road, east of the existing West Wind Development, and south of Fernbank Road. It is completed with one (1) sediment forebay, and will serve a total drainage area of 40.62 hectares (37.55 hectares residential development, 3.07 hectares pond block) and provide an enhanced level (80% TSS) protection. The total depth is 3.25 metres from pond bottom to the invert of the emergency weir. The

permanent pool volume is 9054 cubic metres at an elevation of 101.500. The extended detention volume is 6478 cubic metres at an elevation of 102.100. The total storage volume during the 100-year storm is 32654 cubic metres at an elevation of 103.174. The 100-year pond outflow is 0.605 cubic metres per second, and the 100-year pond level is 103.174 metres. The outlet ditch extending from the stormwater management pond is approximately 135 metres in length; and

- **improvements to the Faulkner Municipal Drain Tributary** (approximately 330 metres) through modification by the realigning, deepening, and vegetating of municipal drain tributary and remediation of the tributary along the west area of the new stormwater management facility;

including erosion/sedimentation control measures during construction and all other controls and appurtenances essential for the proper operation of the aforementioned Works;

all in accordance with the submitted application and supporting documents listed in Schedule "A" forming part of this Approval.

For the purpose of this environmental compliance approval, the following definitions apply:

1. "Approval" means this entire document and any schedules attached to it, and the application;
2. "Director" means a person appointed by the Minister pursuant to section 5 of the EPA for the purposes of Part II.1 of the EPA;
3. "District Manager" means the District Manager of the appropriate local District Office of the Ministry, where the Works are geographically located;
4. "EPA" means the *Environmental Protection Act*, R.S.O. 1990, c.E.19, as amended;
5. "Ministry" means the ministry of the government of Ontario responsible for the EPA and OWRA and includes all officials, employees or other persons acting on its behalf;
6. "Owner" means Davidson Shea Properties Inc., and includes its successors and assignees;
7. "OWRA" means the *Ontario Water Resources Act*, R.S.O. 1990, c. O.40, as amended;
8. "Wet Event" means a rainfall event with a minimum of 15 millimetres of rain in a 24 hour period;
9. "Works" means the sewage Works described in the Owner's application, and this Approval.

You are hereby notified that this environmental compliance approval is issued to you subject to the terms and

conditions outlined below:

TERMS AND CONDITIONS

1. GENERAL CONDITIONS

1. The Owner shall ensure that any person authorized to carry out work on or operate any aspect of the Works is notified of this Approval and the conditions herein and shall take all reasonable measures to ensure any such person complies with the same.
2. Except as otherwise provided by these Conditions, the Owner shall design, build, install, operate and maintain the Works in accordance with the description given in this Approval, and the application for approval of the Works.
3. Where there is a conflict between a provision of any document in the schedule referred to in this Approval and the conditions of this Approval, the conditions in this Approval shall take precedence, and where there is a conflict between the documents in the schedule, the document bearing the most recent date shall prevail.
4. Where there is a conflict between the documents listed in Schedule "A" and the application, the application shall take precedence unless it is clear that the purpose of the document was to amend the application.
5. The conditions of this Approval are severable. If any condition of this Approval, or the application of any requirement of this Approval to any circumstance, is held invalid or unenforceable, the application of such condition to other circumstances and the remainder of this Approval shall not be affected thereby.

2. EXPIRY OF APPROVAL

1. This Approval will cease to apply to those parts of the Works which have not been constructed within five (5) years of the date of this Approval.
2. In the event that completion and commissioning of any portion of the Works is anticipated to be delayed beyond the specified expiry period, the Owner shall submit an application of extension to the expiry period, at least twelve (12) months prior to the end of the period. The application for extension shall include the reason(s) for the delay, whether there is any design change(s) and a review of whether the standards applicable at the time of Approval of the Works are still applicable at the time of request for extension, to ensure the ongoing protection of the environment.

3. CHANGE OF OWNER

1. The Owner shall notify the District Manager and the Director, in writing, of any of the following changes within thirty (30) days of the change occurring:

- a. change of Owner;
 - b. change of address of the Owner;
 - c. change of partners where the Owner is or at any time becomes a partnership, and a copy of the most recent declaration filed under the *Business Names Act*, R.S.O. 1990, c.B17 shall be included in the notification to the District Manager; or
 - d. change of name of the corporation where the Owner is or at any time becomes a corporation, and a copy of the most current information filed under the *Corporations Information Act*, R.S.O. 1990, c. C39 shall be included in the notification to the District Manager.
2. In the event of any change in ownership of the Works, other than a change to a successor municipality, the Owner shall notify in writing the succeeding owner of the existence of this Approval, and a copy of such notice shall be forwarded to the District Manager and the Director.
3. The Owner shall ensure that all communications made pursuant to this condition refer to the number at the top of this Approval.

4. OPERATION AND MAINTENANCE

1. If applicable, any proposed storm sewers or other stormwater conveyance in this Approval can be constructed but not operated until the proposed stormwater management facilities in this Approval or any other Approval that are designed to service the storm sewers or other stormwater conveyance are in operation.
2. The Owner shall make all necessary investigations, take all necessary steps and obtain all necessary approvals so as to ensure that the physical structure, siting and operations of the Works do not constitute a safety or health hazard to the general public.
3. The Owner shall inspect and ensure that the design minimum liquid retention volume is maintained in the Works at all times, except when maintenance is required.
4. The Owner shall undertake an inspection of the condition of the Works, at least once a year, and undertake any necessary cleaning and maintenance to ensure that sediment, debris and excessive decaying vegetation are removed from the Works to prevent the excessive build-up of sediment, oil/grit, debris and/or decaying vegetation, to avoid reduction of the capacity and/or permeability of the Works, as applicable. The Owner shall also regularly inspect and clean out the inlet to and outlet from the Works to ensure that these are not obstructed.
5. The Owner shall construct, operate and maintain the Works with the objective that the effluent from the Works is essentially free of floating and settleable solids and does not

contain oil or any other substance in amounts sufficient to create a visible film, sheen, foam or discoloration on the receiving waters.

6. The Owner shall maintain a logbook to record the results of these inspections and any cleaning and maintenance operations undertaken, and shall keep the logbook at the Owner's administrative office for inspection by the Ministry. The logbook shall include the following:
 - a. the name of the Works; and
 - b. the date and results of each inspection, maintenance and cleaning, including an estimate of the quantity of any materials removed and method of clean-out of the Works.
7. The Owner shall prepare an operations manual prior to the commencement of operation of the Works that includes, but is not necessarily limited to, the following information:
 - a. operating and maintenance procedures for routine operation of the Works;
 - b. inspection programs, including frequency of inspection, for the Works and the methods or tests employed to detect when maintenance is necessary;
 - c. repair and maintenance programs, including the frequency of repair and maintenance for the Works;
 - d. contingency plans and procedures for dealing with potential spills and any other abnormal situations and for notifying the District Manager; and
 - e. procedures for receiving, responding and recording public complaints, including recording any follow-up actions taken.
8. The Owner shall maintain the operations manual current and retain a copy at the Owner's administrative office for the operational life of the Works. Upon request, the Owner shall make the manual available to Ministry staff.

