Re: Tree Removal Tally – Riverside South Development Corporation Phases 8/13

Dear Mary,

As per your request this brief report details the sizes and species of trees I recently marked for removal along the access corridor between phases 8 and 13 of RSDC. The tables below detail the number of living stems by diameter and their locations. It is important to note that although still alive most of the ash are suffering from advanced infestations of Emerald ash borer (*Agrilus planipennis*).