5. TEMPORARY EROSION AND SEDIMENT CONTROL

1. The Owner shall install and maintain temporary sediment and erosion control measures during construction and conduct inspections once every two (2) weeks and after each significant storm event (a significant storm event is defined as a minimum of 25 mm of rain in any 24 hours period). The inspections and maintenance of the temporary sediment and erosion control measures shall continue until they are no longer required and at which time they shall be removed and all disturbed areas reinstated properly.
2. The Owner shall maintain records of inspections and maintenance which shall be made

available for inspection by the Ministry, upon request. The record shall include the name of the inspector, date of inspection, and the remedial measures, if any, undertaken to maintain the temporary sediment and erosion control measures.

6. MONITORING AND RECORDING

1. The Owner shall, upon commencement of operation of the Works, carry out the following monitoring program:
 - a. All samples and measurements taken for the purposes of this Approval are to be taken at a time and in a location characteristic of the quality and quantity of the effluent stream over the time period being monitored.
 - b. Samples shall be collected at the following sampling points, at the frequency specified, by means of the specified sample type and analyzed for each parameter listed and all results recorded, as outlined in Schedule "B".
 - c. The methods and protocols for sampling, analysis and recording shall conform, in order of precedence, to the methods and protocols specified in the following:
 - i. the Ministry's Procedure F-10-1, "Procedures for Sampling and Analysis Requirements for Municipal and Private Sewage Treatment Works (Liquid Waste Streams Only)", as amended from time to time by more recently published editions;
 - ii. the Ministry's publication "Protocol for the Sampling and Analysis of Industrial/Municipal Wastewater" (January 1999), ISBN 0-7778-1880-9, as amended from time to time by more recently published editions; and
 - iii. the publication "Standard Methods for the Examination of Water and Wastewater" (21st edition), as amended from time to time by more recently published editions.

7. REPORTING

1. One (1) week prior to the start-up of the operation of the Works, the Owner shall notify the District Manager (in writing) of the pending start-up date.
2. The Owner shall, upon request, make all reports, manuals, plans, records, data, procedures and supporting documentation available to Ministry staff.
3. The Owner shall prepare a performance report within ninety (90) days following the end of the period being reported upon, and submit the report(s) to the District Manager when requested. The first such report shall cover the first annual period following the commencement of operation of the Works and subsequent reports shall be prepared to

cover successive annual periods following thereafter. The reports shall contain, but shall not be limited to, the following information:

- a. a summary and interpretation of all monitoring data and an overview of the success and adequacy of the Works, including demonstration using the monitoring data that the appropriate level of quality control has been achieved;
- b. a description of any operating problems encountered and corrective actions taken;
- c. a summary of all maintenance carried out on any major structure, equipment, apparatus, mechanism or thing forming part of the Works, including an estimate of the quantity of any materials removed from the Works;
- d. a summary of the calibration and maintenance carried out on all monitoring equipment;
- e. a summary of any complaints received during the reporting period and any steps taken to address the complaints;
- f. a summary of all spill or abnormal discharge events; and
- g. any other information the District Manager requires from time to time.

8. RECORD KEEPING

1. The Owner shall retain for a minimum of five (5) years from the date of their creation, all records and information related to or resulting from the operation, maintenance and monitoring activities required by this Approval.

Schedule "A"

1. Application for Environmental Compliance Approval, dated April 4, 2018, received on July 16, 2018, submitted by Davidson Shea Properties Inc.;
2. Transfer of Review Letter of Recommendation, dated July 12, 2018 and signed by Charles Warnock, P.Eng., Program Manager, Development Review Process, Suburban Services, City of Ottawa, including the following supporting documents:
 - a. Final Plans and Specifications prepared by IBI Group Inc. and David Schaeffer Engineering Ltd.
 - b. Pipe Data Form - Watermain, Storm Sewer, Sanitary Sewer, and Forcemain Design Supplement to Application for Approval for Waster and Sewage Works.
 - c. Hydraulic Design Sheets, prepared by IBI Group Inc.
 - d. Stormwater Management Report prepared by David Schaeffer Engineering Ltd.
3. Emails dated July 24, 2018 from Kevin Murphy, P.Eng., David Schaeffer Engineering Ltd., and July 30, 2018, from Ed Ireland, IBI Group.

Schedule "B"

Table 1: Effluent Monitoring

(Samples to be collected from the influent and effluent streams of the Davidson Lands Phase 1 Stormwater Management Pond)

Sample Type	Grab
Frequency	Three (3) rainfall <i>Wet Events</i> per year, with two (2) of the events occurring between May and September
Parameters	Total Suspended Solids, Phosphorus and Temperature

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is imposed to ensure that the Works are constructed and operated in the manner in which they were described and upon which approval was granted. This condition is also included to emphasize the precedence of conditions in the Approval and the practice that the Approval is based on the most current document, if several conflicting documents are submitted for review.
2. Condition 2 is included to ensure that, when the Works are constructed, the Works will meet the standards that apply at the time of construction to ensure the ongoing protection of the environment.
3. Condition 3 is included to ensure that the Ministry records are kept accurate and current with respect to the approved Works and to ensure that subsequent owners of the Works are made aware of the Approval and continue to operate the Works in compliance with it.
4. Condition 4 is included as regular inspection and necessary removal of sediment and excessive decaying vegetation from the Works are required to mitigate the impact of sediment, debris and/or decaying vegetation on the treatment capacity of the Works. The Condition also ensures that adequate storage is maintained in the Works at all times as required by the design. Furthermore, this Condition is included to ensure that the Works are operated and maintained to function as designed.
5. Condition 5 is included as installation, regular inspection and maintenance of the temporary sediment and erosion control measures is required to mitigate the impact on the downstream receiving watercourse during construction until they are no longer required.
6. Condition 6 is included to enable the Owner to evaluate and demonstrate the performance of the Works, on a continual basis, so that the Works are properly operated and maintained at a level which is consistent with the design objectives specified in the Approval and that the Works do not cause any impairment to the receiving watercourse or the environment. }
7. Condition 7 is included to provide a performance record for future references, to ensure that the Ministry is made aware of problems as they arise, and to provide a compliance record for all the terms and conditions outlined in this Approval, so that the Ministry can work with the Owner in resolving any problems in a timely manner.
8. Condition 8 is included to require that all records are retained for a sufficient time period to adequately evaluate the long-term operation and maintenance of the Works.

In accordance with Section 139 of the Environmental Protection Act, you may by written Notice served upon me and the Environmental Review Tribunal within 15 days after receipt of this Notice, require a hearing by the Tribunal. Section 142 of the Environmental Protection Act provides that the Notice requiring the hearing shall

state:

- a. The portions of the environmental compliance approval or each term or condition in the environmental compliance approval in respect of which the hearing is required, and;
- b. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

The Notice should also include:

1. The name of the appellant;
2. The address of the appellant;
3. The environmental compliance approval number;
4. The date of the environmental compliance approval;
5. The name of the Director, and;
6. The municipality or municipalities within which the project is to be engaged in.

And the Notice should be signed and dated by the appellant.

This Notice must be served upon:

LETTER NOT REQUIRED (TRANSFER OF REVIEW)

Dear Sir/Madam:

**Re: Application for Approval of Municipal and Private Sewage Works
ToR - Storm Sewers, Sanitary Sewers, SWM Wet Pond, and Ditches in the Davidson
Lands Phase 1 Subdivision
City of Ottawa
Reference Number 4302-B2RK9F**

We acknowledge receipt of your application for approval dated April 5, 2018 and received on July 16, 2018 for the following:

Approval Type: Municipal and Private Sewage Works

Project Description: This proposal is for a new environmental compliance approval from Davidson Shea Properties Inc. for the installation of storm and sanitary sewers on Edenwylde Drive, Block 159, Hickstead Way, Aridus Crescent, Sendero Way, Block 162, Maygrass Way, Kayenta Street, Jerdiniere, Block 165, and Fernbank Road, and a SWM Wet Pond west of Shea Road in the City of Ottawa.

Site Location: Davidson Lands Phase 1
5993 Flewellyn Road
City of Ottawa

The Ministry's reference number for your application is 4302-B2RK9F. Please quote this number in any correspondence or enquiries regarding this application.

Please note that your submission has only been screened with respect to the presence of the supporting documentation normally required for this type of application, and did not include any technical analysis of the documentation, and therefore you may still be requested to provide some additional information during our detailed technical review of the application. In such a case, the Reviewer will contact you and/or your identified Project Technical Information Contact at this time.

Also, please note that a duplicate copy of the application and all supporting information should have been sent to the local District Office of the Ministry. If this has not been done, please do so as soon as possible.

Should you have any questions related to your application, please contact me at the above phone number.

Sincerely,

Gillian Davison
Environmental Assistant

c: District Manager, MOECC Ottawa

Date: July 30, 2018 10:04:42 AM

Good morning Gillian,

The wording should be as shown below:

"a Ditch on lands adjacent to Jardiniere Street (from Station 0+435 24m left, extending 190m in length to connect to an existing ditch)"

In surveying we use a road centerline station and then a left or right offset from the road centerline to describe a point. In this case the start of the ditch is located at station 0+435 and 24m left of the road centerline as you look up station (in the direction of increasing stationing)

Thank you for the inquiry Gillian.

The application is a joint effort between my office and IBI Group for this particular development. Your query is related to work associated with IBI's design.

Lance/Ed: Could you please assist Gillian with her question below?

Much appreciated.

Good morning Kevin,

I am currently reviewing your application and preparing the draft ECA. I have a question to clarify some of the wording of the proposed works included in your submitted Draft.

For the last sentence of the paragraph describing the proposed sanitary sewers, storm sewers, and ditches, '*and on Lands adjacent to Jardiniere Street a Ditch from Station 0+435 24m extending 190m in length to tie to existing ditch*', do you mean: 'a Ditch on lands adjacent to Jardiniere Street (from Station 0+435, 24m deep, extending 190m in length to connect to an existing ditch)'?

Thanks in advance for the clarification,

Gillian

Great Gillian!

Thank you for the confirmation.

Can you also let me and Lance know when you have completed your review of the package and it has been moved on to the next step (person) in the process?

Much appreciated.

Hi Gillian,

The courier says the drawings were delivered to your mail room earlier today.
I don't know how long it will take for them to work their way to wherever you are in the building.

Hi Gillian,

Just providing you with an update.

The courier was delayed in picking up the updated drawings and didn't get them until the morning.

You should have them in your building Thursday morning sometime.

Thanks,

Kevin

Subject: Final Plans for Transfer of Review Ref No. 4302-B2RK9F - Davidson Lands Subdivision SWM Pond

Good morning,

I have received your Transfer of Review application for storm and sanitary sewers and a Stormwater Management Pond to serve the Davidson Lands Subdivision. Although you have submitted final plans for the storm and sanitary sewers, the other set of plans that were submitted for the SWM Pond were labelled as 'Not For Construction'.

Unfortunately, we do require final plans for the application and do not accept 'Not For Construction' plans. Could you please re-submit to our office (135 St. Clair West Application Assessment Unit) a set of final plans for the Davidson Lands SWM Pond **only**.

-
Thank you very much,

Gillian Davison

Client:	Davidson Shea Properties Inc.
Project Description:	
Reference Number:	4302-B2RK9F
Subject:	Source Protection Screened Out

Notes:

General | **Property Description** | **Business & Operational History** | **Closure Status** | **Source Protection**

Source Protection

Source Protection Area Name	Latitude	Longitude	UTM Zone	Easting	Northing
Rideau Valley	45.25131	-75.90053	18	429335.82	5011263
Intake Protection Zones(s)	No				
Wellhead Protection Area (WHPA) zone(s)	No				
Groundwater Under Direct Influence of surface water (GUDI)/WHPA-E	No				
Issues Contributing Areas (ICA)	No				
Significant Groundwater Recharge Area	No				
Highly Vulnerable Aquifer	Yes Score: 6				
Event Based Areas (EBAs)	No				
Quantity Protection Zone (WHPA Q1)	No				
SWPIA source water data version:	March, 2018				

Primary Screening

Has the location or address for this site been confirmed in the Source Water Protection Information Atlas (SWPIA)?	Yes	
Date Confirmed:	2018/07/24	
Confirmed By:	Gillian Davison	
* Is this screening associated with a new or increased PTTW (i.e. excludes renewals) at this site?	☐ Yes ☐ No	
	Water Quality	Water Quantity
Does this site have the potential for a significant drinking water threat?	No	No
Does this site have the potential for a moderate or low drinking water threat?	No	No

Secondary Screening is not required.

Hi Andrius,

I'm processing the PTTW application for Stittsville South, Area 6.

I noticed that the two letters of permission required were not submitted. Can you please forward these along?

Also – a draft of this Permit cannot be provided and later issued to a contractor. This is a method only available to the Ministry of Transportation and the City of Ottawa under specific Memorandums of Understanding. The final PTTW will be issued to Davidson Shea Properties Inc.

PERMIT TO TAKE WATER
Surface and Ground Water
NUMBER 2630-AUPJNY

Pursuant to Section 34.1 of the Ontario Water Resources Act, R.S.O. 1990 this Permit To Take Water is hereby issued to:

Davidson Shea Properties Inc.
237 Somerset St W
Ottawa, Ontario, K2P 0J3
Canada

For the water taking from: Excavation Trenches & Stormwater Management Pond

Located at: 5960 & 5970 Fernbank Rd
Ottawa

5993 Flewellyn Rd
Ottawa

For the purposes of this Permit, and the terms and conditions specified below, the following definitions apply:

DEFINITIONS

- (a) "Director" means any person appointed in writing as a Director pursuant to section 5 of the OWRA for the purposes of section 34.1, OWRA.
- (b) "Provincial Officer" means any person designated in writing by the Minister as a Provincial Officer pursuant to section 5 of the OWRA.
- (c) "Ministry" means Ontario Ministry of the Environment and Climate Change.
- (d) "District Office" means the Ottawa District Office.
- (e) "Permit" means this Permit to Take Water No. 2630-AUPJNY including its Schedules, if any, issued in accordance with Section 34.1 of the OWRA.
- (f) "Permit Holder" means Davidson Shea Properties Inc..

- (g) "OWRA " means the *Ontario Water Resources Act*, R.S.O. 1990, c. O. 40, as amended.

You are hereby notified that this Permit is issued subject to the terms and conditions outlined below:

TERMS AND CONDITIONS

1. Compliance with Permit

- 1.1 Except where modified by this Permit, the water taking shall be in accordance with the application for this Permit To Take Water, dated December 6, 2017 and signed by R. Douglas Lazier, and all Schedules included in this Permit.
- 1.2 The Permit Holder shall ensure that any person authorized by the Permit Holder to take water under this Permit is provided with a copy of this Permit and shall take all reasonable measures to ensure that any such person complies with the conditions of this Permit.
- 1.3 Any person authorized by the Permit Holder to take water under this Permit shall comply with the conditions of this Permit.
- 1.4 This Permit is not transferable to another person.
- 1.5 This Permit provides the Permit Holder with permission to take water in accordance with the conditions of this Permit, up to the date of the expiry of this Permit. This Permit does not constitute a legal right, vested or otherwise, to a water allocation, and the issuance of this Permit does not guarantee that, upon its expiry, it will be renewed.
- 1.6 The Permit Holder shall keep this Permit available at all times at or near the site of the taking, and shall produce this Permit immediately for inspection by a Provincial Officer upon his or her request.
- 1.7 The Permit Holder shall report any changes of address to the Director within thirty days of any such change. The Permit Holder shall report any change of ownership of the property for which this Permit is issued within thirty days of any such change. A change in ownership in the property shall cause this Permit to be cancelled.

2. General Conditions and Interpretation

- 2.1 Inspections
The Permit Holder must forthwith, upon presentation of credentials, permit a Provincial Officer to carry out any and all inspections authorized by the OWRA, the *Environmental Protection Act* , R.S.O. 1990, the *Pesticides Act* , R.S.O. 1990, or the *Safe Drinking Water Act*, S. O. 2002.

2.2 Other Approvals

The issuance of, and compliance with this Permit, does not:

- (a) relieve the Permit Holder or any other person from any obligation to comply with any other applicable legal requirements, including the provisions of the *Ontario Water Resources Act* , and the *Environmental Protection Act* , and any regulations made thereunder; or
- (b) limit in any way any authority of the Ministry, a Director, or a Provincial Officer, including the authority to require certain steps be taken or to require the Permit Holder to furnish any further information related to this Permit.

2.3 Information

The receipt of any information by the Ministry, the failure of the Ministry to take any action or require any person to take any action in relation to the information, or the failure of a Provincial Officer to prosecute any person in relation to the information, shall not be construed as:

- (a) an approval, waiver or justification by the Ministry of any act or omission of any person that contravenes this Permit or other legal requirement; or
- (b) acceptance by the Ministry of the information's completeness or accuracy.

2.4 Rights of Action

The issuance of, and compliance with this Permit shall not be construed as precluding or limiting any legal claims or rights of action that any person, including the Crown in right of Ontario or any agency thereof, has or may have against the Permit Holder, its officers, employees, agents, and contractors.

2.5 Severability

The requirements of this Permit are severable. If any requirements of this Permit, or the application of any requirements of this Permit to any circumstance, is held invalid or unenforceable, the application of such requirements to other circumstances and the remainder of this Permit shall not be affected thereby.

2.6 Conflicts

Where there is a conflict between a provision of any submitted document referred to in this Permit, including its Schedules, and the conditions of this Permit, the conditions in this Permit shall take precedence.

3. Water Takings Authorized by This Permit

3.1 Expiry

This Permit expires on **January 31, 2025**. No water shall be taken under authority of this Permit after the expiry date.

3.2 Amounts of Taking Permitted

The Permit Holder shall only take water from the source, during the periods and at the rates and amounts of taking specified in Table A. Water takings are authorized only for the purposes specified in Table A.

Table A

	Source Name / Description:	Source Type:	Taking Specific Purpose:	Taking Major Category:	Max. Taken per Minute (litres):	Max. Num. of Hrs Taken per Day:	Max. Taken per Day (litres):	Max. Num. of Days Taken per Year:	Zone/ Easting/ Northing:
1	Excavation Trenches	Pond Dugout	Construction	Dewatering Construction	20,531	24	9,855,000	365	18 429532 5011532
2	Stormwater Management Pond Excavation	Pond Dugout	Construction	Dewatering Construction	13,825	24	6,636,000	365	18 429852 5010779
Total Taking:							16,491,000		

4. Monitoring

- 4.1 The Permit Holder shall maintain a record of all water takings. This record shall include the dates and times of water takings, the rates of taking and an estimated calculation of the total amounts of water taken per day for each day that water is taken under the authorization of this Permit. A separate record shall be maintained for each source. The Permit Holder shall keep all required records up to date and available at or near the site of the taking and shall produce the records immediately for inspection by a Provincial Officer upon his or her request.
- 4.2 The Permit Holder shall install a bedrock groundwater monitoring well within 25 metres of the residential properties along Flewellyn Road on the southern portion of their property as shown on Figure 1 of the report entitled "Category 3 Permit to Take Water, Area 6, Stittsville South, Ottawa, Ontario" completed by Houle Chevrier Engineering and attached to this Permit as Schedule A. The groundwater monitoring well characteristics shall be determined by a qualified Professional Geoscientist or qualified Professional Engineer and the well shall be drilled to an elevation of approximately 93 metres above sea level.

- 4.3 The Permit Holder shall also install a bedrock groundwater monitoring well in the northwestern corner of their property as shown on Figure 1 of Schedule A of this Permit. The groundwater monitoring well characteristics shall be determined by a qualified Professional Geoscientist or qualified Professional Engineer and the well shall be drilled to an elevation of approximately 93 metres above sea level.
- 4.4 The Permit Holder shall ensure that a minimum of three (3) daily groundwater level measurements are undertaken at both groundwater monitoring wells prior to any water taking authorized by this Permit. During water taking activities, the Permit Holder shall ensure that groundwater levels are measured daily for the first three (3) days of the taking and on a weekly basis thereafter. After water taking activities have stopped, groundwater levels shall be measured on a weekly basis until groundwater levels have reached at least 90 percent recovery. All groundwater level measurements shall be undertaken by an appropriately trained person and measurements shall be recorded in a log book. The Permit Holder shall keep all required records up to date and available at or near the site of the taking and shall produce the records immediately for inspection by a Provincial Officer upon his or her request.
- 4.5 Groundwater monitoring data collected under Condition 4.4 shall be reviewed by a qualified Professional Geoscientist or a qualified Professional Engineer on a monthly basis (minimum) during water taking activities. If this review identifies the potential for interference with area domestic water supply well(s) and / or if the groundwater level has decreased at either monitoring well by greater than two (2) metres below the initial groundwater level prior to the water taking, then the Permit Holder shall undertake the contingency plan presented in Section 7.4 of the report entitled "Category 3 Permit to Take Water, Area 6, Stittsville South, Ottawa, Ontario" completed by Houle Chevrier Engineering and attached to this Permit as Schedule A.

5. Impacts of the Water Taking

5.1 Notification

The Permit Holder shall immediately notify the local District Office of any complaint arising from the taking of water authorized under this Permit and shall report any action which has been taken or is proposed with regard to such complaint. The Permit Holder shall immediately notify the local District Office if the taking of water is observed to have any significant impact on the surrounding waters. After hours, calls shall be directed to the Ministry's Spills Action Centre at 1-800-268-6060.

5.2 For Surface-Water Takings

The taking of water (including the taking of water into storage and the subsequent or simultaneous withdrawal from storage) shall be carried out in such a manner that streamflow is not stopped and is not reduced to a rate that will cause interference with downstream uses of water or with the natural functions of the stream.

For Groundwater Takings

If the taking of water is observed to cause any negative impact to other water supplies obtained from any adequate sources that were in use prior to initial issuance of a Permit for this water taking, the Permit Holder shall take such action necessary to make available to those affected, a supply of water equivalent in quantity and quality to their normal takings, or shall compensate such persons for their reasonable costs of so doing, or shall reduce the rate and amount of taking to prevent or alleviate the observed negative impact. Pending permanent restoration of the affected supplies, the Permit Holder shall provide, to those affected, temporary water supplies adequate to meet their normal requirements, or shall compensate such persons for their reasonable costs of doing so.

If permanent interference is caused by the water taking, the Permit Holder shall restore the water supplies of those permanently affected.

5.3 Prevention of Adverse Effects:

The Permit Holder shall ensure the taking of water under authority of this Permit does not result in an adverse effect on area waters.

5.4 Prevention of Structural Adverse Effects:

The Permit Holder shall take all measures necessary to prevent damage to buildings, bridges, structures, roads and/or railway lines that may be impacted either directly or indirectly by this taking.

5.5 The Permit Holder shall ensure that no water is discharged to the Stormwater Management Pond, except in accordance with an Environmental Compliance Approval, issued by this Ministry.

5.6 The Permit Holder shall ensure all water pumped from the excavation is directed to a sump or similar sediment control feature. Straw bales or silt fencing shall be installed around the discharge site to prevent sediment laden water from entering the watercourse. Discharge from the sediment control features shall be to a well vegetated area, as far as possible from any surface water course, to promote infiltration prior to re-entering any watercourse.

5.7 Sediment control features shall be sufficient to control the volumes and shall be maintained for the full duration of the discharge.

5.8 The discharge of water shall be controlled in such a way as to avoid erosion and sedimentation in the receiving stream.

- 5.9 The Permit Holder shall ensure that any water discharged to the natural environment does not result in scouring, erosion or physical alteration of stream channels or banks and that there is no flooding in the receiving area or water body, downstream water bodies, ditches or properties caused or worsened by this discharge.
- 5.10 The Permit Holder shall not discharge turbid water to any watercourse. Turbid water shall be defined as any discharge water from the excavation or diverted water with a maximum increase of 8 NTUs above the receiving stream's background levels.

6. Director May Amend Permit

The Director may amend this Permit by letter requiring the Permit Holder to suspend or reduce the taking to an amount or threshold specified by the Director in the letter. The suspension or reduction in taking shall be effective immediately and may be revoked at any time upon notification by the Director. This condition does not affect your right to appeal the suspension or reduction in taking to the Environmental Review Tribunal under the *Ontario Water Resources Act*, Section 100 (4).

The reasons for the imposition of these terms and conditions are as follows:

1. Condition 1 is included to ensure that the conditions in this Permit are complied with and can be enforced.
2. Condition 2 is included to clarify the legal interpretation of aspects of this Permit.
3. Conditions 3 through 6 are included to protect the quality of the natural environment so as to safeguard the ecosystem and human health and foster efficient use and conservation of waters. These conditions allow for the beneficial use of waters while ensuring the fair sharing, conservation and sustainable use of the waters of Ontario. The conditions also specify the water takings that are authorized by this Permit and the scope of this Permit.

*In accordance with Section 100 of the Ontario Water Resources Act, R.S.O. 1990, you may by written notice served upon me, the Environmental Review Tribunal and the Environmental Commissioner, **Environmental Bill of Rights**, R.S.O. 1993, Chapter 28, within 15 days after receipt of this Notice, require a hearing by the Tribunal. The Environmental Commissioner will place notice of your appeal on the Environmental Registry. Section 101 of the Ontario Water Resources Act, as amended provides that the Notice requiring a hearing shall state:*

1. The portions of the Permit or each term or condition in the Permit in respect of which the hearing is required, and;
2. The grounds on which you intend to rely at the hearing in relation to each portion appealed.

In addition to these legal requirements, the Notice should also include:

- a. The name of the appellant;
- b. The address of the appellant;
- c. The Permit to Take Water number;
- d. The date of the Permit to Take Water;
- e. The name of the Director;
- f. The municipality within which the works are located;

This notice must be served upon:

*The Secretary
Environmental Review Tribunal
655 Bay Street, 15th Floor
Toronto ON
M5G 1E5
Fax: (416) 326-5370
Email:

Hi Jonathon,

If it is easier you can also just credit the card number used for the fee. If you are going the cheque route please note that the address is incorrect and we have moved to 237 Somerset West, Ottawa, On., K2P 0J3.

thanks

Pierre Dufresne

Hi Andrius,

I looked into the refund for reference # 3636-ANLPTL and it does appear that this refund was not processed. The refund from reference # 3636-ANLPTL has not been submitted for processing and a cheque will be mailed to:

Tartan Crestway Developments Inc.
400-331 Cooper St, Ottawa, Ontario, Canada, K2P 0G5

My apologies for the delay in receiving the refund, please feel free to contact me should you have any questions or concerns.

Thanks,

Jon Greenberg

Good afternoon Jonathan,

This PTTW application was previously submitted (June 23, 2017 - reference 3636-ANLPTL) and the \$3000 application fee was paid. Due to changes in the Permit, the MOECC requested that we resubmit the PTTW application package.

Upon re-submitting it came to my attention that the previous \$3,000 fee was not refunded. As such, can the current \$3,000 charge be refunded?

Thanks,
Andrius

Hello Jonathan,

Please see the responses to the additional action items described in the acknowledgement letter:

- ☐☐☐ NAICS code for the applicant is 236117 (New housing for-sale builders)
- ☐☐☐ Applicants name for the PTTW to be issued to: Davidson Lands Co-tenancy (business identification number 001597642)
- ☐☐☐ An updated signature page signed by an officer or director of the company will be forwarded to you.

Please let me know if you require any further information.

Thank you,
Andrius

10. Attachments

The following must be attached for all applications (Category 1, 2 and 3) to be complete:

- ☒ **Map Requirements**
On a 1:10 000 OBM (Ontario Base Map) (1:50 000 only acceptable in locations where 1:10 000 is not obtainable), mark and label:
 - all existing and proposed water taking locations with sources corresponding with source name
 - all of the following features within 500m of each source: existing wells (indicate use of existing well, springs, watercourses, wetlands, water bodies, property lines, locations and name of property owners, nearest road intersection, dwellings).
- ☒ Describe in detail how, where and when all water is obtained, stored, transferred, used and returned to the environment (if applicable). Details must include the source of all water takings (and corresponding source name if applicable), purpose of the water taking, period of water taking, and maximum quantity requested (see Guide for further instruction).
Note: If your application is subject to posting on the Environmental Bill of Rights (EBR) Registry, this description will be used to create the Proposal Notice. The ministry may change the wording as required, to meet the EBR posting requirements.
- ☒ Describe how water taking needs (rates, amounts and time periods) were determined. Provide all relevant information and calculations to demonstrate the water takings requested are warranted. Calculation worksheets are available. Refer to Appendix E of the Guide.
- ☒ Attach completed water conservation Schedule 1.

The following must be attached for all Category 2 applications:

- ☐ Completed Schedule 2 and/or Schedule 3 signed by a Qualified Person.

The following must be attached for all Category 3 applications:

- ☒ Study Hydrogeological Investigation included in PTTW application package

11. Statement/Signature of Applicant

I, the undersigned, hereby declare that to the best of my knowledge:

- The information contained herein and the information submitted in support of this application is complete and accurate in every way and I am aware of the penalties against providing false information.
- The Project Technical Information Contact identified in Section 6 if this form is authorized to act on my behalf for the purpose of obtaining this approval.

That is correct Jonathon, 237 Somerset is where we are. Also, please find attached a revised signing page to the application with an authorized signature.

Thanks,

Pierre Dufresne
Vice-President, Land Development

Hi Pierre,

Unfortunately we are unable to issue refunds back onto credit cards. I will update the address for sending the refund cheque.

Also, I noticed that the PTTW application form lists the applicant address as 23B Somerset West. Should I assume this is a typo and that the correct address for the current application should match the below address of 237 Somerset West, Ottawa? Please advise, thanks.

Sincerely,

Jon Greenberg

Hi Jonathon,

If it is easier you can also just credit the card number used for the fee. If you are going the cheque route please note that the address is incorrect and we have moved to 237 Somerset West, Ottawa, On., K2P 0J3.

thanks

Pierre Dufresne

Hi Andrius,

I looked into the refund for reference # 3636-ANLPTL and it does appear that this refund was not processed. The refund from reference # 3636-ANLPTL has not been submitted for processing and a cheque will be mailed to:

Tartan Crestway Developments Inc.
400-331 Cooper St, Ottawa, Ontario, Canada, K2P 0G5

My apologies for the delay in receiving the refund, please feel free to contact me should you have any questions or concerns.

Thanks,

Jon Greenberg

Good afternoon Jonathan,

This PTTW application was previously submitted (June 23, 2017 - reference 3636-ANLPTL) and the \$3000 application fee was paid. Due to changes in the Permit, the MOECC requested that we resubmit the PTTW application package.

Upon re-submitting it came to my attention that the previous \$3,000 fee was not refunded. As such, can the current \$3,000 charge be refunded?

Thanks,
Andrius

Hi Pierre,

Thank you for providing this. To confirm, with this we would be able to issue the potential PTTW to "Davidson Shea Properties Inc." (as opposed to Davidson Co-Tenancy). Please confirm if this is acceptable. If so I will continue processing the application with Davidson Shea Properties Inc. as the applicant.

Thanks,

Jon Greenberg

Mr. Pierre Dufresne
Davidson Shea Properties Inc.
237 Somerset Street West
Ottawa, Ontario
K2P 0J3

Dear Mr. Dufresne,

RE: Permit To Take Water 2630-AUPJNY
Stittsville South - Area 6 Development
5960 & 5970 Fernbank Rd
5993 Flewellyn Rd
Ottawa

Reference Number 7656-ATQS6Y

Please find attached Permit to Take Water 2630-AUPJNY which authorizes the withdrawal of water in accordance with the application for this Permit to Take Water, dated December 6, 2017 and signed by R. Douglas Lazier.

Please note this Permit expires January 31, 2025.

Ontario Regulation 387/04 (Water Taking and Transfer) requires all water takers to report daily water taking amounts to the Water Taking Reporting System (WTRS) electronic database (<https://www.lrcsdc.lrc.gov.on.ca/wtrs/>). Daily water taking must be reported on a calendar year basis. If no water is taken, then a "no taking" report must be entered. Please consult the Regulation and Section 4 of this Permit for monitoring requirements.

If you have questions about reporting requirements, please call the WTRS Help Desk at 416-235-6322 (toll free: 1-877-344-2011) or by email, WTRSHelpdesk@ontario.ca. It is preferred that you submit your data directly and electronically to the WTRS. Where this is impracticable, please contact the WTRS Help Desk to arrange for written submission of your data.

Take notice that in issuing this Permit, terms and conditions pertaining to the taking of water and to the results of the taking have been imposed. The terms and conditions have been designed to allow for the development of water resources, while providing reasonable protection to existing water uses and users.

Yours truly,

A handwritten signature in black ink, reading "Peter Taylor". The signature is written in a cursive, flowing style. Below the signature is a horizontal line.

Peter Taylor

Subject: Notification of Application for Permit to Take Water

This E-mail message has been sent to you as a result of the requirements of Ontario's Water Taking and Transfer Regulation (O.Reg 387/04). The regulation requires that the Ministry of the Environment and Climate Change notify municipalities and conservation authorities of applications for Permits to Take Water to withdraw water from locations within their jurisdiction.

You may examine the wording of the Regulation online at the following web site:

http://www.e-laws.gov.on.ca/html/regs/english/elaws_regs_040387_e.htm

Notification of Application for Permit to Take Water

Ministry Reference Number:
7656-ATQS6Y

Applicant:
Davidson Shea Properties Inc.
237 Somerset St W
Ottawa, Ontario
K2P 0J3

Location of Water Taking(s):
5960 and 5970 Fernbank Road
5993 Flewellyn Rd
Ottawa City

Ministry of the Environment Region:
Eastern

Description:

This proposal is for a new Permit To Take Water for construction dewatering purposes. Water will be taken from excavation trenches and a stormwater management pond in order to construct a residential development. Details of the water taking are as follows:

Source Name: Excavation Trenches
Purpose: Construction Dewatering
Maximum rate per minute (Litres): 20,531
Maximum number of hours of taking per day: 24
Maximum volume per day (Litres): 9,855,000
Maximum number of days of taking per year: 365
Earliest calendar date of taking (mm/dd): 01/01
Latest calendar date of taking (mm/dd): 12/31
Period of taking: 7 years

Source Name: Stormwater Management Pond Excavation
Purpose: Construction Dewatering
Maximum rate per minute (Litres): 13,825
Maximum number of hours of taking per day: 24
Maximum volume per day (Litres): 6,636,000
Maximum number of days of taking per year: 365
Earliest calendar date of taking (mm/dd): 01/01
Latest calendar date of taking (mm/dd): 12/31
Period of taking: 7 years

Subject: FW: Notification of Application for Permit to Take Water
Date: January 8, 2018 1:39:38 PM

Hi Sarah

I'm happy to provide you with the comments below on the PTTW application (Ministry Reference Number: 7656-ATQS6Y).

Please let me know if you have any questions.

Thanks, Brian

With regard to the notice of application for permit to take water, the subject lands are located as part of the Stittsville Area 6 Plan of Subdivision. The subdivision ultimately connects and outlets to the Faulkner Drain through the proposed stormwater management facility to be constructed. A number of concerns were raised and addressed through the Draft Plan of Subdivision and subsequent Subdivision Agreement. Among those issues identified, water quality and quantity protection, sediment and erosion protection for the site completed prior to and as part of construction. The owners have agreed to:

- Erect protective fencing along the setback perimeter of the Faulkner Drain prior to any site preparation works within the Subdivision to ensure no disturbance to the watercourse;
- Prior to any construction stormwater management plans and erosion and sediment control plans approved and implemented;
- Provide short term and long term solutions to water quality and quantity impairment as the result of construction activities associated with the development of the subdivision

Therefore should the water from the permit to take water propose to discharge to the Faulkner Drain, it will need to be verified that the additional water will not adversely impact erosion of the channel, maintain water quality and quantity and should be referencing supporting documentation (Conceptual Stormwater Management Plan prepared by Novatech dated June 3, 2105).

Should you have any additional questions, please do not hesitate to contact me for additional information.

Consultation Details:	

Permit Technical Evaluation

Assess Complexity <u>Evaluate Risk for Impact:</u> The proposed water taking is related to the construction of a residential subdivision in Area 6, Stittsville South, Ottawa Ontario. The two (2) water taking sources are identified as: a) Source 1: a trench system, which will occupy various locations on site during the construction process, and b) Source 2: a storm water management pond, which will be a permanent fixture on site. The requested duration of water taking is eight (8) years. The maximum volumes from each source requested are: 9,855,800 L day-1 from source 1 and 6,636,000 L day-1 from source 2, for a total requested daily volume of 16,491,000 L. Typical values are estimated to be 3,285,000 L day-1 and 2,212,000 L day-1 for Sources 1 and 2, respectively.
--

Boundary Assessment: <u>Extent of Impacts Anticipated:</u>

The radius of influence calculations provided are conservative and appropriate for the site.

The proposed excavations will extend through both the overburden and fractured bedrock units found on site. The hydraulic conductivity on site is estimated to be 0.01 cm s⁻¹ but is spatially variable and has been measured to be as high as 0.02 cm s⁻¹ in areas. The water table is characterized as shallow, ranging between 0.5 mbgs to 3 mbgs, while the expected lowering of the water table at each location is 7 m and 5 m for Source 1 and Source 2 respectively. These reductions in water level have an anticipated radius of influence of 210 m and 150 m, respectively.

Assess Potential Effects on other Users (Interference):

Indications of past interference from this taking? ☒ Yes ☐ No

Several residences that rely on domestic wells are located both to the north and to the south of the site. The wells in question are advanced to depths ranging between 18 mbgs and 50 mbgs, with water found at depths of 10 mbgs and 48 mbgs. Two wells to the north of the property exist within the calculated radius of influence, and three, to the south of the property exist either at the edge of the anticipated radius of influence due to dewatering, or slightly outside it. Given the depth of the wells, it is unlikely that impacts will occur in these wells. In addition to this, the consultant has proposed the installation of a monitoring well between the stormwater monitoring pond and the residences to detect possible impacts. I recommend that a monitoring well also be constructed in the north to measure potential impacts caused by dewatering.

A condition to the permit has been included to specify monitoring for static water levels to protect domestic wells to the north and south of the site. It is my opinion that the overall risk for interference is low.

Assess Potential Effects on the Environment:

Surface Water:

The proposed water takings are high-volume and are long-term in duration. A large quantity of extracted groundwater, identified as high in turbidity. Extracted water is to be discharged to vegetated areas on site. The discharged water will flow along existing drainage ditches that terminate the Jock River. A plan for the monitoring of water discharges, trigger mechanisms and contingencies is included in the permit application. I defer to a qualified person with a specialization in surface water to assess these plans.

Groundwater:

No groundwater contaminants have been identified in the area. Water takings are non-consumptive and impacts to the Rideau watershed, in which the site is located are not anticipated.

Review and Consider EBR Comments:

Not Applicable

General Comments:

It is my opinion that the proposed water taking as described, is reasonable and that impacts or interference with existing groundwater users is unlikely. Given the long term nature of the water taking, the use of monitoring wells is suggested to collect data on static water levels to both the north as well as the south of the site. This data should be used to determine if domestic wells in these areas are likely to be impacted during the course of dewatering.

It is my recommendation that the requested permit be approved with conditions.

☒ Recommend Approval with Conditions

Dear Pierre Dufresne:

**Re: Application for Approval of Permit To Take Water
Tartan Crestway Developments Inc./New PTTW/Ponds/Construction Dewatering
City of Ottawa, Ontario
Reference Number 7656-ATQS6Y**

We acknowledge receipt of your application for a Permit to Take Water for a New Permit and the fee in the amount of \$3000.00, received on December 1, 2017, for the taking of water from a source located at:

Site Location: 5960 and 5970 Fernbank Road and 5993 Flewellyn Road
City of Ottawa, Ontario

The Ministry's reference number for your application is 7656-ATQS6Y. Please quote this number in any correspondence or enquiries regarding this application.

In our screening of your application for completeness, we have noted that the following additional information/documentation is necessary for us to process your application:

1. Please provide a five (5) or six (6) digit North American Industry Classification System (NAICS) code for the applicant.
2. Please confirm the applicant name(s) you are looking to have this Permit to Take Water (PTTW) issued to. Please note that the proposal would be posted to the Environmental Registry under the applicant name(s) in accordance with the Environmental Bill of Rights, and that the Permit to Take Water (PTTW) would be issued to this entity. Please also note that a draft PTTW cannot be issued in association with the above proposal.
3. Please note that the application form must be signed by an officer or director of the company. Please confirm if this has been done. If the application form has not been signed by an officer or director an alternative option would be to provide a letter granting signing authority to that individual.

Please be advised that should we not receive the above information/documentation or a response with explanation within two weeks of the date of this letter, we will consider your application withdrawn, and close your file accordingly. The submitted fee would then be refunded.

If you have any questions regarding the technical information required for your Permit to Take Water Application please contact our Eastern Region Office at (613)540-6868. Should you have any general questions regarding your application please feel free to contact me at the above telephone number. Information regarding Permits to Take Water is also available at www.ene.gov.on.ca.

Sincerely,

Jonathan Greenberg
Application Assessment Officer
Environmental Assessment and Approvals Branch

Submittal Requirements

The following are required to be submitted with this application:

- 1. Consent to Disclose Information:** Consultants and other third parties may make requests for information on behalf of an individual or corporation. However, if the requester is not the owner of the property, **the requester must provide the City of Ottawa with a 'consent to disclose information' letter, signed by the property owner.** This will authorize the City of Ottawa to release any relevant information about the property or its owner(s) to the requester. Consent for disclosure is required in the event that personal information or proprietary company information is found concerning the property and its owner. All consents must clearly indicate the name of the property owner as well as the name of the requester, and must be signed and dated.
- 2. Disclaimer:** Requesters must read and understand the conditions included in the attached disclaimer and submit a signed disclaimer to the City of Ottawa's Planning, Infrastructure and Economic Development Department. This disclaimer is related to the Historic Land Use Inventory and must be received by the City of Ottawa, signed and dated by the requestor, before the process can begin.
- 3. A site plan or key plan of the property, its location and particular features.**
- 4. Any significant dates or time frames that you would like researched.**

Disclaimer

For use with HLUI Database

CITY OF OTTAWA ("the City") is the owner of the Historical Land Use Inventory ("HLUI"), a database of information on the type and location of land uses within the geographic area of Ottawa, which had or have the potential to cause contamination in soil, groundwater or surface water.

The City, in providing information from the HLUI, to Paterson Group ("the Requester") does so only under the following conditions and understanding:

1. The HLUI may contain erroneous information given that such records and sources of information may be flawed. Changes in municipal addresses over time may have introduced error in such records and sources of information. The City is not responsible for any errors or omissions in the HLUI and reserves the right to change and update the HLUI without further notice. The City does not, however, make any commitment to update the HLUI. Accordingly, all information from the HLUI is provided on an "as is" basis with no representation or warranty by the City with respect to the information's accuracy or exhaustiveness in responding to the request.
2. City staff will perform a search of the HLUI based on the information given by the Requester. City staff will make every effort to be accurate, however, the City does not provide an assurance, guarantee, warranty, representation (express or implied), as to the availability, accuracy, completeness or currency of information which will be provided to the Requester. The HLUI in no way confirms the presence or absence of contamination or pollution of any kind. The information provided by the City to the Requester is provided on the assumption that it will not be relied upon by any person whatsoever. The City denies all liability to any such persons attempting to rely on any information provided from the HLUI database.
3. The City, its employees, servants, agents, boards, officials or contractors take no responsibility for any actions, claims, losses, liability, judgments, demands, expenses, costs, damages or harm suffered by any person whatsoever including negligence in compiling or disseminating information in the HLUI.
4. Copyright is reserved to the City.
5. Any use of the information provided from the HLUI which a third party makes, or any reliance on or decisions to be based on it, are the responsibilities of such third parties. The City, its employees, servants, agents, boards, officials or contractors accept no responsibility for any damages, if any, suffered by a third party as a result of decisions made as a result of an information search of the HLUI.
6. Any use of this service by the Requestor indicates an acknowledgement, acceptance and limits of this disclaimer.

Subject: **Authorization Letter, HLUI Search
Phase I-Environmental Site Assessment
5993 Flewellyn Road
Ottawa, Ontario**

Dear Sir or Madame,

Please consider this letter as confirmation that Paterson Group has been retained to conduct a Phase I-Environmental Site Assessment at the aforementioned property.

With this letter, the property owner authorizes the City of Ottawa and other regulatory bodies to release, to Paterson Group, information requested for the purpose of completing an environmental assessment of the property.

Name of Company/Property Owner:

2813962 Ontario Corporation

Name of Representative:

William Davidson

Authorization of Representative:

[Signature]

Date:

15 OCT 2021

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Appendix: Database Descriptions

*Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Nov 2023

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Apr 2024

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2024

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2022

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2024

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2023

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-May 2024

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Mar 31, 2024

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Aug 2023

Delisted Fuel Tanks:

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023

Environmental Activity and Sector Registry:

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval). Please see our ECA database.

Government Publication Date: Oct 2011-Apr 30, 2024

Environmental Registry:

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Mar 31, 2024

Environmental Compliance Approval:

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011-Apr 30, 2024

Environmental Effects Monitoring:

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches:

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Mar 31, 2024

Environmental Issues Inventory System:

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial

EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Penalty Annual Report:

Provincial

EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2023

List of Expired Fuels Safety Facilities:

Provincial

EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal

FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal

FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Mar 2024

Fisheries & Oceans Fuel Tanks:

Federal

FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Oct 31, 2022

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Dec 2021

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: 31 Oct, 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2024

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2022

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

[NEES](#)

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003***National PCB Inventory:**

Federal

[NPCB](#)

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008***National Pollutant Release Inventory 1993-2020:**

Federal

[NPR2](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Sep 2020**National Pollutant Release Inventory - Historic:**

Federal

[NPRI](#)

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017**Oil and Gas Wells:**

Private

[OGWE](#)

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-May 31, 2024**Ontario Oil and Gas Wells:**

Provincial

[OOGW](#)

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Aug 2023**Inventory of PCB Storage Sites:**

Provincial

[OPCB](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013**Orders:**

Provincial

[ORD](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Mar 31, 2024

Canadian Pulp and Paper:

Private

[PAP](#)

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

[PCFT](#)

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

[PES](#)

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011-Apr 30, 2024

NPRI Reporters - PFAS Substances:

Federal

[PFCH](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Sep 2020

Potential PFAS Handlers from NPRI:

Federal

[PFHA](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Sep 2020

Pipeline Incidents:

Provincial

[PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Private and Retail Fuel Storage Tanks:

Provincial

[PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

[PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Mar 31, 2024

Ontario Regulation 347 Waste Receivers Summary:

Provincial

[REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial

[RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004-May 2024

Retail Fuel Storage Tanks:

Private

[RST](#)

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2024

Scott's Manufacturing Directory:

Private

[SCT](#)

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills:

Provincial

[SPL](#)

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X. The Ministry of the Environment, Conservation and Parks cites the coronavirus pandemic as an explanation for delays in releasing data pursuant to requests. This database includes spill incidents that occurred in Mar 2023-Mar 2024 in addition to those listed in the Government Publication Date.

Government Publication Date: 1988-Jan 2023; see description

Wastewater Discharger Registration Database:

Provincial

[SRDS](#)

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2021

Anderson's Storage Tanks:

Private

[TANK](#)

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal

[TCFT](#)

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2023

Variances for Abandonment of Underground Storage Tanks:

Provincial

[VAR](#)

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial

[WDS](#)

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011-Apr 30, 2024

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial

[WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System:

Provincial

[WWIS](#)

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Dec 31 2023

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
